4) By adding a letter to a stem or by inserting a letter, so that quadriliteral verbs arise, most of which follow the Piʿēl in the method of inflection, e. g. פַּרְשֵׂז *to spread*, Job 26. 9, כַּרְסֵם *to consume.* Pass. רָמְטַשׁ Job 33. 25. Ex. 16. 14. Others in *hiph.* Gen. 13. 9. Is. 30. 21.

5) By broadening the vowel *ā* of first syll. into *â*=*ô* § 2, *Pôʿēl*, *pass. Pôʿal.* The proper force of this form is *conative, qôṭēl to attempt*

to kill. The form is rare in the regular verb, but is often used instead of *Pi'ēl* in verbs *'Ain doubled* § 42. Exx. are שׁרשׁ *to strike root*, Is. 40. 24, שׁפט *to contend in judgment*, Job 9. 15, cf. 1 Sam. 21. 3, Is. 10. 13, Hos. 13. 3, Ps. 101. 5 (Baer reads Ps. 62. 4 as *Pu.* in *o*).

[1] Pharaoh. [2] See § 10.4. [3] See אִשָּׁה in Vocab. [4] See note *a*) p. 19.

These are the words which I have spoken. Harden not your heart lest Jehovah thy God be angry. Seek ye my face; thy face will we seek. Walk before me and sanctify yourselves. The asses have been found which thou wentest to seek. I cannot speak to this people for they have hardened their heart. We heard the voice of Jehovah walking in the garden and we hid ourselves from his face. He said unto the woman, Speak, and the woman spoke. Keep yourselves from this great iniquity. And now behold the king walketh (*part.*) before you, and I am old, and I have walked before you from my youth until this day.

§ 27. THE CAUSATIVE, *HIPH'IL*, *HOPH'AL*.

1. *Hiph'îl.* The causative is formed by prefixing the letter *h* with *i* (properly a thinned *a*) to the stem, and expanding the final vowel to *î*, הִקְטִיל.

Rule for inflection. The final *î* is maintained in open syllables, i. e. with vocalic affixes (*a i u*) and has the accent; in shut syll. it becomes *a* in perf., and generally *ē* after the perf.

In meaning Hiph. is causative of Qal, as פָּקַד *to oversee,* הִפְקִיד *to make one oversee, to entrust to.*

2. *Hoph'al.* The Hoph. is *passive* of the Hiph. in its various senses.

Rem. *a.* The *i* of first syll. appears only in perf., the real *a* elsewhere. The *î* of final syll. is merely an extension of *ē*, which itself has arisen out of *a*. In inf. *i* sometimes remains in first syll., Deut. 7. 24; 28. 48, Jos. 11. 14 &c. The initial *he* may be elided after prep., Num. 5. 22, Is. 23. 11; 29. 15, Am. 8. 4 &c., cf. Deut. 1. 33, Is. 3. 8, Jer. 39. 7. On the other hand the *he* sometimes remains in impf. 1 Sam. 17. 47.

Rem. *b. The Jussive.* The Jussive is יַקְטֵל, and with *vav conv.* וַיַּקְטֵל; in 1 *sing.* the *î* generally remains, Am. 2. 9. The Cohort. is אַקְטִילָה. The long imperat. is הַקְטִילָה.

In Hoph'al for *o* there is sometimes *u* in first syll., 2 Sam. 20. 21, 2 K. 4. 32. Imper. in Hoph. twice found, Ez. 32. 19, Jer. 49. 8.

Rem. *c.* The prefixed *h* may be a softened *t*, which appears in a few cases, Hos. 11. 3, Jer. 12. 5, or from *s* or *sh*, an interchangeable sound. Aramean has a caus. *shaqṭēl*, and there are some nouns, though no verbs of this form in Heb. For *h* the other dialects have ' (t=sh=s=h=').

---

to be king, rule	מָלַךְ	to make king	*Hiph.*	to cast	שלך *Hiph.*
to be just	צָדַק	to justify	*Hiph.*	to destroy	שמד *Hiph.*
to dwell	שָׁכֵן	to place	*Hiph.*	to divide	בדל *Hiph.*
to remember	זָכַר	to commemorate	*Hiph.*	there is	יֵשׁ

he will hide his face	יַסְתִּיר פָּנָיו
may he hide his face	„ יַסְתֵּר
and he hid his face	„ וַיַּסְתֵּר
hide thy face	הַסְתֵּר, הַסְתִּירָה פָּנֶיךָ
hide not thy face	„ אַל־תַּסְתֵּר
let me hide my face	אַסְתִּירָה פָּנַי
he will hide his face	הַסְתֵּר יַסְתִּיר פָּנָיו

Rule. The *infin. abs.* expresses the idea of the verb simply, without conditions of person, mode &c.; hence when it precedes the finite verb, there is first the idea bare and then the idea modified; and the effect of the whole is to express with some variety of emphasis *the fact* (not the *quality*) of the action as now predicated in the finite verb.[1]

EXERCISE. TRANSLATE.

אַתָּה תְמֹלַכְתָּ אֹתִי תַּחַת דָּוִד אָבִי׃ 2 הִגֵּה פָּנַי בָּעָם הַזֶּה
וְהִשְׁמַדְתִּי אֹתָם מֵעַל־פָּנַי הָאֲדָמָה׃ 3 וַיַּשְׁכֵּן אֱלֹהִים לִפְנֵי גַן

בְּעַד הַחוֹמָה׃ 7 וַיִּשְׁלְחוּ וַיִּקְרְאוּ אֶת־יִרְבְעָם וַיַּמְלִיכוּ אֹתוֹ עַל־
יִשְׂרָאֵל׃ 8 וְהָרָקִיעַ הָיָה מַבְדִּיל בֵּין מַיִם לָמָיִם׃ 9 אַל־נָא
תַּסְתֵּר אֶת־פָּנֶיךָ מֵהָעָם הַזֶּה׃

There is a time to keep and a time to cast away. And he rained fire from heaven upon that city and destroyed it[2] from upon the face of the ground. Justify not the wicked. Let me hide my face from this evil people for they have done-corruptly (*hiph.*) before me upon the earth. The king said, Cast his head unto us over[3] the wall; and they cast his head unto them. For he will surely-rain (*inf. abs.*) fire from heaven upon that evil city and will destroy it[2] and it shall not be remembered more for ever. I have been cast upon thee. They went down unto the city to fight against it, but they could not destroy it. R^{e}'ûbēn said, Spill not blood, cast him into this pit which *is* in the wilderness; and they stripped Yôṣēph and cast him *into* the pit (*acc.* term.), and the pit *was* empty.

---

[1] When the inf. abs. *follows* force seems given not to the predication of the action, but to the action predicated.

[2] אֵת suff. § 49.

[3] בְּעַד.

§ 28. SKELETON PARADIGM OF THE REGULAR VERB.

	simple		*intensive*			*causative*	
	qal	niph.	pi‘ēl	pu‘al	hithp.	hiph.	hoph.
	act.	*reflex.*	*act.*	*pass.*	*reflex.*	*act.*	*pass.*
perf.	קָטַל	נִקְטַל	קִטֵּל	קֻטַּל	הִתְקַטֵּל	הִקְטִיל	הָקְטַל
imperf.	יִקְטֹל	יִקָּטֵל	יְקַטֵּל	יְקֻטַּל	יִתְקַטֵּל	יַקְטִיל	יָקְטַל
imper.	קְטֹל	הִקָּטֵל	קַטֵּל		הִתְקַטֵּל	הַקְטֵל	
inf. cons.	קְטֹל	הִקָּטֵל	קַטֵּל	קֻטַּל	הִתְקַטֵּל	הַקְטִיל	הָקְטַל
inf. abs.	קָטוֹל	הִקָּטֹל	קַטֵּל	קָטֹל		הַקְטֵל	הָקְטַל
part. act.	קֹטֵל		מְקַטֵּל		מִתְקַטֵּל	מַקְטִיל	
part. pass.	קָטוּל	נִקְטָל		מְקֻטָּל			מָקְטָל

1. The names N*i*ph‘*a*l, P*i*‘*ēl* &c. indicate *what vowels* verbs have in the perfects of these parts.

The *i* in first syll. of Pi‘ēl and Hiph‘îl is a thinned *a*, which shews itself in all parts after the perf.; and even the *ē* and *î* of second syll. seem to have arisen out of *a*.

2. The imperfect may be considered the part regulative of the imperat. and infin. cons., and these three parts end alike, and after the Niph. the participle also agrees.

The imperf. *ends like the perf.* after Niph.; and in Niph. it ends in *ē*.[1]

To this rule that the imperf. imper. and inf. cons. end alike there is, first, the known exception of the Qal of intrans. verbs, in which infin. cons. usually adopts *o*, though the other two are in *a*; and second, the Hiph. imper. agrees of course, not with the ordinary, but with the *jussive* imperf., and ends in *ē*.

3. The infin. abs. has *o* in the last syll. except in Hiph. and Hoph. where it has *e*; though see Rem. *a* § 26 on infin. abs. Pi‘ēl.

4. The punctuation of the preformative letters of the imperf. is *i* (or *a*) in Qal, and elsewhere vocal sh^{e}va. If the part begins with *h* the preformative letter displaces the *h* and takes its vowel. § 9.

---

[1] Perhaps it is practically simpler for the learner to assume the *infin. cons.* as the base of the parts after the perf., and what is said above of the imperf. may be applied to it.

5. The passives usually have no imperative.

6. After Niph. the preformative letter of the participle is *m*, pointed as the preform. of imperf. This *m* is possibly the pron. *mi* "who" used relatively.

7. Finally it is of much consequence that the learner, before quitting the regular verb, should well remember these points: where the first radical has sh^{e}va vocal under it (2 pl. perf., inf. cons., imper. Qal); where the 2nd rad. has sh^{e}va vocal (all parts with vocalic affixes *a i u*); where the 1st rad. has sh^{e}va silent (at the end of a syll., imperf. Qal, perf., part. Niph., all Hiph. Hoph.); where the 1st rad. is doubled (imperf. Niph. and parts); where 2nd rad. is doubled (Pi. Pu. Hithp.);—these and such points are of importance in the irregular verbs.

EXERCISE: PARSE.

כָּתַבְתִּי, כְּתָבִים, כְּתוּבִים, תִּכְתֹּב, יִכָּתֵב, שְׁמֹר, נִשְׁמָר, נִשְׁמֹר, הִשָּׁמֵר, מְשַׁמֵּר, יִרַּדֵּם, אֶשְׁבֹּר, אֲשַׁבֵּר, מַזְכִּיר, הַמְשִׁיל, רֻדַּם, הָשְׁבַּר, זָכוֹר, תַּמְשִׁילוּ, תִּשְׁקְלִי, שְׁכַב, מֹלֶכֶת, יַמְטִיר, יַפְקֵד, מְסַתֵּתֵר, יְקַדֵּשׁ, תִּלָּבַשְׁנָה, תִּזָּכַרְנָה׃

§ 29. SECOND DECLENSION.

1. The words embraced under the first declension were chiefly concrete words, having a resemblance in form to the *perfect* of verbs. A very large class of nouns have an affinity in form with the *imperfect*, that is with the abstract noun at the base of that form. They are thus themselves chiefly abstract nouns. They are properly monosyllables, but are pronounced and spelled as dissyllables through the slipping in of a furtive vowel between the last two radicals.

	A class.	I class.	U class.	
1)	קַטַל *qaṭl*	קִטַל *qiṭl*	קָטָל *qoṭl*	primary form
2)	קַטַל *qaṭl*	קֵטַל *qēṭl*	קֹטַל *qōṭl*	under the tone
3)	קָטֶל *qéṭel*	קָטֶל *qḗṭel*	קָטֹל *qṓṭel*	present form.

The words are monosyllables with a short vowel of one or other of the three classes after the first radical. Under the tone the vowels *i o* became *ē ō*, § 6. 2; and a few words have remained in this condition, as גַּיְא *valley,* נֵרְדְּ *nard,* קשְׁטְ *truth.* But there was, as in other languages,[1] a natural tendency to separate two final consonants by a furtive vowel, and a slight *e* (ṣ°ghol) slid in after the second letter. The words thus became dissyllabic, though the tone-syllable remained the same, now the *penult.* The furtive *e* by a species of attraction depressed the primary *a* of first class also to *e.* The dilated form of the words thus appears only when the third letter is final.

A smaller number of words had the short vowel after the second radical as *qṭal, qṭil, qṭol,* under the tone *qṭal qṭēl qṭōl,* קָטַל קָטֵל קָטֹל. These forms are chiefly retained by verbs and enter into the imperf. and related parts.

From the furtive ṣ°ghol the words are often called *ṣegholates,* and according to the class of their primary short vowel *a i o*, ṣegholates of *first, second* or *third* class.

From the presence of weak letters the ṣ°ghols may be obscured, but *the invariable sign of this class of word is the accent on the penult.*

Rules for declension. 1) The cons. state is, of course, like the absolute.

2) With all inflectional additions except the plural, the word appears in its primary monosyllabic form, *qaṭl, qiṭl, qoṭl.*

3) The plural both mas. and fem. assumes the form of a word of first declension, with pretonic *ā*, *q°ṭālîm, q°ṭālôth,* as if from the form *qṭal.* When the pretonic *ā* becomes lost, the primary vowel is resumed, *qaṭ̃lê. qiṭ̃lê* &c.

---

[1] Comp. alarm and alarum; Gaelic tarbh=tárabh, Dutch Delft=Déleft &c.

	A class.	I class.	U class.
abs. sing.	מֶלֶךְ king	סֵפֶר book	בֹּקֶר morning
cons.	,,	,,	,,
light suff.	מַלְכִּי	סִפְרִי	בָּקְרִי
heavy suff.	מַלְכְּכֶם	סִפְרְכֶם	בָּקְרְכֶם
abs. du.	מַלְכַּיִם	סִפְרַיִם	בָּקְרַיִם
cons. du.	מַלְכֵּי	,,	,,
abs. pl.	מְלָכִים	סְפָרִים	בְּקָרִים
cons. pl.	מַלְכֵי	סִפְרֵי	בָּקְרֵי
light suff.	מְלָכַי	סְפָרַי	בְּקָרַי
abs. sing. fem.	מַלְכָּה	סִפְרָה	בָּקְרָה
suff.	מַלְכָּתִי	,,	,,
abs. plur.	מְלָכוֹת	סְפָרוֹת	בְּקָרוֹת
suff.	מַלְכוֹתַי	,,	,,
cons. pl.	מַלְכוֹת	סִפְרוֹת	בָּקְרוֹת

2. *Feminines with ṣegholate ending.* According to Rem. *b.* § 16 the *fem.* is many times made by simply appending *t* to the mas. This is most easily done when the mas. ends in a vowel sound or in a single consonant preceded by a tone-long vowel, but it is occasionally done even when a pure long vowel precedes. The words then end in two consonants and contract the long vowels of the mas. to their corresponding short, except that even *ē* becomes *a;* in this way terminational forms arise like *qaṭl qiṭl qoṭl*, which, precisely as these do, resolve themselves into dissyllables, when without inflectional additions.

mas.	(מַמְלָךְ)	קִטֵּל	גְּבִיר	מֵינִיק	נָחוּשׁ	קָטוֹר
fem.	מַמְלָכָה	קִטְּלָה	גְּבִירָה	&c.	נְחוּשָׁה	קְטוֹרָה
or	(מַמְלַכְתְּ)	(קִטַּלְתְּ)	(גְּבִרְתְּ)		(נְחָשְׁתְּ)	(קָטָרְתְּ)
abs., cons.	מַמְלֶכֶת	קִטֶּלֶת	גְּבֶרֶת		נְחֹשֶׁת	קְטֹרֶת
suff.	מַמְלַכְתִּי	קִטַּלְתִּי	גְּבִרְתִּי		נְחָשְׁתִּי	קָטָרְתִּי
plur.	מַמְלָכוֹת	קִטְּלוֹת	גְּבִירוֹת		&c.	
cons.	מַמְלְכוֹת	,,	,,		,,	,,

1. Many of these words have the fem. of the more ordinary form, and this is generally used in the absolute.

2. The ṣegholate form is generally employed in the construct

and with suffixes, and sometimes also in the abs.; and some words seem to use only the ṣegholate form.

3. In general the plurals are formed regularly from the ordinary fem. or from what would be the ordinary fem. if it were found. Consequently the original *mas.* must be carefully attended to.

Rem. *a.* By § 22. Note ṣegholates of 1st class, having the *a* sound, are from transitive verbs, and those with *i o* from intrans. verbs. This law does not apply to the infinitives which end like their imperfects, in which the characteristic vowel stood in connexion with the preformative, § 22. Note p. 59. In a great many of 1st class in nouns and in *all* infin. of form *qṭal* the *a* has been thinned to *i*, and the inflected forms coincide with those of 2nd class. Some words have both vowels. See Add. Notes to 2nd Declens.

Rem. *b.* For *i* the alternative *e* sometimes appears; and also *u* for *o*.

Rem. *c.* Compare the cons. du. with cons. plur.; the latter has half open syll. § 6. 2 e. The du., however, sometimes has pretonic $\bar{a}$ like the plur.

Rem. *d.* The word *n^{e}ḥosheth* shews that the termination *t* shifts the accent just like *āh* (ath), of which it is therefore probably a contraction.

WORDS FOR PRACTICE.

way	דֶּרֶךְ	righteousness	צֶדֶק *i*	valley	בִּקְעָה	ear	אֹזֶן
knee	בֶּרֶךְ *i*	image	צֶלֶם	foot	רֶגֶל	greatness	גֹּדֶל

soul	נֶפֶשׁ *f.*	memory	זֵכֶר	ransom	כֹּפֶר	tribe	שֵׁבֶט
food	אָכְלָה	horn	קֶרֶן	holiness	קֹדֶשׁ	mantle	אַדֶּרֶת
kingdom	מַמְלָכָה	war	מִלְחָמָה	nurse	מֵינֶקֶת *i*	maid	שִׁפְחָה

a holy hill הַר קֹדֶשׁ *my holy hill* הַר קָדְשִׁי

an idol of silver אֱלִיל כֶּסֶף *my idol of silver* אֱלִיל כַּסְפִּי

his weapons of warfare כְּלֵי מִלְחַמְתּוֹ

Rule. A suffix defining a compound expression is appended to the last word of the expression.

EXERCISE. TRANSLATE.

My king. Our kings. His books. Her righteousness. Our knees (*du.*) Thy feet (*du.*). Our horn. Their silver. My way

is hid (*perf. fem.*) from my God. For all flesh had corrupted his way upon the earth. And God created man in his image, in the image of God he created him. And your ways are not my ways. And all the people bowed-down upon their knees before their king. Let thine hand-maid speak in the ears of the king. I have set[1] my king upon Zion[2] my holy hill. God ruleth over the nations, God sitteth upon his holy throne. The face of Jehovah is against[3] the wicked to cut off (*hiph.*) their memory from the earth. And now inhabitant of Jerusalem and man of Judah judge between me and my vineyard.

Her mantle. Her mistress. His kingdom is an everlasting kingdom (k. of eternity). And they hid (*hiph.*) the boy and his nurse from the face of the queen. I will cut off their bow and all their weapons of warfare.

[1] נָסַךְ. [2] צִיּוֹן. [3] בְּ.

§ 30. THIRD DECLENSION.

1. Besides the words resembling the perfect which form the chief elements of the first declension and the nouns having affinity with the imperfect and infinitive forming the second, there is another formation which along with the words that follow it may be called a *third declension.* This is the *act. participle* Qal, *qôṭēl,* probably a later development and not found in all verbs.

Third declension. The type of this declension is the *act. part.* Qal; and the declension comprises all words, whether participles or nouns, ending in *ē* (çere) with a vowel unchangeable (by nature or position) in the place of the pretone.

Rules for inflection. 1) In words of this class the verbal law of inflection is followed, that is, with vocalic additions the vowel in the tone, the *ē*, is lost.

2) With consonantal additions the *ē* being thrown into an unaccented shut (half open) syllable, becomes the short vowel, i. e. *e* or *i; i* particularly with *labials.*

abs.	קִטֵּל	מְקַטֵּל	מַקֵּל	מִסְפֵּד	שֵׁם
cons.	קִטֵּל	מְקַטֵּל	מַקֵּל	מִסְפַּד	שֵׁם
vocalic suff.	קִטְּלִי	מְקַטְּלִי	מַקְּלִי	מִסְפְּדִי	שְׁמִי
conson. suff.	קִטֶּלְךָ	מְקַטֶּלְךָ	מַקֶּלְכֶם		שִׁמְךָ

2. A few monosyllabic words in *ē* attach themselves to this declension, the chief being בֵּן *son,* and שֵׁם *name,* which are irregular in the plural.

Rem. Words of the participial form retain *ē* in cons., and generally other words. Those of forms *miṣpēd, marbēç* usually take *a*; and *a* in first syll. of the latter form is thinned to *i* in the hurried cons., מִרְבַּץ. In gutt. forms *qoṭalkha* appears. See additional notes to third Declens.

3. Many nouns are formed in Hebrew by prefixing to the stem the letter *m* (comp. Greek ending *ma*). This *m* is probably connected with the pronoun *mā* "what". The two most common forms of such words are those with vowels *i*—*ā*, as מִשְׁפָּט *judgment,* and *a*—*ē*, as מַרְבֵּץ *stall.* The words express:

1) The *place* where the action is done, as מַרְבֵּץ *stall,* from רָבַץ *to lie;*

2) the *instrument* with which it is done, as מַפְתֵּחַ *key* from פָּתַח *to open;*

3) or more generally any embodiment of the action, as מַלְקוֹחַ *plunder,* from לָקַח *to take.*

WORDS FOR PRACTICE.

elder	זָקֵן	priest	כֹּהֵן	moon	יָרֵחַ	altar	מִזְבֵּחַ
mourning	מִסְפֵּד	judgment	מִשְׁפָּט	stall	מַרְבֵּץ	plunder	מַלְקוֹחַ
child	עוֹלֵל	child	עוֹלַל	key	מַפְתֵּחַ	fork	מַזְלֵג
one who curses	מְקַלֵּל	frog	צְפַרְדֵּעַ	dumb	אִלֵּם	blind	עִוֵּר

Exercise. Write the above words in cons. sing. and with a vocalic and consonantal suff., observing which of them are of first declens.; and translate:

This *is* my son and these *are* my son's sons. He sent the frogs upon all the land. All his prophets are dumb dogs they cannot bark. And the inhabitants of the earth shall go in that day like the blind and their blood shall be poured out like the dust. The

children of Israel ate the passover with (and) their staff in their hand. Behold the head of thine enemy who sought thy life (soul). The mourning of the dead *shall be* in all vineyards. These are the statutes and the judgments which ye shall keep in the land whither[1] ye *are* crossing, thou and thy son and thy son's son. Their land swarmed-with frogs (*acc.*) in the chambers of their kings.

[1] See Vocabulary under "who".

§ 31. VERBAL SUFFIXES.

VERBAL SUFFIXES TO HIPH'IL.

„ *f.*	יַקְטִילֵן	הַקְטִילֵן		יַקְטִילוּן

The pronominal suffixes to the verb almost always express the direct object or *accus.*, rarely the indirect or *dat.*

The suffixes do not express reflexive action; we cannot express *I killed myself* by suff.; either the reflex. verb, or

the simple verb with some circumlocution for *self,* must be used.

The following principles will be found sufficient:

1. Before the suffixes verbal forms altered or rubbed off are restored; 3 fem. s. *āh* becomes *ath* (§ 16 Rem. *b*); 2 fem. s. *t* becomes *tî,* and 2 mas. pl. *tem* becomes *tum,* (§ 12 Rem. *b*), though the weak *m* disappears.

2. Verbal forms ending in a vowel append the suffixes in their shortest consonantal form (*ni, ka, k, v, hu, ha, nu, kem, ken, m, n* § 12) immediately to the vowel termination.

3. In forms having no apparent vowel termination a helping vowel is used:

1) The suff. *ka kem ken*, as in nouns, have reduced the helping vowel to a mere sh^{e}va, § 19.

2) All the other suff. have a full vowel. Now the verb had originally *three* vowels both in the perf. and imperf. In the *perf.* the final vowel was *a*, and hence with suff. to the perf. the helping vowel sound is *a.*

3) In the *imperf.* some more indefinite sound ended the form (*e* or *u* perhaps) and this appears as *ē* with suff. to the imperf.

The *imperat.* follows the imperf.

4) The *inf. cons.* takes the suffixes of the *noun.*

4. *Effect of suff. on preceding vowels.* 1) The perf. Qal of all forms, and imperf. and imper. Qal in *a*, follow words of the *first declension,* preserving the tonic and losing the pretonic vowel when it is changeable, § 18. In open pretonic syllables *á* becomes *ā* § 6. 2.

2) The infin. cons. and imper. Qal follow the *second declension,* the form *q^{e}ṭōl* being a ṣegholate of *third* class. (The imper. of the form קָטַל follows the *first declens.* See above 4. 1.)

3) All other parts of the verb (ending in *ē* or *ō*) follow the verbal law, that is, with vocalic additions lose the tonic vowel, and may be said to follow the *third declens.* § 30.

5. In the imperf. between the accented helping vowel and the suffixes *ni nu* of 1st pers., *hu ha* of 3 pers. s., and

ka of the pausal *éka* of 2 mas. s., the letter *n*, having demonstrative force, is often inserted, and this by its union with the conson. of the suff. gives rise to forms *enni* (anni) *ennu, ennu ennah, ekka* (for *enhu, enha, enka*). Occasionally forms appear in which the union of the *n* with the following letter has not yet taken place.

Rem. *a*. On Perf. See remarks on nominal suffixes, § 19. In 3 fem. sing. the termination *ath* retains the tone except with heavy suffixes. The suff. of 2 fem. s. is oftener *ēkh;* comp. Jud. 4. 20, 1 Sam. 25. 32, Ezek. 27. 26, Mic. 4. 9 with Is. 54. 6, 60. 9. In 3 *pl. m.* מוֹ—ֶ Ex. 15. 10; 23. 31. Once 3 *s. m. tāhu* for *to*, Ezek. 43. 20.

Rem. *b*. On Impf. In the Impf. and related parts the sounds *eni, enu* of 1 p., and *em, en* of 3 p., may become in pause or under special phonetic influences, *ani, anu, am, an* (see § 10. 5 Rem.), cf. Gen. 19. 19; 29. 32, Ex. 29. 30, Deut. 7. 15. Suff. of 3 *pl. m.* in מוֹ—ֶ, Ex. 15. 7, 9 &c., Ps. 2. 5; 21. 10, 13 &c. Exx. of *enni* (anni) Gen. 27. 19, 31, Jer. 50. 44; of *ekka* Gen. 26. 3; 49. 25; of *ennu* Gen. 9. 5; 28. 22; 49. 9, 19, cf. 3. 15; of *ennah* Gen. 31. 39; 6. 16; 13. 15; 15. 8; Hos. 2. 5. In some cases the *n* is not assimilated, Jer. 22. 24, Ex. 15. 2, Deut. 32. 10. In other cases *pl.* in וּן— is base of the form, Prov. 1. 28, Ps. 63. 4, Is. 60. 7, Jer. 2. 24; 5. 22, cf. Job 19. 2.—The 2 and 3 *pl. fem.* assume with suff. the form of 2 *pl. m.*, Jer. 2. 19.

Rem. *c*. The infin. cons. uses the *verbal* suff. of 1 p. s. to denote the object, *me;* but in the other persons the *nominal* suff. alone are used to express both object and subject (*him* and *his*).

The suff. to the participle are also those of the *noun*, though in the *singular* of partt. verbal suff. are also used in poetry, Gen. 4. 14, 15, Ps. 18. 33.

The infin. cons. with suffixes *ka kem ken* occasionally appears of the form *q^{e}ṭolkha* instead of *qoṭl^{e}kha*, Gen. 2. 17; 3. 5, cf. Deut. 27. 4; 29. 11. The inf. קָטַל is inflected קָטְלִי, § 29 Rem. *a*, Gen. 19. 33.

Rem. *d*. The demonstrative *n* is occasionally seen in imperat. and perhaps a single time in the perf. and part., Gen. 30. 6.

It may be repeated (*foot note* p. 17), that with suff. the first syll. of infin. cons. is half open; and that on the contrary the prep. ל unites with it so closely as generally to form a shut syllable. The imper. is also half-open.

---

when he kept בְּשָׁמְרוֹ			*when the man kept* בְּשָׁמֹר הָאִישׁ	
before he kept me			לִפְנֵי שָׁמְרוֹ אֹתִי	
before the man kept me			לִפְנֵי שָׁמֹר הָאִישׁ אֹתִי	
when I kept the man	כְּשָׁמְרִי אֶת־הָאִישׁ	or	„	כַּאֲשֶׁר שָׁמַרְתִּי
until I keep the man	„ עַד שָׁמְרִי	or	„	עַד אֲשֶׁר אֶשְׁמֹר

Rule 1. The *infin. cons.* has the government of its verb and may take suffixes and prefixes. The usual order is infin., subject, object.

Rule 2. Instead of the infin. cons. with preposition the finite form may be used with a conjunctional expression formed of the prep. and relative.[1]

EXERCISE: TRANSLATE.

שְׁמַרְתַּנִי, שְׁמַרְתִּיךָ, וּשְׁמָרוֹ, לִשְׁמָרְךָ, וּלְשָׁמְרָהּ, שָׁמְרֵנִי, וַיִּשְׁמְרֵנִי, וַיִּלְבְּשֵׁנִי, תִּשְׁמְרֵם, וְאֶשְׁמְרֵנָּה, יִשְׁמְרֵהוּ, תִּשְׁמְרֵךָ; שְׁפָטוּנִי, שְׁפָטוּם, בְּשָׁפְטָךְ, שָׁפְטֵנִי; זְכַרְתָּם, אֶזְכְּרֵנָּה, וַיִּזְכְּרֵהָ, יִזְכְּרוּנִי, כְּהַזְכִּירוֹ, הַזְכִּירֵנִי, גְּנָבַתָּם, גְּנֹבוֹךְ; וְקִבְּצָךְ, קִבְּצָם, וְקִבַּצְתִּים, וּמְקַבְּצָיו, בְּקַבְּצִי, אֲקַבְּצֵךְ, יְקַבְּצֵהוּ;

I have gathered thee. I will gather her from the sides of the earth. And thou shalt keep me in thy way. Keep thou him. Before she kept the man. These are the generations of the heavens and the earth in the day of their creating (*niph.*). Judge me according-to my righteousness. Bury me not in Egypt, but I will lie with my fathers and thou shalt bury me in their burying-place. Make-me-tread[1] in the path of thy commandments for in it I delight. Jehovah shall keep thee from all evil, he shall keep thy soul. What is man that thou rememberest him or (and) the son of man that thou visitest him? Thy word[2] is proved and thy servant loveth it. Before he cut off all flesh by the waters of the flood. He promised to mention him before the king of the land.

[1] דָּרַךְ *hiph.* [2] אִמְרָה.

§ 32. IRREGULAR OR WEAK VERBS.

1. The word פעל *to do* was used as a paradigm by the older Grammarians. Now the first letter of this verb being *Pe,* the first letter of any verb was called its *Pe;* and in like manner the second letter was called its *ʿAyin*, and the third its *Lamed.* This mode of designation is employed in *weak verbs.*

[1] Prepositions are really *nouns* in the cons. state.

A weak verb is a verb which has one or more of its three stem letters a weak letter. The weak letters are the *Gutturals*, the *Quiescents* and *Nun*, i. e. the letters א ה ח ע ר ו י נ. Thus such a verb as נפל is called a *Pe Nun* verb; ילד a *Pe Yod* verb; קום a *ʿAyin Vav* verb; שמע a *Lamed Guttural* verb, and the like. The letters *ʾAleph* and *He* being gutturals at the beginning of a word and quiescents at the end have a double nomenclature, thus גלה is a *Lamed He,* but הלך a *Pe Gutt.*, מצא a *Lam. ʾAleph*, but אסף a *Pe Gutt.* In a few verbs *ʾAleph* quiesces when first radical, as in אמר, these are called *Pe ʾAleph* verbs. If a verb have more than one weak letter it is called after all the classes whose peculiarities it shares, ידה a *Pe Yod* and *Lam. He* verb. A verb like גלל whose second and third letters are the same is called a *Double ʿAyin* verb.

DESIGNATE THE CLASSES OF THESE VERBS.

קרא, אכל, שלח, שחט, שאל, בין, ילד, ישע, בקש, רום, ברך, עבר, שקל, נחה, נחם, נגף, רעע, קלל, בוא, סבב, קרע, רדף, ירא, ירה:

§ 33. PE NUN VERBS.

The letter *n* in Hebrew shews the same kind of feebleness that it has in other languages, when it is not sustained by being followed by a full vowel its sound is apt to be lost in that of the consonant after it, *in-licio = illicio; yingash = yiggash.*

1. When *n* stands at the end of a syllable (imperf. Qal, perf. and part. Niph., Hiph., Hoph.) it is assimilated to the next consonant, which is doubled, יִנְפֹּל=יִפֹּל, הִנְפִּיל=הִפִּיל (*yin-pol=yippol, hinpîl=hippîl*).

2. When *n* not having a full vowel of its own begins a word (imper., inf. cons. Qal) it often falls away altogether, as גַּשׁ for נְגַשׁ (*gash* for *nᵉgash*).

3. When *n* falls away in infin. cons. this form assumes the fem. termination *t*, becoming a ṣegholate noun having *i* when inflected (§ 29. Rem. *a*), as נְגֹשׁ, נְגֹשְׁתִּי.

Rem. The *n* initial does not usually fall away in verbs imperf. in *o*; and hardly ever in 2 pl. perf. in any verb. In many cases, esp. in later style the *n* is not assimilated, Deut. 33. 9, Is. 58. 3, Jer. 3. 5.— The root נָגַשׁ used as Par. is a defective verb really, see final Note § 45.

The *n* is not usually assimilated in verbs *Ayin Gutt.*, except niph. of נָחַם *to repent*, and occasionally נָחַת *to descend.*

4. The verb נָתַן *to give* assimilates its final *n* also in perf. and infin. cons. It has *ē* in imperf. and imper., יִתֵּן, תֵּן. Inf. cons. is תֵּת, תִּתִּי (תְּנָתִי תְּנָת).

The verb לָקַח *to take* assimilates the liquid *l* as if it were *n* (in Qal, Hoph.), as impf. יִקַּח for יִלְקַח.

5. *Nouns from Verbs* פ״ן. Nouns with *m* preformative are of the form מַתָּן, as מַפָּל *offal*, מַכָּה *stroke.*

[1] See § 7 note on *dag. forte conjunct.* p. 19. [2] Abram.

Give thou. I will not give my silver and my gold. Tell it not in Gath. Look not (*f.*) after thee lest God smite thee. Deliver me for thou art my salvation. Give ye glory to Jehovah. When

I gave the woman to the man for wife. I will deliver thee and thy tongue shall tell-of my righteousness. The serpent deceived her and she took of the tree and gave to her husband. They feared to draw near lest they should be smitten before the kings. Thou hast caused a deep-sleep to fall upon me. And he brought near the man and he took him in his arms and kissed him (*dat.*).

§ 34. PE GUTTURAL VERBS.

See the rules for Gutturals § 8.

1. By 2nd rule of Gutt. a gutt. requires a *ḥaṭeph* for simple sh^{e}va vocal (2 pl. perf., imper., infin. cons., Qal).

2. By 1st rule Rem. *a*, *i* before gutt. becomes *e*, and by 2nd rule the short vowel repeats itself under the gutt. in a *ḥaṭeph* corresponding to itself. Thus:

niph.	נִקְטַל	in gutt.	נֶחְטַל	and then	נֶחֱטַל
hiph. perf.	הִקְטִיל	„	הֶחְטִיל	„	הֶחֱטִיל
hiph. inf.	הַקְטִיל	„		„	הַחֲטִיל
hoph.	הָקְטַל	„		„	הָחֳטַל
impf. qal.	יִקְטַל	„	יֶחְטַל	„	יֶחֱטַל
	יִקְטֹל	„		„	יַחֲטֹל

3. By 4th rule of Gutt. the gutt. cannot be doubled, but, remaining single, causes the preceding short vowel to become its tone-long (parts connected with impf. Niph.), הַחְטַל=הָקְטַל.

Rem. *a*. In Active verbs (impf. in *o*) the primary *a* appears with the preformative (Note p. 59), as יַעֲמֹד, and *i* in Stative verbs, as יֶאֱהַב. With initial א the *i* appears even with impf. in *o*, as יֶאֱסֹף; but when rapidly pronounced (as at a distance from the tone) the sounds ֲֶ become ֲֲ in the 1st Gutt. verb, Gen. 27. 41, Numb. 3. 6, Jer. 15. 14.

Rem. *b*. The harder gutturals, while they always depress the vowel (*i*, *u* to *e*, *o*), often keep simple sh^{e}va at the end of the syllable, as יְחַכַּם *he will be wise*. Exceptionally *a* appears in *niph.*, Gen. 31. 27.

Attention should be directed to the half-open syllables in this verb, e. g. in forms ending in *a i u*; e. g. יַעֲמֹד *pl.* יַעַמְדוּ=יַעֲמְדוּ, § 6. 2. *d*, *e*, cf. *Note* p. 17.

to dream	חלם	to leave	עזב	to stand	עמד	to slay	הרג

EXERCISE. TRANSLATE.

וַתַּחַלְמָה חֲלוֹם בְּלַיְלָה אֶחָד אֲנִי וָהוּא׃ 2 וַיַּעֲזֹב כָּל־אֲשֶׁר לוֹ בְּיַד יוֹסֵף׃ 3 הִנֵּה שְׁנֵי הַמְּלָכִים לֹא עָמְדוּ לְפָנָיו וְאֵיךְ נַעֲמֹד אֲנָחְנוּ׃ 4 וַיִּזְכֹּר אֱלֹהִים אֶת־נֹחַ וַיַּעֲבֵר רוּחַ גְּדוֹלָה עַל־הָאָרֶץ׃ 5 חֲזַק וֶאֱמַץ כִּי אַתָּה תַּנְחִיל אֶת־הָעָם הַזֶּה אֶת־הָאָרֶץ אֲשֶׁר נִשְׁבַּעְתִּי לַאֲבוֹתָם לָתֵת לָהֶם׃ 6 וְאַבְרָם הֶאֱמִין בַּיהוָה וַיַּחְשְׁבֶהָ לוֹ צְדָקָה׃ 7 תְּנָה־לָּנוּ אֶת־הָאָרֶץ הַזֹּאת וְאַל־תַּעֲבְרֵנוּ אֶת־הַנָּהָר׃ 8 שָׁלַחֲנִי יְהוָה לַחֲבֹשׁ לְנִשְׁבְּרֵי לֵב׃

Abraham saw a ram taken by (in) his horns. And there shall be mourning in all vineyards for I will pass in thy midst saith (*perf.*) Jehovah. Pass not the river lest ye be smitten before your enemies. Jehovah will not permit (give) them (*acc.*) to pass the river. Our land shall not be tilled for our enemies shall stand in the midst-of-her. Let me cross the river that I may make this people inherit the land which Jehovah sware unto their fathers to give them. Bil'ām said unto the she-ass, Would-there-were[1] a sword in my hand for now I would slay thee (*perf.*). They said unto him, To bind[2] thee have we come down, to give thee into the hand of thine enemies. And the people served (*pl.*) Jehovah all the days of Joshua[3], and all the days of the elders who prolonged[4] days after Joshua. And he made to pass his children in the fire.

[1] לוּ יֵשׁ. [2] אָסַר. [3] יְהוֹשֻׁעַ. [4] *Hiph.* of ארך.

§ 35. PE 'ALEPH VERB.

1 *Pe 'Aleph* verbs are a sub-class of *Pe Gutt.* verbs. They have one peculiarity,—in impf. Qal *'Aleph* quiesces in the vowel *ô*; in all other respects they are *Pe Gutt.* This *ô* is for *â*, יאמַר=יְאָ'=יֹאמַר.

The verbs belonging to this class are *five*: אָבַד *to perish*, אָכַל *to eat*, אָמַר *to say*, אָבָה *to be willing*, אָפָה *to bake*, and sometimes אָחַז *to take*, and others.

Rem. *a*. The impf. is in *a*, but often, especially in pause in *ē*. With retracted accent יֹאבַד, וַיֹּאמֶר *and he said*.

Rem. *b*. In verb *to say* the frequently used form of *infin.* with prep. *to* is contracted (לֶאֱמֹר=) לֵאמֹר dicendo *saying*.

Rem. *c*. By § 8. Rem. *b*. initial א when next the tone readily takes *ḥaṭ. ṣ^{e}ghol*, but if the word be loaded at the end reverts to *ḥaṭ. path*. See *imper*. The imp. and inf. with prep. have oftenest *ḥaṭ. ṣ^{e}g.*; infin. itself perhaps *ḥaṭ. path*.

Rem. *d*. In 1st pers. impf. א of the root is omitted after the preformative א, as אֹמַר *I will say*, Gen. 24. 33, cf. 32. 5.

The verb אחז *to take* usually follows Pe 'Al., and אהב *to love*, occasionally, Hos. 11. 1, 14. 5. The *ô* sometimes appears in *niph.* Num. 32. 30, and in *hiph.* Hos. 11. 4, Jer. 46. 8, 1 Sam. 14. 24.—In general, א is apt to quiesce, Num. 11. 25, or drop out, 2 Sam. 19. 14; 20, 9; Job 32. 11; 35. 11, 1 Sam. 15. 5. (Ez. 28. 16 may be 3 *perf.* Pi.)

2. *Nouns from Pe Gutt. verbs.*

		First declension.			Second declension.		
sing.	*abs.*	חָכָם	אֲדָמָה	מַאֲכָל	עֶבֶד	עֵגֶל	חֹדֶשׁ
	cons.	חֲכַם	אַדְמַת	„	„	„	„
plur.	*abs.*	חֲכָמִים	„	„	עֲבָדִים	עֲגָלִים	חֳדָשִׁים
	cons.	חַכְמֵי	„	„	עַבְדֵי	עֶגְלֵי	חָדְשֵׁי
		(wise)	(ground)	(food)	(servant)	(calf)	(month)

In *first declens.* Rule 2 of Gutturals (§ 8. 2) applies. The form with *m* prefix (§ 30. 3) is pointed מַאֲ *maă*.— In *second declens.* 2nd class, the gutt. often depresses *i* to *e* (§ 8 Rem. *a*). In 3rd class the loss of *ō* leaves *ḥaṭeph qameṣ*. In *third declens.* no effects follow.

EXERCISE. TRANSLATE.

וַיֹּאמֶר יְהוָה אֶל־הָאָדָם מִכָּל־עֵץ הַגָּן אָכֹל תֹּאכֵל׃ 2 וַתִּקַּח
הָאִשָּׁה מִפְּרִי הָעֵץ וַתֹּאכַל וַתִּתֵּן גַּם לְאִישָׁהּ וַיֹּאכַל׃ 3 וְהָאֲכַלְתִּים
אֶת־בְּשַׂר בְּנֵיהֶם וְאֶת־בְּשַׂר בְּנוֹתֵיהֶם׃ 4 קַח־לְךָ מִכָּל־מַאֲכָל
אֲשֶׁר יֵאָכֵל וְהָיָה לְךָ וְלָהֶם לְאָכְלָה׃ 5 אַל־נָא יְהוָה נֹאבְדָה

בְּנֶפֶשׁ הָאִישׁ הַזֶּה וְאַל־תִּתֵּן עָלֵינוּ דָּם נָקִיא׃ 6 וַיֹּאמֶר הַמֶּלֶךְ
אֶל־הָאִשָּׁה מַה־לָּךְ וַתֹּאמֶר הָאִשָּׁה הַזֹּאת אָמְרָה אֵלַי תְּנִי
אֶת־בִּנֵּךְ וְנֹאכְלֶנּוּ הַיּוֹם וְאֶת־בְּנִי נֹאכַל מָחָר׃ וַנְּבַשֵּׁל אֶת־בְּנִי
וַנֹּאכְלֵהוּ וָאֹמַר אֵלֶיהָ בַּיּוֹם הָאַחֵר תְּנִי אֶת־בִּנֵּךְ וְנֹאכְלֶנּוּ וַתַּחְבֵּא
אֶת־בְּנָהּ׃

Ye shall eat of the fruit of your ways. Let us not perish for his soul. And he called the people to eat and they ate. And the children of Israel said, Who will let-us-eat (*hiph.*) flesh? Ye shall not eat any carcase, to the stranger ye shall give it and he shall eat it. And the woman said, The serpent beguiled me and I ate. Give me flesh that I may eat.[1] It shall not be eaten, it shall be burned in the fire. The way of the wicked shall perish (*f.*). And the dogs ate the flesh of my calf. And the man rose-early in the morning and he told all these words in the ears of his servants. And the king made (gave) the silver in Jerusalem[2] like stones and the cedars he made like the sycamores which are in the plain.

[1] *Vav* with *Cohort.* § 23. [2] יְרוּשָׁלַם.

§ 36. ʿAYIN GUTTURAL VERBS.

1. 1) By 1st rule of Gutt. the gutt. prefers the *a* sound, hence impf. and imper. Qal, and very often perf. Piʿēl, end in *a*; and even other parts may have *a* for *ē*; as יִשְׁחַט.

2) By 2nd rule the gutt. must have a *ḥaṭeph* as indistinct vowel, hence with the terminations *a i u* the middle gutt. is pointed with *ḥ. pathaḥ*, as שָׁחֲטָה.

3) By 4th rule the gutt. cannot be doubled, hence Piʿēl, Puʿal, Hithp. must omit *dag.* from the middle radical. The preceding vowel becomes tone-long always before *Resh*, as בָּרֵךְ for בְּרֵךְ,—and generally before *ʾAleph*; with the rest it usually remains (and *i u* are not depressed to *e o* before the virtually doubled gutt.), as שְׁחַט, שְׁחַט.

Rem. *a.* The form of imper. Qal in *i u* is by 3rd rule of Gutt.—The short vowel in *Pi* &c. is rare with א; usage fluctuates with ע, which, however, takes *ō* in *Pu.*, Ps. 118. 12, Ez. 23. 3.—With *suff.*, impf. יְשַׁחֲטֵנִי &c., imper. שַׁאֲלוּנִי, § 31. 4. 1.

Rem. *b*. In verbs middle ר, as בֶּרֶךְ, שֶׁרֶת, גֶּרֶשׁ, the second rad. takes ḥaṭeph instead of simple sheva, as בֵּרַכוּ. The *Pu.* of ברך does not occur in parts illustrating the peculiarity.

2. *Nouns from ʿAyin Gutt. verbs.*

		First declension.	Second declension.				Third declension.
sing.	*abs.*	נָהָר	נַעַר	פַּחַד	פֹּעַל	רֹחַב	כֹּהֵן
	cons.	נְהַר	„	„	„	„	„
voc.	*suff.*	נְהָרִי	נַעֲרִי	פַּחְדִּי	פָּעֳלִי	רָחְבִּי	כֹּהֲנִי
cons.	*suff.*	„	נַעֲרֵךְ	„	פָּעֳלֵךְ	„	„
plur.	*abs.*	נְהָרִים	נְעָרִים	„	פְּעָלִים	„	„
	cons.	נַהֲרֵי	נַעֲרֵי	„	פָּעֳלֵי	„	„
		(river)	(lad)	(fear)	(work)	(breadth)	(priest)

In *second declens.* the form נַעַר (i. e. נַעֲר) corresponds to the regular מֶלֶךְ (§ 8. 1); hence there are no ṣegholates of 2nd class with middle guttural. The ṣ^{e}ghols appear in two words, לֶחֶם *bread*, and רֶחֶם *womb*. The form נַעֲרִי is usual with the weaker gutturals (§ 8. 2), with the harder gutt. simple sh^{e}va remains, as פַּחְדִּי *my fear* &c.

Beyond the rivers of Kûsh. Our feet shall stand in thy (*f.*) gates *O* Jerusalem. And the priests cried unto Jehovah saying, We have served the Baal (*pl.*). Thou shalt love Jehovah thy God and him thou shalt serve. Cut off is (*hoph.*) the offering and the drink-offering; the priests, the ministers (*part.*) of Jehovah mourn.[1] And your fathers cried unto me and said, We shall perish from the violence of our enemies. Bless Jehovah my soul and forget not all his mercies. And she said unto her husband, Drive out this maid-servant and her son. And they forgot Jehovah and he sold them into the hand of their enemies and they fought against[2] them. And they took wives from all whom they chose. And I will bless (*cohort.*) those-that-bless-thee (*part.*).

[1] אָבַל, *perf.* [2] בְּ.

§ 37. LAMED GUTTURAL VERBS.

1. The peculiarities of *Lam. Gutt.* arise chiefly from the first law of gutturals,—that all final gutturals must have an *a* sound before them.

1) Long vowels take *path. furtive* between them and the gutt., and the short vowel must be *a* (path.), as שָׁלוּחַ.

2) The long vowels *ē* and *ō* in certain cases may become pathaḥ, *ō* does so only in the impf. and imper. Qal, but regularly in these parts, as יִשְׁלַח, שְׁלַח.

As to *ē* the practice is:—

In parts naturally long,—infin. abs., participle,—the *ē* remains with path. furt., as שֹׁלֵחַ.

In parts naturally short,—imper., jussive, infin. cons.,—it becomes *a*, and generally also in other parts in continuous discourse, as שַׁלַּח, יַשְׁלַח.

In pause *ē* is resumed.

3) Under the Tone the gutt. retains sh^{e}va silent, as שָׁלַחְתִּי; except before another vowelless consonant in 2 *fem. sing.* where a furt. path. slips in between the consonants without removing *dag.* from the 2nd, שָׁלַחַתְּ *shalâḥat.*

Rem. Final ר usually has *ō* in impf., except in stative verbs. Infin. cons. is usually in *ō*, occasionally in *a*, Num. 20. 3, Is. 58. 9. Part. have *a* sometimes in cons, Lev. 11. 7, Is. 42. 5.—With *suff.*, impf. יִשְׁלָחֵנִי &c., imper. שְׁלָחֵנִי, § 31. 4. 1.

2. *Nouns from verbs Lam. Guttural.*

	First declension.		Second declension.		Third declension.
sing. abs.	רָשָׁע	שָׂמֵחַ	זֶרַע	שֵׁמַע	רֵמַח	מִזְבֵּחַ
cons.	רִשַׁע	שִׂמַח	„	„	„	מִזְבַּח
cons. suff.	רִשְׁעֲךָ	שִׂמְחָךְ	זַרְעֲךָ	שִׁמְעֲךָ	רָמְחָךְ	מִזְבַּחֲךָ
plur. abs.	רְשָׁעִים	שְׂמָחִים	זְרָעִים	„	„	מִזְבְּחוֹת
cons.	רִשְׁעֵי	שִׂמְחֵי	זַרְעֵי	„	„	„
	(wicked)	(rejoicing)	(seed)	(report)	(lance)	(altar)

In *second declension* the final short vowel is *a* (§ 8. 1), and in all the declensions the quasi-vocal sh^{e}va before the consonantal suffixes *ka* &c. becomes a *ḥaṭeph.*

[1] חַי § 42.

O Jehovah. Jehovah will give you in the evening flesh to eat, and bread in the morning to be satisfied (*inf.* Qal). He caused thee to hear his words out of the fire. Let those-loving (*part. cons.*) thy salvation say: Let God be great! Behold I *am* sending my messenger before thee, hearken to his voice. And he sacrificed and was satisfied-with the flesh (*acc.*) of his sacrifices. And he fought against the city all that day and he took the city and the people that *was* in it he slew, and he beat-down[1] the city and sowed it with salt (*acc.*). And my master made-me-swear (*hiph.*) saying, Thou shalt not take a wife to my son from the daughters of the Canaanite[2] in whose land I *am* dwelling.

[1] נָתַץ. [2] כְּנַעֲנִי.

§ 38. LAMED 'ALEPH VERBS.

The irregularities of the remaining classes of verbs (except verbs *Double 'Ayin*) arise from the presence of some of the quiescents א ו י in the stem. Verbs פ"א, in which א quiesces in the imperfect only, have been already treated, § 35.

1. *Verbs Lamed 'Aleph.* When א is third stem-letter, it causes the following peculiarities:

1) At the end of a syllable א is silent after the preceding vowel, which is lengthened (except *é*), § 9. 1. Thus *a* in impf. Qal, § 37, Niph. &c. becomes *ā*, as יִמְצָא, מָצָא.

2) In perf. Qal of *active* verbs (those in *ā*), the vowel *ā* remains throughout, as מָצָאתָ.

3) In perf. Qal of *stative* verbs (those in *ē*), in all the other perfects, and in all imperfects and imperatives the *a* sound has undergone the common deflection into *e*, the vowel being *ē* in the perff., and *é* in the imperff. and imperr., as מָלֵאתָ, נִמְצֵאתָ, תִּמְצֶאנָה.

Rem. *a.* The letter א, being silent, sometimes falls out in writing, as מָצָתִי, Num. 11. 11, Jud. 4. 19, Lev. 11, 43, Gen. 20. 6. In 3 *f. s.* old form in *t* is found, e. g. Gen. 33. 11, Ex. 5. 16, Is. 7. 14.

Rem. *b.* This class of verbs has a considerable tendency to adopt the vocalization, and even the consonantal spelling of verbs ל"ה (§ 44): 1) vocalization, e. g. 1 Sam. 22. 2, 2 K. 2. 21, Deut. 28. 59,

Jer. 51. 34. 2) spelling, Gen. 23. 6, 1 Sam. 6. 10; 10. 6; 25. 33, 2 Sam. 3. 8. 3) inf. cons. in *t*, Lev. 12. 4, Ex. 31. 15.

Rem. *c*. Only a single example occurs of a perf. pass. inflected in a manner to indicate its vowel, הֻבָּאתָה Ezek. 40. 4. The evidence being so limited, it is perhaps better to retain *ē* (*çere*) in the Paradigm.

Rem. *d*. Vav convers. with the perf. does not *usually* throw the tone forward in this class of verbs, as וּמָצָאתָ, Gen. 17. 19; 18. 26.

Rem. *e*. With *suff.*, impf. יִמְצָאֵנִי &c., imper. קָרָאֵנִי, § 31. 4. 1.

2. *Nouns from verbs* ל״א.

	First declension.		Second declension.		Third declension.	
abs.	צָבָא	מִקְרָא	כֶּלְא	חַטָּא	יֵצֵא	
cons.	צְבָא	מִקְרָא	„	„	יֹצֵאת	*fem.*
suff.		מִקְרָאֲכֶם				
pl.	צְבָאוֹת	מִקְרָאִים	כְּלָאִים	חַטָּאִים	יֹצְאִים	
cons.	צִבְאוֹת	מִקְרָאֵי	(כִּלְאֵי)	חַטָּאֵי	יֹצְאוֹת	*fem.*
	(host)	(assembly)	(prison)	(sin)		

The quiescent retains the long vowel before it even in the *cons. sing.*, though the heavy suffix admits the short vowel.

The long vowel often remains before the quiescent even in the *cons. plur.*

In the *fem.* the א is apt to surrender its vowel to the preceding cons., as יֹצֵאת for יֹצְאָת § 21.

---

to find מצא to sin חטא to create ברא to lift up נשא

The house was filled with smoke „ „ נִמְלָא

He filled the house with smoke מִלֵּא הַבַּיִת עָשָׁן

Rule. Stative verbs (i. e. those describing a condition of the subject) subordinate to themselves in the *accus.* the noun that sup-

plements the description. When they become active (in Pi. or Hiph. §§ 26, 27) they take *two* accusatives.

Such verbs are those expressing the idea of *fulness* (*to be full, satisfied, to swarm, flow with, be covered* or *clothed with* &c.) and *want* (*to want, be bereaved*, &c.).

EXERCISE. TRANSLATE.

[1] The rel. pron. is very often omitted, particularly if the antecedent be indefinite.

Jehovah will hear when thou criest to him. I am full (*perf.*) of the spirit of Jehovah and of judgment to tell to Jacob his transgression and to Israel his sin. And the earth was filled with violence. Hast thou found-me, mine enemy? and he said, I have found-thee. Thou hast filled this house with thy glory. Thou hatest (*perf.*) all workers of iniquity. And the spirit of Jehovah lifted-me-up and cast me to-*the*-earth. Lift-me-up and cast me into the sea that it may be quiet from-upon you. Thou shalt not hate thine enemy in thy heart. These are the journeyings of the children of Israel who came out of the land of Egypt according-to[1] their hosts, and Moses wrote their outgoings according-to[1] their journeyings. Unless ye had ploughed with my heifer ye would not have found my riddle.

[1] לְ.

§ 39. PE YOD AND PE VAV VERBS.

The letters *w* and *y* have become a good deal confused in Hebrew, and in consequence of this confusion, roots having *w* as their first, second, or third stem-letter, have not remained distinct from those having *y* in the same places.

Though the two classes פ״ן and פ״י are a good deal mixed up with one another, it is conducive to clearness to treat them separately.

1. *Pe Vav verbs.* 1) When the first radical is initial it always appears as *y*, viz. in Qal (except impf. and related parts), Pi'ēl, Pu'al, and usually Hithpa'ēl.

All these parts may be said to use forms from פ״י; and the perf. Qal having *y*, verbs of both classes have the general name of פ״י verbs.

2) When the first radical is not initial, and particularly when it is at the end of a syllable, it appears as *w*, viz. in Niph'al, Hoph'al, and usually Hiph'îl.

The *w* unites in these parts with the vowel of the preformative, *a* or *u*, and there arises in Niph. and Hiph. the sound *aw*=*ô*; and in Hoph. *uw*=*û*, as הַוְשִׁיב=הוֹשִׁיב (*haw-shîb*=*hô-shîb*), נַוְשַׁב=נוֹשַׁב (*naw-shab*=*nô-shab*), הָוְשַׁב=הוּשַׁב (*huw-shab*=*hû-shab*).

These parts employ forms of פ״ן verbs.

3) The confusion is greatest in the impf. Qal and related parts (infin. and imper.). These parts are formed after two methods:—

a) In some verbs the initial letter falls out of the impf. and related parts entirely. In this case the vowel of the preformative letter of impf. is *ê*, and the final vowel is also *ē* (or *a* beside gutturals); and the infin. cons. strengthens itself by assuming the fem. *t*, as יֵשֵׁב, שֶׁבֶת (*yêshēb*, *shḗbeth*).

b) In other verbs the impf. and related parts are formed quite regularly, with *y* as first radical, which is retained in all the parts, and merely quiesces after the preformative *i* of impf. The final vowel is *a*. Thus יִירַשׁ &c. The *niph.*, *hiph.* &c. are formed as in class a).

The paradigm shews that the impf. may be formed after this method, while the imper. and infin. may follow 3 a).

2. *Pe Yod verbs.* A certain number of verbs have these peculiarities:—

1) In Hiphʿîl *y* shews itself: the *y* then unites (just as *w* does) with the vowel *a* of the preformative, *ay*=*ê*, as הַיְנִיק=הַיְנִיק *to give suck.*

The Niph. and Hoph. are wanting.

2) The impf. Qal is formed after 1. 3 b) (and examples of imper. and infin. cons. do not occur), as יִינַק *he will suck.*

These seem examples of real פ״י verbs.

3. *Verbs assimilating the first radical.* The initial *w y* are subject to still another mode of treatment; instead of coalescing with a preceding vowel (as *iy*=*î*, *uw*=*û*, *ay*=*ê*, *aw*=*ô*), they may be assimilated, like *n*, to the following consonant, which is then doubled, as יָצַק *to pour*, impf. יִצֹּק.

4. *Nouns from verbs Pe Yod.* The infin. cons. is inflected with *i*, §§ 29, 31, שִׁבְתִּי *my sitting.* The infin. is occasionally of the form שֶׁבָת, and this form has been adopted by the nouns, as (דֵּעָה *to know*) עֵדָה *assembly*, עֵצָה *counsel*, שֵׁנָה *sleep.* These words, however, inflect after the manner of the first declension, § 18.

The nouns with *m* preformative, § 30, are of the form מוֹלֶדֶת *fem.* מוֹלֶדֶת (§ 29. 2) from פ״ו; מַיטָב from פ״י (i. e. *maw* =*mô*, *may*=*mê*, as in Hiph.), and מַצָּע when the initial letter is assimilated.

Rem. *a.* In Hithp. the syllable *hith* is so distinct from the root that it is scarcely *felt* to form part of the word. A few forms appear with *w* as הִתְוַדַּע from יָדַע *to know.*

The Hoph. occasionally has *ô* for *û*, as הוֹדַע, Lev. 4. 23.

Rem. *b.* Verbs forming the impf. and related parts by rejection of the first radical do not constitute a numerous class, but are words of very common occurrence. Those most frequently met with are:— יָדַע *to know*, יָלַד *to bear*, יָצָא *to go out*, יָרַד *to go down*, יָשַׁב *to sit*; and הָלַךְ *to go*, which derives the parts in question from יָלַךְ, itself not found. Impf. of ידע is יֵדַע, imp. דַּע, inf. הַדַּעַת.[1]

---

[1] The presence of the unchangeable *ê* is not very easily accounted for. It may have arisen from *ay*, although the *y* hardly ever appears in writing (Mic. 1. 8); the *î* may either be primary, i. e. *iy*=*î*, or it may have arisen from *ê* by thinning.

Rem. *c*. The form 3 b) is the one proper to *stative* verbs; and most verbs of the class are stative, though there are a few actives. Examples are: יָבֵשׁ *to be dry*, יָעֵף *to be weary*, יָרֵא *to fear*, יָשֵׁן *to sleep*, יָעַץ *to counsel*, יָקַד *to burn* (also 3 a), יָרַשׁ (also *ya-rēsh*) *to possess, inherit*, יָרָה *to throw*. Inf. of יָרֵא is יִרְאָה.

Examples of infin. and imper. retaining the initial *y* are rather rare, and are chiefly from verbs doubly weak, as the verbs *to fear, to throw*. These parts rather follow the forms of 3 a), as יָרַשׁ *to possess*.

The rare infin. cons. יְכֹלֶת *to be able*, יְבֹשֶׁת *to dry*, Gen. 8. 7, is met with in these verbs.

Rem. *d*. Proper פ״י verbs are: יָנַק *to suck*, ילל (Hiph.) *to howl*, יטב (impf. and Hiph.) *to be good*, ימן (Hiph.) *to go to the right*, יקץ (impf.) *to awake*, and others.

Rem. *e*. Verbs assimilating the first radical are: יצג (Hiph.) *to place*, יצע (Hiph.) *to spread*, יָצַת *to burn*, &c. They mostly have a sibilant as second radical.

The general remark may be made that the various classes of פ״י verbs have become considerably confused, and in the impff. and related parts, and the Hiph. &c., shew a great tendency to borrow forms from one another. The individual facts must be learned by reading or from the Concordance.

to be able יָכֹל perf. Qal; impf. יוּכַל (Hoph.?)

And the ark went upon the face of the waters. And we went *through* all that great and terrible wilderness. And they said unto her, Wilt thou go with this man? and she said I will go. And we said, We cannot (*impf.*) go down. And thou shalt remember all the way which Jehovah thy God made-thee-go in the wilderness, to know *that* which is in thy heart. And the man opened the doors of the house and went out to go on (*dat.*) his way. And the women said unto her when she bore her son, Fear not for thou hast borne a son. Behold I have heard that there is corn in Egypt, go down thither and buy us a little food. And the Lord said unto him, Go not down to Egypt, dwell in the land which I shall say unto thee. Let them give to me a place in one of the cities of the country (field) that I may dwell (*cohort.*) there, why should thy servant dwell in the royal city (city of the kingdom)? And he was afraid and said, How terrible is this place! And he said, My son shall not go down with you[1], for his brother is dead and he alone is left, and should mischief befall[2] him in the way in which ye shall go then shall ye bring down my grey-hairs in sorrow to Sheol.

[1] עִם see § 49. [2] *Vav* with *perf.*

§ 40. ʿAYIN VAV AND YOD VERBS.

The principles stated in § 9 should be well understood here.

By § 9. 3, such forms as perf. and part. *qawam*, *maweth*, *ṭawob*, § 22, become *qâm*, *mêth*, *ṭôb*; so part. *qawum*=*qûm*, and infin. *qawom* =*qôm*.

Again, by § 9. 2, forms like infin. *qᵉwum*=*qûm*; impf. *yaqwum*= *yā-qûm*; Hiph. *hiqwîm*=*hē-qîm*, Hoph. *huqwam*=*hû-qam*.

These general laws explain the following facts:—

1. As in Pe Vav and Yod verbs the *w* and *y* forms have become greatly mixed, those with *w* having very much the

preponderance. Except in impf. Qal and related parts the forms with *w* and *y* completely coincide.

2. The weak middle letter always either falls out or unites in sound with the vowel of the form, hence the stems form monosyllables with the same vowels in most places as are in the regular verb, as perf. קָם, מֵת, Hiph. הֵקִים.

The Niph., however, has *ô*, from *wa*, נָקוֹם=נַקְוָם; and in the impf. Qal and related parts, the fundamental sounds of these verbs, *û* and *î*, always maintain themselves, as יָקוּם, יָבִין.

3. As the stem forms a monosyllable, the preformative letters stand in the open pretone and have tone-long vowels (chiefly *ā*, as impf. Qal יָקוּם, perf. Niph. נָקוֹם; *ē* from *i* in Hiph. הֵקִים), which, of course, are lost when the tone shifts. Hoph. has *û*.

4. With inflectional afformatives (except *tem, tén*), the compression of the stem retains the tone on the *penult,* as קָמָה *she stood.*

5. The vowels *î û* being so characteristic of these verbs, a great effort is made to give them expression; but as they cannot stand in a shut syllable with two consonants following them, § 5. Rem. *b*, a vowel is inserted between the stem and the consonantal afformatives, aud *î û* remain in the open syllable. The inserted vowel is *ô* in perf., and *é* in impf.

If no vowel be inserted, *î*, *û* become *ē* (*a*), *ō* in the shut syllable.

6. The ordinary form of the intensive is generally avoided. The intensive is usually formed by doubling the final letter, as קוֹמַם *pass.* קוֹמַם (*aw*=*ô*). § 26 Rem. *c*.[1]

Rem. *a*. In these verbs the *infin. cons.* is assumed as root, because it is the simplest form in which the characteristic *î* or *û* is found.

Rem. *b*. In Hiph. ע״ו and ע״י coincide; in the other parts, e.g. Niph., Pôʾēl (and Hoph.?), the forms employed are exclusively those of ע״ו. Only in impf. Qal and related parts is there any divergence.[2]

[1] The supposition made above, that these verbs are triliteral roots, with a weak middle letter, which sometimes falls out, and sometimes melts into the vowels beside it, offers to appearance the simplest explanation of their forms. It is not necessary, however, to suppose any historical period of the language, during which the words existed, even under inflection, in the unabridged triliteral form.

[2] Several things, such as the analogy of other Shemitic dialects, the

Rem. *c*. Pretonic *ā* is the ordinary preformative vowel in impf. and Niph. The intrans. *i* (=*ē* in pretone), appears only in יָבוֹשׁ (i. e. יִבְוַשׁ); יָאֹר 2 Sam. 2. 32 is probably *niph.*, so Gen. 34. 15.

In Hiph. and Hoph. *hiqqîm*, *huqqam* occasionally appear for *hēqîm* &c., as הִנִּיחַ from נוּחַ, to *set*, *place*, הִסִּית Is. 36. 18, Jer. 38. 22.

Rem. d. The vowel *ô* is inserted in perf. Niph.; and generally in perf. Hiph. *Hiph.* sometimes follows reg. verb, הֲנַפְתָּ Ex. 20. 25, Deut. 14. 28; particularly *hiph.* of מוּת, Numb. 14. 15, Is. 14. 30, Hos. 2. 5, Ex. 1. 16. The form הֲקִמֹתָ with *ē* for *î* also occurs, Ex. 19. 23, Num. 31. 28, Ex. 26. 30. The vowel *é* is generally inserted in impf. Qal, and occasionally in impf. Hiph.

In Niph. the stem *ô* becomes *û* immediately before the tone, but *ô* sometimes remains, Ez. 11. 17; 20. 43 &c.

The origin of the inserted *ô* and *é* is obscure. Probably these vowels arose out of the *a* and *e* sounds in which the perf. and impf. originally terminated. § 31.

Rem. *e*. The *juss.* in Kal is יָקָם, in hiph. יָקֵם; with vav וַיָּקָם and וַיָּקֶם. Final gutt. take *a*, וַיָּנַע Is. 7. 2, וַיָּסַר Gen. 8. 13.—Inf. cons. is sometimes קוֹם, Is. 7. 2.

---

appearance of such words as אָיַב *to be hostile to*, עָיַף *to be weary*, in which *y* is moveable, and the existence of numerous primary nouns with *y* as middle letter (§ 41), make the existence of the class of ע"י stems certain. The class, however, shews a great tendency to pass over into ע"ו, and very few verbs can now be held with certainty to belong to it. In addition to the two verbs just mentioned and some denominatives from nouns ע"י, the following words may be considered examples: זִיד *to seethe*, צִיץ *to glance*, שִׁיב *to grow gray*, שִׁיד *to plaster*—besides others.

There is another class of verbs which, though sometimes reckoned ע"י words, are more probably verbs ע"ו with certain abnormal forms. The general peculiarity of the class is that they have a set of forms in Qal and a set in Hiph., and the two sets are used without difference of signification. Perhaps the simplest explanation is given by assuming *Hiph.* to be the primary form. The initial ה may easily fall off, and the stem then falls back into the Qal, and, not unnaturally, developes new Qal forms. Thus הבין becomes בִּין, and a new perf. and part. בָּן are then developed in addition, and even new impff. of the form יָבוֹן. In this way the peculiar perf. inflection בִּינוֹתָ, which two or three verbs exhibit, may be readily explained—it is a *Hiph.* without the preformative letter. See Ewald, *Lehrb.* § 127. A different explanation is suggested by Böttcher, *Ausführl. Lehrb.* § 1141 foll.

The principal verbs belonging to this class are the following, which should be seen in the Concordance: בין *understand*, דין *judge*, לין *lodge* (the night), מוּשׁ *depart*, ריב *contend*, שִׁיר *sing*, שִׂים *lay*, שִׁית *set* (also שׂוּשׂ, חוּל, גִּיל *be glad*, שִׁית *think*).

INSTITUTE OF ... ST. MICHAEL'S COLLEGE LIBRARY

Rem. *f*. Very rarely the regular intensive is formed; in one or two cases the middle letter becomes *y*, קַיֵּם. Sometimes the whole stem is doubled. § 26 Rem. *c*.

Rem. *g*. In the perf. *vav conv.* projects the tone even in 3 f. s., and 3 c. pl., as וְקָמָה *and she will stand.* The rule stated above in 4 as to the place of Tone does not apply to the Participles, קָם, קָמָה. The emphatic imper. is קוּמָה, but in close connection with a following word beginning with a *gutt.* קוֹמָה, e.g. before יהוה (pron. *'adhonai*) Ps. **3.** 8, cf. Jud. **4.** 18, Ps. **57.** 9. See Ex. **5.** 22, Is. **11.** 2, Gen. **26.** 10.

[1] The order here is uncommon; nothing usually precedes the infin. abs. when used in this way, § 27; the present order arises from the expression being a quotation. The Serpent puts לֹא before what God affirms.

[2] "And it came to pass". See § 45. [3] On this word see note p. 17.

[4] This word takes suff. of the plur. noun, exclusively in all persons except 1st and optionally in 1st.

And they fled the way of the wilderness. Depart not from-after Jehovah, but (and) ye shall serve him with all your heart. And Noah went in, and his sons and his wife and his sons' wives unto the ark. And he took not from his hand *that* which he had brought. I will surely-return (*inf. abs.*) unto thee (*f.*). And he said, Jehovah my God let the soul of this boy return. And he arose in the morning and saddled his ass and went with the princes of Mô'āb. And he called the man (*dat.*) and said unto him, How have I sinned against thee (*dat.*) that thou hast brought upon me and upon my kingdom a great sin? And his wife said to him, If Jehovah had wished[1] to kill us he would not have taken[1] from our hand a burnt offering. And the woman went out to meet the captain of the king's host and she said, Turn in[2] my lord, turn in unto me, fear not; and he turned in unto her to the tent. And Jehovah said unto his servant, Take all the heads of the people and hang them up for Jehovah before[3] the sun that the fierceness of the anger of Jehovah may turn from Israel. And it shall be if thou shalt at-all-forget[4] Jehovah thy God and go after other gods and serve them, I testify[1] against thee this day that ye shall surely-perish.[4]

suff.	אֵידִי	זֵיתִי	חֵילִי	„	„
plur.	&c.	זֵיתִים	חֲיָלִים	„	„
cons.		זֵיתֵי	חֵילֵי	„	„
	(calamity)	(olive)	(force)	(joy)	

1. *First declension.* The forms 1—5 being contracted, § 9, have unchangeable vowels. The form 8, with *m* preformative, has usually *ô* in the last syllable (or *î* from *ʿAyin Yod*), which, with inflectional additions, may remain or change to *û*. This change is usual in fem. Comp. perf. Niph.

2. *Second declension.* In some words the monosyllabic form has been retained, the diphthongal sounds *aw ay* becoming *ô ê*, § 9. 1 Rem. *b*, as אוֹר (אַוֹר), אַיִד (אַיִד). This shorter form appears in all the constructs; and is, of course, *regular* with suffixes. § 29.

The monosyllabic form is the common one even in the *abs. plur.;* but occasionally the plural assumes the pretonic *ā* as in ordinary ṣegholates.

In other words of 1st class the dissyllabic form of the ṣegholate has been reached; and in *ʿAyin Vav* forms, the influence of the *w* broadens the primary vowel to *ā*, as מָוֶת; while in *ʿAyin Yod* forms the *y* makes the furtive vowel *i,* as זַיִת.

Naturally, § 9, there are no 2nd class forms with *w* nor 3rd class forms with *y*.

3. *Third declension.* In this class of stems the later participial development *qôṭēl,* § 30, has not yet been reached.

The participles remain of the forms cited above under first declens. A few cases occur which seem to shew the beginnings of a transition to the newer forms, e. g. קוֹם 2 Kings 16. 7; בּוֹז Zech. 10. 5; comp. Is. 25. 7; Ps. 22. 10; Ps. 71. 6.

WORDS FOR PRACTICE.

death	מָוֶת	and so:	midst תָּוֶךְ, evil אָוֶן.
light	אוֹר	,,	thorn קוֹץ, voice קוֹל *ôth*, pit בּוֹר *ôth*, generation דּוֹר *îm* and *ôth*, bird, עוֹף. Like שׁוֹר,—thorn חוֹחַ.
horse	סוּס	,,	whelp גּוֹר, spirit רוּחַ *ôth*, street חוּץ *ôth*. Like שׁוּק,—pot דּוּד.
olive	זַיִת	,,	ram אַיִל, wine יַיִן, no אַיִן.
force	חַיִל	,,	eye עַיִן *ôth*, colt עַיִר, buck תַּיִשׁ.
calamity	אַיִד	,,	egg בֵּיץ *pl.*, bosom חֵיק, smell רֵיחַ.
joy	גִּיל	,,	vanity רִיק, judgment דִּין, song שִׁיר.

Many words have some irregularity:—

house בַּיִת *pl.* בָּתִּים probably *bâttîm*.

eye עַיִן *du.* עֵינַיִם *pl.* עֲיָנוֹת *wells*.

night לַיִל more usually לַיְלָה, where *ah* is acc. termination; *cons.* לֵיל *pl.* לֵילוֹת.

day יוֹם *pl.* (יְוָמִים=) יָמִים, § 9. This word is very irregular in treating its *â* as merely tone-long.

(The word רֹאשׁ *head* probably=רָאשׁ i. e. רַאְשׁ, *plur.* רָאשִׁים.)

EXERCISE. TRANSLATE.

And they heard the voice of Jehovah walking in the midst of the trees (*sing.*) of the garden and the man and his wife hid-themselves. Behold I am old I know not the day of my death. In those days there-was-not a king in Israel, *every* man did[1] the *thing* upright in his *own* eyes. Ye shall not die for God knoweth (*part.*) that, in the day of your eating of the tree, then (*vav conv. perf.*) your eyes shall be opened. And Noah awoke from his wine and knew what his younger (little) son had done to him. And the prophet said unto her, And thou, arise, go to thy house, when thy feet come to-the-city, then (*vav conv.*) the boy shall die. And he

[1] יַעֲשֶׂה *impf.* § 46.

offered the ram of the burnt-offering and the priests, the sons of Aaron,[1] leant their hands upon the head of the ram. And the men feared to return to their houses. Arise (*f.*), shine, for thy light is come and the glory of the Lord is risen upon thee; for the abundance of the sea shall be converted[2] unto thee and the forces (*sing.*) of the gentiles shall come unto thee.

[1] אַהֲרֹן. [2] Niph. הפך.

§ 42. DOUBLE ʿAYIN VERBS.

Verbs *Double ʿAyin* so entirely resemble in their inflection verbs *ʿAyin Vav,* that it is best to treat them immediately after this class:—

1) As in verbs *ʿAyin Vav* the stems are monosyllabic, except where an unchangeably long vowel or double letter in the form requires the presence of a third stem-letter, e. g. participles and infin. abs. Qal, Piʿēl, Pôʿēl &c., as סָבוֹב, סִבֵּב, סוֹבֵב.

The vowels are those of the regular verb except that in Hiph. the vowel has not risen to *î* but remains *ē* (or *a*); see § 27 Rem. *a*; e. g. Niph. נָסַב, Hiph. הֵסֵב.

2) Again, the stems being monosyllabic, the preformative letters stand in open pretone and have tone-long vowels, precisely as in *ʿAyin Vav*, as impf. Qal יָסֹב.

3) The double letter shews itself with all inflectional afformatives; and the tone (except in participles) is on the penult,[1] as נָסַב *f.* נָסַבָּה.

4) Before the afformatives beginning with a consonant a vowel is inserted, viz. in the perfects *ô*, and in the impff. and related parts, *é*, as סַבּוֹתָ.

5) The tone-long *ē ō*, which under the tone maintained themselves before the double letter, when they lose the tone become the sharp *i u*, (See Table § 6. 3.), as 2 pl. fem. imper. סְבִבְנָה.

6) The regular Intensive is quite common. Other forms

[1] There are exceptions to this law about the place of tone, particularly in parts with vocalic terminations.

of the Intensive are *Pôʿēl*, and *Pilpēl*, which are also much in use. See § 26. Rem. *c*.[1]

Rem. *a*. *Stative verbs*. The stative *ē* of perf. Qal is always sharpened to *a* (see § 22 Rem. *b*); a very few perff. appear with *ō*, Gen. **49**. 23, Job **24**. 24. In impf. final *a* and preformative *i* (i. e. *ē* in open pretone), are regular, as יִקַל, or with first rad. doubled יִמַּל, Gen. **16**. 4; **47**. 19, Deut. **19**. 6, Is. **7**. 4, Gen. **21**. 11.

Rem. *b*. In Niphʿal *ā* is the ordinary preformative vowel, but *i* (*ē* when prolonged) also appears. Ez. **25**. 3, Mal. **2**. 5, Is. **57**. 5. The final *ē* of Niph. is usually sharpened to *a;* but *ē* is found, and even extends itself to the perf. and part, Is. **49**. 6, 1 Sam. **15**. 9, Ps. **68**. 3.

By imitation of verbs *ʿAyin Vav* the Niph. has occasionally *ô* throughout; and it may be remarked in general that the two classes *ʿAyin Vav* and *Double ʿAyin* shew an inclination to adopt forms from one another. 1) In impf. *û* appears, Is. **42**. 4, Prov. **29**. 6. 2) In *niph. o*, Is. **34**. 4, Am. **3**. 11, Ez. **29**. 7. 3) In hiph. *î*, Ps. **33**. 10, Jud. **3**. 24.— The perf. hiph. is often in *a*, Is. **8**. 23, 2 K. **23**. 15; so with gutt. Deut. **28**. 52.

Note. Verbs marked 1 double the *first* radical.

---

[1] As in *ʿAyin Vav* verbs the question may be raised whether these verbs be properly biliteral stems shewing an impulse towards triliteration which gratifies itself in the duplication or repetition of the second stem letter, or whether they be real triliterals now undergoing a process of contraction. If the second hypothesis be adopted, the contractions may be explained by considering the *second* radical a weak letter and applying to it the laws 2, 3 of § 9.

Several considerations, however, are in favour of the other hypothesis, which is more natural in itself: 1) Sometimes the duplication of the 2nd radical does not appear, even under inflection, as, perf. תַּמְנוּ for תַּמַּנּוּ, impf. יָזְמוּ for יָזַמּוּ. And 2) on the other hand the impulse towards strengthening the stem by triliteration often finds satisfaction in dupli-

plur.	עַמִּים	„	„	צִלִּים	חֻקִּים
	(עַמָּמִים)	(*c.* הַרְרֵי)	„	(צְלָלִים)	(*c.* חֻקְקֵי)
	(people)	(mountain)	(threshold)	(shadow)	(statute)

1. The Tone affects the vowels as shewn in the Table. In final accented syllable *ē ō* are invariable, but the sharp *a* is more common than *ā*.

2. There are few words of the *first declension,* and, with one or two exceptions, as מַח *marrowy,* the unaugmented words are all of the form *a*—*a*, § 18. Such words, however, as *people, mountain,* &c. may perhaps with as much propriety be classed with the first as with the second declens.

The vowel under *m* preformative is sometimes lost, and sometimes preserved.

3. As in the verb the words develop the double letter under inflection; but the place of the tone is regular.

4. In the *second declension* the plur. abs. is generally of the same form as other inflected parts, but sometimes the pretonic *ā* appears, as in ordinary ṣegholates.

The letter is very rarely written twice in the sing., גֻּלְלוֹ from גֻּל Job **20.** 7. Comp. **40.** 22, Gen. **14.** 6.

Rem. *a.* The effects of gutturals are seen in the words *evil* and *mountain.*

Before the double letter *a* may be thinned to *i.* In some cases, e.g. סַף, it may remain doubtful whether the *i* be due to this cause, or whether the *a* of the abs. be not due to the Tone, § 10. 5 Rem., the word being of the second class.

Rem. *b.* This class of words can best be distinguished from other classes by a knowledge of derivation; but it may be observed that:— a) words of this class ending in *a* sound have usually short *a*, while the words of other classes which they resemble, as יָד *hand*, § 18, קָם *standing*, § 41, have *ā*; b) words of this class ending in *e* sound are distinguished from ṣegholates of *ʿAyin Yod* like אֵיד, § 41, by wanting *yod.* They quite agree in form with words like מַת, § 41, which,

however, are not a numerous class; c) words of this class ending in *o* sound are distinguished from adj. and segholates of *ʿAyin Vav* like טוֹב and קוֹל, § 41, by wanting *vav*.

WORDS FOR PRACTICE.

light	קַל	and so:	weak דַּל, fine דַּק, bitter מַר, living חַי, cold קַר, hot חַם.
people	עַם	,,	hill הַר, garden גַּן, prince שַׂר, ox פַּר, palm (hand) כַּף.
shadow	צַל	,,	heart לֵב, mother אֵם, end קֵץ, arrow חֵץ, with (prep.) עִם, אֵת.
statute	חֹק	,,	bear דֹּב, tambourine תֹּף, all כֹּל, yoke עֹל, strength עֹז, heat חֹם, cold קֹר, statute חֻקָּה.

they called his name Sheth

קָרְאוּ אֶת־שְׁמוֹ שֵׁת
קָרָא ,,
נִקְרָא ,,

Rule. The indeterminate subject (Engl. *they*) may be expressed: *a*) by the third pers. plur.; or *b*) by the third sing.; or *c*) by the passive voice,—in the last case the Pass., used impersonally, still retains the government of the Act.

bless me, even me בָּרֲכֵנִי גַּם אָנִי[1]
thy blood, even thine דָּמְךָ גַּם־אָתָּה
to Sheth, even him לְשֵׁת גַּם־הוּא

Rule. When the Personal Pronoun is repeated for the sake of emphasis, it is repeated in the separate or simple form.

EXERCISE. TRANSLATE.

And her mistress was despised (light) in her eyes. God thou shalt not despise (*piʿel*) and a prince among (in) thy people thou shalt not curse. And thou shalt put the whole upon the palms of the priest and upon the palms of his sons. Comfort ye my people, speak to (upon) their heart, and cry unto them that their warfare is fulfilled (full). Our end draws near (*perf.*), our days are full. Plead with your mother, plead, for she is not my wife,

[1] When the accent falls on the third radical of בָּרַךְ the ר is pronounced with *Ḥaṭ pathaḥ*.

and I am not her husband. Thou shalt fall upon the mountains of Israel, thou and all the peoples that are with thee. A child has been born (*pu'al*) to us, a son has been given to us, and they have called (*sing.*) his name With-us-God.[1] And the captain of the host sent messengers to the king saying: Make thy covenant with me, and behold my hand *shall be* with thee to turn-round[2] unto thee all Israel. And he came into his house displeased and he lay down on his bed and turned away[2] his face and did not eat bread. Arise, go down to meet the king of Israel and thou shalt speak unto him saying, Thus saith the Lord, In the place where the dogs licked the blood of Nabôth shall the dogs lick thy blood, even thine.

[1] אֵל. [2] Hiph. סבב.

§ 44. LAMED HE (LAMED VAV AND YOD) VERBS.

The *He* in this class of verbs is not a radical, but a mere vowel sign.

The stems are properly ל״ן and ל״י, though forms with *yod* have acquired such a preponderance that only a few traces of stems with *vav* now appear.

1. When the third radical is final it unites with the characteristic vowel, and forms a sound which in all cases is represented by the letter ה, except in the pass. part. Qal, in which *yod* is written after *û*:—

a) This sound is in all perff. *ā*, *qameç*. § 28. 1.

b) in impff. and participles the broad *é*, *ṣᵉghol* (from *áy*);

c) in imperr. the closer *ē*, *çere* (from lighter *áy*);

d) in infin. abss. the ordinary vowel of the regular verb;

e) while in infin. conss. the fem. *t* has been added, making the termination *ôth*.

2. When the third radical is not final but stands under inflection:—

1) After a vowelless consonant it surrenders its vowel to the consonant and disappears, § 9. 2, גָּלוּ=גָּלְיוּ (or, it may be held to lose itself in the following vowel).

2) At the end of a syllable it is silent after the preceding vowel, § 9. 1. Now this vowel being in all cases *a*, the diphthongal *ay* arises:—

a) This *ay* most naturally becomes *ê*, which prevails exclusively in perff. pass., as *Pu.* גֻּלֵּיתָ;

b) but *ê* in parts much used may be thinned to *î*, which in perf. Qal is found exclusively, and in other perff. alternatively with *ê*, as *Qal* גָּלִיתָ;

c) in the accented syll. before *nāh* of imperf. and imper. *ay* becomes *é* (ṣ°ghol), as גְּלֶינָה.

Rem. *a*. For traces of forms ל״ו the Lexicon or Concordance may be consulted on the roots שלו and שלה, ענה, נאה, שחה &c. and their derivatives.[1]

Rem. *b*. The 3 s. f. is sometimes גָּלָת, but usually it assumes the second fem. termination, as in Parad., Lev. **25**. 21; **26**. 34, Jer. **13**. 19.

The infin. abs. is occasionally spelled גָּלוֹ, Gen. **26**. 28.

The infin. cons. sometimes wants the fem. termination, as גְּלֹת, rarely spelled גְּלוֹ, Gen. **48**. 11; **50**. 20; **31**. 28. The termination *ôth* may also be explained as from *wath*, or *yath*.

Rem. *c*. The thinning of *ê* to *î* is said to be universal before *nû* of 1 pl., and almost universal before *tem* of 2 pl. The third rad. *yod* occasionally remains consonantal, esp. in pause and before term. וֹן, as חָסְיוּ Deut. **32**. 37; **8**. 13, cf. Ps. **57**. 2, Is. **17**. 12; **21**. 12; **41**. 5.

The verb שָׁחָה (שׁחו) *to bow down* forms a very common hithpa'lel, הִשְׁתַּחֲוָה, יִשְׁתַּחֲוֶה, *vav conv.* וַיִּשְׁתַּחוּ Gen. **18**. 2, plur. **42**. 6 &c. cf. Gen. **21**. 16.

Rem. *d*. In perff. with *vav conv.* the accent is not usually thrown forward.

On suffixes see next § and the Paradigm.

WORDS FOR PRACTICE.

to be	היה	to build	בנה	to reval, open	גלה
to do	עשׂה	to cover	כסה *Pi.*	to see	ראה
to acquire	קנה	to increase	רבה	to be fruitful	פרה
to count	מנה	to drink	שתה	to command	צוה *Pi.*

לִמְנוֹת עֲפַר הָאָרֶץ גַּם זַרְעֲךָ יִמָּנֶה: 7 וַיֹּאמֶר פַּרְעֹה לְךָ מֵעָלַי
הִשָּׁמֶר לְךָ אַל־תֹּסֶף רְאוֹת פָּנַי כִּי בְיוֹם רְאוֹתְךָ פָּנַי תָּמוּת:

Behold I rain (*part.*) upon the earth and I will blot out all that I have made from-upon the face of the ground. Behold thy maid is in thy (*f.*) hand, do to her the *thing* good in thine eyes. And they left off building the city. And his sons took a (the) garment and covered the nakedness of their father, and the nakedness of their father they did not see. I am not able to do *any*thing until thou come thither. And the waters increased very *much* and the ark went upon the face of the waters, and the heads of the mountains were covered. I have commanded thee not to eat of the tree which is in the midst of the garden lest thou die. For thou Lord of hosts, God of Israel, hast opened the ear of thy servant saying, A house will I build for thee. And he sent forth a (the) dove to see whether[1] the waters were lightened[2] from-upon the face of the ground. And it came to pass when he saw her that[3] he rent his clothes and said, Alas my daugther thou hast-

[1] הֲ particle § 49. [2] Perf. קל. [3] *Vav conv.*

---

this latter hypothesis, *ai* has to be substituted for *ay* in the above rules; and forms like גָּלִיוּ for גָּלוּ and others, in which *y* is mobile, must be considered secondary, while on the first hypothesis they are remains of the primary formations. The same thing may be said here as was said in *note* regarding verbs ע"ו, § 40.

[1] When a letter is written twice and the first of the two has *sh*^{e}*va vocal* it is written in the best Edd. with *Ḥaṭ. path.* as above. The word הֶעָנְנִי § 49 is excepted from this law.

indeed-brought-me-low,[1] for I have opened[2] my mouth unto the Lord and I cannot go-back. And he said unto the children of Israel, *At*-evening[3] (*acc.*) then (*vav conv.*) shall ye know that Jehovah hath brought you out from the land of Egypt, and *in-the*-morning (*acc.*) then shall ye see the glory of the Lord.

[1] Hiph. and *inf. abs.* [2] פצה. [3] The *modal* accus. embracing all definitions of *time, place, measure,* and in general all expressions defining the *mode* of the verbal action.

§ 45. APOCOPATED FORMS AND NOUNS OF VERBS LAM. HE.

1. The *Jussive* or shortened impf. and the imper. in verbs *Lam. He* is formed by loss of the final vocalic syllable (*He* and vowel sign); and hence is often called the *Apocopated* impf. &c. The contraction occasions some alterations within the word. Thus:—

impf. qal	יִגְלֶה	*apoc.*	(יִגְל=) יִגֶל or יִגַל=יִגֶל or יִגֶל. § 29.
impf. hiph.	יַגְלֶה	„	(יַגְל=) יַגַל=יַגֶל. § 29. § 5. Rem. *d.*
imper. hiph.	הַגְלֶה	„	(הַגְל=) הַגֶל.
impf. niph.	יִגָּלֶה	„	יִגָּל.
impf. pi.	יְגַלֶּה	„	יְגַל. § 5. Rem. *d.*
imper. pi.	גַּלֵּה	„	גַּל. „
impf. qal, hiph.	יַעֲלֶה	„	יַעַל, יַשַׁע &c.
impf. qal	יִרְאֶה	„	יִרֶא &c. With vav conv. 3 s. m. alone וַיַּרְא; 3 *f.* וַתֵּרֶא, 1 *c.* וָאֵרֶא.

Rem. These contracted forms are used with *vav conv.*, though full forms with *vav* are not uncommon. The forms וַיִּשְׁבְּ, וַיִּבְךְ, וַיִּשְׁתְּ &c. with no helping vowel are possible only when last letter is a mute (§ 5 Rem. *d*, end), otherwise the forms יִגֶל or יִגַל must be used.

2. The common verb הָיָה *to be,* has some irregularities,—which may be given:—

1) The gutt. when initial takes ḥaṭ. ṣ^{e}ghol, as imper. הֱיֵה.

2) With *any* prefixed letter the gutt., when without a vowel, takes simple sh^{e}va, and the prefix *ḥireq,* as impf. יִהְיֶה.

3) Apocopated impf. is (יִהְי=) יְהִי, וִיהִי, וַיְהִי &c. See nouns of 2nd declens.

The verb חָיָה *to live,* has mostly the same peculiarities.

Rem. *Vav* before the imp. sing. takes ֶ— as וֶהְיֵה, and of course א in 1st sing. impf., אֶהְיֶה. The preform. letter always takes *Metheg.*

3. *Nouns from verbs* ל״ה.

First and third declensions.

abs.	מִקְנֶה	קִנָּה	עָלֶה	שָׂדֶה	יָפֶה	*fem.* יָפָה
cons.	מִקְנֵה	קִנֵּה	עֲלֵה	שְׂדֵה	יְפֵה	יְפַת
suff.	מִקְנִי		עָלִי			
3 *m.*	מִקְנֵהוּ		עָלֵהוּ			
3 *f.*	מִקְנָהּ		עָלֶהָ—לָהּ			
pl.	מִקְנִים		עָלִים		יָפִים	יָפוֹת
cons.	מִקְנֵי		עֲלֵי		יְפֵי	יְפוֹת
	(possession)	(possessor)	(leaf)	(field)	(fair)	(fair)

Second declension.

	A class.		I class.			U class.		
abs. sing.	אֲרִי	(קָצוּ)	גְּדִי	פְּרִי	פְּתִי	חֲצִי	חֳלִי	תְּהוּ
pause	„		גֶּדִי	פֶּרִי	&c.	חֵצִי	חֹלִי	
afform.	אֲרָיֵה	קְצָוָה *f.*		פִּרְיוֹ		חֶצְיוֹ	חָלְיוֹ	
plur.	אֲרָיִים		גְּדָיִים		פְּתָאִים		חֳלָיִים	
cons.		קְצְוֵי קְצָווֹת	גְּדָיֵי					
	(lion)	(end)	(kid)	(fruit)	(simple)	(half)	(sickness)	(waste)

First and third declensions. 1) The vocalic sound at the end of these words is the broad *ṣᵉghol,* which becomes the closer *ṣere* in the construct. Comp. the relation of the impf. and imper. in the verb.

2) The vocalic termination is absorbed in the vowel of the afformative.

3) The final *e* sound naturally admits the suffixes *hu, ha* &c. of 3 pers. In 3 m. s. *ého* is found exclusively; in 3 f. besides *éha* there may be *āh.*

Rem. Sometimes the vocalic termination is written with *yod,* in which case the cons. and suffixal forms of sing. and plur. noun coincide in spelling, as מִקְנֶיךָ *thy cattle* sing., שָׂדֵינוּ *our field;* compare Gen. 1. 21 (a sing. defectively written).

Second declension. 1) In these ṣegholates the fundamental vowels sounds generally appear, *i* taking the tone, which *u,*

however, is unable to bear. The regular form, as בֶּכֶה *weeping*, is rare.

2) When any affformative is appended the vowel as in other ṣegholates removes to the first syllable.

3) In the plur. *yod* is sometimes softened into *'aleph* before another *yod;* and in the *cons.* the pretonic *ā* many times remains.

Rem. *a.* On account of the thinning of *a* to *i*, which was to be expected in these weak words, it is hardly possible to say whether such words as *fruit* &c. belong to the first or to the second class. See Add. Notes.

Rem. *b.* The short words *hand*, *blood* &c. which follow in their inflection the *first* declension, and the words *son*, *name* &c. which follow the *third*, appear to be contractions of forms derived from stems ל״ה. The words אָב *father*; אָח *brother*, *fem.* אָחוֹת *sister*; חָם *father in law*, &c., are also shortened forms belonging to this class of stems; in which, however, the rejected letter generally appears under inflection. See Table of Irreg. Nouns.

[1] For this suffix see § 2. 3. 3), § 19. [2] Japhet; Shem.

And I saw in my dream and behold seven good cows and they stood upon the bank of the river. And the man of God stretched out his hand and brought up the frogs as the Lord had commanded him; and Pharaoh saw the plagues and he feared *with* a great fear. And Adam knew his wife and she conceived and bare Qayin; and she conceived again and bare his brother Hebel, and Hebel was a shepherd of flocks; and it came to pass when they were in the field that Qayin rose up against (unto) his brother and slew him. And his daughters spake one to another saying, Let us make our father drink wine; and he drank and was drunken. Walk thou before me and be perfect. And God opened her eyes and she saw a well of water, and she went and filled the bottle with-water[1] and made the boy drink. And the captain of the host said, Who *ever* shall smite Qiryath Ṣēpher and take it, then (*vav conv.*) I will give him my daughter to wife. And the watchmen saw a man coming out of the city and they said unto him, Shew-us the entrance of the city and we will deal mercifully with thee;[2] and he shewed-them the entrance of the city, and they smote the city with the edge of sword but the man they let go; and he went into the land of the Ḥittîm and built a city and called its name Lûz.

[1] Acc. [2] עָשָׂה חֶסֶד עִם.

Note on doubly weak and defective verbs.

1. Many verbs have more than one weak letter. They are mostly ל״א or ל״ה with some other peculiarity. Some common verbs are these:—

1) ל״א and פ״ן. נָשָׂא *to lift*, impf. יִשָּׂא, pl. יִשְׂאוּ (§ 7 note 1); imp. שָׂא, suff. שָׂאֵהוּ, שָׂאוּנִי; inf. c. שְׂאֵת, בִּשְׂאֵת &c., but לָשֵׂאת, rarely נָשֹׂא.

2) ל״א and פ״ו. יָצָא *go out*, impf. יֵצֵא, imp. צֵא, inf. c. צֵאת, לָצֵאת. Hiph. הוֹצִיא, הוֹצֵאתָ &c.

3) ל״א and ע״ו. בּוֹא *to come*, perf. בָּא, בָּאתָ &c., impf. יָבוֹא, inf., imp. בּוֹא, part. בָּא. Hiph. הֵבִיא, הֵבֵאתָ &c., but usually הֲבִיאֹתָ &c. before suff.

4) ל״ה and פ״ן. נָטָה *to stretch*, impf. יִטֶּה, apoc. יֵט, וַיֵּט. Hiph. נכה *to smite*, הִכָּה, impf. יַכֶּה, apoc. יַךְ, וַיַּךְ, imp. הַךְ, inf. הַכּוֹת, part. מַכֶּה.

5) ל״ה and פ״א. אָבָה *be willing*, impf. יֹאבֶה, apoc. אַל־תֹּאבָא, Pr. 1. 10. אָלָה *to swear*, apoc. וַיֹּאל, 1 S 14. 24 (יֹאלָה=יַאֲלָה). Poet. אָתָה *to come*, impf. יֶאֱתֶה, יָאתָה, apoc. וַיָּאת Is. 41. 25, cf. Deut. 33. 21.

6) ל״ה and פ״י. יָרָה *to cast, shoot*, impf. suff. וַנִּירֵם Nu. 21. 30, from יִירֶה, imp. יְרֵה, inf. יְרוֹת. Hiph. הוֹרָה, impf. יוֹרֶה, apoc. וַיּוֹר, 2 K. 13. 17. יָפָה *be beautiful*, impf. יִיפֶה, apoc. וַיִּיף Ez. 31. 7, cf. 16. 13.

2. Stems composed of two strong radicals and any of the three weak letters י, ו, ן, are often allied in meaning. Thus יָעַץ, עוץ *to advise*, יָגֹר, גוּר *to fear*, יָצַב, נָצַב *to place*, נָפַח, פּוּחַ *to blow*, עָטָה, יָעַט *to cover*. Hence one root supplements itself often from another. In many verbs also the forms in Qal have fallen into disuse, and the Qal supplements itself out of the other conjugations.

1) בּוֹשׁ *be ashamed*, see Parad. § 40. Hiph. הֵבִישׁ reg., and also הוֹבִישׁ from יבשׁ.

2) טוֹב *be good*, perf., part., inf. טוֹב; but impf. יִיטַב and hiph. הֵיטִיב from יטב.

3) הָלַךְ *to go*, perf., inf. abs. הָלוֹךְ, part. הֹלֵךְ; impf. יֵלֵךְ, inf. c. לֶכֶת, suff. לֶכְתִּי, imp. לֵךְ, hiph. הוֹלִיךְ, from ילך. Later style forms impfs and inf. cons. from הָלַךְ.

4) יָגֹר *to fear*, perf., part. יָגֹר; impf. יָגוּר, imp. גּוּר Job. 19. 29, from גּוּר.

5) יָכֹל *be able*, inf. abs. יָכוֹל, inf. cons. יְכֹלֶת, impf. יוּכַל (hoph.).

6) יָסַף *to add*, perf., part., in Qal; hiph. הוֹסִיף in perf., impf., and inf. An imp. סְפוּ Is. 29. 1, Jer. 7. 21 (from ספה? cf. Is. 30. 1).

7) יָקַץ *to awake*, only impf. יִיקַץ in Qal; hiph. הֵקִיץ perf., impf., imp., infin., from קוץ.

8) נָשַׁל *to fall*, perf., inf. abs., part., in Qal; impf., inf. cons. from Niph.

9) נגשׁ *to draw near*, impf., imp., inf. cons. in Qal, but perf. and part. borrowed from Niph., which has only these two parts.

10) נָחָה *to lead*, perf., imper. in Qal; impf. and inf. cons. in Hiph., which has also perf. twice.

11) נָקַע *be alienated*, perf. 3. *f.* נָקְעָה Ez. 23. 18, impf. 3. *f.* תִּנְקַע Jer. 6. 8, from יקע.

12) נתך *to pour* (intr.), only impf. יִתַּךְ in Qal, in Niph. נִתַּךְ perf. and part.

13) שָׁתָה *to drink*, in Qal, but Hiph. הִשְׁקָה *to give to drink*, from שקה.

§ 46. THE TWO VERBAL FORMS, PERFECT AND IMPERFECT.

In § 20 only so much was said regarding the Tenses of the Verb as seemed absolutely necessary for understanding the Exercises. A full discussion of the subject belongs to the syntax; but the sections on the Verb can hardly be closed without some additional notes on the simple verbal forms.

I. *The Perfect.* The Perfect expresses a completed action. 1. Now in reference to *time* such an action may be:—1) one just completed from the point of view of the present (the preter definite); as, Against thee only *have I sinned* חָטָאתִי; exx. Gen. 3. 11 *eaten*, 4. 1 *have gotten*, Ex. 5. 14 *have ye not fulfilled?* Or 2) one completed in the indefinite past (the preter indefinite); as, In the beginning God *created* בָּרָא; exx. Gen. 4. 1 *knew*, Job 1. 1. Or 3) one already completed from the point of view of another past act (pluperfect); as, And God saw every thing that *he had made* עָשָׂה; exx. Gen. 2. 2, 3; 3. 1; 19. 27. Or finally, on the opposite side, 4) one completed from the point of view of another action yet future (the future perfect); as, I will draw for thy camels also until *they have done* drinking כִּלּוּ לִשְׁתּוֹת; exx. Gen. 48. 6; Mic. 5. 2.

It will make no difference in the usage of the perf. if the completed actions, instead of being expressed absolutely, as in the above sentences, should be conceived and expressed conditionally, or if they should have no existence except in conception: as, (1) O Jehovah my God *if I have done this* אִם עָשִׂיתִי Ps. 7. 4; (3) *If ye had not ploughed* with my heifer חֲרַשְׁתֶּם Jud. 14. 18; Would God *that we had died* לוּ מַתְנוּ Numb. 14. 2, exx. Judg. 6. 3; Is. 1. 9; (4) *If* Jehovah *shall wash away* רָחַץ the filth of the daughter of Zion, Is. 4. 4; exx. Gen. 43. 9 &c.

2. The perf. never expresses any action but one conceived as completed, but a difference in the manner of conceiving actions makes the perf. used in several cases where the present is rather employed in English:—1) In the case of

actions of frequent occurrence—actions which *have been* often experienced or observed (perf. of experence); as, The sparrow *findeth* a house מָצְאָה (E. V. hath found), Ps. **84.** 4; exx. Ps. **10.** 3; **33.** 13; Prov, **11.** 2, 8. This usage is naturally particularly common in comparisons, Job **7.** 9; and when general truths are expressed *negatively*, Ps. **15.** 3 foll. 2) In the case of the actions or conditions expressed by *stative* verbs, § 22 Rem. *a.* What the language seizes upon in this case is not the fact that the condition expressed by the verb is one that *continues*, but rather the fact that it is a condition that has come into *complete existence* and realization, and hence the perf. is made use of to express it; as, I *know* יָדַעְתִּי that thou wilt be king, 1 Sam. **24.** 21; I *hate* שָׂנֵאתִי all workers of iniquity, § 38 Exer.; so, I *remember*, זָכַרְתִּי § 16 Exer. &c.; exx. Gen. **6.** 13; **18.** 13; **27.** 14; **32.** 10 (E. V.); Numb. **11.** 5; Deut. **12.** 31. To this class belongs the verb *to be*, when *am* &c. is expressed. 3) A lively imagination is very apt to conceive things which are really future, especially if their occurrence be certain, as already done, and to describe them in the perf. This happens often in making promises or threats, and in the language of contracts, as, The field *give I* thee נָתַתִּי Gen. **23.** 11; And if not, I *will take it* לָקַחְתִּי 1 Sam. **2,** 16, exx. Gen. **4.** 23; **9.** 13; **17.** 20; Deut. **15.** 6; Ruth **4.** 3. This usage is very common in the elevated language of the Prophets, before whom the future lay so clear and certain as to be made the basis of new exhortation (prophetic perf.); Is. **9.** 5 foll., **10.** 28 foll.

Rem. As the language has no perfect or aorist participle, the perf. itself is used in subordinate clauses which serve for adjectival or participial descriptions. Such clauses should be translated by the participle in English.

The use of the perf. to express momentary actions, and for expressing the sudden, sharp, occurrence of any action, seems a variety of its use in 2. 3), 1 Sam. **2.** 16.

II. *The Imperfect.* The impf. expresses an action conceived as *entering upon,* or *going on towards*, accomplishment. 1. Such an action may be:—1) A single action, going on and unfinished in the present (present); as, Whence *come*

ye תָּבֹאוּ Josh. 9. 8; exx. Ex. 5. 15; Jud. 17. 9; Ps. 2. 4. Or 2) A single action going on in the past, the two being conceived as contemporaneous (presens preteriti),—in Prose chiefly when the section of time with which the action coincides and to which it is parallel and present, is prominently defined by a *particle*; as, Then *sings* Moses אָז יָשִׁיר Ex. 15. 1; exx. Deut. 4. 41; Josh. 8. 30; 1 Kings 16. 21.

2. The kind of progression or imperfection and unfinished condition of the action may consist in its frequent *repetition*:—1) Either in the present; as, It *is said* to this day, יֵאָמֵר Gen. 22. 14; Take of all food which *is eaten*, § 35 Exerc. This usage is very common in comparisons and in the statement of general truths founded in the nature of things; as, A wise son *maketh a glad* father יְשַׂמַּח Prov. 10. 1; exx. Numb. 11. 12; Deut. 1. 31; Jud. 10. 4; 2 Sam. 5. 8; Ps. 1. 2 foll. Prov. *pass.* Or 2) In the past; as, Thus *did* Job continually יַעֲשֶׂה Job. 1. 5. This usage is of very frequent occurrence, exx. Gen. 2. 6 *went up*; 6. 4 *used to come in*; Numb. 11. 5 *used to eat*; 1 Sam. 1. 7; 2. 19; Ps. 95. 10.

3. The imperf. is used for the expression of the *future*—that which is conceived as entering upon accomplishment:—1) This may be a future from the point of view of the real present; as, A prophet *will* the Lord *raise up* unto you יָקִים Deut. 18. 18, see § 21 Exerc. Or 2) It may be a future from any other point of view assumed; as, He took his eldest son that *was to reign* יִמְלֹךְ in his stead, 2 Kings 3. 27.

4. The usage in 3. 2) may be taken as the transition to a common use of the impff. in which it serves for the expression of that class of dependent actions and those shades of relation among acts and thoughts, for which we rather use the conditional moods (esp. the potential). Such actions are strictly *future* in reference to the assumed point of relation, and the simple impf. sufficiently expresses them. For ex., Of every tree of the garden thou *mayest eat* תֹּאכֵל § 35 Exerc.; *Could we* (were we to) *know* הֲנֵדַע, that he *would say*, Bring down your brother, § 39 Exerc.; Six days

shalt thou (must thou) *labour*, Ex. **20**. 9; How *shall* (should) we *sing*? Ps. **137**. 4.

5. On the same ground the impf. follows particles expressing *transition*, *purpose*, *result*, and the like, as, לְמַעַן *in order that*, פֶּן *lest*, כִּי *that* &c. The actions introduced by such particles are strictly consequent and future to something just stated.

When, however, there is a strong feeling of *purpose*, or when it is meant to be strongly marked, then, of course, the moods are employed, § 23; just as they are employed to express that class of future actions which we express in the *Optative* &c.

Rem. *a*. As is the case with the perf., the impf. is very much used in subordinate clauses, which give adjectival or participial descriptions of the subject of the main clause. The *participle* itself is very little used for this purpose.

Rem. *b*. It must be assumed that the perf. and impf. are entirely distinct in meaning, and that the one is never used *for* the other or to express the same conception of an act with the other. But it may readily happen that two distinct conceptions may be entertained of an action, which may thus be expressed either in the perf. or impf. Thus any *general truth* for ex. may be conceived on the one side as a thing completed, having been many times realized, and this conception of it would be expressed in the *perf*., 2. 1); or it may be conceived on the other side as a thing unfinished, ever repeating itself, and to express this view of it, the *impf*. would be used, 2. 1).

III. The *consecutive forms* have the same variety of use as the simple forms, the consec. impf. corresponding to the simple perf.; and the consec. perf. to the simple impf.

§ 47. THE ADJECTIVE. COMPARISON.

1. *Comparative Degree*. The adjective undergoes no change of termination or vocalization in comparison. The comparative degree is expressed by the positive followed by the prep. מִן, as, *Better than wine* טוֹב מִיַּיִן, lit. *good away from*, or in distinction from *wine*.

2. *Superlative Degree*. The superlative is also expressed by the positive raised into a position of isolation, as for

ex. by having the *Art.* prefixed, or by being distinguished by a suffix, or by being in the Gen. relation, as *He is the greatest*, הוּא הַגָּדוֹל lit. *the great one* (among those referred to), קָטֹן בָּנָיו *the youngest of his sons*, גְּדוֹלָם *the greatest of them.*

Absolute superlativeness is expressed variously, as by the word מְאֹד, *very,* or בִּמְאֹד &c.; or by the repetition of the word expressing the quality, קֹדֶשׁ קָדָשִׁים *holy of holies* = most holy, עֶבֶד עֲבָדִים *the most abject slave.*

I am taller than he	גָּבַהּ אָנֹכִי מִמֶּנּוּ
he is taller than his wife	הוּא מֵאִשְׁתּוֹ „
too little to be—	קָטֹן מִהְיוֹת
his eldest son	בְּנוֹ הַגָּדוֹל
his youngest girl	בִּתּוֹ הַקְּטַנָּה

EXERCISE.

And to Qîsh was a son, and his name *was* Shā'ûl, and there-was-no man of the sons of Israel better than he; from his shoulder and upward loftier than all the people. And the serpent was more cunning than all the beasts (*sing.*) of the field which God had made. He has slain men more righteous than he. Thou art wiser than Dānî'ēl. A name is better than good ointment. And that man was greater than all the children of (the) East. And-Yisrā'ēl loved Yoṣeph more than all his sons for a son of old age *was* he to him. And he lifted up his eyes and saw Binyāmîn, his brother, the son of his mother, and he said, Is this your youngest brother, whom ye mentioned (said) to me? And Lābān had two daughters, the name of the eldest *was* Lē'āh, and the name of the youngest Rāḥēl. O (*art.*) fairest among (in the) women. The greatest *men* of the city. There was not left to him except the youngest of his sons. What is sweeter than honey and what stronger than a lion? And their gain was too much for dwelling together, and the land was not able to bear them.

§ 48. THE NUMERALS.

1. *The Cardinal Numbers.* 1) The numeral *one* is an adj. agreeing in gender with its noun and standing like other adjj. *after* it, as אִישׁ אֶחָד *one man.*

2) The number *two* is a noun, and agrees in gender with the word which it enumerates, as שְׁנֵי אֲנָשִׁים *two men*; שְׁתֵּי נָשִׁים *two women.*

3) The other numerals are nouns and *disagree* in gender with the words which they enumerate, the formal fem. going with the real mas. noun and *vice versa*, as שְׁלֹשֶׁת בָּנִים *three sons*; שָׁלֹשׁ בָּנוֹת *three daughters.*

4) The *tens* are the plurals of the units except *twenty* which is the plur. of *ten*, there being a distinct word for *hundred.*

5) The numerals 2—10 which are nouns stand most commonly in the *cons. state* before the word which they enumerate, see above 2), 3); they may be used *in apposition* with their word, and then they stand either before or, chiefly in later style, after it. The other numerals viz. those from 11 to 19 and the tens are used only in apposition with their word, and stand chiefly before, though sometimes, after it.

6) The units require the noun enumerated in the plural; the tens usually take the noun in the singular when they stand before it, always in the plur. when after it (Gen. **32.** 15, 16). The numbers 11 to 19 usually take the plur. except with a few common nouns like *day, man, year* &c., and collectives.

7) In Numbers composed of tens and units such as 23 the order may be *three and twenty*, שְׁתַּיִם וְשִׁשִּׁים שָׁנָה *sixty two years*, Gen. **5.** 20, but also *twenty and three*, עֶשְׂרִים וְשָׁלֹשׁ שָׁנָה Jud. **10.** 2, and sometimes the noun is repeated with both, as *three years and twenty year* (by 6), as, חָמֵשׁ שָׁנִים וְשִׁבְעִים שָׁנָה *seventy five years*, Gen. **12.** 4; or again עֶשְׂרִים שָׁנָה וְשֶׁבַע שָׁנִים *twenty seven years*, Gen. **23.** 1.

	With the Masculine.		*With the Feminine.*	
	Absol.	*Constr.*	*Absol.*	*Constr.*
1	אֶחָד	אַחַד	אַחַת	אַחַת
2	שְׁנַיִם	שְׁנֵי	שְׁתַּיִם	שְׁתֵּי
3	שְׁלֹשָׁה	שְׁלֹשֶׁת	שָׁלֹשׁ	שְׁלֹשׁ
4	אַרְבָּעָה	אַרְבַּעַת	אַרְבַּע	אַרְבַּע
5	חֲמִשָּׁה	חֲמֵשֶׁת	חָמֵשׁ	חֲמֵשׁ
6	שִׁשָּׁה	שֵׁשֶׁת	שֵׁשׁ	שֵׁשׁ
7	שִׁבְעָה	שִׁבְעַת	שֶׁבַע	שִׁבְעַ
8	שְׁמֹנָה	שְׁמֹנַת	שְׁמֹנֶה	שְׁמֹנֶה
9	תִּשְׁעָה	תִּשְׁעַת	תֵּשַׁע	תִּשְׁעַ
10	עֲשָׂרָה	עֲשֶׂרֶת	עֶשֶׂר	עֶשֶׂר
11	אַחַד עָשָׂר		אַחַת עֶשְׂרֵה	
	עַשְׁתֵּי עָשָׂר		עַשְׁתֵּי עֶשְׂרֵה	
12	שְׁנֵים עָשָׂר		שְׁתֵּים עֶשְׂרֵה	
	שְׁנֵי עָשָׂר		שְׁתֵּי עֶשְׂרֵה	
13	שְׁלֹשָׁה עָשָׂר		שְׁלֹשׁ עֶשְׂרֵה	
	&c.		&c.	

20	עֶשְׂרִים
30	שְׁלֹשִׁים
40	אַרְבָּעִים
50	חֲמִשִּׁים
60	שִׁשִּׁים
70	שִׁבְעִים
80	שְׁמֹנִים
90	תִּשְׁעִים

100 מֵאָה *fem.*, *constr.* מְאַת, *plur.* מֵאוֹת *hundreds.*
200 מָאתַיִם *dual* (for מְאָתַיִם).
300 שְׁלֹשׁ מֵאוֹת, 400 אַרְבַּע מֵאוֹת, &c.
1000 אֶלֶף *masc.*
2000 אַלְפַּיִם *dual.*
3000 שְׁלֹשֶׁת אֲלָפִים, 4000 אַרְבַּעַת אֲלָפִים, &c.
10000 רְבָבָה *pl.* regular.
רִבּוֹא *pl.* רִבְאוֹת and רִבּוֹת
רִבּוֹ
20000 רִבּוֹתַיִם *dual.*

Rem. *a.* The units after *two* are abstract nouns in the fem. gender, and the *mas.* being the ordinary gender of nouns, the union of the two causes the apparent disagreement of gender. The rarer *mas.* of the numeral was joined with the rarer *fem.* in the noun.

Rem. *b*. The word *hundred* may be used either in the *cons.* or *abs.* in the *sing.*; in *du.* and *plur.* only in *absol.* The word *thousand* is used in the *cons.* also even in the *plur.*

Rem. *c*. The form רִבָּה *myriad* does not occur with a numeral before it; the other forms are used either in sing. or plur., *four myriad* or *myriads.*

Rem. *d*. The *du. fem.* of the num. is used to express repetition, שִׁבְעָתַיִם *seven times,* Gen. 4. 24. A few take suffixes שְׁנֵינוּ *we two,* שְׁלָשְׁתָּם *they three* &c.

2. *The Ordinal Numbers.* The ordinal numbers from 1 to 10 are adjectives and construed in the ordinary way. Beyond 10 the Cardinal numbers are used also as Ordinals. The Ordinals are these:—

First	רִאשׁוֹן *fem.*	רִאשׁוֹנָה	sixth	שִׁשִּׁי	
second	שֵׁנִי „	שֵׁנִית	seventh	שְׁבִיעִי	
third	שְׁלִישִׁי „	שְׁלִישִׁית, —ִיָּה	eighth	שְׁמִינִי	
fourth	רְבִיעִי „	&c.	ninth	תְּשִׁיעִי	
fifth	חֲמִישִׁי or חֲמִשִּׁי	„	tenth	עֲשִׂירִי	.

§ 49. PARTICLES. THEIR SUFFIXES.

1. The particles are mostly nouns, either entire or oftener disintegrated, though some are proper interjectional or demonstrative expressions.

Being nouns they must be considered, when in relation to be in the *construct* state, and the word following them, (or as we say, governed by them) in the Genitive. The *case* in which, being nouns, they must also stand, will vary according to many circumstances; but as the language does not mark the case endings, this is of less consequence at first.

2. Some particles are so much worn down and feeble that they cannot stand in the sentence alone, but require the support of a noun or pronoun, to which they prefix themselves; while again others as the precative particle נָא are inseparable affixes.

The punctuation of the important prepositional fragments בְּ, כְּ, לְ, מִן, and of the conjunction וְ, has already been given, §§ 14—15. Another important inseparable prefix is the interrogative particle הַ, the pointing of which varies:—

a) Its usual pointing is הַ, as הֲזֹאת *is this?*

b) Before simple sh^{e}va it is הַ, as הַמְעַט *is it little?* frequently followed by *Dag. dirimens*, in which case it is not to be distinguished from the *Art.*, as Gen. **17.** 17; otherwise it is not unfrequently marked by *Metheg*; see last Rem. § 6 on p. 17.

c) Before Gutturals it is also pointed הַ, often marked by Metheg, as הַאֵלֵךְ *shall I go?*

d) Before Gutt. with *qameç* it is הָ, as הֶחָזָק *whether it be strong?*

3. *Suffixes to Particles.* The following Table will be useful for reference:—

TABLE OF PARTICLES WITH SUFFIXES.

	to	with	with	*acc.* sign.	unto	after	as, like	from	no, none	behold
Sing.	לְ	אֵת	עִם	אֵת	אֶל	אַחֲרֵי	כְּמוֹ, כְּ	מִן	אַיִן	הִנֵּה
1 *c.*	לִי	אִתִּי	[1]עִמִּי	אֹתִי	אֵלַי	אַחֲרַי	כָּמוֹנִי	מִמֶּנִּי	אֵינֶנִּי	[1]הִנְנִי הִנֵּנִי
2 *m.*	[1]לְךָ	[1]אִתְּךָ	as אֵת	[1]אֹתְךָ	אֵלֶיךָ	like	כָּמוֹךָ	[1]מִמְּךָ	אֵינְךָ	הִנְּךָ
2 *f.*	לָךְ	אִתָּךְ		אֹתָךְ	אֵלַיִךְ	a	כָּמוֹךְ	מִמֵּךְ	אֵינֵךְ	הִנָּךְ

Plur.										
1 *c.*	לָנוּ	אִתָּנוּ		אֹתָנוּ	אֵלֵינוּ		כָּמוֹנוּ	מִמֶּנּוּ	אֵינֶנּוּ	[2]הִנְנוּ הִנֵּנוּ
2 *m.*	לָכֶם	אִתְּכֶם	עִמָּכֶם	אֶתְכֶם	אֲלֵיכֶם		כָּמוֹכֶם	[1]מִכֶּם	&c.	הִנְּכֶם
2 *f.*	לָכֶן	אִתְּכֶן	עִמָּכֶן	אֶתְכֶן	אֲלֵיכֶן		כָּכֶן	מִכֶּן	reg.	הִנְּכֶן
3 *m.*	[2]לָהֶם	אִתָּם		אֹתָם	[1]אֲלֵיהֶמּוֹ		[2]כָּהֵם	מֵהֶם	[1]	הִנָּם
3 *f.*	לָהֶן	אִתָּן		אֹתָן	אֲלֵיהֶן		כָּהֵן	מֵהֶן		הִנָּן
	[1] *p.* לָךְ	[1] *p.* אִתָּךְ	[1] and עִמְּדִי	[1] *p.* אֹתָךְ	[1] *poet.* אֲלֵימוֹ		[1] *poet.* כְּמוֹכֶם	[1] *p.* מִמֶּךָּ *poet.* מִנִּי, *p.* מֶנִּי &c.	[1] *poet.* אֵינָמוֹ and אֵינֵימוֹ	[1] *p.* הִנֵּנִי [2] *p.* הִנֵּנוּ
	[2] *poet.* לָמוֹ						[2] *p.* כָּהֵם			

1. Many words take the suffixes of nouns without presenting any peculiarity.

2. In small words is to be observed the fondness for the *ā* vowel in the tone, as, 2 *fem. s.* and 1 *pl. c.*; and in the pretone.

3. After ל is inflected ב *in*, but 3 *pl. m.* is בָּם. The form לָמוֹ is probably *sing.* as well as *plur.* The suff. of 3 *pl. f.* is always לָהֶן (*e*), but בָּהֵן and בָּהֶן, the latter broader sound in *pause*; a similar distinction perhaps obtains in מִן. Comp. the suff. of כ.

4. A number of words take the suffixes of *plur.* nouns. These are to be divided, however, into two classes:—1) Words that are really *plur.*, as אַחֲרֵי *after* (*hinder parts*), with which agrees תַּחַת and others; and 2) words like אֶל which are derivatives of ל״ה roots and resume their lost *yod* before suffixes. To this class belong also עַד *unto*, and עַל *upon*.

5. Certain particles contain something of the notion of a verb in them, as הִנֵּה *ecce*, אַיִן *there is not*, יֵשׁ *there is* &c., and hence not unnaturally take suff. denoting the *accus.* (verbal), and shew a particular tendency to strengthen themselves by means of the demonstrative *n*, § 31. 5.

The word *as*, *like*, uses the base כָּמוֹ for *light* suffixes, with which the accent is on the penult, with pretonic *ā*; and the base כ for *heavy* suff., with which the accent is on the last syll., with pretonic *ā*. The plenary spelling כָּמוֹנִי is usual, but the defective form כָּמֹנִי also appears.

It does not belong to an Elementary Treatise to enumerate every variation in form; such variations may be found in any good Lexicon.

VOCABULARY.

ENGLISH AND HEBREW.

A.

able be, יָכֹל; *impf.* יוּכַל § 39.
abundance הָמוֹן 1[1].
according to, כְּ prep.

when? how long? עַד מ', מָתַי.
where, whither &c., (who).
whether?, ?, הַ, § 49; אִם (or).
who, which, אֲשֶׁר, § 13. When אשר is not used in the sense of *he who, that which* (i. e. is not a substantive), its use appears to be that of a mere particle indicating relation, as it is both uninflected and ungoverned. Hence relative sentences are made as if they were direct, except that this word stands at the head of them: —

The man *who*
is with me הָאִישׁ א' הוּא אִתִּי
the man *whom*
I struck הִכִּיתִי אֹתוֹ „ „
the man *whose*
horse — הָאִישׁ א' סוּסוֹ
the place *where* —
הַמָּקוֹם א' שָׁם

The pronoun or particle in the sentence may very readily be omitted if no ambiguity would arise; the Rel. is also often omitted, particularly if the rel. clause be an adjectival description of an *indefinite* subject, but also otherwise; and sometimes both may be omitted.

who? interrog. § 13.
whole, (all).
why? wherefore? לָמָּה.
wicked, רָשָׁע 1.; wickedness רִשְׁעָה 2.
wife, (woman).
wilderness, (desert).

TABLE OF MORE COMMON NOMINAL FORMS.

I. FORMS FROM QAL, CHIEFLY PARTICIPIAL.

1) *ā—ā* (a—a), קָטָל 1; adj. of quality, though also noun, יָשָׁר *upright,* דָּבָר *word.*

2) *ā—ē* (a—i), קָטֵל 1; part. of Stat. verb, adj. of quality, זָקֵן *old.*

3) *ā—ō* (a—u), קָטֹל, קָטוֹל 1; part. of Stat. verb, adj. of quality, קָטֹן *little,* גָּדוֹל *great,* יָרֵא *fearing.*

4) *ē—ā* (i—a), קֶטָל 1; less common nominal form, לֵבָב *heart.*

With pure-long vowel in Second Syll.—

5) *ā—û* (a—û), קָטוּל 1; pass. part.;

6) *ā—î* (a—î), קָטִיל 1; also pass. part.; both also adj.

7) *ā—ô* (a—â), קָטוֹל 1; nominal form, שָׁלוֹם *peace.*

8) *ᵉ—ò, ᵉ—â* (i—â), קִטּוֹל, קִטָּל, חֲמוֹר *ass,* כְּתָב *book;* and so קְטִיל, קִטּוּל, כְּסִיל *fool,* גְּבוּל *boundary.* In all these forms the strong pure-long vowel has reduced the preceding vowel to an indistinct sound.

With pure-long vowel in First Syll.—

9) *ô—ē* (â—i), קוֹטֵל 3; act. part.

10) *ô—ā* (â—a), קוֹטָל 1; noun, עוֹלָם *age.*

II. FORMS FROM QAL, CHIEFLY INFINITIVE.

With short vowel after the first rad., less commonly after the second.—

11) *a* (*qaṭl*) קֶטֶל, (קַטַל) 2, *fem.* קִטְלָה, (קְטָלָה).

12) *i* (*qiṭl*) קִטֶל, (קִטַל) 2, „ קִטְלָה, (קְטָלָה).

13) *o* (*u*) (*qoṭl*) קֹטֶל, (קְטַל) 2, „ קָטְלָה, (קָטַלָה).

III. FORMS ALLIED TO THE INTENSIVE.

14) ***a*—*â*, *a*—*ô*** (a—â), קַטָל, קַטוֹל, adj. expressing *habit, occupation* &c. חַטָּא *sinner*, טַבָּח *cook*.

15) ***a*—*î*, *a*—*û*,** קַטִיל, קַטוּל, adj. of quality, in which the idea of intensity is not always prominent. צַדִיק *just*, חַנּוּן *merciful*.

16) ***i*—*ô*** (i—â), קִטוֹל, שִׁכּוֹר *drunken*.

17) ***i*—*ē*,** קִטֵל 3; adj. expressing excess and defect, עִוֵּר *blind*.

IV. FORMS WITH EXTERNAL AUGMENTATION (EXTENSIVE).

With preformative letters, *m*, *t*, '—

18) ***i*—*ā*** (a—a?), מִקְטָל 1, } Nouns expressing the *place* and
19) ***a*—*ē*** (a—i), מַקְטֵל 3, } *instrument* of the action, and also notions less precise, מִסְתָּר *hiding-place*, מַפְתֵּחַ *key*, מִשְׁפָּט *judgment*. The two forms given are perhaps most common, but words formed with *m* assume great variety of form, as *i*—*ô* (i—â), *i*—*ē*; *a*—*ô* (a—â).

20) ***a*—*û*,** תַּקְטוּל, abstracts, and chiefly in weak verbs and of various forms.

21) ***a*—*ā*,** אַקְטָל 1; adj. אַכְזָב *lying*.

With afformative letters, *m*, *n*, *î*.

22) ***ān, ām,*** קַטְלָן &c. 1; nominal forms. אַלְמָן *widower*, שֻׁלְחָן *table*, אוּלָם *porch*.

23) ***ôn*** (ân), ***ôm*** (âm), קַטְלוֹן &c., אַלְמֹן *widowhood*, פִּתְרוֹן *interpretation*. The *n* falling away the termin. becomes *ô*.

24) ***î***. The termin. *î* forms Gentilic and Patronymic words. עִבְרִי *a Hebrew*, צִידֹנִי *Sidonian*, and more rarely adj. from ordinary nouns, רַגְלִי *foot* (on foot), תַּחְתִּי *lower*.

The termination *û* appears only in *fem. ûth*. See following Table

TABLE OF INFLECTION OF NOUNS.

I. Words ending in a consonant:—

	Mas.		*Fem.*	
	abs.	*cons.*	*abs.*	*cons.*
sing.	סוּס	סוּס	סוּסָה	סוּסַת
plur.	סוּסִים	סוּסֵי	סוּסוֹת	סוּסוֹת
dual	סוּסַיִם	סוּסֵי	סוּסָתַיִם	סוּסָתֵי

II. Words ending in a vowel sound:—

sing.	נָכְרִי	נָכְרִי	נָכְרִיָּה —רִיָּה	נָכְרִיַּת —רִיַּת
plur.	נָכְרִים —רִיִּם	נָכְרֵי	נָכְרִיּוֹת	נָכְרִיּוֹת
sing.			מַלְכוּת	*id.*
plur.			מַלְכֻיּוֹת	*id.*

Rem. 1. Besides words ending in a vowel sound, certain others may form the *fem.* by addition of the simple *Tav.* See First Decl.

2. The *plur. mas.* has sometimes יִן— as in Aramean.

DECLENSION.

Many forms of Nouns contain unchangeable vowels, that is, vowels pure-long, or diphthongal, or unchangeable from position. These as they suffer no change in inflection do not seem to require classification. Or they might be called a First Declension, in which case the Declensions would amount in all to *four*. Indeclinable Nouns, i. e. Nouns that undergo no change in vowel, are such forms as those in Table p. 186, 187 numbered 8, 14, 15, 16, 20, 23, and a great number of other forms not given in that Table. If those Nouns with unchangeable vowels be assigned a place in the Classification and called a Declension, it is obvious that a form should be assumed as Paradigm which is essentially unalterable, and not such a word as סוּס which is a Segholate and unaltered only accidentally.

The forms that suffer change are those having *tone-long* vowels. These vowels, having been rarely expressed by the Consonantal letters, § 2, may very generally be distinguished from pure long and diphthongal vowels which were very often so expressed. In general only *qameç* and *çere* are tone-long in nouns, *ḥolem* being for the most part unchangeably long. In Verbs *ḥolem* is changeable like *qam.* and *çere.*

The forms with Changeable vowels seem capable of being generalized under *three* classes, which may be called Declensions:—

First Declension. Words with *ā* (—) in the *Tone*, or in the *Pretone*, or in *both.*

Second Declension. Segholates; i. e. words originally *monosyllabic,* with a short vowel, which stood generally after the *first* radical, though sometimes after the *second.*

Third Declension. The Act. participles Qal; and words ending like them in *ē* (—) and having the vowel of the *Pretone* unchangeable either by nature or position.

ADDITIONAL NOTES ON FIRST DECLENSION, p. 188, 189.

The Declension consists of words having tone-long *a* (ָ), in the *Tone*, or in the *Pretone*, or in *both*.

A very few forms without *ā* are inflected in the same way, viz. some forms with *ē* (ֵ) in the pretone and an unchangeable sound in the tone. The chief are the *part. Hiph.* of Verbs ע"ו and ע"ע, מֵקִים (for *mā-qîm*); the numeral שֵׁנִי *second;* אֵבוּס *crib* (sometimes). See Rules for Declens. § 18.

1. The *new* vowel arising when two indistinct sounds come together, is usually *i* (ִ) but sometimes the word resumes its original sound, § 6. 2 d.

2. In words of form 2., the final vowel of *cons.* is *a* (ַ), which alone of the short vowels can stand in the final shut accented syll. § 6. Rem. 2 *bc.* See § 18. Rem., and comp. אֶבֶל Ps. 35. 14; sometimes *ē* (ֵ) is retained unaltered, Gen. 25. 26; Ps. 69. 3.

3. Several words, particularly in form 2., have in *cons.* the short vowel after the *first* radical, i. e. assume the Segholate form, Second Declens.; and some have both forms. Exx. גֶּדֶר *wall,* כָּתֵף *shoulder,* יָרֵךְ *thigh,* כָּבֵד *heavy* (both), עָרֵל *uncircumcised* (both), אָרֵךְ *long* (abs. not occurring); so in form 6., צֶלַע *side,* שֵׂעָר *hair* (both); and even in form 1., עָשָׁן *smoke* (both), שָׂכָר *hire* (both)? Compare also Ezek. 18. 18; Deut. 31. 16.

4. Many words of form 2., retain the vowel *ē* (ֵ) under inflection, as in the *cons. plur.*, as חָפֵץ *desiring,* שָׁכֵחַ *forgetting,* יָשֵׁן *sleeping,* אָבֵל *mourning;* particularly feminines, as בְּרֵכָה *a pool,* אֲבֵדָה *loss,* גְּנֵבָה *theft,* עֲרֵמָה *heap,* שְׂרֵפָה *burning,* and probably a number of others which do not happen to occur in *cons.* state or with Suffixes. With regard to many of these words it may be impossible to say whether they are of the First or Second Declens.; for ex. בְּרֵכָה *a pool* is not improbably a segholate of 2nd class, Arab. *birkat.*—Some words have both forms, as שָׂמֵחַ *rejoicing.*

5. Instead of retaining the tone-long vowel under inflection, words not unfrequently adopt the sharp short vowel, § 6., 3, and double the following consonant, since a short vowel and Dagesh

is equivalent to a tone-long vowel. This form of inflection is most common with vowels of *first* and *third* classes; exx. *a*) words in *a*, קָטָן *little*, *pl.* קְטַנִּים, so גָּמָל *camel*, עָצָב *idol*, אוֹפָן *wheel*, שׁוֹשָׁן *lily*, מֶרְחָק *distance*, מַחְשָׁךְ *darkness*, מִשְׂגָּב *height* &c.; *b*) words in *o*, עֵירֹם *naked*, *pl.* עֵירְמִים, so אָדֹם *red*, אָרֹךְ *long*, עָמֹק *deep*, עָגֹל *round*, עָנֹג *delicate* &c.; and even words with *û*, as חָרוּל *nettle*. This method of inflection is very common *c*) in words that double the last consonant, as רַעֲנָן *green*, *pl.* רַעֲנַנִּים, so שַׁאֲנָן *quiet*, אֲדַמְדָּם *reddish*, יְרַקְרַק *greenish*, אֶתְנָן *gift* &c.; and also in words extended not by reduplicating their own letter but by the addition or insertion of an alien letter, as עַקְרָב *scorpion*, *pl.* עַקְרַבִּים, so חַרְטֹם *magician*, קַרְדֹּם *axe*, חַשְׁמָן *noble* &c. Naturally *d*) the sharp termination *el* inflects in this way, בַּרְזֶל *iron*, כַּרְמֶל *orchard*, בַּרְזַלַּי &c.; and words in *a* may thin this letter to *i*, as גַּלְגַּל *a wheel*, מוֹרָג *a threshing wain*, *pl.* גַּלְגִּלִּים &c. Some of the above words shew that even in the *Absolute* the short vowel has maintained itself against the law of tone-lengthening, § 6.

6. The termination *ô* often becomes *û* in inflection. Comp. *niph.* of ע"ו § 40 and *Nouns* § 41.

7. Specimens of the segholate *feminines* arising from the addition of simple *Tav* § 29. 2 are given here rather than in Second Decl. for obvious reasons. With regard to such a word as מַאֲכֶלֶת doubt may arise whether it be not a *fem.* of 3rd Decl. מַאֲכָל, though its *plur.* be as given. See 3rd Decl. Add. note 2.

8. The few Monosyllabic words belonging to this Declension are probably from stems *Lam. He*, such as יָד *hand*, דָּם *blood*, דָּג *fish*, שַׁד *breast*, עַד *eternity*, עֵץ *tree*. See Table of Irreg. Nouns.

TABLE OF SECOND DECLENSION.

Monosyllabic words with short vowels. § 29.

		A Class.			I Class.		U Class.		
	sing.	מֶלֶךְ	בֶּרֶךְ	[1]גֶּבֶר	סֵפֶר	[1]שֶׁכֶם	בֹּקֶר	?[1]סֹבֶךְ	[1]מְלֹא
	cons.	„							
	pl.	מְלָכִים		גְּבָרִים	סְפָרִים		בְּקָרִים		
	cons.	מַלְכֵי		גַּבְרֵי	סִפְרֵי		בָּקְרֵי		
	du.	מַלְכַּיִם	[3]בִּרְכַּיִם	[3]גַּבְּהֵי	סִפְרַיִם	*suff.* שִׁכְמֵי	בָּקְרַיִם	סֹבְכוֹ	[1]מְלֹאוֹ
	cons.	מַלְכֵי	בִּרְכֵי		סִפְרֵי		בָּקְרֵי	[3]קֶמְצוֹ	
	fem.	מַלְכָּה			סִפְרָה		בָּקְרָה		
	cons.	מַלְכַּת			סִפְרַת		בָּקְרַת		
	pl.	מְלָכוֹת			סִפְרוֹת		בְּקָרוֹת		
	cons.	מַלְכוֹת			סִפְרוֹת		בָּקְרוֹת		
1st Gutt.	*sing.*	עֶבֶד	[1]אֶגֶם		עֵמֶק	עֶגֶל	חֹדֶשׁ		
	pl.	עֲבָדִים	[2]אֲגַמִּים		עֲמָקִים		חֳדָשִׁים		
	cons.	עַבְדֵי			עִמְקֵי	עָגְלֵי	חָדְשֵׁי		
2nd Gutt.	*sing.*	נַעַר	פַּחַד	[1]מְעַט	[1]בְּאֵר	[1]שְׁאֵלָה	פֹּעַל	רֹחַב	[1]לְאֹם
	suff.	נַעֲרְךָ	פַּחְדְּךָ			[1]שְׁאֵלָתִי	פָּעָלְךָ	רָחְבְּךָ	
	pl.	נְעָרִים		[2]מְעַטִּים	[1]בְּאֵרוֹת		פְּעָלִים		[2]לְאֻמִּים
	cons.	נַעֲרֵי			בְּאֵרוֹת	בְּאֵי	פָּעֲלֵי		

3rd Gutt.	*sing.*	זֶרַע	שֶׁלַח	שִׁמֵּעַ	שִׁמֵּעַת										
	cons.	„	שִׁלְאַךְ	שִׁמְעֵךְ											
	suff.	זַרְעֵךְ			שִׁמְעֵיכֶם										
	pl.	זַרְעֵיכֶם													
ע״ך	*sing.*	בְּטֶן	אֹהֶל												
	cons.	בֶּטֶן	„												
	suff.	בִּטְנִי	אָהֳלִי												
	pl.	בִּטְנַיִם	אָהֳלִים												
	cons.	בִּטְנֵי	אָהֳלֵי												
ע״י	*sing.*	זִיז	חֵיל	בֵּיל											
	cons.	זִיז	חֵיל												
	pl.	זִיזִים	חֵילִים	בִּילֵי *f.*											
	cons.	זִיזֵי	חֵילֵי												
ע״ע	*sing.*	עַם	חַק	שַׁח	שַׁחַת										
	aff.	עַמִּי	חֻקִּי	שַׁחִי	שַׁחָתִי										
	pl.	עַמִּים	חֻקִּים	שַׁחִים	שַׁחָתִים										
	cons.	עַמֵּי	חֻקֵּי	שַׁחֵי	שַׁחָתֵי										
ל״ה	*sing.*	(שָׁלוּ)	גָּלוּי	גָּלוּי *f.*											
	aff.	גָּלְיִי	גָּלְיִי	גָּלְיָה											
	pl.	גָּלְיִים	גָּלְיִים	גָּלְיוֹת											
	cons.	גָּלְיֵי	גָּלְיֵי												

ADDITIONAL NOTES ON SECOND DECLENSION, p. 192, 193.

The Declension consists of Monosyllabic Words having a short vowel after the first radical. Through the weight of the accent the short vowels — (—) and — (—) become — and — and a furtive Seghol slides in before the last radical. The words thus become dissyllabic and penacute. Thus—

Rule 1. The dissyllabic form appears when third radical is final.

2. Inflectional additions permit the primary form *qaṭl*, *qiṭl*, *qoṭl* to appear;

3. Which it does everywhere except in *Plur.* The Plur. takes pretonic — like words of First Declens.

1. Some of this class of words have the short vowel after the *second* radical, but the method of inflection is the same as in the ordinary form. All Infinitives have the vowel after the second radical. In many words, however, which seem to have been originally of this form, the vowel has become fixed in its place after the *second* radical and is treated as unchangeable. See First Decl. Add. Note 4.

2. Again when the vowel is after the *second* letter it may retain its place, not by becoming unchangeably long, but by duplication of the final consonant, as in First Declens. See there Add. Note 5.

3. Many words having first vowel *Ṣeghol* in the uninflected form have *i* (—) under inflection, and in the oblique forms are thus not to be distinguished from words of the *second* class. It is the practice of the best Grammarians, certainly, to consider such words to be of the *first* (or *A*) class, with their *a* (—) thinned to *i* (—), a refinement which thus must have taken place in a very large number of words. It seems not impossible, however, that the *Ṣeghol* in many of these words, may be a real *second* class vowel, and consequently the words

Segholates of the second form. For *first*, some of these words have an alternative form with *ṣere;* and *second*, very many of them are derivatives from *Intransitive* verbs, which usually give Segholates of second (or third) class. Comp. § 29.

For *i* (ִ—) there occasionally appears *e* (ֶ—); and for *o* (ֹ—) also *u* (ֻ—).

The word שֶׁכֶם may be of *first* class, *a* being thinned to *e*.

4. A few Segholates, chiefly of those having their third radical a guttural, prefer in the *cons.* forms with the short vowel after *second* radical, as in First Declens. (see the converse there Add. Note 3). For ex. נִטַּע, סִחַר, חִדַּר from נֶטַע, סַחַר, חֶדֶר, and the numerals *seven* and *nine*, § 48. Some have both forms, e. g. along with the ordinary forms זִרַע and שִׁנַּר.

5. A very few *plur.* abs. are formed without the pretonic *ā* (ָ—), e. g. the numerals *twenty, seventy, ninety*, and some other words of which the sing. does not occur, e. g. בָּטְנִים *pistaccio nuts*, comp. Josh. 13. 26, הָבְנִים *ebony*, שִׁקְמִים *sycamores*.

6. The derivatives from verbs ל״ה (i. e. ל״ו and ל״י) exhibit many anomalies, examples of which are seen in the exx. given, but only Reading or the Concordance can teach the full details.

ADDITIONAL NOTES ON THIRD DECLENSION.

The participles active and other words ending in *ē* (ṣere), with a vowel unchangeable, either from quality or position, in the pretone, may be considered a class by themselves, and called a *Third Declension.*

Rule 1. The final *ē* (ֵ), when by inflection it falls into an open unaccented syllable, is lost, becoming sh^{e}va; and of course in a shut or half open syllable it becomes short, *e* or *i* (ֶ or ִ).

2. In the const. *ē* (ֵ) remains or becomes *a* (ַ).

sing.	קֹטֵל	מְקַטֵּל	מַקֵּל	מְסַפֵּד	מַרְבֵּץ	
cons.	קֹטֵל	מְקַטֵּל	מַקֵּל	מְסַפֵּד[1]	מִרְבַּץ[2]	
voc. suff.	קֹטְלִי	מְקַטְּלִי	מַקְּלִי	&c.	&c.	
cons. suff.	קֹטְלָךְ	מְקַטֶּלְךָ	מַקֶּלְכֶם		מַסְגֵּר	
f.	קֹטֶלֶת / קֹטֶלֶת	כֹּגֶדֶת[3]	תּוֹעֵבָה[3]	מַצֵּבָה / מַצֶּבֶת	מִסְגֶּרֶת[3]	[גֶּלְגֹּלֶת[4]
cons.	קֹטֶלֶת		תּוֹעֲבַת	מַצֵּבַת / מַצֶּבֶת	"	"
suff.	קֹטַלְתִּי				מִסְגַּרְתִּי	גִּלְגַּלְתִּי
pl.	קֹטְלוֹת		תּוֹעֵבוֹת	מַצֵּבוֹת	מִסְגְּרוֹת	[גִּלְגְּלוֹת

1. In participial words *ē* (ֵ) generally remains in cons., rarely becoming *a* (ַ), Deut. 32. 28, except before Gutturals, though it may remain even before them 2 Kings 7. 10. In other words ֵ is the prevailing vowel, though ֶ may be found, מַפְתֵּחַ Is. 22. 22, מַקֵּל Gen. 30. 37.

2. In the hurried construct and with strong fem. additions, the ֵ of the pretone is frequently thinned to ֶ-, and the words are not to be distinguished from corresponding parts of the form *miqṭāl*, of first declension. Occasionally the consciousness of derivation from *maqṭēl* becomes entirely lost, and the inflection proceeds upon the type *miqṭāl*, e. g. מַזְלֵג *fork*, plur. מִזְלָגוֹת. Sometimes both forms appear, מַעְבָּרוֹת and מַעֲבָרוֹת from a sing. only found in cons. מַעֲבַר, the abs. of which may have ended in *ā* or *ē*. The task of the Lexicographer here is nowise easy.

3. The law of inflection of this class of words extends itself to the fem., which however commonly adopts the segholate ending, § 29. But in the fem. the long — shews a considerable proclivity to remain, as in *first* declens. (see there Add. note 4); e. g. in participial forms which have become substantives, and in words having abstract meaning, as יֹלֶדֶת *she who bears*, בֹּגֶדֶת *traitoress*, מְכַשֶּׁפָה *enchantress*, שֹׁמֵמָה *the desolate*, תּוֹעֵבָה *abomination*, מַהְפֵּכָה *overthrow*, תַּרְדֵּמָה *deep sleep* &c. The *ē* remains even in masculines in pause. Also in the two words שְׁלֵשׁ, רִבֵּעַ *of the third, of the fourth, generation.*

These remarks, without enumeration of all particulars, may suffice to indicate the lines in which exceptions shew themselves.

4. The vowel *o* (—) in nouns, except in third class of segholates, is usually unchangeable. Even when, from formation of *fem.* by adding the simple *Tav*, *ō* arises out of *ô* or *û*, it usually gives place to these vowels again in the *plur.*, § 29. 2. In a few nouns however with this fem. ending, and in some others, the vowel *ō* is treated like *ē* of this *third* declension, in the same way as it is in verbs; e. g. גֻּלְגֹּלֶת plur. גֻּלְגֻּלוֹת, מַחֲלֹקֶת plur. מַחְלֻקוֹת, כֹּהֶנֶת plur. כֳּהָנוֹת, אַרְמוֹן plur. אַרְמְנוֹת, שִׁבֹּלֶת plur. שִׁבֳּלִים, צִפּוֹר plur. צִפֳּרִים; probably the last is from a sing. *ṣippôreth* and even *'arm*ᵉ*nôth* may imply a sing. *'armōneth.*

TABLE OF SOME COMMON IRREG. NOUNS.

אָב *father, cons.* אֲבִי, *my f.* אָבִי, *thy f.* אָבִיךָ, *his f.* אָבִיהוּ or אָבִיו, *her f.* אָבִיהָ, *your f.* אֲבִיכֶם, *their f.* אֲבִיהֶם &c., *plur.* אָבוֹת.

אָח *brother, cons. s.* אֲחִי, *cons. pl.* אֲחֵי; with *four* heavy suff. to sing. like *father*. *My b.* אָחִי &c., *pl.* אַחִים, אַחַי &c. but אֲחֵיו.

אָחוֹת *sister, cons.* אֲחוֹת, *suff.* אֲחוֹתִי &c.; *pl.* with *suff.* אַחְיוֹתָיו, אַחְיוֹתֵיהֶם, but also אֲחוֹתֵיכֶם, אֲחוֹתֵיךְ.

אִישׁ *man*, a form thinned from אֲנָשׁ; *pl.* אֲנָשִׁים, *cons.* אַנְשֵׁי; also rarely אִישִׁים.

אִשָּׁה *woman, wife* (i. e. אִישָׁה or אִשְׁתּ), hence *cons.* אֵשֶׁת, *my w.* אִשְׁתִּי; *pl.* נָשִׁים 1, *cons.* נְשֵׁי. Ez. 23. 44 אִשּׁוֹת.

אָמָה 1 *maid, pl.* אֲמָהוֹת 1, *suff.* אַמְהֹתַי.

בַּיִת 2 *house, cons.* בֵּית, *pl.* בָּתִּים, probably *bâttîm, cons.* בָּתֵּי.

בֵּן 3 *son, cons.* בֶּן־, בְּנוֹ (also בְּנִי with cons. termination); *suff.* בְּנִי, בִּנְךָ &c.; *pl.* בָּנִים 1, *cons.* בְּנֵי, *suff.* בָּנַי &c.

בַּת 2 *daughter, my d.* בִּתִּי (for בִּנְתִּי &c.); *pl.* בָּנוֹת 1.

חָם *father-in-law*, like אָח.

יוֹם 2 *day* (i. e. יוֹם), *pl.* יָמִים (for יְמָיִם); *cons.* יְמֵי.

כְּלִי *vessel, suff.* כֶּלְיְךָ; *pl.* כֵּלִים, *cons.* כְּלֵי, *suff.* כֵּלַי.

מַיִם *pl. water, cons.* מֵי, מֵימֵי, *suff.* מֵימַי, מֵימֶיךָ &c.

עִיר 2 *city, pl.* עָרִים, *cons.* עָרֵי.

פֶּה *mouth, cons.* פִּי, *my m.* פִּי, פִּיךָ, פִּיו and פִּיהוּ, פִּיהָ, פִּיהֶם &c. like אָב; *pl.* פִּים, פִּיּוֹת.

רֹאשׁ 2 *head, pl.* רָאשִׁים, *cons.* רָאשֵׁי.

שֵׁם *name, suff.* שְׁמִי, שִׁמְךָ &c. *Pl.* שֵׁמוֹת, *cons.* שְׁמוֹת.

HEBREW VOCABULARIES

SECOND EDITION.

PHASED
DETERIORATION

WILLIAM R. HARPER, Ph. D.,

Professor of Hebrew and the Cognate Languages, Chicago Baptist Union Theological Seminary.

CHICAGO: 1882.

THE HEBREW BOOK EXCHANGE, MORGAN PARK.

Entered, according to act of Congress, in the year 1882, by
WILLIAM R. HARPER,
In the Office of the Librarian of Congress, at Washington, D. C.

PRESS OF MAX STERN, CHICAGO.

PREFACE.

The "Hebrew Vocabularies" is intended (1) for students in the Department of Hebrew of the Baptist Union Theological Seminary of Chicago, and (2) for the members of the "American Institute of Hebrew."

The chief difficulty to overcome in the mastery of the Hebrew language is the acquisition of a vocabulary. There are but few words in Hebrew with which corresponding ones in English, of similar sound and signification, may be associated. The old method of acquiring a vocabulary, i. e., by looking up a word in the Lexicon every time it occurs until it becomes familiar — for this, life is too short. The average student will look for the same word twenty times before he will really *know* it; meanwhile he could have commited *twenty words*.

Yet it is not well for a beginner to attempt to commit the Lexicon. Lists of the words which occur most frequently, should be given him to learn. Out of the seven or eight thousand vocables in the Hebrew language, about *one thousand* occur over twenty-five times. If the learner will commit five or six of these a day, within six or eight months he will have mastered a vocabulary sufficient to enable him to read any portion of the Hebrew of the Old Testament with ease and pleasure. Three words, those meaning *to say*, *God* and *Son*, occupy sixty pages of the Hebrew text. The sixty verbs given in Lists I and II occupy *two hundred* pages, and the first sixty nouns given in Lists VI and VII occupy *two hundred and twenty-five pages*—together about one-third of the whole Bible, and in this calculation derivatives are not included.

In the Seminary classes, the book will be used as follows : Lists I—XI will be learned during the Junior year. The class will be required to learn the Principal Parts of the verbs and to know in which of the

species each verb is found. The enumeration of the times which each form occurs is added merely to indicate which species are the most important; e. g. דבר *to speak*, occurs *forty-one* times in the Kal, but *one thousand and fifty* times in the Piel. צוה *to command*, does not occur at all in the Kal, but *five hundred* times in the Piel. Every student should know that these verbs are used chiefly or exclusively in the Piel, just as a Latin student is supposed to know that the verbs *memini* and *odi* have no Present tense. For the particular meaning of the several conjugations, the student will be referred to the Lexicon. List XII—XXIX will be taken up in connection with the corresponding grammatical work; e. g., when the class is studying the peculiarities of verbs ל"ה, List XXIV will furnish the verbs for synopses and inflection, and so with the other classes of Imperfect Verbs. List XXX—LIII will be studied, especially by the Middle Class; as occasion may suggest. Lists LIV and LV will furnish lexicographical work for the Senior Class.

It is desired to call attention to the following points:

(1.) The "Vocabularies" is not intended as, in any manner, a substitute for the Lexicon, but to be used with constant reference to it.

(2.) In the Lists of nouns arranged according to their signification (XXX—XLIX), and in the Lists of verbs and nouns with their Hebrew equivalents (LIV and LV), *rare* forms are occasionally given but only when it has seemed best to make the list exhaustive, or when the form was important, or had important derivatives.

(3.) Inasmuch as it was the aim always to present the most *usual* meaning of a word, *secondary* instead of *primary* meanings will often be found given.

(4.) From the nature of the Hebrew characters, it is extremely difficult to find in any Hebrew book a page typographically perfect. The points Hhirik, Hholem and Tsere, the upper part of Lamedh and the lower part of Koph, or of final Kaph, will often break off in spite of the greatest care, not only in the process of electrotyping, but even after the form has gone to press. Instances of this may be found on almost every page of a Hebrew Bible or Grammar. The kind consideration of students is requested in cases of such a nature.

(5.) There is no *good* student who does not desire to make notes, to put down, as his own, the results of his reading or examination for future use. To afford an opportunity for gratifying this desire, the book is inter-

leaved, and it is hoped that each blank page will, in a short time, be as full as the one opposite it.

A list of the books consulted in arranging these Lists is given on page 9. I am, however, especially indebted to Dr. Robert Young's "Hebrew and Chaldee Vocabulary" for the statistics in reference to the occurrence of the words, while the Lists of Prepositions, Adverbs, Conjunctions and Interjections, though differently arranged, are substantially as given in Dr. M. M. Kalisch's Hebrew Grammar.

In the work of counting, verifying and arranging the Lists, and of giving the Principal Parts of the verbs, I have received valuable assistance from my brother, Mr. R. F. Harper. I am also indebted to Mr. Ira M. Price, and to Mr. O. O. Fletcher for aid in revising the sheets.

Although unusual care has been taken in the work, it is reasonable to suppose that omissions and errors will be found. Corrections will be thankfully received.

It may be proper to state that the book is not published but *printed for private use*, and that copies can be obtained *only* through the Hebrew Book Exchange.

W. R. H.

MORGAN PARK, January 2, 1882.

NOTE TO THE SECOND EDITION.

The necessity of issuing so soon a second edition of the "Vocabularies" prevents the addition of any new matter. The plates have been corrected so far as it was possible without making new ones.

The old way of spelling grammatical terms, e. g., Kal, Kaph, etc., as a matter of course, could not be changed, though this would have been extremely desirable. The author trusts that, notwithstanding the many defects of the book, it will be found useful in the study of the language.

November 1st, 1882. W. R. H.

CONTENTS.

FIRST PART.

LISTS I—V.

Verbs occurring 25—5000 times.

List.		Page
I.	Verbs occurring 500—5000 times	12
II.	Verbs occurring 200—500 times	14
III.	Verbs occurring 100—200 times	18
IV.	Verbs occurring 50—200 times	22
V.	Verbs occurring 25—50 times	26

SECOND PART.

LISTS VI—XI.

Nouns occurring 25—5000 times.

VI.	Nouns occurring 500—5000 times	36
VII.	Nouns occurring 300—500 times	38
VIII.	Nouns occurring 200-300 times	40
IX.	Nouns occurring 100—200 times	42
X.	Nouns occurring 50—100 times	44
XI.	Nouns occurring 25—50 times	48

THIRD PART.

LISTS XII—XXIX.

Verbs occurring 25—5000 times arranged according to their classification.

XII.	Perfect Verbs occurring 25—5000 times	60
XIII.	Verbs Pe Guttural occurring 25—5000 times	62
XIV.	Verbs Ayin Guttural occurring 25-5000 times	62
XV.	Verbs Lamedh Guttural occurring 25—5000 times	64
XVI.	Verbs with two gutturals occurring 25—5000 times	64
XVII.	Verbs Pe Nun occurring 25—5000 times	64
XVIII.	Verbs Ayin Doubled occurring 25—5000 times	66
XIX.	Verbs Pe Yodh occurring 25—5000 times	66
XX.	Verbs Ayin Vav occurring 25—5000 times	68
XXI.	Verbs Ayin Yodh occurring 25—5000 times	68
XXII.	Verbs Pe Aleph	70
XXIII.	Verbs Lamedh Aleph occurring 25—5000 times	70
XXIV.	Verbs Lamedh He occurring 25—5000 times	70
XXV.	Verbs Ayin Vav and, at the same time, Guttural, or Lamedh Aleph, occurring 25—5000 times	72
XXVI.	Verbs Pe Nun and, at the same time, Guttural, Lamedh Aleph or Lamedh He, occurring 25—5000 times	72
XXVII.	Verbs Pe Yodh and, at the same time, Guttural, Lamedh Aleph or Lamedh He occurring 25—5000 times	72

XXVIII. Verbs Pe and Ayin Guttural, and Lamedh He, occurring 25—5000 times..74
XXIX. Synopses in the Kal of ten common, but difficult verbs.....74

FOURTH PART.

LISTS XXX—XLIX.

Nouns arranged according to their signification.

XXX. Nouns relating to the Celestial World.....78
XXXI. Nouns relating to Fire, Weather, &c.....78
XXXII. Nouns designating Divisions of Time.....78
XXXIII. Nouns designating Divisions of Water.....78
XXXIV. Nouns relating to Divisions of Land.....78
XXXV. Nouns designating Earth, Minerals and Metals.....80
XXXVI. Nouns designating Vegetation.....80
XXXVII. Nouns relating to Trees, Shrubs, Plants.....80
XXXVIII. Nouns relating to Animals.....82
XXXIX. Nouns relating to Birds, Reptiles, Insects, &c.....82
XL. Nouns designating Man.....82
XLI. Nouns designating Terms of Relationship.....84
XLII. Nouns designating Parts of the Body.....84
XLIII. Nouns designating Cities, Towns &c.....84
XLIV. Nouns designating Parts of the House.....84
XLV. Nouns designating Articles of Furniture.....86
XLVI. Nouns designating Articles of Clothing, &c.....86
XLVII. Names of Musical Instruments.....86
XLVIII. Nouns designating Positions, Occupations, &c.....86
XLIX. A List of the most common adjectives.....88

FIFTH PART.

LISTS L—LIII.

Prepositions, Adverbs, Conjunctions and Interjections.

L. Prepositions and Prepositional Phrases.....92
1. Denoting Place.....92
2. Denoting Time.....94
3. Denoting Cause and Instrumentality.....94
4. Denoting Connection, Relation, Privation.....94
LI. Adverbs and Adverbial Phrases.....96
1. Denoting Place.....96
2. Denoting Time.....96
3. Denoting Quality.....98
4. Denoting Quality, Condition, Causality.....98
5. Denoting Affirmation and Negation.....98
LII. Conjunctions.....100
1. Of Time.....100
2. Of Wish and Condition.....100
3. Of Cause, End, Effect.....100
4. Of Contrast and Correspondence.....100
LIII. Interjections.....100

SIXTH PART.

LISTS LIV—LV.

English words with their most common Hebrew Equivalents.

LIV. English Words (Verbs) with their most Common Hebrew Equivalents..106
LV. English Words (Nouns) with their most common Hebrew Equivalents. 116

Books Consulted in Preparation of the "Vocabularies."

[It is deemed sufficient to state merely the author and title without detailed description.]

Bresslau, English and Hebrew Dictionary.

Davidson, Hebrew Grammar.

Davies, Compendious and Complete Hebrew and Chaldee Lexicon, with an English-Hebrew Index.

Deutsch, Practical Hebrew Grammar.

Wigram, Englishman's Hebrew Concordance.

Frey, Hebrew, Latin and English Dictionary,

Fuerst, Hebrew and Chaldee Concordance.

Fuerst, Hebrew and Chaldee Lexicon.

Gesenius, Hebrew and English Lexicon of the Old Testament.

Gesenius, Hebrew Grammar.

Girdlestone, Old Testament Synonymes.

Green, Hebrew Grammar.

Kalisch, Hebrew Grammar with Exercises.

Mayer, Systematical and Practical Hebrew Grammar.

Smith, Dictionary of the Bible.

Young, Analytical Concordance.

Young, List of Hebrew Roots.

Young, Hebrew and Chaldee Vocabulary.

PART FIRST.

LISTS I–V.

VERBS OCCURRING 25—5000 TIMES.

I. Verbs Occurring 500—5000 Times.

1.	אָכַל	Eat.	הָלַךְ	Walk.	לָקַח	Take.	עָלָה	Go up.
2.	אָמַר	Say.	יָדַע	Know.	מוּת	Die.	עָשָׂה	Do, make.
3.	בּוֹא	Go in.	יָלַד	Bring forth	נָשָׂא	Lift up.	צִוָּה	Command.
4.	דָּבַר	Speak.	יָצָא	Go out.	נָתַן	Give.	קוּם	Rise, stand.
5.	הָיָה	Be.	יָשַׁב	Sit, dwell.	עָבַר	Pass over.	קָרָא	Call, meet.

Principal Parts.

1. אָכַל (750) נֶאֱכַל (44), אֹכֵל (1), אָכֹל (5), הֶאֱכִיל (21).
2. אָמַר (5000), נֶאֱמַר (22), הֶאֱמִיר (2), הִתְאַמֵּר (2).
3. בּוֹא, Pf. Kal. בָּא (2030), הֻבִיא (566), הוּבָא (23).
4. דָּבַר (41), נִדְבַּר (4), דִּבֵּר (1050), דָּבַר (2), הִדְבִּיר (2) הִדַּבֵּר (4).
5. הָיָה, הָוָה, נִהְיָה.
6. הָלַךְ (1450), נֶהֱלַךְ (1), הֹלֵךְ (25), הוֹלִיךְ (46), הִתְהַלֵּךְ (45).
7. יָדַע (920), נוֹדַע (41), יְדֵעַ (1), יֹדֵעַ and Po. יוֹדַע (8), הוֹדִיעַ (71), הוֹדַע (2). הִתְוַדַּע (2).
8. יָלַד (250), נוֹלַד (38), יֹלֵד (10), יְלַד (28), הוֹלִיד (170), הוֹלַד (3), הִתְיַלֵּד (1).
9. יָצָא (770), הוֹצִיא (300), הוּצָא (5).
10. יָשַׁב (1000), נוֹשַׁב (9), יֹשֵׁב (1), הוֹשִׁיב (38), הוּשַׁב (2).
11. לָקַח (1040), נִלְקַח (9), לֹקֵחַ (9), Hoph. Impf. יִקַּח (6), הִתְלַקַּח (2).
12. מוּת (640), Polel מוֹתֵת (9), הֵמִית (140), הוּמַת (68).
13. נָשָׂא (650), נָשֹׂא (32), נְשֹׂא (13). הִשִּׂיא (2), הִתְנַשֵּׂא and הִנַּשֵּׂא (9).
14. נָתַן (2000), נִתַּן (82), Hoph. Impf. יִתֵּן (8).
15. עָבַר (460), נֶעְבַּר (1). עִבֵּר (2), הֶעְבִּיר (80), הִתְעַבֵּר (8).
16. עָלָה (600), נַעֲלָה (18), הֶעֱלָה (240), הַעֲלָה (3), הִתְעַלָּה (1).
17. עָשָׂה (2420), נַעֲשָׂה (98). עִשָּׂה (2), עֲשֵׂה (1).
18. צָוָה (not used in Kal), צִוָּה (500), צֻוָּה (9).
19. קוּם (450), Pi. קִיֵּם and Po. קוֹמֵם (15), הֵקִים (145), הוּקַם (3), הִתְקוֹמֵם (4).
20. קָרָא (call) 650 (meet) 129, נִקְרָא (63, 5), קְרָא (7), הִקְרָא (1).

I. Verbs. 500—5000 (con.)	II. Verbs occuring 200—500 times.		
1. רָאָה See.	אָהַב Love.	חָזַק Be strong.	יָרֵא Be afraid.
2. שִׂים Put.	אָסַף Gather.	חָטָא Sin.	יָרַד Go down.
3. שׁוּב Turn.	בָּנָה Build.	חָיָה Live.	יָרַשׁ Possess.
4. שָׁלַח Send.	בָּקַשׁ Seek.	יָכֹל Be able.	יָשַׁע Deliver.
5. שָׁמַע Hear.	זָכַר Remember.	יָסַף Add.	כּוּן Prepare.

Principal Parts.

21. רָאָה (1120), נִרְאָה (102), רְאֵה (1), הֵרְאָה (62), הָרְאָה (5), הִתְרָאָה (5).
22. שִׂים (600), הָשִׁים (2), הוּשַׂם (1).
23. שׁוּב (682), Polel, שׁוֹבֵב (12), Polal, שׁוֹבַב (1), הֵשִׁיב (400), הוּשַׁב (15).
24. שָׁלַח (560), נִשְׁלַח (1), שְׁלַח (260), שִׁלַּח (10), הִשְׁלִיחַ (6).
25. שָׁמַע (1000), נִשְׁמַע (42), שְׁמַע (2), הִשְׁמִיעַ (60).

26. אָהַב (190), נֶאֱהַב (1), אֱהַב (16).
27. אָסַף (120), נֶאֱסַף (81), אֱסֹף (8), אֶסַּף (5), הִתְאַסֵּף (1).
28. בָּנָה (350), נִבְנָה (30).
29. בָּקַשׁ (not used in Kal.) בְּקֵשׁ (225), בַּקֵּשׁ (3).
30. זָכַר (108), נִזְכַּר (20), הִזְכִּיר (41).
31. חָזַק (80), חֲזַק (62), הֶחֱזִיק (118), הִתְחַזֵּק (27).
32. חָטָא (190), חֲטֵא (14), הֶחֱטִיא (32), הִתְחַטֵּא (9).
33. חָיָה (186), חֲיֵה (56), הֶחֱיָה (22).
34. יָכֹל (not used in Kal.) Hoph.,(200).
35. יָסַף (32), נוֹסַף (6), הוֹסִיף (172).
36. יָרֵא (266), נוֹרָא (44), יְרֵא (5).
37. יָרַד (320), הוֹרִיד (67), הוֹרַד (7).
38. יָרַשׁ (166), נוֹרַשׁ (4), יְרֵשׁ (2), הוֹרִישׁ (67).
39. יָשַׁע (not used in Kal.) נוֹשַׁע (21), הוֹשִׁיעַ (200).
40. כּוּן (not used in Kal.) נָכוֹן (67), כּוֹנֵן (29), כּוֹנַן (2). הֵכִין (105), הוּכַן (6), הִתְכּוֹנֵן (4).

II. Verbs Occurring 200–500 Times.

1.	כָּלָה Complete.	נָגַד Make known.	סוּר Turn aside.	רוּם Be high.
2.	כָּרַת Cut.	נָטָה Stretch out.	עָבַד Serve.	שָׁכַב Lie down.
3.	כָּתַב Write.	נָכָה Smite.	עָנָה Answer.	שָׁמַר Keep.
4.	מָלֵא Be full.	נָפַל Fall.	פָּקַד Visit.	שָׁפַט Judge.
5.	מָלַךְ Be king.	נָצַל Snatch, deliver.	רָבָה Multiply.	שָׁתָה Drink.

Principal Parts.

41. כָּלָה (64), כִּלָּה (140), כִּלָּה (2).
42. כָּרַת (130), נִכְרַת (80), כָּרַת (2), הִכְרִית (80), הָכְרַת (1).
43. כָּתַב (200), נִכְתַּב (17), כִּתֵּב (2).
44. מָלֵא (97), נִמְלָא (36), מִלֵּא (112), מְלָא (1), הִתְמַלֵּא (1).
45. מָלַךְ (300), נִמְלַךְ (1), הִמְלִיךְ (49), הָמְלַךְ (1).
46 נָגַד (not used in Kal), הִגִּיד (344), הֻגַּד (35).
47. נָטָה (139), נִטָּה (3), הִטָּה (75).
48. נָכָה (not used in Kal), נִכָּה (1), נְכֵה (2), הִכָּה (481), הֻכָּה (16).
49. נָפַל (350), הִפִּיל (61), הִתְנַפֵּל (5), Pilel נִפְלֵל (1).
50. נָצַל (not used in Kal), נִצַּל (15), נִצֵּל (4), הִצִּיל (188), הֻצַּל (1), הִתְנַצֵּל (1).
51. סוּר (150), סוֹרֵר (1), הֵסִיר (137), הוּסַר (5).
52. עָבַד (268), נֶעֱבַד (4), עֻבַּד (2), הֶעֱבִיד (8), הָעֳבַד (4).
53. עָנָה (314), נַעֲנָה (5).
54. פָּקַד (236), נִפְקַד (21), פֻּקַּד (1), פְּקֵד (2), הִפְקִיד (29), הָפְקַד (8), הִתְפַּקֵּד (4), Hothpael, הָתְפָּקֵד (4).
55. רָבָה (59), רִבָּה (4), הִרְבָּה (180).
56. רוּם (70), רוֹמֵם (24), רוֹמַם (3), הֵרִים (92), הוּרַם (3). הִתְרוֹמֵם (1).
57. שָׁכַב (197), נִשְׁכַּב (2), שְׁכַב (1), הִשְׁכִּיב (8), הָשְׁכַּב (3).
58. שָׁמַר (420), נִשְׁמַר (36), שְׁמֹר (1), הִשְׁתַּמֵּר (3).
59. שָׁפַט (180), נִשְׁפַּט (16), שׁוּפָט (1).
60. שָׁתָה (215), נִשְׁתָּה (1).

III. Verbs occurring 100—200 times.

1	אָבַד Perish.	גָּאַל Redeem.	דָּרַג Kill.	יָדָה Thank.
2	אָמַן Be firm.	גָּדַל Be great.	זָבַח Sacrifice.	יָטַב Be good.
3	בּוֹשׁ Be ashamed.	גּוּר Sojourn.	חָלַל Profane, begin.	יָתַר Be left.
4	בָּטַח Trust.	גָּלָה Reveal.	חָנָה Encamp.	כָּבֵד Be heavy.
5	בִּין Perceive.	דָּרַשׁ Tread, seek.	חָשַׁב Impute, think.	כָּסָה Conceal.
6	בָּכָה Weep.	הָלַל Praise.	טָמֵא Be unclean.	כָּפַר Cover.
				לָבַשׁ Put on.

Principal Parts.

61. אָבַד (118), הֶאֱבִיד (40), אֹבַד (26).
62. אָמַן (11), הֶאֱמִין (40), נֶאֱמָן (51).
63. בּוֹשׁ (95), בּוּשַׁשׁ (2), הֵבִישׁ (11), הִתְבּוֹשֵׁשׁ (1).
64. בָּטַח (112), הִבְטִיחַ (5).
65. בִּין (70), בּוֹנֵן (22), הֵבִין (1), הִתְבּוֹנֵן (56), הִתְבּוֹנֵן (22).
66. בָּכָה (126), בְּכֵה (2).
67. גָּאַל (94), נִגְאַל (8).
68. גָּדַל (54), גִּדֵּל (25), הִגְדִּיל (1), הִתְגַּדֵּל (34), הִגְדִּיל (4).
69. גּוּר (180), הִתְגּוֹרֵר (2).
70. גָּלָה (50), נִגְלָה (31), גִּלָּה (54), הִגְלָה (40), הִגְלָה (2), גִּלָּה (7), הִתְגַּלָּה (2).
71. דָּרַשׁ (170), נִדְרַשׁ (7).
72. הָלַל (5), הוֹלֵל (108), הִלֵּל (5), הִתְהַלֵּל (3), הִתְהַלֵּל (23), הָלַל (10).
73. הָרַג (170), נֶהֱרַג (3), הִרֵּג (2).
74. זָבַח (120), זְבַח (22).
75. חָלַל (2), נֶחַל (8), חִלֵּל (68), הִתְחַלֵּל (3), חֹלֵל (2), הִתְחַלֵּל (23). Hithpo. חִתְחַלֵּל (6).
76. חָנָה (142).
77. חָשַׁב (76), נֶחְשַׁב (30), חִשֵּׁב (16), הִתְחַשֵּׁב (1).
78. טָמֵא (50), נִטְמָא (17), טָמֵא (77), הִטַּמֵּא (15), Hothpael הִטַּמָּא (1).
79. יָדָה (1), יְדֵה (2), הוֹדָה (95), הִתְוַדָּה (11).
80. יָטַב (43), הֵיטִיב (62).
81. יָתַר (1), נוֹתַר (86), הוֹתִיר (24).
82. כָּבֵד (25), נִכְבַּד (29), כִּבֵּד (38), הִתְכַּבֵּד (17), הִכְבִּיד (3), כְּבַד (2).
83. כָּסָה (3), נִכְסָה (2), כִּסֶּה (128), כְּסֵה (7), הִתְכַּסֶּה (9).
84. כָּפַר (1), כִּפֵּר (90), כְּפֹר (7), הִתְכַּפֵּר (1), Nithpa. נִכַּפֵּר (1).
85. לָבַשׁ (80), לִבֵּשׁ (4), הִלְבִּישׁ (32).

III. Verbs occurring 100–200 times.

1.	לָחַם Fight.	סָפַר Number.	רָדַף Pursue.	שָׁבַע Swear.
2.	לָכַד Capture.	עָזַב Abandon.	רוּץ Run.	שָׁבַר Break in pieces.
3.	נָגַע Touch.	פָּנָה Turn about.	רָעָה Feed.	שָׁחָה Do obeisance.
4.	נָגַשׁ Approach.	קָבַר Bury.	שָׂנֵא Hate.	שָׁחַת Corrupt.
5.	נָסַע Depart.	קָדַשׁ Consecrate.	שָׂרַף Burn.	שָׁלַח Cast, send.
6.	סָבַב Surround.	קָרַב Draw near.	שָׁאַל Ask.	שָׁלֵם Be whole.
				שָׁרַת Minister.

Principal Parts.

86. לָחַם (10), נִלְחַם (170).
87. הִתְלַכֵּד (36), נִלְכַּד (80), לָכַד (2).
88. נָגַע (105), Niphal, נִגַּע (1), Piel, נִגַּע (3), נָגַע (1), הִגִּיעַ (38).
89. נָגַשׁ (68), נִגַּשׁ (17), הִגִּישׁ (37), הִתְנַגֵּשׁ (2), הָגַשׁ (1).
90. נָסַע (135), נִסַּע (2), הִסִּיעַ (8).
91. סָבַב (66), נָסַב (40), סִבֵּב (1), Po. סוֹבֵב (11), הֵסֵב (32), הוֹסֵב (6).
92. סָפַר (79), נִסְפַּר (8), סִפֵּר (67), סַפָּר (5).
93. עָזַב (103), נֶעֱזַב (9), עִזֵּב (2).
94. פָּנָה (116), פִּנָּה (8), הִפְנָה (8), הָפְנָה (2).
95. קָבַר (86), נִקְבַּר (39), קִבֵּר (6), קֶבֶר (1).
96. קָדַשׁ (11), נִקְדַּשׁ (11), קִדֵּשׁ (76), הִקְדִּישׁ (5), הִתְקַדֵּשׁ (24).
97. קָרַב (93), נִקְרַב (2), קֵרֵב (7), הִקְרִיב (86).
98. רָדַף (129), נִרְדַּף (2), רִדֵּף (9), הִרְדִּיף (1), רְדַף (1).
99. רוּץ (94), Po. רוֹצֵץ (1), הֵרִיץ (6).
100. רָעָה (180), רֵעָה (1), הִרְעָה (1), הִתְרֹעֵעַ (1).
101. שָׂנֵא (128), נִשְׂנָא (2), שִׂנֵּא (15).
102. שָׂרַף (102), נִשְׂרַף (14), שִׂרֵּף (1).
103. שָׁאַל (165), נִשְׁאַל (3), שִׁאֵל (2), הִשְׁאִיל (2).
104. שָׁבַע (1), נִשְׁבַּע (152), הִשְׁבִּיעַ (30).
105. שָׁבַר (55), נִשְׁבַּר (56), שִׁבֵּר (36), הִשְׁבִּיר (1), הָשְׁבַּר (1).
106. שָׁחָה (1), הִשְׁחָה (1), Hithpalel הִשְׁתַּחֲוָה (170).
107. שָׁחַת (not used in Kal), נִשְׁחַת (6), שִׁחֵת (39), הִשְׁחִית (104), הָשְׁחַת (2).
108. שָׁלַח (not used in Kal), הִשְׁלִיךְ (110), הָשְׁלַךְ (13).
109. שָׁלֵם (8), שִׁלַּם (87), שִׁלֵּם (5), הִשְׁלִים (13), הָשְׁלַם (1).
110. שָׁרַת (not used in Kal), שֵׁרֵת (120).

IV. Verbs occurring 50–100 times.

111 אָבָה (55) Be willing, consent
112 אָחַז (67) Seize, hold
113 אָסַר (66) Bind
114 אָרַר (57) Curse
115 בָּחַר (100) Choose
116 בָּלַע (51) Swallow
117 בָּעַר (96) Consume
118 בָּקַע (51) Cleave
119 בָּרָא (53) Create
120 בָּרַח (65) Flee
121 דָּבַק (54) Cleave
122 הָפַךְ (95) Turn, overthrow
123 זוּר (73) Sojourn
124 זָנָה (96) Commit fornication
125 זָרַע (55) Sow

8 טוֹב (K. Hi.) Be good [tain
9 כּוֹל (K. Pilpel, Polpal, Hi.) Con-
10 כּוּן (Ni. Pol. Pul. Hi. Ho. Hith-pol.) Prepare
11 (לוּז)(K. Ni, Hi.) Turn away
12 לוּן (K. Ni. Hi. Hithpalpel) Lodge [Scorn
13 לוּץ (K. Hi. Pil. Hithpalpel)
14 (מוּג)(K. Ni. Pol. Hithpol.) Melt
15 מוּט (K. Ni. Hi. Hithp.) Move
16 מוּל (K. Ni. Pol. Hi. Hithpol.) Circumcise
17 מוּשׁ (K. Hi.) Depart
18 מוּת (K. Pol. Hi. Ho.) Die
19 (נוּם)(K.) Slumber
20 (נוּס)(K. Pol. Hi. Hithpol.) Flee
21 נוּף (K. Pol. Hi. Ho.) Shake, sift
22 (סוּג)(K. Ni.) Turn back
23 סוּר (K. Pol. Hi. Ho.) Turn aside
24 פּוּץ (K. Ni. Pol. Pilpel, Hi. Hithp.) Scatter
25 (צוּד)(K. Po. Hithp.) Hunt
26 (צוּם)(K.) Fast
27 צוּר (K.) Press, besiege
28 קוּם (K. Pi. Pol. Hi. Ho. Hithp.) Rise, stand
29 רוּם (K. Pol. Polal, Hi. Ho. Hith-pol.) Be high
30 רוּץ (K. Pol. Hi) Run
31 (רוּק)(Hi. Ho.) Pour out, draw out
32 (רוּשׁ)(K. Hithp.) Be poor
33 שׁוּב (K. Pol. Pul. Hi. Ho.) Turn, return

XXI. Verbs Ayin Yodh occurring 25–5000 times.

1 בִּין (K Ni Pol. Hi. Hithpol.)
2 גִּיל (K.) Exult [Perceive
3 רִיב (K. Hi.) Strive
4 שִׂים (K. Hi. Ho.) Place, set
5 שִׁיר (P. Pol. Ho.) Sing
6 שִׁית (K. Ho.) Put

XXII. Verbs Pe Aleph.

1 אָבַד (K. Pi. Hi.) Perish
2 אָבָה (K.) Be willing
3 אָחַז (K. Ni. Pi. Ho.) Seize
4 אָכַל (K. Ni. Pi. Pu. Hi.) Eat
5 אָמַר (K. Ni. Hi. Hithp.) Say
6 אָפָה (K. Ni.) Bake

XXIII. Verbs Lamedh Aleph, occurring 25—5000 times.

1 בָּרָא (K.Ni.Pi.) Create
2 חָבָא (Ni. Pu. Hi. Ho. Hithp.) Hide
3 חָטָא (K.Pi.Hi.Hithp.) Sin
4 טָמֵא (K. Ni. Pi. Pu. Hithp. Hothp.) Be unclean
5 יָרֵא (K. Ni. Pi.) Be afraid
6 (כָּלָא)(K. Ni. Pi.) Restrain
7 מָלֵא (K.Ni.Pi.Pu.Hithp.)Be full
8 מָצָא (K. Ni. Hi.) Find
9 (נָבָא)(Ni. Hithp.) Prophesy
10 פָּלָא (Ni.Pi.Hi. Hithp.) Be wonderful
11 (צָמֵא)(K.) Be thirsty
12 קָנָא (Pi. Hi.) Be jealous
13 קָרָא (K.Ni.Pu. Call; K.Ni.Hi. Meet)
14 רָפָא (K. Ni. Pi. Hithp.) Heal
15 שָׂנֵא (K. Ni. Pi.) Hate

XXIV. Verbs Lamedh He, occurring 25—2000 times.

1 בָּזָה (K. Ni. Hi.) Despise
2 בָּכָה (K. Pi.) Weep
3 בָּלָה (K. Pi.) Fall away, decay
4 בָּנָה (K. Ni.) Build
5 גָּלָה (K. Ni. Pi. Pu. Ho. Hithp.) Reveal

Impf. 3 m sg.	יִהְיֶה	יְחִיֶה	יִרְאֶה	יִירָא	יִתֵּן
Imv. 2 m. sg.	הֱיֵה	חֱיֵה	רְאֵה	יְרָא	תֵּן
Participle Act.	הֹיֶה	חֹיֶה	רֹאֶה	ירא	נֹתֵן

PART FOURTH.

LISTS XXX–XLIX

NOUNS ARRANGED ACCORDING TO THEIR SIGNIFICATION.

XXX. Nouns relating to the Celestial World.*

שָׁמַיִם Heavens	צָבָא Host	כֶּסֶא Full moon
רָקִיעַ Expanse	שֶׁמֶשׁ Sun	חֹדֶשׁ New moon
(מָזֹר) Planet	חַרְסָ Sun	כּוֹכָב Star
מָאוֹר Luminary	יָרֵחַ Moon	הֵילֵל Morning star

XXXI. Nouns relating to Fire, Weather, &c.

אֵשׁ Fire	קֶרַח Ice	אֵד Mist
אוּר Flame	שֶׁלֶג Snow	טַל Dew
לַהַב Flame	כְּפוֹר Hoar frost	מָטָר Rain
לַהַט Flame	בָּרָד Hail	גֶּשֶׁם Shower
רִשְׁפָּה Flame	עָנָן Cloud	מַבּוּל Deluge
גֶּחָל Burning coals	עָב Cloud	יוֹרֶה Early rain
אֵפֶר Ashes	אוֹר Light	מַלְקוֹשׁ Latter rain
עָשָׁן Smoke	חֹשֶׁךְ Darkness	קֶשֶׁת Rain-bow
חוֹם Heat	סַעֲרָה Storm	בָּרָק Lightning
(קָר) Cold	סוּפָה Whirlwind	רַעַם Thunder
קָרָה Cold	דְּמָמָה Calm	קוֹל Thunder

XXXII. Nouns designating Divisions of Time.

עֵת Time	שָׁנָה Year	לַיְלָה Night
מוֹעֵד Season	חֹדֶשׁ Month	צֵאת Rising (of sun)
עוֹלָם Age, eternity	שָׁבוּעַ Week	בּוֹא Setting (of sun)
אָחוֹר The Future	יוֹם Day	תְּמוֹל Yester-day
קֶדֶם The Past	רֶגַע Moment	שִׁלְשׁוֹם Day before yes-
אָבִיב Spring	שַׁחַר Dawn	ter-day
קַיִץ Summer	בֹּקֶר Morning	הַיּוֹם To-day
חֹרֶף Autumn, winter	צָהֳרַיִם Noon	מָחָר To-morrow
(סְתָו) Winter	עֶרֶב Evening	שַׁבָּת Sabbath

XXXIII. Nouns designating Divisions of Water.

יָם Sea	יְאוֹר Nile	מַעְיָן Spring
תְּהוֹם The deep	יַרְדֵּן Jordan	מוֹצָא Spring-head
נָהָר River	נַחַל Torrent	מָקוֹר Well-spring
יָד Side	פֶּלֶג Rivulet	בְּאֵר Well
שְׂפָה Brink	אֲפִיק Stream	אֲגַם Pond
לָשׁוֹן Tongue	מַבּוּל Deluge	בְּרֵכָה Pool
גְּדוֹת Banks	עַיִן Fountain	בּוֹר Cistern, pit
מַעֲבָר Ford		

* Nouns enclosed in parentheses are of rare occurence.

XXXIV. Nouns relating to Divisions of Land.

הַר Mountain	מַעֲלֶה Ascent	מִדְבָּר Wilderness
גִּבְעָה Hill	מוֹרָד Descent	עֲרָבָה Desert
עָפֶל Mound	——	יְשִׁימוֹן Waste
שְׁפִי Bare hill	עֵמֶק Valley	כִּכָּר Circle
צוּר Rock	גַּיְא Vale	כַּרְמֶל Park
סֶלַע Cliff	בִּקְעָה Plain	שָׂדֶה Field
סָעִיף Cleft	מִישׁוֹר Table-land	חֶלְקָה Portion
מְעָרָה Cave	שְׁפֵלָה Low-land	חֶבֶל District
שֶׁן Crag	אִי Island	יַעַר Forest
מִשְׂגָּב High place	חוֹף Coast	

XXXV. Nouns designating the Earth, Minerals, and Metals.

אֶרֶץ Earth	מֶלַח Salt	זָהָב Gold
אֲדָמָה Ground	אֶבֶן Stone	כֶּסֶף Silver
יַבָּשָׁה Dry land	צוּר Rock	נְחֹשֶׁת Bronze
עָפָר Dust	חַלָּמִישׁ Flint	בַּרְזֶל Iron
חוֹל Sand	סַפִּיר Sapphire	עוֹפֶרֶת Lead
חֵמָר Bitumen	שֹׁהַם Onyx	בְּדִיל Tin, alloy
גָּפְרִית Brimstone		

XXXVI. Nouns relating to Vegetation.

שָׂדֶה Field	פֶּרַח Flower	קָנֶה Stalk, branch
גַּן Garden	זֶרַע Seed	חִטָּה Wheat
דֶּשֶׁא Grass	יֶרֶק Green herb	שְׂעֹרָה Barley
חָצִיר Grass, hay	צֶמַח Sprout	קָצִיר Harvest
פְּרִי Fruit	עֵשֶׂב Herb	

XXXVII. Nouns relating to Trees, Shrubs, Plants.

שֹׁרֶשׁ Root	דַּרְדַּר Thistle	אֵלָה Oak, terebinth
גֵּזַע Stock, stem	רִמּוֹן Pomegranate	אַלּוֹן Oak
(חֹטֶר) Rod	תְּאֵנָה Fig-tree	כֶּרֶם Vineyard
עָנָף Branch	זַיִת Olive-tree	גֶּפֶן Vine
עָלֶה Leaf	תָּמָר Palm-tree	אֶשְׁכּוֹל Cluster
פְּרִי Fruit	תַּפּוּחַ Apple-tree	זְמוֹרָה Twig
צִיץ Blossom	אֶרֶז Cedar	עֲנָבִים Grapes
קוֹץ Thorn		

XXXVIII. Nouns relating to Animals.

קֶרֶן Horn	שׁוֹר Ox	סוּס Horse
רֶגֶל Foot	פַּר Bullock	אָתוֹן She-ass
פַּרְסָה Hoof	פָּרָה Heifer	חֲמוֹר He-ass
זָנָב Tail	עֵגֶל Calf	פֶּרֶד Mule
גֶּחוֹן Belly	צֹאן Flock	פֶּרֶא Wild ass
דָּם Blood	שֶׂה Sheep	גָּמָל Camel
עֶצֶם Bone	רָחֵל Ewe	אַרְיֵה Lion
עוֹר Skin	כֶּבֶשׂ Lamb	כְּפִיר Young lion
זָכָר Male	עֵז Goat	לָבִיא Lion, lioness
נְקֵבָה Female	שָׂעִיר He-goat	שַׁחַל Lion
	גְּדִי Kid	דֹּב Bear
חַיָּה Beast	אַיִל Ram	זְאֵב Wolf
בְּהֵמָה Cattle	אַיָּל Stag, hart	שׁוּעָל Jackal
בָּקָר Ox, herd	צְבִי Gazelle	כֶּלֶב Dog

XXXIX. Nouns relating to Birds, Reptiles, Insects, &c.

עוֹף Fowl	נֶשֶׁר Eagle	כִּנָּם Gnat
צִפּוֹר Bird	אַרְבֶּה Locust	תַּנִּין Sea-monster, serpent
כָּנָף Wing	דְּבוֹרָה Bee	נָחָשׁ Serpent
גּוֹזָל Young bird	זְבוּב Fly	עַקְרָב Scorpion
שְׂלָו Quail	שְׁרָץ Swarm, insect	פֶּתֶן Asp, adder
יוֹנָה Dove	רֶמֶשׂ Creeping thing	צְפַרְדֵּעַ Frog
תּוֹר Turtle dove	רִמָּה Worm	דָּגָה Fish
עוֹרֵב Raven	תּוֹלָעָה Worm, maggot	דָּג Fish

XL. Nouns designating Man.

אָדָם Man	יֶלֶד Child (m.)	בָּחוּר Youth
אֱנוֹשׁ Man	יַלְדָּה Child (f.)	בְּתוּלָה Virgin
אִישׁ Man	עֶלֶם Boy	יָשִׁישׁ Old man
גֶּבֶר Strong man	עַלְמָה Girl	זָקֵן Old woman
אִשָּׁה Woman	נַעַר Lad	שֵׂיבָה A gray-haired person, old man
יוֹנֵק Suckling	נַעֲרָה Maiden	
עוֹלֵל Infant	נְעָרִים Youth	

XLI. Nouns designating Terms of relationship.

אָב	Father	חָתָן	Bride-groom	אַלְמָנָה	Widow
אֵם	Mother		Son-in-law	יָתוֹם	Orphan
בֵּן	Son	כַּלָּה	Bride, Daughter-in-law	שְׁאֵר	Kindred
בַּת	Daughter			נֵכָר	Progeny
אָח	Brother	בַּעַל	Husband	תּוֹלְדוֹת	Generations
אָחוֹת	Sister	אִשָּׁה	Wife	מִשְׁפָּחָה	Family
אָבוֹת	Parents	חֹתֵן	Father-in-law	שֵׁבֶט	Tribe
דּוֹד	Uncle	חָמוֹת	Mother-in-law	מַטֶּה	Tribe

XLII. Nouns designating Parts of the Body.

גּוּפָה	Body, corpse	אֹזֶן	Ear	כָּבֵד	Liver
גְּוִיָּה	Body, corpse	לֶחִי	Jaw, cheek	קֶרֶב	Entrails
בָּשָׂר	Flesh	פֶּה	Mouth	כְּלָיוֹת	Kidneys
דָּם	Blood	שָׂפָה	Lip	זְרוֹעַ	Arm
גִּיד	Sinew	שֵׁן	Tooth	אַמָּה	Fore-arm
עֶצֶם	Bone	לָשׁוֹן	Tongue	יָד	Hand
עוֹר	Skin	חֵיךְ	Palate	כַּף	Palm of hand
שֵׂעָר	Hair	צַוָּאר	Neck	אֶצְבַּע	Finger
רֹאשׁ	Head	עֹרֶף	Neck, nape	בֹּהֶן	Thumb
גֻּלְגֹּלֶת	Skull	גַּרְגֶּרֶת	Throat, neck	שֶׁכֶם	Shoulder-blade
פָּנִים	Face	גָּרוֹן	Throat	כָּתֵף	Shoulder
מֵצַח	Forehead	גַּב	Back	שׁוֹק	Leg
עַיִן	Eye	צַד	Side	יֶרֶךְ	Thigh
גַּבּוֹת	Eye-brow	צֵלָע	Rib	בֶּרֶךְ	Knee
עַפְעַף	Eye-lid	חֵיק	Bosom	קַרְסֹל	Ankle
אִישׁוֹן	Pupil	בֶּטֶן	Belly	רֶגֶל	Foot
אַף	Nose	מֵעַיִם	Bowels, womb	עָקֵב	Heel
אַפַּיִם	Nostrils	לֵב	Heart		

XLIII. Nouns designating Cities, Towns, &c.

עִיר	City	אַרְמוֹן	Fortress, citadel	מָעוֹז	Fortification
קִיר	Wall, city	חָצֵר	Court, village	מָעוֹן	Habitation
קִרְיָה	City, town	סֹךְ	Tent	מְצָד	Stronghold
בִּירָה	Castle, citadel	מִבְצָר	Fortress	מְצוּר	Fortification

XLIV. Nouns designating Parts of the House.

קוֹרָה Cross-beam	חָצֵר Court	פֶּתַח Entrance
פִּנָּה Corner	עַמּוּד Pillar	דֶּלֶת Door
צִיר Hinge of door	חוֹמָה Wall	חַלּוֹן Window
בְּרִיחַ Bar	עֲלִיָּה Upper room	מַשְׁקוֹף Lintel
חֶדֶר Bed-chamber	גַּג Roof	מַפְתֵּחַ Key
אוּלָם Porch	שַׁעַר Gate	מַעֲלָה Step

XLV. Nouns designating Articles of Furniture.

שֻׁלְחָן Table	מַצָּע Bed	צְנָצֶנֶת Vessel, jar
כִּסֵּא Seat, throne	תַּנּוּר Furnace	סַל Basket
הֲדוֹם Foot-stool	סִיר Pot	נַרְזֶן Axe
מְנוֹרָה Candle-stick	דּוּד Kettle	מַטֶּה Staff
נֵר Lamp	כַּד Pitcher, pail	עֵט Style
אָרוֹן Ark, chest	גָּבִיעַ Cup	מִשְׁקָל Weight
מִטָּה Couch		

XLVI. Nouns designating Articles of Clothing, &c.

כְּסוּת Covering	מַלְבּוּשׁ Garment	נֶזֶם Ring
בֶּגֶד Garment	כּוֹבַע Helmet	עָנָק Necklace
שִׂמְלָה Mantle	מִצְנֶפֶת Turban	חוּט Thread
מְעִיל Upper garment	צָעִיף Veil	מִדָּה Measure
כְּתֹנֶת Tunic	חֲגוֹרָה Girdle	אַמָּה Cubit
אֵפוֹד Ephod	טַבַּעַת Signet	

XLVII. Names of Musical Instruments.

כִּנּוֹר Harp, lyre	שׁוֹפָר Trumpet, crook'd	שָׁלִישׁ Triangle
נֵבֶל Lyre, harp	חֲצֹצְרָה Trumpet, str'ght	קַרְנָס Harp, lyre
נֵבֶל Ten-stringed lyre	תֹּף Timbrel	מַשְׁרוֹקִי Pipe, flute
חָלִיל Flute, pipe	צֶלְצָלִים Cymbals	כַּבָּא Sambuca, Sacbut
עוּגָב Pipe, flute	מְצִלְתַּיִם Cymbals	פְּסַנְטֵרִין Psaltery, lyre
קֶרֶן Horn	מְנַעֲנְעִים Cymbals	סוּמְפֹנְיָה Bagpipe

XLVIII. Nouns designating Positions, Occupations, &c.

מוֹשֵׁל Ruler	שׁוֹטֵר Officer	מוֹרֶה Teacher
שַׁלִּיט Ruler	שָׁלִישׁ Captain, third man	רַגְלִי Foot-soldier
מֶלֶךְ King	שׁוֹפֵט Judge	פָּרָשׁ Horseman
יוֹעֵץ Counsellor	בּוֹנֶה Builder	רוֹפֵא Physician
שַׂר Prince, chief	סֹחֵר Merchant	אוֹרֵג Weaver
סָגָן Governor	רוֹכֵל Trader	חָרָשׁ Smith, engraver
נָגִיד Prince	כֹּהֵן Priest	כּוֹרֵם Vine dresser
פָּקִיד Overseer	סוֹפֵר Scribe	צוֹרֵף Smelter

XLIX. A List of the most common adjectives.

טוֹב Good	עָתִיד Ready, skilful	רָחָב Broad
רַע Evil	חוֹנֵן Compassionate	בָּרִיא Fed, fat
רָשָׁע Wicked	מְרַחֵם Merciful	שָׁמֵן Fat
גָּדוֹל Great	גֵּאֶה Proud	רָזֶה Lean
קָטוֹן Small	זֵד Insolent	גִּבּוֹר Mighty
חָזָק Strong	עָנָו Humble	אַמִּיץ Strong
רָפֶה Week, feeble	מָלֵא Full	חַלִּישׁ Feeble
לָבָן White	רֵיק Empty	קַל Light
שָׁחֹר Black	רַךְ Tender	יָחִיד Only, one
אָדוֹם Red	חוֹלֶה Sick	רִאשׁוֹן First
צָהֹב Golden, yellow	עִוֵּר Blind	אַחֲרוֹן Latter
תְּכֵלֶת Violet	חֵרֵשׁ Deaf	אַחֵר Next
אַרְגָּמָן Purple	אִלֵּם Dumb	יָפֶה Beautiful
שָׁנִי Scarlet	פִּסֵּחַ Lame	עָנֹג Delicate
תּוֹלָע Crimson	כֵּהֶה Weak, feeble	נָקִי Innocent
שֵׁשׁ Vermilion	חָרוּץ Industrious	אָשֵׁם Guilty
חָכָם Wise	עָצֵל Lazy	עָרוֹם Naked
בַּעַר Stupid	נָדִיב Willing	נֶחְמָד Desirable
נָבָל Foolish	נוֹרָא Terrible	חָפֵץ Loving
צַדִּיק Righteous	יָרֵא Afraid	שָׂמֵחַ Joyful
חָסִיד Pious	עָשִׁיר Rich	יָקָר Precious
קָדוֹשׁ Holy	רָשׁ Poor	אֵיתָן Enduring
חָלִיל Profane	עָנִי Afflicted	יָבֵשׁ Dry
יָשָׁר Straight, right	אֶבְיוֹן Needy	חָרֵב Sterile
תָּם Sincere, perfect	דַּל Poor, weak	
תָּמִים Perfect, without blemish	גָּבֹהַּ High	
	עָמֹק Deep	
שָׁלֵם Whole, complete	קוֹמָה High	
כָּלִיל Entire	אָרוֹךְ Long	

PART FIFTH.

LISTS L—LIII.

PREPOSITIONS, ADVERBS, CONJUNCTIONS AND INTERJECTIONS.

L. Prepositions, and Prepositional Phrases.

1. Denoting Place.

אֶל	Unto	אֵלַי
לְ	To	
עַד	To	עַד לְמִן, עַד מִן, עַד לְ, עַד אֶל
לִפְנֵי	Before	עַל־פְּנֵי, אֶל־פְּנֵי, בִּפְנֵי
פְּנוֹת	Towards	לִפְנוֹת
נֶגֶד	Opposite / Before	נֶגְדָּה ל, מִנֶּגֶד לְ, מִנֶּגֶד, כְּנֶגֶד, לְנֶגֶד
קִדְמַת	Before	
נֹכַח	Before	עַד־נֹכַח, אֶל־נֹכַח, לְנֹכַח, נֹכַח
לְעֻמַּת	Near, opposite	לְעֻמּוֹת, מִלְּעֻמַּת
מוּל	Towards	מִמּוּל, אֶל־מוּל
לִקְרַאת	Towards	
אֵצֶל	By the side of	
בְּ	In	בְּמוֹ
בֵּין	Between	בְּבֵין, אֶל־בֵּין and עַל־בֵּין (till between), כְּבֵין (from between), מִבֵּינוֹת לְ, בֵּינוֹת
בְּעַד	(1) Between, through; (2) behind, after; (3) about

PREFACE TO THE NEW EDITION

The *Method and Manual* of the late President William Rainey Harper first appeared as *A Hebrew Manual* in 1883. Since the 2nd edition in 1885, several reprints have been made, but the text of that edition has stood practically without change. The Inductive approach to the study of Hebrew represented by the Harper text-books has commended itself to a wide circle of teachers and has yielded satisfactory results in arousing and maintaining the interest of large numbers of students. The fact that since its first presentation more American students have studied Hebrew by this method than by all other methods combined, and that notwithstanding the need of revision in the text-books, the method has held its own in a field where competition is keen, warrants the effort to bring the *Method and Manual* into line with advancing knowledge. The scope of the revision has been determined by the New Edition of the *Elements of Hebrew* (1921) with which the *Method and Manual* should be used.

The student mind is confronted by an ever-increasing variety of subjects, each with its own special appeal and many of them offering an apparently short and easy route to a desired goal. It is inevitable that Hebrew should suffer some loss of adherents; and it is well that such as have no special aptitude for linguistic study should expend their energies in fields that are for them more productive. But as long as the Old Testament remains one of the great historical documents of the Jewish and Christian faiths, there will ever be many who will seek to obtain a scholar's control of the literary sources of their historic beliefs. As the prologue to the Wisdom of Sirach says, "When things spoken in Hebrew are translated into another tongue they have not quite the same meaning; and not only these things (i. e. the following chapters), but the Law itself and the

Prophecies and the rest of the books, convey a different meaning when spoken in their original [language]." All who would enter into the inner sanctuary of the Hebrew spirit must first equip themselves with the linguistic key. The chambers to which it furnishes access are spacious and splendid to a degree that can never be appreciated by one who has not seen them. The Hebrew mind must remain largely *terra incognita* to him who does not know its native language. That the first steps in the learning of that language may be made simple and may represent actual progress in the mastery of the Old Testament in its own idiom is sufficient reason for sending out the Harper *Method and Manual* in a new edition.

To my colleague Professor Ira Maurice Price who guided me in my first journey through the *Introductory Hebrew Method and Manual,* and has aided in the making of this edition by reading both copy and proof, I gratefully acknowledge my indebtedness. To teachers long familiar with this book in its old form, I offer no apologies for changes. Every true teacher rejoices in the progress of knowledge, even when that progress is at his cost. New editions teach new duties. The best teachers are always themselves eager learners.

J. M. POWIS SMITH

THE UNIVERSITY OF CHICAGO

PREFACE TO THE SECOND EDITION

The student of a language must acquire three things: (1) a working vocabulary of the language, (2) a knowledge of the grammatical principles of the language, (3) an ability to use this vocabulary and to apply these principles, so as to gain the best results, whether for a literary or an exegetical purpose.

While all agree as to the end desired, the method of attaining this end is a question in dispute. According to one view, the student is first to learn the principles as they are laid down in the grammars, and then apply them to selected words, or short sentences. And after a short preliminary training of this sort, he is plunged headlong into a text without notes of any kind, and expected to make progress, and to enjoy the study. His vocabulary is to be learned by looking up the words in the Lexicon, until they become familiar. Different phases of this method are in use among teachers of Hebrew; but all follow practically the same order, (1) study of grammar, (2) application of grammar.

It is the purpose of this volume to furnish a text-book, which shall assist in acquiring the Hebrew language by a different method. The method employed may be called an inductive one. The order of work which it advocates is, *first*, to gain an accurate and thorough knowledge of some of the "facts" of the language; *secondly*, to learn from these facts the principles which they illustrate, and by which they are regulated; *thirdly*, to apply these principles in the further progress of the work. A few words of explanation are needed at this point:—

(1) The method is *an* inductive, not *the* inductive method; and while, upon the whole, it is rigidly employed throughout the course, a slight departure is made at times, in order to make more complete the treatment of a subject, for some detail of which an example has not occurred.

(2) The term "facts," as used, includes data from whatever source gathered; not merely the grammatical forms found in the passages studied, but also the paradigms which contain these and other forms systematically arranged.

(3) It is not to be supposed that a long time must elapse before

the beginner is ready to take hold of principles. On the contrary, he is taught important principles, and that, too, inductively, during the first hour's work. The three processes are all the while going on together. He is increasing the store of "facts" at his command, and, at the same time, learning from the facts thus acquired new principles, and applying these principles to the new forms continually coming to his notice. Great care must be exercised, however, that the correct order be followed. Let him attempt to learn no principle of which he has not had several illustrations. Let him be required to apply no principle the application of which he has not already learned from familiar cases.

(4) The memorizing of the "facts" of a language, before a knowledge of the principles has been acquired is, indeed, a piece of drudgery; yet not so great as is the memorizing of grammar without a knowledge of the "facts." Nor will it long remain drudgery; for very soon, the student will begin to see analogies, to compare this word with that, and, in short, to make his own grammar. From this time, there will be developed such an interest in the work, that all thought of drudgery will pass away.

The question is frequently asked, How is the first lesson given? A brief statement must suffice:—

The first word of Genesis I. 1 is written on the board, and the English equivalent of each consonant and vowel-sound indicated to the student. The word, as a whole, is then pronounced, and its meaning given. The student is called upon to pronounce it, and to give its meaning. The second word is taken up and treated in the same manner. Then the two words are pronounced together, and their meaning given. After this, each remaining word is considered, and with each new word a review of all the preceding words is made. When he has learned thus to pronounce the entire verse, and to give a Hebrew word when its English equivalent is named, the student is shown the "Notes" on pages 13, 14 of the "METHOD," where, for his private study, he will find, for substance, the aid already given orally. His attention is also directed to the "Observations," with most of which he has been made familiar by the previous work. He is now informed that at the following recitation he will be expected (1) to pronounce the verse without hesitation from the pointed Hebrew (2) to pronounce it, and write it on the board, from the English translation; (3) to pronounce it, and write it on the board from the unpointed text; (4) to write the transliteration of it, as given in the "Notes" or in the *Manual*. The absolute mastery of the verse is, therefore, the first thing. There will remain to be taken up, (1) the "Notes," for all of which the student is held responsible; (2) the "Observations," which he is expected to recall, at the suggestion of the word on which the observation is based; (3) the "Word-Lesson,"

which, at first, includes few words not contained in the verse or verses of the Lesson, and which is to be learned in such a manner that when the English word is pronounced, the Hebrew equivalent will be given; (4) the "Exercises," which are to be written on paper beforehand, copied on the board in the class-room, criticised by instructor and class, and corrected by each student on his paper.

The "Topics for Study" are intended to furnish a resumé of the more important points touched upon in the Lesson. By their use, a rapid and helpful review of the hour's work is accomplished.

In subsequent "Lessons," a "Grammar-Lesson" is assigned. In every case, however, the instructor should read and explain each reference to the class before asking them to prepare it.

The "Lessons" cover chapters I-VIII. of Genesis, and include a formal study of almost every important portion of the grammar, except the Accents, the Euphony of Vowels, the Euphony of Consonants, the Verb with Suffixes, the Irregular Nouns, and the Inflection of Feminine Nouns, to all of which, however, numerous allusions and references are made in the "Notes."

All the help possible is given the student in the first fifteen "Lessons." But from this point he is led gradually to rely more and more upon himself. The "Lessons" will be found to contain more, perhaps, than some classes can prepare for a single recitation, although this will depend largely upon the character of the class and the number of recitations during a week. It was deemed best, however, to make them thus, since it is an easy matter for the instructor to indicate that a certain portion of the exercises may be omitted. The author himself will feel inclined to require everything in the "Lessons."

Special attention is invited to the "Review-Lessons," in the study of each of which two or more recitations may profitably be spent.

The "Method" is understood to include also the "MANUAL," although the latter, for a sufficient reason, is paged separately, and given a title-page and preface of its own.

For the material contained in these Lessons, and for its arrangement, the author is indebted to no one. The book, as it now appears, presents the results of five years' experience, during which it has been his privilege to teach not less than five hundred men their first lesson in Hebrew.

Many valuable hints have been received from Mr. Frederick J. Gurney, by whom great assistance has been received in the work of the Correspondence School of Hebrew. He has also kindly helped in the preparation of manuscript for the printer, and in revising the proof-sheets. For similar service the author is in-

debted to Mr. C. E. Crandall, and to Rev. John W. Payne. To the latter credit is also due for his painstaking care in the typographical work of the book.

With a faith in the Inductive Method, which grows stronger every year, and with the hope that the time may soon come when many others shall have an equally strong faith in it, the author commits the "METHOD" to its friends.

W. R. H.

MORGAN PARK, September 1, 1885.

INTRODUCTORY HEBREW METHOD

LESSON I.—GENESIS I. 1.[1]

[*To the student*:—Let it be understood from the outset that nothing short of complete mastery, and that, of everything in the Lesson, will accomplish the end in view. Not a needless word or statement has been inserted. Let it be a matter of principle to do just what is assigned,—no more, no less.]

1. *NOTES*

1. בְּרֵאשִׁית—b^{e}rē'-šîθ (two syllables)—*In-beginning:*

a. Six letters:—בּ (b); ר (r); א, called 'ālĕf,[2] not pronounced, but represented by ' ; שׁ (š = *sh*); י (y), here silent after ֵ; ת (θ = th, as in *thin*).

b. Three vowel-sounds:— ֱ (ᵉ) under בּ, pron. like *e* in *below*, see § 5. 6. *a*;[3] ֵ (ē), like *ey* in *they*; ִי (î), like *i* in *machine*.

2. בָּרָא—bå-rā' (two syllables)—(he)-*created:*

a. Three letters:— בּ (b); ר (r); א (') called 'ālĕf,[2] see 1 *a*.[4]

b. Two vowel-sounds:—Both ָ (å), like *a* in *all*.

3. אֱלֹהִים—'ĕlô-hîm (two syllables)— *God* (literally *Gods*):

a. Five letters:—א ('); ל (l); ה (h); י (y), silent after ֵ; ם (m).

b. Three-vowel-sounds:—ֹ (ᵒ), like *e* in *met*, quickly uttered, § 5. 6. *c*; ֹ (ô), like *ô* in note; ִי (î), see 1. *b*.

c. The accent ֑ with ֵ, marks this word as the middle of the verse.

4. אֵת—'ēθ—not translated, but represented in translation by)(.

5. הַשָּׁמַיִם—hăš-šå-mă'-yîm (four syllables)—*the-heavens:*

a. Five letters:—ה (h); שׁ (š = *sh*), but שּׁ (with a dot in its bosom) is š doubled; מ (m), written so at beginning or in the middle of a word; י (y), not silent as before but like *y* in *year*; ם (m), written so at end of a word, § 3. 2.

---

[1] The text of Gen. 1:1 will be found on page—; the transliteration, on page—: the transiation, on page—.

[2] This word is pronounced with å like a in all, law, etc.

[3] References preceded by § are to the "Elements of Hebrew," new ed. (1921).

[4] References without § mark are to preceding Notes in these Lessons.

b. Four vowel-sounds:—◌ַ (ă), like *a* in *hatter*, § 5. 1; ◌ָ, see 2 *b*; ◌ֶ (ă); ◌ִ (ĭ), like *i* in *pin*, § 5. 2

c. The sign ◌ָ under מ is used arbitrarily in these Lessons to indicate the position of the accent when as in this word, it is not on the last vowel.

d. The ĭ of the last syllable is only of secondary importance.

6. וְאֵת—w^e'ēθ (one syllable)—*and-*)(, see 4:

a. Three letters:—ו (w), like *w* in *water;* א (');ת (θ).

b. Two vowel-sounds:—◌ְ (^e), see 1. *b;* ◌ֵ (ē), see 1. *b.*

7. הָאָרֶץ—hă-'ā'-rĕṣ (three syllables)—*the-earth:*

a. Four letters:—ה (h);א (');ר (r); ץ (ṣ), a sharp hissing sound, § 2. 7.

b. Three vowel-sounds:—◌ָ (ă); ◌ָ (ā);◌ֶ (ē), like *e* in *met.*

c. The last vowel is of secondary character, as in 5 *d.*

d. The accent ◌ֽ, under א, marks this word as the end of the verse; the ׃ is equivalent to a period.

2. *OBSERVATIONS.*

1. The letters in this verse are:—(1) א, (2) ב, (3) ה, (4) ו, (5) ', (6) ל, (7) מ, (8) ם, (9) ץ, (10) ר, (11) שׁ, (12) שׂ, (13) ת.

2. The vowel sounds:—(1) ◌ָ, (2) ◌ֶ, (3) ◌ֵ, (4) ◌ְ, (5), ◌ַ, (6) ◌ִ, (7) ◌ֹ, (8) ◌ֵ, (9) ◌ֱ.

3. To be carefully distinguished in pronunciation are:—

(1) ◌ֱ (^e), ◌ְ (^e), ◌ֱ (ĕ), ◌ֵ (ē); (2) ◌ַ (ă), ◌ָ (ā); (3) ◌ִ (ĭ), ◌ִי (ī).

4. *Above* the line, a dot is ô (as in *note*); below the line, it is ĭ [(as in *pin*).

5. The Hebrew is written from right to left.

6. The plural ending of masc. nouns is ◌ִים (îm), as in אֱלֹהִים (lit., *Gods*); cf. the Hebrew words that have been Anglicized, *cherub*-im, and *seraph*-im.

7. אֵת ('ēθ), not translatable, is a sign placed before the object of a verb, when that object is both direct and *definite.*

8. The preposition *in*, בְּ, and the conjunction *and*, וְ, are never written separately, being always *prefixed to the* following *word.*

9. When it is desired to pronounce a letter *twice in succession,* that letter is written but *once,* and a dot inserted (see שׁ) in its bosom.

10. The letter of the Definite Article (*the*) is ה (h).

11. Most words are accented on the last vowel; those which are accented elsewhere mark the place of the accent in this book, by the sign ֽ.

12. Every syllable begins with a consonant. The vowel-sounds ִ and ֵ cannot alone carry a syllable.

3. *WORD-LESSON.*

(1)	אֱלֹהִים *God*	(5)	בְּ *in*	(9)	מָשַׁל[1] *he-ruled*
(2)	אָמַר[1] *he-said*	(6)	בָּרָא[1] *he-created*	(10)	רֵאשִׁית *beginning*
(3)	הָאָרֶץ *the-earth*	(7)	הַ־, הָ *the*	(11)	שָׁמַיִם *heavens*
(4)	אֵת)(	(8)	וְ *and*	(12)	שָׁמַר[1] *he-kept*

4. *EXERCISES*

1. To be translated into Hebrew:—(1) *And-beginning;* (2) *And-heavens;* (3) *He-created*)(*the-earth and-*)(*the-heavens;* (4) *God kept* (Hebrew order: *kept God*))(*the-heavens;* (5) *God* (is)[2] *in-heavens;* (6) *God ruled* (Hebrew order: *ruled God*)*;* (7) *In-beginning God said;* (8) *The* (הָ)*-beginning;* (9) *the* (הָ)*-God;* (10) *And-the-earth.*

2. To be translated into English:—(1) וְהַשָּׁמַיִם; (2) שָׁמַר וְהָרֵאשִׁית; (4) מָשַׁל אֱלֹהִים בְּשָׁמַיִם; (3) אֱלֹהִים אֵת הָאָרֶץ; (5) אָמַר הָאֱלֹהִים.

---

[1] A verb in the past tense 3d person singular masculine.

[2] Parentheses ( ) enclose words which are not to be rendered into Hebrew.

3. To be written in English letters: — (1) שָׁמַר, (2) אָמַר, (3) מָשַׁל, (4) בְּ, (5) וְ, (6) הַשָּׁמַיִם, (7) בָּרָא, (8) וְאֵת, (9) אֱלֹהִים; (10) הָאָרֶץ.

4. To be written in Hebrew letters:—(1) **lå**, (2) **lăš**, (3) **hîl**, (4) **bē**, (5) **rå**, (6) **yīm**, (7) **îm**, (8) **lᵉ**, (9) **hᵉ**, (10) **lē**.

5. *TOPICS FOR STUDY.*

(1) The sounds represented by the letter *e* as variously printed.

(2) The plural ending; the preposition *in;* the conjunction *and.*

(3) The sign אֵת; the method employed to indicate the doubling of a letter.

(4) The article; the usual place of the accent; the difference between מ and ם.

LESSON II.—GENESIS I. 2a.

1. *NOTES.*

8. וְהָאָרֶץ—wᵉhå-'ā'-rĕṣ—*and-the-earth:* see 7, preceding Lesson.

9. הָיְתָה—hā-yᵉθå(h) (two syllables)—(she) *was:*

a. 1st syllable, הָ (hā), ends in a vowel and is said to be *open*, § **26.** 1.

b. 2d syllable, יְתָה yᵉθå(h); the final ה is silent, as always at the end of a word; the ְ is not a full vowel, and goes with what follows.

c. The sign ֒ with ֔ indicates a secondary accent, § **18.**

10. תֹהוּ—θō'-hû (two syllables)—(a)-*desolation:*

a. 1st syl., תֹ (θ), ◌ֹ ō, (not ô), ends in a vowel i. e. is *open* § **26.** 1.

b. 2d syl., הּ (h), וּ (û), like *oo* in *tool*, is open, § **26.** 1.

11. וָבֹהוּ—wå-vō'hû (three syllables)—*and-*(a)-*waste:*

a. ב is not *b* (בּ), but *v* as in *vote.*

b. Each syllable is open, § **26.** 1.

12. וְחֹשֶׁךְ—wᵉḥō′-šĕx (two syllables)—*and-darkness:*

a. ו (w); ח (ḥ), a harsh *h*-sound, § **2.** 3; שׁ (š = *sh*); ך (x), like German ch (weak).

b. ֱ (ᵉ); the ֹ over שׁ serves also for the vowel ō; ֶ (ĕ).

c. The ֱ in ךָ must be written, when final, but it has no sound.

d. The final vowel here is of secondary character; see 5.*d* and 7.*c*.

13. עַל־פְּנֵי—ʻăl+pᵉnê (two syllables)—*upon+faces-of:*

a. ע (ʻ), practically unpronounceable for us, called ʻă′-yĭn, § **2.** 2; ל (l); פ (p); נ (n).

b. The י after ֵ (ê) is silent, as was that after ִ (î), see **1.** *b*.

c. The sign ־ is the Hebrew hyphen, represented in transliteration by +.

d. These two words, *upon* and *faces-of*, are pronounced as if one.

14. תְּהוֹם—θᵉhôm (one syllable)—*abyss:*

a. A syllable beginning with two consonants, but between them is the short *e*-sound described in § **5.** 6.*a*.

b. The syllable ends in a consonant,—it is *closed*, § **26.** 2.

c. As י is silent after ֵ or ִ, so ו is silent under ֹ (ô).

d. ֗, see 3.*c*, preceding Lesson.

2. *LETTERS AND VOWELS PROMISCUOUSLY ARRANGED.*

י	ה	ב	ח	ֶ	ֵ	ַ
ה	ך	ם	נ	ֵ	ֶ	ֵי
ב	נ	א	י	ִ	ִי	ֶ
ע	ר	ץ	פ	ֶ	ֵ	ֵ
ש	ת	ו	ב	ִ	וֹ	ַ
ל	פ	מ	ה	וּ	ֵ	ֶ

Suggestion.—Study this table until every sign has been mastered. It contains sixteen out of the twenty-two letters, and eleven out of the fifteen vowel-signs in Hebrew.

3. *OBSERVATIONS.*

13. New letters: (1) בּ, (2) ח, (3) ך, (4) ע, (5) פּ, (6) נ.

14. New vowels: (1) ֵ, (2) ֵי, (3) ֹ; but ֵי and ֹ (ê and ô) are pronounced just like ֵ and ֹ (ē and ō), the former having what is termed a *fuller* writing.

15. ְ, called Š°wâ, is the least vowel-sound and cannot carry a syllable.

16. While the conjunction *and* (וְ) is usually written with Š°wâ (thus: וְ), it is once written in this lesson וָ (wâ).

17. Syllables ending in a vowel are called *open;* ending in a consonant, they are called *closed.*

18. Observe the difference between בּ (b) and ב (v); ח (ḥ) and ה (h); א (') and ע (‘); וּ (w) and (û).

19. Observe that ֵי is silent after ֵ or ֵ; וֹ, under ֹ or with a dot in it (וּ); ךָ, at the end of a word.

20. The Hebrew verbal inflection distinguishes *gender.*

21. While most Hebrew words are accented on the last vowel, see Obs. 11, *four* words in this Lesson, out of *seven,* have the accent elsewhere, as shown by the position of the sign ֵ.

22. The Hebrew says: *faces-of abyss,* not *faces of-abyss;* that is, the *first* of two words in the genitive relation suffers change; this order is never changed.

4. *GRAMMAR-LESSON.*

Learn in the "Elements of Hebrew" the following sections:—

1. § 2. 1—3,6,8,	The pronunciation of א, ה, ע, ח, שׁ, וּ.
2. § 3. 1,	Order of writing; extended letters.
3. § 9. 1, and § 5. 6.*a*,	Š°wâ, its representation and pronunciation.

4. § 26. 1, 2, Open and Closed Syllables.

5. § 49. 1, The ordinary writing of the conjunction *and* (וְ).

5. *WORD-LESSON.*

(13)	בָּהוּ *waste*	(16)	חֹשֶׁךְ *darkness*	(19)	פָּנִים *faces*
(14)	הָיָה *he-was*	(17)	עַל *upon*	(20)	תֹּהוּ *desolation*
(15)	הָיְתָה *she-was*	(18)	פְּנֵי *faces-of*	(21)	תְּהוֹם *abyss*

Note.—The word for *waste*, when it stands by itself, is בֹּהוּ (bō′-hû), not בָּהוּ (vō′-hû); so we say תֹּהוּ (tō′-hû) *desolation*. not תָּהוּ (θō′-hû), and תְּהוֹם not תְּהוֹם.

6. EXERCISES.

1. To be translated into Hebrew:—(1) *In-beginning was* (f.) *the-earth;* (2) *Darkness was upon+the-earth; Desolation* (3) (תֹּהוּ, not תָּהוּ) *was* (m.) *upon+faces-of the-heavens;* (4) *Faces;* (5) *Faces-of abyss;* (6) *God ruled in-(= over)-darkness;* (7) *God-of* (אֱלֹהֵי) *the-heavens;* (8) *God was in-beginning;* (9) *He-created*)(*the-earth and-*)(*the-heavens;* (10) *The-earth was* (f.).

2. To be translated into English:—

(1) חֹשֶׁךְ הָיָה עַל־פְּנֵי הָאָרֶץ וְעַל־פְּנֵי הַשָּׁמַיִם

(2) הָיְתָה הָאָרֶץ בְּחֹשֶׁךְ וְחֹשֶׁךְ הָיָה עַל־פְּנֵי תְהוֹם

3. To be written in English letters:—(1) פָּנִים, (2) הָיָה, (3) אֱלֹהֵי, (4) הָיְתָה, (5) תְּהוֹם, (6) תְּהוֹם, (7) תֹּהוּ, (8) תֹּהוּ, (9) בֹּהוּ, (10) בֹּהוּ.

4. To be written in Hebrew letters:—(1) hâ, (2) hû, (3) hă, (4) hō, (5) hî, (6) ḥō, (7) ḥâ, (8) nîm, (9) ʿăl, (10) šĕx, (11) pâ, (12) šâ.

7. *TOPICS FOR STUDY.*

(1) Two ways of writing *and*. (2) The circumstances under which ◌ְ and וְ are silent. (3) New letters and vowels. (4) Open and closed syllables. (5) The sign ◌ֱ; its representation and pronunciation. (6) Extended letters. (7) Words in the genitive relation.

LESSON III.—GENESIS I. 2b, 3.

1. *NOTES.*

15. וְרוּחַ—wᵉrû(ă)ḥ (one syllable)—*and-spirit-of:*

a. Three consonants:—וְ (w), ר (r), ח (ḥ) the harsh *h*-sound.

b. The conjunction *and* (וְ) written with Šᵉwā, §**49.** 1; וּ = û, as *oo* in *fool;* the ◌ֱ (ă) to be pronounced *before* the ח, and not after it.

c. This word is treated as having but one syllable, the ◌ְ and ă not counting as full vowels.

d. The ◌ֱ is slipped in between the û and the ḥ in order to form a transition sound between these two sounds of such different physiological formation.

16. מְרַחֶפֶת—mᵉră(ḥ)-ḥĕ′-fĕθ (three syllables)—*brooding:*

a. פ = *f*, while פּ is *p;* cf. ב = *v* and בּ *b*, § **12.** 1. N. 1.

b. The final unaccented vowel is of secondary origin, cf. 5.*d*, 7.*c*, and 12.*d*.

c. מְ indicates that the form is a participle; ת, that it is feminine.

17. הַמָּיִם—hăm-mâ′-yĭm (three syllables)—*the-waters:*

a. מ = m, מּ = mm: a point in a letter preceded by a full vowel indicates doubling, and is called Dåğēš-fŏrtē, § **13.** 1, cf שׁ (5. *a*).

b. The ◌ְ here precedes ◌ֲ and so is sounded (as *y* in *year*).

c. The article *the* is ה, with ◌ֲ under it and Dåğēš-fŏrtē in the following consonant; cf. הַשָּׁמַיִם (5), § **45.** 1.

d. The ĭ is an unaccented secondary vowel; cf. 5.*d*, 7.*c*, 12.*d*, and 16.*b*.

c. The accent ֊ indicates the end of the verse; ׃ always follows this accent.

18. וַיֹּאמֶר—wăy-yô''-mĕr—(three syllables)—*and*-(he)-*said*, §§ **26.** 1, 2, Note 1; **13.** 1:

a. The perf. 3rd. p. masc. is אָמַר ('ă-măr) *he-said.*

b. The prefixed ֹ indicates the imperfect, יֹאמֶר

c. The conjunction (וַ-) connects this sentence with the preceding, and also makes the imperfect equivalent to a *perfect* (*and-he-said*). This seeming anomaly will be taken up later; it is sufficient here to learn that אָמַר = *he said;* וַיֹּאמֶר = *and-he-said.*

19. יְהִי־—y'hî+—*shall-be* (or *let-be*), §§ **10.** 1; **26.** 1; **17.** 1:

a. The first ְ indicates the imperfect as in יֹאמֶר.

b. The ־ being a š'wâ vowel, this word has but one syllable, § **27.** 1.

c. הָיָה *he-was; cf.* הָיְתָה (9) *she-was.*

20. אוֹר—'ôr—*light*, §§ **5.** 5; **26.** 2:

a. א has no sound, but is represented by ', § **2.** 1.

b. וֹ, with a point over it, unites with the point, as in תְּהוֹם (14).

21. וַיְהִי־—wăy-hî+—*and*-(there)-*was*, § **17.** 1:

a. The conjunction here, as in וַיֹּאמֶר (18), not merely *connects*, but *converts* the imperfect (*shall be*) into a perfect (*was*).

b. The conjunction in וַיֹּאמֶר was וַ-, but here it is וַ, the Dağēš-fōrtē having been rejected.

c. The sign (ֽ) with ־ indicates a secondary accent, cf. 9. *c*, § **18.** 1.

d. ְ forms a diphthong with preceding ă; cf. § **10.** 2 *a.*

2. *WORDS ARRANGED PROMISCUOUSLY FOR EXAMINATION.*[1]

מַיִם	אֱלֹהִים	בְּהוּ	תְּהוֹם	וַיְהִי־	הָיְתָה
הַמַּיִם	הַשָּׁמַיִם	רוּחַ	אוֹר	בָּרָא	יֹאמֶר
	מְרַחֶפֶת	פְּנֵי	תְּהוֹ	עַל	וַיֹּאמֶר
	בְּרֵאשִׁית	וְהָאָרֶץ	חֹשֶׁךְ	אֵת	יְהִי

[1] **Examine, pronounce aloud, translate, and *master* these words.**

3. *OBSERVATIONS.*

23. A sign of the feminine gender is the letter תּ.

24. פ = *p*, but ף = *f*; בּ = *b*, but ב = *v*.

25. A syllable closing with Dåǧēš-fŏrtē is called *sharpened*. All *sharpened* syllables are, of course, *closed* syllables.

26. The prefix י marks the *imperfect* (3 masc. sing.).

27. וְ connects, but וַ, a stronger form, connects and *converts*.

28. Roots have *three* letters (see אָמַר *he said*, בָּרָא *he created*), all other letters are prefixes or suffixes.

29. The laryngeals א, ה, ח, ע, ר, causing many seeming irregularities in the forms of words, deserve special attention. [vowel.

30. Dåǧēš-fŏrtē[1] is in every case immediately preceded by a

31. The vowel of *open* syllables is long, of *closed*, short; of accented syllables it may be either long or short.

32. The letter of the article is הַ; its vowel is regularly ־; it usually has D. f.[2] in the first letter of the word to which it is prefixed. But note הָ, in הָאָרֶץ.

4. *GRAMMAR-LESSON.*

Learn in the "Elements of Hebrew" the following sections:—

1. Under § 4. 1, The laryngeals א, ה, ח, ע, and ר, cf. Obs. 29.
2. § 13. 1, Dåǧēš-fŏrtē, cf. Obs. 30.
3. § 28. 1, 2, Quantity of vowels in syllables, cf. Obs. 31.
4. § 47. 1, The writing of the preposition בְּ (*in*).

5. *WORD-LESSON.*

(22) אוֹר *light* (25) וַיֹּאמֶר *and-he-said* (28) מְרַחֶפֶת *brooding*
(23) אִישׁ *man* (26) וַיְהִי־ *and-*(there)*-was* (29) רָאָה *he-saw*
(24) מַיִם *waters* (27) יְהִי *let-*(there)*-be* (30) רוּחַ *spirit*

[1] The *a* in this word is pronounced as *a* in *all*; the *e* like *ey* in *they*. The main accent is on the syllable *ǧ ē š*.

[2] D. f. = D å ǧ ē š - f ŏ r t ē.

Notes.—(1) אוֹר means *light* or *light-of;* אִישׁ, *man* or *man-of;* רוּחַ, *spirit* or *spirit-of;* (2) The word for *waters* is מַיִם, but at the *end* of the verse, where the voice rests upon the word, it is written מָיִם.

6. *EXERCISES.*

1. To be translated into Hebrew:—(1) *Darkness* (was)[1] *upon*+*the-waters, and-upon*+(the)-*faces-of the-earth;* (2) *In-beginning* (the) *spirit-of God* (was) *brooding upon the-waters;* (3) *God saw*)(*the-heavens, and-*)(*the-waters;* (4) (The)-*man-of God,* (the)-*light-of the-heavens;* (5) *And-he-said, he-said; he-was, she-was, let-*(there)-*be, and-*(there)-*was;* (6) *he-saw, he-created, he-was.*

2. To be translated into English:—(1) הַפָּנִים; (2) בְּאוֹר; (3) הָאָרֶץ; (4) הָאִישׁ, (5) הָאֱלֹהִים, (6) וְאִישׁ (7) וְרוּחַ (8) מַיִם (9) הַמַּיִם, (10) הָאוֹר, (11) וְהָאוֹר.

3. To be written in English letters:—(1) רָאָה, (2) אִישׁ, (3) יְהִי, (4) מַיִם, (5) פֶּת, (6) וְרוּחַ, (7) אוֹר, (8) וַיְהִי־.

4. To be written in Hebrew letters:—(1) šîθ, (2) rû, (3) nê, (4) yīm, (5) 'îš, (6) mᵉrā, (7) mᵉrā, (8) šāl, (9) mār, (10) hăm.

7. *TOPICS FOR STUDY.*

(1) Prep. בְּ. (2) Laryngeals. (3) Quantity of vowels in syllables. (4) Dâğēš-fŏrtē. (5) Sign of the feminine. (6) Sign of the participle. (7) Writing of the article. (8) Sign of the imperfect. (9) Root. (10) וְ and -וַ. (11) Sharpened syllable.

LESSON IV.—GENESIS 1. 4.

1. *NOTES.*

22. וַיַּרְא—wăy-yăr' (two syllables)—*and-*(he)-*saw,* cf. 18. *c,* 21. *a*:

a. The conjunction -וַ, forming, with ׳, a sharpened syllable, § **26.** Note 1.

b. The letter ׳ indicates the imperfect, יִרְא, cf. 18. *b.*

[1] Words in parentheses are not to be rendered in Hebrew.

c. Šᵉwâ under ר silent, § **11.**; א here without force, § **43.** 1. R. 1.

23. אֶת־הָאוֹר—'ĕθ+hå-'ôr (three syllables)—)(+*the-light:*

a. In v. 1 אֵת is an *accented* closed syl.; here *un*-accented, because joined by Măḳḳēf to following word, § **17.** 1. 2.; hence short ĕ appears in the unaccented syllable, § **29.** 4. *a.*

b. Article here is הָ, as in הָאָרֶץ; but cf. -הַ in הַשָּׁמַיִם, הַמָּיִם.

c. 1st syl. unaccented closed; 2d, unac. open; 3d, accented closed, § **28.** 1, 2.

d. The *o* is ô, not ō, same sound, but different value, § **7.** 4.

24. כִּי־טוֹב—kî+ṭôv (two syllables) —*that+good:*

a. Three consonants: כ (k), cf. כ (x); ט (ṭ), cf. ת; ב (v).

b. Two unchangeable vowels: ִי (î), וֹ (ô), § **30.** 2. *b.*, 6. *c.*

c. On the use of letters to indicate vowel-sounds, § **6.** 2, 3.

25. וַיַּבְדֵּל—wăy-yăv-dēl—*and-*(he)*-caused-a-division,* § **28.** 1,2:

a. ד (d) a new letter; without the dot (ד), it is ḏ (= *th* in *this*).

b. 1st and 2d syl.'s unaccented closed (*short* vowel); 3d, accented closed (*long* vowel).

c. Šᵉwâ under ב is silent.

26. בֵּין—bên—*between,* §§ **3.** 2; **5.** 3; **6.** 3; **12.** 1:

a. The letter *n* at the *end* of a word is written ן, not נ.

b. Both ê (ֵי) and ē (ֵ) are pronounced as *ey* in *they.*

c. The vowel here is unchangeable (ê), not changeable (ē).

d. There is a dot in בּ, as there was in ב of בְּרֵאשִׁית

27. וּבֵין—û-vên—*and-between,* §§ **12.** 1; **49.** 2:

a. Before the labial בּ, the word for *and* is written וּ

b. Note that *between* is *bên, and-between* is *û-vên.*

28. הַחֹשֶׁךְ—hă(ḥ)-ḥō'-šĕx—*the-darkness;* (cf. 12. *a, b, c*):

a. The article in this case is הַ; not הַ֫, nor הָ.

b. The accent falls on the vowel ō, the final ĕ being only a secondary vowel; cf. 5.*d*, 7.*c*, 12.*d*.

c. Note that הַ *appears* to be an unaccented open syllable with a short vowel. However, in the case of a strong laryngeal like ḥ a doubling is implied after the article. Cf. the same usage in 16.

2. *THE OCCURRENCE OF SPIRANTS IN GENESIS I. 1—4.*

בְּרֵאשִׁית	ב (*b*, not *v*) follows nothing; ת (θ) follows ī.
בָּרָא	ב (*b*, not *v*) follows ת of the preceding word.
אֵת	ת (θ, not *t*) follows the vowel-sound ē.
הָיְתָה	ת (θ, not *t*) follows the vowel-sound ◌ָה.
תֹהוּ וָבֹהוּ	ת (θ) follows â of preceding word; ב (*v*) follows â.
עַל־פְּנֵי	פ (*p*) follows the consonant ל.
תְּהוֹם	ת (θ) follows the vowel-sound ê of preceding word.
מְרַחֶפֶת	פ (*f* not *p*) follows ĕ; ת (θ) follows ĕ.
כִּי־טוֹב	כ (*k*, not χ) follows ר; ב (*v*) follows ô.
וַיַּבְדֵּל	ב (*v*) follows ă; ד (*d*, not ḏ) follows the consonant ב
בֵּין	ב (*b*) follows the preceding consonant ם.
וּבֵין חֹשֶׁךְ	ב (*v*) follows the vowel וּ; ך (χ) fol. ĕ.

3. *OBSERVATIONS.*

33. Six letters, called *spirants*, have two sounds: בּ *b*, ב *v*, גּ[1] *g*, ג ǧ (as in German *Tage*), דּ *d*, ד ḏ, כּ *k*, כ χ, פּ *p*, פ *f*, תּ *t*, ת θ.

34. Their smooth or hard sound, *b*, *g*, *d*, *k*, *p*, *t*, was indicated by a point called Dâǧēš-lēnē.

35. These letters receive this point whenever they do not immediately follow a vowel-sound, i. e., a vowel or vocal Šᵉwâ.

36. This lesson has two new letters: ט (ṭ), pronounced practically like תּ; and דּ (*d*).

4. *GRAMMAR-LESSON.*

Learn in the "Elements of Hebrew," the following sections:

1. § 12. 1, and Note, Spirants and Dâǧēš-lēnē.

[1] This letter is introduced here, in order to complete the list.

2. § 17. 1, 2, Mākḳēf and short vowel.
3. § 45. 1, The usual form of the Article.
4. Under § 4. 1, The letters בּ, וּ, מ, פּ,

5. *WORD-LESSON.*

(31) בֵּין *between* (34) וַיַּרְא *and-he-saw* (37) לָמַד *he-learned*
(32) וְ *and* (35) כִּי *that* (38) נָתַן *he-gave*
(33) וַיַּבְדֵּל *and-he-caused-a-division* (36) טוֹב *good* (39) שֵׁם *name*

Note.—The root of וַיַּבְדֵּל is בָּדַל *be-separate;* the root of וַיַּרְא is רָאָה *see;* שֵׁם = either *name*, or *name-of*.

6. *EXERCISES.*

1. To be translated into Hebrew:—(1) *And-saw God)(the-heavens and-)(the-earth and-)(the-waters;* (2) *The-light the-good* (= the good light); (3) *Good light* (in Heb., light good) *was upon the-earth;* (4) *In-beginning* (was) *darkness; God created light; and-he-caused-a-division between light and-between darkness;* (5) *God gave)(+the-light;* (6) *He-gave the-light the-good* (= *the good light*); (7) *Name, the-name,* (the) *name-of God;* (8) *Between the-heavens and-between the-earth;* (9) *He-learned that the-light* (was) *good* (Heb. order, *He learned the light that good*).

2. To be translated into English: —(1) הָאוֹר הַטּוֹב; (2) הַשֵּׁם הָאֱלֹהִים הַטּוֹב; (3) הַחֹשֶׁךְ וְהָאוֹר; (4) הָאֱלֹהִים הַטּוֹב; (5) בְּשֵׁם הָאֱלֹהִים; (6) נָתַן אֱלֹהִים אֶת־הַמַּיִם; (7) וַיַּרְא אֱלֹהִים אֶת־הָאָרֶץ.

3. To be written in English letters:—(1) לָמַד, (2) שֵׁם, (3) נָתַן, (5) הַטּוֹב, (5) בְּשֵׁם, (6) וַיַּבְדֵּל, (7) בֵּין, (8) וּבֵין.

4. To be written in Hebrew letters:—(1) bēn, (2) dēl, (3) bēn, (4) dēl, (5) ṭôv, (6) ḥō, (7) θō'hû, (8) 'ôr, (9) bō'hû, (10) vên, (11) ɑ̈ĕl, (12) χî.

7. *TOPICS FOR STUDY.*

(1) Three ways of writing *and*. (2) Three ways of writing *the*. (3) Mākkēf. (4) Laryngeals. (5) Labials. (6) Dāgēš-lēnē. (7) Spirants (8) Sign of feminine, of participle. (9) Open, closed, and sharpened syllables. (10) Difference between ō and ô, ē and ê. (11) -וַ. (12) Plural ending.

LESSON V.—GENESIS I. 5.

1. *NOTES.*

29. וַיִּקְרָא—wăy-yīḳ-rā'—*And-(he)-called*, § **26.** 1. 2, N. 1.:

a. On וַ, see 18. *c;* on ִ see 18. *b;* wăy, a sharpened syl.

b. ק (ḳ), a new consonant pronounced practically like כ (k), § 2. 4.

c. The ֣ under ק is silent, § **11.** 1.

d. יִקְרָא *he-will-call;* קָרָא *he-called*, cf. בָּרָא *he-created.*

30. לָאוֹר—lå-'ôr—*to-the-light*, § **28.** 1, 2:

a. ל the preposition *to*, with ֣, the vowel of article, § **47.** 4.

b. וֹ is ô, not ō.

c. *Light* = אוֹר ; *the-light* = הָאוֹר ; *to-the-light* = (not לָהָאוֹר) לָאוֹר, ה of the article being dropped out, § **45.** R. 3.

31. יוֹם—yôm—*day;* ô not ō.

32. וְלַחֹשֶׁךְ—w°lă(ḥ)-ḥô-šĕχ—*and-to-the-darkness:*

a. Four words: (1) וְ *and*, (2) ל *to*, (3) ה *the*, (4) חֹשֶׁךְ *darkness.*

b. ה of article elided and its vowel (ă) given to ל, § **45.** R. 3.

c. First syl. (w°lă(ḥ)) is unaccented and apparently open, but with a *short* vowel, contrary to § **28.** 1. The fact is D. f. is understood in ח, which, being a *laryngeal*, cannot receive it, § **14.** 3. N. 1.

33. קָרָא—ḳå-rā'—*he-called*, § **55.** 1. 2:

a. This is the simple stem or root of the verb.

b. א, as always at the end of a word, is quiescent, § **43.** 1, **a.**

c. This word would regularly be accented on the ultima. It is

קָרָא here because of the acc. syl. לָ immediately following.

34. לַיְלָה—lā'-yᵉlā(h)—*night*, § **24.** 2, and N. 1:

a. ה is not a consonant, but used merely to represent the prec. ָ, § **6.** 1.

b. י and its šᵉwâ belong to the second syl.; the ַ is *initial*, § **10.** 1

c. Both ַ's are *tone*-long (å), not naturally long (â).

35. וַיְהִי־עֶרֶב—wăy-hĭ 'é-rĕv—*and*-(there)-*was*+*evening:*

a. The first syl. (wăy) is unaccented and ends with a diphthong; there should be a D. f. in י, but it has been lost, § **26.** 2. and N. 2; § **28.** 4; § **14.** 2.

b. The vertical line with ֶ is called Méθĕğ; it is a secondary accent written upon the second syl. before the principal accent, § **18.** 1.

c. The ֶ under ע though short is accented, and the final ĕ is secondary.

36. וַיְהִי־בֹקֶר—wăy-hî+vṓ-ḳĕr—*and*-(there)-*was*+*morning:*

a. On the syl. *wăy* and on Méθĕğ see 35. *a*, *b*.

b. On the connective Măḳḳēf represented by +, § **17.** 1.

c. The ֹ is ō (tone-long), not ô (naturally long), § **31.** 3. *b*.

d. The final ĕ is secondary.

37. אֶחָד—'ĕ(ḥ)-ḥåđ—*one:*

a. The ֶ is short ĕ, d. f. being understood in ח; cf. 32 *c*.

b. The ד is đ, like *th* in *the*, not d, which would be דּ.

2. *TABLE OF WORDS CONTAINING LONG VOWELS.*

1. Words with tone-long å: בָּרָא, לַיְלָה, קָרָא, יִקְרָא, etc.
2. Words with tone-long ē: אֵת, יַבְדֵּל.
3. Words with naturally long ê: פְּנֵי, בֵּין.
4. Words with tone-long ō: חֹשֶׁךְ, בֹּקֶר, בֹּהוּ, תֹּהוּ.

5. Words with naturally long ô: אוֹר, טוֹב, יוֹם.

R. The *o* of וַיֹּאמֶר and of אֱלֹהִים is ô, not ō, although not written וֹ.

3. *OBSERVATIONS.*

37. Tone-long vowels are vowels which are long because of their proximity to the tone; i. e., being originally short, they have become long through the influence of the accent.

38. Naturally long vowels are vowels which are long, generally, because of the contraction of two distinct elements, e. g., *ă*+*w* = ô, or *ă*+*y* = ê.

39. Tone-long vowels are, generally, indicated only by the vowel-sign.

40. Naturally long vowels are generally, but not always, indicated by a vowel-sign and also by a vowel-letter, e. g., ō is ◌֑, but ô is וֹ; ē is ◌֒, but ê is ◌ֵי.

41. Tone-long vowels, if the tone changes, are liable to change; but naturally long vowels are unchangeable.

42. The short accented ĕ, which always comes from ă, is especially worthy of note.

4. *GRAMMAR-LESSON.*

1. § **8.**	The names of the vowels.
2. §§ **45.** R. 3; **47.** 4.	The article after a preposition.
3. § **55.** 1, 2,	The root of a verb.
5. § **58.** 1.	The simple verb-stem; its name.
5. § **30.** (opening words), also Notes 1 and 2 under § **30.** 7,	The naturally long-vowels,—(1) their origin, (2) their writing, (3) their character.
6. § **31.** (opening words), also Note 1 under 3.	The tone-long vowels, (1) their origin, (2) their number, (3) their writing, (4) their character.

5. *WORD-LESSON.*

(40) אֶחָד *one* (43) וַיִּקְרָא *and-he-called* (46) עֶרֶב *evening*

(41) בֹּקֶר *morning* (44) יָשַׁב *he-sat, dwelt* (47) קוֹל *voice*

(42) יוֹם *day* (45) לַיְלָה *night* (48) קָרָא *he-called*

Note.—The word for *night* is לַיְלָה, but in the middle of the verse it is written and pronounced לֵילָה.

6. *EXERCISES.*

1. To be translated into Hebrew:—(1) *To-*(the)*-beginning-of the-day God called morning; to-*(the)*-beginning-of the-night God called evening;* (2) *In-day one God created)(the-light;* (3) *God created)(the-light and-he-called to-the-light day;* (4) *The good day* (Heb., *the-day the-good*); (5) (The)*-name-of the-light* (is) *day, and-*(the)*-name-of the-darkness* (is) *night;* (6) *Heavens, the-heavens, to-the-heavens, in-the-heavens;* (7) *Earth, the-earth, in-the-earth, to-the-earth, and-to-the-earth;* (8) (The)*-voice-of God;* (9) *Day and-night;* (10) *The-waters, in-the-waters.*

2. To be translated into English:—(1) בַּקּוֹל; (2) לָאוֹר; (3) לָאִישׁ; (4) בָּאָרֶץ; (5) לַשָּׁמַיִם; (6) בַּיּוֹם; (7) וְלָאוֹר; (8) בֵּין הַיּוֹם וּבֵין הַלַּיְלָה; (9) יָשַׁב אֱלֹהִים בַּשָּׁמַיִם.

3. To be written in English letters:—(1) קוֹל, (2) יָשַׁב, (3) יוֹם, (4) אֶחָד, (5) עֶרֶב, (6) אוֹר, (7) בֵּין, (8) קָרָא.

4. To be written in Hebrew letters:—(1) lām, (2) lâm, (3) lēm, (4) lôm, (5) lōm, (6) lēm, (7) lêm, (8) yĭḳ, (9) bên, (10) rĕv, (11) y'lâ.

7. *TOPICS FOR STUDY.*

(1) Root. (2) Simple verb-stem. (3) Names of vowel-signs. (4) Article after a preposition. (5) Naturally long vowels. (6) Tone-long vowels. (7) Laryngeals and labials. (8) Dâğĕš-lēnē.

LESSON VI.—GENESIS I. 6.

1. *NOTES.*

38. וַיֹּאמֶר—wăy-yṓ'-mĕr—*and-*(he)*-said* (see N. 18):

a. Syllables: (1) sharpened, (2) open, (3) closed.

b. Vowels: (1) Păθăḥ, (2) Ḥôlĕm, (3) Sᵉgôl.

c. א, though a letter, has here no consonantal force; hence it has no Šᵉwâ under it; it is quiescent, § **11.** R.

39. אֱלֹהִים—'ᵉlô-hîm—*God* (see N. 3):

a. Only two syllables: (1) open, (2) closed.

b. Vowels: (1) Ḥôlĕm; (2) Ḥîrĕḳ; Ḥâṭēf-Sᵉgôl (ֱ), though a vowel-sound, is not a full vowel.

c. While ֲ is *simple* Šᵉwâ, ֳ is a *compound* Šᵉwâ, § **9.** 1, 2.

d. Šᵉwâs do not form syllables, § **27.** 1.

40. רָקִיעַ—rā-ḳî(ă)'—*expanse;* cf. רוּחַ *spirit* (15):

a. Syl's: (1) open, (2) closed; vowels: (1) Ḳāmĕṣ, (2) Ḥîrĕḳ.

b. The ֲ under ע is *not treated as a vowel;* it is called Păθăḥ-*furtive*, because in pronunciation it *steals* in before its consonant, cf. רוּחַ = rû(ă)ḥ, not rû-ḥă. Though pronounced, it is merely a transition-sound from the labial *û* to the laryngeal consonant ', and is inserted for euphony, §§ **27.** 1; **42.** 2. *d.*

41. בְּתוֹךְ—bᵉθôx—*in-midst-of*, §§ **12.** 1; **11.** 2. *a*:

a. בְּ has Dâḡēš-lēnē but תּ has none.

b. The full vowel וֹ (= ô), is unchangeable.

c. This word means *in-midst-of*, not *in-midst.*

42. הַמָּיִם—hăm-mâ'-yîm—*the-waters*, §§ **13.** 1; **26.** 1. 2. N. 1. **45.** 1:

a. The ִ being unaccented and in a closed syl. must be I, not ı, § **28.** 2.

b. Here ֗ (1) indicates that the second vowel is accented, and also (2) marks the end of the clause, § **24.** 2.

43. וְיִהִי—wî-hî—*and-let-*(it)*-be:*

a. *Let-*(it)*-be* = יְהִי; *and* = וְ; but we have וִיהִי in place of וַיְהִי, since (1) when two šᵉwâs would stand together at the beginning of a word, the first is represented by ־ִ; and (2) ־ִ (ĭ) under ו fol. by י (iy) = î, § **49.** 4. N. 1; cf. the very different וַיְהִי = *and-*(there)*-was* (21).

b. On the origin of ־ִ see § **36.** 8. *a.*

44. מַבְדִּיל—măv-dîl—*causing-a-division* or *dividing:*

a. A participle (shown by מ) from same root as וַיַּבְדֵּל (25).

b. Vowels: (1) Păθāḥ, (2) Ḥîrĕḳ; but ־ִ is silent.

c. ב (preceded by ־ִ) *without,* ד (preced. by ב) with Dâğēš lēnē.

45. מַיִם לַמָּיִם—mā′-yĭm lå-må′-yĭm—*waters to-waters:*

a. Vowel under מ in first word, ă; in second, å; because the second word is the last in the verse, and so the voice *rests* upon it and strengthens the vowel. Such a word is said to be *in pause,* § **38.** 2.

b. The prepositions sometimes take a tone-long å, instead of ־ִ, when they are directly before the accented syllable, § **47.** 5.

c. לַמָּיִם = *to-waters;* not *to-the-waters,* which would be לַמַּיִם; the stroke over מ emphasizes the absence of Dâğēš-fŏrtē, § **16.** 2.

2. *WORDS WITHOUT POINTS OR VOWEL-SIGNS. GEN. I.* 1—6

אור	ב	ה	יאמר	כי ,ל	פני ,קרא
אחד	בהו	היתה	ויבדל	לילה	ראשית
אלהים	בין	ו	יהי ,יום	מבדיל	רקיע
ארץ	בקר	חשך	יקרא	מים	שמים
את	ברא	טוב	וירא	על ,ערב	תהו

3. *OBSERVATIONS.*

43. This verse has *twenty-two* syllables,[1] of which twelve are closed, ten open; of the closed, two are *sharpened.*

44. This verse has twenty-six vowel-sounds: twenty-two full

[1] Let the student count the syllables and thus verify this statement.

vowels, three Šᵉwâs (two simple, one compound), one Păθăḥ-furtive.

45. This verse has *forty-four* letters, of which *nine* are silent; of these nine, seven are ה, one ן and one א.

46. This verse has two silent Šᵉwâs.

47. The accent ֠ ('Aθnâḥ) is written only in the *middle* of a verse.

48. The accent ׀ (Sĭllûḳ) is written only at the *end* of a verse.

4. *GRAMMAR-LESSON.*

1. § 6. 1,2, 3, and Notes 1—4, The Vowel-letters.
2. § 14. 3, and Notes 1, 2, Omission of D. f. from laryngeals.
3. § 9. 1, 2, Simple and Compound Šᵉwâ.
4. § 11. 1, 2. *a*, and Remark, Silent Šᵉwâ.

5. *WORD-LESSON.*

(49) מַבְדִּיל *dividing* (50) מַיִם *waters* (51) רָקִיעַ *expanse*

6. *EXERCISES.*

1. To be translated into Hebrew:—(1) *Between the-waters and-between the-waters;* (2) *Between the-waters to-the-waters;* (3) *Between waters to-waters;* (4) *Waters, waters* (in pause), *to-the-waters* (in pause), *to-waters* (in pause); (5) *Let-*(there)*-be, and-let-*(there)*-be, and-*(there)*-was;* (6) *Expanse and-spirit;* (7) *Expanse, the-expanse, to-the-expanse.*

2. To be translated into English:—(1) אוֹר בַּיּוֹם; (2) חֹשֶׁךְ יְהִי אוֹר וַיְהִי; (3) טוֹב הָאוֹר; (4) הַמַּיִם עַל פְּנֵי הָאָרֶץ; (5) בַּלָּיְלָה רָקִיעַ וַיְהִי מַבְדִּיל; (6) בְּרָקִיעַ, לַמַּיִם, לָמָּיִם.

3. To be written in English letters:—(1) חֹשֶׁךְ, (2) עֶרֶב, (3) יַבְדֵּל, (4) בְּתוֹךְ, (5) מַבְדִּיל, (6) רָקִיעַ.

4. To be written in Hebrew letters:—(1) 'ăl, (2) mâ'-yĭm, (3) wĭ-hî, (4) dăl, (5) dēl, (6) dêl, (7) ḥăḏ, (8) dîl.

7. *TOPICS FOR STUDY.*

(1) Vowel-sounds rep. by ◌ִ. (2) Vowel-sounds rep. by ◌ָן. (3) D. f. rejected from laryngeals. (4) D. f. implied. (5) Compound Šᵉwâ. (6) Silent Šᵉwâ. (7) Simple verb-stem. (8) Laryngeals and labials. (9) Dâğēš-lēnē, (10) Sharpened syllables. (12) Naturally long and tone-long vowels. (13) Māḳḳēf. (14) Quantity of vowels in syllables.

LESSON VII.—GENESIS I. 7, 8.

1. *NOTES.*

46. וַיַּעַשׂ—wăy-yă-ʿăś—*and-*(he)*-made:*

a. שׂ (ś) is to be distinguished from שׁ (š), § **2.** 6.

b. The ◌ַ is the same as in וַיֹּאמֶר (18), וַיִּקְרָא (21), וַיַּרְא (22).

c. The root is עָשָׂה *he-made;* the imperfect is יַעֲשֶׂה, a shorter form is used with ◌ַ.

d. The last ă is a helping-vowel.

47. הָרָקִיעַ—hå-rå-ḳî(ă)ʿ—*the-expanse:*

a. The ◌ָ is Păθăḥ-furtive, cf. רוּחַ (rû(ă)ḥ); see 40. *b.*

b. The article is ◌ַהַ, hence *the-expanse* should be הַרָקִיעַ; but ר rejects D. f., and the preceding (short) ◌ָ now standing in an open syllable becomes ◌ָ, §§ **14.** 3; **36.** 1 *b;* **28.** 1.

c. The secondary accent is written on the second syllable before the tone, § **18.** 1.

d. The accent ◌֬ above ק and ע marks the end of a section; it is used only when the verse has *three sections*, § **24.** 3.

48. אֲשֶׁר—ʾᵃšĕr (one syllable)—*which*, §§ **9.** 2; **27.** 1:

a. The ◌ֲ is the compound Šᵉwâ of the A-class (cf. ◌ֱ, of the I-class); it is pronounced like ă, but with much less voice. It is not a full vowel, and does not form a syllable.

b. The Relative particle does not vary for gender or number, § **53.** 1. *a.*

49. מִתַּחַת—mĭt-tă-ḥăθ—*from-under* (for מִן תַּחַת), § **48.** 1:

a. The final letter (*n*) of מִן is assimilated, § **39.** 1.

b. A letter thus assimilated is represented by D. f., § **39.** N.

c. The point in ת is D. f., because it follows a vowel, § **13.** 1.

d. In this case the point is *also* Dâğēš-lēnē, since the sound doubled is *t*, not θ, § **13.** 2. N. 1.

50. לָרָקִיעַ—lâ-râ-ḳî(ă)ʿ—*to-the-expanse*, § **45.** R. 3:

a. רָקִיעַ *expanse;* הָרָקִיעַ *the-expanse;* לָרָקִיעַ *to-the-expanse;* וְלָרָקִיעַ *and-to-the-expanse.*

51. מֵעַל—mē-ʿăl—*from-upon:*

a. מִן (*from*) assimilates its final consonant, see 49. *a; but*

b. ע refuses D. f., and ֶ is lowered to ַ, § **48.** 2.

52. וַיְהִי־כֵן—wăy-hî+χēn—*and-*(it)*-was+so:*

a. ֶ with ַ is Méθĕğ, second syllable before tone, § **18.** 1.

b. ֶ with ַ Sillûḳ, marking end of verse, § **24.** 1. N.

53. שָׁמָיִם—šă-mâʾ-yĭm—*heavens*, cf. שָׁמַיִם of v. 1:

a. There is ַ under מ, instead of ַ, because *in pause*, § **38.** 2; the Aθnāḥ (ֲ) is, next to Sillûḳ (ׄ), the strongest accent.

54. שֵׁנִי—šē-nî—*second:* tone-long, ē, not ê.

2. *FORMS FOR SPECIAL STUDY.*

הָרָקִיעַ (7)	אוֹר (3)	מִן (7)	לְאוֹר (5)	רוּחַ (2)[1]
לָרָקִיעַ (7)	טוֹב (4)	מִתַּחַת (7)	לַחֹשֶׁךְ (5)	רָקִיעַ (6)
וַיְהִי־כֵן (7)	יוֹם (5)	מֵעַל (7)	לָרָקִיעַ (8)	לָרָקִיעַ (8)

3. *OBSERVATIONS.*

49. Păθăḥ-furtive, a mere transition-sound, does not form a syl.

[1] These numerals refer to the verse containing the word cited.

50. The ה of the article is elided after the preposition ל (also ב).

51. The prep. *from* is *min*, but the *n* is often assimilated and represented by D. f.; if the following letter refuses D. f., the i is heightened to ē.

52. The naturally long ô, generally וֹ, in Hebrew does not change.

53. Where a verse has two sections, the end of the *first* is marked by ׀ ; the end of the *second* by ׃. If the verse has *three* sections, the end of the *third* is marked by S'gōltå (֊). In the use of the accents, we commence at the *end* of the verse, not at the beginning.

4. *GRAMMAR-LESSON.*

1. § **45.** 2, 3, The article before strong and weak laryngeals.
2. § **106.** 1, 2. *c*, 3—5, Affixes for gender and number.
3. § **107.** (opening), 1, 2, The absolute and construct states.
4. § **24.** 1—3, The three most important accents.

5. *WORD-LESSON.*

(52)	אֲשֶׁר *who, which*	(55)	כֵּן *so*	(58)	שָׁלַח *he-sent*
(53)	וַיַּעַשׂ *and-he-made*	(56)	מִן *from*	(59)	שֵׁנִי *second*
(54)	יָם *sea*	(57)	עָשָׂה *he-made*	(60)	תַּחַת *under*

6. *EXERCISES.*

(1) To be translated into Hebrew:—*In-the-waters which God made;* (2) *God* (is) *in-the-heavens and-upon the-earth;* (3) *The-waters* (are) *in-the-sea;* (4) *The-earth* (is) *beneath* (in Heb., *from-under to*) *the-sea;* (5) (A) *second day*[1]; (6) *The-day the-second*[1] (=the second day); (7) *God sent*)(*the light and-*)(*the darkness;* (8) *From*+*the-heavens to-the-earth;* (9) *Between the-sea and-between the-earth;* (10) *And-*(it)*-was*+*so.*

[1] The adjective, when attributive, follows its noun; and, if the noun is definite, the adjective receives the article.

2. To be translated into English:—(1) מֵעַל לָאָרֶץ; (2) הָרֹאשִׁית; (3) וּבָיָם; (4) הַמַּיִם אֲשֶׁר בַּיָּם; (5) הָאוֹר הַשֵּׁנִי; (6) מִן־הָאָרֶץ; (7) לַשָּׁמַיִם; (8) בַּבֹּקֶר וּבָעֶרֶב; (9) שָׁלַח אֶת־הַמַּיִם עַל־הָאָרֶץ; עָשָׂה אֶת־הָרָקִיעַ.

3. To be written in English letters:—(1) שָׁלַח, (2) בֵּן, (3) כֵּן, (4) יָם, (5) עָשָׂה, (6) בֵּין, (7), פָּנֵי, (8) שֵׁנִי, (9) מֵעַל.

4. To be written in Hebrew letters:—(1) kēn, (2) bēn, (3) 'ôr, (4) bō-hû, (5) măḥ, (6) 'ăl, (7) 'ăl, (8) 'ăs, (9) mē, (10) bēn.

7. *TOPICS FOR STUDY.*

(1) The three important accents. (2) The article before laryngeals. (3) The preposition (לְ and בְּ) before the article. (4) The preposition *from*. (5) Assimilation. (6) The position of the attributive adjective. (7) The vowels ē and ê. (8) The vowels ō and ô. (9) Secondary accent. (10) Păθăḥ-furtive. (11) Labials. (12) D. f. in a spirant. (13) Laryngeals and D. f. (14) Sĭllûḳ and Méθĕg. (15) Măḳḳēf.

LESSON VIII.—GENESIS I. 9.

1. *NOTES.*

55. יִקָּווּ—yĭḳ-ḳâ-wû—*Let-*(or, *shall*)*-be-collected:*

a. The יִ indicates the *imperfect;* וּ is the *plural*-ending of verbs.

b. The D. f. in קּ is for an assimilated נ. which is the characteristic of a *passive* verb-stem; the â under קּ is pretonic.

56. הַמַּיִם—hăm-mâ-yĭm—*the-waters*, see 17:

a. מַ has ֲ, not ָ as in v. 2, since it is not *in pause.*

b. The article, written regularly with ă and D. f., § **45. 1.**

57. אֶל־—'ĕl+—*unto*, with which compare לְ *to.*

58. מָקוֹם—mâ-ḳôm—*place:*

a. Tone-long â, but naturally long ô; the former changeable, the latter unchangeable.

b. The root is קוּם; מ is a prefix often used in noun-formation.

59. וְתֵרָאֶה—w^e^θē-rā-'ê(h)—*and-*(she)*-shall-be-seen:*

a. Five letters, of which the root can have but *three*, § **55.** 1; וְ= *and;* ת (= *she*) is a prefix of the *imperfect*, like י, which = *he.*

b. תֵּרָאֶה should be תִּרְאֶה (with the same D. f. and å which are in יִקְוּוּ (55) above), for it is *passive;* but ר refuses D. f., and ī under ת becomes ē, as in מֵעַל (51), § **48.** 2.

c. Cf. closely the following forms:—

3 masc. sg.	יִקָּוֶה	יֵרָאֶה	*he-will-be* etc.
3 fem. sg.	תִּקָּוֶה	תֵּרָאֶה	*she-will-be* etc.
3 masc. pl.	יִקָּווּ	יֵרָאוּ	*they-will-be* etc.

d. This is the first case of ה_ֶ = *ê.*

60. הַיַּבָּשָׁה—hăy-yăb-bå-šå(h)—*the-dry* (land):

a. Four syllables,—two sharpened, two open, § **26.** 1. N. 1.

b. Point in בּ is D. f. yet also Dăğĕš-lēnē, § **13.** 2, and N. 1.

c. The final ה stands for the preceding å, just as י stands for î, or ו for ô; cf. אֱלֹהִים and יוֹם.

2. *HEBREW-ENGLISH WORD-REVIEW.**†

[1]אוֹר	[11]בֹּקֶר	[21]הָיָה	[32]מַיִם	[42]רָקִיעַ
[2]אֶחָד	[12]בָּרָא	[22]יוֹם	[33]מִן, מִ־, מֵ	[43]שָׁמַיִם
[3]אֶל	[13]הַ־, הָ	[23]עָשָׂה	[34]מָקוֹם	[44]שֵׁנִי
[4]אֱלֹהִים	[14]הָיְתָה	[24]יִקָּווּ	[35]מְרַחֶפֶת	[45]תְּהוֹם
[5]אֶרֶץ	[15]וְ, וַ, וּ	[25]יִקְרָא	[36]עַל	[46]תְּהוֹם

* Every word is accented on the last vowel, unless the sign ־ indicates that it is accented elsewhere.

† Omitting the prepositions and the relative particle (eleven words in all), those that remain in this list, together with their related grammatical forms, occur in the Bible about 27000 times. This would make about one hundred and thirty pages, or about one tenth of the entire Old Testament.

אֲשֶׁר[6]	חֹשֶׁךְ[16]	יְרָא[26]	עֶרֶב[37]	תּוֹךְ[47]

4. *WORD-LESSON.*

(61) אֶל־ *unto*

(62) יַבָּשָׁה *dry* (land)

(63) יִקָּווּ *they-shall-be-collected*

(64) מָקוֹם *place*

(65) תֵּרָאֶה *she-shall-be-seen*

5. *GRAMMAR-LESSON*

1. § **18. 1,** Mĕθĕğ, on second syllable before tone.

2. § **27.** 1, 2, 3, Syllabification.

Review.—§§ **5; 6; 9; 11.** 2. *a* and Rem.; **12.** 1; **13.** 1; **14.** 1, 2, 3;

17. 1, 2; **24.** 1—3; **26.** 1, 2; **28.** 1, 2; **30.** (opening words), 7, N. 1, 2; **31.** (opening words), 3, N. 1; **45.** 1, 2, 3. and Rem. 3; **47.** 1, 4, 5; **49.** 1, 2; **55.** 1. 2; **58.** 1, 2. and N. 1; **106.** 1, 2. *c*, 3—5; **107.** 1, 2.

Note.—The stem seen in בָּרָא, קָרָא, מָשַׁל, etc., is the simple active verb-stem, called Ḳăl, § **58.** 1; the stem seen in יִקָּוּוּ and וְתֵרָאֶה is the simple *passive*-stem, called Nĭf-ʿăl § **58.** 2.

6. *EXERCISES.*

1. To be translated into Hebrew:—(1) *In-the-place which* (is) *between heavens and-between earth;* (2) *God will-be-seen upon+ the-earth;* (3) *The-waters will-be-seen in-the-sea;* (4) *The-earth* (f.) *will-be-seen beneath* (= *from-under to*) *the-heavens;* (5) *The-waters shall-be-collected unto+place one;* (6) *In-the-waters;* (7) *God created*)(*the-dry* (land).

2. To be translated into English:—(1) יִקָּווּ הַמַּיִם עַל־הָאָרֶץ; (2) וְלַמָּקוֹם; (3) וּלְאוֹר; (4) וּבַמָּקוֹם; (5) וּמָקוֹם; (6) יֵרָאֶה הָאִישׁ; (7) יֵרָאוּ הַשָּׁמַיִם; (8) עַל, מֵעַל, וּמֵעַל.

3. To be written in English letters:—(1) עֶרֶב, (2) אֶרֶץ, (3) תֵּרָאֶה, (4) אֶחָד, (5) וּבַמָּקוֹם, (6) יִקָּוֶה.

7. *TOPICS FOR STUDY*

(1) The sign of masc. sing. future, of fem. sing. future, of masc. pl. fut. (2) The characteristic of the *passive*-stem. (3) A use of Méθĕg. (4) Final ה. (5) Use of מ in formation of nouns. (6) Various forms of ו conjunctive. (7) The words for *sea* and *day*. (8) The position of the adjective when attributive. (9) The plural affixes of nouns. (10) The feminine affixes.

LESSON IX.—GENESIS I. 10-11.

1. *NOTE-REVIEW.*

(1) וַיֹּאמֶר (18); (2) אֱלֹהִים (3); (3) הָאָרֶץ (7); (4) אֲשֶׁר (48); (5) וַיְהִי־כֵן (52); (6) וַיְהִי־עֶרֶב (35); (7) וַיְהִי־בֹקֶר (36); (8) יוֹם (31).

2. *NOTES.*

61. לַיַּבָּשָׁה—láy-yăb-bå-šå(h)—*to-the-dry* (land), § **45.** R. 3.

62. אֶרֶץ—'ĕ-rĕṣ—*earth*,—with article הָאָרֶץ, § **45.** R. 2.

a. another case of a helping-vowel; like עֶרֶב (35).

63. וְלִמְקוֵה—û-l'mîḳ-wê(h)—*and-to-collection-of:*

a. *And* is here written וְ, § **49.** 2; *to* is written, as usually, לְ.

b. The root is קָוָה, whence the passive future 3rd plural יִקָּווּ (55).

c. The מ is the prefix used in noun-formation, cf. מָקוֹם (58. *b*).

d. This noun (= *collection-of*) is in the construct state, § **107.** 2.

64. יַמִּים—yăm-mîm—*seas:*

a. The sing. is יָם from which the plural differs in that a D. f. appears in מ, and ă appears instead of å.

b. יָמִים (= yåm-mîm) would be an impossible form, § **28.** 2, 3; just as, on the other hand, מקוֹם (= mă-ḳôm) would be impossible, § **28.** 1.

65. תַּדְשֵׁא—tăd-šē'—(she)-*shall-cause-to-spring-forth:*

a. ת, as in תֵּרָאֶה (59), = *she*, being the feminine prefix.

b. The ־ under ד is silent, § **11.** 1.

c. ד, שׁ, and א are the three root-letters; דֶּשֶׁא, cf. בָּרָא, קָרָא.

d. This stem is neither the simple nor the passive verb-stem, but a *causative* stem. It generally has ־ under the preformative, i. e., under the letter which is prefixed to the root to designate person or gender; cf. יַבְדֵּל (25), which has ־ under י, and means *he-causes-a-division.*

66. דֶּשֶׁא—dĕ́-šĕ'—*grass*, cf. the preceding root דָּשָׁא (65. *c*):

a. ד (preceded by יִ) = *d*; but ד (preceded by ־) = đ.

b. This word, like אֶרֶץ, עֶרֶב, and others, has a secondary, or helping vowel.

67. עֶשֶׂב—'ĕ́-śĕv—*herb*: ב = *v*; שׂ = *ś*, not š (*sh*).

a. The secondary ĕ being only a helping vowel is not accented.

68. מַזְרִיעַ—măz-rî(ă)'—*causing-to-seed*, root זָרַע:

a. A new letter ז *z*; Păθăḥ-furtive under ע.

b. A participle, as shown by מ, cf. מַבְדִּיל, (44) מְרַחֶפֶת (16)

c. A causative form, as shown by ־ under the preformative.

69. זֶרַע—zĕ́-ră'—*seed*,—from the root זָרַע:

a. This word, like אֶרֶץ, עֶרֶב, דֶּשֶׁא and עֶשֶׂב has an unaccented helping vowel.

70. עֵץ—'ēṣ—*tree-of*; פְּרִי—p'rî—*fruit*.

71. עֹשֶׂה פְּרִי—'ô-śĕ́(h) p'rî—*making fruit*:

a. The ô, here written over the right arm of שׂ (*ś*), is naturally long.

b. The ־ה, like that in תִּרְאֶה, is *é*.

c. The point in פ is D. f., being preceded by a full vowel (*é*); it therefore joins the two words together and is called D. f. conjunctive, § **15.** 3.

d. עֹשֶׂה accented on penult because closely followed by a monosyllable, § **21.** 1.

e. עֹשֶׂה is a participle from עָשָׂה *he-made*.

72. לְמִינוֹ—l'mî-nô—*to-kind-his*:

a. The prep. לְ, the noun מִין, and the suffix וֹ (= *his*).

73. זַרְעוֹ־בוֹ—zăr-'ô+vô—*seed-his+in-him*:

a. זֶרַע *seed*, but זַרְעוֹ *his-seed*, the ־ being silent.

b. וֹ is a pronominal suffix meaning *his* or *him*.

c. בּוֹ is made up of ב the prep. *in*. and וֹ the suffix *him*.

d. It is בּוֹ (vô) not בֹּו, because of the preceding וֹ.

c. בּוֹ .... אֲשֶׁר = *which....in-him;* this is the idiom for *in which.*

3. *FORMS FOR SPECIAL STUDY.*

תַּדְשֵׁא,	in wh.	ת=*she*	and־־under ת	indic. a	*causative*	idea
מַכְדִּיל,	"	מ indic. a part.	and־־under מ	"	"	"
יַכְדִּל,	"	י=*he*	and־־under י	"	"	"
מַזְרִיעַ,	"	מ indic. a part.	and־־under מ	"	"	"

4. *OBSERVATIONS.*

54. There are in Hebrew (1) a *simple* verb-stem, (2) a *passive* verb-stem, and also (3) a *causative* verb-stem.

55. The characteristic of the passive stem is the letter נ, or a D. f. in the first radical representing נ assimilated.

56. The causative stem may be known by the ־־ which always occurs under its preformative (י, ת or מ).

57. The name of the simple stem is Ḳăl, of the passive stem, Nĭf'ăl, of the causative stem, Hĭf'îl.

58. The letter י prefixed to verbal forms means *he*, the letter ת means *she*, while מ so prefixed indicates a participle.

5. *GRAMMAR-LESSON.*

1. § **1**, The names of the Hebrew letters.
2. § **13**. 2. and N. 1, Dâğēš-fŏrtē in spirants.
3. § **57**. 1—3, Inflection.

6. *WORD-LESSON.*

(66) יַמִּים *seas*
(67) מִקְוֶה *collection*
(68) מִקְוֵה *collection-of*
(69) דֶּשֶׁא *grass*
(70) זֶרַע *seed*
(71) מִין *kind, species*
(72) עֵץ *tree*
(73) תַּדְשֵׁא (see N. 65)

7. *EXERCISES.*

1. To be translated into Hebrew:—(1) *To-the-tree making fruit* (there is) *seed* (according)-*to-its-kind;* (2) *The-seed which*+*in-it* (= in which) (is) *fruit;* (3) *The-day which*+*in-it* (is) *light;* (4) *The-earth shall-cause-to-spring-forth*)(*the-grass and-*)(*the seed;* (5) *The-fruit* (is) *in-the-seed, and-the-seed* (is) *in-the-earth.*

2. To be translated into English: — (1) הַיָּם אֲשֶׁר מַיִם בּוֹ; (2) עֵץ הַפְּרִי; (3) וַיְהִי־דֶשֶׁא; (4) הַלַּיְלָה אֲשֶׁר חֹשֶׁךְ בּוֹ; (5) זֶרַע בָּאָרֶץ.

3. To be written in English letters:—(1) תַּדְשֵׁא, (2) דָּשָׁא, (3) פְּרִי, (4) בֵּין, (5) עֵץ, (6) עֹשֶׂה.

4. To be written in Hebrew letters:—(1) zĕ́-ră', (2) dĕ́-šĕ', (3) rû(ă)ḥ, (4) χēn, (5) 'ô-śé(h), (6) tôṣē', (7) vô, (8) wăy-hî.

8. *TOPICS FOR STUDY.*

(1) The characteristic of the Nĭf'ăl stem. (2) The characteristic of the Hĭf'îl stem. (3) The origin and character of tone-long and naturally long vowels. (4) The sign of the participle. (5) The 3 sg. masc. pron. suffix. (6) The character of ־ in עֹשֶׂה. (7) The D. f. Conjunctive. (8) What inflection includes. (9) The names of the Hebrew letters.

LESSON X.—GENESIS I. 12, 13.

1. *NOTE-REVIEW.*

(1) וַיֹּאמֶר (18); (2) וְרוּחַ (15); (3) אֶת־ (23); (4) יַמִּים (64); (5) תַּדְשֵׁא (65).

2. *NOTES.*

74. וַתּוֹצֵא—wăt-tô-ṣē'—*and-*(she)-*caused-to-go-forth:*

a. Wâw Conversive וַ, and the feminine prefix תּ (= *she*).

b. The וֹ is a contraction of וֹ֫ (*aw*); hence הוֹצֵא is for הַוְצֵא, which, like הַרְשֵׁא, has ֫ under the pref. and is *causative.*

c. The root is יָצָא, which is for וָצָא, *he-went-forth.*

75. לְמִינֵהוּ—lᵉmî-nê-hû—*to-kind-his:*

a. An uncontracted form, with same meaning as לְמִינוֹ.

b. הוּ is the full form of suffix meaning *his* or *him;* ֫ may, for convenience, be called a connecting vowel.

76. שְׁלִישִׁי—šᵉlî-šî—*third;* cf. שֵׁנִי *second.*

3. *FORMS FOR SPECIAL STUDY.*

מַזְרִיעַ	וְהָאָה	הַמַּיִם	בְּקֶר
לְמִינֵהוּ	וַהוֹצֵא	מַכְדִּיל	בְּהוּ
זַרְעוֹ	עֵשֶׂב	הַמָּקוֹם	מְרַחֶפֶת

4. *OBSERVATIONS.*

59. The full form of the pronom. suffix 3rd p. sg. masc. is הוּ, the short form is וֹ.

60. There are many nouns that take a supplementary helping-vowel, usually *ĕ*, under certain circumstances *ă*, which is never accented.

5. *GRAMMAR-LESSON.*

1. § **47.** 1, 2, 4, 5. The Inseparable Prepositions.
2. § **49.** 1, 2. The Wâw Conjunctive.
3. § **45.** The Article.

6. *WORD-LESSON*

(74) הוֹצֵא (see N. **74**) (77) עֵשֶׂב *herb* (80) שְׁלִישִׁי *third*

(75) מַזְרִיעַ *yielding seed* (78) עֹשֶׂה *making*

(76) יָצָא *he went-forth* (79) פְּרִי *fruit*

7. *EXERCISES.*

1. To be translated into Hebrew:—(1) *The-day the-third* (= the

third day). (2) *The-earth shall-cause-to-go-forth*)(*the-herb and-*)(*the-tree.* (3) *Let-*(there)*-be* (a) *place between the seas and-the-land.* (4) *And-she-caused-to-go-forth*)(*the-wind upon*+*the-waters.* (5) *And-created God*)(*-the-light and-*)(*the-darkness in-day one.* (6) *Days and-seas and-waters.*

2. (1) וַיַּבְדֵּל בֵּין הַיָּם לָאָרֶץ, (2) הַיּוֹם אֲשֶׁר אוֹרוֹ־בוֹ טוֹב
וַיִּבְרָא אֵת הָרָקִיעַ בַּיּוֹם (4) וַתּוֹצֵא הָאָרֶץ אֶת־הַדֶּשֶׁא (3)
וַיַּעַשׂ אֱלֹהִים אֵת הַיַּבָּשָׁה וְאֵת מִקְוֵה הַמָּיִם (5) הַשֵּׁנִי,

3. To be written in English letters: — (1) וְלַחֹשֶׁךְ, (2) לָרָקִיעַ, (3) מִתַּחַת, (4) מַזְרִיעַ, (5) זַרְעוֹ־בוֹ, (6) וַיַּרְא.

4. To be written in Hebrew letters: — (1) yîḳ-ḳå-wû, (2) bᵉθôχ, (3) ʾĕl+mă-ḳôm, (4) lᵉmî-nô, (5) ʿēṣ, (6) ʾᵉšĕr, (7) zăr-ʿô+vô, (8) šᵉlîšî.

8. *TOPICS FOR STUDY.*

(1) The helping vowel. (2) The syllable. (3) Păθăḥ furtive. (4) The forms of the conjunction *and.* (5) The origin of î under w in וְיִהְי (6) The use of the imperfect with wâw conversive. (7) The sign of the definite object, its forms and usage. (8) The influence of laryngeals upon neighbouring vowels.

LESSON XI.—GENESIS I. 14, 15.

1. *NOTE-REVIEW.*

(1) יְהִי (19); (2) הַשָּׁמַיִם (5); (3) בֵּין (26); (4) יוֹם (31); (5) לַיְלָה (34); (6) וַיְהִי־כֵן (52).

2. *NOTES.*

77. מְאֹרֹת—mᵉʿô-rôθ—*luminaries:*

a. Sing., מָאוֹר (like מָקוֹם *place*); but when the plur. ending ôθ is added the tone moves one syllable, and the original ă is reduced to ֵ, § **109.** 1. *a.*

b. Both ô's are naturally long, though written defectively, § **6.** 4 N. 2.

c. אוֹר = *light*, but מָאוֹר = *luminary;* on this use of מ, see 63.*c.*

78. בְּרִקִיעַ—bĭr-ḳî(ă)ʿ—*in-expanse-of:*

a. Abs. רָקִיעַ (40); const. רְקִיעַ, the original ă being reduced to ־ְ, §**109.** 3. *a.*

b. Before ר the prep. בְּ takes ־ instead of ־ְ, § **47.** 2.

c. The syl. בְּרִ (bĭr) is closed, § **26.** N. 2.

d. The šᵉwâ under ר is silent, § **10.** 2.

79. לְהַבְדִּיל—lᵉhăv-dîl—*to-cause-a-division:*

a. An infinitive; the prefix הַ shows it to be *causative* (Hîfʿîl).

b. D. l. in דּ because it does not immediately follow a vowel-sound.

80. וְהָיוּ—wᵉhå-yû—*and-they-shall-be:*

a. הָיָה = *he-was;* הָיְתָה = *she-was;* הָיוּ = *they-were.*

b. But וְ connects this with what precedes, and likewise carries on to the perfect the time-sense of the preceding context; cf. with this the form of the conjunction (וַ) which gives the *imperfect* the time-sense of the preceding context, see 18.

81. לְאֹתֹת—lᵉʾô-θôθ—*for-signs:*

a. Sing. אֹת or אוֹת; plur. אֹתֹת, by the addition of ôθ, § **106.** 3.

b. Both vowels are naturally long (ô), written defectively.

82. וְלִמּוֹעֲדִים—û-lᵉmô-ʿᵃdîm—*and-for-seasons:*

a. The conjunction, before a consonant with šᵉwâ, is written וְ § **49.** 2.

b. The וֹ is ô, not ŏ́; Méθĕg is written before comp. šᵉwâ, § **18.** 3.

c. ע, being a laryngeal, takes a *compound* šᵉwâ, § **42.** 3.

d. The noun is in the plur. masc., as shown by îm.

83. וְלִימִים—û-lᵉyå-mîm—*and-for-days:*

a. Another case of וְ, instead of וְ, before a consonant with šᵉwâ, see 82. *a.*

b. This is an *irregular plural form from* יוֹם *day.*

84. וְשָׁנִים—wᵉšå-nîm—*and-years:*

a. A masc. pl. ending with a noun (שָׁנָה) which has feminine sg. ending, § **106.** 4. N.

85. לִמְאוֹרֹת—lĭm-'ô-rôθ—*for-luminaries:*

a. What was said in 78. *b*, *c*, concerning bĭr, applies to lĭm.

b. Here the first ô is written *fully*, the second defectively, § **6.** 4. N. 2.

86. לְהָאִיר—lᵉhā-îr—*to-cause-to-shine;* cf. אוֹר *light:*

a. Another *causative infinitive* (cf. הַבְדִּיל), but with ֗ under ה instead of ֖, because it is in an *open* syllable, § **28.** 1.

3. *FORMS FOR SPECIAL STUDY.*

וְשָׁנִים	יְהִי	מְאֹרֹת	עֶרֶב
וּבִין	מְאֹרֹת	אֹתֹת	אֶרֶץ
וּלְמוֹעֲדִים	בְּרָקִיעַ	יָמִים	הָאֵשׁ
וּלְיָמִים	לִמְאוֹרֹת	שָׁנִים	זֶרַע

4. OBSERVATIONS

61. The *fem.* plur. ending is ôθ, the *masc.*, îm.

62. For the initial and so-called medial šᵉwâ, see § **10.** 1, 2.

63. *And* is usually written וְ, but before labials and before consonants with šᵉwâ it is written וּ.

5. *GRAMMAR-LESSON.*

1. § **47.** 1, 2, 4, 5,	The Inseparable Prepositions.
2. § **49.** 1, 2,	The Wâw Conjunctive.
3. § **10.** 1,2,	Initial and (so-called) Medial šᵉwâ.
4. § **7.** 1—4,	Classification of Vowel-sounds.

6. *WORD-LESSON.*

(81) אוֹת *sign*	(83) מָאוֹר *luminary*	(85) שֶׁמֶשׁ *sun*
(82) יֶרַח *moon*	(84) מוֹעֵד *season*	(86) שָׁנָה *year*

7. *EXERCISES.*

1. To be translated into Hebrew:—(1) *The-sign, the-moon, the sun, the-year, the-season;* (2) *The-sun will-be-seen in-the-heavens;* (3) *Signs and-luminaries and-seasons and-years;* (4) *The-sun shall-be* (יִהְיֶה) *in-expanse-of the-heavens;* (5) *For-seasons and-for-luminaries;* (6) *To-cause-a-division between the-day and-between the-night;* (7) *Seas and-waters;* (8) *Days and-seas;* (9) *The-luminary, the-luminaries.*

2. To be translated into English:—(1) הַמְּאֹרֹת מֵעַל לָאָרֶץ; (2) הַמָּאוֹר הַשֵּׁנִי; (3) וַיַּבְדֵּל בֵּין הַשָּׁמַיִם וּבֵין הָאָרֶץ; (4) בְּרִקִיעַ, בְּרִקִיעַ, בְּרִקִיעַ; (5) בָּרָא אֱלֹהִים אֶת־הַשָּׁמַיִם; (6) הָרָקִיעַ אֲשֶׁר הַשָּׁמַיִם בּוֹ; (7) לַמְּאוֹרֹת, לְמָאוֹרֹת.

3. To be written in English letters:—(1) יָרֵחַ, (2) מוֹעֵד, (3) שֶׁמֶשׁ, (4) שָׁנָה, (5) מוֹעֲדִים, (6) יַבְדֵּל.

4. To be written in Hebrew letters:—(1) hâ-'îr, (2) 'ô-θôθ, (3) yôm, (4) yâ-mîm, (5) bĭr-ḳî(ă)ʿ.

8. *TOPICS FOR STUDY.*

(1) Change of ־ to ־. (2) Prepositions בְּ and לְ with ĭ. (3) Wâw Conversive with the past tense. (4.) Various forms of the verb הָיָה *he-was.* (5) וּ and וְ. (6) ־ִים and ־וֹת. (7) Difference between הַבְדִּיל and הָאִיר. (8) Nouns with helping vowels. (9) Initial and so-called Medial Šᵉwâ. (10) Classification of vowel-sounds according to formation, quantity, nature, value.

LESSON XII.—GENESIS I. 16, 17.

1. *NOTE-REVIEW.*

(1) מְאֹרֹת (77); (2) הַמַּיִם (56); (3) מָקוֹם (58); (4) בְּרִקִיעַ (78); (5) לְהָאִיר (86); (6) הַחֹשֶׁךְ (28); (7) וַיַּרְא (22); (8) וַיִּקְרָא (29).

2. *NOTES.*

87. וַיַּעַשׂ—wăy-yă-ʿăś—*and-*(he)*-made*, see 46:

a. Like יְהִי, a short form of the *imperfect*, root עָשָׂה.

b. Third syllable, has an unaccented helping or secondary vowel.

88. שְׁנֵי—šᵉnê—*two-of; cf.* פְּנֵי *faces-of:*

a. The construct state of the numeral שְׁנַיִם, of which ־ַיִם is the *dual* ending, §§ **106.** 5; **107.** 6.

b. The word has but one syllable, ־ְ not being a full vowel.

89. הַגְּדֹלִים—hăg-gᵉđô-lîm—*the-great* (ones):

a. The article written regularly with ־ַ and D. f., § **45.** 1.

b. An adjective in the plur. (note the ending ־ִים) from גָּדוֹל.

c. The ־ֹ is ô, though in the plural form written defectively.

d. The ־ַ and ־ְ under ג in the sing. and plur. respectively, both arise from an original ă. In the singular this ă is in an open syl. immediately before the tone and therefore is rounded to å; in the plural the tone has moved away upon the addition of îm, and so original ă is reduced to šᵉwâ; cf. sg. m. גָּדוֹל, but sg. f. גְּדוֹלָה, pl. m. גְּדוֹלִים, pl. f. גְּדוֹלוֹת, in which, by the addition of an affix, the tone is changed. This change of a full vowel to šᵉwâ is called reduction, § **36.** 2. *b.*

90. הַמָּאוֹר הַגָּדֹל—hăm-må-ʾôr hăg-gå-đôl—*the-luminary the-great* (one):

a. Both words have a tone-long å, and a naturally long ô, although in the adjective the ô is written defectively.

b. Both words have the article in its usual form.

91. לְמֶמְשֶׁלֶת—lᵉměm-šĕ-lĕθ—*for-dominion-of:*

a. Two unaccented closed syllables, one accented open.

b. The final ĕ is a helping vowel.

c. לְ is the prep.; מ, the formative prefix, cf. 58. *b;* ת, the fem. ending; the root being מָשַׁל.

92. הַקָּטֹן—hăḳ-ḳâ-ṭōn—*the-small;* with tone-long ō.

93. הַכּוֹכָבִים—hăk-kô-χâ-vîm—*the stars:*

a. The ־ under כ is Mĕθĕğ, § **18.** 1; under ב it is Sillûḳ.

b. Cf. כּוֹכָב *star,* כּוֹכָבִים *stars,* הַכּוֹכָבִים *the-stars.*

94. וַיִּתֵּן—wăy-yĭt-tēn—*and-*(he)*-gave:*

a. יִתֵּן *he-will-give* is the Ḳăl Imperfect from נָתַן *he-gave.* With Wâw Conversive (cf. 18) it has the force of a Perfect (past).

b. The D. f. in תּ is for the first radical נ, which has been assimilated; cf. מִתָּחַת for מִן תַּחַת, see 49, § **39.** 1.

95. אֹתָם—'ô-θâm—)(*-them:* the pronominal suffix ם־ with אֵת, another way of writing the sign of def. obj., § **51.** 2.

3. *FORMS FOR SPECIAL STUDY.*

הַמְּאֹרֹת הַגְּדֹלִים—*the-luminaries the-great* = the great luminaries.

הַמָּאוֹר הַגָּדֹל—*the-luminary the-great* = the great luminary.

הַמָּאוֹר הַקָּטֹן—*the-luminary the-small* = the small luminary.

4. *OBSERVATIONS.*

64. In the words cited above, the noun stands first, the *adjective,* second.

65. The noun is masculine,[1] the adjective is masculine.

66. When the noun is sing., the adjective is sing.; when the noun is plur., the adjective is plur.

67. The noun has the article, and so has the adjective.

68. The following is, therefore, the rule governing the position and agreement of an attributive adjective: *The adjective, when attributive, follows its noun, and agrees with it in gender, number and definiteness.*

[1] The noun מָאוֹר is *masculine,* although in the plural it has a feminine form.

5. *GRAMMAR-LESSON.*

1. § 57. Notes 1, 2, Tenses and Moods.
2. § 58. 1. The Simple Verb-stem, Ḳăl.
3. § 14. 1—3, Omission of Dåğĕš-fŏrtē.
4. § 11. 2. a, b, Šᵉwâ under final consonants.

6. *WORD-LESSON.*

(87) אוֹר *to shine*
(88) גָּדוֹל *great*
(89) כּוֹכָב *star*
(90) מֶמְשָׁלָה *ruling*
(91) קָטֹן *small*
(92) רְבִיעִי *fourth*
(93) שְׁנַיִם *two*

7. *EXERCISES.*

1. To be translated into Hebrew:—(1) *The great day;* (2) *In the great day;* (3) *And in the great day;* (4) *The great stars;* (5) *The small star;* (6) *The good God;* (7) *He-gave, he-ruled;* (8) *God gave)(the-luminaries for-*(the)*-ruling-of the-day and-for-*(the)*-ruling-of the-night;* (9) *The great luminary* (is) *the-sun; the small luminary, the-moon;* (10) *The-sun and-the-moon* (are) *in-*(the)*-expanse-of the-heavens;* (11) *God will-give)(the-day.*

2. To be translated into English:—(1) עָשָׂה אֶת־הַמָּאוֹר הַגָּדֹל; (2) הַכּוֹכָב הַטּוֹב; (3) מוֹעֵד אֶחָד; (4) הַשָּׁנָה הַשִּׁלִישִׁית; (5) יְהִי כּוֹכָבִים בַּלַּיְלָה; (6) הַמָּאוֹר הַשֵּׁנִי; (7) הַמָּאוֹר הַקָּטֹן הַשֵּׁנִי; (8) הָעֵץ אֲשֶׁר־ וַיַּבְדֵּל בֵּין מְאֹרֹת לְמְאֹרֹת; (9) עֵץ הַפְּרִי; (10) בּוֹ זֶרַע.

3. To be written in English letters : — (1) יִתֵּן, (2) יַעַשׂ, (3) מֶמְשֶׁלֶת, (4) כּוֹכָב, (5) אֹתָם, (6) בִּרְקִיעַ, (7) לִמְשֹׁל, (8) מְאֹרֹת, (9) הַיּוֹם.

4. To be written in Hebrew letters:—yōm, (2) yôm, (3) šĕx, (4) lēx, (5) 'ătt, (6) ṭălt, (7) yēšt, (8) hă-'ôr.

8. *TOPICS FOR STUDY.*

(1) Affixes of the feminine. (2) Affixes of the masculine plural and dual, in absolute and construct. (3) Change of ֶ to ֵ. (4)

The construction of the attributive adjective. (5) Mĕθĕğ and Sĭllûḳ. (6) Assimilation of נ. (7) The infinitive of the root מָשַׁל. (8) The conjunction before a labial. (9) The ordinals meaning *second, third, fourth.* (10) Tenses and moods in Hebrew. (11) The form of the simple verb-stem (Ḳal). (12) Omission of Dâğĕš-fŏrtē. (13) Šᵉwâ under final consonants.

LESSON XIII.—GENESIS I. 18—20.

1. *NOTE-REVIEW.*

(1) הַמַּיִם (17); (2) הָאָרֶץ (7); (3) רָקִיעַ (40); (4) הַגְּדֹלִים (84); (5) אֲשֶׁר (48); (6) לְמִינֵהוּ (75); (7) וַיַּרְא (22).

2. *NOTES.*

96. וְלִמְשֹׁל—wᵉlīm-šōl—*and-to-rule:*

a. Conjunction וְ; prep. לְ with ־, § **47.** 2; the ־ under מ silent.

b. An infinitive from the root מָשַׁל, cf. 91; tone-long ō.

97. בְּיוֹם וּבַלָּיְלָה—băy-yôm û-văl-lăy-lå(h)—*in-the-day and-in-the-night,* §§ **45.** 4. R. 3; **47.** 4; **49.** 2.

98. וְלְהַבְדִּיל—û-lᵊhăv-dîl—*and-to-cause-a-division.*

a. וְ, § **49.** 2; לְ, § **32.** 3. *c;* הַבְדִּיל, see 79.

b. The root is בָּדַל (pronounced bå-dăl).

99. רְבִיעִי—rᵉvî-'î—*fourth;* cf. שְׁלִישִׁי *third.*

100. יִשְׁרְצוּ—yĭš-rᵉṣû—(they) *shall-swarm:*

a. Ḳăl Imperfect 3 pers. plur. masc. from שָׁרַץ *he-swarmed;* יִשְׁרֹץ *he-will-swarm;* יִשְׁרְצוּ *they-will-swarm.*

b. Two Šᵉwâs—first, silent; second, vocal, § **11.** 3. N. 1, 2.

c. The Imperfect tense represents an action as unfinished, incomplete, whether in past, present or future time.

101. שֶׁרֶץ—šĕ'-rĕṣ—*swarm,* or, collectively, *swarms:*

a. Like עֶרֶב, אֶרֶץ, דֶּשֶׁא, זֶרַע and עֹשֶׁב; these nouns have but one essential vowel, viz., the first, since the second is inserted merely for euphony. They are called *Seğolates.*

b. The essential vowel in all these cases, except עֹשֶׁב, was originally ă, which has been deflected to ĕ, § **89.** 1. The essential vowel of עֹשֶׁב was originally ĭ.

102. נֶפֶשׁ —nĕ'-fĕš—*soul-of:* Another Seğolate, of which the primary form was נַפְשׁ; cf. the primary form of זֶרַע, viz., זַרְעָ, which appears before the suffix in זַרְעוֹ, see 73.

103. חַיָּה—ḥăy-yâ(h)—*life:* Feminine, as shown by ־ָה.

104. וְעוֹף—w^{e}'ôf—*and-fowl:*

a. The Wâw Conjunctive pointed regularly with š^{e}wâ.

b. A case of naturally long ô; the *final* form of פ (Pē).

105. יְעוֹפֵף—y^{e}'ô-fēf—(he) *shall-fly:*

a. An Imperfect from the root עוף *to-fly.*

b. Unchangeable ô; both פ 's are spirants.

3. *FORMS FOR SPECIAL STUDY.*

נֶפֶשׁ	לִמְשֹׁל	יִשְׁרֹץ
זֶרַע	הַכְּדִיל	יִשְׁרְצוּ

4. *OBSERVATIONS.*

69. The Imperfect Ḳăl has a preformative in the 3d masc. the letter י, written with ĭ.

70. In forming the plural of the Ḳăl perf., the vowel of the second radical becomes vocal š^{e}wâ.

5. *GRAMMAR-LESSON.*

1 § **50.** 1, The regular forms of the Personal Pronoun.

2. § **50.** 2, 3. Pausal forms and Remarks (*to be read only*).

6. *WORD-LESSON.*

(94) חַיָּה *life* (96) עוּף *to-fly* (98) שֶׁרֶץ *swarm*

(95) נֶפֶשׁ *soul* (97) עוֹף *fowl*

7. *EXERCISES.*

1. To be translated into Hebrew:—(1) *The-waters shall-swarm;* (2) *God created*)(*the-earth, and-he-made*)(*the-heavens;* (3) *And-saw God*)(*the-earth which he-had-created, and-*(it)*-was+good;* (4) *I* (am) *God who created*)(*the-light;* (5) *Thou* (art) *in-the-heavens and-I* (am) *upon+the-earth;* (6) *We* (are) *great;* (7) *Thou* (m.) (art) *small;* (8) *Thou* (f.) (art) *good;* (9) *Ye* (are) (the) *light-of the-earth.*

2. To be translated into English:—(1) אָנֹכִי וְהוּא, (2) אַתְּ גְּדֹלָה; (3) גְּדֹלִים הַשָּׁמַיִם; (4) יִקְרְאוּ לַמַּיִם יַמִּים, (5) בָּרָא אֱלֹהִים אֶת־הַנֶּפֶשׁ; (6) הָעוֹף.

3. To be written in English letters:—(1) שֶׁרֶץ, (2) וְלִמְשֹׁל, (3) עוֹף, (4) נֶפֶשׁ, (5) נַפְשׁוֹ, (6) וְלַהַבְדִּיל.

4. To be written in Hebrew letters:—(1) ḳôl, (2) nĕʾ-fĕš, (3) mᵉʾô-rôθ, (4) ʾă-nô-χî, (5) ʾătt, (6) ʾăt-tĕm, (7) năḥʾ-nû.

8. *TOPICS FOR STUDY.*

(1) Force of the Imperfect. (2) Seğolates. (3) The vowel ĕ, as derived from ֵ. (4) The vowel ŏ. (5) The various ways of writing the article. (6) The forms of the Personal Pronoun. (7) The simple verb-stem. (8) The Passive. (9) The Causative.

LESSON XIV.—GENESIS I. 21—23.

1. *NOTE-REVIEW.*

(1) הַמַּיִם (44), (2) וַיֹּאמֶר (18), (3) וַתּוֹצֵא (74), (4) נֶפֶשׁ חַיָּה (102, 103); (5) וַיַּעַשׂ (46).

2. *NOTES.*

106. וַיִּבְרָא—wāy-yĭv-rā'—*and-(he)-created:*

a. יִבְרָא *he-will-create,* but with ו the force of the tense is changed.

b. Compare (1) בָּרָא and וַיִּבְרָא with (2) בָּרָא and וַיִּבְרָא.

107. הַתַּנִּינִם—hăt-tăn-nî-nîm—*the-sea-monsters:*

a. Points in תּ and נ are D. f., because preceded by vowels.

b. The ֣ under נ is î written defectively, § **6.** 3. N. and 4. N. 2.

c. (1) Article הַ, (2) noun תַּנִּין, (3) plural ending ־ִים.

108. כָּל־נֶפֶשׁ—kŏl+nĕ'-fĕš—*every+soul-of:*

a. כָּל־ is an unaccented closed syllable, for the word before Măḳ-ḳēf *always* loses its accent, § **17.** 1, 2.

b. An *unaccented* closed syllable must have a short vowel, § **28.** 2; but is ֣ a short vowel? *It is.* In this word we have for the first time ŏ, or Ḳămĕṣ-ḥāṭûf, which is represented by the same sign[1] (֣) as å, § **5.** 5.

109. הַחַיָּה—hă(ḥ)-ḥăy-yå(h)—*the-life:* The article with its D. f. implied, § **45.** 2; Mĕθĕğ, second syllable before tone, § **18.** 1.

110. הָרֹמֶשֶׂת—hå-rô-mĕ'-śĕθ—*the-(one)-creeping:*

a. The article with D. f. rejected and ֣ rounded to ֥, § **45.** 3.

b. A participle (although without מ) fem. (ת) sg. from רָמַשׂ,

c. Observe that the ֹ is ô, not ō, although defectively written.

111. שָׁרְצוּ—šå-rᵉṣû—(they) *swarmed:*

a. *He-swarmed* שָׁרַץ, *they-swarmed* שָׁרְצוּ; cf. יִשְׁרֹץ *he-will-swarm,* יִשְׁרְצוּ *they-will-swarm;* and so בָּרָא *he-created,* בָּרְאוּ *they-created;* קָרָא *he-called,* קָרְאוּ *they-called;* נָתַן *he-gave,* נָתְנוּ *they-gave.*

b. Ḳăl Perf. 3 m. pl., as shown by the ending וּ.

---

[1] There is practically no difference in pronunciation between ֣ = å and ֥ = ŏ; but in this book they are transliterated differently in order to emphasize the difference in their origin.

112. לְמִינֵהֶם—l^{e}mî-nê-hĕm—*to-kinds-their:*

a. הֶם is pron. suf. 3 m. pl., as used with plur. nouns, § **51.** 1. *c.*

b. ־ (= ê) is a defective writing for ◌ִי the plur. const. ending.

113. כְּנַף—kå-nåf—*wing:*

a. The first ־ is å, because *before* the tone and in an open syllable: the second is å because under the tone, § **31.** 1. *a.* (1), *c.*

b. Const. sing. would be כְּנַף; *dual* would be כְּנָפַיִם.

114. וַיְבָרֶךְ—wăy-vå'-rĕX—*and-*(he)*-blessed:*

a. Root is בָּרַךְ, ◌ְ being sign of Impf., and וַ the conjunction.

b. D. f. of ◌ַ וַ omitted from ◌ְ, which has only a Š^{e}wâ, § **14.** 2.

c. The final ךְ has, as always, a Š^{e}wâ, § **11.** 2. *a.*

d. In the syllable וְי ay forms a diphthong, hence the following ב is a spirant.

e. This stem is not at all like either (1) the simple verb-stem, as seen in יִקְרָא, or (2) the passive-stem, as seen in יְקֻוּ, or (3) the causative-stem, as seen in יַבְדֵּל, מַבְדִּיל. It is a *new* stem, viz., the *intensive.* The form would regularly be יְבַרֵךְ, but ר rejects the D. f., and the preceding ־ becomes ־, while, by a change of tone, ־ yields to ־; cf. אֵת, but אֶת־ (23).

f. The characteristic of the intensive-stem is Dåğĕš-fŏrtē in the second radical, not, as in יְקֻוּ (55), in the first.

115. לֵאמֹר—lê'-mōr—*to-say,* generally translated *saying:*

a. Inf. const. of אָמַר *say* is אֱמֹר; cf. מְשֹׁל (96) from מָשַׁל.

b. Before א, the prep. ל takes ־, giving לֶאֱמֹר, § **47.** 3.

c. א being weak, finally quiesces, carrying ־ along with it, and in compensation ־ becomes ê.

116. פְּרוּ—p^{e}rû—*be-ye-fruitful:* A Ḳăl Imperative plural.

117. וְרִבוּ—û-r^{e}vû—*and-multiply-ye:* Ḳăl Imperative plur. with Wâw Conjunctive, here וְ before a consonant with Š^{e}wâ, § **49.** 2.

118. וּמִלְאוּ—û-mīl-'û—*and-fill-ye:*

a. Wâw Conjunctive before a labial is written וְ, § **49.** 2.

b. Šᵉwâ is *silent*, §§ **10.** 2. *b*; **26.** 4. N.

c. Ḳăl Imperative plural of מָלֵא, וְ indicating the plural.

119. בַּיַּמִּים—bāy-yām-mîm—*in-the-seas:*

a. יָם *sea*, יַמִּים *seas*, הַיַּמִּים *the-seas*, בַּיַּמִּים *in-the-seas.*

b. Cf. יוֹם *day*, יָמִים *days*, הַיָּמִים *the-days*, בַּיָּמִים *in-the-days.*

120. וְהָעוֹף—wᵉhâ-ʿôf—*and-the-fowl*, §§ **49.** 1; **45.** 3.

121. יִרְבּוּ—yĭr-rĕv—*let-*(him)*-multiply:*

a. Ḳăl Impf., short form, from same root as רְבוּ (117).

b. י is the pref. of the Impf.; ר and ב, radicals; third radical lacking.

c. ִ is a helping vowel.

122. חֲמִישִׁי—ḥᵃmî-šî—*fifth*, § **9.** 2.

3. *FORMS FOR SPECIAL STUDY.*

הַמַּיִם	מְרַחֶפֶת	יִקְרָא — קָרָא
הַחַיָּה	מְמֻשֶּׁלֶת	יִבְרָא — בָּרָא
הָרֹמֶשֶׂת	רֹמֶשֶׂת	יִשְׁרְצוּ — שָׁרְצוּ

4. *OBSERVATIONS.*

71. Upon the addition of וְ in the Impf. as well as in the Perf. the vowel of the second radical becomes vocal Šᵉwâ.

72. The feminine ending תּ is often preceded by an unaccented ִ, inserted for euphony.

73. The article is ◆הַ; while ח (also ה) takes the D. f. by implication, ר (also ע and א) entirely rejects it.

74. The quiescense of a consonant is usually compensated for by the strengthening of the preceding vowel.

5. *GRAMMAR-LESSON.*

1. § **106.** 2. *b*, The fem. ending ת attached to a stem by means of ־ָ.
2. § **106.** 2. *c*, The fem. ending ת changed to ה־ָ.
3. § **42.** 1. 3[1] The peculiarities of laryngeals.

6. *WORD-LESSON.*

(99) כָּל־ *all, every*
(100) כָּנָף *wing*
(101) רָמַשׂ *he-crept*
(102) תַּנִּין *sea-monster*
(103) בֵּרַךְ *he-blessed*
(104) מָלֵא *he-filled*

7. *EXERCISES.*

1. To be translated into Hebrew:—(1) *God said, "Let-there-be* (an)*-expanse and-he-created*)(+ *the-heavens.* (2) *And-he-made*)(+*the-great stars* (lit. *the-stars the-great*). (3) *Fill-ye the-waters and-multiply-ye in-the-seas.* (4) *And-blessed God every+winged fowl* (lit. *every+fowl-of wing*). (5) *Let-multiply the-fowl upon+the-earth.* (6) *God blessed*)(*every living-thing that creeps* (lit.)(*every soul-of the-life the-creeping*); (7) *The-waters swarmed according-to-their-kinds.*

2. To be translated into English: — (1) וַיִּבְרָא אֱלֹהִים אֶת־ הַתַּנִּינִם הַגְּדֹלִים, (2) וַיִּשְׁרְצוּ הַמַּיִם לְמִינֵהֶם, (3) בֵּרַךְ אֱלֹהִים אֹתָם לֵאמֹר, (4) רְבוּ וּמִלְאוּ אֶת־הַמָּיִם בַּיַּמִּים, (5) וְהָעוֹף יִרֶב בָּאָרֶץ. (6) וַיְהִי כֵן. (7) וַיְהִי עֶרֶב וַיְהִי בֹקֶר יוֹם חֲמִישִׁי.

3. To be written in English letters: — שָׁרְצוּ, יִבְרֵךְ, אֹתָם, הַתַּנִּינִם, וּרְבוּ, חֲמִישִׁי.

4. To be written in Hebrew letters:—(1) kōl, (2) kŏl+, (3) yĭ′-rĕv, (4) šĕ′-rĕṣ, (5) hă(ḥ)-ḥăy-yâ(h), (6) năf-šô, (7) š°nê.

[1] Learn only the general statement, not the sub-sections marked *a*, *b*, *c*, etc.

8. *TOPICS FOR STUDY.*

(1) The plural (masc.) of verbal forms. (2) The feminine ending תּ. (3) The dual ending. (4) The intensive stem. (5) The peculiarities of laryngeals. (6) Compensatory strengthening of vowels.

LESSON XV.—GENESIS I. 24—26.

1. *NOTE-REVIEW.*

(1) כָּל־ (108); (2) וְלִמְשֹׁל (96); (3) וּבַלַּיְלָה (97); (4) לְהָאִיר (86); (5) אֶת־הָאוֹר (23); (6) וַיְהִי (43).

2. *NOTES.*

123. תּוֹצֵא—tô-ṣē'—*Let-*(her)*-cause-to-go-forth:*

a. וֹ (ô) is contracted from וֹ_; תּוֹצֵא is like תַּדְשֵׁא (65).

b. Hif'îl Impf. 3 fem. sg. from the root יָצָא *he-went-forth.*

124. לְמִינָהּ—l'mî-nâh—*to-kind-her:*

a. ל *to,* מִין *kind,* הָ_ *her;* cf. לְמִינֵהוּ, לְמִינוֹ.

b. The point in ה is neither D. f. nor D. 1.; it is inserted to show that ה has a consonantal force and is *not* silent, for ה at the end of a word is always silent unless it has this point, called Măppîḳ, § **16.** 1.

125. בְּהֵמָה—b'hē-mā(h)—*cattle:*

a. ה, having no Măppîḳ, is silent; the noun is fem., § **106.** 2. *c.*

126. וְרֶמֶשׂ—wă-rĕ'-mĕś—*and-creeper:*

a. Wâw Conj. before the tone-syl. receives ־, § **49.** 4; cf. וָבֹהוּ (11).

b. רֶמֶשׂ is a Seğolate noun from the same root as רֹמֶשֶׂת (110).

c. The secondary, helping vowel is not accented.

127. וְחַיְתוֹ־אֶרֶץ—w'ḥăy-θô+'ĕ'-rĕṣ—*and-beast-of -+earth:*

a. חַיָּה (absolute) = *life* or *beast;* חַיַּת is construct, § **107.** 2, 4.

b. וֹ is an old ending, now obsolete, § **105.** 1. Rem.

c. חַיְתוֹ is for חַיַתוֹ, but ־ under ְ has become silent ־, D. f. in ְ being dropped, and ְ_ forms a diphthong; hence ת is spirant.

128. חַיַת—ḥăy-yăθ—*beast-of:* with the same meaning as the preceding *archaic* form חַיְתוֹ; here D. f. remains.

129. הָאֲדָמָה—hā-'ᵃđā-mā(h)—*the-ground:*

a. The article before a weak laryngeal has ־, § **45.** 3.

b. The vowel before a compound šᵉwâ always has Mĕθĕğ, § **18.** 3.

c. א, a laryngeal, takes compound rather than simple šᵉwâ, § **9.** 2.

d. ה, having no Măppîḳ (§ **16.** 1), is silent; the word is feminine, § **106.** 2. *c.*

130. נַעֲשֶׂה—nă'-ᵃśé(h)—*we-will-make*, or, *let-us-make:*

a. Of these four consonants only *three* can be radicals; the root is עָשָׂה.

b. The נ, from pronoun אֲנַחְנוּ *we*, indicates 1 p. pl., *we*, just as ְ indicates 3 m. sg., *he*, and תְ, 3 fem. sg., *she.*

c. The laryngeal ע takes *compound* šᵉwâ, § **9.** 2.

d. Mĕθĕğ, as always, before a compound šᵉwâ, § **18.** 3.

e. The vowel ה_ is *é*, cf. same vowel in וְתֵרָאֶה (59) and עֹשֶׂה (71).

f. To the first syl. ᵃ is an overhanging sound helping in the transition from the laryngeal to the following sibilant.

131. אָדָם—'ā-đām—*man:* both vowels changeable.

132. בְּצַלְמֵנוּ—bᵉṣăl-mē'-nû—*in-image-our:*

a. Prep. בְּ; noun צֶלֶם; connecting-vowel ־ֵ; suffix נוּ.

b. The accent ֒ is disjunctive, separating the word from what follows.

133. כִּדְמוּתֵנוּ—kĭđ-mû-θē'-nû—*according-to-likeness-our:*

a. כ has D. l. because of preceding disjunctive accent, § **12.** 3.

b. The šᵉwâ becomes silent, as in לִמְשֹׁל (96), after the inseparable preposition.

c. The noun is דְּמוּת, the suf. and connecting-vowel being ־ֵנוּ.

134. וְיִרְדּוּ—w'yîr-dû—*and-they-shall-have-dominion:*

a. וְ = *and;* י indicates Impf. וּ, plural; radicals, ר and ד.

135. בִּדְנַת—vĭḏ-ğăθ—*in-fish-of:*

a. The stroke over בִּ is Rāfê, § **16.** 2.

b. Prep., before a consonant with š'wâ, takes ־, § **47.** 2.

c. On ğ, see §§ **10.** 2, *b.* and **28.** 4.

d. Noun in abs., דָּגָה; in const., דְּגַת, § **106.** 2. *a.* (2).

136. הָרֹמֵשׂ הָרֹמֶשׂ—hā-rō'-mēś hā-rô-mēś—*the-creeper the-creeping*: the noun and the participle, both with article.

3. *FORMS FOR SPECIAL STUDY.*

וְבֹהוּ	פְּרוּ	חַיָּה	לֵאמֹר for לֵאמוֹר
וְרֹמֶשׂ	רְבוּ	חַיַּת	הַוֵּצֵא for הוֹצֵא
לָמִים	מִלְאוּ	חַיְתוֹ	לְמִינָהּ for לְמִינָהּ

4. *OBSERVATIONS.*

75. Contractions are common; thus וֹ (ăw) becomes ô; הָ (ă-hă) becomes הָ (âh). The result is always a naturally long vowel.

76. The original fem. ending, was תַ, which is retained in the construct, but in the absolute the ת is lost and the preceding ־ becomes ־.

77. The Imperative has only a second person.

78. Before a tone-syllable Wâw Conjunctive and the inseparable prepositions *may* take a tone-long ־.

5. *GRAMMAR-LESSON.*

1. § **51.** 1. *a—c,* Pronominal Suffixes,—separate forms.
2. § **51.** 2, Pronominal Suffixes with אֵת.

6. *WORD-LESSON.*

(105) אַדְמָה *ground*

(106) בְּהֵמָה *cattle*

(107) פָּרָה *he-was-fruitful*

(108) רָבָה *he-multiplied*

(109) רֶמֶשׂ *creeper*

7. *EXERCISES.*

1. To be translated into Hebrew:—(1) *God created*)(*them;* (2) *He-said to-the-sea-monsters, Fill-ye*)(+*the-seas;* (3) *The-fowl multiplied upon*+*the-earth;* (4) *The-day the-fifth;* (5) (The) *beast-of the-earth was* (*fem.*) *upon*+*the-ground;* (6) *To-kind-his, and-to-kind-her, and-to-kinds-their;* (7) *His-day, my-day, her-day;* (8) *God made*)(+*the-creeper upon*+*the-ground;* (9) *The-cattle the-good* (f.); (10) *The good beast;* (11) *And-saw God all*+*that he-had-created, and-*(it)*-was* +*good;* (12) *The-waters* (are) *in-the-seas and-upon*+*the-earth.*

2. To be translated into English:—(1) וְהָעוֹף יְעוֹפֵף; (2) וַתּוֹצֵא הָאָרֶץ אֶת־הַבְּהֵמָה וְאֶת־ (3) הָאָרֶץ דֶּשֶׁא וְעֵשֶׂב וְעֵץ וַתּוֹצֵא הָאָרֶץ אֶת־כָּל־רֶמֶשׂ הָאֲדָמָה (4) וַיְבָרֶךְ; הָרֶמֶשׂ וְאֶת חַיַּת הָאָרֶץ.

3. To be written in English letters: — (1) מָלֵא, (2) רָבָה, (3) בָּרַךְ, (4) בְּהֵמָה, (5) לְמִינָהּ, (6) לֵאמֹר, (7) תּוֹצֵא.

4. To be written in Hebrew letters:—(1) kōl, (2) kŏl+, (3) bên, (4) bēn, (5) bĕn+, (6) rĕ′-mĕś, (7) ḥăy-ǫô, (8) bă̆y-yă̆m-mîm, (9) ′ašĕr, (10) rēx, (11) vå′-rĕx.

8. *TOPICS FOR STUDY.*

(1) The Intensive-stem. (2) Omission of D. f. (3) Inf. const. of אָמַר with prep. לְ. (4) Difference between the words for *sea, seas* and *day, days.* (5) The ordinals 2d to 5th. (6) Pron. suf. of 3d per. fem. (7) Măppîḳ. (8) Relation between the fem. affixes ה_ and ת_. (9) Pronominal suffixes,—separate forms. (10) Pronominal suffixes with אֵת.

LESSON XVI.—GENESIS I. 27—29.

1. *NOTE-REVIEW.*

(1) וְעוֹף (104); (2) בְּהֵמָה (125); (3) וָרֶמֶשׂ (126); (4) וַיִּבְרָא (106); (5) אֹתָם (95); (6) וַיְבָרֶךְ (114); (7) פְּרוּ (116); (8) וּרְבוּ (117); (9) וּמִלְאוּ (118); (10) חַיָּה (103); (11) הָרֶמֶשֶׂת (110).

2. *NOTES.*

137. בְּצַלְמוֹ—b^{e}ṣăl-mô—*in-image-his*:

a. בְּ *in;* צַלְמ, *see* 132. *a;* וֹ *his,* as in לְמִינוֹ (72), זַרְעוֹ (73).

b. The accent over מ is disjunctive, cf. ֑ (132. *b*).

138. בְּצֶלֶם—b^{e}ṣĕ′-lĕm—*in-image-of:*

a. בְּ has D. l. because of preceding disjunctive accent, § **12.** 3.

b. This is the usual form of the noun, but צַלְמ (137. *a*) is the *primary* form, to which suffixes are attached. Cf. זֶרַע, but זַרְעוֹ (73); and so אֶרֶץ, but אַרְצוֹ, עֶרֶב, but עַרְבוֹ, נֶפֶשׁ, but נַפְשׁוֹ etc., § **109.** 4. *a, b.*

139. אֹתוֹ—′ô-0ô—)(*-him,* § **51.** 2.

140. זָכָר וּנְקֵבָה—zā-χār û-n^{e}ḳē-vâ(h)—*male and-female:*

a. זָכָר is a noun like אָדָם, with two tone-long vowels which were originally short, § **90.** 1. *a.*

b. Wâw Conj., before a consonant with š^{e}wâ, is וּ § **49.** 2.

c. The ending ה_ is the feminine affix, § **106.** 2. *c.*

141. לָהֶם—lâ-hĕm—*to-them,* §§ **47.** 5; **51.** 3. *b.* and N.

142. וְכִבְשֻׁהָ—w^{e}χĭv-šû′-hå—*and-subdue-ye-her:*

a. וְ *and;* כִּבְשׁ *for* כִּבְשׁוּ [cf. מִלְאוּ (118)] *subdue-ye* הָ *her;* the root being כָּבַשׁ.

b. ֻ is usually ŭ, but here a defective writing for וּ (û), the sign of the plural; ŭ is sounded as *u* in *put,* but û as *oo* in *tool.*

143. וּרְדוּ—û-r^{e}ḏû—*and-have-ye-dominion:*

a. On וְ see § **49.** 2; the accent ֫ over ד is disjunctive.

144. בִּדְנַת—bĭd-ğă0—*in-fish-of;* cf. בִּדְנַת (135):

a. בְּ has D. l., because of preceding disjunctive accent, § **12.** 3:

145. הִנֵּה—hĭn-nē—*behold!* an interjectional adverb.

146. נָתַתִּי—nâ-θăt'-tî—*I-have-given:*

a. D. f. in תּ is for נ assimilated, נָתַתִּי = נָתַנְתִּי; root נָתַן.

b. The ending תִּי =*I;* cf. אָמַר *he-said,* אָמַרְתִּי *I-said;* יָדַע *he-knew,* יָדַעְתִּי *I-knew;* מָשַׁל *he-ruled,* מָשַׁלְתִּי *I-ruled.*

147. לָכֶם—lâ-χĕm—*to-you* (m.):

a. Prep. has ֫, cf. לָמֶיִם (45), לָהֶם (141).

b. כֶם is the pronominal suffix for the 2d. pl. masc.

148. זֹרֵעַ זָרַע—zô-rē(ă)' zâ'-ră'—*seeding seed:*

a. זֹרֵעַ is the active participle of the Ḳăl stem—note the ô.

b. On ֫ under ע read § **42.** 2. *d.*

c. זָרַע is for זָרַע (69), on account of the accent (֫), § **38.** 2.

149. יִהְיֶה—yih-yê(h)—*he-(i. e., it)-shall-be:*

a. Observe the Méθĕğ with ֫ and that the šᵉwâ is silent, § **18.** 5.

b. Root, הָיָה; ' indicates Impf. cf. shortened form יְהִי (19).

150. לְאָכְלָה—lᵉ'ŏχ-lâ(h)—*for-food:*

a. The ֫ under א, in an unaccented closed syl. is ŏ, not â.

b. The root is plainly אָכַל *he-ate;* ה_ indicates fem.

3. *FORMS FOR SPECIAL STUDY.*

כְּבִשָׁה	אֹתָם	צַלְמֵנוּ	צֶלֶם	בְּצַלְמוֹ בְּצֶלֶם
כִּבְשָׁה	לָהֶם	אֹתוֹ	צַלְמוֹ	וְרֹדוּ בְּרַת

4. *OBSERVATIONS.*

79. When a disjunctive accent stands between a spirant and the

preceding vowel, the spirant does not *immediately* follow the vowel, and hence takes Dâğēš-lēnē.

80. Seğolates before suffixes take what is called their primary form, i. e., the original form of the noun, which had but one vowel, that vowel standing under the first radical.

81. The suffix meaning *him* is וֹ, *them* הֶם *or* ם.

82. The personal *pre*-fix 1 p. pl. meaning *we* is the letter נ; the pronominal *suf*-fix *our* is נוּ; *her* is הָ.

83. Syllables ending with laryngeals and having a short vowel followed by a compound Šᵉwâ are loosely closed; the Šᵉwâ eases the transition between the laryngeal and the following consonant.

5. *GRAMMAR-LESSON.*

1. § **52.** 1. *a*, *b*, *c*, and 2, The Demonstrative Pronouns.
2. § **53.** 1. *a*. *b*, The Relative Particle.
3. § **54.** 1, 2. *a*—*d*, The Interrogative Pronouns.

6. *WORD-LESSON.*

(110) אָדָם *man* (113) זָכָר *male* (116) צֶלֶם *image*

(111) דָּגָה *fish* (114) כָּבַשׁ *he-subdued* (117) רָדָה *he-subdued*

(112) דְּמוּת *likeness* (115) נְקֵבָה *female* (*had-dominion*)

7. *PRINCIPLES OF SYNTAX.—THE ARTICLE.*

הַמָּאוֹר הַגָּדֹל = *the-luminary the-great* = the great luminary.

הַמָּאוֹר הַקָּטֹן = *the-luminary the-small* = the small luminary.

Principle 1.—The adjective, when attributive, follows its noun, and, if the noun is definite, receives the article.

הַיּוֹם הַזֶּה = *the-day the-this* = this day.

הָאָרֶץ הַזֹּאת = *the-earth the-this* (f.) = this earth.

הַשָּׁמַיִם הָאֵלֶּה = *the-heavens the-these* = these heavens.

Principle 2.—The demonstrative pronoun, when attributive, follows its noun, *both noun and demonstrative receiving the article.*

8. *EXERCISES.*

1. To be translated into Hebrew:[1]—(1) *The great place;* (2) *The great heavens;* (3) *The good seed;* (4) *The good luminaries;* (5) *This male and this female;* (6) *These luminaries which* (are) *in the heavens;* (7) *This good place;*[2] (8) *These great luminaries;* (9) *This spirit* (f.), (10) *Who created man in his image?* (11) *Who made this light?* (12) *To whom* (are) *these heavens and this earth?* (13) *What did God create in beginning?*

2. To be translated into English: — (1) הָאֲדָמָה הַזֹּאת; (2) הַשָּׁנִים הָאֵלֶּה; (3) הַפְּרִי הַטּוֹב הַזֶּה; (4) הַיּוֹם הַגָּדֹל; (5) מַה־ לְמִי הַשֶּׁמֶשׁ; (6) מַה־קָּרָא לַיַּבָּשָׁה; (7) נָתַן אֱלֹהִים לָהֶם; (8) וְהַיָּרֵחַ אֱלֹהִים אֲשֶׁר הָאָרֶץ לוֹ.

3. To be written in English letters:—(1) זֶה, (2) זֹאת, (3) אֵלֶּה, (4) אֲשֶׁר, (5) מִי, (6) מָה, (7) זָכָר, (8) נְקֵבָה.

4. To be written in Hebrew letters:—(1) d·mûθ, (2) ğăθ, (3) dâ-ğâ(h), (4) lâ-hĕm, (5) 'ô-θô.

9. *TOPICS FOR STUDY.*

(1) Laryngeals with compound Š·wâ. (2) The vowel הֵ. (3) Accents ֒, ֑, ֫. (4) Loosely closed syllables. (5) Medial Š·wâ. (6) D. l. after a disjunctive accent. (7) Râfé. (8) Primary form of Seğolates. (9) אֵת, אֵת־, אֹתְ. (10) The vowel ־ֶ. (11) Demonstratives. (12) Relative. (13) Interrogatives. (14) Rule for attributive adjectives. (15) Rule for attributive demonstrative.

---

[1] In this and in following exercises, words making in Hebrew *one* word will not be joined together by hyphens.

[2] The order will be: (1) noun, (2) adjective, (3) demonstrative, the article being written with each word.

LESSON XVII—GENESIS I. 30, 31.

1. *NOTE-REVIEW.*

(1) עֵשֶׂב (67); (2) זֶרַע (69); (3) אֲשֶׁר־בּוֹ (73. *e*); (4) חַיִּת (128); (5) נֶפֶשׁ חַיָּה (102,103); (6) וַיַּרְא (22); (7) וַיְהִי־כֵן (36).

2. *NOTES.*

151. רוֹמֵשׂ—rô-mēś—*creeper* (literally, *creeping*):

a. Naturally long ô, tone-long ē; Ḳăl act. part., cf. זֹרֵעַ (148).

b. This ô (in Ḳăl act. part.) is seldom written fully, as here.

152. אֶת־כָּל־יֶרֶק—'ĕθ+kŏl+yĕ'-rĕḳ—)(+*every*+*greenness-of:*

a. On the short vowels ֲ and ֱ see § **17.** 2.

b. יֶרֶק, like אֶרֶץ and many others, is an *a*-class Seĝolate.

153. עָשָׂה—'å-śå(h)—*he-made:*

a. Ḳăl Perf. 3 m. sg.,—the *root-form* from which came וַיַּעַשׂ (46), and עֹשֶׂה (71).

154. מְאֹד—m*'ôd—*exceedingly:* an adverb.

155. הַשִּׁשִּׁי—hăš-šiš-šî—*the-sixth.*

3. *FORMS FOR SPECIAL STUDY.*

נָתַתִּי (*I*)	וְלִכָל־חַיַּת	אֶת־כָּל־עֵשֶׂב
לָכֶם (*you*)	וּלְכָל־עוֹף	אֶת־כָּל־יֶרֶק
בּוֹ (*him*)	וּלְכֹל רוֹמֵשׂ	אֶת־כָּל־אֲשֶׁר

4. *OBSERVATIONS.*

84. Note, in cases cited above, how ָ and ִ give place to ֱ and ֲ (ŏ), when, as when the word is joined by Măḳḳĕf to the following word, the tone has passed away from them.

85. The conjunction וְ is written וּ before a consonant with š*wâ.

86. תִּי = *I;* כֶם = *you;* וֹ for הוּ = *him.*

5. *GRAMMAR-LESSON.*

1. § **2.** 4, 5, 7, Pronunciation of צ, ט, ק.
2. § **3.** 2, 3, Letters with double forms, and with similar forms.
3. § **4.** 1, 2. Classification of Letters.
4. § **12.** 2, 3, Spirants with šᵉwâ preceding, with disjunctive accent preceding.
5. § **15.** 1, 3, Dâğĕš-fŏrtĕ compensative and conjunctive.
6. § **16.** 1, 2, Măppîḳ and Râfê.
7. § **26.** 2, N. 1. Sharpened syllables.

6. *WORD-LESSON.*

(118) אָכְלָה *food* (120) נָתַן *he-gave* (122) מְאֹד *exceedingly*

(119) הִנֵּה *behold* (121) יֶרֶק *greenness* (123) שִׁשִּׁי *sixth*

7. *PRINCIPLES OF SYNTAX.—THE ARTICLE.*

עַל־פְּנֵי הַמָּיִם = *upon+faces-of the-waters* = upon the face[s] of the waters.

רוּחַ אֱלֹהִים = *spirit-of God* = the spirit of God.

לְמִקְוֵה הַמָּיִם = *to-collection-of the-waters* = to the collection of waters.

כָּל־נֶפֶשׁ הַחַיָּה = *all+soul(s)-of the-life* = all the souls of life.

בִּדְנַת הַיָּם = *in-fish-of the-sea* = in the fish of the sea.

Principle 3.—The article cannot be prefixed to a noun in the construct state; if the article is needed, it is given to the noun following.

Principle 4.—If the second of the nouns in the construct relation is definite, because it is a proper noun, or because it has the article, the first noun is also to be regarded as *definite.*

8. *EXERCISES.*

1. To be translated into Hebrew:—(1) *I knew that thou* (m.) (art) *good;* (2) *I gave to the cattle and to the beast(s) of the earth grass and herb(s) for food;* (3) *The tree yielded* (Heb., *made*) *good fruit;* (4) *God gave to the fowl of the heavens the seed of the earth for food;* (5) (There) *was fruit in all the earth;* (6) *All that God made was exceedingly good.*

2. To be translated into English:—(1) בְּיוֹם אֶחָד עָשָׂה אֱלֹהִים
בַּיּוֹם הַשֵּׁנִי עָשָׂה אֶת־הָרָקִיעַ (2); בַּיּוֹם הַשְּׁלִישִׁי (3);
בַּיּוֹם הָרְבִיעִי נָתַן בִּרְקִיעַ (4); הָיְתָה הַיַּבָּשָׁה וַתּוֹצֵא עֵשֶׂב וָעֵץ
בַּיּוֹם הַחֲמִישִׁי בָּרָא אֱלֹהִים אֶת־עוֹף (5); הַשָּׁמַיִם אֶת־הַמְּאֹרֹת
בַּיּוֹם הַשִּׁשִּׁי עָשָׂה אֶת־הַבְּהֵמָה (6); הַשָּׁמַיִם וְאֵת דְּגַת הַיָּם
וַיִּבְרָא אֶת־הָאָדָם בְּצַלְמוֹ אֱלֹהִים.

3. To be written in English letters:—(1) אָכְלָה, (2) יֶרֶק, (3) זֹרֵעַ,
(4) יוֹם, (5) בְּקֶר, (6) כֵּן, (7) בֵּין.

4. To be written in Hebrew letters:—(1) hû, (2) xĕm, (3) hå,
(4) ḥ•mî, (5) xå, (6) nû, (7) 'ēllê.

LESSON XVIII.—REVIEW.

[*To the student*:—This lesson is a review of all that have preceded it. Nothing is so necessary, in the acquisition of a language, as constant and thorough review. One should carry forward with him at least nine-tenths of what he has learned. The first chapter of Genesis contains one hundred and two different words, and about four hundred and fifty different forms. The most common and most important principles of the language have been considered. Many additional principles might have been brought forward in connection with this chapter, but it has been deemed wise to hold them in reserve. It is understood that in no case will the student proceed to take up Lesson XVII., until this Lesson with all which it includes has been learned. Let every word, every verse, every principle be mastered absolutely.]

1. *WORD-REVIEW.*

[In this list of words, the superior figures indicate the verse in which the word, or its derivative, is found. In the case of nouns, the singular absolute is given, in the case of verbs, the root. The student is expected to compare with each word as here given, the various forms of that word which occur in the chapter, e. g., with הָיָה, he will compare הָיְתָה *she was*, יְהִי *let-(there)-be*, וַיְהִי *and-let-(there)-be*, וַיְהִי *and-(there)-was*, וְהָיוּ *and-they-shall-be*, יִהְיֶה *it-shall-be*.]

1. VERBS.

אוֹר*[15]	בָּרַךְ[22]	יָצָא[12]	נָתַן[17]	קָוָה[9]	רָדָה[26]
אָמַר[3]	דָּשָׁא[11]	כָּבַשׁ[28]	עוּף*[20]	קָרָא[5]	רָחַף[2]
בָּדַל[4]	הָיָה[2]	מָלֵא[22]	עָשָׂה[7]	רָאָה	רָמַשׂ[21]
בָּרָא[1]	זָרַע[11]	מָשַׁל[18]	פָּרָה[22]	רָבָה[22]	שָׁרַץ[21]

* The Infinitive form, see § 55, 3.

2. NOUNS, PARTICLES, ETC.

אָדָם[26]	בְּהֵמָה[24]	חֲמִישִׁי[23]	לְ[5]	עוֹף[20]	רָקִיעַ[6]
אַדָמָה[25]	בֵּין[4]	חֹשֶׁךְ[2]	לַיְלָה[5]	עַל[2]	שְׁלִישִׁי[13]
אוֹר[3]	בֹּקֶר[5]	טוֹב[4]	מְאֹד[31]	עֵץ[11]	שָׁמַיִם[1]
אוֹת[14]	גָּדוֹל[16]	יַבָּשָׁה[9]	מָאוֹר[14]	עֶרֶב[5]	שֵׁנִי[14]

אָכְלָה[29]	דֶּשֶׁא[26]	יָם[10]	מַיִם[2]	פָּנִים[2]	שְׁנַיִם[16]
אֶל[9]	הָיְתָה[11]	יֶרֶק[30]	מִין[11]	פְּרִי[11]	שֶׁרֶץ[20]
אֱלֹהִים[1]	הַ·[1]	כְּ[26]	מֶמְשָׁלָה[16]	צֶלֶם[26]	שִׁשִׁי[31]
אֶרֶץ[1]	הִנֵּה[29]	כּוֹכָב[16]	מִן[7]	קָטָן[16]	תְּהוֹ[2]
אֲשֶׁר[7]	וְ[1]	כִּי[4]	מִקְוֶה[10]	רֵאשִׁית[1]	תְּהוֹם[2]
אֵת[1]	זָכָר[27]	כֹּל[21]	מָקוֹם[9]	רְבִיעִי[19]	תָּוֶךְ[2]
בְּ[1]	זֶרַע[11]	כֵּן[7]	נֶפֶשׁ[20]	רוּחַ[2]	תַּחַת[7]
בָּהוּ[2]	חַיָּה[20]	כָּנָף[21]	נְקֵבָה[27]	רָמַשׂ[24]	תַּנִּין[21]

2. *VERSE-REVIEW.*

1. Pronounce the pointed text of each verse until it can be read aloud rapidly and without hesitation (see p.—).

2. Write out on paper the unpointed text, one verse at a time, and then, without the aid of either pointed text or translation, insert the necessary points and vowel-signs. Compare the result with the pointed text, and note the mistakes; repeat the exercise till each verse can be pointed without mistake (see p. —).

3. Write the Hebrew of the chapter, verse by verse, with only the English translation before the eye. Here also correct the result each time by the pointed text (see p. —).

4. Write the Hebrew of the chapter, verse by verse, from the transliteration, noting with care, in the case of each word, the exact English equivalent for each sign or character in the Hebrew (p. —).

3. *GRAMMAR-REVIEW.*

1. The alphabet, § **1.** 1-3.
2. Pron. of א, ע, ח, ק, § **2.** 1-4.
3. Pron. of ט, שׁ, צ, ו, § **2.** 5-8.
4. Extended, final, and similar letters, § **3.** 1-3.
5. Classification of letters, § **4.** 1, 2.
6. Pronunciation of ־ § **5.** 1.
7. Pron. of ־, § **5.** 6. *a.*
8. Vowel-letters, א, ו, י, § **6.** 1, 2, 3, and Notes 1-4.
9. Classificat'n of vowel-sounds, § **7.** 1-4.
10. Names of vowels, § **8.**
11. Simple Šᵉwâ, § **9.** 1.
12. Compound Šᵉwâ, § **9.** 2.
13. Initial Šᵉwâ, § **10.** 1, 2.
14. Silent Šᵉwâ, § **11.**
15. Dåǧēš-lēnē, § **12.** 1, and N. 1.
16. D. l. after a Šᵉwâ, § **12.** 2.
17. D. l. after a disj. acc., § **12.** 3.
18. Dåǧēš-fŏrtē, § **13.** 1, 2, and Note 1.
19. Omission of D. f., § **14.** 1-3. Notes 1, 2.
20. D. f. compensative and conjunctive, § **15.** 1, 3.
21. Măppîḳ and Råfê, § **16.** 1, 2.
22. Use of Măḳḳēf, § **17.** 1-2.
23. Méθěǧ, § **18.** 1.
24. More common accents, § **24.** 1-3.
25. Kinds of syllables, § **26.** 1, 2. N. 1. 2.
26. Syllabification, § **27.** 1-3.
27. Quantity of vowels in syllables, § **28.** 1-4.
28. Naturally long vowels, § **30.** (opening words) and Notes 1, 2, under § **30.** 7.
29. Tone-long vowels, § **31.** (opening words) and Notes 1, 2, under **31.** 3.
30. Peculiarities of laryngeals § **42.** 1-3.
31. The article, § **45.** 1, 2, 3, & R. 3.
32. Inseparable prepositions, §**47.** 1-5.
33. Wâw conjunctive, § **49.** 1-4.
34. Personal pron., § **50.** 1-3.
35. Pronominal suffixes, § **51.** 1. *a-c*, 2.
36. Demonstrative pronoun, § **52.** 1. *a-c*, 2.
37. Relative particle, § **53.** 1. *a, b.*
38. Interrogative pronouns, § **54.** 1, 2. *a-d.*
39. Roots, § **55.** 1, 2.
40. Inflection, § **57.** 1-3.
41. Tenses and Moods, § **57.** 3. Notes 1, 2.
42. Simple verb-stem, § **58.** 1, 2. *a-c.*
43. Gender of nouns, § **106.** 1, 2, *a, b.*
44. Number of nouns, § **106.** 3-5.
45. States of nouns, § **107.** 1, 2.

4. *EXERCISE.**

To be translated into Hebrew:—

1. *The name of the light is day, and the name of the darkness is night.*
2. *Waters, to waters, the waters, to the waters.*
3. *The earth will be seen beneath the heavens.*
4. *The day, in which is light.*
5. *The fruit, in which is seed.*
6. *The fruit is in the seed, and the seed is in the earth.*
7. *The sun will be seen in the heavens.*
8. *To cause-a-division between the day and the night.*
9. *And in the great day. The great stars.*
10. *The great luminary is the sun; the small luminary is the moon.*
11. *The sun and the moon are in the expanse of the heavens.*
12. *Thou art in the heavens, and I am upon the earth.*
13. *And God saw all which he had created, and it was good.*
14. *God created the earth, and he created the heavens.*
15. *The waters are in the seas and upon the earth.*
16. *His day, her day, my day.*
17. *The beast of the earth was upon the ground.*
18. *This good place.*
19. *These great luminaries.*
20. *God gave to the fowl of the heavens the seed of the earth for food.*

LESSON XIX.—GENESIS II. 1-3.

1. *NOTE-REVIEW.*

(1) הַשָּׁמַיִם (5); (2) וְהָאָרֶץ (8); (3) עָשָׂה (153); (4) אֹתָם (95); (5) כִּי (24); (6) בּוֹ (73); (7) אֲשֶׁר (48).

* These sentences are selected from preceding exercises.

2. *NOTES.*

156. וַיְכֻלּוּ—*and-*(they)*-were-finished;* cf.[1] וַיְבָרֶךְ (114), יָקֻוּ (55):

a. D. f. omitted from ו, § **14.** 2; וּ indicates the plural number.

b. The ◌ֻ, in verbal forms, always marks the *passive;* under the first radical it indicates the Pŭ'ăl (intensive passive) stem, § **58.** 4. *a. c.*

c. Root is כָּלָה, meaning in Pi'ēl, *finish,* in Pŭ'ăl, *be-finished.*

157. וְכָל־צְבָאָם—*and-all+host-their;* cf. אֶת־ גְּדֹלִים (89. *d*):

a. ָ acc. to § **49.** 1; ◌ֻ is ŏ, because in a closed syllable which has lost its tone, § **29.** 5.

b. צָבָא host, *but* צְבָאָם *host-their;* the original ◌ֻ which became ◌ָ in an open syl. before the tone, is reduced to ◌ְ when the tone moves farther away, § **36.** 2. *b.*

c. ◌ֶם is the pron. suf. of the 3 masc. plur., § **51.** 1.

158. וַיְכַל—*and-*(he)*-finished;* cf. וַיְבָרֶךְ, וַיְכֻלּוּ:

a. Shorter form for וַיְכַלֵּהוּ, the Pi'ēl of כָּלָה (156. *c*).

b. Two D. f.'s omitted: one from ה because without a full vowel, one from ל because final, § **14.** 1, 2.

159. בַּיּוֹם הַשְּׁבִיעִי—*in-the-day the-seventh:*

a. The accent ◌֑ over הַשְּׁבִיעִי marks the end of a *secondary section.* It is called Zāḳēf ḳāṭōn, i. e., little Zāḳēf, § **24.** 4.

160. מְלַאכְתּוֹ—*work-his;* cf. רֵאשִׁית, זֶרַע:

a. Abs. sg. מְלָאכָה; א has lost its consonantal force.

b. The original ◌ֹ of ל is retained unchanged because it is in a closed unaccented syl., § **29.** 1. *a.;* in the abs. form ◌ֹ is rounded to ◌ָ, being in an open, pretone syl.

c. The abs. has ◌ָה, but the form with suf. has ת, § **106.** 2. *a.*

161. וַיִּשְׁבֹּת—*and-he-rested;* cf. וַיִּקְרָא, וַיִּבְרָא:

[1] Every old word, suggested for comparison with the new word under consideration, has at least *one* important point in common with that new word.

a. This is the regular form of the Ḳăl Impf., the ֶ in יִקְרָא and יִבְרָא being due to the presence of the weak letter א.

b. The ָ in this word is ō (tone-long), not ô.

c. The root is plainly שָׁבַת *he-rested*, see below, 163.

162. וַיְקַדֵּשׁ—*and-he-sanctified;* cf. וַיְבָרֶךְ, וַיְכַל:

a. D. f. omitted from י, as in וַיְהִי, וַיְכֻלּוּ, וַיְבָרֶךְ, וַיְכַל.

b. The root is קָדַשׁ, meaning, as a verbal form, *he-was-holy.*

c. The first radical has ֶ, the second radical, D. f.; these indicate a Pī'ēl form; read §§ **58.** 3.; **65.** 2. *a. b.*

d. Compare each vowel-sound in יְקַדֵּשׁ and יְבָרֶךְ, and note that the latter has ֶ instead of ֵ, because ך refuses D. f., and ֶ instead of ֵ, because the accent is on the penult.

e. The root means *be-holy;* the Pī'ēl, here intensive or causative, means *make-holy, sanctify,* § **58.** 3. *c.*

163. שָׁבַת—*he-rested;* cf. בָּרָא, קָרָא, עָשָׂה:

a. Ḳăl Perf. 3 masc. sing. of the strong verb שָׁבַת.

164. לַעֲשׂוֹת—*to-make, i. e., in-making.*

a. The prep. ל with ַ, because of following laryngeal, § **47.** 3.

b. עֲשׂוֹת is a Ḳăl Inf. const. of עָשָׂה.

c. Further information concerning this form will be given later.

3. *FORMS FOR SPECIAL STUDY.*

יִשְׁבֹּת	מְאֹרֹת *but* מָאוֹר	יְבָרֶךְ *but* יְבָרֵךְ	
יִקְווּ	גְּדֹלִים *but* גָּדֹל	מְלַאכְתּוֹ *but* מְלָאכָה	
יְקַדֵּשׁ	אֲדָמָה *but* אָדָם	כָּל־ *but* כָּל	
יְכֻלּוּ	צְבָאָם *but* צָבָא	אֶת־ *but* אֵת	
יַבְדֵּל	כְּנָפַיִם *but* כָּנָף	זַרְעוֹ *but* זֶרַע	

4. *OBSERVATIONS*

87. Short vowels are retained in *closed* unaccented syllables.

88. In *open* unaccented syllables, short vowels give away to Š'wâ. This change is called *reduction.*

89. The Ḳăl Impf. has no special characteristic; unless one of the radicals is a weak letter, it generally has ō for the vowel of its second radical.

90. The Nĭf'ăl Impf. has D. f. in and ֣ under the first radical, while the other *passive* stem (Pŭ'ăl) has ֫ under the first radical and D. f. in the second.

91. The Pi'ēl Impf. has (besides D. f. in the second radical) ֣ under the first radical; the Hĭf'îl Impf. has ֣ under the preformative.

5. *GRAMMAR-LESSON.*

1. § **58.** 1. Simple verb-stem, Ḳăl.
2. § **60.** (& p. 195) Tabular view, Inflection of the Ḳăl Perfect.
3. § **60.** 1—3. Remarks on inflection.
4. § **36.** 2. *a.* Reduction of an ultimate vowel in verbal inflection.
5. § **36.** 2. N. 2. [This covers the reduction to ֫ in the forms

קְטַלְתֶּן, קְטַלְתֶּם.]

6. *WORD-LESSON.*

1. Learn from the Hebrew word-lists under List I., verbs occurring 500 to 5,000 times, those words numbered 1-10.
2. Make a list of the new words in Gen. II. 1-3.

7. *EXERCISES.*

1. To be translated into Hebrew:—(1) *I said, we said, she said, thou* (f.) *didst say, they said, ye* (m.) *said;* (2) *She ruled, they*

ruled, ye (f.) *ruled, I ruled, we ruled, thou* (m.) *ruledst;* (3) *They gave, we gave, I gave, she gave, thou* (m.) *gavest, he gave;* (4) *I knew, she knew, we knew, they knew, thou* (m.) *didst know.*

2. To be translated into Hebrew:—(1) *The heavens will be finished;* (2) *The waters will be collected;* (3) *God will sanctify the seventh day;* (4) *God rested in the seventh day;* (5) *He created the heavens and all their host;* (6) *He made the great luminaries;* (7) *He will rest in this day;* (8) *We rested, she rested, ye* (m.) *rested, they rested.*

3. To be translated into English:—(1) מִי שָׁבַת מִכָּל־מְלַאכְתּוֹ; (2) זֶה שָׁבַתִּי בַּיּוֹם הַשִּׁשִּׁי; (3) מִי יִשְׁבֹּת בַּיּוֹם הַשְּׁבִיעִי; (4) הַיּוֹם הַשְּׁבִיעִי אֲשֶׁר־בּוֹ שָׁבַת אֱלֹהִים.

4. To be written in English letters:—*The first three verses of Genesis II., from the pointed text.*

5. To be written with points and vowel-signs:—*The first three verses of Genesis II., from the unpointed text.*

8. *TOPICS FOR STUDY.*

(1) Omission of D. f. (2) Characteristics of Pŭ'ăl stem. (3) Reduction of a penultimate vowel, of an ultimate vowel. (4) The Ḳăl Imperfect. (5) The Pī'ēl Imperfect. (6) Retention of short vowels. (7) Difference between the vowels of שָׁבַת and בָּרָא, וַיְקַדֵּשׁ and וַיְבָרֶךְ. (8) Original form of the simple verb-stem. (9) Form in use. (10) Its inflection. (11) Forms of the Ḳăl Perf. containing Šᵉwâ. (12) The various personal termination and their origin.

LESSON XX.—GENESIS II., 4-6.

1. *NOTE-REVIEW.*

(1) אֶרֶץ (62); (2) יְהוָה (149); (3) הָאֲדָמָה (129); (4) פְּנֵי (13).

2. NOTES.

165. אֵלֶּה—*these;* cf. זֶה (m.), זֹאת (f.).

166. תּוֹלְדוֹת—*generations-of;* cf. מוֹעֲדִים, מְאֹרֹת:

a. Plur. fem., never found in sing.; two syllables.

b. Absence of D. l. in ך because preceding šᵉwâ is vocal, § **12.** 2.

c. Three spirants; both *o*'s are ô, not ō.

167. בְּהִבָּרְאָם—*in-being-created-their;* cf. יִקָּווּ, צְבָאָם:

a. בְּ pointed with šᵉwâ; ־ָם same as in צְבָאָם (157).

b. It is קָטַל, but קָטְלָה; so הִבְרִא, but הִבָּרְאָם, i. e., the ultimate vowel is reduced when ־ָם is added, § **36.** 2. *a.*

c. הִבָּרְא has D. f. *in* and ֫ *under* the *first* radical, the characteristics of the Nif'ăl or passive stem, § **72.** R. 2.

d. This is an Inf. const. governed by the prep. בְּ.

e. The small ה written above the line is a traditional writing handed down by the Massoretic Editors (§ **19.**).

168. עֲשׂוֹת—*to-make,* or *making-of:* see 164.

169. יְהוָה—Written *Jehovah* in the Revised English Bible. But this pronunciation is due to an error dating as far back as the 14th. century A. D. The present vocalization of the Hebrew name is due to the later Jewish reverence for the ancient name of their God, which made them fear to pronounce it. The original pronunciation seems to have been יַהְוֶה. For this, the later Jews regularly substituted אֲדֹנָי, *Lord.* In order to remind themselves of this change, they regularly point יהוה not with its own vowels, but with those of אֲדֹנָי, (*Lord*) as here, thus indicating that אֲדֹנָי should be pronounced, and not יַהְוֶה.

170. שִׂיחַ—*shrub-of:* one syllable, § **27.** 1; cf. רוּחַ.

171. הַשָּׂדֶה—*the-field;* cf. עָשָׂה, יִהְיֶה:

a. The accent ֥ over הַשָּׂדֶה, like ֣ over הַשְׁבִּיעֵי (159. *a*), *marks* a secondary section. It is called Rᵉvî(ă)', § **24.** 5. *b.*

172. טֶרֶם—ṭĕ'-rēm—*not-yet:* an adverb.

173. יִצְמַח—(he) *will-sprout-forth;* cf. יִשְׁבַּת:

a. Ḳăl Impf. 3 m. sg. of צָמַח *he-sprouted-forth.*

b. The ֶ under מ is pausal for ֵ, § **38.** 2.

c. This verb has ֵ (in pause ֶ) rather than ַ, as seen in יִשְׁבַּת, because of the laryngeal ח, § **42.** 2. *b.*

174. לֹא—lô'—*not;* cf. זֹאת, יֹאמַר.

175. הִמְטִיר—(he) *had-caused-to-rain;* cf. מַבְדִּיל, הַבְדִּיל:

a. Here are three radicals, making מָטַר *he-rained.*

b. The prefix הִ (originally הַ) indicates the Hĭf'îl Perfect, § **58.** 5. *a. b;* and § **59.** 3.

c. Cf. the vowel of the preformative in the forms יַבְדֵּל, תַּדְשֵׁא, מַבְדִּיל, הַבְדִּיל, מַזְרִיעַ, with that in הִמְטִיר, § **72.** R. 6.

176. אַיִן—a noun meaning *nothing,* but always used as a predicate, *there is not, there was not;* hence the phrase means *and man was not,* or *and there was no man.*

177. לַעֲבֹד—*to-serve;* cf. לִמְשֹׁל, לַעֲשׂוֹת:

a. The עֲבֹד is Ḳăl Inf. const. of עָבַד *he-served;* but ע has ֲ, where מ of מְשֹׁל, a similar form, has ְ, because it is a laryngeal, § **42.** 3. *a.*

b. The prep. ל takes ַ, as in לַעֲשׂוֹת, according to § **47.** 3.

178. וְאֵד—w°'-ēd—*and-(a)-mist.*

179. יַעֲלֶה—(he) *will-go-up,* or (he) *used-to-go-up;* cf. יְהִיֶה:

a. י is the pref. of the Impf.; the root is עָלָה *he-went-up.*

b. The vowel under י in יִשְׁבַּת and יִצְמַח is ִ, but in this word it is ַ, because of the following ע, § **42.** 2. *a.*

c. Just as an original ִ is retained under the preformative of all Hĭf'îl forms except the Perfect, where it has been *attenuated* (§ **36.** 3) to ְ (cf. הִמְטִיר), so an original ַ has been retained

under the performative of the Ḳăl Impf. *before laryngeals*, where otherwise it is attenuated to ־ֶ.

d. In יִשְׁבֹּת the first rad. has ־ֶ, but in יַעֲלֶה it has ־ַ, § **42.** 3. *b*.

e. The Imperfect here expresses customary action in past time.

180. מִן־—*from:* so written only before the article; cf. מִ, מֵ, מֶ, § **48.** 1, 2.

181. וְהִשְׁקָה—*and-used-to-cause-to-drink;* cf. הַמְטִיר׃

a. Another Hīf'īl Perf., as indicated by הָ; root שָׁקָה.

b. The וְ here is Wâw Conv., and gives to the verb the force possessed by יַעֲלֶה, which preceded it, § **70.** 1. *b*, 2. *b*.

3. *FORMS FOR SPECIAL STUDY.*

רוּחַ	יִקְרָא	הַמְטִיר	עֲשׂוֹת
רָקִיעַ	יִשְׁבּוֹת	הַשְׁקָה	לַעֲבֹד
מַזְרִיעַ	יִצְמַח	יַבְדִּיל	יַעֲלֶה
שְׂיחַ	יַעֲלֶה	תַּרְשֵׁא	יִצְמַח

4. *OBSERVATIONS.*

92. A laryngeal will take (1) *under* it a compound instead of a simple šᵉwâ; and (2) *before* it the vowel ־ַ rather than ־ָ or ־ֳ.

93. The Hīf'īl stem has, under the preformative, the vowel ־ַ except in the Perfect, where it has been *attenuated* to ־ֶ (cf. Latin *facilis*, but *difficilis*).

94. The vowel of the preformative in the Ḳăl Imperfect was originally ־ַ, but this has been retained only before laryngeals, being elsewhere attenuated to ־ֶ.

95. The Ḳăl Imperfect may have for its stem-vowel either ō, or ă. In the cases cited above, note how ־ַ before א and in pause has been rounded to ־ָ, while before ה it has become ĕ.

96. Păθăḥ-furtive creeps in under the final laryngeals ח, ה, ע, when they are preceded by any long vowel except ־ֵ.

5. *GRAMMAR-LESSON.*

1.	§ **58.** 3. *a, b, c.*	Origin and use of the Pī'ēl stem.
2.	§ **58.** 4, *a, b, c.*	Origin and use of the Pŭ'ăl stem.
3.	§ **58.** 7 *a, b, c.*	Origin and use of the Hīθpă'ēl st.
4.	§ **62.** 1. *b*, 2. *a, b*, (& pp. 194, 195)	Inflection of these stems in Perf.
5.	§ **36.** 3. *a, b.*	Attenuation of ־ֵ to ־ֶ

6. *WORD-LESSON.*

1. In the Word-Lists, under List I., the verbs numbered 11—20.
2. Make a list of the new words in Genesis II. 4—6.

7. *EXERCISES.*

1. To be translated into Hebrew:—(1) *He sanctified* (קִדֵּשׁ, Pī), *we sanctified, they sanctified, I sanctified, ye* (m.) *sanctified;* (2) *She spoke* (דִּבֶּר in Pī'ēl), *I spoke, we spoke, they spoke, thou* (f.) *didst speak, ye* (m.) *did speak;* (3) *He was sanctified* (Pŭ'ăl), *I was sanctified, we were sanctified, they were sanctified;* (4) *She purified herself* (קִדֵּשׁ in Hīθpă'ēl), *we purified ourselves, they purified themselves, I purified myself.*

2. To be translated into Hebrew:—(1) *Yahweh God sanctified this day and this place;* (2) *This* (is) *the day which God sanctified;* (3) *These* (are) *the heavens and the earth which God created;* (4) *The shrub and the herb will be in the field;* (5) *There was no man upon the earth in those days;* (6) *God did not cause it to rain upon the dry* (land); (7) *The herb will sprout forth upon the field;* (8) *These generations;* (9) *This earth;* (10) *This day.*

3. To be translated into English:—(1) קִדַּשְׁתִּי אֶת־הַיּוֹם; (2)

הִמְשִׁיל אֱלֹהִים אֶת־הָאָדָם (3) נָתַתָּ לוֹ אֶת הָאָרֶץ הַזֹּאת בָּרָא אֶת־הָאָדָם (4) בְּרֵגַת הַיָּם וּבְעוֹף הַשָּׁמַיִם וּבְכָל־הָאָרֶץ לַעֲבֹד אֶת־הָאֲדָמָה.

4. To be written in English letters:—*Verses* 4—6 *of chapter II. from the pointed text.*

5. To be written with points and vowel-signs:—*Verses* 4—6 *of chapter II. from the unpointed text.*

8. *TOPICS FOR STUDY.*

(1) Forms of the Dem. pron. (2) Use of D. l. (3) Reduction of an ultimate vowel in verbal forms. (4) Characteristics of the Nif'ăl. (5) The word יהוה. (6) Păθăḥ-*furtive.* (7) The difference in pointing between יִשְׁבֹּת and יִצְמַח, between יִשְׁבֹּת and יִקְרָא, between יִשְׁבֹּת and יַעֲלֶה. (8) Attenuation of ־ to ־. (9) Hif'îl Perfect. (10) לֹא, אַיִן and טֶרֶם. (11) Difference between עָבַד and מָשַׁל. (12) Force of the tense in יַעֲלֶה. (13) Peculiarities of laryngeals. (14) The origin, use, and inflection of the three intensive stems. (15) The form קִטְלָה. (16) The form קִטַלְתֶּם. (17) Rounding of vowels. (18) The Personal pronoun.

LESSON XXI.—GENESIS II. 7-9.

1. *NOTE-REVIEW.*

(1) יְהוָה (169); (2) מִן־ (180); (3) נֶפֶשׁ חַיָּה (102,103); (4) כָּל־ (108); (5) בְּתוֹךְ (41); (6) עֵץ (70); (7) טוֹב (24).

2. *NOTES.*

182. וַיִּיצֶר—*and-*(he)*-formed;* cf. וַיֹּאמֶר:

a. The first י is the preformative, the second, the radical.

b. Ḳăl Impf. 3 m. sg. of the root יָצַר *he-formed.*

c. The ֲ under צ is ĕ; consideration of it may be postponed.

183. עָפָר—*dust:* with the article it would be הֶעָפָר, § **45.** 4.

184. וַיִּפַּח—*and-he-breathed;* cf. יִצְמַח: מִתַּחַת

a. For יִנְפַּח, the נ being assimilated; root נָפַח.

b. On ִ instead of ַ before ח see § **42.** 2. *b.*

185. בְּאַפָּיו—b^{e}'ăp-pâw—*in nostrils-his:*

a. אַף *nose;* אַפַּיִם *nostrils;* אַפָּיו *his-nostrils.*

b. Learn that יו־, pronounced âw (the ו having no force), is the form of 3 masc. sg. suf. when attached to plural or dual nouns.

c. The D. f. in פ stands for נ, the original form being אַנְפַּ.

186. נִשְׁמַת—nĭš-măθ—*breath-of; cf.* דְּגַת, חַיַּת:

a. Abs. sg. is נְשָׁמָה, but in const. ה־ goes back to the orig. ת־; the other changes will come up later.

187. חַיִּים—*lives;* cf. חַיָּה *life, beast.*

188. וַיִּטַּע—*and-*(he)*-planted;* cf. יִפַּח:

a. So far as concerns vowels and form, the same as וַיִּפַּח (184); from the root נָטַע *he-planted.*

189. גַּן—*garden;* cf. below in v. 9 הַגָּן *in pause.*

190. מִקֶּדֶם—mīḳ-ḳĕ'-dĕm—*from-east;* cf. עֶרֶב:

a. The prep. מִן with נ assimilated, § **48.** 1.

b. An *a*-class Seğolate, primary form קַדְמ, § **89.** 1. *a.*

191. וַיָּשֶׂם—*and-he-put:* learn (1) this form, (2) its meaning, (3) its root שִׂים *to-put.*

192. שָׁם—*there:* an adverb.

193. יָצָר—*he-formed,* or *he-had-formed;* cf. וַיִּיצֶר:

a. Pausal for יָצַר, the root form, see 182. *b.*

194. וַיַּצְמַח—*and-*(he)*-caused-to-sprout-forth;* cf. וַיַּבְהֵל:

a. Cf. with Ḳăl יִצְמַח (173), which has ֲ under ו instead of ַ,

b. The ֵ under the preformative is the indication of the Hĭf'îl (except in Perf.).

c. יַבְדֵּל has ֵ under 2d rad., but יַצְמַח has ַ; why? § **42.** 2. *b.*

d. Hĭf. Impf. 3 m. sg. of the root צָמַח *he-sprouted.*

195. נֶחְמָד—nĕḥ-mâḏ—*desirable,* or *desired:*

a. The Šᵉwâ, though under a laryngeal, is silent.

b. The root is חָמַד, נ indicating a Nĭf'ăl.

c. On the vowel ֶ see § **42.** 2. c; on ֵ, § **68.** 2.

196. לְמַרְאֶה....לְמַאֲכָל—*for-sight....for-food:*

a. Two nouns formed by the prefix מ; cf. מָקוֹם, מְקוָה; § **96.** 1.

b. The roots are רָאָה *he-saw,* אָכַל *he-ate.*

197. הַחַיִּים—hă(ḥ)-ḥăy-yîm—*the-lives;* cf. הַחַשֶּׁךְ:

a. The D. f. of the article is implied in ח, §§ **42.** 1. *b;* **45.** 2.

b. Mĕθĕğ on the second syllable before the tone.

198. הַדַּעַת—*the-knowing* — a verbal noun from יָדַע *he-knew,* with the article pointed as usual; it has here a direct object.

b. A one-vowel noun originally; the final ă is a helping vowel.

199. וְרָע—wâ-rā'—*and-evil;* cf. וְבֹהוּ:

a. Wâw Conj., before a tone-syllable, takes sometimes ֵ, § **49.** 4.

b. רָע, instead of רַע, because in pause, § **38.** 2.

3. *FORMS FOR SPECIAL STUDY.*

בֹּקֶר	עֵשֶׂב	דֶּשֶׁא	אֶרֶץ	נֶפֶשׁ
חֹשֶׁךְ	עֵדֶן	שֶׁרֶץ	עֶרֶב	קֶדֶם

4. *OBSERVATIONS.*

97. Nouns with two vowels, and having an accented ֶ as their first vowel, are *always a*-class Seğolates, the ĕ being a deflection of an original ă.

98. Nouns with two vowels, and having an accented ֶ as their

first vowel, are *always* *i*-class Seğolates, the ē coming from an original ī.

99. Nouns with two vowels and having an accented ֵ for their first vowel, are *always* *u*-class Seğolates, the ō coming from an original ŭ.

100. The final unaccented ֶ in all these nouns is merely an inserted helping-vowel (§ 37. 2).

5. *GRAMMAR-LESSON.*

1. § 58. 5*a*. *b*. *c*, Origin and use of the Hīf'īl stem.
2. § 62. 2. *c*, Inflection of this stem (cf. p. 194.)
3. § 89. 1, Origin of Seğolates.
4. § 36. 2*a*. *b*. N. 1, Changes of ă, ĭ, ŭ, due to the tone.

6. *WORD-LESSON.*

1. In the Word-Lists, Lists I. and II., the verbs numbered 21—30.
2. Make out a list of the new words in Genesis II. 7—9.

7. *EXERCISES.*

1. To be translated into Hebrew:—(1) *He caused to rain, they caused to rain, I caused to rain, we caused to rain;* (2) *He caused to kill, she caused to kill, they caused to kill, ye* (m.) *caused to kill;* (3) *He divided* (Hīf. of בָּדַל), *she divided, they divided, I divided, we divided.*

2. To be translated into Hebrew:—(1) *And God breathed into his nostrils;* (2) *In the garden which God planted in Eden was fruit;* (3) *This fruit was good for food;* (4) *The good fruit;* (5) *The evil fruit;* (6) *The good tree and the evil tree;* (7) *And he caused to sprout forth grass and herb*(s) *and tree*(s).

3. To be translated into English: — (1) הִבְדִּיל אֱלֹהִים בֵּין הָעֵץ אֲשֶׁר בְּתוֹךְ הַגָּן עֵץ הַחַיִּים (2) הַטּוֹב וּבֵין הָרָע;

נָתַן אֱלֹהִים אֶת־הָאָדָם בַּגַּן אֲשֶׁר (4) ;נָטַע אֶת־הָעֵץ בַּגָּן (3)
הַבְדֹּלָה (5) ;נָטַע וַאֲשֶׁר־בּוֹ הִצְמִיחַ כָּל־עֵץ נֶחְמָד לְמַרְאֶה
הִבְדִּלְתֶּם ,הִבְדִּלָנוּ ,הִבְדִּילוּ .

4. To be written in English letters:—*Verses 7—9 of chapter II., from the pointed text.*

5. To be written with points and vowel-signs:—*Verses 7—9 of chapter II., from the unpointed text.*

8. *TOPICS FOR STUDY.*

(1) Assimilation. (2) The vowels ◌ַ and ◌ֶ in the stem of the Ḳăl Imperfect. (3) Pronunciation and meaning of the affix יִ֫ן־. (4) The root *to-put*, the form *and-he-put*. (5) Difference between יַבְדֵּל and יַצְמַח. (6) מ as a prefix in the formation of nouns. (7) A-class Seğolates. (8) I-class Seğolates. (9) U-class Seğolates. (10) Origin, use and inflection of the Hĭf'îl stem. (11) Effect of tone upon vowels. (12) The helping-vowel ĕ.

LESSON XXII.—GENESIS II. 10-12.

1. *NOTE-REVIEW.*

(1) מְלַאכְתּוֹ (160); (2) וַיִּשְׁבֹּת (161); (3) תּוֹלְדוֹת (166); (4) יִצְמָח (173); (5) יַעֲלֶה (179).

2. *NOTES.*

200. נָהָר—*and-*(a)*-river;* cf. אָדָם ,כֶּנֶף:

a. This noun belongs to a large class, formed from the root by means of two primary short vowels, both of which, the one *before*, and the other *under*, the tone, have undergone change, § **90.** 1. *a.*

201. יֵצֵא—*yô-ṣē'—going-forth,=goes-forth;* cf. רֶמֶשׂ:

a. The active participle of Ḳăl, used, as often, for a present tense.

b. The first vowel is ô, not ō; the root, יָצָא *he-went-forth.*

202. מֵעֵדֶן—*from-Eden;* cf. מֵעַל, § **48.** 2; עֵשֶׂב, § **89.** 1. *b:*

a. Note the Zâḳēf-ḳâṭōn (֥); it marks the end of a secondary section and also the accent of מֵעֵדֶן, cf.. 159. *a.*

203. לְהַשְׁקוֹת—*to-cause-to-drink,* i. e., *to-water;* cf. עֲשׂוֹת, הַבְדִּיל:

a. Like הַבְדִּיל, this word has the pref. הַ; it is Hĭf. Inf. const.

b. Like עֲשׂוֹת, it ends in וֹת.

c. Cf. also the Hĭf. Perf. 3 m. sg. הִשְׁקָה (181).

204. וּמִשָּׁם—*and-from-there;* cf. וּבֵין, מִתַּחַת.

205. יִפָּרֵד—*it-will-be-divided,* or *it-divides-itself:*

a. D. f. *in* and â *under* פ indicate at once the Nĭf'ăl.

b. The root is פָּרַד; Nĭf. Perf., נִפְרַד; cf. יָקוּם (55).

206. לְאַרְבָּעָה—*for-four;* cf. רְבִיעִי *fourth.*

207. רָאשִׁים—rā(')šîm—*heads:* an irregular plural from רֹאשׁ.

a. א here is silent, as always after a vowel.

208. שֵׁם—šēm—*name:* same as the proper name *Shem.*

209. הַסֹּבֵב—*the-*(one)*-surrounding;* cf. רֹמֵשׂ, יֹצֵא:

a. On ֥ see 171. *a.*

210. הַחֲוִילָה—hă(ḥ)-ḥᵉwî-lâ(h)—*the-Havilah:*

a. The *article* here belongs really to אֶרֶץ, the phrase = *all the land of Havilah,* not *all land of the Havilah,* see Principle 3 (p. 63).

211. אֲשֶׁר־שָׁם—*which+there,= where;* cf. אֲשֶׁר־בּוֹ = *in which.*

212. זָהָב—*gold:* A noun like נָהָר, אָדָם, כָּנָף, § **90.** 1. *a.*

213. וְזָהָב—û-zᵊhāv—*and-gold-of:*

a. The Wâw, before a consonant with šᵉwâ is וְ, § **49.** 2.

b. Comp'd šᵉwâ, under וְ, preceding a laryngeal, § **32.** 3. *d.*

c. Méθěğ with וְ before compound šᵉwâ, § **18.** 3.

d. זָהָב differs from זָהָב in that the form is treated as if the

accent had passed from it to the following word. This is virtually true, for the noun is in the construct state, § **107.** (opening words); § **109.** 3. *a*, *b*. The ground-form of the noun is זָהָב. In the absolute, both vowels are rounded to å, because of tonal influence, one being under the tone and the other in an open syl. before the tone. In the construct, the final ă remains unchanged, being in a closed, unaccented syl. but the preceding ă is reduced to šᵉwâ, being in an open unaccented syl.

e. Cf. נָהָר abs., *but* נְהַר const.; כָּנָף abs., *but* כְּנַף const.

214. הַהוּא—hă(h)-hî' (*not* hă(h)-hĭw')—the-that; cf. הַחֹשֶׁךְ:

a. הוּא is archaic for הִיא, § **50.** 3. *a;* here used as a Demonstrative, § **52.** 2.

b. The Demonstrative follows its noun, *and has the article.*

c. ה being a laryngeal implies the doubling; hence ă of the article is only *apparently* in an open syl.

215. הַבְּדֹלַח—hăb-bᵉḏō'-lăḥ—*the-bdellium.*

216. אֶבֶן הַשֹּׁהַם—'ĕ'-vĕn hăš-šō'-hăm—*stone-of the-onyx:*

a. Two Seğolates,—one *a*-class, one *u*-class.

b. Helping-vowel in first is ֱ, in second, after ה, ֲ, § **37.** 2. *a.*

3. *FORMS FOR SPECIAL STUDY.*

יָצָא	הָאָדָם	חַיָּה abs., but חַיַּת *const.*
סָבַב	וְזָהָב	נְשָׁמָה abs., but נִשְׁמַת *const.*

4. *OBSERVATIONS.*

101. The *o* of the Ḳăl active Participle is ô, not ō.

102. Note, in the words cited above, Méθěğ written (1) on second syl. before the tone, (2) with a vowel before compound šᵉwâ.

103. The original fem. ending in Hebrew was ◌ַת; but this has been weakened to ◌ָה, except where something closely follow-

ing protects it. On account of the following noun, it is preserved in the construct state.

5. *GRAMMAR-LESSON.*

1. § **62.** Table,	General view of the Verb-stems.
2. § **62.** R's 1—4,	Changes from original vowels.
3. § **58.** 2. *a, b, c.*	Origin and use of the Nĭfăl stem.
4. § **58.** 6. *a, b, c.*	Origin and use of the Hŏfăl stem.
5. § **62.** 1. *a, c.*	Inflection of the Nīfăl and Hŏfăl perfects.

6. *WORD-LESSON.*

1. In the Word-Lists, under List II., verbs numbered 31—40.
2. Make out a list of the new words in Genesis II. 10—12.

7. *EXERCISES.*

1. To be translated into Hebrew:—(1) *Thou* (m.) *wast caused to divide, I was caused to kill, we were caused to kill;* (2) *He was killed, they were killed, she was killed;* (3) *Thou* (m.) *wast sanctified* (Nif.), *ye* (f.) *were sanctified, they were sanctified;* (4) *We were kept, thou* (f.) *wast kept, she was kept.*

2. To be translated into Hebrew:—(1) (The) *river of that land is* (a) *great river;* (2) (The) *name of that river is Euphrates;* (3) *The river which goes forth from Eden will be divided;* (4) (The) *gold of* (the) *land of Havilah is good gold;* (5) *Thou shalt call the river which surrounds* (=the one surrounding) *that land Pishon.*

3. To be translated into English:—(1) כּוֹכָב קָטֹן אֶחָד; (2) נָהָר גָּדֹל יָצָא מֵעֵדֶן; (3) שֵׁם הַנָּהָר הוּא עֵדֶן; (4) יְצַרְתָּ אֶת־הָאָדָם עָפָר מִן־הָאֲדָמָה; (5) סֹבֵב אֶת־הָאָרֶץ אֲשֶׁר־שָׁם זָהָב לֹא יָדַעְתִּי הַמָּקוֹם אֲשֶׁר שָׁם הוּא עֵדֶן; (6) תִּשְׁבְּתִי בַּיּוֹם הַשְּׁבִיעִי.

4. To be written in English letters:—*Verses* 10—12 *of chapter II., from the pointed text.*

5. To be written with points and vowel-signs:—*Verses* 10—12 *of chapter II., from the unpointed text.*

6. To be written:—(1) The verbs שָׁמַד, פָּרַד, and מָשַׁל in the perf. 3 m. sg. of the Nifăl; (2) the verbs שָׁמַר, מָלַךְ, and לָמַד in the perf. 1st p. plur. of the Hŏfăl.

8. *TOPICS FOR STUDY.*

(1) Nouns formed by prefixing מ. (2) Nouns which had originally two short vowels. (3) A-class, I-class and U-class Seğolates. (4) The vowels of the Ḳăl Part. act. (5) A comparison of הַשְׁקוֹת with הַבְדִּיל and עֲשׂוֹת. (6) The word meaning *he-was-divided.* (7) The construct state of nouns like נָהָר, זָהָב, etc. (8) The construct state of Seğolates. (9) The two forms of the fem. ending ־ָה, and ־ַת. (10) Méθěğ. (11) The original forms of the various Perfect stems.

LESSON XXIII.—GENESIS II. 13-14.

1. *NOTE-REVIEW.*

(1) מֵעֵדֶן (202); (2) לְמַאֲכָל (196); (3) יְצָמֵחַ (173); (4) יַעֲלֶה (179); (5) וַיִּשְׁבֹּת (171); (6) יִפָּרֵד (205).

2. *NOTES.*

217. חִדֶּקֶל—ḥĭd-dĕ'-ḳĕl—*Tigris.* This name is written *I-dig-lat* in the Assyrian inscriptions.

218. הַהֹלֵךְ—hă(h)-hô-lēX—*the-*(one)*-going;* cf. הַסֹּבֵב:

a. D. f. of article is implied in ה, cf. הַהוּא (214), § **45.** 2.

b. Ḳăl act. Part. (ô, not ō) of הָלַךְ *he-went.*

219. קִדְמַת—ḳĭd-măθ—*eastward-of;* const. of קֶדֶם:

a. The original ־ַת is retained in the const. state, § **106.** 2. *a.* (3)

b. A fem. form related to קֶדֶם (190).

220. הוּא פְּרָת—*is Euphrates.*

3. *FORMS FOR SPECIAL STUDY.*

הוּא הַסּוֹבֵב	קִדְמַת	שֵׁם־הַנָּהָר
הוּא הַהוֹלֵךְ	הָרְבִיעִי	וְשֵׁם הַנָּהָר

104. Note in words cited above, Mĕθĕğ written (1) with a tonal vowel in a closed syl. before Maḳḳēf, (2) with Ḳāmēṣ before a vocal Šʿwâ, (3) with a primary short vowel (ă) before a laryngeal with doubling implied.

105. Note that the participle often serves as the equivalent of a relative clause.

5. *GRAMMAR-LESSON.*

§ **63.** Tabular View.	Inflection of Ḳăl Imperfect (active).
§ **63.** R. 1.	Various prefixes and affixes used.
§ **63.** R. 2.	Original Stem of the Kăl Imperfect.
§ **63.** R. 3, 4.	The terminations ־, וּ and ־נָה.

6. *WORD-LESSON.*

Make out a list of the new words in Genesis II, 13-14.

7. *PRINCIPLES OF SYNTAX.—THE PERSONAL PRONOUN*

הוּא הַסּוֹבֵב He [or IT] (is) the (-one-) surrounding.

וְזָהָב הָאָרֶץ הַהִוא And the gold of THAT land.

וְהַנָּהָר הָרְבִיעִי הוּא פְּרָת And the fourth river IS Euphrates.

Principle 5.—The personal pronoun besides (1) its ordinary use as a *personal* pronoun, may have (2) the force of a remote demonstrative pronoun (*that*), and (3) the force of a *copula*, i. e., to mark the relation between the subject and the predicate.

8. *EXERCISES.*

1. To be translated into Hebrew:—(1) *He will rest, I shall rest, we shall rest, they will rest, thou* (f.) *shalt rest;* (2) *They* (m.) *will swarm, he will swarm, she will swarm, they* (f.) *will swarm, ye* (m.) *shall swarm;* (3) *He will call, she will call, I shall call, we shall call, thou* (m.) *shalt call;* (4) *He will plant, I shall plant, thou* (m.) *shalt plant, she will plant, they will plant;* (5) *He will give, she will give, I shall give, we shall give, thou* (m.) *wilt give.*

2. To be translated into Hebrew:—(1) *The river which surrounds* (the) *land-of Cush is Gihon;* (2) *The river which goes eastward-of Assyria is Euphrates;* (3) (The) *name-of the great river is Tigris;* (4) *She will rest in* (the) *land-of Havilah;* (5) *We shall give that land.*

3. To be translated into English:—(1) הָאָרֶץ הַהוּא קְדֵמַת הַנָּהָר הַהוּא הַסּוֹבֵב אֶת־כָּל־אֶרֶץ כּוּשׁ (2) אַשּׁוּר; (3) יִשְׂרְצוּ הַמַּיִם שֶׁרֶץ נֶפֶשׁ (4) שָׁבַת אֱלֹהִים בַּיּוֹם הַהוּא מִכָּל־מְלַאכְתּוֹ; (5) יִפְרֵד הַנָּהָר הַגָּדוֹל וְהָיָה לְאַרְבָּעָה רָאשִׁים.

4. To be written in English letters:—*Genesis II* 13-14 *from the pointed text.*

5. To be written with points and vowel-signs:—*Genesis II,* 13-14, *from the unpointed Hebrew text.*

6. To be written:—The verbs שָׁבַת and מָשַׁל in the Ḳăl Imperfect tense throughout.

9. *TOPICS FOR STUDY.*

(1) Inflection of the Ḳăl Imperfect (active). (2) Prefixes of the Imperfect. (3) Affixes of the Imperfect as compared with those of the Perfect. (4) The difference in the stem-vowels of יִשְׁבֹּת, יִקְרָא and יִטַּע.

LESSON XXIV.—GENESIS II. 15-16.

1. *NOTE-REVIEW.*

(1) וַיִּפַּח (184); (2) לֵאמֹר (115); (3) מִקֶּדֶם (190); (4) הַדַּעַת (198); (5) וָרָע (199).

2. *NOTES.*

221. וַיִּקַּח—*and-*(he)*-took;* cf. וַיִּטַּע, וַיִּפַּח:

a. For וַיִּלְקַח, but ל is assimilated (like נ), § **39.** 3.

b. The laryngeal ח has ֲ (ă) before it, rather than ō, § **42.** 2. *b.*

222. וַיַּנִּחֵהוּ—wăy-yăn-nî-ḥē-hû—*and-he-caused-to-rest-him:*

a. The וַ is Wâw Conver.; ֵהוּ is the pron. suf. of 3 m. sg.

b. The root is נוּחַ *to-rest;* the form is an *irreg.* Hĭf'îl.

223. לְעָבְדָהּ וּלְשָׁמְרָהּ—lᵉʿŏv-dâh ûlᵉšŏm-râh:

a. The translation of these words is: *to-serve-her and-to-keep-her.*

b. The insep. prepositions are as usual; וְ before ל becomes וּ, § **49.** 2.

c. The final ה is a consonant, as indicated by Măppîḳ, § **16.** 1.

d. The ֲ under ע and שׁ, if it were â, would have Měθĕğ, § **18.** 2.

e. ָהּ is a contraction of ָה; cf. וֹ for ֹהוּ, § **108.** 1. R. 1.

f. These forms are Ḳăl Inf's const. (cf. מְשֹׁל), and without suffixes would read עָבַד and שָׁמַר (§ **70.** 2); but, before the suffix, a different form is used.

g. The syllables ŏv- and šŏm being unaccented and having short vowels must be closed. Šᵉwâ is therefore silent. The absence of d. l. from ד is a survival from a period when there was a short vowel under ב (cf. §§ **10.** 2. *d;* **28.** 4.). This survival was aided by the fact that the spirant letter ב greatly facilitated the spirant articulation of the following

224. וַיְצַו—*and-*(he)*-commanded;* cf. וַיְכַל from כָּלָה:

a. Long form וַיְצַוֶּה, Pi'ēl Impf. of צָוָה *he-commanded.*

b. D. f. omitted (1) from ׳ and (2) from ן, § **14.** 1, 2.

c. The unfailing indication of the Pī'ēl is here, viz., ֲ under 1st rad.

d. צִוָּה, in Pī'ēl, = *he-commanded;* so כִּלָּה, in Pī'ēl, = *he-finished.*

225. אֶכֹל—'ă-xôl—*to-eat,* or *eating:*

a. Ḳăl Inf. *absolute* of אָכַל *he-ate;* second vowel *unchangeable.*

b. Cf. with this the form of the Inf. const. לֶאֱכֹל (cf. מְשֹׁל) = 'ᵉxōl, the *o* being *changeable,* § **67.** 1. *b,* 2.

c. Cf. מָשֹׁל (ô) and מְשֹׁל (ō); שָׁמֹר (ô) and שְׁמֹר (ō).

226. תֹּאכֵל—tô'-xēl—*thou-shalt-eat:*

a. תּ indicates the Impf. 2 m. sg. (*thou*), root אָכַל.

b. Cf. with this וַיֹּאמֶר *and-he-said,* from אָמַר.

3. *FORMS FOR SPECIAL STUDY.*

אָכֹל	יְקוּם	וַיִּבְדֵּל	וַיְקַדֵּשׁ	וַיַּקַּח
שָׁמְרָה	יִפְרֹד	וַיַּצְמַח	וַיְצַו	וַיִּטַּע
עָבְרָה	תֵּרָאֶה	תַּרְשֵׁא	וַיְבָרֶךְ	וַיִּפַּח

4. *OBSERVATIONS.*

106. Verbs whose third radical is a laryngeal must have ֲ for their stem-vowel in the Imperfect.

107. The Pī'ēl Impf. may always be distinguished by the ֲ (or, if the second radical is a laryngeal, the ֲ) which is under the first radical.

108. The Hĭf'îl Impf. may be distinguished by the ֲ which is under the personal preformative.

109. The Nĭf'ăl Impf. may be distinguished by the D. f. *in* and the ֲ *under* the first radical.

110. The *o* of the Inf. abs. is ô unchangeable; but the *o* of the Inf. const. is tonal ō, and varies with the position of the accent.

5. *GRAMMAR-LESSON.*

1. § **65.** 2. a, b, The stem and inflection of the Pi'ēl Impf. (cf. p. 195).
2. § **65.** 3, *a*, *b*, The stem and inflection of the Hīθpă'ēl Impf. cf. p. 194).
3. § **65.** 5. *a*, *b*, The stem and inflection of the Hif'il Impf. (cf. p. 194).

6. *WORD-LESSON.*

1. In the Word-Lists, under List II., verbs numbered 41—50.
2. Make out a list of the new words in Genesis II. 15—16.

7. *EXERCISES.*

1. To be translated into Hebrew:—(1) *He will keep, they will keep, we shall keep, thou* (f.) *shalt keep.* (2) *She will sanctify, I shall sanctify, ye will sanctify, they* (f.) *will sanctify, we shall sanctify;* (3) *She will sanctify herself, you will sanctify yourselves;* (4) *He will cause to divide,*[1] *they* (m.) *will cause to divide, we shall cause to divide, thou* (f.) *wilt cause to divide, ye* (f.) *shall cause to divide;* (5) *I shall rule, they* (f.) *will cause to rule.*

2. To be translated into Hebrew:—(1) *Thou mayest eat from all the fruit which God has given;* (2) *Thou shalt divide between the good and between the evil;* (3) *Thou mayest not eat from the tree which is in the midst of the garden.*

3. To be translated into English:—(1) אָכֹל תֹּאכֵל; (2) שָׁמוֹר עָשָׂה אֱלֹהִים; (3) תִּשְׁמֹר יְקַדֵּשׁ אֱלֹהִים אֶת־הַיּוֹם הַזֶּה; (4) וַיְצַו אֱלֹהִים אֶת־הָאִישׁ לֵאמֹר (5) לְאָדָם אֶת־הָאִשָּׁה תֹּאכֵל פְּרִי.

4. To be written in English letters:—*Verses* 15—16 *of chapter II., from the pointed text.*

[1] Use the root בָּרַל in Hif'il.

5. To be written with points and vowel-signs:—*Verses* 15—16 *of chapter II., from the unpointed text.*

6. To be written:—(1) The verbs מָשַׁל, מָלַךְ and לָמַד throughout the Imperfect of the Pi'ēl, Hiθpă'ēl and Hif'îl stems.

8. *TOPICS FOR STUDY.*

(1) Assimilation of ל. (2) Dif. between the *o* of the Inf. abs. and the *o* of the Inf. const. (3) The Inf. const. before suffixes. (4) The words meaning *being-of, to-serve-her.* (5) Peculiarities of laryngeals. (6) Tonal vowels. (7) Mĕθĕğ, Măppîḳ, Râfê and Măḳḳēf.

LESSON XXV.—GENESIS II 17-18.

1. *NOTE-REVIEW.*

(1) וַיִּקַּח (221); (2) וַיִּכַל (158); (3) יִפְרֹד (205); (4) וַיְקַדֵּשׁ (162); (5) תּוֹצֵא (123).

2. *NOTES.*

227. וּמֵעֵץ—*and-from-tree-of:* וְ, § **49.** 2; מִ, § **48.** 2.

a. A new disjunctive accent, called r'vî(ă)'; § **24.** 5. b.

228. תֹּאכַל—Another spelling of תֹּאכֵל (226).

229. מִמֶּנּוּ כִּי בְיוֹם—*from-him* (= *it*)*; for, in-day-of:*

a. מִן takes a special form before suffixes, viz. מִמֶּן; with הוּ, מִמֶּנּוּ = מִמֶּנְהוּ, in which the ה is assim. backwards and represented by D. f. in נ, § **51.** 5. b, and ־ is deflected to ־ֶ.

b. D. l. in כִּ and in בְּ because of prec. disj. accent, § **12.** 3.

230. אֲכָלְךָ—'ᵉχŏl-χă—*thy-eating:*

a. The Inf. const. is אֲכַל, but before ךָ, אֲכָל (ŏ), § **71.** 3. *a.* (1).

b. Cf. (1) reg. form קָטַל, (2) form before ךָ, קָטָל, (3) form before ה֫ (see Note 223 *f*), קָטָל (ŏ).

231. מוֹת תָּמוּת—môθ tā-mûθ—*dying thou-shalt-die:*

a. The Ḳăl Inf. abs., and Impf. 2 m. sg. of מוּת *to-die.*

b. The explanation of these forms will be given later.

232. הֱיוֹת—h'yôθ—*being-of;* cf. עֲשׂוֹת *making-of:*

a. Ḳăl Inf. const. of הָיָה *he-was,* translated as a verbal noun.

b. Under the laryngeal ה appears a compound Š'wâ.

233. לְבַדּוֹ—*to* or *in-separation-his:* לְ, prep.; בַּד, noun; וֹ, suffix.

234. אֶֽעֱשֶׂה־לּוֹ—'ĕ'-'śê(h)l+lô—*I-will-make+for-him:*

a. א indicates the *first* pers. sg.; root is עָשָׂה *he-made.*

b. The D. f. in לְ is conjunctive (cf. עֲשֵׂה־פְּרִי), § 15. 3.

c. Cf. וַיַּעַשׂ (46), עֹשֶׂה (71), עֲשׂוֹת, all from עָשָׂה.

235. עֵזֶר—'é-zĕr—(a)*help* or *helper;* cf. אֶבֶן עֵזֶר *Ebenezer:*

a. Like עֵשָׂב and עֵדֶן an *i*-class Seğolate, § 89. 1. *b.*

236. כְּנֶגְדּוֹ—*as-over-against-him:* כְּ, נֶגֶד, וֹ.

3. *GRAMMAR-LESSON.*

1. § 65. 1. *a, b.* The stem and inflection of the Nif'ăl Impf.
2. § 65. 4. The stems and inflections of the Pŭ'ăl and Hŏf'ăl Impf.

4. *WORD-LESSON.*

1. Make out a list of the new words in Genesis II 17-18.

5. *EXERCISES.*

1. To be translated into Hebrew:—(1) *He will be divided,*[1] *they will be divided, thou* (f.) *shalt be divided, we shall be divided;* (2) *Thou* (f.) *shalt be sanctified, I shall be sanctified, ye shall be sanctified, we shall be sanctified, she will be sanctified;* (3) *Thou* (f.) *shalt be divided,*[2] *we shall be divided, ye shall be divided;* (4)

[1] Use בָּרַר in the Nif'al. [2] Use כָּלַל in Hof'ăl.

I shall be ruled, thou (m.) *shalt be ruled, we shall be ruled;* (5) *Thou* (f.) *shalt rule thyself, we shall rule ourselves, he will rule himself.*

2. To be translated into Hebrew:—(1) *In that day thou shalt die;* (2) *In the day of thy eating from the tree of fruit thou shalt surely die;* (3) *And the man was not alone in the midst of the garden;* (4) *And there was a helper over-against-him.*

3. To be translated into English:—(1) מוֹת תָּמוּת; (2) הִתְקַדֵּשׁ וְיִקַּח מִמֶּנּוּ (4) וַיַּעַשׂ אֱלֹהִים לְאָדָם עֵזֶר (3) בַּיּוֹם הָרְבִיעִי לֹא טוֹב הֱיוֹת הָאָדָם לְבַדּוֹ (5) פְּרִי לְמִינֵהוּ.

4. To be written in English letters:—*Genesis II,* 17-18 *from the pointed text.*

5. To be written with points and vowel-signs:—*Genesis II,* 17-18 *from the unpointed text.*

6. To be written:—The verbs מָשַׁל and קָדַשׁ throughout the Imperfect of the Pī'ēl, Hīθpă'ēl and Hīf'īl stems.

8. *TOPICS FOR STUDY.*

(1) The characteristics distinguishing the various Imperfects. (2) The stems of the various Imperfects. (3) The inflection of the various Imperfects. (4) The use of the Infinitive Absolute. (5) The use of the Infinitive Construct.

LESSON XXVI.—GENESIS II. 19-21.

1. *NOTE-REVIEW.*

(1) הָאָדָמָה (129); (2) חַיַּת (128); (3) הַשָּׂדֶה (171); (4) וַיִּקְרָא (29); (5) בְּהֵמָה (125); (6) עֵזֶר כְּנֶגְדּוֹ (235,236); (7) וַיִּקַּח (221).

2. *NOTES.*

237. וַיִּצֶר—a defective writing of וַיִּיצֶר (182).

238. וַיִּבֶן—*and-he-caused-to-come;* cf. וַיַּבְדֵּל:

a. Clearly a Hif'il Impf. 3 m. sg. of the root בּוֹא *to-come-in.*

b. Instead of ־, the preformative י has ־ in an open syllable.

239. לִרְאוֹת—lîr-'ôθ—*to-see;* cf. לַעֲשׂוֹת, לִמְשֹׁל:

a. רְאוֹת is the Inf. const. of the verb רָאָה *he-saw.*

b. ל, before a letter with šᵉwâ, takes ־, § 47. 2.

240. מַה־יִּקְרָא־לוֹ—mā(h)y+yîḳ-rā'+lô—*what+he-will-call+to-it:*

a. The Interrogative *what?* pointed like the article, § 54. 2. *a.*

b. לוֹ = *to-him,* just as בּוֹ = *in-him.*

241. הוּא—literally *he,* = *is;* cf. Principle 5 (3).

242. שְׁמוֹ .... שְׁמוֹת—*his-name....names:*

a. Before the suffix וֹ the ־ of שֵׁם becomes ־; but

b. The ־ is retained before the fem. plur. affix ôth.

c. Rᵉvî(ă)' (ֽ) over שְׁמוֹת, §24. 5. *b;* (cf. 227, and 229).

243. מָצָא—*he-found;* cf. בָּרָא, קָרָא:

a. ־, instead of ־ as in שָׁבַת, because א is silent.

b. Lit., *he-found;* here impersonal, = *there-was-found;* cf. French *on dit* = *it is said,* and German *man sagt.*

3. *FORMS FOR SPECIAL STUDY.*

וַיִּתֵּן	הַשָּׁמַיִם (v. 20)	הָאָדָם	מִן־הָאֲדָמָה
וַיִּפַּח	וּלְאָדָם (v. 20)	לְא־מָצָא	מִתַּחַת
וַיִּטַּע	שְׁמוֹת (v. 20)	הַשָּׂדֶה	מֵעַל

4. *OBSERVATIONS.*

109. The preposition מִן *from* is written separately chiefly before the article; elsewhere it is joined to the following word, the נ suf-

fering assimilation; but, if the following word begins with a laryngeal, the D. f. is rejected and the preceding ־ becomes ־.

110. The syl. standing second before the tone receives Mĕθĕğ, if it is an *open* syllable.

111. Three accents of high rank are ֣ Zâḳēf ḳâṭōn, ֤ Zâḳēf gâḏôl, ֥ Rᵉvî (ă)ʿ, § **24.** 4, 5. *a*, *b*.

112. Verbs whose first radical is נ assimilate the נ whenever it would stand at the close of a syllable. It is then represented by D. f. in the second radical. Such forms are liable to be confused with Pîʿēl forms.

5. *GRAMMAR-LESSON.*

1. § **66.** 1. *a*—*c*, The *stem* of Imperatives.
2. § **66.** 2. *a*, *b*, and N. 1, The *inflection* of Imperatives.

6. *WORD-LESSON.*

1. In the Word-Lists, under List V., nouns numbered 1—15.
2. Make out a list of the new words in Genesis II., 19-20.

7. *EXERCISES.*

1. To be translated into Hebrew:—(1) *Rule thou* (m.), *keep ye* (f.), *sanctify thou* (f.), *divide ye* (m.), *fill ye, subdue ye, be thou* (f.) *separated, sanctify yourselves, swarm ye.*

2. To be translated into Hebrew:—(1) *What will God call the great luminary?* (2) *Who formed every fowl of the heaven?* (3) *Who gave* (Heb., *called*) *names to the fowl of the heaven, and to the beast of the earth?* (4) *Flesh, the flesh, to the flesh, in the flesh, and in the flesh;* (5) *He found the fruit in the garden.*

3. To be translated into English:—(1) מַה־שְּׁמִי; (2) מַה־שְּׁמוֹ; (3) מַה־יִּקְרָא הָאָדָם לְכָל־הַבְּהֵמָה יָצַרְתִּי; (4) לְמִי זֹאת; (5) בַּבְּהֵמָה וּבְחַיַּת הָאָרֶץ וּבִרְנַת הַיָּם; (6) יָצַרְתָּ אַתָּה אֹתוֹ; (7) וּבְעוֹף הַשָּׁמַיִם לֹא נִמְצָא לְאָדָם עֵזֶר כְּנֶגְדּוֹ.

4. To be written in English letters:—*Verses* 19-20 *of chapter II., from the pointed text.*

5. To be written with points and vowel-signs:—*Verses* 19-20 *of chapter II., from the unpointed text.*

6. To be written:—The verbs שָׁמַר, מָשַׁל and פָּקַד in the Imv. of all the stems.

8. *TOPICS FOR STUDY.*

(1) The Interrogative Pronouns. (2) Verbs with א as their third radical. (3) Verbs with נ as their first radical. (4) Nouns which had originally two short vowels. (5) Preposition מִן. (6) The accents Zâḳēf ḳâṭon, Zâḳēf gādôl, and Rᵉvî(ă)ʿ. (7) The stems and inflection of the various Imperatives.

LESSON XXVII.—GENESIS II. 21, 22.

1. *NOTE-REVIEW.*

(1) אָדָם (131); (2) בָּשָׂר (250); (3) מֵ in מֵאִישׁ (202); (4) וְהָיוּ (80); (5) אֶחָד (37); (6) לֹא (174).

2. *NOTES.*

244. וַיַּפֶּל—wăy-yăp-pēl—*and*(he)-*caused-to-fall:*

a. This form is for וַיַּנְפֵּל, which is, like וַיַּבְדֵּל, in Hifʿîl.

b. Root נָפַל, of which נ is assimilated and represented by D. f.

c. נָתַן, נָטַע, נָפַח, נָפַל all have נ for their first radical; the old Jewish paradigm-word was פעל, the first radical of which is פ; hence, technically, these verbs are called פ״ן, i. e., Pē Nûn, § 77. 1.

245. תַּרְדֵּמָה—(a)-*deep-sleep:* on formation see § 98. and R.

246. וַיִּישָׁן—wăy-yî-šān—*and-he-slept;* cf. וַיִּצֶר:

a. The ֶ is pausal for ֵ, § 38. 2.

b. The radical י becomes silent after the preceding ֵ.

247. אַחַת—'ă(ḥ)-ḥăθ—*one:* fem. of אֶחָד (37).

a. A d. f. is implied in ח, hence ă is really in a closed syllable.

248. מִצַּלְעֹתָיו—mĭṣ-ṣăl-'ô-θāw—*from-ribs-his:*

a. The מִן with ן assimilated, § **48. 1.**

b. צַלְעֹת is plur. const. of צֵלָע (v. 22), a feminine noun.

c. יָו is the same as in אַפָּיו, see Note 185. *b.*

249. וַיִּסְגֹּר—wăy-yĭs-gōr—*and-he-closed;* cf. וַיִּשְׁבֹּת.

a. Perfects: הִסְגִּיר, סָגַר, נִסְגַּר, סָגַר.

b. Imperfects: יַסְגִּיר, יִסָּגֵר, יִסְגֹּר.

c. The *o* is ō, not ô; as it always is in Ḳăl Impf.

250. בָּשָׂר—*flesh;* cf. אָדָם, זָהָב, כָּנָף, נָהָר, עָפָר, § **90. 1.** *a.*

251. תַּחְתֶּנָּה—tăḥ-tĕ'n-nă(h)—*instead-of-her:*

a. Prep. תַּחַת, see 49; a connecting syllable, נָ; the fem. suf., הָ.

b. ה is assim. backwards, so that תַּחְתֶּנָּה becomes תַּחְתֶּנָּ; then the vowel-letter ה is added, § **6. 1. N. 1.**

252. וַיִּבֶן—wăy-yĭ'-ven—*and-*(he)*-built;* cf. יִבֶן:

a. Long form יִבְנֶה (root בָּנָה), as יִבֶן and יִרְבֶּה (root רָבָה).

b. The ending הָ is *always* lacking in verbal forms with Wāw Conversive; so וַיְהִי, not וַיִּהְיֶה, וַיַּעַשׂ, not וַיַּעֲשֶׂה.

c. יִבֶן is difficult to pronounce, so ֶ is inserted under ב, § **82. 5.** *b.* (3).

d. From the root בָּנָה *build,* come בֵּן *son,* בַּת *daughter.*

253. הַצֵּלָע—*the-rib;* cf. the form before suf. צַלְעֹת (248).

254. לָקַח—*he-took;* cf. the Ḳăl Impf. יִקַּח (221).

255. לְאִשָּׁה—l'ĭš-šā(h)—*for-woman;* cf. אִישׁ (v. 23).

256. וַיְבִאֶהָ—wăy-vĭ-'ĕ'-hā—*and-he-caused-to-come-her:*

a. Root בּוֹא; cf. וַיָּבֵא (238); D. f. omitted from יְ.

b. The הָ is 3 f. sg. suffix *her.*

c. The ֶ is ĭ, though written defectively.

d. In יָבֹא ă has become â before the tone; but in יְבִיאֶהָ, this original ă has become ִ, because of the removal of the tone, § **32.** 1. *c.*

e. The connecting element before the suffix is ĕ, a short vowel in an open syl., but under the tone; § **28.** 5. Cf. similar forms in 252, 172, 176 and הִשְׁיאֵנִי (330) and אִשְׁתֶּךָ (351).

3. *FORMS FOR SPECIAL STUDY.*

עֶרֶב	מְאֹרֶת *but* מָאוֹר	יִרְכֶּה *for* יִרְבֶּה
זֶרַע	בְּשָׂרִי *but* בָּשָׂר	יִבְנֶה *for* יִבְנֶה
תַּחַת	יְבִיאֶהָ *but* יָבֹא	יַעַשׂ *for* יַעֲשֶׂה

4. *OBSERVATIONS.*

113. The ending ֶה with which all Imperfects of verbs having ה for the third radical end, is lacking with Wâw Conversive.

114. Two consonants with Šᵉwâ seldom stand at the end of a word; a helping vowel (ֶ or ִ) is generally inserted for euphony.

115. A primary short vowel in an open syl. is dependent upon the position of the tone for its form; when pretonic, it modifies its quality (e. g. ă becomes å, ĭ becomes ē, and ŭ becomes ō), but when the tone moves away, it is reduced to Šᵉwâ.

116. Some Seğolates have two Sᵉğôls; others, those with a laryngeal for the third radical, have one Sᵉğôl and one Păθăḥ; still others, those with a laryngeal for the second radical, have two Păθăḥs.

5. *PRONOUNS, PERSONAL TERMINATIONS, PRONOMINAL SUFFIXES.*

הוּא	שָׁמַר	אֹתָנוּ	*He kept* or *has kept us.*
הִיא	שָׁמְרָה	אֹתְךָ	*She has kept thee* (f.).
אַתָּה	שָׁמַרְתָּ	אֹתוֹ	*Thou* (m.) *has kept him.*
אַתְּ	שָׁמַרְתְּ	אֹתָהּ	*Thou* (f.) *has kept her.*
אָנֹכִי	שָׁמַרְתִּי	אֹתְךָ	*I have kept thee* (m.).
הֵם	שָׁמְרוּ	אֹתִי	*They* (m.) *have kept me.*
הֵן	שָׁמְרוּ	אֶתְכֶן	*They* (f.) *have kept you* (f.).
אַתֶּם	שְׁמַרְתֶּם	אֹתָם	*Ye* (m.) *have kept them* (m.).
אַתֶּן	שְׁמַרְתֶּן	אֹתָן	*Ye* (f.) *have kept them* (f.).
אֲנַחְנוּ	שָׁמַרְנוּ	אֶתְכֶם	*We have kept you* (m.).

[**Note.**—Let this exercise be thoroughly mastered; it will be found a most helpful acquisition.]

6. *GRAMMAR-LESSON.*

1. § **67.** 1. *a, b,* The Infinitive Absolute.
2. § **67.** 2. *a, b,* The Infinitive Construct.
3. § **30.** 6. *a,* The ô that comes by rounding from â.
4. § **30.** 7. *c, d,* The ô that comes by contraction of *au* or *aw.*

7. *EXERCISES.*

1. To be translated into Hebrew:—(1) *to rule* (abs.), *to cause to rule* (abs.), *to keep* (const.), *to sanctify* (const.), *to sanctify oneself;* (2) *to be kept* (abs.), *to be created* (const.), *to be called* (const.), *to cause a division* (const.), *to rule* (const.), *to be ruled* (abs.).

2. To be translated into Hebrew: (1) *This* (is) *the woman whom God created from the man;* (2) *I will close my flesh;* (3) *God caused*

a deep sleep to fall upon the man; (4) *Bone from his bone and flesh from his flesh;* (5) *The waters shall be called seas.*

3. To be translated into English:—(1) עֲצֶם אֶחָד; (2) עַצְמוֹ וּבְשָׂרִי מִבְּשָׂרוֹ; (3) לָקַח הָאִישׁ מִן־הָעָפָר; (4) לָקַחְתִּי מִן־הַמַּיִם; (5) הָאִישׁ הַטּוֹב הַזֶּה; (6) הַנָּהָר יֹצֵא מֵעֵדֶן; (7) לָאוֹר יִקְרָא יוֹם; (8) הָאִשָּׁה הַטּוֹבָה הַזֹּאת.

4. To be written in English letters:—*Verses* 21, 22 *of chapter II., from the pointed text.*

5. To be written with points and vowel-signs:—*Verses* 21, 22 *of chapter II., from the unpointed text.*

6. To be written:—(1) The verb פָּקַד in the Infinitive Absol. and Infinitive Construct of all stems; (2) the verb מָשַׁל in the Imperative 2 m. pl. of all stems.

9. *TOPICS FOR STUDY.*

(1) Absence of ◌ָה. (2) Insertion of ־ and ־. (3) The demonstrative pronoun. (4) The personal pronoun. (5) The pronominal suffixes with the sign of the definite object. (6) The personal terminations of the Perfect. (7) D. f. conjunc. (8) D. f. omitted. (9) Pŭ'ăl stem. (10) Reduction. (11) The vowels of Seğolates.

LESSON XXVIII.—GENESIS II. 23.

1. *NOTE—REVIEW.*

(1) וַיִּפֹּל (244); (2) וַיִּבֶן[1] (256); (3) וַיֵּצֵא (224); (4) וַיִּפַּח (184); (5) לֵאמֹר (85).

---

[1] See § 45. 4.

2. *NOTES.*

257. זֹאת—zô(')θ—*this* (f.); cf. אֵלֶּה (165), § **52.** 1. *c*

a. א is silent here after the vowel ô.

258. הַפַּעַם—hăp-pă'-'ăm—*the-stroke,* = *now:*

a. An *a*-class Seğolate, original ă retained, § **89.** 2. *a.*

b. ־ used as a helping-vowel instead of ־ֲ, § **42.** 2. *a.*

c. Article has here its original *demonstrative* force, *this,* i. e., *this stroke* or *time,* meaning *now.*

259. מֵעֲצָמַי—mē-'ᵃṣå-măy—*from-bones-my:*

a. מֵ for מִן; cf. מֵעַל and מֵאִישׁ (v. 23), § **48.** 2.

b. עַצְמַי is the form taken by עֶצֶם in the *plural* with the suffix meaning *my;* §§ **108.** 3. *a.* (1); **109.** 4. *c.*

260. מִבְּשָׂרִי—*from-flesh-my;* cf. מֵאֹרֶת, גְּדֵלִים;

a. Not בְּשָׂרִי, but בִּשְׂרִי; cf. 256. *d,* § **32.** 1. *c.*

b. A *singular* noun with suffix of 1 person sg.

261. יִקָּרֵא—yīḳ-ḳå-rē'—*he-*(i. e., *it*)*-shall-be-called:*

a. Nĭf. Impf. 3 m. sg. of the verb קָרָא *call.*

b. Note the D. f. *in,* and pretonic ־ִ *under* the first radical.

262. לְקָחָהּ־זֹאת—lŭḳ-ᵒḥå(h)z+zô(')θ—*was-taken+this:*

a. ־ֳ indicates Pŭ'ăl; comp'd Šᵉwâ under ק, though not a laryngeal.

b. ־ָה indicates Perf. 3 fem. sg., cf. הָיְתָה.

c. D. f. conjunctive in ־ָהּ, § **15.** 3; Mĕθğĕ before comp'd Šᵉwâ.

d. D. f. omitted from ק and the line *Râfê* placed over ק to call attention to the absence of d. f. §§ **14.** 2; **32.** 3. *b.*

e. Compound Šᵉwâ of the ŭ-class to agree with the preceding ŭ.

3. *GRAMMAR-LESSON.*

1. § **68.** 1. *a, c,* — The Ḳăl active and passive Participles.
2. § **68.** 2, 3, — The Nĭf'ăl and remaining Participles
3. § **61.** 1—3, — Inflection of Ḳăl Perfect Statives.
4. § **64.** 1—3 and Notes, — Inflection of Ḳăl Imperfect Statives.

4. *WORD-LESSON.*

1. In the Word-Lists, under List V., nouns numbered 16—30.
2. Make out a list of the new words in Genesis II. 23.

4. *EXERCISES.*

1. To be translated into Hebrew:—(1) *Ruling, ruled, causing to rule, ruling oneself, being caused to rule;* (2) *Resting, causing to to rest, closing, closed, caused to close;* (3) *Eating, causing to rain, finding, serving, sanctifying* (Pī'ēl), *sanctified* (Pŭ'ăl), *keeping oneself.*

2. To be translated into Ḥebrew:—(1) *This woman was taken from this man;* (2) *Thou* (m.) *art old, he is heavy, thou* (f.) *art small, he loves;* (3) *He will be heavy, she will be holy, we shall be old;* (4) *From my flesh, she will keep her, they will keep us;* (5) *We shall keep the garden in the midst of the rivers.*

3. To be translated into English:—(1) בָּרָא אֱלֹהִים אֶת־הָאִישׁ וַיִּקַּח הָאִישׁ שְׁנַיִם מִכָּל־ (2) הַזֹּאת וְאֶת־הָאִשָּׁה הַזֹּאת; (3) לְלָקְחָה הָאִשָּׁה מִבְּשַׂר הָאָדָם; (4) הַבְּהֵמָה עַל־הָאָרֶץ; (5) וַיְקַדֵּשׁ אֹתוֹ בַּיּוֹם הַהוּא. יָכְבַּד, זָקֵן, קָדֵשׁ, קָטֹן, נִכְבַּד

4. To be written in English letters:—*Genesis II, 23 from the pointed text.*

5. To be written with points and vowel-signs:—*Genesis II, 23 from the unpointed text.*

6. To be written:—(1) The verbs זָקֵן and קָטֹן throughout the Ḳăl Perfect; (2) The verbs כָּבֵד and גָּדֵל throughout the Ḳăl Imperfect.

5. *TOPICS FOR STUDY.*

(1) Ḳăl Participles; (2) Other Participles; (3) Stative Verbs; (4) Ḳăl Perfect (stative); (5) Ḳăl Imperfect (stative).

LESSON XXIX.—GENESIS II. 24, 25.

1. *NOTES.*

263. עַל־כֵּן—*upon*+*so*, = *therefore;* cf. ē of כֵּן and ê of בֵּין.

264. יַעֲזָב־—yă'-ᵃzŏv+—*he-will-forsake*+:

a. For יַעֲזָב, but before Măḳḳēf ŏ instead of ō; root עָזַב.

b. יַעֲזָב instead of יַעְזֹב (cf. יִקְטֹל), because the laryngeal prefers (1) ֵ to ֶ, and (2) ֵ to ָ, §§ 42. 2. *a.* 3. *b.*

c. Ḳăl Impf. 3 m. sg. of the laryngeal verb עָזַב; synopsis in Ḳăl, עָזוֹב, עָזֹב, עָזַב, עָזוֹב, עָזֹב, עָזַב, יַעֲזֹב, עָזַב.

265. אָבִיו—'ă-vîw—*father-his:*

a. אָב *father;* ִי appears in its construct form and before suffixes.

b. וֹ is all that is left of הוּ *his* or *him;* cf. וֹ in אַפָּיו.

266. אִמּוֹ —'îm-mô—*mother-his:*

a. אֵם *mother;* וֹ, the suffix of the 3 masc. sg.

b. In אֵם d. f. is lacking from ם, because it is final, and under the tone an original ĭ becomes ē; but in אִמּוֹ d. f. is present and original ĭ is retained in an unaccented syllable before a doubled consonant.

267. וְדָבַק—*and-shall-cleave;* cf. וְהָיוּ:

a. Synopsis in Ḳăl, דָּבֵק, דְּבֹק, דָּבַק, יִדְבַּק, דְּבֹק, דָּבַק, דְּבֹק, דָּבוֹק.

b. וְ with the Perf. is Wâw Conversive; cf. וַ with the Imperfect.

268. בְּאִשְׁתּוֹ—bᵉ'îš-tô—*in-wife-his:*

a. An irregular form of אִשָּׁה, before the suffix.

269. וַיִּהְיוּ—wăy-yîh-yû—*and-they-were;* cf. וְהָיוּ:

a. Šᵉwâ under ה is silent.

b. Méθěğ with ֵ, to facilitate the pronunciation of the fol. ה.

c. Ḳăl Impf. 3 m. pl. of the verb הָיָה, with Wâw Conversive.

270. שְׁנֵיהֶם—(the) *two-of-them,* = *they-two;* cf. שְׁנֵי, לָהֶם:

a. שְׁנֵי is the construct state of the dual שְׁנַיִם *two.*

b. הֶם is the pronominal suffix of the 3 plur. masc.

271. עֲרוּמִּים—ʿărŭm-mîm—*naked:*

a. The Šᵉwâ under ע, because of distance from the tone.

b. The וּ must here be regarded as a short vowel (i. e., an incorrect *full* writing of ŭ), on account of the D. f. following.

272. יֵחָבְשְׁשׁוּ—yîθ-bô-šă′-šû—*they-will-be-ashamed:*

a. A formation after the manner of the Hĭθpă′ēl.

b. Imperfect 3 masc. plur. of the root בּוֹשׁ.

c. The ֣ in pause for ֑.

3. *FORMS FOR SPECIAL STUDY.*

פָּנִים	שְׁנַיִם	אֵם	אֵת	וַיִּהְיוּ	יַעַזְבוּ־
פְּנֵי	שְׁנֵי	אִמּוֹ	אֶת־	וְהָיוּ	יַעֲלֶה

2. *OBSERVATIONS.*

117. The ֣ which is seen in יִקְטֹל was originally a Păθăḥ; this original Păθăḥ is retained before laryngeals.

118. Wâw Conversive with the Impf. is ·וַ; with the Perfect, it is וָ.

119. An original ĭ is deflected in a closed unaccented syl. to ֣.

120. An original ĭ is retained unchanged in an unaccented sharpened syllable.

121. The plur. ending ־ִים becomes in the construct ־ֵי.

122. The dual ending ־ַיִם also becomes in the construct ־ֵי

3. *PRONOUNS, PERSONAL PREFIXES AND TERMINATIONS, PRONOMINAL SUFFIXES.*

הוּא	יִכְתֹּב	לָנוּ	*He will write to us.*
הִיא	תִּכְתֹּב	לָךְ	*She will write to thee* (f.).
אַתָּה	תִּכְתֹּב	לוֹ	*Thou* (m.) *wilt write to him.*
אַתְּ	תִּכְתְּבִי	לָהּ	*Thou* (f.) *wilt write to her.*
אָנֹכִי	אֶכְתֹּב	לְךָ	*I will write to thee* (m.).
הֵם	יִכְתְּבוּ	לִי	*They* (m.) *will write to me.*
הֵן	תִּכְתֹּבְנָה	לָכֶן	*They* (f.) *will write to you* (f.).
אַתֶּם	תִּכְתְּבוּ	לָהֶם	*Ye* (m.) *will write to them* (m.).
אַתֶּן	תִּכְתֹּבְנָה	לָהֶן	*Ye* (f.) *will write to them* (f.).
אֲנַחְנוּ	נִכְתֹּב	לָכֶם	*We will write to you* (m.).

5. *GRAMMAR-LESSON.*

1. § **72.** General View of the Strong Verb.
2. § **72.** R's 1—7, Characteristics of Stems.

Note 1.—The synopsis of a stem includes (1) the Perf. 3 m. sg., (2) the Impf. 3 m. sg., (3) the Imv. 2 m. sg., (4) the two Infinitives, (5) the Participle or Participles.

Note 2.—In this general review of the strong verb, master the synopsis of each stem, so that it can be pronounced without hesitation, and written with perfect accuracy.

Note 3.—In this work use the following verbs in addition to the paradigm word: (1) מָשַׁל *rule*, (2) כָּתַב *write*, (3) לָכַד *capture*.

6. *WORD-LESSON.*

1. In the Word-Lists, Lists V. and VI., nouns numbered 31—45.
2. Make out a list of the new words in Genesis II. 24, 25.

7. *EXERCISES.*

1. To be translated into Hebrew:—(1) *He will rule, he ruled himself, he will be caused to rule, be thou* (m.) *ruled;* (2) *He will be kept, keep thyself* (Nif.), *he caused to keep, to be caused to keep;* (3) *He was holy, he will be sanctified, sanctify thou* (Pi'ēl and Hif'īl), *it will be sanctified;* (4) *To be created, being created, causing to divide, to cause to call, ruled, being caused to keep.*

2. To be translated into Ḥebrew:—(1) *God will not forsake me;* (2) *My mother will write to me;* (3) *The man and the woman became* (Heb., *were for*) *one flesh;* (4) *The man was called Adam;* (5) *The woman forsook her mother, and clave to her husband.*

3. To be translated into English:—(1) לֹא תַעֲזֹב נַפְשִׁי; (2) לֹא תַעֲזֹב אִשְׁתְּךָ; (3) לֹא תַעֲזֹב הָאִשָּׁה אֶת־אִישָׁהּ; (4) הָיוּ שְׁנֵיהֶם טוֹבִים; (5) אָדָם אַיִן בְּיוֹם עֲשׂת אֱלֹהִים אֶרֶץ וְשָׁמַיִם.

4. To be written in English letters:—*Genesis II* 24, 25 *from the pointed text.*

5. To be written with points and vowel-signs:—*Genesis II* 24, 25 *from the unpointed text.*

6. Synopses to be written:—(1) *Of* בָּרַל *in* Nī. *and* Hī.; (2) *of* בָּקַשׁ *in* Pī *and* Pŭ.; (3) *of* בָּשַׁל *in* Ḳāl, Pī., Pŭ. *and* Hī.; (4) *of* זָכַר *in* Kāl, Nī. *and* Hī.; (5) *of* פָּקַד *in all seven stems;* (6) *of* כָּבֵד (which has ă in Ḳāl Impf. and Imv.) *in* Ḳāl, Nī., Pī., Pŭ., Hī., Hīθp.

8. *TOPICS FOR STUDY.*

(1) Attenuation of ă to ĭ in the preformatives of the Ḳāl Impf. (2) The occurrence of an original ă before laryngeals in the preformatives of the Ḳāl Impf. (3) Wâw Conversive, with the Perf., with the Impf. (4) The words for *man, woman, his-wife, her-husband.* (5) Dual ending in absolute and construct. (6) Changes of the vowel ĭ. (7) Synopses in various stems. (8) Characteristics of various stems. (9) Classes of weak verbs.

LESSON XXX.—REVIEW.

1. *WORD-REVIEW.*

[In this list of words, the superior figures indicate the verse in which the word, or its derivative, is found. In the case of nouns, the singular absolute is given, in the case of verbs, the root. The student is expected to compare with each word as here given, the various forms of that word which occur in the chapter, e. g., with שָׁקָה he will compare הִשְׁקָה *he-caused-to-drink*, לְהַשְׁקוֹת *to-cause-to-drink*.]

1. VERBS.

אָבַל[16]	חָמַד[9]	מוּת[17]	נָפַח[7]	עָזַב[24]	קָדַשׁ[3]
בּוֹא[19]	יָדַע[9]	מָטַר[5]	נָפַל[21]	עָלָה[6]	שׂוּם[8]
בּוֹשׁ[25]	יָצַר[7]	מָצָא[20]	סָבַב[11]	פָּרַד[10]	שָׁבַת[2]
בָּנָה[22]	יָשַׁן[21]	נוּחַ[15]	סָגַר[21]	צָוָה[16]	שָׁמַר[15]
דָּבַק[24]	כָּלָה[1]	נָטַע[8]	עָבַר[5]	צָמַח[5]	שָׁקָה[6]
הָלַךְ[14]	לָקַח[15]				

2. NOUNS, PARTICLES, ETC.

אָב[24]	אִשָּׁה[22]	חַיִּים[7]	נֵגֶד[18]	צָבָא[1]	שִׁיחַ[5]
אֶבֶן[12]	בַּד[18]	טֶרֶם[5]	נָהָר[10]	צֵלָע[21]	שִׁבְיעִי[2]
אֵד[6]	בְּרִיתַ[12]	יְהוָה[4]	נְשָׁמָה[7]	קֶרֶם[8]	שֹׁהַם[12]
אַיִן[5]	בֶּשֶׂר[21]	לֹא[5]	עֵזֶר[18]	קִדְמָה[14]	שָׁם[8]
אִישׁ[23]	גַּן[8]	מַאֲכָל[9]	עָפָר[7]	רֹאשׁ[10]	שֵׁם[11]
אֵם[24]	הוּא[11]	מָה[19]	עֵצֶם[23]	רַע[9]	תּוֹלֵדָה[4]
אַף[7]	זֶה[4]	מְלָאכָה[2]	עָרוֹם[25]	שְׂדֶה[5]	תַּרְדֵּמָה[21]
אַרְבָּעָה[10]	זָהָב[11]	מַרְאֶה[9]	פַּעַם[23]		

2. *VERSE-REVIEW.*

1. Pronounce the pointed text of each verse until it can be read aloud rapidly and without hesitation.

2. Write out on paper the unpointed text, one verse at a time, and then, without the aid of either pointed text or translation, insert the necessary points and vowel-signs. Compare the result with the pointed text, and note the mistakes; repeat the exercise till each verse can be pointed without mistake.

3. Write the Hebrew of the chapter, verse by verse, with only the English translation before the eye. Here also correct the result each time by the pointed text.

4. Write out the transliteration of each verse, referring in doubtful cases to the transliteration of particular words given in the Notes from time to time.

3. *GRAMMAR-REVIEW.*

1. Long ô = â, § **30.** 6.
2. Long ô = *aw*, § **30.** 7.
3. Changes of ă, ĭ, ŭ, § **31.** 2. 3.
4. Reduction, § **36.** 2. *a*, *b*, and N. 1—4.
5. Attenuation, § **36.** 3. *a*, *b*, *c*.
6. Simple verb-stem (Ḳăl), § **58.** 1.
7. Formation and force of the Pī'ēl stem, § **58.** 3. *a*, *b*, *c*.
8. Formation and force of the Pŭ'ăl stem, § **58.** 4. *a*, *b*, *c*.
9. Formation and force of the Hĭθpă'ēl stem, § **58.** 7. *a*, *b*, *c*.
10. Formation and force of Hĭf. and Hŏf. stems, § **58.** 5. *a*, *b*, *c*, 6. *a*, *b*, *c*.
11. Formation and force of the Nĭf'ăl stem, § **58.** 2. *a*, *b*, *c*.
12. General view of the verb-stems, § **59.** R's 1—4.
13. Inflection of Ḳăl Perf. (active), § **60.** R's 1—3.
14. Inflection of Ḳăl Perf. (stative), § **61.** 1—3.
15. Inflection of remaining Perfects, § **62.** 1, 2.
16. Inflection of Ḳăl Imperfect (active) § **63.** R's 1—4.
17. Inflection of Ḳăl Imperfect (stative), § **64.** 1—3.
18. Inflection of remaining Imperfects, § **65.** 1—5.
19. Inflection of the various Imperatives, § **66.** 1, 2.
20. The various Infinitives (abs. and const.), § **67.** 1, 2.
21. The various Participles, § **68.** 1—3.
22. General view of the strong verb, § **72.** R's 1—7.
23. Classification of weak verbs, § **77.** 1—6.
24. Seğolate nouns, § **89.** 1.

4. *A REVIEW EXERCISE ON THE STRONG VERB.*

[Supply in each case the vowel-points, etc.; the superior figures denote the number of places in the paradigm represented by the accompanying form, e. g., קְטַלְתֶּן, קְטַלְתֶּם, קְטַלְתֶּן = קטלתן[3].]

(1) קטלתן[3], (2) תקטלי[5], (3) קטלנה[2], (4) נקטלתם, (5) הקטלו[2], (6) התקטלנו, (7) יקטיל, (8) התקטלה, (9) התקטלנה, (10) התקטלת[2], (11) קטול[2], (12) הקטלה, (13) אקטיל, (14) הקטלתם[2], (15) הקטל[7], (16) יתקטל, (17) התקטל[3], (18) יקטילו, (19) הקטילה, (20) הקטלי, (21) תקטלנה[12], (22) קטלנו[3], (23) תקטל[10], (24) מקטל[3], (25) הקטילו[2], (26) התקטלה, (27) נקטיל, (28) תתקטל[2], (29) תתקטלו, (30) מקטיל, (31) הקטיל[2], (32) נקטלה, (33) קטלו[5], (34) אקטל[5], (35) אתקטל, (36) תקטילי, (37) נקטלת[2], (38) תקטלו[5], (39) נתקטל, (40) מתקטל, (41) תקטילו, (42) התקטלתם, (43) הקטלנה[2], (44) נקטלו, (45) קטלתי[3], (46) יקטל[5], (47) נקטל[7], (48) תתקטלנה[2], (49) התקטלו[2], (50) הקטלנו[2], (51) נקטלתי, (52) קטלי[2], (53) נקטלתן, (54) קטלת[6], (55) יקטלו[5], (56) הקטילי, (57) הקטלתן[2], (58) יתקטלו, (59) קטל[10], (60) קטלה[3], (61) נקטלנו, (62) הקטלתי[2], (63) קטלתם[3], (64) התקטלתי, (65) התקטלי, (66) תקטיל[2], (67) התקטלתן, (68) תתקטלי.

LESSON XXXI.—GENESIS III. 1-2.

1. *NOTE-REVIEW.*

(1) מִ. (49); (2) כֹּל (108); (3) חַיַּת (128); (4) הַשָּׂדֶה (171); (5) מִמֶּנּוּ (41); (9) בְּתוֹךְ (189); (8) הַגָּן (70); (7) עֵץ (255); (6) אִשָּׁה (229).

2. *NOTES.*

273. וְהַנָּחָשׁ—*and-the-serpent:* §§ **49.** 1; **45.** 1; **90.** 1. *a.*

274. הָיָה—Ḳăl Perf. 3 m. sg. of the פ' laryng. and ל"ה verb הָיָה *be;* meaning, *he-was;* corresponding form of the strong verb, קָטַל, § **82.** 1. *a.*

275. עָרוּם—*cunning:* a passive formation, § **91.** 1. *c.*

276. עָשָׂה—Ḳăl Perf. 3 m. sg. of the פ' laryng. and ל"ה verb עָשָׂה *make;* meaning, *he-made;* corresponding form of the strong verb, קָטַל, § **82.** 1. *a.*

277. אַף—'ăf—*also, even:* an adverb.

278. אָמַר—Ḳăl Perf. 3 m. sg. of the פ"א verb אָמַר; meaning, *he-said;* cor. form of strong verb, קָטַל, § **77.** 2.

279. תֹּאכְלוּ—θô'-χᵉlû—*ye-shall-eat;* cf. וַיֹּאמֶר:

a. ת = *you,* and with the affix וּ (plur.) indicates Impf. 2 pl. m.

b. The א, as in וַיֹּאמֶר, loses its force, and preform. has ô, § **79.** 1.

c. The ֵ under כ is for ֶ or ֱ, §§ **79.** 2; **63.** R. 3.

280. וַתֹּאמֶר—wăt-tô"-mĕr—*and-she-said:*

a. On the form of Wâw Conversive with Impf. see § **70.** 2. *a.*

b. On the retrocession of the accent, § **70.** 3. *a.* (3).

c. On the vowel after ת (ô), and the vowel under מ (ĕ), § **79.** 1, 2.

d. Ḳăl Impf. 3 f. sg. of the פ"א verb אָמַר *say;* meaning, *she-will-say;* corresponding form of the strong verb, תִּקְטֹל.

281. נֹאכֵל—nô'-χēl—*we-may-eat;* cf. וַיֹּאמֶר:

a. נ, as in נַעֲשֶׂה (130), is connected with אֲנַחְנוּ.

b. א loses its force, and the preformative has ô, § **79.** 1, 2.

c. Ḳăl Impf. 1 pl. com., of the פ"א verb אָכַל; meaning, *we may-eat;* corresponding form of strong verb נִקְטֹל, § **63.** 10.

3. *FORMS FOR SPECIAL STUDY.*

וַיֹּאמֶר	הָיָה	תֹּאכְלוּ	וַיֹּאמֶר
וַתֹּאמֶר	עָשָׂה	תֹּאמְרוּ	וַתֹּאמֶר
נֹאכֵל	בָּרָא	עֵץ־הַגָּן	וַיִּקְרָא
תֹּאכְלוּ	קָרָא	בְּתוֹךְ־הַגָּן	וַיַּבְדֵּל

4. *OBSERVATIONS.*

123. In verbs פ"א, the א, in Ḳăl Impf., loses its consonantal force, and the preceding vowel is always ô.

124. In verbs ל"ה, where the ה is merely a vowel-letter, and in verbs ל"א, where the א has lost its consonantal force, the ultimate ־ of the root form (cf. קָטַל) is rounded in the open syllable to ־ֹ.

125. The prefix תּ with the affix וּ indicates an Impf. 2 m. pl.

126. Mĕθĕğ is found with a long vowel in a closed syllable before Măḳḳēf, and especially with an unchangeable long vowel.

127. Wâw Conversive with the Imperfect draws the accent from the ultima to the penult, provided the penult is not a *closed* syllable.

5. *GRAMMAR-LESSON.*

1.	§ **70.** 1. *a. b,*	Use of Impf. and Perf. with Wâw Conv.
2.	§ **70.** 2. *a. b,*	The form of the Conjunction.
3.	§ **70.** 3. *a. b,* 1, 2,	The verbal form employed.
4.	§ **70.** 3. R. and Note.	Special cases.
5.	§ **73.** 1—3. R. and Note.	Laryngeal Verbs.
6.	§ **84.** 1, 2,	Bi-literal Verbs.

6. *WORD-LESSON.*

1. In the Word-Lists, under List VI., nouns numbered 46—60.
2. Make out a list of the new words in Genesis III. 1—2.

7. *PRINCIPLES OF SYNTAX.—COMPARISON.*

וְהַנָּחָשׁ הָיָה עָרוּם מִכֹּל חַיַּת הַשָּׂדֶה —*And the serpent was cunning from every* (= more cunning than any) *beast of the field.*

Principle 6.—Comparison is expressed by means of the prep. מִן.

8. *EXERCISES.*

1. To be translated into Hebrew:—(1) *The sun is larger than* (Heb., *great from*) *the moon;* (2) *The man is better than the woman;* (3) *The woman is better than the man;* (4) *We may eat of all good fruit;* (5) *She may eat from the fruit of the tree which is in the midst of the garden;* (6) *We may say, ye* (m.) *may say, she will say, I will say.*

2. To be translated into Hebrew:—(1) *God created the heavens, and made the luminaries;* (2) *He made* (the) *man in the sixth day, and rested in the seventh day;* (3) *He will sanctify the seventh day, and will rest in it;* (4) *The man will give food to the cattle, and to the fowl of the heavens, and will give* (Heb., *call*) *to them names.*

3. To be translated into English:—(1) עָשָׂה וַיִּשְׁבֹּת; (2) שָׁבַת וַיְקַדֵּשׁ; (3) הָלַכְתִּי וָאֹמַר; (4) יַעֲלֶה וְאָמַר; (5) תִּשְׁבֹּת הַנָּהָר יִפְרֹד וְהָיָה לְאַרְבָּעָה; (6) יִפְרוּ וּמִלְאוּ; (7) וְאָמַרְתָּ רָאשִׁים.

4. To be written in English letters:—*The new words of Genesis III.* 1—2.

5. To be written with points and vowel-signs:—*Genesis III.* 1, 2. *from the unpointed text.*

6. To be described:[1]—The forms שְׁרֵצוּ (1:21),[2] יִסְגֹּר (2:21), יִתֵּן (1:17), יִקָּרֵא (2:23), יַבְדֵּל (1:4), יְקַדֵּשׁ (2:3).

9. *TOPICS FOR STUDY.*

(1) Wâw Conversive with the Impf. (2) Wâw Conversive with the Perfect. (3) First radical of verbs פ"ן. (4) Hĭf'îl Impf. with Wâw Conversive. (5) The ־ֵה of ל"ה Impf's with Wâw Conversive. (6) Change of accent with Wâw Conversive. (7) D. l. after a disjunctive accent. (8) The use of Mĕθĕg̃ before Măk̠k̠ēf.

LESSON XXXII. GENESIS III. 3-5.

1. *NOTE-REVIEW.*

(1) מוֹת (231); (2) תְּמֻתוּן (284); (3) מְמֶּנּוּ (229); (4) וָרָע (199); (5) הוּא (Principle 5).

2. *NOTES.*

282. תִּגְּעוּ—θĭg-g"û—*ye-shall-touch*, for תִּנָּגְעוּ:

a. ת, with וּ, indicates Impf. 2 m. pl.

b. נ, the first radical, is assimilated, §§ **78.** 2. *a.*

c. A new disjunctive accent called Tĭfḥâ; §§ **22.** 10; **24.** 6.

d. Kăl Impf. 2 m. pl. of the פ"ן and ל' laryng. verb נָגַע *touch;* meaning, *ye-shall-touch;* corresponding form of strong verb, תִּקְטְלוּ.

---

[1] The description of a verb includes a statement of (1) the stem, (2) tense, (3) pers., gen., num., (4) class, (5) root, with its meaning, (6) meaning of the form, (7) corresponding form of קָטַל; this order is to be followed rigidly.

[2] These figures refer to the chapter and verse of the text in which the form occurs.

283. תִּגְּעוּ בּוֹ פֶּן—The D. l. in בּ and פּ, § **12.** 3.

284. תְּמֻתוּן—t'mû-θûn—*ye-shall-die;* cf. תִּגְּעוּ:

a. תּ, with וּן (וּ archaic § **63.** R. 3). indicates Impf. 2 m. pl.

b. The root is מוּת *die;* ־ is defective for וּ, § **6.** 4. N. 2.

285. יֹדֵעַ—yô-đē(ă)'—*knowing,* = *knows;* cf. זֹרֵעַ:

a. Kăl act. part. sg. masc. of the פ״י and ל laryngeal verb יָדַע, *know* meaning, *knowing;* corresponding form, קֹטֵל.

b. The ־ under ע is Păθăḥ-*furtive,* §§ **76.** 1. *c.* (3).

286. אֲכָלְכֶם—'ă-χŏl-χĕm—*your-eating;* cf. אֲכָלָהּ:

a. The ־ under כ is ŏ deflected from original ŭ, § **71.** 3. *a.* (1)

b. Kăl Inf. const., with pronominal suffix כֶם.

287. וְנִפְקְחוּ—*and-will-be-opened:*

a. The וְ is Wâw Conversive with the Perfect, § **70.** 2. *b.*

b. The נ is the characteristic of the Nĭf'ăl, § **59.** 2.

c. Nĭf'ăl Perf. 3 c. plur. of the ל laryng. verb פָּקַח *open;* meaning, *they-were-opened;* corresponding form, נִקְטְלוּ.

288. עֵינֵיכֶם—'ê-nê-χĕm—*your eyes:*

a. Eye עַיִן [*two*] *eyes* עֵינַיִם; [*two*] *eyes-of* עֵינֵי, § **107.** 6.

b. The grave suffix כֶם, always accented, § **51.** 1. *a.*

289. וִהְיִיתֶם—wĭh-yî-θĕm—*and-ye-shall-be:*

a. וְ, so written before a consonant with Šᵉwâ, is Wâw Conversive.

b. תֶּם is the personal termination of the Perf. 2 m. plur.

c. First radical ה, second י, third י; ־ under ה silent.

290. כֵּאלֹהִים—kê'-lô-ḥîm—*like-God:*

a. For כֵּאלֹהִים according to § **47.** 3; but א is weak and loses its consonantal force, and Šᵉwâ disappears with it. The vowel under כ then becomes ־ in compensation for the quiescent א. § **47.** R. 1.

291. יֹדְעֵי—yô-đᵉ'ê—*knowers-of;* cf. יֹדֵעַ (285):

a. The m. plur. const. of יֹדֵעַ; note the ending ־ֵי.

3. *FORMS FOR SPECIAL STUDY.*

יִתֵּן	יֹאכַל	לֵאמֹר	נִפְקְחוּ	יִהְיֶה	עֵינַיִם
תִּתֵּן	תֹּאכַל	כֵּאלֹהִים	נִקְטָל	וְהִיִיתֶם	עֵינֵיכֶם

4. *OBSERVATIONS.*

128. The ending יִ_ is the construct ending of *dual* as well as of plural nouns.

129. The letter ה, of הָיָה *be*, always takes simple (silent) Šᵉwâ, unless it is initial.

130. The Nĭfʿăl Perfect and Participle have the prefix נ,

131. When a consonant is elided after a short vowel, that vowel is strengthened in compensation and becomes unchangeable.

132. Any 3 *masc.* sg. verbal form of the Imperfect may be made 3 *fem.* sg. by change of י to ת.

5. *GRAMMAR-LESSON.*

1. § **74.** Tabular view, Inflection of עָטַל in Ḳăl, Nĭfʿăl and Hĭfʿîl stems.
2. § **74.** 1, Rejection of D. f. by the laryngeal.
3. § **74.** 2. *a*, *b*, Preference of laryngeals for *a*-class vowels.
4. § **74.** 3. *a*—*d*, Preference of laryngeals for comp'd Šᵉwâ.
5. § **42.** 1—3, Peculiarities of laryngeals (*to be read*).

Note 1.—In the study of this class of verbs, (1) examine closely the synopses, noting the variations from the strong verb, (2) analyze exhaustively all forms given under § **74.** with which you are familiar, (3) master thoroughly the sections indicated to be learned, (4) write *without help* a complete paradigm of the Ḳăl, Nĭfʿăl and Hĭfʿîl stems, (5) compare the result with the paradigm given in the grammar.

Note 2.—In the study of פ laryng. verbs use for practice (1) עָמַד *stand*, (2) עָבַד *serve*, (3) חָזַק *be strong*.

6. *WORD-LESSON.*

1. In the Word-Lists, under List VI., nouns numbered 61-76.
2. Make out a list of the new words in Genesis III. 3—5.

7. *PRINCIPLES OF SYNTAX.*

כִּי יֹדֵעַ אֱלֹהִים—*For God* (is) *knowing*=For God knows.

בְּיוֹם אֲכָלְכֶם מִמֶּנּוּ וְנִפְקְחוּ עֵינֵיכֶם—*In the day of your eating from it,* THEN *will be opened your eyes.*

Principle 7.—The participle is often used for the present tense.

Principle 8.—The conjunction וְ is frequently used "to connect a statement of time with the clause to which it relates."

8. *EXERCISES.*

1. To be translated into Hebrew:—(1) *She caused to serve;* (2) *He will be strong;* (3) *She was served;* (4) *I caused to stand;* (5) *They will cause to stand;* (6) *Thou* (f.) *wilt be served;* (7) *It will be said;* (8) *She will abandon;* (9) *Ye* (m.) *did abandon;* (10) *I shall be served;* (11) *Be thou served;* (12) *To be abandoned;* (13) *We shall serve;* (14) *Ye* (m.) *shall stand;* (15) *Be strong.*

2. To be translated into Hebrew:—(1) *Serving thou shalt serve God;* (2) *And the man saw the good fruit;* (3) *And the woman saw that the fruit was good;* (4) *Their eyes were opened;* (5) *In the day of your ruling the earth;* (6) *The woman will eat the fruit, and of* (=*from*) *it she will give to her husband, who will eat with her.*

3. To be translated into English:—(1) לָקְחָה הָאִשָּׁה אֶת־הַפְּרִי; (2) וַתִּתֵּן לָאִישׁ; (3) מִי יִתֵּן אֶת־הַפְּרִי הַזֶּה לָאִשָּׁה הַזֹּאת; (4) וַיַּעֲמֹד הָאִישׁ בַּגָּן; (5) הָאִישׁ יֹאכַל אֶת־פְּרִי הָעֵץ. אֱלֹהִים אָמַר יְהִי־אוֹר

4. To be written in English letters:—*The new words of Genesis III.* 3—5.

5. To be written with points and vowel-signs:—*Genesis III.* 3-5, *from the unpointed text.*

6. To be described:—The forms תִּרְאֶה, יַעֲלֶה, יַעֲזָב, עֲשׂוֹת, אֶעֱשֶׂה, נַעֲשֶׂה, עֲבֹד.

9. *TOPICS FOR STUDY.*

(1) Dual abs. affix. (2) Dual const. affix. (3) ח with ־ִ. (4) *And-he-saw, and-she-saw.* (5) Formation of feminine nouns. (6) Synopsis in Ḥĭf. of שָׁכַל. (7) The א of verbs פ״א. (8) The vowel of the Preformative in Ḳăl Impf. of verbs פ״א. (9) The stem-vowel of verbs פ״א in the Ḳăl Impf.

LESSON XXXIII. GENESIS III. 6-8.

1. *NOTE-REVIEW.*

(1) הָיָה (274); (2) תִּגְּעוּ (282); (3) וַיְהִי (269); (4) וַיַּעַשׂ (87); (5) וַיְבָרֶךְ (114); (6) יַעֲלֶה (179); (7) נִשְׁמַת (186).

2. *NOTES.*

292. וַתֵּרֶא—wăt-tē'-rĕ'—*and-*(she)*-saw;* cf. וַיַּרְא *and-*(he)*-saw:*

a. Full form תִּרְאֶה (cf. יִהְיֶה), but ־ֶה never stands with Wâw conversive (§ **82.** 5. *b*); ־ִ standing under the tone, becomes ־ֵ (§ **82.** 5. *b.* (4)); and a helping ־ִ is inserted after ר (§ **29.** 4. *b.*)

293. תַּאֲוָה—(a) *delight:* a noun formed by prefix תַּ, § **98.**

294. לְעֵינַיִם—*to-the-*[*two*]*-eyes:* §§ **45.** R. 3; **106.** 5. *a.*

295. נֶחְמָד—nĕḥ-mâd—*desirable:*

a. Nĭf. part. of the פ׳ laryng. verb חָמַד *desire;* meaning, *desired*

or *desirable;* corresponding form נִקְטָל, but the ־ has become ־ before ח, § 74. 2. *b.*

b. The strong laryngeal ח has simple (silent) šᵉwâ, § 74. 3. *b.*

296. לְהַשְׂכִּיל—lᵉhăś-kîl—*to-make-wise:*

a. Hĭf. Inf. const. of שָׂכַל *be wise;* corresponding form הַקְטִיל.

b. Synopsis: הַשְׂכִּיל, יַשְׂכִּיל, הִשְׂכִּיל, הַשְׂכֵּל, הַשְׂכִּיל, מַשְׂכִּיל; —note the ־ under preformative, except in Perfect.

297. מִפִּרְיוֹ—*from-its-fruit:* (1) מִן, (2) פְּרִי, (3) וֹ.

298. וַתִּתֵּן—*and-she-gave: feminine* of וַיִּתֵּן (94).

299. עִמָּהּ—ʿîm-mâh—*with-her;* preposition עִם:

c. ־ָה, arising from ־ָהָ, is âh, not ăh.

300. וַתִּפָּקַחְנָה—*and-*(they, f.)*-were-opened;* cf. יִקְּווּ:

a. Nĭfʿăl (note D. f. *in* and ־ *under* פ), Impf. 3 fem. (נָה) plur. of the ל laryngeal root פָּקַח; corresponding form תִּקָּטַלְנָה.

301. עֵינֵי—ʿê-nê—*eyes-of;* cf. עֵינֵיכֶם (288), עֵינַיִם (294).

302. וַיֵּדְעוּ—wăy-yê-dᵉʿû—*and-they-knew:*

a. Ḳăl Impf. 3 m. plur. of the פ״י and ל laryng. verb יָדַע *know.*

b. Corresponding form, יִקְטְלוּ; the first radical ו, being weak, drops out, and ־ now standing in an open syl., becomes ־, § 80. 2. *a.* (1).

c. Mĕθĕğ with long vowel before vocal šᵉwâ pretonic, § 18. 2.

303. עֵירֻמִּים—ʿê-rūm-mîm—*naked:* irregular plural of עֵירֹם.

304. הֵם—hēm—*they* (m.): cf. the other form הֵמָּה, pron. suf. הֶם.

305. וַיִּתְפְּרוּ—wăy-yĭθ-pᵉrû—*and-they-sewed:*

a. Ḳăl Impf. 3 m. sg. of תָּפַר *sew;* cor. form, יִקְטֹל; 3 m. *sg.* יִתְפֹּר.

b. Synopsis: תָּפַר, יִתְפֹּר, תָּפוֹר, תְּפֹר, תִּפְרִי, תָּפוּר.

306. עֲלֵה—ʿᵃlê(h)—*leaf-of:* abs. sg. עָלֶה.

307. תְּאֵנָה—θᵉʾē-nā(h)—*fig-tree:* note the Zāḳēf-ḳāṭōn.

308. וַיַּעֲשׂוּ—wăy-yă'-'śû—*and-they-made;* cf. וַיַּעַשׂ *and-he-made.*

309. וַיִּשְׁמְעוּ—*and-they-heard;* cf. וַיִּתְפְּרוּ (305).

310. קוֹל—ḳôl—*voice;* cf. כֹּל (kōl) *all.*

311. מִתְהַלֵּךְ—*walking:* Hĭθpă'ēl participle of הָלַךְ *walk.*

312. וַיִּתְחַבֵּא—*and-*(he)*-hid-himself;* cf. מִתְהַלֵּךְ.

3. *FORMS FOR SPECIAL STUDY.*

יִשְׁמְעוּ	יִתְפְּרוּ	יֵדְעוּ	יִשְׁמְעוּ

4. *OBSERVATIONS.*

133. Of two Šᵉwâs in the middle of a word the first is silent, the second is vocalized.

134. Where a closed syllable would have ĭ, an open syllable has ē.

5. *GRAMMAR-LESSON.*

1. § 74. Tabular View, Synopses of עָטַל in Pĭ'ēl, Pŭ'ăl, Hĭθpă'ēl, and Ḥŏf'ăl.
2. § 74. 2. *a—b.* Preference of the laryngeal for ă.
3. § 74. 3. a—d. Preference of the laryng. for comp'd Šᵉwâ.
4. § 42. 1—3, Peculiarities of laryngeals (*to be read*).

Note 1.—In the study of this class of verbs (1) examine closely the synopses, noting the variations from the strong verb, (2) analyze exhaustively all familiar forms given under § 74. 1-3, (3) master thoroughly the sections indicated to be learned, (4) write *without help* a complete paradigm of the verb, and (5) compare the result with the paradigm given in the grammar.

Note 2.—In this study of 'פ laryng. verbs, use for practice (1) חָמַד *desire,* (2) עָזַב *forsake,* (3) עָלַם *conceal,* (4) הָפַךְ *turn.*

6. *WORD-LESSON.*

1. In the Word-Lists, under List VII., the nouns numbered 77—84.
2. Make out a list of the new words in Genesis III. 6—8.

7. *EXERCISES.*

1. To be translated into Hebrew:—(1) *He will desire;* (2) *He was caused to turn;* (3) *She was abandoned* (Pŭ'ăl עָזַב); (4) *She will conceal herself* (Hiθp.); (5) *They will be caused to stand;* (6) *We shall be forsaken* (Nif.); (7) *Thou* (f.) *wilt be desired* (Nif.) (8) *She will be caused to turn;* (9) *Be thou* (f.) *desirable* (Nif.); (10) *Cause ye* (m.) *to forsake;* (11) *Be ye* (m.) *caused to forsake.*

2. To be translated into Hebrew:—(1) *The woman saw that the fruit was good and she desired it;* (2) *She took the fruit and gave it to the man;* (3) *I caused the man to serve God;* (4) *The man was forsaken in the garden;* (5) *The woman turned herself and saw the man who was standing under the tree.*

3. To be translated into English:—(1) לָקְחָה הָאִשָּׁה מִפְּרִי
יַעֲזֹב הָאִישׁ אָבִיו (2) הָעֵץ וַתֵּרֶא כִּי טוֹב וַתֹּאכֶל מִמֶּנּוּ
וַיִּתֵּן אֵת הָאִישׁ לַעֲבֹד אֶת־הָאֲדָמָה (3) וְאִמּוֹ וְדָבַק בְּאִשְׁתּוֹ;
מִתְהַלֵּךְ אֱלֹהִים בַּגָּן (5) נֶחְמָד הַפְּרִי לְהַשְׂכִּיל (4) ;
וַתִּתְחַבֵּא הָאִשָּׁה וַתַּעַשׂ לָהּ חֲגוֹרָה. (6)

4. To be written in English letters:—*The new words of Genesis III.* 6—8.

5. To be written with points and vowel-signs:—*Genesis III.* 6—8.

6. To be written out:—*Synopses* of עָמַד and חָמַד *in all stems.*

7. To be described:—The forms נֶחְמָד, יֵעָשֶׂה, וַתֵּרֶא, יַהֲפֹךְ, יַחְמֹד.

8. *TOPICS FOR STUDY.*

(1) The peculiarities of laryngeals as seen in verbs פ laryng. (2) The meanings of Nīf'ăl and Hiθpă'ēl stems. (3) The two ways of vocalizing Imperfect Ḳăl in פ laryng. verbs. (4) The differing grades of strength in the various laryngeals. (5) Compensation for the failure to double a laryngeal. (6) The common element in the Imperfect, Imperative and Infinitive Construct.

LESSON XXXIV. GENESIS III. 9-11.

1. *NOTE-REVIEW.*

(1) שְׁנֵיהֶם (88,270); (2) רוּחַ (15); (3) אִשְׁתּוֹ (268); (4) פְּנֵי (13); (5) בְּתוֹךְ (41); (6) הַגָּן (189); (7) וַיִּקְרָא (29); (8) אָדָם (131).

2. *NOTES.*

313. אַיֶּכָּה—'ăy-yĕ'k-kâ(h)—*where-*(art)*-thou?:*

a. אַי *where,* with union syllable נ_, § **71.** 2. *c.* (3).

b. כָה, a fuller writing for ךָ, the pronominal suffix.

314. שָׁמַעְתִּי—*I-heard;* corresponding form קָטַלְתִּי; cf. נָתַתִּי.

315. וָאִירָא—wâ-'î-rā'—*and-I-was-afraid:*

a. וָ, the Wâw Convers., before a laryngeal, loses D. f. and becomes וָ.

b. א indicates the first person *I;* the root is יָרֵא *be-afraid.*

c. The accent Tᵉvîr (֒), and that under שָׁמַעְתִּי, Tifḥâ (֔), are disjunctives of the third class, § **22.** 10, 11.

316. וָאֵחָבֵא—wâ-'ē-ḥâ-vē'—*and-I-hid-myself:*

a. On וָ and א see preceding note (315. *a*).

b. Nif'ăl Impf. 1 c. sg. of the פ' laryng. and ל'' verb חָבָא *hide.*

c. D. f. rejected from ח, and preceding vowel lowered, § **74.** 1.

317. הִגִּיד—(he) *made-known;* cf. הִמְטִיר, יִטַּע, יִפַּח:

a. Hif'îl (הִ) Perfect 3 sg. m. of the פ'' verb נָגַד *make known.*

b. Cor. form, הִקְטִיל; *Synopsis,* הִגִּיד, יַגִּיד, הַגֵּד, הַגֵּד, הַגִּיד, מַגִּיד; the D. f. in גִּ is for the assimilated נ, § **78.** 2. *b.*

318. לְךָ—preposition לְ, with suffix ךָ, § **51.** 3.

319. אַתָּה—pausal for אַתָּה, §§ **50.** 2; **38.** 2.

320. הֲמִן—hᵃmĭn—*?-from,* §§ **46.** 1; **48.**

321. צִוִּיתִיךָ—ṣĭw-wî-θî'-xă—*I-commanded-thee;* cf. וַיְצַו:

a. Pi'ēl Perf. 1 sg. of the ל'' verb צָוָה *command,* § **82.**

b. Cor. form, קִטַּלְתִּיךָ; but instead of ◌ַל, we have ◌ִי = ī; § **82.** 3. *b.*

c. תִּי = *I;* ךָ = *thee;* D. f. in וּ, characteristic of Pī'ēl.

322. לְבִלְתִּי—*to-not:* prep. לְ, and בִּלְתִּי, the neg. used with Inf's.

323. אֲכָל־—'ʾxŏl+—(to)-*eat:* Ḳăl Inf. const. before Măḳḳēf, § **17.** 2.

3. *FORMS FOR SPECIAL STUDY.*

יִתְּחַבֵּא	שָׁמַעְתִּי בַגָּן	וָאִירָא
אֶחְבֶּא	וָאִירָא כִּי	וָאֶתָּחֲבֵא

4. *OBSERVATIONS.*

135. ◌ָ, before the *first* person (אֲ), becomes ◌ָ.

136. A dâğ. l. in an initial spirant will stand even when the preceding word closes with a vowel, if that word carries a disjunctive accent.

137. The Hĭθpă'ēl is generally reflexive; the Nĭf'ăl was originally reflexive, and in common usage frequently has this force.

5. *GRAMMAR-LESSON.*

1. § **75.** Tabular View,		Synopses of קָאַל in Ḳăl, Nĭf'ăl, Hĭf'îl, and Hŏf'ăl stems.
2. § **75.** 1. *a, b,* and N. 1-3,		Rejection of D. f. by the laryngeal.
3. § **75.** 2. *a-c,*		Preference of the laryngeal for ă.
4. § **75.** 3,		Preference of the laryngeal for comp'd Šᵉwâ.
5. § **42.** 1-3,		Peculiarities of laryngeals (*to be read*).

6. *WORD-LESSON.*

1. Make out a list of the new words in Genesis III. 9—11.

7. *PRINCIPLES OF SYNTAX.*

בָּרָא אֱלֹהִים אֵת הַשָּׁמַיִם—*God created the heavens.*

וַיְבָרֶךְ אֹתָם אֱלֹהִים—*And God blessed them.*

אֶת־קֹלְךָ שָׁמַעְתִּי בַגָּן—*Thy voice I heard in the garden.*

Principle 9.—The object of the verb generally stands *after* both predicate and subject; but if the object is pronominal it stands between the predicate and subject; or, if the object is to be emphasized, it stands *before* both predicate and subject.

8. *EXERCISES.*

1. To be translated into Hebrew:—(1) *He will redeem;* (2) *Redeem thou* (f.); (3) *They* (m.) *will redeem;* (4) *Thou* (f.) *wilt be redeemed;* (5) *We were redeemed;* (6) *I shall cause to redeem;* (7) *They caused to redeem;* (8) *He was caused to redeem;* (9) *Being caused to redeem;* (10) *To cause to redeem.*

2. To be translated into Hebrew:—(1) *Thou didst hear the voice of God from the heavens;* (2) *Let us make for ourselves large girdles;* (3) *They will hide themselves* (Nĭf. or Ḥĭθp.) *in the garden;* (4) *This is the day in which God spoke to the man in the midst of the garden of Eden;* (5) *God will redeem the man and his seed;* (6) *The man will be redeemed in that day.*

1. To be translated into English: — (1) נִשְׁמַע קוֹל אֱלֹהִים בָּרוּךְ אֱלֹהֵי (3) ;מִי הִתְחַבֵּא מִפְּנֵי אֱלֹהִים (2) ;עַל־הָאָרֶץ נֶחְמְדָה הָאָרֶץ (5) ;בְּכָל־הָאָרֶץ הִמְשַׁל הָאָדָם (4) ;הַשָּׁמַיִם בְּעֵינֵי כָּל־הַבָּשָׂר.

4. To be written in English letters:—*The new words of Genesis III.*, 9—11.

5. To be written with points and vowel-signs:—*Genesis III.*, 9—11 *from the unpointed text.*

6. To be written out:—Synopses in Ḳăl, Nīf. Hīf. and Hŏf. of נָאַל and שָׁחַת.

7. To be described:—יִבְחַר, נִגְאַלְתֶּם, נִגְאַלְתִּי, הִנָּאֵלָה, יִגָּאֲלוּ.

9. *TOPICS FOR STUDY.*

(1) Wâw Conversive before א. (2) Cases of Nīf. and Hīθp. stems in Gen. III. 7—11; (3) Synopses of the strong verb קָטַל; (4) The personal pronoun; (5) The inseparable prepositions; (6) Wâw Conversive with Perfect and Imperfect; (7) Synopses of ע' laryng. verb in Ḳăl, Nīf. Hīf. and Ḥŏf. stems.

LESSON XXXV. GENESIS III. 12-14.

1. *NOTE-REVIEW.*

(1) מִמֶּנּוּ (229); (2) הָאָדָם (131); (3) אִשָּׁה (255); (4) מִן (49); (5) וַתֹּאמֶר (280); (6) הַנָּחָשׁ (273); (7) בְּהֵמָה (125); (8) חַיַּת (128); (9) הַשָּׂדֶה; (10) תֹּאכַל (228).

2. *NOTES.*

324. נָתַתָּה—nâ-θăt-tâ(h)—*thou-gavest;* cf. קָטַלְתָּ:

a. Ḳăl Perf. 2 sg. m. of the פ''ן verb נָתַן, § 78. 2. R. 3.

b. The vowel-letter ה at the end is not usual; the ending is generally תָּ.

325. עִמָּדִי—'îm-mâ-dî—*with-me:* note Zâḳēf ḳâṭon, § 24. 4.

326. הִוא נָתְנָה־לִּי—hî' nâ-θᵉnâ(h)l+lî—*she gave+to-me,* § 15. 3:

a. The pronoun used as subject of a verb is expressed whenever, as here, it is emphatic.

327. וְאֹכַל—wâ-'ô-χēl—*and-I-ate;* cf. וְאֵירָא, וְאֶחְבָּא:

a. אֹכַל is for אֶאכַל, of which the radical א is lost, § **79.** 1. N.

b. וְ, the form of Wâw Conversive with the Impf., becomes וָ before א, § **70.** 2. a. (3).

328. מַה־זֹּאת—mă(h)z+zô(')θ—*what+this?* §§ **54.** 2. *a;* **52.** 1. *b.*

329. עָשִׂית—*thou-*(f.)*-hast-done;* ת *=thou* (f.); on ◌ִי see § **82.** 3. *b.*

330. הִשִּׁיאַנִי—hĭš-šî-'ă-nî—(he) *deceived-me;* cf. הִגִּיד:

a. נִי is the pron. suf. of 1st pers., ◌ the so-called connecting vowel,

b. הִשִּׁיא Hĭf. Perf. 3 m. sg. of נָשָׂא, נ being assim., § **78.** 2. *b.*

331. עָשִׂיתָ זֹּאת—'ă-śî-θå-zô(')θ—*thou-*(m.)*-hast-done this:*

a. עָשִׂית = *thou-*(f.)*-hast-done;* עָשִׂיתָ = *thou-*(m.)*-hast-done.*

b. D. f. in זֹּאת is conj., § **15.** 3; accent over זֹּאת, Seğōltā, § **24.** 3.

332. אָרוּר—'ă-rûr—*cursed;* Ḳăl Part. Pass. of אָרַר, § **68.** 1. *c.*

333. גָּחוֹנְךָ—*thy-belly;* cf. מְאֹרֹת, גְּרֹלִים:

a. The absolute form is גָּחוֹן but with suffix גְּחוֹן § **109.** 1. *a.*

b. The ô is here written defectively; the suffix is ךָ with ◌ַ.

334. תֵּלֵךְ—θē-lēχ—*thou-shalt-go:*

a. The root is הָלַךְ, or יָלַךְ, § **80.** 2. R. 3.

b. The prefix ת = *thou* (m.); cor. form of קָטַל is תִּקְטֹל.

335. יְמֵי—*days-of;* sg. יוֹם, plur. יָמִים, plur. const. יְמֵי.

336. חַיֶּיךָ—ḥăy-yê'-χå—*thy-lives;* from the plur. חַיִּים:

a. On the vowel ◌ֵי (*ê*) see § **30.** 5 and *b.*

3. *FORMS FOR SPECIAL STUDY.*

אָתָּה	אָכַלְתָּ	נָתְנָה־לִּי	עָשִׂיתָ	מִי	הִגִּיד
אָכַלְתָּ	נָתַתָּה	עָשִׂיתָ זֹּאת	עָשִׂית	מַה־	הִשִּׁיא

4. *OBSERVATIONS.*

138. The radical נ, when it would stand at the end of a syllable, and before a dental consonant is assimilated.

139. The Interrog. pronouns are מִי *who?*, and מָה *what?*.

140. תָּ = *thou* (m.), תְּ = *thou* (f.), but both have their soft sound (θ) when a vowel precedes.

141. D. f. conj. may or may not be accompanied by Măḳḳēf.

142. The personal termination תָּ *thou* (m.) is generally written without, though sometimes with, the vowel-letter ה.

5. *GRAMMAR-LESSON.*

1. § **76.** Tabular View, Synopses of קָטַח in Ḳăl, Nīf. Hīf. and Ḥŏf. stems.
2. § **76.** 1. *a*, *b*, Preference of the laryngeal for ă.
3. § **76.** 1. *c*, Insertion of Păθăḥ-furtive.
4. § **76.** 1. *d*, Insertion of ־ in Perfects 2 f. sg.
5. § **76.** 2, Preference of the laryng. for comp'd Šᵉwâ.
6. **42.** 1—3, Peculiarities of laryngeals (*to be learned*).

Note 1.—Treat as directed in former Lessons the familiar forms in § **76.** 1, 2.

Note 2.—In the study of ל laryngeal verbs use for practice (1) מָשַׁח *anoint*, (2) שָׁלַח *send*, (3) שָׁבַע *swear*, (4) שָׁמַע *hear*.

6. *WORD-LESSON.*

1. In the Word-Lists, under List VII., nouns numbered 85—94.
2. Make out a list of the new words in Genesis III. 12—14.

7. *EXERCISES.*

1. To be translated into Hebrew:—(1) *I will anoint;* (2) *He will cause to anoint;* (3) *Sending, sent;* (4) *Thou* (f.) *didst hear;* (5) *He will send;* (6) *I swore* (Nīf.); (7) *I will swear;* (8) *She caused to send;* (9) *To anoint;* (10) *Cause thou* (m.) *to send;* (11) *To be sent.*

2. To be translated into Hebrew:—(1) *He told the man that he was good;* (2) *Hast thou eaten fruit from the tree of lives?* (3) *Who gave the woman to the man?* (4) *He gave me fruit and I ate;* (5) *She gave him fruit and he ate;* (6) *I gave her fruit and we ate.*

3. To be translated into English:—(1) יָמוּת הָאֹכֵל מִן־הָעֵץ; (2) מִי עָשָׂה זֹאת; (3) הִשִּׁיא הַנָּחָשׁ אֶת־הָאִשָּׁה וַתֹּאכַל; (4) מַה־נָּתְנָה; (6) הֶגֶרֶל אַתָּה מִמֶּנּוּ; (5) הֲמִן־הַמַּיִם לָקַחְתָּ הָאִשָּׁה לָאִישׁ.

4. To be written in English letters:—*The new words of Genesis III.* 12—14.

5. To be written with points and vowel-signs:—*Genesis III.* 12—14 *from the unpointed text.*

6. To be written out:—Synopses of מָשַׁח, בָּטַח, and שָׁמַע in Ḳăl, Nif., Hĭf. and Ḥŏf. stems.

7. To be described:—The forms זָרַע, יָצַמַח, יִטַע, יִפַּח, יָצָמַח, הִשְׁכִּיעַת, יָדַעַת, שִׁמֹּחַ, הִשְׁלַח, מַזְרִיעַ, יֹדֵעַ.

8. *TOPICS FOR STUDY.*

(1) The נ of verbs פ"ן in the Hĭf. (2) Hē Interrogative. (3) The negative used with the Infinitive. (4) The peculiarities of the verb נָתַן. (5) נ, before א. (6) D. f. conjunctive. (7) The Interrogative pronouns. (8) תָּ and תָה (9) Păθăḥ-furtive. (10) The helping-vowel ֫ in Perfects 2 f. sg. (11) Synopses of the strong verb.

LESSON XXXVI.—GENESIS III. 15-17.

1. *NOTES.*

337. וְאֵיבָה—w°'êvâ(h)—*and-enmity:* a fem. noun, from root אָיַב.

338. אָשִׁית—*I-will-put;* א = I, the root being שִׁית (ע"י) *put:*

a. Observe the R°vî(ă)', § **24.** 5. *b.*

339. זַרְעֲךָ—*thy-seed;* זַרְעָהּ *her-seed;* cf. זַרְעוֹ *his-seed.*

340. יְשׁוּפְךָ—*he-shall-bruise-thee;* תְּשׁוּפֶנּוּ *thou-shalt-bruise-him.*

a. The Qăl Impf. of שׁוּף is יָשׁוּף (3 m. sg.), תָּשׁוּף (2 m. sg.).

b. When the tone is shifted the ā under י and ת becomes ־ֵ,

c. ךָ with ־ֵ = (m.); ־ֶנּוּ is the pron. suffix הוּ *him,* with the connecting syllable נ־ֶ; § **71.** 2. *c.* (3) and Note 1.

341. רֹאשׁ—*head,* and עָקֵב *heel* are accusative of specification.

342. הַרְבָּה—*causing-to-be-great:* irreg. for הַרְבֵּה, Hīf. Inf. Abs. of רָבָה *multiply.*

343. אַרְבֶּה—*I-will-cause-to-be-great:* Hīf. Impf. 1 sg. of רָבָה, § **82.** 1. *b.*

344. עִצְּבוֹנֵךְ—*ʿĭṣ-ṣᵉvô-nēX—thy-*(f.)*-sorrow:*

a. עִצָּבוֹן (root עָצַב, formative addition וֹן, § **103.** 3) becomes עִצְּבוֹן when the tone is shifted, as before the pron. suffix, § **109.** 1. *a.*

b. The 2 fem. pron. suf. is ךְ; ־ֵ is the so-called connecting vowel.

345. הֵרוֹנֵךְ—*thy-conception:* הֵרוֹן with ךְ and ־ֵ, see 344. *b.*

a. Note that ־ֵ in the first syl. is away from the tone and in an apparently open syl. In reality, dăğ. f. has been rejected from ר; hence an original ־ֵ has become ־ֵ in compensation for the loss of doubling.

346. עֵצֶב—*sorrow:* an a-class Seğolate, § **89.** 1.

347. תֵּלְדִי—tē-lᵊdî—*thou-*(f.)*-shalt-bring-forth:*

a. For תֵּוְלְדִי (cf. תִּקְטְלִי), but ו, being weak, drops out and ־ֵ, in an open syllable, becomes ־ֵ, § **80.** 2. *a.*

b. Root יָלַד = וָלַד; Impf. 3 m. sg. יֵלֵד, for יִוְלֵד.

c. תִּ and י־ֵ are fragments of אַתְּי, the older form of אַתְּ, § **50.** 3. *c.*

348. בָּנִים—vâ-nîm—*sons:* irreg. plur. of בֵּן *son.*

349. תְּשׁוּקָתֵךְ—t°šû-ḳå-θēX—*thy-*(f.)*-desire:*

a. Abs. תְּשׁוּקָה, a feminine formation, § **98.** R.

b. Const. תְּשׁוּקַת, suf. ךָ with ־ַ; cf. הֶרְגֵּךְ (345), עִצְּבוֹנֵךְ (344).

c. Before ךָ ־ַ, ־ַ in an open syllable becomes ־ָ, § **108.** 2.

350. יִמְשָׁל־בָּךְ—yĭm-šŏl+båX—*he-shall-rule+in-thee* (f.):

a. יִמְשָׁל־ for יִמְשֹׁל before Măḳḳēf, § **17.** 2; *cf.* כָּל־, כָּל.

b. בָּךְ = *in-thee* (f.); cf. בָּךְ *in-thee* (m.), § **51.** 3.

351. אִשְׁתֶּךָ—'iš-tĕ'-Xå—*thy-wife;* pausal for אִשְׁתְּךָ, § **38.** 1. N.:

a. ת indicates the feminine, here attached to אִשׁ; cf. const אֵשֶׁת.

b. S°ğōltå repeated according to § **23.** 6.

c. Another case of a short-vowel (ĕ) in an open syl. under the tone; cf. וַיְבִאֶהָ (256) and הִשְׁיַאֲנִי (330).

352. אֲרוּרָה—fem. sg. of אָרוּר (332), Ḳăl Part. pass. of אָרַר *curse.*

353. בַּעֲבוּרֶךְ—bă'-ªvû-rĕ́-Xå—*on-account-of-thee:*

a. A compound preposition, בַּעֲבוּר = *on-account-of, for-the-sake-of.*

b. ךָ with the preceding ־ַ changed to ־ֶ as in אִשְׁתֶּךָ, § **38.** 1. N.

c. D. l. in בַּ because of preceding disjunctive, Tīfḥå (ֽ), § **22.** 10

354. תֹּאכְלֶנָּה—tô'-Xªlĕ́n-nå(h)—*thou-*(m.)*-shalt-eat-it:*

a. תֹּאכַל is Ḳăl Impf. 2 sg. masc. of אָכַל eat, § **79.** 1.

b. ־ֶנָּה is for ־ֶנָּהּ, just as ־ֶנּוּ (in תְּשׁוּפֶנּוּ) was for ־ֶנָּהוּ; note carefully § **71.** 2. *c.* (3) and N. 1, 2.

2. *FORMS FOR SPECIAL STUDY.*

אָרוּר	אִשְׁתֶּךָ	יִמְשָׁל־בָּךְ	עִצְּבוֹנֵךְ	תְּשׁוּפֶנּוּ
אֲרוּרָה	בַּעֲבוּרֶךָ	יַעֲזָב־אִישׁ	תְּשׁוּקָתֵךְ	תֹּאכְלֶנָּה

3. *OBSERVATIONS.*

144. In pausal forms there stands between the verb and the pronominal suffix a syllable, ־ֶנָּ; instead of ־ֶנְהוּ and ־ֶנְהָ, we find ־ֶנּוּ and ־ֶנָּה.

145. Between the usual form of the noun and the 2 fem. sing. pron. suffix ךְ there stands the vowel ־ִ. This may be called a connecting vowel.

146. The *o* of the Ḳăl Impf. is changeable (ō), and before Măḳ-ḳēf ŏ appears instead.

147. The ־ֲ which stands before the suffix ךָ is a reduction of an original ־ַ, which in pause is restored, and deflected to ĕ.

148. The ־ַ which stands directly before the tone is from an original ă; when the tone is shifted with affixes for gender and number, this ă, if in an open syllable, is reduced to Šᵉwâ.

4. *GRAMMAR-LESSON.*

1. § **78.** Tabular View, Synopses of נָטַל in various stems.
2. § **78.** 1. *a, b,* Loss of נ in Ḳăl Inf. const. and Imv.
3. § **78.** 2. *a, b,* Assimilation of נ.
4. § **78.** 2. N. 1, The preformative vowel in Hŏfʿăl.
5. § **78.** 2. R's 2, 3, The verbs לָקַח and נָתַן.

Note 1.—In the study of this class of verbs, follow the order indicated in previous Lessons, analyzing exhaustively the familiar forms given under § **78.** 1, 2 and Remarks 1—3.

Note 2.—Use for practice (1) נָגַד in Hĭf=*make known*, (2) נָפַל *fall*, (3) נָגַשׁ *approach.*

5. *WORD-LESSON.*

1. In the Word-Lists, under List VII., nouns numbered 95—104.
2. Make out a list of the new words in Genesis III. 15—17.

6. *EXERCISES.*

1. To be translated into Hebrew:—(1) *Approach thou, to approach;* (2) *She will approach, I shall approach;* (3) *They made known* (Hi.), *thou* (f.) *wilt make known;* (4) *It will be made known;* (5) *I shall take, to take, take thou, taking;* (6) *Thou shalt give, I shall give, to give, give thou* (m.); (7) *He will fall, he will cause to fall.*

2. To be translated into Hebrew:—(1) *Between thee and between me;* (2) *Between him and between her;* (3) *God made known to the woman that the man should rule over her;* (4) *Thou* (f.) *didst hear the voice of thy husband;* (5) *Cursed is the earth because thou didst eat from this tree;* (6) *I will give thee food all the days of thy lives.*

3. To be translated into English: — (1) תְּשׁוּקָתִי אֶל־הָאִישׁ; (2) נָתַתִּי לְךָ כֹּל אֲשֶׁר־לִי (3) בְּעֶצֶב תֵּלֵד הָאִשָּׁה בָנִים; (4) נַשׂ אֱלֹהִים הוּא טוֹב (5) לָתֵת לֵאלֹהִים וּבָרֵךְ שְׁמוֹ.

4. To be written in English letters:—*The new words of Genesis III.* 15—17.

5. To be written with points and vowel-signs:—*Genesis III.* 15—17 *from the unpointed text.*

6. To be written out:—Synopses of the verb נגר in the Hĭf. and Hŏf., and of נָפַךְ in Ḳăl, Nĭf., Pī'ēl, Hĭf., and Hŏf.

7. To be described:—The forms נָגַע, נָגְשָׁה, יִפַּח, יִטַּע, תִּגְעוּ, יִקַּח, תֵּן, תֵּת, יִתֵּן, וַיִּפֹּל, הִשִּׁיא, הַגִּיד.

7. *TOPICS FOR STUDY.*

(1) Form of the pronominal suffix הוּ and of the pron. suf. הָ with נ֫. (2) The pron. suf. of the 2 f. sg. (3) *Thou* (f.) *shalt bear.* (4) The accent Seğōltă; its *repetition.* (5) *Cursed* (m.), *Cursed* (f.). (6) Change from ֵ to ĕ. (7) ה֫ and ת֫. (8) Loss of נ.

(9) Assimilation of נ. (10) ֫ in sharpened syllables. (11) Synopsis and peculiarities of לָקַח; of נָתַן. (12) Synopses of נָטַל in various stems.

LESSON XXXVII.—GENESIS III. 18-21.

1. *NOTES.*

355. תַּצְמִיחַ—*she-will cause-to-spring-forth:* Hĭf. of צָמַח § **76.** 1. *c.* (1).

356. לָךְ—pausal for לְךָ *for-thee* (m.); לָךְ = *for-thee* (f.).

357. וְאָכַלְתָּ—Accent on ultima, because of the Wâw Convers. §§ **21.** 4; **70.** 3. *b.*

358. בְּזֵעַת—b^{e}zê-'ăθ—*in-sweat-of;* const. of זֵעָה.

359. אַפֶּיךָ—'ăp-pê'-χâ—*thy-nostrils;* from אַף *nose:*

a. Sg. אַף, dual אַפַּיִם, form before ךָ (or הָ) אַפֵּי; cf. חַיֶּיךָ.

b. The Dâğēš-fŏrtē in פ also serves as Dâğēš-lēnē, § **13.** 2. N. 1.

c. On the disjunctive accent Păšṭâ (֫) see §§ **22.** 8; **23.** 5, 6.

360. לֶחֶם—*bread;* cf. בֵּית לֶחֶם *Bethlehem.*

361. שׁוּבְךָ—*thy-returning;* Ḳăl Inf. const. with pron. suffix: This is a bi-literal verb, with forms differing from the corresponding triliteral forms; § **55.** 3.

362. מִמֶּנָּה—*from-her:* for מִמֶּנָהּ; cf. מִמֶּנּוּ for מִמֶּנְהוּ, § **51.** 5. *b.*

363. לֻקַּחְתָּ—lŭḳ-ḳâ'ḥ-tâ—*thou-wast-taken,* § **38.** 2.

364. תָּשׁוּב—*thou-shalt-return;* cf. תָּמוּת (231) and שׁוּבְךָ (361):

a. Ḳăl Impf. 2 m. sg. of the biliteral verb שׁוּב *turn.*

b. תָּקְטֹל is for תַּקְטֵל, the ֵ being attenuated, and the ֫ becoming ō under the tone.

c. Note that ă in תָּשׁוּב has been rounded to å in an open syl. before the tone; and that ◌ֻ has been lengthened to û.

365. חַוָּה—ḥăw-wå(h)—*Eve;* cf. חַיָּה *life.*

366. הִוא—*she.* This is an example of the usage of *K'θîv* and *Ḳ'rî;* see § **19.** The consonants here (i. e., the *K'θîv*) call for the pointing הוּא; the vowel (i. e., the Ḳ'rî) requires the reading הִיא. This is the regular way of writing *she* in the Pentateuch; § **50.** 3. *a.*

367. הָיְתָה—hå-y'θå(h)—*she-was:*

a. Ḳăl Perf. 3 f. sg. of the פ״ laryng., and ל״ה verb הָיָה *be,* § **82.** 4.

b. Méθĕğ with a long vowel before vocal š'wâ pretonic, § **18.** 2.

368. אֵם—but אִמּוֹ (266): אֵם is for אִמְּם, § **100.** 1. *a.*

369. חַי—pausal for חַיִּי; an adjective meaning *living.*

370. כָּתְנוֹת—kŏθ-nôθ—*tunics-of;* const. pl. of כְּתֹנֶת.

371. וַיַּלְבִּשֵׁם—wăy-yăl-bî-šēm—*and-he-caused-them-to-put-on:*

a. Hĭf. Impf. 3 m. sg. of לָבַשׁ, with suffix ם joined by ◌ֵ.

b. The ◌ֵ under בִּ is î, though written defectively.

2. *FORMS FOR SPECIAL STUDY.*

1. Verbal Forms:—לָקַחְתָּ, שָׁבְתְּ, תֹּאכַל, וְאָכַלְתָּ, תַּצְמִיחַ, וַיַּלְבִּשֵׁם, וַיַּעַשׂ, הָיְתָה, תָּשׁוּב.

2. Nominal Forms:—עֵשֶׂב, עָפָר, לֶחֶם, אָדָם, קוֹץ, עוֹר.

3. *PRINCIPLES OF SYNTAX.*

בְּזֵעַת אַפֶּיךָ תֹּאכַל לֶחֶם—*In,* or *at the cost of, the sweat of thy nostrils* (=face) *thou shalt eat bread.*

Principle 10.—The preposition בְּ may denote the condition *in*

which, or the cost *at* which a thing may be done, i. e., the manner or the price.

4. *GRAMMAR-LESSON.*

1. § **79.** 1, 2,	The peculiarities of verbs פ״א.
2. § **83.** Tabular View,	Synopses of קָטָא in various stems.
3. § **83.** 1,	Final א in verbs ל״א.
4. § **83.** 2. *a*, *b*, 3. *a*—*c*,	Medial א in verbs ל״א.

Note 1.—In the study of verbs פ״א and ל״א, follow the order indicated in previous lessons, analyzing exhaustively the familiar forms given under §§ **79.** 1, 2 and **83.** 1—3, and Remarks.

Note 2.—Use for practice (1) אָמַר *say*, (2) מָצָא *find*, (3) קָרָא *call*.

5. *WORD-LESSON.*

1. In the Word-Lists, under List VII., nouns numbered 105—115.
2. Make out a list of the new words in Genesis III., 11—21.

6. *EXERCISES.*

1. To be translated into Hebrew:—(1) *Ye will say, I shall say, she will say, thou* (f.) *wilt say;* (2) *I shall eat, we shall eat, they will eat;* (3) *He will be created, he will cause to call, he was created, he will be caused to call;* (4) *They called, she caused to find, thou* (f.) *wilt find;* (5) *I created, ye were created, thou wast caused to call, we filled* (Pi'ēl); (6) *They* (f.) *will call, ye* (f.) *will be created, call ye* (f.).

2. To be translated into Hebrew:—(1) *The earth caused to sprout forth for man grass and herbs and thorns and thistles;* (2) *We found in the field the fruit which God commanded* (צִוָּה) *not to eat;* (3) *The man shall die, and unto the dust he shall return;* (4) *I shall call the name of my wife Eve;* (5) *I have found my mother;* (6) *Eve was the wife of* (אִישׁ) *Adam, and the mother of all living;* (7) *Adam was Eve's husband.*

3. To be translated into English:—(1) מִי הָיָה אִישׁ חָוָה; (2) לֶקַח הָאָדָם (3) בָּרָא אֱלֹהִים אֶת־הָאָדָם וְאִשְׁתּוֹ וַיַּלְבִּשֵׁם יָמוּת כֹּל אֲשֶׁר (5) עָפָר אָנֹכִי וְאֶל־עָפָר אָשׁוּב (4) מִן־הָעָפָר בְּאַפָּיו נִשְׁמַת חַיִּים.

4. To be written in English letters:—*The new words of Genesis III.* 18—21.

5. To be written with points and vowel-signs:—*Genesis III.* 18—21 *from the unpointed text.*

6. To be written out:—Synopses of אָמַר in the Ḳăl and Hĭf. stems, of בָּרָא in Ḳăl and Nĭf., and of מָצָא in Pi'ēl and Hĭf.

7. To be described:—The Forms בָּרָא, נֹאכַל, תֹּאכֵל, וַיֹּאמֶר, בְּרֵאת, מָלֵאת, בָּרָאתִי, נְשָׁאַךְ, מִלְאוּ, יִקְרֵא, תִּדְרְשִׁי, יִקְרָא, תִּקְרֶאנָה.

7. *TOPICS FOR STUDY.*

(1) The primary form of קְטֹל. (2) The form שׁוּב. (3) אֵם, אִמּוֹ. (4) Peculiarities of verbs פ״א, (5) Inflection of אָטַל in Ḳăl Impf. (6) Peculiarities of verbs ל״א, (7) Synopses of קָטָא in various stems. (8) Inflection of קָטָא in Ḳăl Perf., in other Perfects, in Impf's and Imv's.

LESSON XXXVIII.—GENESIS III. 22-24.

1. *NOTES.*

372. הֵן—hēn—*behold:* same as הִנֵּה (145).

373. כְּאַחַד מִמֶּנּוּ—*like-one-of*[*from*]*-us:*

אַחַד is the construct of אֶחָד; here followed by a preposition.

b. מִמֶּנּוּ is the form of מִן with נוּ *us*, § **51.** 5. *a;* cf. מִמֶּנּוּ for מִמֶּנְהוּ.

374. לָדַעַת—*to-know:* Ḳăl Inf. const. of יָדַע *know*, § **80.** 2. (3); לְ, § **47.** 5.

375. וָחַי—wâ-ḥăy—*and-*(he-should)*-live:*

a. וָ is Wâw Conversive with Perf., the ־ being pretonic, § **70.** 2. *b.*

b. חַי is Ḳăl Perf. 3 m. sg. of the ע״ע verb חָיַי *live*, § **85.** 1.

376. וַיְשַׁלְּחֵהוּ— wăy-šăl-l°ḥē-hû — *and-*(= therefore)*-*(he)*-sent-him:*

a. D. f. of Wâw Convers. omitted from ׳ because it has not a full vowel.

b. Pi'ēl Impf. 3 m. sg. of the ל׳ laryngeal verb שָׁלַח *send;* corresponding form, יְקַטֵּלֵהוּ.

c. The pron. suffix הוּ joined to the verb by the vowel ־,

377. לַעֲבֹד—*to-till:* Ḳăl Inf. const., §§ **74.** 3. *a;* **47.** 3.

378. מִשָּׁם....אֲשֶׁר—*which....from-there,* = *whence.*

379. וַיְנַרֵּשׁ—wăy-ğâ'-rĕš—*and-he-drove-out:*

a. This is for וַיְגָרֵשׁ, like וַיְקַדֵּשׁ, or וַיְקַטֵּל; but

b. The ׳, having only a š°wâ, drops its D. f., while ר rejects its D. f., and ־ under נ becomes ־ in compensation.

c. The accent being drawn to the penult by ֽ, ־ appears instead of ־,

d. Pi'ēl Impf. 3 masc. sg. of the ע׳ laryngeal verb גָּרַשׁ *drive out*, § **75.** 1. *a.*

380. וַיִּשְׁכֵּן—wăy-yăš-kēn—*and-he-caused-to-dwell;* cf. וַיַּבְדֵּל;

a. Hĭf. Impf. 3 m. sg. (with ־, not ׳) from שָׁכַן *dwell*, § **70.** 3. R.

381. הַכְּרֻבִים—hăk-k°rû-vîm—*the-cherubim;* ־ for וּ; singular כָּרוּב.

382. הַמִּתְהַפֶּכֶת —hăm-mĭθ-hăp-pĕ́-χĕθ—*the-*(one)*-turning-itself:* cf. מְרַחֶפֶת, § **106.** 2. *b.*

383. לִשְׁמֹר—liš-mōr—*to-keep;* cf. לִשְׁמָרָה (223), and לַעֲבֹד (377).

2. *FORMS FOR SPECIAL STUDY.*

1. Verbal Forms:—וַיִּגְרֶשׁ, לָקַח, וַיִּשְׁלַח, וָחַי, יִשְׁלַח, לָדַעַת, וַיִּשְׁלְחֵהוּ, מִתְהַפֶּכֶת, וַיִּשְׁכֹּן.

2. Nominal Forms:—דֶּרֶךְ, חֶרֶב, לַהַט, כְּרֻבִים, עֵדֶן, עוֹלָם, אַחַד.

3. *PRINCIPLES OF SYNTAX.*

וְעַתָּה פֶּן־יִשְׁלַח יָדוֹ וְלָקַח....וְאָכַל....וָחַי—*And now, lest he put forth his hand and take and eat and live.*

Principle 11.—In the narration of actions which are to occur in the future, or which can be only conditionally realized, the first verb is in the Imperfect while those that follow are in the Perfect and connected with the preceding verb by means of *Wāw Convers.* (§ **70.** 1. *b.*)

4. *GRAMMAR-LESSON.*

1. § **82.** Tabular View, Synopses of קָטָה in Ḳāl, Pi'ēl, Hīθp. and Hīf. stems.
2. § **82.** 1. *a—f,* Treatment of the 3d radical when *final.*
3. § **82.** 2, Treatment of 3d rad. bef. vowel-additions.
4. § **82.** 3. *a—e,* Treatment of 3d rad. bef. cons.-additions.
5. § **82.** 4, The 3 sg. fem. of Perfects.
6. § **82.** 5. *a,b*(1)—(8), Short forms (*to be read*).

Note 1.—In the study of verbs ל"ה, follow the order indicated in previous Lessons, analyzing exhaustively the familiar forms given under § **82.** 1—5.

Note 2.—Use for practice (1) גָּלָה *reveal,* (2) בָּנָה *build,* (3) כָּלָה *complete.*

5. *WORD-LESSON.*

1. In the Word-Lists, under List II., verbs numbered 51—60.

2. Make out a list of the new words in Genesis III. 22—24.

6. *EXERCISES.*

1. To be translated into Hebrew:—(1) *He built, he will build, building;* (2) *He commanded* (Pī'ēl), *he will command, commanding, command thou;* (3) *To command* (abs.), *to build, to finish* (Pī'ēl); (4) *I commanded* (Pī'ēl), *we built, thou didst cause to reveal;* (5) *We finished* (Pı'ēl), *ye built, they* (f.) *will build;* (6) *They built, they* (m.) *will command, they caused to build;* (7) *She was, she made, she will finish, they will cause to reveal, thou* (f.) *wilt build.*

2. To be translated into Hebrew:—(1) *I shall put forth my hand and take the fruit and eat;* (2) *The man knew good and evil;* (3) *God drove forth* (Pī'ēl) *the man from Eden because he did that which God had commanded him not to do;* (4) *The man will serve the ground whence he was taken;* (5) *Behold the sword turning itself;* (6) *The cherubim and the sword will keep the way of the tree of life.*

3. To be translated into English:—(1) הִשְׁכִּין אֱלֹהִים מִקֶּדֶם לְגַן־עֵדֶן אֶת־הַכְּרֻבִים (2) וְאֵת לַהַט הַחֶרֶב הַמִּתְהַפֶּכֶת לִשְׁמֹר אֶת־דֶּרֶךְ עֵץ הַחַיִּים׃ (3) וַיֹּאמֶר יְהוָה אֱלֹהִים הֵן הָאָדָם הָיָה כְּאַחַד מִמֶּנּוּ לָדַעַת טוֹב וָרָע׃ (4) וְעַתָּה פֶּן־יִשְׁלַח יָדוֹ וְלָקַח גַּם מֵעֵץ הַחַיִּים וְאָכַל וָחַי לְעֹלָם׃ (5) וַיְשַׁלְּחֵהוּ יְהוָה אֱלֹהִים מִגַּן־עֵדֶן לַעֲבֹד אֶת־הָאֲדָמָה אֲשֶׁר לֻקַּח מִשָּׁם׃

4. To be written in English letters:—*The new words of Genesis III.* 22—24.

5. To be written with points and vowel-signs:—*Genesis* 22—24 *from the unpointed text.*

6. To be written out:—Synopses of בנה.

7. To be described:—The Forms הִשְׁקָה, יַעֲלֶה, עֹשֶׂה, בָּכֹה, תַּעֲשֶׂינָה, עָשִׂיתָ, הָיוּ, פְּרוּ, יִרְדוּ, עֲשֵׂה, רְאוֹת, עֲשׂוֹת, וַיָּצוּ, וַיִּכַל, וַיִּבֶן, הָיְתָה.

7. *TOPICS FOR STUDY.*

(1) The Pī'ēl, Ḥīf'īl, and Hīθpā'ēl stems of קָטָה. (2) The defective writing of וֹ. (3) Wâw Conversive with the Perfect. (4) Wâw Conversive with the Imperfect. (5) The form לָרַעַת. (6) The third radical of verbs called ל״ה. (7) The treatment of this radical when final, before vowel-additions, and before consonant-additions. (8) The Perf. 3 sg. fem. (9) Short forms. (10) Synopses of קָטָה in Ḳăl, Pī'ēl, Hīθp. and Hīf. stems.

LESSON XXXIX.—GENESIS IV. 1-4.

1. *NEW WORDS.**

1. הָרָה, (2) קָנָה, (3) אֵת (preposition), (4) יָסַף, (5) אָח, (6) הֶבֶל, (7) רָעָה, (8) צֹאן, (9) קַיִן, (10) מִנְחָה, (11) בְּכוֹרָה, (12) חֵלֶב, (13) שָׁעָה.

2. *NOTES.*

V. 1. וַתַּהַרְ for תַּהֲרֶה, §§ **74.** 2. *a*; **74.** 3. *b*, *d*; **82.** 1. *b* and 5. *b*. (5).—וַתֵּלֶד, §§ **80.** 2. a (1); **70.** 3. *a*. (3).—קָנִיתִי, § **82.** 3. *b*.—אֵת־יְ, preposition *with*.

V. 2. וַתֹּסֶף, for וַתּוֹסֶף, §§ **80.** 3. *b*; **65.** 5. *b*. (1); **70.** 3. *a*. (2) and (3).—לָלֶדֶת, §§ **47.** 5; **80.** 2. *a*. (3).—אָחִיו, §§ **105.** 3; **108.** 1. *b*. (2); הוּ = וֹ *his*, § **44.** 4. *c*.—הֶבֶל, for הֶבֶל, § **38.** 2.—רֹעֵה, abs. רֹעֶה, §§ **82.** 1. *c*; **107.** 3.

V. 3. יָמִים, plur. of יוֹם.—וַיָּבֵא, § 86. 1. *d*.—לַיהוָה, to be read לַאדֹנָי, § 47. R. 2.

V. 4. הֵבִיא, § 86. 1. *d*, and 3. *c*.—מִבְכֹּרוֹת, § 48. 1; 106. 3; sg. בְּכוֹרָה, § 91. 1. *a*, and 2. — וּמֵחֶלְבֵהֶן (û-mē-ḥĕl-vê-hĕn), §§ 49. 2; 48. 2; חֵלֶב (ê defective), const. plur. of חֵלֶב, § 109. 4. *e*; § 51. 1. *c*.—וַיִּשַׁע, for יִשְׁעָה, § 82. 5. *b*. (5).—מִנְחָתוֹ, from מִנְחָה, §§ 106. 2. *a*. (2); 108. 2.

3. *PRINCIPLES OF SYNTAX.*

V. 2.—וַתֹּסֶף לָלֶדֶת—*And she added to bear*=and again she bore.

Principle 12.—when the second of two verbs expresses the principal idea, the first merely modifying it, the second is often an infinitive depending upon the first.

4. *GRAMMAR-LESSON.*

1. § 82. Tabular View, Synopses of קָטָה in Nif., Pŭ'ăl and Hif. stems.
2. Paradigm K (pp. 204, 205), Inflection of קָטָה in all stems.

Note:—In the study of these forms use for practice, שָׁנָה *change*, פָּנָה *turn*, בָּכָה *weep*.

5. *EXERCISES.*

1. To be translated into Hebrew:—*It* (f.) *was built;* (2) *She was caused to turn;* (3) *They were completed* (Pŭ'ăl); (4) *You* (f.) *were caused to weep;* (5) *Turning, finishing, being built, being caused to turn;* (6) *Turn ye* (f.), *be ye* (m.) *finished, cause ye* (m.) *to build.*

* Consult the Hebrew-English Vocabulary, or a Hebrew Lexicon. Be prepared to pronounce, transliterate, describe and define each word. Let this work be done before proceeding further in the study of the Lesson.

2. To be translated into Hebrew:—(1) *The woman conceived and bore a son;* (2) *And the woman spoke again;* (3) *Abel was a shepherd and Cain was a tiller of the ground;* (4) *Cain brought an offering to God;* (5) *Eve was the wife of Adam and the mother of Cain and Abel;* (6) *Abel gave to God from the firstlings of his flock.*

3. To be written with points and vowel-signs:—*Gen. IV.* 1—4 *from the unpointed text.*

4. To be written out:—(1) *Synopses of* בכה *in Qăl, Nif., Hif. and Hŏf. stems, and of* כלה *in Pi'ēl and Pū'ăl stems.*

5. To be described:—The Forms יִבְנוּ, כַּלֵּה, בְּנוֹת, מְשַׁנֶּה, נְשֵׁנֵיתֶם, יַבְנוּ, and בְּנֵינָה.

6. *TOPICS FOR STUDY.*

(1) Absence of ה֫ from ל״ה forms. (2) The vowel of the perfect of ל״ה verbs before consonant-additions. (3) The וֹת— of Infin. cst. of verbs ל״ה. (4) The ִי of אָח before suffixes. (5) The ה֫ and ה֫ of verbs ל״ה. (6) The preposition לְ before יְהוָה and אֱלֹהִים.

LESSON XL.—GENESIS IV. 5-8.

1. *NEW WORDS.*

(1) חֲרָה, (2) לָמָּה, (3) הֲלוֹא, (4) אִם, (5) יִטַב, (6) נָשָׂא, (7) פֶּתַח, (8) חַטָּאת, (9) רֹבֵץ, (10) קוּם, (11) הָרַג.

2. *NOTES.*

V. 5. וַיִּחַר, for יִחֲרָה, §§ **82.** 5. *b.* (5); **70.** 3. (3).— לְקַיִן, on repeated accent, § **23.** 6.— וַיִּפְּלוּ, Méθĕğ with a sharpened syl-

lable; on assim. of נ, § **78.** 2. *a.*— פָּנָיו (pā-nāw), § **12.** 3; on יָ־, § **108.** 3. *d;* cf. אִפָּיו (185).

V. 6. לָמָּה = מָה with לְ, the D. f. being *firmative*, § **15.** 6.— חָרָה, with accent on penult, § **21.** 1.— לָךְ, pausal for לְךָ, § **51.** 3 (Tab. View).—פָּנֶיךָ (fā-nê'-xā), on יֶ־ (*ê*), § **108.** 3. *c.*

V. 7. הֲלוֹא (h'lô') = *nonne*, § **46.** 1; this ô is for â, § **30.** 6.— תֵּיטִיב, for תַּיְטִיב (cf. תַּקְטִיל), but ־ַי becomes ê (־ֵי) § **30.** 4. *b;* Hĭf. Impf. 2 m. sg. of יָטַב, § **81.** 2;— שְׂאֵת, a seemingly irreg. Ḳăl Inf. const. of נָשָׂא, § **78.** 1. *a.*— וְאֵלֶיךָ, § **23.** 6; prep. אֶל treated as a noun in plur. before the suffix ךָ, cf. פָּנֶיךָ in v. 6, § **108.** 3. *c;* the ־ֶ becomes ־ֵ in an open syl.— תְּשׁוּקָתוֹ, §§ **108.** 2; **18.** footnote.— תִּמְשָׁל־בּוֹ, §§ **17.** 2; **51.** 3. *a.*

V. 8. אָחִיו, see in v. 2.— בְּהִוָּתָם (bĭh-yô-θâm), on ־ָ, **47.** 2; on Mĕθĕğ, § **18.** 5; on וֹת, § **82.** 1. *e;* ־ָם, as in בְּהִבָּרְאָם (167). — וַיָּקָם (wăy-yâ'-ḳŏm), Ḳăl Impf. 3 m. sg. of קוּם; paradigm-form, יָקוּם, but see § **86.** 1 *e.* Rm; the ־ָ under ק, in an unaccented closed syl., must be ŏ.— וַיַּהַרְגֵהוּ, on ־ַ under י, § **74.** 2. *a;* on ־ַ under ה, § **74.** 3. *d;* on ־ָ, § **71.** 2. *b* (1); on גַ, **16.** 2; on ־ָ, § **71.** 2. *c.* (2).

3. *PRINCIPLES OF SYNTAX.*

V. 7.— הֲלוֹא אִם תֵּיטִיב שְׂאֵת:—*Is there not a lifting up, if thou doest well?*

Principle 13.—A question expecting an affirmative answer is introduced by הֲלֹא (= *nonne?*).

4. *GRAMMAR-LESSON*

1. § **84.**	Bi-literal verbs.
2. § **85.** Tabular View.	Synopses of קָטַט in Ḳăl, Nīf. and Hīf. stems.
3. § **85.** 1—2.	The doubling of the 2nd radical.
4. § **85.** 3.	The separating vowels.
5. § **85.** 4.	The changes in stem-vowels.
6. § **85.** 5.	The Preformative vowels.
7. Paradigm M.	Inflection of קָטַט in Ḳăl, Nīf, Hīf and Hŏf. stems.

Note 1.—Use for practice (1) חָלַל *begin*, (2) סָבַב *encompass*, (3) קָלַל *be light* (i. e. not heavy).

5. *EXERCISES.*

1. To be translated into Hebrew:—(1) *He began* (Hīf.), *to begin, beginning;* (2) *Encompassing, he will encompass, he was caused to encompass, he will be encompassed;* (3) *He will be light, he will make light;* (4) *Cause to encompass, encompass thou, he caused to encompass, be thou encompassed.*

2. To be translated into Hebrew:—(1) *The countenance of Cain fell, because God looked not with favor upon his offering;* (2) *Why was Cain angry* (Heb., *why was it kindled to Cain?*); (3) *Did not God say, let there be light?* (4) *Did not Abel bring to God from the firstlings of his flock?* (5) *Did not Cain kill Abel?* (6) *Why did Cain kill Abel?* (7) *God will bless him who shall do well.*

To be written with points and vowel-signs:—*Genesis IV.* 5—8 *from the unpointed text.*

4. To be written out:—Inflection of the Ḳăl Perf. and Impf. of סבב and ברך; of the Nīf. Perf. and Impf., of מָרַד, of the Hīf. Perf., Impf. and Imv. of קלל; of the Hŏf. Perf. and Impf. of חלל.

5. To be described:—The Forms קָלוּ, הֻחֲלָה, הָסַבִּי, תָּבוֹז, גִּלְגַּלְתִּי, סְבֻבָה, תְּסֻבֶּינָה, הֻסְבּוֹת, נְקַלּוֹתָ, סַבּוֹתָ.

6. *TOPICS FOR STUDY.*

(1) Repetition of post-positive accents. (2) The ending יִן־. (3) D. f. firmative. (4) The ending יְךָ־. (5) הֲלֹא. (6) The ending וֹת in ל״ה Inf. construct. (7) change of ֵ to ֶ. (8) ע״ע stems before vowel-additions. (9) ע״ע stems before consonant-additions.

LESSON XLI.—GENESIS IV. 9—12.

1. *NEW WORDS.*

(1) דָּם, (2) צָעַק, (3) פָּצָה, (4) פֶּה, (5) יָד, (6) כֹּחַ, (7) נָע (nâʿ), (8) נָד (nâḏ).

2. *NOTES.*

V. 9. וַיֹּאמֶר, § 79. 2.—אָחִיךָ, § 108. 1. b. (2).—יָדַעְתִּי, a פ״ן and ל laryng. verb, cf. קָטַלְתִּי; on the accent ֗, § 24. 4.—הֲשֹׁמֵר, §§ 46. 1; 68. 1. *a*.

V. 10. מֶה עָשִׂיתָ, §§ 54. *d*; 82. 3. *b*.—דְּמֵי, sg. abs., דָּם, const. דַּם, plur. abs. דָּמִים, const. דְּמֵי, §§ 109. 2. *b*; 106. 4. *b*.—צֹעֲקִים, §§ 68. 1. *a*; 109. 3. *R.* 3; plur. in agreement with דְּמֵי, not קוֹל.—אֵלַי, cf. אֵלֶיךָ in v. 7; really a plural noun.

V. 11. אָרוּר אָתָּה, §§ 68. 1. *c*; 38. 2, 3.—פִּצְתָה, §§ 18. 2; 82. 4. and N.—פִּיהָ, from פֶּה, §§ 105. 3; 108. 1. *b*. (2).—לָקַחַת § 47. 5; Ḳăl Inf. const. of לָקַח, § 78. 2. R. 2; on ֲ under ח instead of ָ, § 89. 2. *a*, מִיָּדֶךָ, pausal for מִיָּדְךָ, §§ 38. 1. N.; 108. 1. R. 2.

V. 12. הַעֲבֹד, corresponding to תִּקְטֹל ; on ֹ, § **74.** 2. *a;* on ֹ, § **74.** 3. b; on ō, § **64.** 1.— תסף (θô-sēf), for תּוֹסֵף; on ô, § **80.** 3. *b;* on ֵ, § **65.** 5. *b.* (1)— תֵּת־כֻּחָהּ, on Mĕθĕğ, § **18.** 4; on ֻ, lowered from ֹ, § **78.** 2. R. 3. (1); on הָ, § **51.** 3. *a.*— נָע וָנָד (nâʿ wâ-nâḏ,) on the ָ (â) under נ in each case, § **86.** *g;* the roots are נוּעַ and נוּד, and these forms, Ḳăl Part's act.— תִּהְיֶה, §§ **74.** 3. N.; **18.** 5; **82.** 1. *b.*

3. *PRINCIPLES OF SYNTAX.*

V. 9.—הֲשֹׁמֵר אָחִי אָנֹכִי—*Am I keeping my brother,* or, *my brother's keeper?*

Principle 14.—A question asking for information, without necessarily implying the affirmative or negative character of the answer, is introduced by הֲ.

4. *GRAMMAR AND WORD-LESSON.*

1. § **85.** 6 *a—d.* Intensive stems in ע״ע verbs.
2. Paradigm L. (p. 206). Inflection of Intensive stems in ע״ע verbs.
3. § **85.** 7. Place of accent in ע״ע verbs.
4. Word-Lists, Verbs numbered 61—70 in Lists II and III.

Note:—After a study of the principles here given, write out a full paradigm of סבב in Ḳăl, Nīf., Hīf. and Pôlēl.

5. *EXERCISES.*

1. To be translated into Hebrew:—(1) *She encompassed, they caused to encompass, thou* (f.) *wilt encompass, they will be encompassed;* (2) *Thou didst encompass, I caused to encompass, we were encompassed, thou wast caused to encompass;* (3) *Thou wast light, thou shalt encompass, I have encompassed, I shall cause to encompass;* (4) *Cause ye to encompass, they* (f.) *will encompass, ye* (f.) *will cause to encompass, encompass ye* (f.).

2. To be translated into Hebrew:—(1) *I do not know the name of the man;* (2) *Am I a ruler?* (3) *Who did this* (f.)? (4) *Cursed am I from the ground;* (5) *The blood* (pl.) *of thy brother hath cried out to God;* (6) *Thou shalt not till the ground;* (7) *Cain was a wanderer and a fugitive.*

3. To be written with points and vowel-signs:—*Genesis IV.* 9—12 *from the unpointed text.*

4. To be written out:—Synopses of סבב in Ḳăl, Nīf. and Hīf., of חקק in Ḳăl and Pôlēl, and of קלל in Nīf. and Hīf.

5. To be described:—The forms חָי, סֹב, יָסוֹב, יִמַּד, הֵסֵב, יֵקַל, נָסַב, הוּחַל, מֵסֵב, הֵחֵל.

6. *TOPICS FOR STUDY.*

(1) The ô in the Ḳăl Impf. of verbs פ״א. (2) The î of אָב, אָח, and פֶּה before suf. (3) Hē Interrogative. (4) The î of ל״ה Perf's. (5) The Perf. 3 f. sg. of verbs ל״ה. (6) Ḳăl Inf. const. of verbs פ״ן. (7) ־ֽ in pause. (8) Ḳăl Impf. of verbs פ laryngeal. (9) The ô of פ״י Hīf'ils.

LESSON XLII.—GENESIS IV. 13—17.

1. *NEW WORDS.*

(1) עָוֹן or עָוֺן, (2) סָתַר, (3) לָכֵן, (4) שִׁבְעָתַיִם, (5) נָקַם, (6) נָכָה, (7) יָשַׁב, (8) עִיר, (9) שֵׁם.

2. *NOTES.*

V. 13. גָּדוֹל, pl. גְּדוֹלִים; on formation, § **91.** 1. *a.*— עֲוֹנִי, from עָוֹן, of same formation as גָּדוֹל; before ־ִי, ־ֶי, ־ַי yields to ־ֵי, § **109.** 1. *a.*—מִנְּשׂוֹא, the ō being incorrectly written וֹ; מִן indicates comparison.

V. 14. גֵּרַשְׁתָּ, for גֵּרַשְׁתָּ, § 75. 1. *a*; synopsis?—וּמִפָּנֶיךָ, §§ 49. 2; 48.1; on ־ִ, § 108. 3. *c*.—אֶסָּתֵר, §§ 72. 2; 65. 1. *a*; synopsis?—וְהָיִיתִי, § 82. 3. *b*; on וְ, § 70. 2. b.—מֹצְאִי, part. מָצָא with ־ִ; on change of ָ to ַ, § 109. 3. R. 3.—יַהֲרְגֵנִי, composed of יַהֲרֹג ־ֵנִי and נִי; on change of ō to ֲ, and on ֹ , § 71. 2. *b*. (1), and *c*. (2); on change of ֲ to ֹ, § 74. 3. *c*.

V. 15. יֻקַּם, pausal for יֻקַּם; on D. f. in ק (for נ), § 78. 2. *b*; on ַ in Hŏf., § 78. 2. N. 1.—וַיָּשֶׂם, for וַיָּשֶׂם, § 70. 3. *a*. (3); ֶ for ־ִ, § 86. 1. *d*; root, שִׂים (ע״י).—הַכּוֹת־אֹתוֹ; on Mĕθĕg, § 18. 4; on D. f. in כ (for נ), § 78. 2. *b*; on הַ, § 58. 5. *b*; on וֹת, § 82. 1. *e*; on אֹת, § 51. 2.—מְצָאוֹ, cf. מְצָאִי in v. 14.

V. 16. וַיֵּצֵא (wăy-yê-ṣē′); for וַיֵּצֵא, but ו is dropped and ĭ becomes ê, § 80. 2. *a*. (1); on ֵ under צ, § 64. 3; on Mĕθĕg, § 18. 6; on the accented penult, § 21. 3.—מִלִּפְנֵי, (1) מִן, (2) לְ, (3) פְּנֵי — וַיֵּשֶׁב, for וַיֵּשֶׁב, but ו is dropped, and ĭ becomes ê, § 80. 2. *a*. (1); on shifting of tone, § 21. 3.

V. 17. וַיֵּדַע, for וַיֵּדַע, but ו is dropped, and ĭ becomes ê, § 80. 2. *a*. (1); on ֶ under ע instead of ַ, § 80. 2. *a*. (1).—וַתַּהַר, see note on v. 1.—וַתֵּלֶד, for וַתֵּלֶד, but ו is dropped and ĭ becomes ê, § 80. 2. *a*. (1); on shifting of tone, § 21. 3.—וַיְהִי בֹּנֶה עִיר, on the shifting of tone in the case of בֹּנֶה, § 21. 1; on D. l. in בּ, § 12. 3.

3. *PRINCIPLES OF SYNTAX.*

V. 14, גֵּרַשְׁתָּ אֹתִי הַיּוֹם—*thou hast driven me out this day.*

Principle 15.—The article often has its original demonstrative force.

V. 15.— כָּל־הֹרֵג קַיִן—*Any one killing Cain.*

Principle 16.— כָּל is used to make prominent a single one from among a plurality.

4. *GRAMMAR-LESSON.*

1. § **86.** Tabular View. Synopses of Ḳăl, Nīf., Hīf. and Hŏf. stems of Middle-Vowel verb.
2. § **86.** 1. *a, b, d, e, g.* The treatment of the stem-vowel in Middle-Vowel verbs.
3. § **86.** 2. *a, b, c,* The separating vowels.
4. § **86.** 3. *a, b, c,* 4. The Preformative vowels.
5. § **86.** 6. The place of the tone.

Note:—Use for practice, קוּם *to rise,* שׁוּב *to turn,* and כּוּן *to prepare.*

5. *EXERCISES.*

1. To be translated into Hebrew:—(1) *He will rise, thou shalt turn, turn thou, he will die, we shall die;* (2) *He caused to die, he was caused to turn, he will cause to prepare;* (3) *I caused to rise, ye* (m.) *caused to rise, they caused to rise;* (4) *Thou didst cause to turn, we shall cause to rise, I shall be caused to rise, she rose;* (5) *Ye turned, I rose, they will rise, we shall rise;* (6) *Rise thou* (f.), *rise ye* (f.), *she was risen* (Nīf.), *they were risen;* (7) *Thou shalt return, she was caused to return.*

2. To be translated into Hebrew:—(1) *God is greater than man;* (2) *I drove him out from the garden of Eden;* (3) *The woman will be hidden from the face of God;* (4) *Any one killing me shall die;* (5) *Any one finding him will kill Cain;* (6) *Cain was avenged seven-fold;* (7) *And Cain went out from Eden, and dwelt in the land of Nod.*

3. To be written with points and vowel-signs:—*Genesis IV.* 13—17 *from the unpointed text.*

4. To be written out:—The inflection in Kăl of כּוּן, קוּם; in Nĭf., of מוּג, מוּל; in Hĭf. and Hŏf., of רוּם, שׁוּב.

5. To be described:—The Forms נָקוּמוֹת, הֵקִימָה, יָקוּמוּ, קָמוּ, תְּשׁוּבֶינָה, שַׁבְתָּ, יְקוֹמוּ, אָשִׁיב, תָּשַׁבְנָה, הַשִּׁיבוֹת.

6. *TOPICS FOR STUDY.*

(1) Nouns with the original vowels ă—â (= ô). (2) The Pi'ēl of verbs ע laryngeal. (3) The יְ֫ (= *ê*) before suffixes ךָ and הָ, and before the plur. fem. נָה. (4) The יְ֫ of ל״ה Perfects. (5) The change of ֫ before ֫ to ֫. (6) The Hŏf. of verbs פ״ן. (7) The וֹת of ל״ה Inf's const. (8) The ֫ה (*ê*) of ל״ה participles. (9) The Article used as a demonstrative. (10) The separating vowel of Middle-Vowel verbs in Perfect and Imperfect.

LESSON XLIII.—GENESIS IV. 18-22.

1. *NEW WORDS.*

(1) שְׁתַּיִם (const. שְׁתֵּי), (2) אֹהֶל, (3) מְקֹנֶה, (4) תַּפַּשׁ, (5) כִּנּוֹר, (5) עוּגָב, (6) לָטַשׁ, (8) חָרַשׁ, (9) נְחֹשֶׁת, (10) בַּרְזֶל, (11) אָחוֹת.

2. *NOTES.*

V. 18. וַיִּוָּלֶד, root וָלַד (= יָלַד); on D. f. in וּ, §§ **13.** 2; **80.** 3. *a;* on the form, § **65.** 1. *a;* cor. form, יִקְטֹל—אֶת־עִירָד, the sign of the def. object with a subject, see Principle 17 (below).

V. 19. וַיַּקַּח, for וַיִּלְקַח; ל assim. like נ, § **78.** 2. R. 2; on ֫ under ק, § **76.** 1. *a.*—שְׁתֵּי (štê, *not* š'tê), the Š'wâ silent; the only

case in the language of a syllable beginning with two consonants without an intervening half-vowel; fem. of שְׁנֵי, const. of שְׁנַיִם — נָשִׁים, cf. (1) אִישׁ *man*, (2) אִשָּׁה *woman*, (3) אֲנָשִׁים *men*, (4) אֵשֶׁת *wife-of*, (5) נְשֵׁי *wives-of*.— הַשֵּׁנִית .... הָאַחַת, cf. the masc. forms הָאֶחָד .... הַשֵּׁנִי.

V. 20. וַתֵּלֶד, cf. note on v. 17.— אֲבִי, const. of אָב; on ־ִי, § **108.** 1. *b.* (2); on accent, § **24.** 5. *a.*–יֹשֵׁב, like קֹטֵל.—אֹהֶל, a *u*-class Seğolate, cf. בֻּקָר, § **89.** 1 *c;* here used collectively.— מִקְנֶה (miḳnê(h)), meaning *substance, cattle*, and governed by some word understood signifying possession; on form, § **96.** 2; on meaning of form, § **97.** 2.

V. 21. אָחִיו, see note on v. 2.— תֹּפֵשׂ, like קֹטֵל.—כִּנּוֹר, on form, § **93.** 4. *c.*— עוּגָב, on form, § **92.** 3.

V. 22. יֶלֶדֶת, § **60.** R. 3. *b;* Synopsis in Ḳāl, § **80.** 2. *a.*— לֹטֵשׁ, like קֹטֵל. — חֹרֵשׁ, like קֹטֵל — וַאֲחוֹת, const. of אָחוֹת, and ו with ־ according to § **49.** 3.

3. *PRINCIPLES OF SYNTAX.*

V. 18. —וַיִּוָּלֶד לַחֲנוֹךְ אֶת־עִירָד—*And Irad was born to Enoch.*

Principle 17.—The subject of a passive verb, which would be the *object* of the same verb if it were *active*, is often preceded by אֵת, the sign of the object.

V. 20.—יֹשֵׁב אֹהֶל וּמִקְנֶה—*Dwelling in tent*(s) *and* (possessing) *cattle.*

Principle 18.—Two nouns are sometimes connected with a verb, when, strictly speaking, only the former is applicable in meaning (*zeugma*).

4. *GRAMMAR- AND WORD-LESSON.*

1. Paradigm M. (p. 208), Inflection of Pôlēl and Pôlăl stems of middle-vowels verbs.
2. § **86.** 5. *a, b, c, d,* Intensive stems of middle-vowel verbs.
3. § **86.** 8. Interchange of forms between ע״ע and middle-vowel verbs.
4. Word-Lists, Verbs numbered 71—80 in List III.

5. *EXERCISES.*

1. To be translated into Hebrew:—(1) Inflection of קוֹם throughout the Pôlēl stem; (2) Synopsis of רוֹם in the Hīf. stem; (3) Inflection of קוֹם throughout the Hŏf. stem; (4) Synopsis of שׁוּב in the Ḳăl stem; (5) Synopsis of מוּל in the Nīf. stem.

2. To be translated into Hebrew:—(1) *I will know the name of that city;* (2) *Cain was building the city Enoch;* (3) *Cain and Abel were born to Adam;* (4) *Lamech had* (= *to Lamech were*) *two wives;* (5) *Adam was the father of Cain, and Eve was his mother;* (6) *Abel was the son of Eve, and Tubal Cain was the son of Zillah;* (7) *Father, father-of, mother, son, daughter, husband, wife, wife-of, brother, brother-of, sister, sister-of.*

3. To be written with points and vowel-signs:—*Genesis IV.* 18-22 *from the unpointed text.*

4. To be described.—נְקוּמוֹתָ, נָכוֹן, הֲשִׁיבוֹתָ, תָּקֹמְנָה, וַיִּשְׁבוּ, תְּשׁוּבֶינָה.

6. *TOPICS FOR STUDY.*

(1) אֵת with the subject. (2) Assim. of ל. (3) The pronunciation of שֶׁהָיִי. (4) The words meaning *man, men, woman, women, wife-of, wives-of.* (5) Separating vowels in ע״ע and middle-vowel verbs. (6) The *ô* of Ḳăl act. Part's. (7) *U*-class Seğolates. (8) Nouns formed by means of preformative מ. (9) The meanings of nouns with pref. מ.

LESSON XLIV.—GENESIS IV. 23-26.

1. *NEW WORDS.*

(1) נָשִׁים, irreg. plur. of אִשָּׁה, (2) אָזֶן, (3) אִמְרָה, (4) פִּצַּע, (5) יֶלֶד, (6) חַבְרָה or חֲבוּרָה, (7) שִׁבְעִים, (8) שִׁבְעָה, (9) עוֹד, (10) בֵּין, (11) שִׁית, (12) אַחֵר, (13) חָלַל.

2. *NOTES.*

V. 23. לְנָשָׁיו (lᵉnâ-šâw); on יָ_, § **108.** 3. *d.* (cf. פָּנָיו, אַפָּיו (v. 5)).—שִׁמְעָן, irreg. for שִׁמְעָנָה, ה_ having been dropped and _ inserted, § **37.** 2; Ḳăl Imv. 2 f. pl., like קִטְלָנָה; on _ under מ, § **76.** 1. *a.*—נְשֵׁי, const. of נָשִׁים, cf. נָשָׁיו above.—הַאְזֵנָה, for הַאֲזֵנָה like הַקְטֵלָנָה; on הַ § **58.** 5. *a. b;* on ֵ_, § **74.** 3. *b;* root, אָזַן.—אִמְרָתִי, cf. מִנְחָתוֹ in v. 4; on formation, § **89.** 4; on תִ_, § **108.** 2.—הֲרַגְתִּי, from הָרַג; synopsis in Ḳăl? on repetition of accent, § **23.** 6.—חַבְּרָתִי, with ְ_ for וֹ; cf. מִנְחָתוֹ in v. 4, and אִמְרָתִי above; on formation, § **93.** 6.

V. 24. יֻקַּם (for יִנָּקֵם), see on v. 15.—שִׁבְעָה, the sing. form, is *seven*, while שִׁבְעִים, the plur. form is *seventy*.

V. 25. וַיֵּדַע, see on v. 17.—וַתֵּלֶד, see on v. 20,—שֵׁת־לִי (šâθ), on Méθĕğ, § **18.** 4; the ֶ_ is á, § **86.** 1. *a;*— הָרַגוֹ = הָרַג + וֹ; in the open syl. *before* the tone an original ă is rounded to å, but in the open syl. *away* from the tone, ă is reduced to Šᵉwâ, § **71.** 1. *b.* (1), (2).

V. 26. גַּם־הוּא, the pronoun inserted thus to emphasize the preceding noun.—הוּחַל, from the root חָלַל; § **85.** 5. *d;* what stem?—לִקְרֹא, cf. לִשְׁמֹר; Ḳăl Inf. const.

3. *PARALLELISM IN HEBREW POETRY.*

(1) עָדָה וְצִלָּה שְׁמַעַן קוֹלִי
(2) נְשֵׁי לֶמֶךְ הַאְזֵנָּה אִמְרָתִי
(3) כִּי אִישׁ הָרַגְתִּי לְפִצְעִי
(4) וְיֶלֶד לְחַבֻּרָתִי׃
(5) כִּי שִׁבְעָתַיִם יֻקַּם־קָיִן
(6) וְלֶמֶךְ שִׁבְעִים וְשִׁבְעָה

Note 1.—The characteristic external feature of Hebrew poetry is parallelism.

Note 2.—In this song there are six lines or members; the second line is, in the main, a repetition of the thought expressed in the first; the fourth, a repetition of the third; hence the parallelism in the case of the first and second, and of the third and fourth members is called *synonymous.*

Note 3.—The same relation, however, does not exist between the fifth and sixth, the latter being necessary to complete the thought of the former; such parallelism is called *synthetic.*

Note 4.—Another kind of parallelism not illustrated in this passage is the *antithetic,* in which the second member is in contrast with the first.

4. *GRAMMAR-LESSON.*

1. § **80.** Tabular View, Synopses of יָטַל (= וָטַל) in various stems.
2. § **80.** 1. The treatment of original י when initial.
3. § **80.** 2. *a, b,* The two treatments in the Ḳăl Impf., Imv., and Inf. const.
4. § **80.** 3. *a-c,* The treatment of י when medial.

Note 1.—In the study of verbs פ״ן, follow the order indicated in previous Lessons, analyzing exhaustively the familiar forms given under § 80. 1—3.

Note 2.—Use for practice (1) יָשַׁב *sit, dwell,* (2) יָלַד *bring forth,* and (3) יָבֵשׁ (with ă in Ḳăl Impf.) *be dry.*

5. *EXERCISES.*

1. To be translated into Hebrew:—(1) *He will dwell,*[1] *I shall dwell, thou* (f.) *shalt dwell, dwell thou* (f.) *to dwell, to bring forth,*[1] *thou* (f.) *shalt bring forth;* (2) *He will know,*[1] *to know, we shall know;* (3) *He will sleep,*[2] *I shall sleep, we shall sleep;* (4) *He will be brought forth, thou wilt be known, he will be feared;* (5) *He will cause to dwell, I shall cause to know, to cause to bring forth, he was brought forth;* (6) *He was caused to know, she will be caused to bring forth.*

2. To be translated into Hebrew:—(1) *Hear ye* (m.) *my voice, and give ear to that which* (אֵת־אֲשֶׁר) *I shall say;* (2) *Adah and Zillah were the wives of Lamech;* (3) *Why didst thou kill the man whom I sent to thee?* (4) *Cain was avenged seven-fold;* (5) *He gave him to God;* (6) *They began* (Hīf.) *to call on the name of God.*

3. To be written with points and vowel-signs:—*Genesis IV.* 23-26 *from the unpointed text.*

4. To be written out:—Synopses of the verbs יָרַד in Ḳăl, Hīf. and Hŏf., of יָבַל in Hīf. and Hŏf., and of יָבֵשׁ in Ḳăl, Pi'ēl and Hīf.

5. To be described:—The forms יֵצֵא, יֵשֶׁב, תֵּלְדִי, יֵרְעוּ, יִישָׁן, הוֹרַד, הוֹלִיד, נוֹרַע יָוֵלֶד, הַעַת, לֶדֶת.

6. *TOPICS FOR STUDY.*

(1) The ending יָן־. (2) The form of the fem.-ending before suffixes. (3) The Hŏf. of verbs פ״ן. (4) The â in the Middle-Vowel Ḳăl Perfects. (5) The Hŏf. of verbs ע״ע. (6) Synonymous parallelism. (7) Synthetic parallelism. (8) Antithetic parallelism.

LESSON XLV.—REVIEW.

1. *WORD-REVIEW.*

1. Arrange in alphabetical order the roots of all verbal forms both old and new, occurring in the third and fourth chapters.

2. Arrange in alphabetical order the nominal forms of these chapters, using in each case the form of the absolute state.

3. Arrange in alphabetical order the various particles, prepositions and adverbs occurring in these chapters.

2. *VERSE-REVIEW.*

1. Pronounce the pointed text of each verse until it can be read aloud rapidly and without hesitation.

2. Write out on paper the unpointed text, one verse at a time, and then, without the aid of either pointed text or translation, insert the necessary points and vowel-signs. Compare the result with the pointed text, and note the mistakes; repeat the exercise till each verse can be pointed without mistake.

3. *GRAMMAR-REVIEW.*

1. Compare the forms of the Ḳăl Perf. (3 m. sg.) as they appear in the strong verb and in the various other classes of verbs, § **87.** 1. (Perfect.)

2. Compare the forms of the Ḳăl Impf. stem yăḳ-ṭŭl (3 m. sg.) as they appear in the strong verb and in the various other classes of verbs, § **87.** 1. (Impf. with ō).

3. Compare the same of the stem yăḳ-ṭăl, and of yăḳ-ṭĭl, § **87.** 1.

4. Compare the forms of the Hĭf'îl Perf. and Impf. (3 m. sg.) as they appear in the strong verb, and in the various other classes of verbs, § **87.** 3.

---

[1] This verb forms its Kal as described in § **80.** 2. *a.*

[2] This verb forms its Kal as described in § **80.** 2. *b.*

5. Compare the forms of the Nĭf'ăl Perf. and Impf. (3 m. sg.) as they appear in the strong verb and in the various other classes of verbs, § **87.** 4.

Note.—This includes (1) the statement of the forms, and (2) an explanation of the vowel-changes which are seen in each form.

4. *EXERCISES.*

To be translated into Hebrew:—

1. *He made man in the sixth day, and rested in the seventh day.*
2. *He will sanctify the seventh day, and will rest in it.*
3. *The woman will eat the fruit, and of it she will give to her husband who will eat with her.*
4. *In the day of your ruling the earth.*
5. *This is the day in which God spoke to the man.*
6. *Let us make for ourselves large girdles.*
7. *I gave her fruit, and we ate.*
8. *She gave him fruit, and he ate.*
9. *Cursed is the earth, because thou didst eat from this tree.*
10. *God made known to the woman that the man should rule over her.*
11. *I shall call the name of my wife Eve.*
12. *We found in the field the fruit which God commanded not to eat.*
13. *The man will serve the ground whence he was taken.*
14. *I shall put forth my hand and take the fruit and eat.*
15. *The woman conceived and bare a son.*
16. *Did not Abel bring to God from the firstlings of his flock?*
17. *The blood of thy brother hath cried out to God.*
18. *And Cain went out from Eden, and dwelt in the land of Nod.*
19. *Abel was the son of Eve, and Tubal Cain was the son of Zillah.*
20. *Why didst thou kill the man whom I sent to thee?*

LESSON XLVI.—GENESIS V. 1—16.

1. *NEW WORDS.*

(1) סֵפֶר, (2) חָיָה, (3) שְׁלֹשִׁים, (4) מֵאָה, (5) אַחַר, (6) שְׁמֹנֶה, (7) בַּת, (8) תֵּשַׁע, (9) חָמֵשׁ, (10) שֶׁבַע, (11) שְׁתֵּים עֶשְׂרֵה,[1] (12) תִּשְׁעִים, (13) אַרְבָּעִים, (14) עֶשֶׂר, (15) שִׁשִּׁים.

2. *NOTES.*

V. 1. זֶה סֵפֶר *This* (is the) *book-of; this book* would be תּוֹלְדוֹת—.הַסֵּפֶר הַזֶּה (for tăw-lᵉdôθ), § **98.** 3; used only in pl., from וָלַד—"א[2] בְּיוֹם בְּרֹא, *in the day of the creating of God;* "א being definite, בְּרֹא is definite, and consequently יוֹם is definite, Principle 4.—בְּרֹא, Kăl Inf. const. of בָּרָא.

V. 2. בְּרָאָם, on ַ_, § **71.** 1. *b.* (1); on ַ_ under ר, § **71.** 1. *b.* (2); on ַ_ under א, § **71.** 1. *c.* (3.)—וַיְבָרֶךְ, §§ **75.** 1. *a;* **21.** 3; הִבָּרְאָם, the first ִ_=Mĕθĕğ, the second = Sĭllûḳ; on D. f. § **72.** 2; the ם_, same as in בְּרָאָם.

V. 3. וַיְחִי, for וַיִּחְיֶה from חָיָה *live,* as וַיְהִי for וַיִּהְיֶה from הָיָה *be.*—שְׁלֹשִׁים וּמְאַת שָׁנָה lit., *thirty and a hundred of year;* note that (1) the word for *thirty* is the plural of *three* (שָׁלֹשׁ), (2) the word for *hundred* is const., (3) the word for *year* is sg.— וַיּוֹלֶד, Hĭf. of וָלַד (יָלַד), § **80.** 3. *b;* on ֶ_ for ַ_, §§ **21.** 3; **36.** 4. *a;* on ֶ_ for י ַ_, § **70.** 3. R.

V. 4. יְמֵי, § **116.** 12.—אַחֲרֵי, noun in plur. const. used as a preposition, § **119.** 3. *a.*—הוֹלִידוֹ. Hĭf. Inf. const. (for hăw-lîḏ) with suffix וֹ.—בָּנִים וּבָנוֹת, see the various forms of these words, § **116.** 9, 10.

---

[1] *Twelve,* not given in the Vocabulary in this form.

[2] "א is the abbreviation of אֱלֹהִים.

Vs. 5, 6. חַי, Ḳăl Perf. 3 m. sg. of the ע״ע root חָיַי, § 85. 1.—וַיָּמָת (wăy-yå-mōθ), pausal for וַיָּמָת, § 86. 1. *e.* R.—חֲמֵשׁ שָׁנִים, the numeral sg. in form, the subst. plural.

Vs. 8—10. שְׁתֵּים עֶשְׂרֵה lit., *two ten = twelve;* שְׁתֵּים, a contraction of שְׁתַּיִם (cf. שְׁתֵּי, ch. IV. 19), and עֶשְׂרֵה, a form of עֶשֶׂר *ten.*—תִּשְׁעִים, pl. of תִּשְׁעָה or תֵּשַׁע *nine.*—חֲמֵשׁ עֶשְׂרֵה lit., *five ten = fifteen,* cf. above.

Vs.13, 16. אַרְבָּעִים, plur. of אַרְבָּעָה or אַרְבַּע *four.*—שִׁשִּׁים, plur. of שִׁשָּׁה or שֵׁשׁ *six.*

3. *PRINCIPLES OF SYNTAX.*

V. 4.—אַחֲרֵי הוֹלִידוֹ—*After his begetting = after he had begotten.*

Principle 19.—Where the Hebrew uses a preposition and an Infinitive, the English prefers a conjunction and a finite verb.

V. 6.—חֲמֵשׁ שָׁנִים: שֶׁבַע שָׁנִים; עֶשֶׂר שָׁנִים;—*Five years; seven years; ten years.*

Principle 20.—With the numerals 3—10 the noun is put in the plural.

Principle 21.—The numerals 3—10 assume the secondary or *masculine* form, when the noun is feminine. [שָׁנִים is feminine, though it has a masculine ending.]

V. 5.—שְׁלֹשִׁים שָׁנָה; תִּשְׁעִים שָׁנָה; שִׁבְעִים שָׁנָה.—*Thirty years; ninety years; seventy years.*

Principle 22.—The tens, formed by changing ה_ of the units to ים_ (except עֶשְׂרִים *twenty,* from עֶשֶׂר *ten*), have the accompanying noun in the *singular.*

4. *GRAMMAR- AND WORD-LESSON.*

1. § **117.** General view, The numerals 1—10, 11, 12, 20—90, 100, 1,000
2. § **117.** 1—8, The formation and use of the Cardinals.
3. § **117.** 9—12, The formation and use of the Ordinals.
4. Word-Lists, Verbs numbered 81—90 in List III.

5. *EXERCISES.*

1. To be translated into Hebrew:—(1) *Seven years;* (2) *Nine years;* (3) *Forty years;* (4) *Sixty years;* (5) *Three sons;* (6) *Three daughters;* (7) *Thirty sons and thirty daughters;* (8) *Forty days and forty nights;* (9) *Four heads;* (10) *Fifty days;* (11) *The seven stars;* (12) *Seven of*[1] *the stars;* (13) *Four seasons;* (14) *Twenty-seven days;* (15) *One hundred and fifty-nine years.*

2. To be translated into Hebrew:—(1) *This* (is) *a good book;* (2) *This good book was given to me;* (3) *In his own likeness God created man;* (4) *In the day that God made earth and heaven* (Heb. order, *In day of making of God*); (5) *In the day that God created man* (Heb. order, *In day of creating of God man*); (6) *After he had begotten a son* (Heb., *after his begetting a son*); (7) *And the man lived three hundred and forty-eight years;* (8) *And he begat four sons and three daughters, and he died;* (9) *And all the days of the man which he lived upon the face of the earth after he had begotten sons, were nine hundred and ninety-nine years.*

3. To be written:—A transliteration of verses 1 and 2 of chapter V.

4. To be written:—A verbal form of the Ḳăl Imperfect 3 m. sg. in each of the classes of verbs.

5. To be written:—The numerals 1—10 in English letters.

6. *TOPICS FOR STUDY.*

(1) Position and agreement of the demonstrative. (2) Nouns formed by prefixing תּ. (3) The vowel-changes in קָטְלָם. (4) The short form of ל״ה Imperfects (5) Position and agreement of numerals. (6) פ״ן Hĭf'îls. (7) Prep. with plur. form. (8) ע״ע Ḳăl Perfect 3 m. sg. (9) ע״ו Ḳăl Impf. 3 m. sg. with Wăw convers. in pause. (10) Formation of numerals 20—90. (11) The various forms of the word for *one hundred.* (12) *The form of the numerals* 3—10 with fem. nouns, with masc. nouns.

---

[1] The word *of* after a cardinal must be expressed by מִן.

LESSON XLVII.—GENESIS V. 17-32.

1. *NEW WORDS.*

(1) נָחַם, (2) מַעֲשֶׂה, (3) יָד.

2. *NOTES.*

Vs. 17—21. וַיְהִיוּ, on Měθěğ, § **18.** 5; on ־, § **74.** 2. *b.* R. 2; on omission of third radical, § **82.** 2. חָמֵשׁ, used with a fem. noun; form with masc. noun, חֲמִשָּׁה; ordinal, חֲמִישִׁי.—שְׁתַּיִם, fem. of שְׁנַיִם; cf. שְׁתֵּי, ch. IV. 19.—וּמְאַת שָׁנָה lit., *and*-(a)-*hundred*-*of year*.—כְּהוֹשָׁלַח (v. 21), pausal for כְּהוֹשֶׁלַח.

Vs. 22—24. וַיִּתְהַלֶּךְ, form and synopsis? force of Hīθpă'ēl expressed here by the word *live*.—וַיְהִי כָל-יְמֵי. D. l. in כ after disj. accent; verb in sg. agreeing with כָּל, while in v. 17 it was pl., agreeing with יְמֵי.—וְאֵינֶנּוּ (w'ē-nĕn-nû); on ֵ־, § **111.** 2. R. 1; on נ ־, §§ **118.** 2. *c;* **71.** 2. *c.* (3) and N. 1; on the D. f. in נ, § **71.** 2. *c.* N. 2; four elements, וּ, אַיִן, נ־, הוּ; on ־ה, § **24.** 5.

V. 29. זֶה, these accents need not be considered here.—יְנַחֲמֵנוּ, Pī'ēl Impf. 3 m. sg. of the פ״ן and ע laryng. root נָחַם *comfort*, with the suffix נוּ *us;* on D. f. of Pī'ēl in ח, § **75.** 1. *b;* on ־ֵ, § **71.** 2. *c.* (2).—מִמַּעֲשֵׂנוּ, made up of מִן, מַעֲשֶׂה (§ **96.** 1), and נוּ.—וּמֵעִצְּבוֹן, made up of וּ (§ **49.** 2), מֵ (§ **48.** 2), and the const. state of עִצָּבוֹן, the ־ָ yielding to šᵉwâ, § **109.** 3. a.—יָדֵינוּ, *sg.* יָד, *dual* יָדַיִם; before suffixes the old construct ending *ay* is used; this before נוּ is contr. to ê, § **108.** 3. *b.*—אֲרֻרָה ('ē-rᵊrâh), Pī'ēl Perf. 3. m. sg. of the פ laryng., and ע״ע verb אָרַר *curse;* for אֵרַר, but ר refuses D. f. (§ **75.** 1. *a*), hence אֵרַר; ־ָה be-

comes הָ־, § **71.** 1. *c.* N.—אֲשֶׁר אֵרְרָהּ יְהוָה lit., *which cursed-her the Lord = which the Lord cursed.*

3. *PRINCIPLES OF SYNTAX.*

V. 27. וַיִּהְיוּ כָּל־יְמֵי מְתוּשֶׁלַח—*And* WERE *all the days of Methusaleh.*

וַיִּהְיוּ כָּל־יְמֵי לֶמֶךְ—*And* WAS *all the days of Lamech.*

Principle 23.—The verb in such cases as these may be placed either in the singular or in the plural

V. 31. אֲשֶׁר אֵרְרָהּ יְהוָה—*Which the Lord cursed.*

Principle 24.—אֲשֶׁר is a particle indicating the subordinate character of the following clause. The subordinate idea may be relative, temporal, causal, etc. In a relative clause having the relative as object of the verb, that object is expressed by a pronominal suffix attached to the verbal form. In a majority of cases, however, the pronominal suffix is not expressed.

4. *GRAMMAR- AND WORD-LESSON.*

1. § **88.** 1—4	What is included in inflection of nouns.
2. § **89.** 1,2; **109.** 4. 5.	Strong and weak Seğolates.
3. § **90.** 1, 2,	Nouns with two, originally short, vowels.
4. § **91.** 1, 2,	Nouns with one short and one long vowel.
5. § **92.** 1—3,	Nouns with one long and one short vowel.
6. Word-Lists.	The verbs numbered 91—100 in List III.

Note.—In the study of noun-formation, copy promiscuously, on a slip of paper, nouns of various classes, and then take up each noun and classify it, noting (1) its root with the meaning of the same, (2) the original vowels used in its formation, (3) the changes which these original vowels have suffered, (4) the force of the formation, (5) the meaning of the word.

5. *EXERCISES.*

1. Form nouns as follows:—(1) From גֹּרֶל, a *u*-class Seğolate, a noun of the third class (ă—â); (2) from חֹרֶשׁ, a *u*-class Seğolate, a noun of the second class, (ă—ă); (3) from חֶרֶב, an *a*-class Seğolate, a *u*-class Seğolate (masc. and fem.), a noun of the fourth class (â—ī), a noun of the second class (ă—ĭ); (4) from עֵבֶר, an *a*-class Seğolate, a fem. noun of the third class (ă—â); (5) from אֵמֶן, a *u*-class Seğolate, a fem. noun of the third class (ĭ—û), a noun of the third class (ă—â), two nouns of the second class (ă—ă, ă—ĭ); (6) from מֶתֶק, an *i*-class and a *u*-class Seğolate, a noun of the third class (ă—â); (7) from קֶרֶב, a noun of the second class (ă—ĭ), a noun of the third class (ă—â).

2. To be translated into Hebrew:— (1) *Will Noah comfort Lamech from the work of his hands?* (2) *God cursed* (Pī'ēl) *the ground which he had created;* (3) *I will walk* (Hīθpā'ēl) *with God, who created* (Heb., *the one creating*) *the heavens and the earth;* (4) *The sorrow of Cain was exceedingly great;* (5) *The man whom God cursed will die.*

3. To be written:—A transliteration of verses 28 and 29 of chapter V.

4. To be written:—A verbal form of the Hif'īl Perf. 3 m. sg. in each of the classes of verbs.

6. *TOPICS FOR STUDY.*

(1) The Ḳăl Impf's of חָיָה, הָיָה. (2) The word שְׁתַּיִם. (3) Various forms of the word for *one hundred.* (4) Particles with verbal suffixes. (5) Synopsis of נָחַם in Pī'ēl. (6) Synopsis of אָרַר in Pī'ēl. (7) Măppîḳ. (8) *A*-class, *I*-class, *U*-class Seğolates. (9) Laryngeal, ע״ן, ע״ע, ע״ו, ע״י and ל״ה Seğolates. (10) Feminine Seğolates. (11) Meaning of Seğolates. (12) Nouns with two short vowels. (13) Nouns with one short and one long vowel. (14) Nouns with one long and one short vowel.

LESSON XLVIII.—GENESIS VI. 1-8.

1. *NEW WORDS.*

(1) רָבַב, (2) בָּחַר, (3) דּוּן, (4) שְׁגֶגֶם (in the text. שְׁגַגַם), (5) נְפִלִים, (6) גִּבּוֹר, (7) יֵצֶר, (8) מַחְשָׁבָה, (9) לֵב, (10) רַק, (11) נָחַם (in Nif.), (12) עָצַב, (13) מָחָה, (14) חֵן.

V. 1. הַחֵל, from חלל, § 85. 1. *a*, 4. *d*; on ֵ under ה, § 85. 5. *c*; synopsis in Hif.?—לָרֹב, prep. ל with pretonic ă; רֹב, inf. const. from רבב, § 85. 1. a; synopsis in Ḳăl?

V. 2. וַיִּרְאוּ, Ḳăl Impf. 3 m. pl. of רָאָה; on loss of third radical (ה), § 82. 2.—בְּנֵי and בְּנוֹת, constructs of בָּנִים, בָּנוֹת.—טֹבֹת, cf. טוֹב, טוֹבָה, טוֹבוֹת טוֹבִים; ô written defectively.—הֵנָּה, D. f. firmative, §§ 15. 6; 50. 3. *e*.—וַיִּקָּחוּ, from לָקַח *take*; on assim. of ל, § 78. 2. R. 2; on omission of D. f. and on Răfê, §§ 14. 2; 16. 2; synopsis in Ḳăl?—נָשִׁים, § 116. 7.—בָּחָרוּ, pausal for בָּחֲרוּ.

V. 3. יָדוֹן, Ḳăl Impf. 3 m. sg. The form looks like that of יָבוֹא, but it may be from רנן, with ō written like ô as sometimes happens. Nothing certain is known as to either form or meaning.—בְּשַׁגַּם, rather to be read בְּשֻׁגָּם = *in* (their) *wandering*; from שָׁגַג, with ă instead of ŭ in the inf. cst.; the traditional rendering *in that also* is based on the analysis בְּ *in*, שֶׁ = *that* (§ 53. 2), גַּם *also*.—יָמִיו, cf. אַפַּיִם, פָּנִים, § 108. 3. *d*.

V. 4. אַחֲרֵי־כֵן אֲשֶׁר lit., *after so, when=afterwards, when*.—יָבֹאוּ, cf. the paradigm-form יָקוּמוּ; the ô is for â, the form corresponding to yăḳ-ṭăl not yăḳ-ṭŭl; § 86. 1. *c*; the Impf. designates *habitual action* in past time.—הַגִּבֹּרִים, § 93. 4. *c*.—עוֹלָם, § 92.

1.—אַנְשֵׁי, const. of אֲנָשִׁים, which is plur. of אִישׁ, § **116.** 5.

V. 5. רַבָּה, an adj. fem. sg.[1] from רַב, §§ **100.** 1. *a;* **109.** 5. *b.*—רָעַת, const. of רָעָה.—יֵצֶר.—מַחְשְׁבֹת, const. pl. of מַחֲשָׁבָה.—לִבּוֹ, an ע״ע *i*-class Seğolate; §§ **100.** 1. *a,* **109.** 5. *b.*

Vs. 6—8. וַיִּנָּחֶם, §§ **21.** 3; **65.** 1. *a.*—וַיִּתְעַצֵּב, cf. וַיִּתְהַלֵּךְ in ch. V. 22.—אֶמְחֶה, on ה_=ê § **82.** 1. *b.*—בָּרָאתִי, on repeated accent, § **23.** 6; on ֫ under ר, § **83.** 1.—נִחַמְתִּי, for נִנְחַמְתִּי, the second נ being assimilated and the D. f. implied in ח; Nīf. Perf. 1 c. sg. of נָחַם; Nīf. = *repent*, Pī'ēl (ch. V. 29) = *comfort.*—עָשִׂיתָם, on ־ instead of ־, § **71.** 1. *b.* (1); the î with ת, written defectively.—בְּעֵינָי, on first ִי_, § **109.** 5. a; on second ִי_, § **107.**

3. *PRINCIPLES OF SYNTAX.*

V. 4.—בַּיָּמִים הָהֵם.—*In the days the those* = In those days.

Principle 25.—The 3rd personal pronoun is used as the remote demonstrative (*that, those*), and as such stands after its noun, agreeing with it in gender, number and definiteness.

4. *GRAMMAR- AND WORD-LESSON.*

1. § **93.**	Nouns with second radical reduplicated.
2. §§ **96, 97.**	Nouns with מ prefixed; their signification.
3. § **98.**	Nouns with ת prefixed.
4. § **99.**	Nouns formed by means of affixes.
5. Word-Lists,	The verbs numbered 101—110 in List III.

Note.—In the study of noun-formation, copy promiscuously, on a slip of paper, nouns of various classes, and then take up each noun and classify it, noting (1) its root, with the meaning of the same, (2) the original vowels used in its formation, (3) the changes

[1] The Kal Perf. 3 f. sg. of רָבַב would be רָבָה.

which these original vowels have suffered, (4) the force of the formation, (5) the meaning of the word.

5. *EXERCISES.*

1. Form nouns as follows:—(1) from לָמַד, a noun with מ prefixed (ă—ā), and one with ת (ă—î); (2) from אָכַל, a fem. *u*-class Seğolate, a noun with מ prefixed (ă—ă); (3) from חָשַׁךְ, a *u*-class Seğolate, a noun with מ prefixed (ă—ă); (4) from גָּבַר, an *a*-class Seğolate, a noun with second radical doubled (ĭ—â); (5) from זָמַר, an *a*-class Seğolate, a fem. *i*-class Seğolate, a noun with מ prefixed (ĭ—â); (6) from סָפַר, an *i*-class Seğolate, a noun with מ prefixed (ĭ—ă).

2. To be translated into Hebrew:—*The daughters of men were exceedingly fair* (טוֹב); (2) *Mankind multiplied;* (3) *We chose wives from all the daughters of men;* (4) *I have found favor in his eyes;* (5) *From eternity unto eternity I am God;* (6) *I grieved in my heart;* (7) *I will not repent that I have made them;* (8) *Those heroes are the men of renown* (*name*).

3. To be written:—A transliteration of verses 1, 2 of chapter VI.

4. To be written:—A verbal form of the Hĭf'îl Impf. 2 m. sg. in each of the classes of verbs.

6. *TOPICS FOR STUDY.*

(1) ע״ע Hĭf'îls. (2) The absence of ׳ in verbs ל״ה. (3) The various forms of the words for *son, daughter.* (4) The personal pronouns. (5) The demonstrative pronouns. (6) The words יְדוֹן and בְּשַׁנַּם. (7) The words meaning *his faces, his nostrils, his days, his eyes.* (8) The Impf. of habitual action in past time. (9) ע״ע *i*-class Seğolates. (10) The remote demonstratives. (11) Nouns with second radical reduplicated. (12) Nouns with מ prefixed. (13) Nouns with ת prefixed. (14) Nouns with affixes.

LESSON XLIX.—GENESIS VI. 9-15.

1. *NEW WORDS.*

(1) צַדִּיק, (2) תָּמִים, (3) דּוֹר, (4) שָׁחַת, (5) חָמָס, (6) תֵּבָה, (7) גֹּפֶר, (8) קֵן, (9) כָּפַר, (10) חוּץ, (11) כֹּפֶר, (12) אַמָּה, (13) אֹרֶךְ, (14) רֹחַב, (15) קוֹמָה.

2. NOTES.

V. 9. אֱלֹהִים, § **52.** 1. *c.*— תּוֹלְדֹת, § **98.** 1.— בְּרֹתָיו = (1) בְּ, (2) דּוֹר, (3) וֹת, (4) יו (cf. אַפָּיו); on the pl. ending יו after the pl. ending ôθ, § **108.** 4 and N.—צַדִּיק, § **93.** 5. —תָּמִים, § **91.** 1. *b.* —"אֶת־הָאֱ, here the prep. *with*, not the sign of the def. object.

Vs. 10, 11. וַיּוֹלֶד, §§ **80.** 3. *b*; **70.** 3. *a.* (2), (3).—וַתִּשָּׁחֵת, Synopsis?—וַתִּמָּלֵא, Synopsis?

Vs. 12, 13. נִשְׁחָתָה, pausal for נִשְׁחֲתָה, Nīf. Perf. 3 f. of שָׁחַת; Synopsis?—הִשְׁחִית, Synopsis?— דַּרְכּוֹ, from דֶּרֶךְ; cf. זֶרַע and זֹרְעוֹ, צֶלֶם and צַלְמוֹ.—בָּא (bâ'), either Perf. or Part. in form, § **86.** 1. *a*, *g.*— לְפָנַי, § **108.** 3. *a.* (1).— מְלֵאָה, Synopsis? — וְהִנְנִי, the adverbial particle הֵן or הִנֵּה with a verbal suffix, § **118.** 2. *a.*—מַשְׁחִיתָם Hĭf. part. of שָׁחַת, with suf. ם.

Vs. 14, 15. עֲשֵׂה ('ᵃśê(h)), § **82.** 1. *f.*—טֹבָת, const. of תֵּבָה, the ֹ being unchangeable.— עֲצֵי, const. of עֵצִים, cf. פְּנֵי from פָּנִים.—קִנִּים, plur. of קֵן, an ע״ע *i*-class Seĝolate, § **109.** 5. *b*; cf. לֵב.—וְכָפַרְתָּ, with accent on ultima, § **70.** 3. *b*; cf. change from ult. to penult in וַיֹּאמֶר.—מִבַּיִת וּמִחוּץ, *from house and from outside = within and without.*— תַּעֲשֶׂה, cf. נַעֲשֶׂה (ch. I. 26).— רָחֳבָה (rŏḥ-bâh), on ֹ (ŏ) under ר, § **111.** 1. R. 1; on ה § **108.** 1. R. 1.

3. *PRINCIPLES OF SYNTAX.*

V. 10.—שְׁלֹשָׁה בָנִים—*Three sons.*

Principle 26.—When the substantive is *masculine*, the feminine form of the numeral is employed; and when the numeral is a *unit*, the plural form of the substantive is employed.

V. 15.—וְזֶה אֲשֶׁר תַּעֲשֶׂה אֹתָהּ—*And this is how thou shalt make it.*

Principle 27.—The relative particle often introduces subordinate clauses that are not strictly relative clauses.

4. *GRAMMAR- AND WORD-LESSON.*

1. § **100,** Nouns from bi-literal roots.
2. § **104,** Various ways of forming noun-stems.
3. § **105,** The Formation of Cases.
4. Word-Lists, Verbs numbered 111—120 in Lists III and IV.

5. *EXERCISES.*

1. To be translated into Hebrew:—(1) *Noah had* (Heb., *were to Noah*) *three sons;* (2) *The sons of Noah were not righteous;* (3) *The earth was corrupt, and it was full of violence;* (4) *The way of all flesh was corrupt;* (5) *God will destroy the earth and all who dwell upon it;* (6) *Thou shalt make a house; its length shall be twenty cubits, its breadth, twelve cubits, its height, twenty-four cubits.*

3. To be written:—A transliteration of verses 14 and 15 of chapter VI.

4. To be written:—A verbal form of the Nĭf'ăl Perfect 3 m. sg. in each of the classes of verbs.

6. *TOPICS FOR STUDY.*

(1) The demonstrative pronoun. (2) Nouns formed by reduplication of second radical. (3) אֵת־, a preposition. (4) The ô of פ״ו

Hĭf'îls. (5) The characteristics of the Nīf'āl Impf. (6) Primary form of *u*-class Seğolates. (7) Adverbs with verbal suffixes. (8) The ê of ל״ה Imv's. (9) ע״ע *i*-class Seğolates. (10) Change of accent after Wâw Convers. with Perfect. (11) The form of *u*-class Seğolates before pron. suffixes. (12) Relics of the nominative case-ending. (13) The Hē Directive. (14) Other relics of the accusative case-ending.

LESSON L.—GENESIS VI. 16-22.

1. *NEW WORDS.*

(1) צֹהַר, (2) מִלְמַעְלָה, (3) צַד, (4) תַּחְתִּי, (5) שְׁנִים, (6) שְׁלִישִׁים, (7) מָבוֹל (8) גָּוַע, (9) קוּם, (10) בְּרִית, (11) אָסַף.

2. *NOTES.*

V. 16. צֹהַר, § **89.** 1. *c.*—תַּעֲשֶׂה (tă'ăśĕ(h), on ֵ under ת, § **74.** 2. *a;* on the ֵ under ע, § **74.** 3. *b;* on ה֫, § **82.** 1. *b.*—תְּכַלֶּנָּה, made up of (1) תְּכַלֶּה, with ה֫ lacking, (2) נָּה֫ which is for נָּה֫, §§ **72.** 3; **71.** 2. *c.* (3) and Notes 1, 2; cf. וַיְכַל (ch. II. 2).—מִלְמַעְלָה made up of מַעַל, לְ, מִן and ה֫ directive; note (1) the Rāfê, (2) Zāḳēf ḳāṭōn, (3) simple Šᵉwâ under ע; on ה֫, § **105.** 2. *a.*— בְּצִדָּהּ (bᵉṣīd-dâh), from צַד with suf. הָ֫, the original ַ being attenuated in sharpened syl.— תָּשִׂים Ḳăl Impf. 2 m. sg. of the ע״י verb שִׂים *put.*—תַּעֲשֶׂנָּה, same as the word above, with pron. suf. הָ.

V. 17. וְאֲנִי, §§ **49.** 3; **50.** 3. *d;* here emphatic, being cut off by Rᵉvî(ă)'.— הִנְנִי, a particle with verbal suffix, § **118.** 2. *a.*— מֵבִיא Hĭf. participle from בּוֹא; on preformative ־, § **86.** 3. *c;* on stem-vowel, ־, § **86.** 1. *d.*— לְהַשְׁחִית, Pī'ēl Inf. const. of the ע׳ laryng.

verb שָׁחַת, the D. f. being implied in ח, § **75.** 1. *b.*—יִגְוַע, pausal for יִגְוַע, Kăl Impf. of גָּוַע, § **76.** 1. *a.*

V. 18. וַהֲקִמֹתִי, on וַ, §§ **49.** 3; **70.** 2. *b;* on הָ, § **86.** 3. *a;* ־ is î written defectively; ô is separating vowel, § **86.** 2. *a.* אִתָּךְ, pausal for אִתָּךְ, the prep. אֵת *with;* cf. אִתָּךְ, in which אֵת = אֵת, the sign of the def. object.— וּבָאתָ, Kăl Perf. 2 m. sg. of בּוֹא, with Wâw conversive.

Vs. 19, 20. הָחַי, instead of הַחַי with D. f. implied.— תָּבִיא, Hĭf. Impf. 2 m. sg.; § **86.** 1. *d.* and 3. *a.*— לְהַחֲיוֹת, Hĭf. Inf. const. of חָיָה; on וֹת, § **82.** 1. *e.*— יָבֹאוּ, a seemingly irreg. Kăl Impf. 3 m. pl. of בּוֹא.

Vs. 21, 22. קַח, Kăl Imv. of לָקַח, § **78.** 2. R. 2.— מַאֲכָל, §§ **96.** 1; **97.** 2.— יֵאָכֵל, § **74.** 1.— וְאָסַפְתָּ, on the shifting of tone, § **70.** 3. *b;* on Mĕθĕğ, § **18.** 1.— צִוָּה, Pi'ēl Perf. 3 m. sg. of צָוָה *command;* on ־, § **59.** 1. *a;* on ־ָה, § **82.** 1. *a.*

3. *PRINCIPLES OF SYNTAX.*

V. 17. וְאָנִי הִנְנִי מֵבִיא—*And I, behold I am about to bring.*

Principle 28.—The Participle is often used to designate an action which is to take place in the immediate future.

V. 17.—אֶת־הַמַּבּוּל מַיִם—*The flood,* (that is) *water;* not *the flood of water.*

Principle 29.—A noun in the construct state cannot receive the article; hence, in cases like this, the second noun must be in apposition with the first.

4. *GRAMMAR- AND WORD-LESSON.*

1. § **106.** 1, 4, The masculine singular and plural.
2. § **106.** 2. *a—c,* The three-fold treatment of the original fem. affix ת.

3. § 106. 3, 5, The fem. plur. and the dual.
4. Word-Lists, The verbs numbered 121—130 in List IV.

5. *EXERCISES.*

1. To be written:—(1) Masc. and fem. sg., masc. and fem. pl. of טוֹב *good*, of גָּדֹל *great;* (2) Fem. pl. of אוֹת *sign*, מָאוֹר *luminary*; (3) Dual of עַיִן *eye*.

2. To be translated into Hebrew:—(1) *Behold, I am about to rain upon the earth;* (2) *I will destroy all flesh in which is the spirit of lives;* (3) *Thou didst establish* (= *cause to stand*) *a covenant with me;* (4) *Will he keep the covenant which he established with them?* (5) *Male and female they shall enter the ark, and for them thou shalt take food which may be eaten;* (6) *Noah collected food in order to preserve alive the fowl and the beast*(s) *and the cattle, and all that was in the ark.*

3. To be written:—A transliteration of verses 18 and 19 of chapter VI.

4. To be written:—The Nīf'ăl Perf. 3 m. sg., and Impf. 3 m. sg. of a verb of each of the classes.

6. *TOPICS FOR STUDY.*

(1) The ◌ֶה of ל״ה Impfs. (2) The suffix ◌ָנָּה. (3) Hē directive. (4) Rāfē. (5) Zăḳēf ḳāṭōn. (6) The Ḳăl Impf. of verbs ע״י. (7) ו before a laryngeal with Šᵉwâ. (8) The vowel-changes in מֵבִיא. (9) ע laryng. Pī'ēls. (10) The vowel-points in וְהַקְמֹתִי. (11) Dif. between אֵת *with*, and אֵת sign of def. object. (12) פ laryng. Nif'ăls. (13) The retention of the original fem. ת. (14) A later usage of תִּי (15) The origin of ◌ָה. (16) Affixes for plur. fem. and masc., and for the dual.

LESSON LI.—GENESIS VII. 1-8.

1. *NEW WORDS.*

(1) טָהוֹר, (2) עוֹד, (3) אַרְבָּעִים, (4) מָחָה, (5) יָקוּם.

2. *NOTES.*

V. 1. וַיֹּאמֶר, § **79.** 1.—בֹּא, Ḳăl Imv. בֹּא, on ־ֹ, § **109.** 5. *a;* on ־, § **108.** 1. *a.* (2).— רָאִיתִי, the î being attenuated from ê, § **82.** 3. *b.*—לְפָנַי *to my faces*, on ־ַי, § **108.** 3. *a.* (1).—דוֹר, on ô, § **30.** 6. *c.*

Vs. 2, 3. טְהוֹרָה, § **106.** 2. *c.*— הִוא, § **50.** 3. *a.*— לְחַיּוֹת Pī'ēl Inf. const. of חָיָה; cf. הַחַיּוֹת in ch. VI. 20.

Vs. 4, 5. מַמְטִיר, synopsis in Hīf'īl; cf. Principle 28.— אַרְבָּעִים יוֹם, the numeral being plur. in form, the subst. is sg.— וּמָחִיתִי, on ־ִי (cf. רָאִיתִי above), § **82.** 3. *b;* from מָחָה.— הַיְקוּם, on omission of D. f. from י, § **14.** 2; on formation, § **95.** 2.— עָשִׂיתִי, on î, § **82.** 3. *b;* cf. מָחִיתִי, and רָאִיתִי — צִוָּהוּ, for צִוָּה and הוּ; = צִוָּה אֹתוֹ (VI. 22).

Vs. 7, 8. וַיָּבֹא, § **86.** 1. *c;* the ô is rounded from â— וּבָנָיו, on ־ָיו, § **108.** 3. *d.*— אִתּוֹ *with him;* cf. אֹתוֹ =)*-him.*— אֵינֶנָּה, for אֵינֶ֫נָּ֥הּ; on ־ֶי, § **109.** 5. *a;* on ־ָנ, § **71.** 2. *c.* N. 1; on the contraction, ־ֶ֫נָּה, § **71.** 2. *c.* N. 2; on particle with suff., § **118.** 2. *c.*

3. *PRINCIPLES OF SYNTAX.*

V. 2.—שִׁבְעָה שִׁבְעָה—*Seven, seven* = by sevens.

V. 9.—שְׁנַיִם שְׁנַיִם—*Two, two* = by twos, in pairs.

Principle 30.—Words are often repeated in order to express the *distributive* relation.

V. 5.—וְנֹחַ בֶּן־שֵׁשׁ מֵאוֹת שָׁנָה—*And Noah* (was) *the son of six hundred years* = And Noah was six hundred years old.

Principle 31.—The word בֶּן is commonly used to express a characteristic; e. g. a son of wisdom = a wise son.

4. *GRAMMAR- AND WORD-LESSON.*

1. § **107.** 1, 2, The Absolute and Construct states.
2. § **107.** 3, Substitution of ־ה for ־ה in the construct.
3. § **107.** 4, Restoration of original ־ת in the construct.
4. § **107.** 6, Substitution of ־י for ־ים and ־ִים.
5. § **107.** 6. Rm. 3. Explanation of the Construct form.
6. Word-Lists, Verbs numbered 131—140 in List IV.

5. *EXERCISES.*

1. To be written:—The corresponding construct forms of רֹעֶה, פָּנִים, שִׁבְעָה, תֵּבָה, עֵינַיִם, דָּגָה, חַיָּה, מִקְוֶה.

2. To be translated into Hebrew:—(1) *The shepherd of the flock was a good man;* (2) *What did God call the collection of waters?* (3) *The eyes of the man were opened and he saw;* (4) *Noah's ark was made of gopher wood;* (5) *Noah took into the ark of the clean cattle and of the cattle which were not clean;* (6) *The man was forty years old;* (7) *God rained upon the earth forty days and forty nights.*

3. To be written in English letters:—Verses 1, 2 of chapter VII.

4. To be written:—Synopses of the verb אָרַר in Qāl, Pī. and Hīf., of רָעַשׁ in Qāl, Nīf. and Hīf., and of חָרַב in Qāl, Nīf., Pŭ., Hīf. and Hŏf.

6. *TOPICS FOR STUDY.*

(1) The ô of verbs פ״א. (2) Synopsis in Qāl of בּוֹא. (3) ע״י Seğolates before suffixes. (4) The î of ל״ה Perf's before consonant terminations. (5) Omission of D. f. (6) The vowels in אֵינֶנָּה.

(7) Explanation of the Construct form. (8) The substitution of ה֫ for ה֯, of י֫ for ים֯ and ִים֯. (9) The restoration of ת֫ in the construct.

LESSON LII.—GENESIS VII. 9-16.

1. *NEW WORDS.*

(1) שֵׁשׁ, (2) חֹדֶשׁ, (3) שִׁבְעָה־עָשָׂר, (4) בָּקַע, (5) מַעְיָן, (6) אֶרֶבָּה, (7) פָּתַח, (8) גֶּשֶׁם, (9) צִפּוֹר, (10) בְּעַד.

2. *NOTES.*

Vs. 9, 10. בָּאוּ, accent, § **36.** 6.—כַּאֲשֶׁר, *according as*, the particle introducing a subordinate clause of manner, and the preposition governing that clause.— לְשִׁבְעַת הַיָּמִים lit., *to the heptad of days*, the numeral being in const. relation with the subst.—מֵי, const. of מַיִם.

Vs. 11, 12. בִּשְׁנַת, on ī, § **47.** 2; abs., שָׁנָה, const., שְׁנַת, the ֫ being reduced, and ת֫ restored, § **106.** 2.— שֵׁשׁ־מֵאוֹת, on Mĕθĕğ, § **18.** 4; cardinal for ordinal, § **117.** R. 11.— חֵי, const. of חַיִּים, § **107.** 6.— נִבְקְעוּ, Nīf. Perf. 3 pl. of בָּקַע.— מַעְיְנוֹת, const. of מַעְיָנוֹת, a denominative from עַיִן, § **103.** 2.—רַבָּה, fem. of adj. רַב; on the D. f. **109.** 5. *b*.— נִפְתְּחוּ pausal for נִפְתָּחוּ, § **38.** 1.— גֶּשֶׁם an *a*-class Seğolate.

Vs. 13, 14. בְּעֶצֶם הַיּוֹם הַזֶּה *in the bone of this day* = on this very day.—אִתָּם, the original ī being found in a sharpened syl.—הֵמָּה, § **50.** 1; on D. f. firmative, § **15.** 6.— הַחַיָּה, §§ **18.** 1; **45.** 2.—לְמִינָהּ, §§ **16.** 1; **108.** 1. *a*. (1) and R. 1.— לְמִינֵהוּ, § **108.** 1. *b*. (1).— צִפּוֹר, on formation, § **93.** 4. *c*.

Vs. 15, 16. שְׁנַיִם שְׁנַיִם, repetition giving a distributive sense.

— הַבָּשָׂר, cf. מִבְּשָׂרִי (II. 23).— הַבָּאִים, Kăl Part. act. pl. of בּוֹא; Part. with article = a relative clause: *those that went in.* וַיִּסְגֹּר, with ĭ atten. from ă, and ō lowered from ŭ, § **63.** 1. *a*, and 2. *a*.— בַּעֲדוֹ, prep. בְּעַד *around, behind,* with suff. וֹ *him.*

3. *PRINCIPLES OF SYNTAX.*

V. 9.—כַּאֲשֶׁר צִוָּה א״ —*According as God commanded.*

Principle 32.—When אֲשֶׁר follows a preposition, the preposition governs, not the particle, but the clause.

V. 11.—בִּשְׁנַת שֵׁשׁ־מֵאוֹת שָׁנָה —*In* (the) *year of six hundred years* = in the six hundredth year.

Principle 33.—There are no *ordinals* above *ten;* hence the cardinals must serve as ordinals, whenever the context demands.

V. 13.—בָּא נֹחַ וְשֵׁם־וְחָם וְיֶפֶת—*Went in Noah and Shem and Ham and Japhet.*

Principle 34.—The predicate of several subjects united by *and* may stand either in sing. or plur., but it is generally in sing. when it *precedes.*

4. *GRAMMAR- AND WORD-LESSON*

1.	§ **108.** *Tabular View,*	The noun סוּס with pron. suffixes.
2.	§ **108.** 1. *a, b,* and R's,	Masc. nouns in the sing. with suffixes.
3.	§ **108.** 2,	Fem. nouns in the sing. with suffixes.
4.	§ **108.** 3. *a—d,*	Masc. nouns in the plur. with suffixes.
5.	§ **108.** 4,	Fem. nouns in the plur. with suffixes.
6.	Word-Lists,	Verbs numbered 141—153 in List IV.

5. *EXERCISES.*

1. To be translated into Hebrew:—(1) *His day, her day, your* (m.) *day, thy* (f.) *day, our day, their* (m.) *day, thy* (m.) *day;* (2) *Thy lives, her lives, his lives, thy* (f.) *lives, our lives, my lives, your*

lives; (3) *My saying, her saying, your* (m.) *saying, our saying;* (4) *My signs, your signs, our signs, their signs, thy signs;* (5) *My father, thy brother, our father, your father, thy mouth, her mouth.*

2. To be translated into Hebrew:—(1) *Our Father who* (art) *in heaven;* (2) *Take with thee into the ark thy father and thy sons and thy daughters;* (3) *The fowl according to his kind and the beast according to her kind shall enter the ark two by two;* (4) *Everything in which is the spirit of life shall expire;* (5) *I was born in the eighteen hundredth year of our Lord, in the seventh month, on the twenty-fourth day of the month;* (6) *The waters of the flood were upon the earth many days.*

3. To be written:—A transliteration of verses 13 and 14 of chapter VII.

4. To be written:—An exact statement of the origin and force of the following suffixes (including the ending of the stem): (1) ־ָיו, (2) ־ֶיהָ, (3) ־ֶיךָ, (4) ־ֵינוּ, (5) ־וֹ, (6) ־הּ, (7) ־ָךְ, (8) ־ֵךְ, (9) ־ָם, (10) ־ָתַי.

6. *TOPICS FOR STUDY.*

(1) A preposition with the Relative particle. (2) Use of cardinals for ordinals. (3) Denominatives formed by prefixing מ. (4) ע״ע stems with affixes. (5) The prep. אֵת with suffixes. (6) The pronominal suffixes. (7) Ḳăl Part's act. of verbs ע״ו. (8) The original vowels in יִסְגֹּר. (9) Agreement of predicate. (10) Suffixes attached by the connecting vowel â. (11) Suffixes attached by the connecting vowel ē. (12) Suffixes attached by ־ֶ (13) The various forms assumed by the old construct ending *ay* before suffixes. (14) Plural feminines with pronominal suffixes.

LESSON LIII.—GENESIS VII. 17-24.

1. *NEW WORDS.*

(1) רוּם, (2) גָּבַר, (3) כָּסָה, (4) הַר, (5) גִּבְעָה, (6) חֲרָבָה, (7) שְׁאַר.

2. *NOTES.*

Vs. 17, 18. וַיִּרְבּוּ, on rejection of the third radical ן or י, § **82.** 2.—וַיִּשְׂאוּ, from נָשָׂא; נ assimilated, but D. f. lost, § **14.** 2.—וַתָּרָם (wăt-tâ'-rŏm), the second ־ being in an unaccented closed syl., must be ŏ; usual form of Middle-Vowel Ḳăl Impf., is with ו, e. g., תָּרוּם; but with Wâw convers. § **86.** 1. *e.* R.—יִגְבְּרוּ, (1) י, (2) גבר, the root, (3) ו.

Vs. 19, 20. וַיְכַסּוּ, (1) וַ, with D. f. lost from י, § **14.** 2; (2) י; (3) ־ = passive; (4) D. f. in ס = intensive; (5) וּ = plur.; the root being כָּסָה, cf. וַיְכַלּוּ (ch. II. 1).—הֶהָרִים, on the ־ § **45.** 4.—גְּבֹהִים, from גָּבַהּ, § **109.** 1. *a;* but Pāθăḥ-furtive disappears when ה ceases to be final, nor is the Măppîḳ any longer necessary.—מִלְמַעְלָה, see ch. VI. 16.

Vs. 21, 22. וַיִּגְוַע, § **76.** 1. *a.*—נִשְׁמַת, construct of נְשָׁמָה.—אַפָּיו, from אַף = אַנְפָּ, dual, אַפַּיִם; on יו ָ, § **108.** 3. *d.*—בֶּחָרָבָה, on ־ § **45.** 4; ־ under ח, on account of rejection of D. f. from ר, the formation being according to § **93.** 1.—מֵתוּ, on ē under מ, § **86.** 1. *a.* R.

Vs. 23, 24. וַיִּמַּח, for וַיִּמְחֶה (Ḳăl Impf.); ה ֶ lacking, and a helping vowel ־ inserted, § **82.** 5. *b.* (5); Râfé over מּ, to show that no D. f. is to be expected.—וַיִּמָּחוּ, Nîf. Impf. 3 plur., of same root as יִמַּח — וַיִּשָּׁאֶר, another Nîf.; tone receding to penult, final vowel is ־, not ־ — אִתּוֹ בַּתֵּבָה, D. l. in ב, because of preceding disjunctive accent.—יוֹם, sg., although pl. *in sense.*

3. *PRINCIPLES OF SYNTAX.*

V. 19.—מְאֹד מְאֹד—*Mightily, mightily.*

Principle 34.—Words are often repeated to express *intensity* or *emphasis.*

V. 22.—כֹּל אֲשֶׁר .... בְּאַפָּיו—*All in whose nostrils,* etc.

Principle 35.—The אֲשֶׁר which serves as sign of relation for a following pronominal suffix is generally separated from the word to which the suffix is attached by intervening words.

4. *GRAMMAR- AND WORD-LESSON.*

1. § **109. 1,** Stem-changes resulting from shifting of tone *one* place.
2. § **109. 2,** Stem-changes resulting from shifting of tone *two* places.
3. § **109. 3,** Stem-changes in the singular construct.
4. § **109. 3. R. 3,** Ḳăl act. participles, and nouns with ultimate ē.
5. Word-Lists, Verbs numbered 154—166 in List IV.

5. *EXERCISES.*

1. In the case of בָּשָׂר *flesh,* עוֹלָם *eternity,* write out (1) the const. sg., (2) the form with suffix for *my,* (3) with suffix for *your* (m.), (4) the plur. abs., (5) the plur. const., (6) the plur. with the suffix for *my,* (7) with the suffix for *your* (m.).

2. To be translated into Hebrew:—(1) *This is my word which I have spoken to you;* (2) *The earth and all which* (is) *in it is God's;* (3) *All the mountains were covered, and the waters prevailed upon the earth;* (4) *Three men were left with him in the ark;* (5) *The man to* (בְּ) *whose word I listened was forty years old;* (6) *And he destroyed man and beast, creeper and cattle from upon the ground.*

3. To be written:—A transliteration of verses 22, 23 of ch. VII.

4. To be written: — Exhaustive analyses of (1) וְהַמַּיִם, (2) הֶהָרִים, (3) מִלְמַעְלָה, (4) וּבַבְּהֵמָה, (5) מֵאָדָם.

6. *TOPICS FOR STUDY.*

(1) Absence of יִ or in verbs ל״ה. (2) Assimilation of נ in verbs פ״ן. (3) The vowels in middle-vowel Ḳăl Imperfects. (4) The artile with ־ֽ. (5) The suffix and ending יִ_. (6) Each vowel in וַיַּ֫חַם and וַיִּ֫חַם. (7) D. l. after a disjunctive accent. (8) When does the tone move *one* place? (9) When does it move *two* places? (10) The vowel-changes in either case. (11) The formation of the singular construct. (12) Nouns with ē in the ultima.

LESSON LIV.—GENESIS VIII. 1-7.

1. *NEW WORDS.*

(1) זָכַר, (2) עָבַר, (3) שֶׁכֶךְ, (4) סָכַר, (5) כָּלָא, (6) חָסַר, (7) קָצֶה, (8) הַר, (9) חֲלוֹן, (10) עֹרֶב, (11) יָבֵשׁ.

2. *NOTES.*

V. 1. וַיִּזְכֹּר, ĭ atten. from ă, ō lowered from ŭ; Ḳăl Impf. 3 m. sg.; synopsis?—וַיַּעֲבֵר, on ־ֽ instead of יִ_, § **65.** 5. *b.* (1); synopsis? — וַיָּשֶׁכּוּ, from שֶׁכֶךְ, § **85.** 1. *a*, 5. *a;* the ־ֽ rounded from orig. ־ֽ; the ō with first radical as regularly in ע״ע verbs; the D. f. for strengthening.

Vs. 2, 3. וַיִּסָּכְרוּ, Nīf. Impf. 3 m. plur. of סָכַר = סָגַר. — וַיִּכָּלֵא, § **72.** 2. — וַיָּשֻׁבוּ, for וַיְשׁוּבוּ: original ŭ is lengthened to û and ă of preformative becomes ă in open syl. § **86.** 1. *e*, 3. *a.* —הָלוֹךְ, Inf. abs.; on ô (=â), § **67.** 1. *b.* (1).—וָשׁוֹב, on ־ֽ, § **49.** 4; on שׁוֹב, Inf. abs., § **86.** 1. *g.*—וַיַּחְסְרוּ, on ־ֽ before ח, § **74.** 2. *a;* on ־ֽ under ח, § **74.** 3. *c.*— מִקְצֵה, for מִקְצֵה; on omis. of D. f., § **14.** 2; on ־ֽ under ק, instead of ־ֽ, § **109.** 6. *b;* on ה־ֽ (ê), § **107.** 3.

Vs. 4, 5. וַתָּנַח, from נוּחַ (cf. וַיִּנָּחֵהוּ ch. II. 15); usual Impf., יָנוּחַ, but the form with Wâw convers. has ŏ, § **86.** 1. *e.* R.; but the laryng. prefers ă.— הָרֵי, const. pl. of הָר, which is from הָרַר; hence the ֫ is unchangeable, and stands in the const., §§ **109.** 5. *b*; **31.** 4. N. 2.—חָסוֹר, Inf. abs.; on ô (= â), § **67.** 1. *b.* (1)—נִרְאוּ, Nif. of רָאָה — רָאשֵׁי, const. plur.; another case of unchangeable ֫ in const.; irreg. plur. of רֹאשׁ, § **116.** 17.— הֶהָרִים on the ֭ under ה, § **45.** 4.

Vs. 6, 7. וַיִּפְתַּח, § **76.** 1. *a.*— וַיְשַׁלַּח, on ֫ under ל, § **76.** 1. *b.*— וַיֵּצֵא, § **80.** 2. *a.* (1).— יָצוֹא, § **67.** 1. *b.* (1).— יְבֹשֶׁת, a fem. Inf. const., § **80.** 2. *b.* R. 1.

3. *PRINCIPLES OF SYNTAX.*

V. 3.—וַיָּשֻׁבוּ . . . הָלוֹךְ וָשׁוֹב—*And they returned, going and returning.*

V. 7.—וַיֵּצֵא יָצוֹא וָשׁוֹב—*And it went forth, going forth and returning.*

V. 5.—וְהַמַּיִם הָיוּ הָלוֹךְ וְחָסוֹר—*And the waters were going on and diminishing.*

Principle 36.—The Infinitive absolute, coming after a finite verb from the same root, gives to the latter the force of *continued and lasting action.* This idea of *continuance* is also expressed by the use of the verb הָלַךְ, in which case the principal idea is added in the form of a second Inf. abs. The thought of the phrases given above is: (1) "They went on going backwards"; (2) "It went repeatedly to and fro"; (3) "And the waters were abating continually."

V. 5.—בְּעֶשְׂרִי בְּאֶחָד לַחֹדֶשׁ—*In the tenth* (month), *on the first* (lit., *one*) (day) *of* (lit., *to*) *the month.*

Principle 37.—In dates (1) the words *day* and *month* are often

omitted, (2) the cardinals are often used instead of ordinals, and (3) instead of the construct relation, a periphrastic expression by means of לְ is employed.

4. *GRAMMAR- AND WORD-LESSON.*

1. § **109.** 4. *a—f,* Stem-changes in the inflection of Seğolates.
2. § **109.** 5. *a, b,* Stem-changes in the inflection of middle-vowel and ע״ע Seğolates.
3. § **109.** 6. *a, b,* Stem-changes in the inflection of ל״ה nouns.
4. Word-Lists, Verbs numbered 167—180 in List IV.

5. *EXERCISES.*

1. In the case of קָצֶה, חֹק, זַיִת, מָוֶת, יֶלֶד, write (1) sg. const., (2) sing. form with suffix *your*, (3) plur. abs., (4) plur. const., (5) plur. form with suffix *my*.

2. To be translated into Hebrew:—(1) *Remember thou the days in which God blessed thee;* (2) *God caused the waters to return from upon the earth;* (3) *He died in the sixth year, in the seventh month, on the fifth day of the month;* (4) *The words of God are good;* (5) *He will live unto eternities of eternities;* (6) *The kings of the earth shall return unto their land.*

3. To be written:—A transliteration of verses 2, 3 of ch. VIII.

4. Write a complete analysis of the following forms:—(1) מַעְיְנֹת, (2) לַחֹדֶשׁ, (3) הַגֶּשֶׁם, (4) וּמְאַת, (5) וַיְשַׁלַּח.

6. *TOPICS FOR STUDY.*

(1) Vowels of the Ḳăl Impf. 3 m. sg. of a strong verb. (2) ע״ע Ḳăl Impf. (3) Middle-vowel Ḳăl Impf. (4) Nĭf'ăl Impf. 3 m. sg. (5) Form of Inf. abs. (6) The ô of the Inf. abs. (7) The *ê* of ל״ה nouns. (8) Unchangeable ־ in const. plur. (9) Article with ־. (10) ל laryngeal Pī'ēl Impf. (11) פ״י Ḳăl Impf. (12) Various forms assumed by Seğolate stems in inflection. (13) Middle-vowel Seğolates. (14) ע״ע Seğolates. (15) ל״ה nouns ending in ה־.

LESSON LV.—GENESIS VIII. 8-14.

1. *NEW WORDS.*

(1) יוֹנָה, (2) קָלַל, (3) מָנוֹחַ, (4) כַּף, (5) רֶגֶל, (6) חַיִל, (7) אַחֵר, (8) עֵת, (9) זַיִת, (10) טָרָף, (11) יָחַל, (12) רִאשׁוֹן, (13) חָרַב, (14) סוּר, (15) מִכְסֶה.

2. *VERBAL FORMS.*

[In the case of each form, state (1) stem, (2) tense, (3) pers., numb., gen., (4) class, (5) root, (6) meaning of root, (7) corresponding form of קָטַל, (8) the variation, and the section in the "Elements" which explains it. The superior figure indicates the verse in which the word occurs.]

(1) יִשַּׁלַּח,[8] (2) לִרְאוֹת,[8] (3) קַלּוּ,[8] (4) מָצְאָה,[9] (5) תָּשֶׁב,[9] (6) וַיִּסָּף,[10] (7) יִשְׁלַח,[9] (8) יָבֵא,[9] (9) וַיָּחֶל,[10] (10) שַׁלַּח,[10] (11) וַיִּקָּחֶהָ,[9] (12) תָּבֹא,[11] (13) וַיִּרַע,[11] (14) וַיָּחֶל,[12] (15) שׁוּב,[12] (16) וַיְהִי,[13] (17) חָרְבוּ,[13] (18) וַיָּסַר,[13] (19) וַיֵּרָא,[13] (20) יִבְשָׁה.[14]

3. *NOMINAL FORMS.*

[In the case of each form, state (1) abs. sg., (2) meaning, (3) formation, (4) const. sg., (5) abs. and const. plur., (6) its form with one or more suffixes in sg. and plur.]

(1) אֲדָמָה,[8] (2) רַגְלָה,[9] (3) יָדוֹ,[9] (4) יָמִים,[10] (5) עֵרֶב,[11] (6) זַיִת,[11] (7) חֹדֶשׁ,[13] (8) מִכְסֵה.[13]

4. *PARTICLES, PREPOSITIONS, SUFFIXES, ETC.*

[In the case of each, state all that may be known concerning it.]

(1) אֶת־,[8] (2) מִן,[8] (3) אֵת[8] (*with*), (4) הַ,[8] (5) הַ·,[8] (6) עַל,[8] (7) וְ,[9] (8) לֹא,[9] (9) אֶל־,[9] (10) כִּי,[9] (11) וְ,[9] (12) הָ,[9] (13) לְ,[11] (14) הִנֵּה,[11] (15) יוֹ־,[12]

5. *GRAMMAR- AND WORD-LESSON.*

1. § **110.** 1—5,	Classification of Noun-stems.
2. § **111.** 1. Tab. View and R's,	Strong and Laryngeal Seğolates.
3. § **111.** 2. Tab. View and R's,	ע״ע, ע״ו, ע״י, ל״ה and ע״א Seğolates.
4. Word-Lists,	Verbs numbered 181—194 in List IV.

6. *EXERCISES.*

1. To be written:—A word-for-word translation of verses 8—14 of Genesis VIII.

2. To be written:—A transliteration of verses 9 and 10 of Genesis VIII.

3. To be written:—Five Hebrew sentences of not less than eight words each, based on the verses constituting this lesson.

LESSON LVI.—GENESIS VIII. 15-22.

1. *NEW WORDS.*

(1) דָּבַר, (2) מִשְׁפָּחָה, (3) מִזְבֵּחַ, (4) עֹלָה, (5) רוּחַ, (6) רֵיחַ, (7) נִיחֹחַ, (8) נְעוּרִים, (9) קָצִיר, (10) קֹר, (11) חֹם, (12) קַיִץ, (13) חֹרֶף.

2. *VERBAL FORMS.*

[In the case of each form, state (1 stem, (2) tense, (3) pers., numb., gen., (4) class, (5) root, (6) meaning of root, (7) corresponding form of קָטַל (8) the variation from the strong form, the reason for the variation, and the section in the "Elements" which explains it. The superior figure indicates the verse in which the word occurs.]

(1) יְדַבֵּר,[15] (2) לֵאמֹר,[15] (3) צֵא[16] (§ **80.** 2. *a*), (4) הַוֵּצֵא[17] (acc. to Ḳ'rê, הַיֵּצֵא; usual form would be הוֹצֵא, §§ **19.** 1, 2, 3; **80.** 3. *b*),

5) וּפָרוּ,[17] (6) וַיֵּצֵא,[18] (7) יָצְאוּ,[19] (8) וַיִּבֶן,[20] (9) וַיִּקַּח,[20] 10) וַיַּעַל[20] (in Hĭf., not Kăl), (11) וַיָּרַח[21] (cf. וַתָּנַח, v. 4), (12) אָסַף,[21] (13) יִשְׁבְּתוּ.[22] (14) לְהַכּוֹר,[21] (15) עָשִׂיתִי,[21] (16) לְקַלֵּל,[21]

3. *NOMINAL FORMS.*

[In the case of each form, state (1) abs. sg., (2) meaning, (3) formation, (4) const. sg., (5) abs. and const. plur., (6) its form with one or more suffixes in sg. and plur.]

(1) הַחַיָּה,[17] (2) בָּשָׂר,[17] (3) בְּהֵמָה,[17] (4) רֶמֶשׂ[17] (5) בָּאָרֶץ,[17] (6) מִשְׁפְּחֹת,[19] (7) מִזְבֵּחַ,[20] (8) טָהוֹר,[20] (9) עֹלֹת,[20] (10) לִבּוֹ,[21] (11) יֵצֶר,[21] (12) נְעָרָיו,[21] (13) זֶרַע,[22] (14) קָצִיר,[22] (15) חֹרֶף.[22]

4. *PARTICLES, PREPOSITIONS, IRREGULAR FORMS.*

[In the case of each, state all that may be known concerning it.]

(1) מִן,[16] (2) אִשְׁתְּךָ,[16] (3) בָּנֶיךָ,[16] (4) נְשֵׁי,[16] (5) אִתְּךָ,[16] (6) אִתּוֹ,[18] (7) לֹא,[21] (8) בַּעֲבוּר,[21] (9) כַּאֲשֶׁר,[21] (10) יְמֵי.[22]

5. *GRAMMAR- AND WORD-LESSON.*

1. § **112.** Tab. View and R's, Nouns of the Second Class.
2. § **113.** Tab. View and R's, Nouns of the Third Class.
3. § **114.** Tab. View and R's, Nouns of the Fourth and Fifth Classes.
4. Word-Lists, Verbs numbered 195—208 in List IV.

6. *EXERCISES.*

1. To be written:—A word-for-word translation of verses 15-22 of Genesis VIII.

2. To be written:—A transliteration of verses 17, 18 of Genesis VIII.

3. To be written:—Five Hebrew sentences of not less than ten words each, based on the verses constituting this Lesson.

MANUAL.

EXPLANATION OF SIGNS

USED IN THE TRANSLATION AND TRANSLITERATION.

---

1. *Parentheses* ( ) enclose words for which there is no equivalent in the Hebrew.
2. *Brackets* [ ] enclose words which are in the Hebrew, but are not to be rendered into English.
3.)(stands for 'ēθ, the sign of the definite object.
4. The *Hyphen* (-) connects those English words which, in Hebrew, form a single word.
5. The sign of *Addition* (+) stands for Măḳḳēf.
6. The *Asterisk* (*) stands for the 'Aθnâḥ (֢); the *Dagger* (†), for Seġōltâ (֒); the *Period* (.), for Sôf Pâsûḳ (׃) preceded by Sĭllûḳ.

GENESIS I–IV.

THE HEBREW TEXT.

CHAPTER I.

א בְּרֵאשִׁית בָּרָא אֱלֹהִים אֵת הַשָּׁמַיִם וְאֵת הָאָרֶץ׃
2 וְהָאָרֶץ הָיְתָה תֹהוּ וָבֹהוּ וְחֹשֶׁךְ עַל־פְּנֵי תְהוֹם וְרוּחַ
אֱלֹהִים מְרַחֶפֶת עַל־פְּנֵי הַמָּיִם׃
3 וַיֹּאמֶר אֱלֹהִים יְהִי־אוֹר וַיְהִי־אוֹר׃
4 וַיַּרְא אֱלֹהִים אֶת־הָאוֹר כִּי־טוֹב וַיַּבְדֵּל אֱלֹהִים בֵּין הָאוֹר
וּבֵין הַחֹשֶׁךְ׃
ה וַיִּקְרָא אֱלֹהִים לָאוֹר יוֹם וְלַחֹשֶׁךְ קָרָא לָיְלָה וַיְהִי־עֶרֶב
וַיְהִי־בֹקֶר יוֹם אֶחָד׃
6 וַיֹּאמֶר אֱלֹהִים יְהִי רָקִיעַ בְּתוֹךְ הַמָּיִם וִיהִי מַבְדִּיל בֵּין
מַיִם לָמָיִם׃
7 וַיַּעַשׂ אֱלֹהִים אֶת־הָרָקִיעַ וַיַּבְדֵּל בֵּין הַמַּיִם אֲשֶׁר מִתַּחַת
לָרָקִיעַ וּבֵין הַמַּיִם אֲשֶׁר מֵעַל לָרָקִיעַ וַיְהִי־כֵן׃

GENESIS I—IV.

A LITERAL TRANSLATION.

CHAPTER I.

1. In-beginning created God*)(the-heavens and-)(the-earth.

2. And-the-earth was desolation and-waste; and-darkness (was) upon+faces-of abyss;* and-(the)-spirit-of God (was) brooding upon+faces-of the-waters.

3. And-said God: Shall-be+(*or*, let-be)+light;* and-(there)-was+light.

4. And-saw God)(+the-light that+good;* and-caused-a-division God between the-light and-between the-darkness.

5. And-called God to-the-light day, and-to-the-darkness called-he night;* and-(it)-was+evening, and-(it)-was+morning, day one.

6. And-said God: Let-be (an) expanse in-(the)-midst-of the-waters;* and-let-it-be dividing between waters to-waters.

7. And-made God)(+the-expanse,†and-caused-a-division between the-waters which (were) from-under to-the-expanse and-between the-waters which (were) from-upon to-the-expanse;* and-(it)-was+so.

8. And-called God to-the-expanse heavens;* and-(it)-was+evening, and-(it)-was+morning, day second.

9. And-said God: Let-be-collected the-waters from-under the-heavens unto+place one, and-let-be-seen the-dry (land);* and-(it)-was+so.

10. And-called God to-the-dry (land) earth, and-to-(the)-collection-of [the]-waters he-called seas;* and-saw God that+good.

11. And-said God: Let-cause-to-spring-forth the-earth grass, herb causing-to-seed seed, tree-of fruit making fruit to-kind-his which seed-his+in-him (*i. e.*, whose seed is in it) upon+the-earth;* and-(it)-was+so.

12. And-caused-to-come-forth the-earth grass; herb causing-to-seed seed to-kind-his, and-tree making+fruit which seed-his+in-him to-kind-his;* and-saw God that+good.

13. And-(it)-was+evening, and-(it)-was+morning, day third.

14. And-said God: Let-be luminaries in-(the)-expanse-of the-heavens, to-cause-a-division between the-day and-between the-night;* and-they-shall-be for-signs, and-for-seasons, and-for-days and-years.

15. And-they-shall-be for-luminaries in-(the)-expanse-of the-heavens to-cause-light upon+the-earth;* and-(it)-was+so.

16. And-made God)(+(the)-two-[of] [the]-luminaries the-great;*)(+the-luminary the-great, for-ruling-of the-day; and-)(+the-luminary the-small, for-ruling-of the-night, and-)(the-stars.

17. And-gave)(-them God in-(the)expanse-of the-heavens;* to-cause-light upon +the-earth[.].

18. And-to-rule in-the-day and-in-the-night, and-to-cause-a-division between the-light and-between the-darkness;* and-saw God that+good.

19. And-(it)-was+evening, and-(it)-was+morning, day fourth.

20. And-said God: Let-swarm the-waters swarm(s), soul-of life;* and-fowl shall-fly upon+the-earth, upon+faces-of (the) expanse-of the-heavens.

21. And-created God)(+the-sea-monsters the-great;* and-)(all+(the)-soul(s)-of [the]-life the-creeping (*or*, which-creep), (with) which swarmed the-waters to-kinds-their and-)(every+fowl of wing to-kind-his and-saw God that+good.

22. And-blessed)(-them God, to-say (*or*, saying):* Be-ye fruitful and-multiply-ye and-fill-ye)(+the-waters in-the-seas, and-the-fowl let-multiply in-the-earth.

23. And-(it)-was+evening, and-(it)-was+morning, day fifth.

24. And-said God: Shall-cause-to-come-forth the-earth soul-of life to-kind-her, cattle, and-creeper, and-beast-of+(the)-earth to-kind-her;* and-(it)-was+so.

25. And-made God)(+(the)-beast-of the-earth to-kind-her, and-)(+the-cattle to-kind-her, and-)(every+creeper-of the-ground to-kind-his;* and-saw God that+good.

26. And-said God: We-will-(*or*, Let-us)-make man in-image-our, according-to-likeness-our;* and-they-shall-have-dominion in-(the)-fish-of the-sea, and-in-(the)-fowl-of the-heavens, and-in-the-cattle, and-in-all+the-earth, and-in-all+the-creeper(s) the-creeping (*or*, which-creep) upon+the-earth.

27. And-created God)(+the-man in-image-his; in-(the)-image-of God created-he)(-him;* male and-female created-he)(-them.

28. And-blessed)(-them God,† and-said to-them God: Be-ye-fruitful and-multiply-ye, and-fill-ye)(+the-earth and-subdue-ye-her;* and-have-ye-dominion in-(the)-fish-of the-sea, and-in-(the)-fowl-of the-heavens, and-in-every+beast the-creeping upon+the-earth.

29. And-said God: Behold! I-have-given to-you)(+every+herb seeding seed which (is) upon+faces-of all+the-earth, and-)(all +the-tree(s) which+in-him (*i. e.*, in-which) (is the) fruit-of +(a)-tree seeding seed;* to-you it-shall-be for-food.

30. And-to-every+beast-of the-earth, and-to-every+fowl-of the-heavens, and-to-every creeping-one upon+the-earth which+in-him (*i. e.*, in-which) (is the) soul-of life, (I have given))(+ every+greenness-of herb for-food;* and-(it)-was+so.

31. And-saw God)(+all+which he-had-done, and-behold+good exceedingly;* and-(it)-was+evening, and-(it)-was+morning, day the sixth.

CHAPTER II.

1. And-were-finished the-heavens and-the-earth and-all+host-their.

2. And-finished God, in-the-day the-seventh, work-his which-he-had-done;* and-he-rested in-the-day the-seventh from-all+work-his which he-had-done.

3. And-blessed God)(+day the-seventh and-sanctified)(-it;* because in-it he-rested from-all+work-his which+created God to-make.

4. These (are) (the) generations-of the-heavens and-the-earth in-being-created-their;* in-(the)-day-of (the) making of Lord God earth and-heavens.

5. And-every shrub-of the-field not-yet had-been (*lit.*, will-be) in-the-earth, and-every+herb-of the-field not-yet had-sprouted-(*lit.*, will-sprout)-forth;* for not had-caused-to-rain Lord God upon+the-earth and-man was-not to-serve)(+the-ground.

6. And-(a)-mist used-to-go-up (*lit.*, will-go-up) from+the-earth,* and-cause-to-drink (*i. e.*, used-to-water))(+all+(the)-faces-of the-ground.

7. And-formed Lord God)(+the-man (out of) dust from+the-ground, and-breathed in-nostrils-his breath-of lives;* and-was the-man for-(a)-soul-of life (*i. e.*, and-became the-man (a) soul-of life).

8. And-planted Lord God (a) garden in-Eden from-east,* and-placed there)(+the-man whom he-formed.

9. And-caused-to-sprout-forth Lord God from+the-ground, every +tree pleasant to-sight and-good for-food,* and-(the)-tree-of [the]-lives in-(the)-midst-of the-garden, and-(the)-tree-of [the]-knowing good and-evil.

10. And-(a)-river goes-forth (*lit.*, going-forth) from-Eden to-water)(+the-garden,* and-from-there it-is-divided and-becomes four heads (*lit.*, and-is for-four heads).

11. (The) name-of the-one (is) Pishon;* it (*lit.*, he) (is) the-(one-encompassing (*or*, which-encompasses))(all+(the)-land-of-[the]-Havilah, which+there (*i. e.*, where) (is) the-gold.

12. And-(the)-gold-of the-land the-that (*lit.*, she) (is) good;* there (is) the-bdellium and-(the)-stone-of [the]-onyx.

13. And-(the)-name-of+the-river the-second (is) Gihon;* it (is) the-(one)-encompassing)(all+(the)-land-of Cush.

14. And-(the)-name-of the-river the-third (is) Tigris; it (is) the-(one)-going eastward-of Assyria;* and-the-river the-fourth is (*lit.*, he) Euphrates.

15. And-took Lord God)(+the-man,* and-caused-to-rest-him (*i. e.*, placed-him) in-garden-of+Eden to-serve-it (*lit.*, her) and-to-keep-it.

16. And-commanded Lord God upon+the-man to-say (*i. e.*, saying):* From-every tree-of+the-garden eating thou-mayest eat[.];

17. But-from-(the)-tree-of [the]-knowing good and-evil, not shalt-thou-eat from-it (*lit.*, him);* for, in-(the)-day-of eating-thy from-it, dying shalt-thou-die.

18. And-said Lord God: Not+good (the)-being-of [the]-man to-separation-his;* I-will-make+for-him (a) help as-over-against-him (*or*, as-his-counterpart).

19. And-formed Lord God from+the-ground every+beast-of the-field and-)(every+fowl-of the-heavens, and-caused-to-come (*i. e.*, brought) unto+the-man to-see what+he-will-call+to-it, (*lit.*, him),* and-all which will-call+to-it the-man, soul-of life, is (*lit.*, he) name-its (*lit.*, his).

20. And-called the-man names to-all+the-cattle, and-to-(the)-fowl-of the-heavens and-to-every beast-of the-field;* and-for-man not +did-he-find (*i. e.*, there was not found) (a) help as-over-against-him.

21. And-caused-to-fall Lord God (a) deep-sleep upon+the-man, and-he-slept,* and-he-took one from-sides-his and-closed (the) flesh instead-of-it.

22. And-built Lord God)(+the-side which+he-took from+the-man for-(a)-woman,* and-caused-to-come-her (*i. e.*, brought her) unto+the-man.

23. And-said the-man† : This, the-tread (*i. e.*, now), bone from-bones-my, and-flesh from-flesh-my;* to-this it-shall-be-called woman, for from-man was-taken+this.

24. Upon+so (*i. e.*, therefore) shall-leave+(a)-man)(+father-his and-)(+mother-his,* and-shall-cleave in-wife-his, and-they-shall-be for-flesh one.

25. And-were (the) two-of-them naked, the-man and-wife-his;* and-not were-(*lit.*, will-be)-they-ashamed.

CHAPTER III.

[In the two remaining chapters, the translation of the pronominal suffix is placed *before* instead of *after* the noun which it limits.]

1. And-the-serpent was crafty from-every beast-of the-field which had-made Lord God;* and-he-said unto+the-woman: (Is it) so that+has-said God, not shall-ye-eat from-every tree-of the-garden[.]?

2. And-said the-woman unto+the-serpent:* From-(the)-fruit-of (the)-tree(s)-of+the-garden we-may-eat[.];

3. But-from-(the)-fruit-of the-tree which (is) in-midst-of+the-garden,† has-said God: Not shall-ye-eat from-it, and-not shall-ye-touch in-it,* lest ye-die.

4. And-said the-serpent unto+the-woman:* Not+dying shall-ye-die.

5. For knowing (is) God that in-(the)-day-of your-eating from-it, then-(*lit.*, and)-shall-be-opened your-eyes,* and-ye-shall-be-like-God, knowers-of good and-evil.

6. And-saw the-woman, that good (was) the-tree for-food, and-that (a) delight-(was)+it to-the-eyes, and-desirable (was) the-tree to-make-wise, and-she-took from-his-fruit and-she-ate;* and-she-gave also+to-her-husband with-her and-he-ate[.];

7. And-were-opened (the) eyes-of (the) two-of-them, and-they-knew that naked (were) they,* and-they-sewed leaf-of fig-tree, and-they-made for-them-(selves) girdles.

8. And-they-heard)(+(the)-voice-of Lord God walking in-the-garden to-(*or*, at)-(the)-breeze-of the-day;* and-hid-himself the-man and-his-wife from-faces-of Lord God in-midst-of (the) tree(s)-of the-garden.

9. And-called Lord God unto+the-man,* and-said to-him: Where-art-thou[.]?

10. And-he-said:)(+thy-voice I-heard in-the-garden,* and-I-was-afraid, because+naked (was) I; and-I-hid-myself.

11. And-he-said: Who caused-to-know (*i. e.*, made known) to-thee, that naked (wert) thou;* ?-from+the-tree, which I-commanded-thee to-not eat+from it, hast-thou-eaten[.]?

12. And-said the-man:* The-woman whom thou-gave (to be) with-me, she gave+to-me from+the-tree and-I-ate.

13. And-said Lord God to-the-woman: What+(is)+this thou-hast-done?* And-said the-woman: The serpent corrupted-me and-I-ate.

14. And-said Lord God unto+the-serpent: Because thou-hast-done this,† cursed (art) thou from-all+the-cattle, and-from-every beast-of the-field;* upon+thy-belly shalt-thou-go, and-dust shalt-thou-eat all+(the)+days-of thy-lives.

15. And-enmity will-I-put between-thee and-between the-woman, and-between thy-seed and-between her-seed;* it (*lit.*, he) shall-bruise-thee (as to the) head; and-thou shalt-bruise-him (as to the) heel.

16. Unto+the-woman he-said: Causing-to-be-great I-will-cause-to-be-great (*i. e.*, multiplying I will multiply) thy-sorrow and-thy-conception (*i. e.*, the sorrow of thy conception); in-pain thou-shalt-bring-forth sons,* and-unto+thy-husband (shall-be) thy-desire and-he shall-rule+in-(*or*, over)-thee.

17. And-to-man he-said: Because thou hast-hearkened to-(the)-voice-of thy-wife,† and-hast-eaten from+the-tree which I-commanded-thee, to-say: not shalt-thou-eat from-it,* cursed (is) the-ground for-the-sake-of-thee; in-sorrow shalt-thou-eat-(of)-it all (the) days-of thy-lives.

18. And-thorn and-thistle shall-it-cause-to-spring-forth to-thee;* and-thou-shalt-eat)(+(the)+herb-of the-field.

19. In-(the)-sweat-of thy-nostrils, shalt-thou-eat bread, until thy-return unto+the-ground; for from-it (*lit.*, her) wast-thou-taken;* for+dust (art) thou, and-unto+dust thou-shalt-return.

20. And-called the-man (the) name-of his-wife Eve,* for she was mother-of all+living.

21. And-made Lord God for-man and-for-his-wife tunics-of skin, and-caused-to-put-on-them.

22. And-said Lord God: Behold! the-man has-become like-one-of [from]-us to-know good and-evil;* and-now lest+he-put-forth his-hand and-take also from-(the)-tree-of [the]-lives, and-eat and-live for-ever.

23. Therefore-(*lit.*, and)-sent-him Lord God from-(the)-garden-of +Eden,* to-serve)(+the-ground which he-was-taken from-there.

24. And-he-drove-out)(+the-man,* and-caused-to-dwell (*i. e.*, placed) from-east to-(the)-garden-of+Eden,)(+the-Cherubim, and-)((the) flame-of the-sword (*i. e.*, the flaming sword) the-(one)-turning-itself to-keep)(+(the)-way-of (the) tree of [the]-lives.

CHAPTER IV.

1. And-the-man knew)(+Eve his-wife;* and-she-conceived, and-she-bore)(+Cain; and-she-said: I-have-gotten (a) man with+(the) Lord.

2. And-she-added to-bear (*i. e.*, and again she bore))(+his-brother)(+Abel;* and-was+Abel (a) shepherd-of flock(s), and-Cain was (a) tiller-of ground.

3. And-it-was, from-end-of days,* and-caused-to-come (*i. e.*, brought) Cain from-(the)-fruit-of the-ground (an) offering to-(the) Lord.

4. And-Abel caused-to-come, also+he, from-(the)-firstlings-of his-flock and-from-their-fats;* and-looked-with-favor (the) Lord unto+Abel and-unto+his-offering.

5. And-unto+Cain and-unto+his-offering not did-he-look-with-favor;* and-it-kindled to-Cain (*i. e.*, and Cain was angry), exceedingly, and-fell his-faces (*or*, countenance).

6. And-said (the) Lord unto+Cain: For-what (*or*, why) has-it-kindled to-thee, and-for-what have-fallen thy-faces[.]?

7. (Is there) ?-not, if+thou-makest-(*or*, doest)-good, (a) lifting-up (of the countenance)? and-if not thou-makest-good, at-the-door sin (is) crouching;* and-unto-thee (shall be) his-desire, and-thou shouldst-rule+in-(*or*, over)-him.

8. And-said Cain unto+Abel his-brother;* and-(it)-was in-their-being in-the-field, and-rose Cain unto+Abel his-brother and-killed-him.

9. And-said (the) Lord unto+Cain: Where (is) Abel thy-brother?* And-he-said: Not have-I-known (*i. e.*, do-know); ?-keeper-of my brother (am) I[.]?

10. And-he-said: What hast-thou-done?* (The) voice-of (the) bloods-of thy-brother (are) crying unto-me from+the-ground.

11. And-now cursed (art) thou,* from+the-ground which has-opened)(+her-mouth to-take)(+(the)+bloods-of thy-brother from-thy-hand.

12. When thou-shalt-till (*or*, serve))(+the-ground, not+will-it-add to-give+her-strength to-thee;* (a) fugitive and-(a)-vagabond shalt-thou-be in-the-earth.

13. And-said Cain unto+(the) Lord:* Great (is) my-iniquity from-bearing.

14. Behold! thou-hast-driven-out)(-me the-day (*i. e.*, to-day) from-upon (the) faces-of the-ground, and-from-thy-faces shall-I-be-hid;* and-I-shall-be (a) fugitive and-(a)-vagabond in-the-earth, and-it-shall-be (that) any+finding-me will-kill-me.

15. And-said to-him (the) Lord: Therefore (*lit.*, to-so) any+killing Cain, seven-fold shall-he-be-avenged;* and-placed (the) Lord for-Cain (a) sign to-not smite+)(-him any+finding-him.

16. And-went-forth Cain from-to-faces-of (*i. e.*, from the presence of) (the) Lord;* and-he-dwelt in-(the)-land-of+Nod, eastward-of+Eden.

17. And-knew Cain)(+his-wife and-she-conceived, and-bore)(+Enoch;* and-he-was building (a) city, and-he-called (the) name-of the-city according-to-(the)-name-of his-son Enoch.

18. And-there-was-born to-Enoch)(+Irad; and-Irad begat)(+Mehujael;* and-Mehujael begat)(+Methusael; and-Methusael begat)(+Lamech.

19. And-took+to-him Lamech two-[of] wives;* (the) name-of the-one Adah, and-(the)-name-of the-second Zillah.

20. And-bore Adah)(+Jabal;* he was (the) father-of (the) inhabitant-of tent(s) and-(the-possessor-of)-cattle.

21. And-(the)-name-of his-brother (was) Jubal;* he was (the) father-of all+performing-on (the) harp and-(the)-flute.

22. And-Zillah, also+she, bore)(+Tubal Cain, hammerer-of every +cutter-of (*i. e.*, cutting-instrument-of) bronze and-iron;* and-(the)-sister-of Tubal+Cain (was) Naamah.

23. And-said Lamech to-his-wives:—
Adah and-Zillah, hear-ye my-voice,
Wives-of Lamech hearken-unto my-saying;*
For (a) man I-have-killed for-my-wounding;
And-(a)-youth, for-my-hurt.

24. If seven-fold shall-be-avenged+Cain,*
Then-Lamech seventy and-seven.

25. And-knew Adam again)(+his-wife and-she-bare (a) son; and-she-called)(+his-name Seth:* For has-put+to-me God seed another instead-of Abel, for slew-him Cain.

26. And-to-Seth, also+he, was-born+(a)-son; and-he-called)(+his-name Enosh;* then it-was-commenced to-call on-(the)-name-of (the) Lord.

GENESIS I–IV.

THE UNPOINTED HEBREW TEXT.

CHAPTER I.

א בראשית ברא אלהים את השמים ואת הארץ׃
2 והארץ היתה תהו ובהו וחשך על פני תהום ורוח
אלהים מרחפת על פני המים׃
3 ויאמר אלהים יהי אור ויהי אור׃
4 וירא אלהים את האור כי טוב ויבדל אלהים בין האור
ובין החשך׃
ה ויקרא אלהים לאור יום ולחשך קרא לילה ויהי ערב
ויהי בקר יום אחד׃
6 ויאמר אלהים יהי רקיע בתוך המים ויהי מבדיל בין
מים למים׃
7 ויעש אלהים את הרקיע ויבדל בין המים אשר מתחת
לרקיע ובין המים אשר מעל לרקיע ויהי כן׃
8 ויקרא אלהים לרקיע שמים ויהי ערב ויהי בקר יום
שני׃
9 ויאמר אלהים יקוו המים מתחת השמים אל מקום
אחד ותראה היבשה ויהי כן׃
י ויקרא אלהים ליבשה ארץ ולמקוה המים קרא ימים
וירא אלהים כי טוב׃
11 ויאמר אלהים תדשא הארץ דשא עשב מזריע זרע
עץ פרי עשה פרי למינו אשר זרעו בו על הארץ
ויהי כן׃

12 ותוצא הארץ דשא עשב מזריע זרע למינהו ועץ
עשה פרי אשר זרעו בו למינהו וירא אלהים כי טוב:
13 ויהי ערב ויהי בקר יום שלישי:
14 ויאמר אלהים יהי מארת ברקיע השמים להבדיל
בין היום ובין הלילה והיו לאתת ולמועדים ולימים
ושנים:
טו והיו למאורת ברקיע השמים להאיר על הארץ
ויהי כן:
16 ויעש אלהים את שני המארת הגדלים את המאור
הגדל לממשלת היום ואת המאור הקטן לממשלת
הלילה ואת הכוכבים:
17 ויתן אתם אלהים ברקיע השמים להאיר על הארץ:
18 ולמשל ביום ובלילה ולהבדיל בין האור ובין החשך
וירא אלהים כי טוב:
19 ויהי ערב ויהי בקר יום רביעי:
כ ויאמר אלהים ישרצו המים שרץ נפש חיה ועוף
יעופף על הארץ על פני רקיע השמים:
21 ויברא אלהים את התנינם הגדלים ואת כל נפש
החיה הרמשת אשר שרצו המים למינהם ואת
כל עוף כנף למינהו וירא אלהים כי טוב:
22 ויברך אתם אלהים לאמר פרו ורבו ומלאו את המים
בימים והעוף ירב בארץ:
23 ויהי ערב ויהי בקר יום חמישי:
24 ויאמר אלהים תוצא הארץ נפש חיה למינה בהמה
ורמש וחיתו ארץ למינה ויהי כן:

כה ויעש אלהים את חית הארץ למינה ואת הבהמה
למינה ואת כל רמש האדמה למינהו וירא אלהים
כי טוב:
26 ויאמר אלהים נעשה אדם בצלמנו כדמותנו וירדו
בדגת הים ובעוף השמים ובבהמה ובכל הארץ
ובכל הרמש הרמש על הארץ:
27 ויברא אלהים את האדם בצלמו בצלם אלהים ברא
אתו זכר ונקבה ברא אתם:
28 ויברך אתם אלהים ויאמר להם אלהים פרו ורבו
ומלאו את הארץ וכבשה ורדו בדגת הים ובעוף
השמים ובכל חיה הרמשת על הארץ:
29 ויאמר אלהים הנה נתתי לכם את כל עשב זרע
זרע אשר על פני כל הארץ ואת כל העץ אשר בו
פרי עץ זרע זרע לכם יהיה לאכלה:
ל ולכל חית הארץ ולכל עוף השמים ולכל רומש
על הארץ אשר בו נפש חיה את כל ירק עשב לאכלה
ויהי כן:
31 וירא אלהים את כל אשר עשה והנה טוב מאד ויהי
ערב ויהי בקר יום הששי:

CHAPTER II.

א ויכלו השמים והארץ וכל צבאם:
2 ויכל אלהים ביום השביעי מלאכתו אשר עשה וישבת
ביום השביעי מכל מלאכתו אשר עשה:
3 ויברך אלהים את יום השביעי ויקדש אתו כי בו שבת
מכל מלאכתו אשר ברא אלהים לעשות:

4 אלה תולדות השמים והארץ בהבראם ביום עשות
יהוה אלהים ארץ ושמים:
ה וכל שיח השדה טרם יהיה בארץ וכל עשב השדה
טרם יצמח כי לא המטיר יהוה אלהים על הארץ
ואדם אין לעבד את האדמה:
6 ואד יעלה מן הארץ והשקה את כל פני האדמה:
7 וייצר יהוה אלהים את האדם עפר מן האדמה ויפח
באפיו נשמת חיים ויהי האדם לנפש חיה:
8 ויטע יהוה אלהים גן בעדן מקדם וישם שם את האדם
אשר יצר:
9 ויצמח יהוה אלהים מן האדמה כל עץ נחמד למראה
וטוב למאכל ועץ החיים בתוך הגן ועץ הדעת טוב
ורע:
י ונהר יצא מעדן להשקות את הגן ומשם יפרד והיה
לארבעה ראשים:
11 שם האחד פישון הוא הסבב את כל ארץ החוילה
אשר שם הזהב:
12 וזהב הארץ ההוא טוב שם הבדלח ואבן השהם:
13 ושם הנהר השני גיחון הוא הסובב את כל ארץ
כוש:
14 ושם הנהר השלישי חדקל הוא ההלך קדמת אשור
והנהר הרביעי הוא פרת:
טו ויקח יהוה אלהים את האדם וינחהו בגן עדן לעבדה
ולשמרה:

16 ויצו יהוה אלהים על האדם לאמר מכל עץ הגן
אכל תאכל׃
17 ומעץ הדעת טוב ורע לא תאכל ממנו כי ביום
אכלך ממנו מות תמות׃
18 ויאמר יהוה אלהים לא טוב היות האדם לבדו
אעשה לו עזר כנגדו׃
19 ויצר יהוה אלהים מן האדמה כל חית השדה ואת
כל עוף השמים ויבא אל האדם לראות מה יקרא לו
וכל אשר יקרא לו האדם נפש חיה הוא שמו׃
כ ויקרא האדם שמות לכל הבהמה ולעוף השמים
ולכל חית השדה ולאדם לא מצא עזר כנגדו׃
21 ויפל יהוה אלהים תרדמה על האדם ויישן ויקח
אחת מצלעתיו ויסגר בשר תחתנה׃
22 ויבן יהוה אלהים את הצלע אשר לקח מן האדם
לאשה ויבאה אל האדם׃
23 ויאמר האדם זאת הפעם עצם מעצמי ובשר מבשרי
לזאת יקרא אשה כי מאיש לקחה זאת׃
24 על כן יעזב איש את אביו ואת אמו ודבק באשתו
והיו לבשר אחד׃
כה ויהיו שניהם ערומים האדם ואשתו ולא יתבששו׃

CHAPTER III.

א והנחש היה ערום מכל חית השדה אשר עשה
יהוה אלהים ויאמר אל האשה אף כי אמר אלהים
לא תאכלו מכל עץ הגן׃

ותאמר האשה אל הנחש מפרי עץ הגן נאכל׃ 2
ומפרי העץ אשר בתוך הגן אמר אלהים לא תאכלו 3
ממנו ולא תגעו בו פן תמתון׃
ויאמר הנחש אל האשה לא מות תמתון׃ 4
כי ידע אלהים כי ביום אכלכם ממנו ונפקחו עיניכם ה
והייתם כאלהים ידעי טוב ורע׃
ותרא האשה כי טוב העץ למאכל וכי תאוה הוא 6
לעינים ונחמד העץ להשכיל ותקח מפריו ותאכל
ותתן גם לאישה עמה ויאכל׃
ותפקחנה עיני שניהם וידעו כי עירמם הם ויתפרו 7
עלה תאנה ויעשו להם חגרת׃
וישמעו את קול יהוה אלהים מתהלך בגן לרוח 8
היום ויתחבא האדם ואשתו מפני יהוה אלהים
בתוך עץ הגן׃
ויקרא יהוה אלהים אל האדם ויאמר לו איכה׃ 9
ויאמר את קלך שמעתי בגן ואירא כי עירם אנכי י
ואחבא׃
ויאמר מי הגיד לך כי עירם אתה המן העץ אשר 11
צויתיך לבלתי אכל ממנו אכלת׃
ויאמר האדם האשה אשר נתתה עמדי הוא נתנה 12
לי מן העץ ואכל׃
ויאמר יהוה אלהים לאשה מה זאת עשית ותאמר 13
האשה הנחש השיאני ואכל׃

---

o v. 10, מלעיל

14 ויאמר יהוה אלהים אל הנחש כי עשית זאת ארור
אתה מכל הבהמה ומכל חית השדה על גחנך תלך
ועפר תאכל כל ימי חייך:
טו ואיבה אשית בינך ובין האשה ובין זרעך ובין
זרעה הוא ישופך ראש ואתה תשופנו עקב:
16 אל האשה אמר הרבה ארבה עצבונך והרנך בעצב
תלדי בנים ואל אישך תשוקתך והוא ימשל בך:
17 ולאדם אמר כי שמעת לקול אשתך ותאכל מן העץ
אשר צויתיך לאמר לא תאכל ממנו ארורה האדמה
בעבורך בעצבון תאכלנה כל ימי חייך:
18 וקוץ ודרדר תצמיח לך ואכלת את עשב השדה:
19 בזעת אפיך תאכל לחם עד שובך אל האדמה כי
ממנה לקחת כי עפר אתה ואל עפר תשוב:
כ ויקרא האדם שם אשתו חוה כי הוא היתה אם
כל חי:
21 ויעש יהוה אלהים לאדם ולאשתו כתנות עור
וילבשם:
22 ויאמר יהוה אלהים הן האדם היה כאחד ממנו
לדעת טוב ורע ועתה פן ישלח ידו ולקח גם מעץ
החיים ואכל וחי לעלם:
23 וישלחהו יהוה אלהים מגן עדן לעבד את האדמה
אשר לקח משם:
24 ויגרש את האדם וישכן מקדם לגן עדן את הכרבים
ואת להט החרב המתהפכת לשמר את דרך עץ
החיים:

CHAPTER IV.

א והאדם ידע את חוה אשתו ותהר ותלד את קין
ותאמר קניתי איש את יהוה׃
2 ותסף ללדת את אחיו את הבל ויהי הבל רעה צאן
וקין היה עבד אדמה׃
3 ויהי מקץ ימים ויבא קין מפרי האדמה מנחה
ליהוה׃
4 והבל הביא גם הוא מבכרות צאנו ומחלבהן וישע
יהוה אל הבל ואל מנחתו׃
ה ואל קין ואל מנחתו לא שעה ויחר לקין מאד
ויפלו פניו׃
6 ויאמר יהוה אל קין למה חרה לך ולמה נפלו
פניך׃
7 הלוא אם תיטיב שאת ואם לא תיטיב לפתח
חטאת רבץ ואליך תשוקתו ואתה תמשל בו׃
8 ויאמר קין אל הבל אחיו ויהי בהיותם בשדה
ויקם קין אל הבל אחיו ויהרגהו׃
9 ויאמר יהוה אל קין אי הבל אחיך ויאמר לא
ידעתי השמר אחי אנכי׃
י ויאמר מה עשית קול דמי אחיך צעקים אלי מן
האדמה׃
11 ועתה ארור אתה מן האדמה אשר פצתה את פיה
לקחת את דמי אחיך מידך׃
12 כי תעבד את האדמה לא תסף תת כחה לך נע
ונד תהיה בארץ׃

13 ויאמר קין אל יהוה גדול עוני מנשוא׃
14 הן גרשת אתי היום מעל פני האדמה ומפניך
אסתר והייתי נע ונד בארץ והיה כל מצאי יהרגני׃
טו ויאמר לו יהוה לכן כל הרג קין שבעתים יקם
ויֹשם יהוה לקין אות לבלתי הכות אתו כל מצאו׃
16 ויצא קין מלפני יהוה וישב בארץ נוד קדמת עדן׃
17 וידע קין את אשתו ותהר ותלד את חנוך ויהי
בנה עיר ויקרא שם העיר כשם בנו חנוך׃
18 ויולד לחנוך את עירד ועירד ילד את מחויאל
ומחייאל ילד את מתושאל ומתושאל ילד את למך׃
19 ויקח לו למך שתי נשים שם האחת עדה ושם
השנית צלה׃
כ ותלד עדה את יבל הוא היה אבי ישב אהל
ומקנה׃
21 ושם אחיו יובל הוא היה אבי כל תפש כנור ועוגב׃
22 וצלה גם הוא ילדה את תובל קין לטש כל חרש
נחשת וברזל ואחות תובל קין נעמה׃
23 ויאמר למך לנשיו
עדה וצלה שמען קולי
נשי למך האזנה אמרתי
כי איש הרגתי לפצעי
וילד לחברתי׃

כי שבעתים יקם קין 24
ולמך שבעים ושבעה:
וידע אדם עוד את אשתו ותלד בן ותקרא את שמו כה
שת כי שת לי אלהים זרע אחר תחת הבל כי
הרגו קין:
ולשת גם הוא ילד בן ויקרא את שמו אנוש אז 26
הוחל לקרא בשם יהוה:

GENESIS V–VIII.

THE HEBREW TEXT.

CHAPTER V.

א זֶה סֵפֶר תּוֹלְדֹת אָדָם בְּיוֹם בְּרֹא אֱלֹהִים אָדָם בִּדְמוּת
אֱלֹהִים עָשָׂה אֹתוֹ׃

2 זָכָר וּנְקֵבָה בְּרָאָם וַיְבָרֶךְ אֹתָם וַיִּקְרָא אֶת־שְׁמָם אָדָם
בְּיוֹם הִבָּרְאָם׃

3 וַיְחִי אָדָם שְׁלֹשִׁים וּמְאַת שָׁנָה וַיּוֹלֶד בִּדְמוּתוֹ כְּצַלְמוֹ
וַיִּקְרָא אֶת־שְׁמוֹ שֵׁת׃

4 וַיִּהְיוּ ו יְמֵי אָדָם אַחֲרֵי הוֹלִידוֹ אֶת־שֵׁת שְׁמֹנֶה מֵאֹת
שָׁנָה וַיּוֹלֶד בָּנִים וּבָנוֹת׃

ה וַיִּהְיוּ כָּל־יְמֵי אָדָם אֲשֶׁר־חַי תְּשַׁע מֵאוֹת שָׁנָה וּשְׁלֹשִׁים
שָׁנָה וַיָּמֹת׃

6 וַיְחִי־שֵׁת חָמֵשׁ שָׁנִים וּמְאַת שָׁנָה וַיּוֹלֶד אֶת־אֱנוֹשׁ׃

7 וַיְחִי־שֵׁת אַחֲרֵי הוֹלִידוֹ אֶת־אֱנוֹשׁ שֶׁבַע שָׁנִים וּשְׁמֹנֶה
מֵאוֹת שָׁנָה וַיּוֹלֶד בָּנִים וּבָנוֹת׃

8 וַיִּהְיוּ כָל־יְמֵי־שֵׁת שְׁתֵּים עֶשְׂרֵה שָׁנָה וּתְשַׁע מֵאוֹת
שָׁנָה וַיָּמֹת׃

9 וַיְחִי אֱנוֹשׁ תִּשְׁעִים שָׁנָה וַיּוֹלֶד אֶת־קֵינָן׃

י וַיְחִי אֱנוֹשׁ אַחֲרֵי הוֹלִידוֹ אֶת־קֵינָן חֲמֵשׁ עֶשְׂרֵה שָׁנָה
וּשְׁמֹנֶה מֵאוֹת שָׁנָה וַיּוֹלֶד בָּנִים וּבָנוֹת׃

11 וַיִּהְיוּ כָל־יְמֵי אֱנוֹשׁ חָמֵשׁ שָׁנִים וּתְשַׁע מֵאוֹת שָׁנָה
וַיָּמֹת׃
12 וַיְחִי קֵינָן שִׁבְעִים שָׁנָה וַיּוֹלֶד אֶת־מַהֲלַלְאֵל׃
13 וַיְחִי קֵינָן אַחֲרֵי הוֹלִידוֹ אֶת־מַהֲלַלְאֵל אַרְבָּעִים שָׁנָה
וּשְׁמֹנֶה מֵאוֹת שָׁנָה וַיּוֹלֶד בָּנִים וּבָנוֹת׃
14 וַיִּהְיוּ כָל־יְמֵי קֵינָן עֶשֶׂר שָׁנִים וּתְשַׁע מֵאוֹת שָׁנָה וַיָּמֹת׃
טו וַיְחִי מַהֲלַלְאֵל חָמֵשׁ שָׁנִים וְשִׁשִּׁים שָׁנָה וַיּוֹלֶד אֶת־יָרֶד׃
16 וַיְחִי מַהֲלַלְאֵל אַחֲרֵי הוֹלִידוֹ אֶת־יֶרֶד שְׁלֹשִׁים שָׁנָה
וּשְׁמֹנֶה מֵאוֹת שָׁנָה וַיּוֹלֶד בָּנִים וּבָנוֹת׃
17 וַיִּהְיוּ כָל־יְמֵי מַהֲלַלְאֵל חָמֵשׁ וְתִשְׁעִים שָׁנָה וּשְׁמֹנֶה
מֵאוֹת שָׁנָה וַיָּמֹת׃
18 וַיְחִי־יֶרֶד שְׁתַּיִם וְשִׁשִּׁים שָׁנָה וּמְאַת שָׁנָה וַיּוֹלֶד
אֶת־חֲנוֹךְ׃
19 וַיְחִי־יֶרֶד אַחֲרֵי הוֹלִידוֹ אֶת־חֲנוֹךְ שְׁמֹנֶה מֵאוֹת שָׁנָה
וַיּוֹלֶד בָּנִים וּבָנוֹת׃
כ וַיִּהְיוּ כָל־יְמֵי־יֶרֶד שְׁתַּיִם וְשִׁשִּׁים שָׁנָה וּתְשַׁע מֵאוֹת
שָׁנָה וַיָּמֹת׃
21 וַיְחִי חֲנוֹךְ חָמֵשׁ וְשִׁשִּׁים שָׁנָה וַיּוֹלֶד אֶת־מְתוּשָׁלַח׃
22 וַיִּתְהַלֵּךְ חֲנוֹךְ אֶת־הָאֱלֹהִים אַחֲרֵי הוֹלִידוֹ אֶת־מְתוּשֶׁלַח
שְׁלֹשׁ מֵאוֹת שָׁנָה וַיּוֹלֶד בָּנִים וּבָנוֹת׃
23 וַיְהִי כָּל־יְמֵי חֲנוֹךְ חָמֵשׁ וְשִׁשִּׁים שָׁנָה וּשְׁלֹשׁ מֵאוֹת
שָׁנָה׃

24 וַיִּתְהַלֵּךְ חֲנוֹךְ אֶת־הָאֱלֹהִים וְאֵינֶנּוּ כִּי־לָקַח אֹתוֹ אֱלֹהִים׃
כה וַיְחִי מְתוּשֶׁלַח שֶׁבַע וּשְׁמֹנִים שָׁנָה וּמְאַת שָׁנָה וַיּוֹלֶד
אֶת־לָמֶךְ׃
26 וַיְחִי מְתוּשֶׁלַח אַחֲרֵי הוֹלִידוֹ אֶת־לֶמֶךְ שְׁתַּיִם וּשְׁמוֹנִים
שָׁנָה וּשְׁבַע מֵאוֹת שָׁנָה וַיּוֹלֶד בָּנִים וּבָנוֹת׃
27 וַיִּהְיוּ כָּל־יְמֵי מְתוּשֶׁלַח תֵּשַׁע וְשִׁשִּׁים שָׁנָה וּתְשַׁע מֵאוֹת
שָׁנָה וַיָּמֹת׃
28 וַיְחִי־לֶמֶךְ שְׁתַּיִם וּשְׁמֹנִים שָׁנָה וּמְאַת שָׁנָה וַיּוֹלֶד בֵּן׃
29 וַיִּקְרָא אֶת־שְׁמוֹ נֹחַ לֵאמֹר זֶה יְנַחֲמֵנוּ מִמַּעֲשֵׂנוּ וּמֵעִצְּבוֹן
יָדֵינוּ מִן־הָאֲדָמָה אֲשֶׁר אֵרְרָהּ יְהוָה׃
ל וַיְחִי־לֶמֶךְ אַחֲרֵי הוֹלִידוֹ אֶת־נֹחַ חָמֵשׁ וְתִשְׁעִים שָׁנָה
וַחֲמֵשׁ מֵאֹת שָׁנָה וַיּוֹלֶד בָּנִים וּבָנוֹת׃
31 וַיְהִי כָל־יְמֵי־לֶמֶךְ שֶׁבַע וְשִׁבְעִים שָׁנָה וּשְׁבַע מֵאוֹת
שָׁנָה וַיָּמֹת׃
32 וַיְהִי־נֹחַ בֶּן־חֲמֵשׁ מֵאוֹת שָׁנָה וַיּוֹלֶד נֹחַ אֶת־שֵׁם אֶת־חָם
וְאֶת־יָפֶת׃

CHAPTER VI.

א וַיְהִי כִּי־הֵחֵל הָאָדָם לָרֹב עַל־פְּנֵי הָאֲדָמָה וּבָנוֹת
יֻלְּדוּ לָהֶם׃
2 וַיִּרְאוּ בְנֵי־הָאֱלֹהִים אֶת־בְּנוֹת הָאָדָם כִּי טֹבֹת הֵנָּה
וַיִּקְחוּ לָהֶם נָשִׁים מִכֹּל אֲשֶׁר בָּחָרוּ׃

תרי טעמי ,והקורא יטעים הגרש קודם התלשא .o v. 29

3 וַיֹּאמֶר יְהוָה לֹא־יָדוֹן רוּחִי בָאָדָם לְעֹלָם בְּשַׁגַּם הוּא
בָשָׂר וְהָיוּ יָמָיו מֵאָה וְעֶשְׂרִים שָׁנָה׃
4 הַנְּפִלִים הָיוּ בָאָרֶץ בַּיָּמִים הָהֵם וְגַם אַחֲרֵי־כֵן אֲשֶׁר
יָבֹאוּ בְּנֵי הָאֱלֹהִים אֶל־בְּנוֹת הָאָדָם וְיָלְדוּ לָהֶם הֵמָּה
הַגִּבֹּרִים אֲשֶׁר מֵעוֹלָם אַנְשֵׁי הַשֵּׁם׃
ה וַיַּרְא יְהוָה כִּי רַבָּה רָעַת הָאָדָם בָּאָרֶץ וְכָל־יֵצֶר
מַחְשְׁבֹת לִבּוֹ רַק רַע כָּל־הַיּוֹם׃
6 וַיִּנָּחֶם יְהוָה כִּי־עָשָׂה אֶת־הָאָדָם בָּאָרֶץ וַיִּתְעַצֵּב
אֶל־לִבּוֹ׃
7 וַיֹּאמֶר יְהוָה אֶמְחֶה אֶת־הָאָדָם אֲשֶׁר־בָּרָאתִי מֵעַל פְּנֵי
הָאֲדָמָה מֵאָדָם עַד־בְּהֵמָה עַד־רֶמֶשׂ וְעַד־עוֹף הַשָּׁמָיִם
כִּי נִחַמְתִּי כִּי עֲשִׂיתִם׃
8 וְנֹחַ מָצָא חֵן בְּעֵינֵי יְהוָה׃

פרשת נח.

9 אֵלֶּה תוֹלְדֹת נֹחַ נֹחַ אִישׁ צַדִּיק תָּמִים הָיָה בְּדֹרֹתָיו
אֶת־הָאֱלֹהִים הִתְהַלֶּךְ־נֹחַ׃
וַיּוֹלֶד נֹחַ שְׁלֹשָׁה בָנִים אֶת־שֵׁם אֶת־חָם וְאֶת־יָפֶת׃
11 וַתִּשָּׁחֵת הָאָרֶץ לִפְנֵי הָאֱלֹהִים וַתִּמָּלֵא הָאָרֶץ חָמָס׃
12 וַיַּרְא אֱלֹהִים אֶת־הָאָרֶץ וְהִנֵּה נִשְׁחָתָה כִּי־הִשְׁחִית
כָּל־בָּשָׂר אֶת־דַּרְכּוֹ עַל־הָאָרֶץ׃

13 וַיֹּאמֶר אֱלֹהִים לְנֹחַ קֵץ כָּל־בָּשָׂר בָּא לְפָנַי כִּי־מָלְאָה
הָאָרֶץ חָמָס מִפְּנֵיהֶם וְהִנְנִי מַשְׁחִיתָם אֶת־הָאָרֶץ׃
14 עֲשֵׂה לְךָ תֵּבַת עֲצֵי־גֹפֶר קִנִּים תַּעֲשֶׂה אֶת־הַתֵּבָה
וְכָפַרְתָּ אֹתָהּ מִבַּיִת וּמִחוּץ בַּכֹּפֶר׃
טו וְזֶה אֲשֶׁר תַּעֲשֶׂה אֹתָהּ שְׁלֹשׁ מֵאוֹת אַמָּה אֹרֶךְ הַתֵּבָה
חֲמִשִּׁים אַמָּה רָחְבָּהּ וּשְׁלֹשִׁים אַמָּה קוֹמָתָהּ׃
16 צֹהַר ׀ תַּעֲשֶׂה לַתֵּבָה וְאֶל־אַמָּה תְכַלֶּנָּה מִלְמַעְלָה וּפֶתַח
הַתֵּבָה בְּצִדָּהּ תָּשִׂים תַּחְתִּיִּם שְׁנִים וּשְׁלִשִׁים תַּעֲשֶׂהָ׃
17 וַאֲנִי הִנְנִי מֵבִיא אֶת־הַמַּבּוּל מַיִם עַל־הָאָרֶץ לְשַׁחֵת
כָּל־בָּשָׂר אֲשֶׁר־בּוֹ רוּחַ חַיִּים מִתַּחַת הַשָּׁמָיִם כֹּל
אֲשֶׁר־בָּאָרֶץ יִגְוָע׃
18 וַהֲקִמֹתִי אֶת־בְּרִיתִי אִתָּךְ וּבָאתָ אֶל־הַתֵּבָה אַתָּה וּבָנֶיךָ
וְאִשְׁתְּךָ וּנְשֵׁי־בָנֶיךָ אִתָּךְ׃
19 וּמִכֹּל־הָחַי מִכָּל־בָּשָׂר שְׁנַיִם מִכֹּל תָּבִיא אֶל־הַתֵּבָה
לְהַחֲיֹת אִתָּךְ זָכָר וּנְקֵבָה יִהְיוּ׃
כ מֵהָעוֹף לְמִינֵהוּ וּמִן־הַבְּהֵמָה לְמִינָהּ מִכֹּל רֶמֶשׂ הָאֲדָמָה
לְמִינֵהוּ שְׁנַיִם מִכֹּל יָבֹאוּ אֵלֶיךָ לְהַחֲיוֹת׃
21 וְאַתָּה קַח־לְךָ מִכָּל־מַאֲכָל אֲשֶׁר יֵאָכֵל וְאָסַפְתָּ אֵלֶיךָ
וְהָיָה לְךָ וְלָהֶם לְאָכְלָה׃
22 וַיַּעַשׂ נֹחַ כְּכֹל אֲשֶׁר צִוָּה אֹתוֹ אֱלֹהִים כֵּן עָשָׂה׃

CHAPTER VII.

א וַיֹּאמֶר יְהוָה לְנֹחַ בֹּא־אַתָּה וְכָל־בֵּיתְךָ אֶל־הַתֵּבָה כִּי־
אֹתְךָ רָאִיתִי צַדִּיק לְפָנַי בַּדּוֹר הַזֶּה׃

2 מִכֹּל ׀ הַבְּהֵמָה הַטְּהוֹרָה תִּקַּח־לְךָ שִׁבְעָה שִׁבְעָה אִישׁ
וְאִשְׁתּוֹ וּמִן־הַבְּהֵמָה אֲשֶׁר לֹא טְהֹרָה הִוא שְׁנַיִם
אִישׁ וְאִשְׁתּוֹ׃

3 גַּם מֵעוֹף הַשָּׁמַיִם שִׁבְעָה שִׁבְעָה זָכָר וּנְקֵבָה לְחַיּוֹת
זֶרַע עַל־פְּנֵי כָל־הָאָרֶץ׃

4 כִּי ׀ לְיָמִים עוֹד שִׁבְעָה אָנֹכִי מַמְטִיר עַל־הָאָרֶץ אַרְבָּעִים
יוֹם וְאַרְבָּעִים לָיְלָה וּמָחִיתִי אֶת־כָּל־הַיְקוּם אֲשֶׁר
עָשִׂיתִי מֵעַל פְּנֵי הָאֲדָמָה׃

ה וַיַּעַשׂ נֹחַ כְּכֹל אֲשֶׁר־צִוָּהוּ יְהוָה׃

6 וְנֹחַ בֶּן־שֵׁשׁ מֵאוֹת שָׁנָה וְהַמַּבּוּל הָיָה מַיִם עַל־הָאָרֶץ׃

7 וַיָּבֹא נֹחַ ׀ וּבָנָיו וְאִשְׁתּוֹ וּנְשֵׁי־בָנָיו אִתּוֹ אֶל־הַתֵּבָה מִפְּנֵי
מֵי הַמַּבּוּל׃

8 מִן־הַבְּהֵמָה הַטְּהוֹרָה וּמִן־הַבְּהֵמָה אֲשֶׁר אֵינֶנָּה טְהֹרָה
וּמִן־הָעוֹף וְכֹל אֲשֶׁר־רֹמֵשׂ עַל־הָאֲדָמָה׃

9 שְׁנַיִם שְׁנַיִם בָּאוּ אֶל־נֹחַ אֶל־הַתֵּבָה זָכָר וּנְקֵבָה כַּאֲשֶׁר
צִוָּה אֱלֹהִים אֶת־נֹחַ׃

י וַיְהִי לִשְׁבְעַת הַיָּמִים וּמֵי הַמַּבּוּל הָיוּ עַל־הָאָרֶץ׃

11 בִּשְׁנַת שֵׁשׁ־מֵאוֹת שָׁנָה לְחַיֵּי־נֹחַ בַּחֹדֶשׁ הַשֵּׁנִי בְּשִׁבְעָה־
עָשָׂר יוֹם לַחֹדֶשׁ בַּיּוֹם הַזֶּה נִבְקְעוּ כָּל־מַעְיְנוֹת תְּהוֹם
רַבָּה וַאֲרֻבֹּת הַשָּׁמַיִם נִפְתָּחוּ׃
12 וַיְהִי הַגֶּשֶׁם עַל־הָאָרֶץ אַרְבָּעִים יוֹם וְאַרְבָּעִים לָיְלָה׃
13 בְּעֶצֶם הַיּוֹם הַזֶּה בָּא נֹחַ וְשֵׁם־וְחָם וָיֶפֶת בְּנֵי־נֹחַ וְאֵשֶׁת
נֹחַ וּשְׁלֹשֶׁת נְשֵׁי־בָנָיו אִתָּם אֶל־הַתֵּבָה׃
14 הֵמָּה וְכָל־הַחַיָּה לְמִינָהּ וְכָל־הַבְּהֵמָה לְמִינָהּ וְכָל־
הָרֶמֶשׂ הָרֹמֵשׂ עַל־הָאָרֶץ לְמִינֵהוּ וְכָל־הָעוֹף לְמִינֵהוּ
כֹּל צִפּוֹר כָּל־כָּנָף׃
טו וַיָּבֹאוּ אֶל־נֹחַ אֶל־הַתֵּבָה שְׁנַיִם שְׁנַיִם מִכָּל־הַבָּשָׂר
אֲשֶׁר־בּוֹ רוּחַ חַיִּים׃
16 וְהַבָּאִים זָכָר וּנְקֵבָה מִכָּל־בָּשָׂר בָּאוּ כַּאֲשֶׁר צִוָּה אֹתוֹ
אֱלֹהִים וַיִּסְגֹּר יְהוָה בַּעֲדוֹ׃
17 וַיְהִי הַמַּבּוּל אַרְבָּעִים יוֹם עַל־הָאָרֶץ וַיִּרְבּוּ הַמַּיִם וַיִּשְׂאוּ
אֶת־הַתֵּבָה וַתָּרָם מֵעַל הָאָרֶץ׃
18 וַיִּגְבְּרוּ הַמַּיִם וַיִּרְבּוּ מְאֹד עַל־הָאָרֶץ וַתֵּלֶךְ הַתֵּבָה עַל־
פְּנֵי הַמָּיִם׃
19 וְהַמַּיִם גָּבְרוּ מְאֹד מְאֹד עַל־הָאָרֶץ וַיְכֻסּוּ כָּל־הֶהָרִים
הַגְּבֹהִים אֲשֶׁר־תַּחַת כָּל־הַשָּׁמָיִם׃
כ חֲמֵשׁ עֶשְׂרֵה אַמָּה מִלְמַעְלָה גָּבְרוּ הַמָּיִם וַיְכֻסּוּ הֶהָרִים׃
21 וַיִּגְוַע כָּל־בָּשָׂר ׀ הָרֹמֵשׂ עַל־הָאָרֶץ בָּעוֹף וּבַבְּהֵמָה
וּבַחַיָּה וּבְכָל־הַשֶּׁרֶץ הַשֹּׁרֵץ עַל־הָאָרֶץ וְכֹל הָאָדָם׃

כֹּל אֲשֶׁר נִשְׁמַת־רוּחַ חַיִּים בְּאַפָּיו מִכֹּל אֲשֶׁר בֶּחָרָבָה 22
מֵתוּ׃
וַיִּמַּח אֶת־כָּל־הַיְקוּם ׀ אֲשֶׁר ׀ עַל־פְּנֵי הָאֲדָמָה מֵאָדָם 23
עַד־בְּהֵמָה עַד־רֶמֶשׂ וְעַד־עוֹף הַשָּׁמַיִם וַיִּמָּחוּ מִן־הָאָרֶץ
וַיִּשָּׁאֶר אַךְ־נֹחַ וַאֲשֶׁר אִתּוֹ בַּתֵּבָה׃
וַיִּגְבְּרוּ הַמַּיִם עַל־הָאָרֶץ חֲמִשִּׁים וּמְאַת יוֹם׃ 24

CHAPTER VIII.

וַיִּזְכֹּר אֱלֹהִים אֶת־נֹחַ וְאֵת כָּל־חַיָּתוֹ וְאֶת־כָּל־הַבְּהֵמָה א
אֲשֶׁר אִתּוֹ בַּתֵּבָה וַיַּעֲבֵר אֱלֹהִים רוּחַ עַל־הָאָרֶץ וַיָּשֹׁכּוּ
הַמָּיִם׃
וַיִּסָּכְרוּ מַעְיְנֹת תְּהוֹם וַאֲרֻבֹּת הַשָּׁמָיִם וַיִּכָּלֵא הַגֶּשֶׁם 2
מִן־הַשָּׁמָיִם׃
וַיָּשֻׁבוּ הַמַּיִם מֵעַל הָאָרֶץ הָלוֹךְ וָשׁוֹב וַיַּחְסְרוּ הַמַּיִם 3
מִקְצֵה חֲמִשִּׁים וּמְאַת יוֹם׃
וַתָּנַח הַתֵּבָה בַּחֹדֶשׁ הַשְּׁבִיעִי בְּשִׁבְעָה־עָשָׂר יוֹם לַחֹדֶשׁ 4
עַל הָרֵי אֲרָרָט׃
וְהַמַּיִם הָיוֹ הָלוֹךְ וְחָסוֹר עַד הַחֹדֶשׁ הָעֲשִׂירִי בָּעֲשִׂירִי ה
בְּאֶחָד לַחֹדֶשׁ נִרְאוּ רָאשֵׁי הֶהָרִים׃
וַיְהִי מִקֵּץ אַרְבָּעִים יוֹם וַיִּפְתַּח נֹחַ אֶת־חַלּוֹן הַתֵּבָה 6
אֲשֶׁר עָשָׂה׃

7 וַיְשַׁלַּח אֶת־הָעֹרֵב וַיֵּצֵא יָצוֹא וָשׁוֹב עַד־יְבֹשֶׁת הַמַּיִם
מֵעַל הָאָרֶץ׃
8 וַיְשַׁלַּח אֶת־הַיּוֹנָה מֵאִתּוֹ לִרְאוֹת הֲקַלּוּ הַמַּיִם מֵעַל פְּנֵי
הָאֲדָמָה׃
9 וְלֹא־מָצְאָה הַיּוֹנָה מָנוֹחַ לְכַף־רַגְלָהּ וַתָּשָׁב אֵלָיו אֶל־
הַתֵּבָה כִּי־מַיִם עַל־פְּנֵי כָל־הָאָרֶץ וַיִּשְׁלַח יָדוֹ וַיִּקָּחֶהָ
וַיָּבֵא אֹתָהּ אֵלָיו אֶל־הַתֵּבָה׃
י וַיָּחֶל עוֹד שִׁבְעַת יָמִים אֲחֵרִים וַיֹּסֶף שַׁלַּח אֶת־הַיּוֹנָה
מִן־הַתֵּבָה׃
11 וַתָּבֹא אֵלָיו הַיּוֹנָה לְעֵת עֶרֶב וְהִנֵּה עֲלֵה־זַיִת טָרָף בְּפִיהָ
וַיֵּדַע נֹחַ כִּי־קַלּוּ הַמַּיִם מֵעַל הָאָרֶץ׃
12 וַיָּחֶל עוֹד שִׁבְעַת יָמִים אֲחֵרִים וַיְשַׁלַּח אֶת־הַיּוֹנָה וְלֹא־
יָסְפָה שׁוּב־אֵלָיו עוֹד׃
13 וַיְהִי בְּאַחַת וְשֵׁשׁ־מֵאוֹת שָׁנָה בָּרִאשׁוֹן בְּאֶחָד לַחֹדֶשׁ
חָרְבוּ הַמַּיִם מֵעַל הָאָרֶץ וַיָּסַר נֹחַ אֶת־מִכְסֵה הַתֵּבָה
וַיַּרְא וְהִנֵּה חָרְבוּ פְּנֵי הָאֲדָמָה׃
14 וּבַחֹדֶשׁ הַשֵּׁנִי בְּשִׁבְעָה וְעֶשְׂרִים יוֹם לַחֹדֶשׁ יָבְשָׁה
הָאָרֶץ׃
טו וַיְדַבֵּר אֱלֹהִים אֶל־נֹחַ לֵאמֹר׃
16 צֵא מִן־הַתֵּבָה אַתָּה וְאִשְׁתְּךָ וּבָנֶיךָ וּנְשֵׁי־בָנֶיךָ אִתָּךְ׃

17 כָּל־הַחַיָּה אֲשֶׁר־אִתְּךָ מִכָּל־בָּשָׂר בָּעוֹף וּבַבְּהֵמָה וּבְכָל־
הָרֶמֶשׂ הָרֹמֵשׂ עַל־הָאָרֶץ הוֹצֵא אִתָּךְ וְשָׁרְצוּ בָאָרֶץ
וּפָרוּ וְרָבוּ עַל־הָאָרֶץ׃

18 וַיֵּצֵא־נֹחַ וּבָנָיו וְאִשְׁתּוֹ וּנְשֵׁי־בָנָיו אִתּוֹ׃

19 כָּל־הַחַיָּה כָּל־הָרֶמֶשׂ וְכָל־הָעוֹף כֹּל רוֹמֵשׂ עַל־הָאָרֶץ
לְמִשְׁפְּחֹתֵיהֶם יָצְאוּ מִן־הַתֵּבָה׃

כ 20 וַיִּבֶן נֹחַ מִזְבֵּחַ לַיהוָה וַיִּקַּח מִכֹּל ׀ הַבְּהֵמָה הַטְּהוֹרָה
וּמִכֹּל הָעוֹף הַטָּהוֹר וַיַּעַל עֹלֹת בַּמִּזְבֵּחַ׃

21 וַיָּרַח יְהוָה אֶת־רֵיחַ הַנִּיחֹחַ וַיֹּאמֶר יְהוָה אֶל־לִבּוֹ לֹא
אֹסִף לְקַלֵּל עוֹד אֶת־הָאֲדָמָה בַּעֲבוּר הָאָדָם כִּי יֵצֶר
לֵב הָאָדָם רַע מִנְּעֻרָיו וְלֹא־אֹסִף עוֹד לְהַכּוֹת אֶת־
כָּל־חַי כַּאֲשֶׁר עָשִׂיתִי׃

22 עֹד כָּל־יְמֵי הָאָרֶץ זֶרַע וְקָצִיר וְקֹר וָחֹם וְקַיִץ וָחֹרֶף
וְיוֹם וָלָיְלָה לֹא יִשְׁבֹּתוּ׃

WORD LISTS—HEBREW.

LIST I.

Verbs occurring 500—5000 times.

1.	אָכַל	8.	יָלַד	15.	עָבַר	22.	רָאָה
2.	אָמַר	9.	יָצָא	16.	עָלָה	23.	שִׂים
3.	בּוֹא	10.	יָשַׁב	17.	עָמַד	24.	שׁוּב
4.	דָּבַר	11.	לָקַח	18.	עָשָׂה	25.	שָׁלַח
5.	הָיָה	12.	מוּת	19.	צָוָה	26.	שָׁמַע
6.	הָלַךְ	13.	נָשָׂא	20.	קוּם		
7.	יָדַע	14.	נָתַן	21.	קָרָא		

LIST II.

Verbs occurring 200—500 times.

27.	אָהַב	37.	יָסַף	47.	מָלַךְ	57.	פָּקַד
28.	אָסַף	38.	יָרֵא	48.	מָצָא	58.	רָפָה
29.	בָּנָה	39.	יָרַד	49.	נָגַד	59.	רוּם
30.	בָּקַשׁ	40.	יָרַשׁ	50.	נָטָה	60.	שָׁכַב
31.	בָּרַךְ	41.	יָשַׁע	51.	נָכָה	61.	שָׁמַר
32.	זָכַר	42.	כּוּן	52.	נָפַל	62.	שָׁפַט
33.	חָזַק	43.	כָּלָה	53.	נָצַל	63.	שָׁתָה
34.	חָטָא	44.	כָּרַת	54.	סוּר		
35.	חָיָה	45.	כָּתַב	55.	עָבַד		
36.	יָכֹל	46.	מָלֵא	56.	עָנָה		

LIST III.

Verbs occurring 100—200 times.

64.	אָבַד	66.	בּוֹשׁ	68.	בִּין	70.	גָּאַל
65.	אָמֵן	67.	בָּטַח	69.	בָּכָה	71.	גָּדַל

72.	גּוּר	83.	יָטַב	94.	סָבַב	105.	שָׁרַף
73.	גָּלָה	84.	יָתַר	95.	סָפַר	106.	שָׁאַל
74.	דָּרַשׁ	85.	כָּבֵד	96.	עָזַב	107.	שָׁבַע
75.	הָלַל	86.	כָּסָה	97.	פָּנָה	108.	שָׁבַר
76.	הָרַג	87.	כָּפַר	98.	קָבַר	109.	שָׁחָה
77.	זָבַח	88.	לָבַשׁ	99.	קָדַשׁ	110.	שָׁחַת
78.	חָלַל	89.	לָחַם	100.	קָרַב	111.	שָׁכַן
79.	חָנָה	90.	לָכַד	101.	רָדַף	112.	שָׁלַךְ
80.	חָשַׁב	91.	נָגַע	102.	רוּץ	113.	שָׁלֵם
81.	טָמֵא	92.	נָגַשׁ	103.	רָעָה	114.	שָׁרַת
82.	יָדָה	93.	נָסַע	104.	שָׁנֵא		

LIST IV.

Verbs occurring 50–100 times.

115.	אָבָה	130.	חָדַל	145.	יָרָה	160.	נָחַל
116.	אָחַז	131.	חוּל	146.	כָּבַס	161.	נָטַע
117.	אָסַר	132.	חָלָה	147.	כָּעַס	162.	נָכַר
118.	אָרַר	133.	חָלַק	148.	כָּשַׁל	163.	נָצַב
119.	בָּחַר	134.	חָנַן	149.	לוּן	164.	נָצַח
120.	בָּלַע	135.	חָפֵץ	150.	לָמַד	165.	נָצַר
121.	בָּעַר	136.	חָרָה	151.	מָדַד	166.	נָשַׁג
122.	בָּקַע	137.	חָרַשׁ	152.	מָהַר	167.	סָגַר
123.	בָּרָא	138.	חָתַת	153.	מָכַר	168.	סָתַר
124.	בָּרַח	139.	טָהֵר	154.	מָלַט	169.	עוּר
125.	דָּבַק	140.	יָבֵשׁ	155.	מָשַׁח	170.	עָזַר
126.	הָפַךְ	141.	יָכַח	156.	מָשַׁל	171.	עָנָה
127.	זוּר	142.	יָעַץ	157.	נָבַט	172.	עָרַךְ
128.	זָנָה	143.	יָצַק	158.	נָדַח	173.	פָּדָה
129.	זָרַע	144.	יָצַר	159.	נוּחַ	174.	פּוּץ

175.	פָּלָא	184.	קָנָה	193.	רָפָא	201.	שִׁית				
176.	פָּלַל	185.	קָרַע	194.	רָצָה	202.	שָׂכַם				
177.	פָּעַל	186.	רָחַם	195.	שָׁבַע	203.	שָׁמַד				
178.	פָּרַר	187.	רָחַץ	196.	שָׂכַל	204.	שָׁמֵם				
179.	פָּרַשׂ	188.	רָחַק	197.	שָׁבַת	205.	שָׁקָה				
180.	צָעַק	189.	רִיב	198.	שָׁדַד	206.	תָּמַם				
181.	צָפָה	190.	רָכַב	199.	שָׁחַט	207.	תָּפַשׂ				
182.	צָרַר	191.	רָנַן	200.	שִׁיר	208.	תָּקַע				
183.	קָלַל	192.	רָעַע								

LIST V.

Nouns occurring 500—5000 times.

1.	אָב	11.	בַּיִת	21.	לֵב	31.	קוֹל				
2.	אָדָם	12.	בֵּן	22.	מֵאָה	32.	קֹדֶשׁ				
3.	אֲדֹנָי	13.	דָּבָר	23.	מַיִם	33.	רֹאשׁ				
4.	אָח	14.	דֶּרֶךְ	24.	מֶלֶךְ	34.	שִׁבְעָה				
5.	אֶחָד	15.	הַר	25.	נֶפֶשׁ	35.	שֵׁם

WORD LISTS—TRANSLATION.

LIST I.

Verbs occurring 500—5000 times.

1. Eat
2. Say
3. Go in
4. Speak
5. Be
6. Go
7. Ḳnow
8. Bring forth
9. Go out
10. Sit, dwell
11. Take
12. Die
13. Lift up
14. Give
15. Pass over
16. Go up
17. Stand
18. Do, make
19. Command
20. Rise, stand
21. Call, meet
22. See
23. Put
24. Turn
25. Send
26. Hear

LIST II.

Verbs occurring 200—500 times.

27. Love
28. Gather
29. Build
30. Seek
31. Bless
32. Remember
33. Be strong
34. Sin
35. Live
36. Be able
37. Add
38. Be afraid
39. Go down
40. Possess
41. Deliver
42. Prepare
43. Complete
44. Cut
45. Write
46. Be full
47. Be king
48. Find
49. Make known
50. Stretch out
51. Smite
52. Fall
53. Snatch, deliver
54. Turn aside
55. Serve
56. Answer
57. Visit
58. Multiply
59. Be high
60. Lie down
61. Ḳeep
62. Judge
63. Drink

LIST III.

Verbs occurring 100—200 times.

64. Perish
65. Be firm
66. Be ashamed
67. Trust
68. Perceive
69. Weep
70. Redeem
71. Be great
72. Sojourn
73. Reveal
74. Tread, seek
75. Praise
76. Ḳill
77. Sacrifice
78. Pollute, begin
79. Encamp
80. Impute, think
81. Be unclean

82. Thank
83. Be good
84. Be left
85. Be heavy
86. Conceal
87. Cover
88. Put on
89. Fight
90. Capture
91. Touch
92. Approach
93. Depart
94. Surround
95. Number
96. Abandon
97. Turn about
98. Bury
99. Be holy
100. Draw near
101. Pursue
102. Run
103. Feed
104. Hate
105. Burn
106. Ask
107. Swear
108. Break in pieces
109. Do obeisance
110. Corrupt
111. Dwell
112. Cast
113. Be whole
114. Minister

LIST IV.

Verbs occurring 50—100 times.

115. Be willing
116. Seize
117. Bind
118. Curse
119. Choose
120. Swallow
121. Consume
122. Cleave, split
123. Create
124. Flee
125. Cleave, cling
126. Turn, overthrow
127. Sojourn
128. Commit fornication
129. Sow
130. Cease [forth, wait
131. Be pained, bring
132. Be sick
133. Distribute
134. Be gracious
135. Delight
136. Be angry [silent
137. Plow, engrave, be
138. Be dismayed
139. Be clean
140. Be dry
141. Reprove
142. Give counsel
143. Pour out
144. Form
145. Cast, instruct
146. Wash
147. Be provoked
148. Stumble
149. Lodge
150. Learn
151. Measure
152. Hasten
153. Sell
154. Escape
155. Anoint
156. Rule
157. Look, regard
158. Drive away
159. Rest
160. Inherit
161. Plant
162. Know, be ignorant
163. Set
164. Be pre-eminent
165. Keep, watch
166. Reach
167. Shut
168. Conceal
169. Awake
170. Assist
171. Be afflicted
172. Arrange
173. Redeem
174. Scatter
175. Separate, be wonderful
176. Pray

SECOND ENGLISH EDITION 1910

REPRINTED LITHOGRAPHICALLY IN GREAT BRITAIN
AT THE UNIVERSITY PRESS, OXFORD, 1946, 1949, 1952, 1956
FROM CORRECTED SHEETS OF THE SECOND EDITION

TRANSLATOR'S PREFACE

THE translation of the twenty-sixth German edition of this grammar, originally prepared by the Rev. G. W. Collins and revised by me, was published in 1898. Since that date a twenty-seventh German edition has appeared; and Prof. Kautzsch was already engaged on a twenty-eighth in 1908 when the English translation was becoming exhausted. He sent me the sheets as they were printed off, and I began revising the former translation in order to produce it as soon as possible after the completion of the German. The whole of the English has been carefully compared with the new edition, and, it is hoped, improved in many points, while Prof. Kautzsch's own corrections and additions have of course been incorporated. As before, the plan and arrangement of the original have been strictly followed, so that the references for sections and paragraphs correspond exactly in German and English. Dr. Driver has again most generously given up time, in the midst of other engagements, to reading the sheets, and has made numerous suggestions. To him also are chiefly due the enlargement of the index of subjects, some expansions in the new index of Hebrew words, and some additions to the index of passages, whereby we hope to have made the book more serviceable to students. I have also to thank my young friend, Mr. Godfrey R. Driver, of Winchester College, for some welcome help in correcting proofs of the Hebrew index and the index of passages. בן חכם ישמח אב. Many corrections have been sent to me by scholars who have used the former English edition, especially the Rev. W. E. Blomfield, the Rev. S. Holmes, Mr. P. Wilson, Prof. Witton Davies, Mr. G. H. Skipwith, and an unknown correspondent

at West Croydon. These, as well as suggestions in reviews, have all been considered, and where possible, utilized. I am also much indebted to the Press-readers for the great care which they have bestowed on the work.

Finally, I must pay an affectionate tribute to the memory of Prof. Kautzsch, who died in the spring of this year, shortly after finishing the last sheets of the twenty-eighth edition. For more than thirty years he was indefatigable in improving the successive editions of the Grammar. The German translation of the Old Testament first published by him in 1894, with the co-operation of other scholars, under the title *Die Heilige Schrift des A Ts*, and now (1910) in the third and much enlarged edition, is a valuable work which has been widely appreciated: the *Apocryphen und Pseudepigraphen des A Ts*, edited by him in 1900, is another important work: besides which he published his *Grammatik des Biblisch-Aramäischen* in 1884, two useful brochures *Bibelwissenschaft und Religionsunterricht* in 1900, and *Die bleibende Bedeutung des A Ts* in 1903, six popular lectures on *Die Poesie und die poetischen Bücher des A Ts* in 1902, his article 'Religion of Israel' in Hastings' *Dictionary of the Bible*, v. (1904), pp. 612–734, not to mention minor publications. His death is a serious loss to Biblical scholarship, while to me and to many others it is the loss of a most kindly friend, remarkable alike for his simple piety and his enthusiasm for learning.

A. C.

Magdalen College, Oxford,
Sept. 1910.

FROM THE GERMAN PREFACE

THE present (twenty-eighth) edition of this Grammar,[1] like the former ones, takes account as far as possible of all important new publications on the subject, especially J. Barth's *Sprachwissenschaftliche Untersuchungen zum Semitischen*, pt. i, Lpz. 1907; the important works of C. Brockelmann (for the titles see the heading of § 1; vol. i of the *Grundriss* was finished in 1908); P. Kahle's *Der masoretische Text des A Ts nach der Überlieferung der babylonischen Juden*, Lpz. 1902 (giving on p. 51 ff. an outline of Hebrew accidence from a Babylonian MS. at Berlin); R. Kittel's *Biblia Hebraica*, Lpz. 1905 f., 2 vols. (discriminating between certain, probable, and proposed emendations; see § 3 *g*, end); Th. Nöldeke's *Beiträge zur semit. Sprachwissenschaft*, Strassburg, 1904; Ed. Sievers' *Metrische Studien* (for the titles of these striking works see § 2 *r*). The important work of J. W. Rothstein, *Grundzüge des hebr. Rhythmus*, &c. (see also § 2 *r*), unfortunately appeared too late to be used. The two large commentaries edited by Nowack and Marti have been recently completed; and in P. Haupt's Polychrome Bible (*SBOT.*), part ix (Kings) by Stade and Schwally was published in 1904.

For full reviews of the twenty-seventh edition, which of course have been considered as carefully as possible, I have to thank Max Margolis (in *Hebraica*, 1902, p. 159 ff.), Mayer

[1] The first edition appeared at Halle in 1813 (202 pp. small 8vo); twelve more editions were published by W. Gesenius himself, the fourteenth to the twenty first (1845–1872) by E. Rödiger, the twenty-second to the twenty-eighth (1878–1910) by E. Kautzsch. The first abridged edition appeared in 1896, the second at the same time as the present (twenty-eighth) large edition. The first edition of the 'Übungsbuch' (Exercises) to Gesenius-Kautzsch's Hebrew Grammar appeared in 1881, the sixth in 1908.

Lambert (*REJ.* 1902, p. 307 ff.), and H. Oort (*Theol. Tijdschrift*, 1902, p. 373 ff.). For particular remarks and corrections I must thank Prof. J. Barth (Berlin), Dr. Gasser, pastor in Buchberg, Schaffhausen, B. Kirschner, of Charlottenburg, (contributions to the index of passages), Pastor Köhler, of Augst, Dr. Liebmann, of Kuczkow, Posen, Prof. Th. Nöldeke, of Strassburg, Pastor S. Preiswerk junior, of Bâle, Dr. Schwarz, of Leipzig, and Prof. B. Stade, of Giessen (died in 1906). Special mention must be made of the abundant help received from three old friends of this book, Prof. P. Haupt, of Baltimore, Prof. Knudtzon, of Kristiania, and Prof. H. Strack, of Berlin, and also, in connexion with the present edition, Prof. H. Hyvernat, of the University of Washington, who has rendered great service especially in the correction and enlargement of the indexes. I take this opportunity of thanking them all again sincerely. And I am no less grateful also to my dear colleague Prof. C. Steuernagel for the unwearying care with which he has helped me from beginning to end in correcting the proof-sheets.

Among material changes introduced into this edition may be mentioned the abolition of the term *Šᵉwâ medium* (§ 10 *d*). In this I have adopted, not without hesitation, the views of Sievers. I find it, however, quite impossible to follow him in rejecting all distinctions of quantity in the vowels. It is no doubt possible that such matters may in the *spoken* language have worn a very different appearance, and especially that in the period of nearly a thousand years, over which the Old Testament writings extend, very great variations may have taken place. Our duty, however, is to represent the language in the form in which it has been handed down to us by the Masoretes; and that this form involves a distinction between unchangeable, tone-long, and short vowels, admits in my opinion of no doubt. The discussion of any earlier stage of development belongs not to Hebrew grammar but to comparative Semitic philology.

The same answer may be made to Beer's desire (*ThLZ.* 1904,

col. 314 f.) for an 'historical Hebrew grammar describing the actual growth of the language on a basis of comparative philology, as it may still be traced within the narrow limits of the Old Testament'. Such material as is available for the purpose ought indeed to be honestly set forth in the new editions of Gesenius; but Beer seems to me to appraise such material much too highly when he refers to it as necessitating an 'historical grammar'. In my opinion these historical differences have for the most part been obliterated by the harmonizing activity of the Masoretes.

. . . . . .

E. KAUTZSCH.

HALLE,
July, 1909.

ADDITIONS AND CORRECTIONS

Page 42, line 13 from below, *for* note 1 *read* note 3.

Page 63, § 15 *p*. [See also Wickes, *Prose Accentuation*, 130 f., 87 *n*. (who, however, regards the superlinear, Babylonian system as the earlier); and Ginsburg, *Introduction to the Hebrew Bible*, 76, 78. In Ginsburg's *Hebrew Bible*, ed. 2 (1908), pp. 108 f., 267 f., the two systems of division are printed *in extenso*, in parallel columns—the 10 verses of the superlinear (Babylonian) system consisting (in Exodus) of v. 2.3-6.7.8-11.12.13.14.15.16.17 (as numbered in ordinary texts), and the 12 verses of the sublinear (Palestinian) system, consisting of v. 2-3.4.5.6.7.8.9.10.11.12.13-16.17.—S. R. D.]

Page 65, note 1, *for* אָנְנָא *read* אָנָּא (as § 105 *a*).

[Editions often vary in individual passages, as regards the accentuation of the first syllable: but in the 7 occurrences of אנא, and the 6 of אנה, Baer, Ginsburg, and Kittel agree in having an accent on both syllables (as אָנָּא) in Gn 50^{17}, Ex 32^{31}, ψ 116^{16}, and Metheg on the first syllable and an accent on the second syllable (as אָנָּה) in 2 K 20^{3}=Is 38^{3}, Jon 1^{14}, 4^{2}, ψ 116^{4}, $118^{25.25}$, Dn 9^{4}, Ne $1^{5.11}$, except that in ψ 116^{4} Ginsburg has אָנָּה.—S. R. D.]

Page 79, § 22 *s*, *before* הַהֲרִיפֵהוּ *insert* exceptions to *b* are. *After* Jer 39^{12} *add* ψ 52^{5}; *and for* Ez 9^{6} *read* Ezr 9^{6}.

[So Baer (cf. his note on Jud 20^{43}; also on Jer 39^{12}, and several of the other passages in question): but Ginsburg only in 10 of the exceptions to *b*, and Jacob ben Ḥayyim and Kittel only in 5, viz. Jer 39^{12}, Pr 11^{21}, 15^{1}, ψ 52^{5}, Ezr 9^{6}.—S. R. D.]

Page 111, line 12, *for* הַהוּא *read* הַהוּא.

Page 123, § 45 *e*, *add*: cf. also עֲהִפֵּךְ followed by את, Is 13^{19}, Am 4^{11} (§ 115 *d*).

Page 175, § 67. *See* B. Halper, 'The Participial formations of the Geminate Verbs' in *ZA W.* 1910, pp. 42 ff., 99 ff., 201 ff. (also dealing with the regular verb).

Page 177, at the end of § 67 *g* the following paragraph has been accidentally omitted:

Rem. According to the prevailing view, this strengthening of the first radical is merely intended to give the bi-literal stem at least

a tri-literal appearance. (Possibly aided by the analogy of verbs פ״ן, as P. Haupt has suggested to me in conversation.) But cf. Kautzsch, 'Die sog. aramaisierenden Formen der Verba ע״ע im Hebr.' in *Oriental. Studien zum 70. Geburtstag Th. Nöldekes*, 1906, p. 771 ff. It is there shown (1) that the sharpening of the 1st radical often serves to emphasize a particular meaning (cf. יִנָּר, but יְנוֹרֵהוּ, יָחֵל and יְחֵל, יִסַּב and יְסֹב, יִשַּׁם and תְּשֵׂם), and elsewhere no doubt to dissimilate the vowels (as יִנָּר, יִדַּל, never יִנַּר, יִדַּל, &c.): (2) that the sharpening of the 1st radical often appears to be occasioned by the nature of the first letter of the stem, especially when it is a sibilant. Whether the masoretic pronunciation is based on an early tradition, or the Masora has arbitrarily adopted aramaizing forms to attain the above objects, must be left undecided.

Page 193, the second and third paragraphs should have the marginal letters *d* and *e* respectively.

Page 200, § 72 *z*, line 2, *after* Est 2^{18} *add* 4^{14}.

Page 232, § 84^a *s*, *add* שַׁמֶּמָה 2 S 13^{20}.

Page 236, § 85 *c*, *add* הַנְּוָקָה Ezr 4^{22}.

Page 273, § 93 *qq* end, *add* מוֹסְרוֹת Jer 5^5, רִבֵּעִים, שְׁלֹשִׁים Ez 20^5, שַׁמֵּמוֹת Is 49^8, שַׁמֵּמִים La 1^{16} (cf. König, ii. 109).

המים . מן . חמוצא . אל . הברכה . במאתים . ואלף . אמה . ומ(א)
ת . אמה . היה . גבה . הצר . על . ראש . החצב[ם]

Rem.—Line 1 probably began with תם, cf. § 145 *o*, since there is hardly room for תַּמָּה.

Line 2. The reading להנקב is supported by the fact that a trace of the top of the ק is visible; cf. Lidzbarski, *Ephemeris*, i. 53. The next word was probably, as P. Haupt suggests, וישמע, the imperf. consec. Qal or Niph'al.

Line 3. זדה, not found in the Old Testament, most probably means a *cleft, crack*, but the etymology and consequently the pronunciation of it [זדה?] are still doubtful.

THE SILOAM INSCRIPTION. From Müller-Benzinger, *Landschaftsbilderbibel* (H. Grund : Berlin).

HEBREW GRAMMAR

INTRODUCTION

§ 1. *The Semitic Languages in General.*

B. Stade, *Lehrb. der hebr. Gramm.*, Lpz. 1879, § 2 ff.; E. König, *Hist.-krit. Lehrgeb. der hebr. Spr.*, i. Lpz. 1881, § 3; H. Strack, *Einl. in das A. T.*, 6th ed., Munich, 1906, p. 231 ff. (a good bibliography of all the Semitic dialects); Th. Nöldeke, article 'Semitic Languages', in the 9th ed. of the *Encycl. Brit.* (*Die semit. Sprachen*, 2nd ed., Lpz. 1899), and *Beitr. zur sem. Sprachwiss.*, Strassb., 1904; W. Wright, *Lectures on the Comparative Grammar of the Semitic Languages*, Cambr. 1890; H. Reckendorf, 'Zur Karakteristik der sem. Sprachen,' in the *Actes du X^me Congrès internat. des Orientalistes* (at Geneva in 1894), iii. 1 ff., Leiden, 1896; O. E. Lindberg, *Vergl. Gramm. der sem. Sprachen*, i A: *Konsonantismus*, Gothenburg, 1897; H. Zimmern, *Vergl. Gramm. der sem. Sprachen*, Berlin, 1898; E. König, *Hebräisch und Semitisch: Prolegomena und Grundlinien einer Gesch. der sem. Sprachen*, &c., Berlin, 1901; C. Brockelmann, *Semitische Sprachwissenschaft*, Lpz. 1906, *Grundriss der vergl. Gramm. der sem. Sprachen*, vol. i (Laut- und Formenlehre), parts 1–5, Berlin, 1907 f. and his *Kurzgef. vergleichende Gramm.* (Porta Ling. Or.) Berlin, 1908.—The material contained in inscriptions has been in process of collection since 1881 in the Paris *Corpus Inscriptionum Semiticarum*. To this the best introductions are M. Lidzbarski's *Handbuch der Nordsem. Epigraphik*, Weimar, 1898, in 2 parts (text and plates), and his *Ephemeris zur sem. Epigraphik* (5 parts published), Giessen, 1900 f. [G. A. Cooke, *Handbook of North-Semitic Inscriptions*, Oxford, 1903].

a 1. The Hebrew language is one branch of a great family of languages in Western Asia which was indigenous in Palestine, Phoenicia, Syria, Mesopotamia, Babylonia, Assyria, and Arabia, that is to say, in the countries extending from the Mediterranean to the other side of the Euphrates and Tigris, and from the mountains of Armenia to the southern coast of Arabia. In early times, however, it spread from Arabia over Abyssinia, and by means of Phoenician colonies over many islands and sea-boards of the Mediterranean, as for instance to the Carthaginian coast. No comprehensive designation is found in early times for the languages and nations of this family; the name *Semites* or *Semitic*[1] *languages* (based upon the fact that according to Gn 10^21 ff. almost all nations speaking these languages are descended from Shem) is, however, now generally accepted, and has accordingly been retained here.[2]

[1] First used by Schlözer in Eichhorn's *Repertorium für bibl. u. morgenl. Literatur*, 1781, p. 161.

[2] From Shem are derived (Gn 10^21 ff.) the Aramaean and Arab families as well as the Hebrews, but not the Canaanites (Phoenicians), who are traced back to Ham (vv. 6-15 ff.), although their language belongs decidedly to what is now called Semitic. The language of the Babylonians and Assyrians also was long ago shown to be Semitic, just as Aššur (Gn 10^22) is included among the sons of Shem.

b **2.** The better known Semitic languages may be subdivided[1] as follows:—

I. The South Semitic or Arabic branch. To this belong, besides the classical literary language of the Arabs and the modern vulgar Arabic, the older southern Arabic preserved in the Sabaean inscriptions (less correctly called Himyaritic), and its offshoot, the Ge'ez or Ethiopic, in Abyssinia.

II. The Middle Semitic or Canaanitish branch. To this belongs the Hebrew of the Old Testament with its descendants, the New Hebrew, as found especially in the Mishna (see below, § 3 *a*), and Rabbinic; also Phoenician, with Punic (in Carthage and its colonies), and the various remains of Canaanitish dialects preserved in names of places and persons, and in the inscription of Mêša', king of Moab.

c III. The North Semitic or Aramaic branch. The subdivisions of this are—(1) The Eastern Aramaic or Syriac, the literary language of the Christian Syrians. The religious books of the Mandaeans (Nasoraeans, Sabians, also called the disciples of St. John) represent a very debased offshoot of this. A Jewish modification of Syriac is to be seen in the language of the Babylonian Talmud. (2) The Western or Palestinian Aramaic, incorrectly called also 'Chaldee'.[2] This latter dialect is represented in the Old Testament by two words in Gn 31^{47}, by the verse Jer 10^{11}, and the sections Dn 2^4 to 7^{28}; Ezr 4^8 to 6^{18}, and 7^{12-26}, as well as by a number of non-Jewish inscriptions and Jewish papyri (see below, under *m*), but especially by a considerable section of Jewish literature (Targums, Palestinian Gemara, &c.). To the same branch belongs also the Samaritan, with its admixture of Hebrew forms, and, except for the rather Arabic colouring of the proper names, the idiom of the Nabataean inscriptions in the Sinaitic peninsula, in the East of Palestine, &c.

For further particulars about the remains of Western Aramaic (including those in the New Test., in the Palmyrene and Egyptian Aramaic inscriptions) see Kautzsch, *Gramm. des Biblisch-Aramäischen*, Lpz. 1884, p. 6 ff.

d IV. The East Semitic branch, the language of the Assyrio-Babylonian cuneiform inscriptions, the third line of the Achaemenian inscriptions.

On the importance of Assyrian for Hebrew philology especially from a lexicographical point of view cf. Friedr. Delitzsch, *Prolegomena eines neuen*

---

[1] For conjectures as to the gradual divergence of the dialects (first the Babylonian, then Canaanite, including Hebrew, lastly Aramaic and Arabic) from primitive Semitic, see Zimmern, *KAT.*[3], ii. p. 644 ff.

[2] In a wider sense *all* Jewish Aramaic is sometimes called 'Chaldee'.

hebr.-aram. Wörterbuchs zum A. T., Lpz. 1886; P. Haupt, 'Assyrian Phonology, &c.,' in *Hebraica*, Chicago, Jan. 1885, vol. i. 3; Delitzsch, *Assyrische Grammatik*, 2nd ed., Berlin, 1906.

If the above division into four branches be reduced to two principal groups, No. I, as South Semitic, will be contrasted with the three North Semitic branches.[1]

e All these languages stand to one another in much the same relation as those of the Germanic family (Gothic, Old Norse, Danish, Swedish; High and Low German in their earlier and later dialects), or as the Slavonic languages (Lithuanian, Lettish; Old Slavonic, Serbian, Russian; Polish, Bohemian). They are now either wholly extinct, as the Phoenician and Assyrian, or preserved only in a debased form, as Neo-Syriac among Syrian Christians and Jews in Mesopotamia and Kurdistan, Ethiopic (Ge'ez) in the later Abyssinian dialects (Tigrê, Tigriña, Amharic), and Hebrew among some modern Jews, except in so far as they attempt a purely literary reproduction of the language of the Old Testament. Arabic alone has not only occupied to this day its original abode in Arabia proper, but has also forced its way in all directions into the domain of other languages.

The Semitic family of languages is bounded on the East and North by another of still wider extent, which reaches from India to the western limits of Europe, and is called Indo-Germanic[2] since it comprises, in the most varied ramifications, the Indian (Sanskrit), Old and New Persian, Greek, Latin, Slavonic, as well as Gothic and the other Germanic languages. With the Old Egyptian language, of which Coptic is a descendant, as well as with the languages of north-western Africa, the Semitic had from the earliest times much in common, especially in grammatical structure; but on the other hand there are fundamental differences between them, especially from a lexicographical point of view; see Erman, 'Das Verhältnis des Aegyptischen zu den semitischen Sprachen,' in the *ZDMG.* xlvi, 1892, p. 93 ff., and Brockelmann, *Grundriss*, i. 3.

f 3. The *grammatical structure* of the Semitic family of languages, as compared with that of other languages, especially the Indo-Germanic, exhibits numerous peculiarities which collectively constitute its distinctive character, although many of them are found singly in other languages. These are—(*a*) among the consonants, which in fact form the substance of these languages, occur peculiar gutturals of different grades; the vowels are subject, within the same consonantal framework, to great changes in order to express various modifications of the same stem-meaning; (*b*) the word-stems are almost invariably triliteral, i.e. composed of three consonants; (*c*) the verb is restricted to two tense-forms, with a peculiarly regulated use; (*d*) the noun has only two genders (masc. and fem.); and peculiar expedients are adopted for the purpose of indicating the case-relations; (*e*) the

[1] Hommel, *Grundriss der Geogr. und Gesch. des alten Orients*, Munich, 1904, p. 75 ff., prefers to distinguish them as Eastern and Western Semitic branches. Their geographical position, however, is of less importance than the genealogical relation of the various groups of dialects, as rightly pointed out by A. Jeremias in *Th.LZ.* 1906, col. 291.

[2] First by Klaproth in *Asia Polyglotta*, Paris, 1823; cf. Leo Meyer in *Nachrichten d. Gött. Gesellschaft*, 1901, p. 454.

oblique cases of the personal pronoun, as well as all the possessive pronouns and the pronominal object of the verb, are denoted by forms appended directly to the governing word (suffixes); (*f*) the almost complete absence of compounds both in the noun (with the exception of many proper names) and in the verb; (*g*) great simplicity in the expression of syntactical relations, e. g. the small number of particles, and the prevalence of simple co-ordination of clauses without periodic structure. Classical Arabic and Syriac, however, form a not unimportant exception as regards the last-mentioned point.

g **4.** From a lexicographical point of view also the vocabulary of the Semites differs essentially from that of the Indo-Germanic languages, although there is apparently more agreement here than in the grammar. A considerable number of Semitic roots and stems agree in sound with synonyms in the Indo-Germanic family. But apart from expressions actually borrowed (see below, under *i*), the real similarity may be reduced to imitative words (onomatopoetica), and to those in which one and the same idea is represented by similar sounds in consequence of a formative instinct common to the most varied families of language. Neither of these proves any *historic* or *generic* relation, for which an agreement in grammatical structure would also be necessary.

Comp. Friedr. Delitzsch, *Studien über indogermanisch-semitische Wurzelverwandtschaft*, Lpz. 1873; Nöldechen, *Semit. Glossen zu Fick und Curtius*, Magdeb. 1876 f.; McCurdy, *Aryo-Semitic Speech*, Andover, U. S. A., 1881. The phonetic relations have been thoroughly investigated by H. Möller in *Semitisch und Indogermanisch*, Teil i, *Konsonanten*, Copenhagen and Lpz. 1907, a work which has evoked considerable criticism.

h As onomatopoetic words, or as stem-sounds of a similar character, we may compare, e. g. לָחַךְ, לָקַק *λείχω*, *lingo*, Skt. *lih*, Eng. *to lick*, Fr. *lécher*, Germ. *lecken*; גָּלַל (cf. אָגַל, עָגַל) *κυλίω*, *volvo*, Germ. *quellen*, *wallen*, Eng. *to well*; גָּרַד, חָרַט, חָרַת *χαράττω*, Pers. *khâridan*, Ital. *grattare*, Fr. *gratter*, Eng. *to grate*, *to scratch*, Germ. *kratzen*; פָּרַק *frango*, Germ. *brechen*, &c.; Reuss, *Gesch. der hl. Schriften A. T.'s*, Braunschw. 1881, p. 38, draws attention moreover to the Semitic equivalents for *earth*, *six*, *seven*, *horn*, *to sound*, *to measure*, *to mix*, *to smell*, *to place*, *clear*, *to kneel*, *raven*, *goat*, *ox*, &c. An example of a somewhat different kind is *am*, *ham* (*sam*), *gam*, *kam*, in the sense of the German *samt*, *zusammen*, *together*; in Hebrew אִמָּם (whence אֻמָּה *people*, properly *assembly*), עִם (*with*) *samt*, גַּם *also*, *moreover*, Arab. جمع *to collect*; Pers. *ham*, *hamah* (*at the same time*); Skt. *samâ* (*with*), Gk. *ἅμα* (*ἁμφω*), *ὁμός*, *ὁμοῦ* (*ὅμιλος*, *ὅμαδος*), and harder *κοινός*, Lat. *cum*, *cumulus*, *cunctus*; with the corresponding sibilant Skt. *sam*, Gk. *σύν*, *ξύν*, *ξυνός* = *κοινός*, Goth. *sama*, Germ. *samt*, *sammeln*; but many of these instances are doubtful.

i Essentially different from this internal connexion is the occurrence of the same words in different languages, where one language has borrowed directly from the other. Such *loan-words* are—

(*a*) In Hebrew: some names of objects which were originally indigenous in Babylonia and Assyria (see a comprehensive list of Assyrio-Babylonian loan-words in the Hebrew and Aramaic of the Old Testament in Zimmern and Winckler, *KAT.*[3], ii. p. 648 ff.), in Egypt, Persia, or India, e. g. יְאֹר (also in the plural) *river*, from Egyptian *yoor*, generally as the name of the Nile (late Egypt. *yaro*, Assyr. *yaru'u*), although it is possible that a pure Semitic יאר has been confounded with the Egyptian name of the Nile (so Zimmern); אָחוּ (Egyptian) Nile-reed (see Lieblein, 'Mots égyptiens dans la Bible,' in *PSBA.* 1898, p. 202 f.); פַּרְדֵּס (in Zend *pairidaêza*, circumvallation = *παράδεισος*) *pleasure-garden, park*; אֲדַרְכֹּן *daric*, Persian gold coin; תֻּכִּיִּים *peacocks*, perhaps from the Malabar *tôgai* or *tôghai*. Some of these words are also found in Greek, as כַּרְפַּס (Pers. *karbás*, Skt. *karpása*) cotton, *κάρπασος*, *carbasus*. On the other hand it is doubtful if קוֹף corresponds to the Greek *κῆπος*, *κῆβος*, Skt. *kapi*, ape.

(*b*) In Greek, &c.: some originally Semitic names of Asiatic products and articles of commerce, e. g. בּוּץ *βύσσος*, *byssus*; לְבוֹנָה *λίβανος*, *λιβανωτός*, *incense*; קָנֶה *κάνη*, *κάννα*, *canna*, cane; כַּמֹּן *κύμινον*, *cuminum*, cumin; קְצִיעָה *κασσία*, *cassia*; גָּמָל *κάμηλος*, *camelus*; עֵרָבוֹן *ἀρραβών*, *arrhabo*, *arrha*, pledge. Such transitions have perhaps been brought about chiefly by Phoenician trade. Cf. A. Müller, 'Semitische Lehnworte im älteren Griechisch,' in Bezzenberger's *Beiträge zur Kunde der Indo-germ. Sprachen*, Göttingen, 1877, vol. i. p. 273 ff.; E. Ries, *Quae res et vocabula a gentibus semiticis in Graeciam pervenerint*, Breslau, 1890; Muss-Arnolt, 'Semitic words in Greek and Latin,' in the *Transactions of the American Philological Association*, xxiii. p. 35 ff.; H. Lewy, *Die semitischen Fremdwörter im Griech.*, Berlin, 1895; J. H. Bondi, *Dem hebr.-phōniz. Sprachzweige angehör. Lehnwörter in hieroglyph. u. hieratischen Texten*, Lpz. 1886.

5. No system of writing is ever so perfect as to be able to reproduce *k* the sounds of a language in all their various shades, and the *writing of the Semites* has one striking fundamental defect, viz. that only the consonants (which indeed form the substance of the language) are written as real letters,[1] whilst of the vowels only the longer are indicated by certain representative consonants (see below, § 7). It was only later that special small marks (points or strokes below or above the consonants) were invented to represent to the eye all the vowel-sounds (see § 8). These are, however, superfluous for the practised reader, and are therefore often wholly omitted in Semitic manuscripts and printed texts. Semitic writing, moreover, almost invariably proceeds from right to left.[2]

---

[1] So also originally the Ethiopic writing, which afterwards represented the vowels by small appendages to the consonants, or by some other change in their form. On the Assyrio-Babylonian cuneiform writing, which likewise indicates the vowels, see the next note, ad fin.

[2] The Sabaean (Himyaritic) writing runs occasionally from left to right, and even alternately in both directions (*boustrophedon*), but as a rule from right to left. In Ethiopic writing the direction from left to right has become the rule; some few old inscriptions exhibit, however, the opposite direction. The cuneiform writing also runs from left to right, but this is undoubtedly borrowed from a non-Semitic people. Cf. § 5 *d*, note 3.

With the exception of the Assyrio-Babylonian (cuneiform), all varieties of Semitic writing, although differing widely in some respects, are derived from one and the same original alphabet, represented on extant monuments most faithfully by the characters used on the stele of Mêša', king of Moab (see below, § 2 *d*), and in the *old* Phoenician inscriptions, of which the bronze bowls from a temple of Baal (*CIS.* i. 22 ff. and Plate IV) are somewhat earlier than Mêša'. The old Hebrew writing, as it appears on the oldest monument, the Siloam inscription (see below, § 2 *d*), exhibits essentially the same character. The old Greek, and indirectly all European alphabets, are descended from the old Phoenician writing (see § 5 *i*).

l See the Table of Alphabets at the beginning of the Grammar, which shows the relations of the older varieties of Semitic writing to one another and especially the origin of the present Hebrew characters from their primitive forms. For a more complete view, see Gesenius' *Scripturae linguaeque Phoeniciae monumenta*, Lips. 1837, 4to, pt. i. p. 15 ff., and pt. iii. tab. 1–5. From numerous monuments since discovered, our knowledge of the Semitic characters, especially the Phoenician, has become considerably enlarged and more accurate. Cf. the all but exhaustive bibliography (from 1616 to 1896) in Lidzbarski's *Handbuch der Nordsemitischen Epigraphik*, i. p. 4 ff., and on the origin of the Semitic alphabet, ibid., p. 173 ff., and *Ephemeris* (see the heading of § 1 *a* above), i. pp. 109 ff., 142, 261 ff., and his 'Altsemitische Texte', pt. i, *Kanaanäische Inschriften* (Moabite, Old-Hebrew, Phoenician, Punic), Giessen, 1907.—On the origin and development of the *Hebrew* characters and the best tables of alphabets, see § 5 *a*, last note, and especially § 5 *e*.

m 6. As regards the relative *age* of the Semitic languages, the oldest literary remains of them are to be found in the Assyrio-Babylonian (cuneiform) inscriptions,[1] with which are to be classed the earliest Hebrew fragments occurring in the old Testament (see § 2).

The earliest non-Jewish *Aramaic* inscriptions known to us are that of זכר king of Hamath (early eighth cent. B.C.), on which see Nöldeke, *ZA.* 1908, p. 376, and that found at Teima, in N. Arabia, in 1880, probably of the fifth cent. B.C., cf. E. Littmann in the *Monist*, xiv. 4 [and Cooke, *op. cit.*, p. 195]. The monuments of Kalammus of Sam'al, in the reign of Shalmanezer II, 859–829 B.C. (cf. A. Šanda, *Die Aramäer*, Lpz. 1902, p. 26), and those found in 1888–1891 at Zenjîrlî in N. Syria, including the Hadad inscription of thirty-four lines (early eighth cent. B.C.) and the Panammu inscription (740 B.C.), are not in pure Aramaic. The Jewish-Aramaic writings begin about the time of Cyrus (cf. Ezr $6^{3\,ff.}$), specially important being the papyri from Assuan ed. by Sayce and Cowley, London, 1906 (and in a cheaper form by Staerk, Bonn, 1907), which are precisely dated from 471 to 411 B.C., and three others of 407 B.C. ed. by Sachau, Berlin, 1907.

[1] According to Hilprecht, *The Babylonian Expedition of the University of Pennsylvania*, i. p. 11 ff., the inscriptions found at Nippur embrace the period from about 4000 to 450 B.C.

Monuments of the *Arabic* branch first appear in the earliest centuries A. D. (Sabaean inscriptions, Ethiopic translation of the Bible in the fourth or fifth century, North-Arabic literature from the sixth century A. D.).

It is, however, another question which of these languages has adhered longest and most faithfully to the original character of the Semitic, and which consequently represents to us the earliest phase of its development. For the more or less rapid transformation of the sounds and forms of a language, as spoken by nations and races, is dependent on causes quite distinct from the growth of a literature, and the organic structure of a language is often considerably impaired even before it has developed a literature, especially by early contact with people of a different language. Thus in the Semitic group, the Aramaic dialects exhibit the earliest and greatest decay, next to them the Hebrew-Canaanitish, and in its own way the Assyrian. Arabic, owing to the seclusion of the desert tribes, was the longest to retain the original fullness and purity of the sounds and forms of words.[1] Even here, however, there appeared, through the revolutionary influence of Islam, an ever-increasing decay, until Arabic at length reached the stage at which we find Hebrew in the Old Testament.

Hence the phenomenon, that in its grammatical structure the ancient Hebrew agrees more with the modern than with the ancient Arabic, and that the latter, although it only appears as a written language at a later period, has yet in many respects preserved a more complete structure and a more original vowel system than the other Semitic languages, cf. Nöldeke, 'Das klassische Arabisch und die arabischen Dialekte,' in *Beiträge zur semitischen Sprachwissenschaft*, p. 1 ff. It thus occupies amongst them a position similar to that which Sanskrit holds among the Indo-Germanic languages, or Gothic in the narrower circle of the Germanic. But even the toughest organism of a language often deteriorates, at least in single forms and derivatives, while on the contrary, in the midst of what is otherwise universal decay, there still remains here and there something original and archaic; and this is the case with the Semitic languages. *n*

Fuller proof of the above statements belongs to the comparative Grammar of the Semitic languages. It follows, however, from what has been said: (1) that the Hebrew language, as found in the sacred literature of the Jews, has, in respect

[1] Even now the language of some of the Bèdawî is much purer and more archaic than that of the town Arabs. It must, however, be admitted that the former exalted estimate of the primitiveness of Arabic has been moderated in many respects by the most recent school of Semitic philology. Much apparently original is to be regarded with Nöldeke (*Die semit. Spr.*, p. 5 [= *Encycl. Brit.*, ed. 9, art. Semitic Languages, p. 642]) only as a modification of the original. The assertion that the Arabs exhibit Semitic characteristics in their purest form, should, according to Nöldeke, be rather that 'the inhabitants of the desert lands of Arabia, under the influence of the extraordinarily monotonous scenery and of a life continually the same amid continual change, have developed most exclusively some of the principal traits of the Semitic race'.

to its organic structure, already suffered more considerable losses than the Arabic, which appears much later on the historical horizon; (2) that, notwithstanding this fact, we cannot at once and in all points concede priority to the latter; (3) that it is a mistake to consider with some that the Aramaic, on account of its simplicity (which is only due to the decay of its organic structure), is the oldest form of Semitic speech.

§ 2. *Sketch of the History of the Hebrew Language.*

See Gesenius, *Gesch. der hebr. Sprache u. Schrift*, Lpz. 1815, §§ 5–18; Th. Nöldeke's art., 'Sprache, hebräische,' in Schenkel's *Bibel-Lexikon*, Bd. v, Lpz. 1875; F. Buhl, 'Hebräische Sprache,' in Hauck's *Realencycl. für prot. Theol. und Kirche*, vii (1899), p. 506 ff.; A. Cowley, 'Hebrew Language and Literature,' in the forthcoming ed. of the *Encycl. Brit.*; W. R. Smith in the *Encycl. Bibl.*, ii. London, 1901, p. 1984 ff.; A. Lukyn Williams, 'Hebrew,' in Hastings' *Dict. of the Bible*, ii. p. 325 ff., Edinb. 1899.

a **1.** The name *Hebrew Language* usually denotes the language of the sacred writings of the Israelites which form the canon of the *Old Testament*. It is also called *Ancient Hebrew* in contradistinction to the New Hebrew of Jewish writings of the post-biblical period (§ 3*a*). The name Hebrew language (לְשׁוֹן עִבְרִית γλῶσσα τῶν Ἑβραίων, ἑβραϊστί) does not occur in the Old Testament itself. Instead of it we find in Is 19[18] the term *language of Canaan*,[1] and יְהוּדִית *in the Jews' language* 2 K 18[26.28] (cf. Is 36[11.13]) Neh 13[24]. In the last-cited passage it already agrees with the later (post-exilic) usage, which gradually extended the name *Jews, Jewish* to the whole nation, as in Haggai, Nehemiah, and the book of Esther.

b The distinction between the names *Hebrew* (עִבְרִים Ἑβραῖοι) and *Israelites* (בְּנֵי יִשְׂרָאֵל) is that the latter was rather a national name of honour, with also a religious significance, employed by the people themselves, while the former appears as the less significant name by which the nation was known amongst foreigners. Hence in the Old Testament *Hebrews* are only spoken of either when the name is employed by themselves as contrasted with foreigners (Gn 40[15], Ex 2[6 f.] 3[18] &c., Jon 1[9]) or when it is put in the mouth of those who are not Israelites (Gn 39[14.17] 41[12] &c.) or, finally, when it is used in opposition to other nations (Gn 14[13] 43[32], Ex 2[11.13] 21[2]). In 1 S 13[3.7] and 14[21] the text is clearly corrupt. In the Greek and Latin authors, as well as in Josephus, the name Ἑβραῖοι, Hebraei,[2] &c., alone occurs. Of the many explanations of the gentilic עִבְרִי, the derivation from עֵבֶר *a country on the other side* with the derivative suffix ־ִי (§ 86*h*) appears to be the only one philologically possible. The name accordingly denoted the Israelites as being those who inhabited the *'eber*, i. e. the district on the other side of the Jordan (or according to others the Euphrates), and would therefore originally be only appropriate when used by the nations on this side of the Jordan or Euphrates. We must, then, suppose that after the crossing of the river in question it had been retained by the Abrahamidae as an old-established name, and within certain limits

[1] That Hebrew in its present form was actually developed in Canaan appears from such facts as the use of *yām* (sea) for the west, *nègeb* (properly *dryness*, afterwards as a proper name for the south of Palestine) for the south.

[2] The Graeco-Roman form of the name is not directly derived from the Hebrew עִבְרִי, but from the Palestinian Aramaic *'ebrāyā*, '*the* Hebrew.'

(see above) had become naturalized among them. In referring this name to the patronymic Eber, the Hebrew genealogists have assigned to it a much more comprehensive signification. For since in Gn 10^{21} (Nu 24^{24} does not apply) Shem is called the *father of all the children of Eber*, and to the latter there also belonged according to Gn $11^{14\,ff.}$ and $10^{25\,ff.}$ Aramean and Arab races, the name, afterwards restricted in the form of the gentilic *'ibrî* exclusively to the Israelites, must have originally included a considerably larger group of countries and nations. The etymological significance of the name must in that case not be insisted upon.[1]

The term *ἑβραϊστί* is first used, to denote the old Hebrew, in the prologue to Jesus the son of Sirach (about 130 B.C.), and in the New Testament, Rv 9^{11}. On the other hand it serves in Jn 5^{2}, $19^{13.17}$ perhaps also in 19^{20} and Rv 16^{16} to denote what was then the (Aramaic) vernacular of Palestine as opposed to the Greek. The meaning of the expression *ἑβραΐδι διαλέκτῳ* in Acts 21^{40}, 22^{2}, and 26^{14} is doubtful (cf. Kautzsch, *Gramm. des Bibl.-Aram.*, p. 19 f.). Josephus also uses the term *Hebrew* both of the old Hebrew and of the Aramaic vernacular of his time. *c*

The Hebrew language is first called the *sacred language* in the Jewish-Aramaic versions of the Old Testament, as being the language of the sacred books in opposition to the *lingua profana*, i. e. the Aramaic vulgar tongue.

2. With the exception of the Old Testament (and apart from the Phoenician inscriptions; see below, *f*–*h*), only very few remains of old Hebrew or old Canaanitish literature have been preserved. Of the latter—(1) an inscription, unfortunately much injured, of thirty-four lines, which was found in the ancient territory of the tribe of Reuben, about twelve miles to the east of the Dead Sea, among the ruins of the city of Dibôn (now Dîbân), inhabited in earlier times by the Gadites, afterwards by the Moabites. In it the Moabite king Mêša' (about 850 B.C.) recounts his battles with Israel (cf. 2 K $3^{4\,ff.}$), his buildings, and other matters.[2] Of old Hebrew: (2) an inscription *d*

---

[1] We may also leave out of account the linguistically possible identification of the 'Ibriyyîm with the Ḥabiri who appear in the Tell-el-Amarna letters (about 1400 B.C.) as freebooters and mercenaries in Palestine and its neighbourhood.

[2] This monument, unique of its kind, was first seen in August, 1868, on the spot, by the German missionary F. A. Klein. It was afterwards broken into pieces by the Arabs, so that only an incomplete copy of the inscription could be made. Most of the fragments are now in the Louvre in Paris. For the history of the discovery and for the earlier literature relating to the stone, see Lidzbarski, *Nordsemitische Epigraphik*, i. pp. 103 f., 415 f., and in the bibliography (under Me), p. 39 ff. The useful reproduction and translation of the inscription by Smend and Socin (Freiburg in Baden, 1886) was afterwards revised and improved by Nordlander, *Die Inschrift des Königs Mesa von Moab*, Lpz. 1896; by Socin and Holzinger, 'Zur Mesainschrift' (*Berichte der K. Sächsischen Gesell. d. Wiss.*, Dec. 1897); and by Lidzbarski, 'Eine Nachprüfung der Mesainschrift' (*Ephemeris*, i. 1, p. 1 ff.; text in his *Altsemitische Texte*, pt. 1, Giessen, 1907); J. Halévy, *Revue Sémitique*, 1900, pp. 236 ff., 289 ff., 1901, p. 297 ff.; M. J. Lagrange, *Revue biblique internationale*, 1901, p. 522 ff.; F. Prätorius in *ZDMG.* 1905, p. 33 ff., 1906, p. 402. Its genuineness was attacked by A. Löwy, *Die Echtheit der Moabit. Inschr. im Louvre* (Wien, 1903), and G. Jahn in *Das Buch Daniel*, Lpz. 1904, p. 122 ff. (also in *ZDMG.* 1905, p. 723 ff.), but without justification, as shown by E. König in *ZDMG.* 1905, pp. 233 ff. and 743 ff. [Cf. also Driver, *Notes on the Hebrew Text of the Books of Samuel*, Oxford, 1890, p. lxxxv ff.; Cooke, *op. cit.*, p. 1 ff.]

of six lines (probably of the eighth century B.C.[1]) discovered in June, 1880, in the tunnel between the Virgin's Spring and the Pool of Siloam at Jerusalem; (3) about forty engraved seal-stones, some of them pre-exilic but bearing little except proper names[2]; (4) coins of the Maccabaean prince Simon (from 'the 2nd year of deliverance', 140 and 139 B.C.) and his successors,[3] and the coinage of the revolts in the times of Vespasian and Hadrian.

e 3. In the whole series of the ancient Hebrew writings, as found in the Old Testament and also in non-biblical monuments (see above, *d*), the language (to judge from its consonantal formation) remains, as regards its general character, and apart from slight changes in form and differences of style (see *k* to *w*), at about the same stage of development. In this form, it may at an early time have been fixed as a literary language, and the fact that the books contained in the Old Testament were handed down as *sacred* writings, must have contributed to this constant uniformity.

f To this old Hebrew, the language of the Canaanitish or Phoenician[4] stocks came the nearest of all the Semitic languages, as is evident partly from the many Canaanitish names of persons and places with a Hebrew form and meaning which occur in the Old Testament (e.g. מַלְכִּי־צֶדֶק, קִרְיַת סֵפֶר, &c.;

[1] Of this inscription—unfortunately not dated, but linguistically and palaeographically very important—referring to the boring of the tunnel, a facsimile is given at the beginning of this grammar. See also Lidzbarski, *Nordsemitische Epigraphik*, i. 105, 163, 439 (bibliography, p. 56 ff.; facsimile, vol. ii, plate xxi, 1); on the new drawing of it by Socin (*ZDPV.* xxii. p. 61 ff. and separately published at Freiburg i. B. 1899), see Lidzbarski, *Ephemeris*, i. 53 ff. and 310 f. (text in *Altsemit. Texte*, p. 9 f.). Against the view of A. Fischer (*ZDMG.* 1902, p. 800 f.) that the six lines are the continuation of an inscription which was never executed, see Lidzbarski, *Ephemeris*, ii. 71. The inscription was removed in 1890, and broken into six or seven pieces in the process. It has since been well restored, and is now in the Imperial Museum at Constantinople. If, as can hardly be doubted, the name שִׁלֹחַ (i. e. *emissio*) Is 8[6] refers to the discharge of water from the Virgin's Spring, through the tunnel (so Stade, *Gesch. Isr.* i. 594), then the latter, and consequently the inscription, was already in existence about 736 B.C. [Cf. Cooke, *op. cit.*, p. 15 ff.]

[2] M. A. Levy, *Siegel u. Gemmen, &c.*, Bresl. 1869, p. 33 ff.; Stade, *ZAW.* 1897, p. 501 ff. (four old-Semitic seals published in 1896); Lidzbarski, *Handbuch*, i. 169 f.; *Ephemeris*, i. 10 ff.; W. Nowack, *Lehrb. d. hebr. Archäol.* (Freib. 1894), i. 262 f.; I. Benzinger, *Hebr. Archäol.*[2] (Tübingen, 1907), pp. 80, 225 ff., which includes the beautiful seal inscribed לישמע עבד ירבעם from the castle-hill of Megiddo, found in 1904; [Cooke, p. 362].

[3] De Saulcy, *Numismatique de la Terre Sainte*, Par. 1874; M. A. Levy, *Gesch. der jüd. Münzen*, Breslau, 1862; Madden, *The Coins of the Jews*, Lond. 1881; Reinach, *Les monnaies juives*, Paris, 1888.—Cf. the literature in Schürer's *Gesch. des jüd. Volkes im Zeitalter J. C.*[3], Lpz. 1901, i. p. 20 ff.; [Cooke, p. 352 ff.].

[4] כְּנַעַן, כְּנַעֲנִי is the native name, common both to the Canaanitish tribes in Palestine and to those which dwelt at the foot of the Lebanon and on the Syrian coast, whom we call Phoenicians, while they called themselves כנען on their coins. The people of Carthage also called themselves so.

on 'Canaanite glosses'[1] to Assyrian words in the cuneiform tablets of Tell-el-Amarna [about 1400 B.C.] cf. H. Winekler, 'Die Thontafeln von Tell-el-Amarna,' in *Keilinschr. Bibliothek*, vol. v, Berlin, 1896 f. [transcription and translation]; J. A. Knudtzon, *Die El-Amarna-Tafeln*, Lpz. 1907 f.; H. Zimmern, *ZA.* 1891, p. 154 ff. and *KAT.*[3], p. 651 ff.), and partly from the numerous remains of the Phoenician and Punic languages.

The latter we find in their peculiar writing (§ 1 *k*, *l*) in a great number of inscriptions and on coins, copies of which have been collected by Gesenius, Judas, Bourgade, Davis, de Vogüé, Levy, P. Schröder, v. Maltzan, Euting, but especially in Part I of the *Corpus Inscriptionum Semiticarum*, Paris, 1881 ff. Among the inscriptions but few public documents are found, e.g. two lists of fees for sacrifices; by far the most are epitaphs or votive tablets. Of special importance is the inscription on the sarcophagus of King Ešmûnazar of Sidon, found in 1855, now in the Louvre; see the bibliography in Lidzbarski, *Nordsem. Epigr.*, i. 23 ff.; on the inscription, i. 97 ff., 141 f., 417, ii. plate iv, 2; [Cooke, p. 30 ff.]. To these may be added isolated words in Greek and Latin authors, and the Punic texts in Plautus, *Poenulus* 5, 1–3 (best treated by Gildemeister in Ritschl's edition of Plautus, Lips. 1884, tom. ii, fasc. 5). From the monuments we learn the native orthography, from the Greek and Latin transcriptions the pronunciation and vocalization; the two together give a tolerably distinct idea of the language and its relation to Hebrew.

g Phoenician (Punic) words occurring in inscriptions are, e.g. אל *God*, אדם *man*, בן *son*, בת *daughter*, מלך *king*, עבר *servant*, כהן *priest*, זבח *sacrifice*, בעל *lord*, שמש *sun*, ארץ *land*, ים *sea*, אבן *stone*, כסף *silver*, ברזל *iron*, שמן *oil*, עת *time*, קבר *grave*, מצבת *monument*, מקם *place*, משכב *bed*, כל *all*, אחד *one*, שנים *two*, שלש *three*, ארבע *four*, חמש *five*, שש *six*, שבע *seven*, עשר *ten*, כן (=Hebr. היה) *to be*, שמע *to hear*, פתח *to open*, נדר *to vow*, ברך *to bless*, בקש *to seek*, &c. Proper names: צדן *Sidon*, צר *Tyre*, חנא *Hanno*, חנבעל *Hannibal*, &c. See the complete vocabulary in Lidzbarski, *Nordsem. Epigr.*, i. 204 ff.

h Variations from Hebrew in Phoenician orthography and inflection are, e.g. the almost invariable omission of the vowel letters (§ 7 *b*), as בת for בית *house*, קל for קוֹל *voice*, צדן for צִידוֹן, כהנם for כֹּהֲנִים *priests*, אלנם (in Plaut. *alonim*) *gods*; the fem., even in the absolute state, ending in ת (*ath*) (§ 80 *b*) as well as א (*ô*), the relative איש (Hebr. אֲשֶׁר), &c. The differences in pronunciation are more remarkable, especially in Punic, where the ו was regularly pronounced as *û*, e.g. שׁוּפֵט *sûfēṭ* (judge), שָׁלוּשׁ *sālûs* (three), רש *rûs* = רֹאשׁ *head*; *i* and *e* often as the obscure dull sound of *y*, e.g. הֲנֵנוּ *ynnynnu* (occe eum), את (איתּ) *yth*; the ע as *o*, e.g. מעקר *Mocar* (cf. מַעֲכָה LXX, Gn 22[24] Μωχά). See the collection of the grammatical peculiarities in Gesenius, *Monumenta Phoenicia*, p. 430 ff.; Paul Schröder, *Die phöniz. Sprache*, Halle, 1869; B. Stade, 'Erneute Prüfung des zwischen dem Phönic. und Hebr. bestehenden Verwandtschaftsgrades,' in the *Morgenländ. Forschungen*, Lpz. 1875, p. 169 ff.

i **4.** As the Hebrew writing on monuments and coins mentioned in *d* consists only of consonants, so also the writers of the Old

[1] Cf. inter alia: *aparu*, also *ḫaparu* (Assyr. *epru*, *ipru*) = עָפָר; *ḫullu* = עֹל (with hard ע; cf. § 6 *c*, and Assyr. *ḫumri* = עֲמָרִי, *ḫazzatu* = עַזָּה); *iazkur* = יִזְכֹּר, *zuruḫu* = זְרוֹעַ, *abadat* = אֲבֵדָה, *šaḫri* = שַׁעַר, *gate*; *baṭnu* = בֶּטֶן, *belly*; *kilūbi* = כְּלוּב, *net*; *ṣaduk* = צָדֹק (צַדִּיק), &c. [Cf. Böhl, *Die Sprache d. Amarnabriefe*, Lpz. 1909.]

Testament books used merely the consonant-signs (§ 1 *k*), and even now the written scrolls of the Law used in the synagogues must not, according to ancient custom, contain anything more. The present pronunciation of this consonantal text, its vocalization and accentuation, rest on the tradition of the Jewish schools, as it was finally fixed by the system of punctuation (§ 7 *h*) introduced by Jewish scholars about the seventh century A.D.; cf. § 3 *b*.

k An earlier stage in the development of the Canaanitish-Hebrew language, i.e. a form of it anterior to the written documents now extant, when it must have stood nearer to the common language of the united Semitic family, can still be discerned in its principal features:—(1) from many archaisms preserved in the traditional texts, especially in the names of persons and places dating from earlier times, as well as in isolated forms chiefly occurring in poetic style; (2) in general by an *a posteriori* conclusion from traditional forms, so far as according to the laws and analogies of phonetic change they clearly point to an older phase of the language; and (3) by comparison with the kindred languages, especially Arabic, in which this earlier stage of the language has been frequently preserved even down to later times (§ 1 *m*, *n*). In numerous instances in examining linguistic phenomena, the same—and consequently so much the more certain—result is attained by each of these three methods.

Although the systematic investigation of the linguistic development indicated above belongs to comparative Semitic philology, it is nevertheless indispensable for the scientific treatment of Hebrew to refer to the ground-forms[1] so far as they can be ascertained and to compare the corresponding forms in Arabic. Even elementary grammar which treats of the forms of the language occurring in the Old Testament frequently requires, for their explanation, a reference to these ground-forms.

l **5.** Even in the language of the Old Testament, notwithstanding its general uniformity, there is noticeable a certain progress from an earlier to a later stage. Two periods, though with some reservations, may be distinguished: the *first*, down to the end of the Babylonian exile; and the *second*, after the exile.

m To the former belongs, apart from isolated traces of a later revision, the larger half of the Old Testament books, viz. (*a*) of the prose and historical writings, a large part of the Pentateuch and of Joshua, Judges, Samuel, and Kings; (*b*) of the poetical, perhaps

[1] Whether these can be described simply as 'primitive Semitic' is a question which may be left undecided here.

a part of the Psalms and Proverbs; (*c*) the writings of the earlier prophets (apart from various later additions) in the following chronological order: Amos, Hosea, Isaiah I, Micah, Nahum, Zephaniah, Habakkuk, Obadiah (?), Jeremiah, Ezekiel, Isaiah II (ch. 40–55).

n The beginning of this period, and consequently of Hebrew literature generally, is undoubtedly to be placed as early as the time of Moses, although the Pentateuch in its present form, in which very different strata may be still clearly recognized, is to be regarded as a gradual production of the centuries after Moses. Certain linguistic peculiarities of the Pentateuch, which it was once customary to regard as archaisms, such as the epicene use of נַעַר *boy, youth*, for נַעֲרָה *girl*, and הוּא for הִיא, are merely to be attributed to a later redactor; cf. § 17 *c*.

o The linguistic character of the various strata of the Pentateuch has been examined by Ryssel, *De Elohistae Pentateuchici sermone*, Lpz. 1878; König, *De criticae sacrae argumento e linguae legibus repetito*, Lpz. 1879 (analysis of Gn 1–11); F. Giesebrecht, 'Der Sprachgebr. des hexateuchischen Elohisten,' in *ZAW.* 1881, p. 177 ff., partly modified by Driver in the *Journal of Philology*, vol. xi. p. 201 ff.; Kräutlein, *Die sprachl. Verschiedenheiten in den Hexateuchquellen*, Lpz. 1908.—Abundant matter is afforded also by Holzinger, *Einleitung in den Hexateuch*, Freib. 1893; Driver, *Introduction to the Literature of the Old Testament*[8], Edinburgh, 1908; Strack, *Einleitung ins A. T.*[6], Munich, 1906; König, *Einleitung in das A. T.*, Bonn, 1893.

p **6.** Even in the writings of this first period, which embraces about 600 years, we meet, as might be expected, with considerable differences in linguistic form and style, which are due partly to differences in the time and place of composition, and partly to the individuality and talent of the authors. Thus Isaiah, for example, writes quite differently from the later Jeremiah, but also differently from his contemporary Micah. Amongst the historical books of this period, the texts borrowed from earlier sources have a linguistic colouring perceptibly different from those derived from later sources, or passages which belong to the latest redactor himself. Yet the structure of the language, and, apart from isolated cases, even the vocabulary and phraseology, are on the whole the same, especially in the prose books.

q But the *poetic language* is in many ways distinguished from prose, not only by a *rhythm* due to more strictly balanced (parallel) members and definite metres (see *r*), but also by peculiar *words* and *meanings*, *inflexions* and *syntactical constructions* which it uses in addition to those usual in prose. This distinction, however, does not go far as, for example, in Greek. Many of these poetic peculiarities occur in the kindred languages, especially in Aramaic, as the ordinary modes of expression, and probably are to be regarded largely as archaisms which poetry retained. Some perhaps, also, are

embellishments which the Hebrew poets who knew Aramaic adopted into their language.[1]

The prophets, at least the earlier, in language and rhythm are to be regarded almost entirely as poets, except that with them the sentences are often more extended, and the parallelism is less regular and balanced than is the case with the poets properly so called. The language of the later prophets, on the contrary, approaches nearer to prose.

r On the *rhythm* of Hebrew poetry, see besides the Commentaries on the poetical books and Introductions to the O.T., J. Ley, *Grundzüge des Rhythmus, &c.*, Halle, 1875; *Leitfaden der Metrik der hebr. Poesie*, Halle, 1887; 'Die metr. Beschaffenheit des B. Hiob,' in *Theol. Stud. u. Krit.*, 1895, iv, 1897, i; Grimme, 'Abriss der bibl.-hebr. Metrik,' *ZDMG.* 1896, p. 529 ff., 1897, p. 683 ff.; *Psalmenprobleme, &c.*, Freiburg (Switzerland), 1902 (on which see Beer in *ThLZ.* 1903, no. 11); 'Gedanken über hebr. Metrik,' in Altschüler's *Vierteljahrschrift*, i (1903), 1 ff.; Döller, *Rhythmus, Metrik u. Strophik in d. bibl.-hebr. Poesie*, Paderborn, 1899; Schloegl, *De re metrica veterum Hebraeorum disputatio*, Vindobonae, 1899 (on the same lines as Grimme); but especially Ed. Sievers, *Metrische Studien*: i *Studien zur hebr. Metrik*, pt. 1 *Untersuchungen*, pt. 2 *Textproben*, Lpz. 1901: ii *Die hebr. Genesis*, 1 *Texte*, 2 *Zur Quellenscheidung u. Textkritik*, Lpz. 1904 f.: iii *Samuel*, Lpz. 1907; *Amos metrisch bearbeitet* (with H. Guthe), Lpz. 1907; and his *Alttest. Miszellen* (1 Is 24–27, 2 Jona, 3 Deutero-Zechariah, 4 Malachi, 5 Hosea, 6 Joel, 7 Obadiah, 8 Zephaniah, 9 Haggai, 10 Micah), Lpz. 1904–7.—As a guide to Sievers' system (with some criticism of his principles see Baumann, 'Die Metrik u. das A.T.,' in the *Theol. Rundschau*, viii (1905), 41 ff.; W. H. Cobb, *A criticism of systems of Hebrew Metre*, Oxford, 1905; Cornill, *Einleitung ins A.T.*[5], Tübingen, 1905, p. 11 ff.; Rothstein, *Zeitschr. für d. ev. Rel.-Unterricht*, 1907, p. 188 ff. and his *Grundzüge des hebr. Rhythmus*, Lpz. 1909 (also separately *Psalmentexte u. der Text des Hohen Liedes*, Lpz. 1909); W. R. Arnold, 'The rhythms of the ancient Heb.,' in *O. T. and Semitic Studies in memory of W. R. Harper*, i. 165 ff., Chicago, 1907, according to whom the number of syllables between the beats is only limited by the physiological possibilities of phonetics; C. v. Orelli, 'Zur Metrik der alttest. Prophetenschriften,' in his *Kommentar zu den kl. Propheten*[3], p. 236 ff., Munich, 1908.—In full agreement with Sievers is Baethgen, *Psalmen*[3], p. xxvi ff., Göttingen, 1904. [Cf. Budde in *DB.* iv. 3 ff.; Duhm in *EB.* iii. 3793 ff.]

Of all views of this matter, the only one generally accepted as sound was at first Ley's and Budde's discovery of the Qina- or Lamentation-Verse (*ZAW.* 1882, 5 ff; 1891, 234 ff.; 1892, 31 ff.). On their predecessors, Lowth, de Wette, Ewald, see Löhr, *Klagelied*[2], p. 9. This verse, called by Duhm 'long verse', by Sievers simply 'five-syllabled' (Fünfer), consists of two members, the second at least one beat shorter than the other. That a regular repetition of an equal number of syllables in *arsis* and *thesis* was observed by other poets, had been established by Ley, Duhm, Gunkel, Grimme, and others, especially Zimmern, who cites a Babylonian hymn in which the members are actually marked (*ZA.* x. 1 ff., xii. 382 ff.; cf. also Delitzsch, *Das babyl. Weltschöpfungsepos*, Lpz. 1896, pp. 60 ff.). Recently, however, E. Sievers, the recognized authority on metre in other branches of literature, has indicated, in the works mentioned above, a number of fresh facts and views, which have frequently been confirmed by the conclusions of Ley and others. The most important are as follows:—

Hebrew poetry, as distinguished from the quantitative Classical and Arabic

[1] That already in Isaiah's time (second half of the eighth century B. C.) educated Hebrews, or at least officers of state, understood Aramaic, while the common people in Jerusalem did not, is evident from 2 K 18^{26} (Is 36^{11}).

and the syllabic Syriac verse, is *accentual*. The number of unstressed syllables between the beats (*ictus*) is, however, not arbitrary, but the scheme of the verse is based on an irregular anapaest which may undergo rhythmical modifications (e. g. resolving the ictus into two syllables, or lengthening the arsis so as to give a double accent) and contraction, e. g. of the first two syllables. The foot always concludes with the ictus, so that toneless endings, due to change of pronunciation or corruption of the text, are to be disregarded, although as a rule the ictus coincides with the Hebrew word-accent. The metrical scheme consists of combinations of feet in *series* (of 2, 3 or 4), and of these again in *periods*—double threes, very frequently, double fours in narrative, fives in Lamentations (see above) and very often elsewhere, and sevens. Sievers regards the last two metres as catalectic double threes and fours. Connected sections do not always maintain the same metre throughout, but often exhibit a mixture of metres.

It can no longer be doubted that in the analysis of purely poetical passages, this system often finds ready confirmation and leads to textual and literary results, such as the elimination of glosses. There are, however, various difficulties in carrying out the scheme consistently and extending it to the prophetical writings and still more to narrative: (1) not infrequently the required number of feet is only obtained by sacrificing the clearly marked parallelism, or the grammatical connexion (e. g. of the construct state with its genitive), and sometimes even by means of doubtful emendations; (2) the whole system assumes a correct transmission of the text and its pronunciation, for neither of which is there the least guarantee. To sum up, our conclusion at present is that for poetry proper some assured and final results have been already obtained, and others may be expected, from the principles laid down by Sievers, although, considering the way in which the text has been transmitted, a *faultless* arrangement of metres cannot be expected. Convincing proof of the *consistent* use of the same metrical schemes in the prophets, and *a fortiori* in narrative, can hardly be brought forward.

The great work of D. H. Müller, *Die Propheten in ihrer ursprüngl. Form* (2 vols., Vienna, 1896; cf. his *Strophenbau u. Responsion*, ibid. 1898, and *Komposition u. Strophenbau*, ibid. 1907), is a study of the most important monuments of early Semitic poetry from the point of view of strophic structure and the use of the refrain, i. e. the repetition of the same or similar phrases or words in corresponding positions in different strophes.

The arrangement of certain poetical passages in verse-form required by early scribal rules (Ex 15^{1-19}; Dt 32^{1-43}; Ju 5; 1 S 2^{1-10}; 2 S 22, 23^{1-7}; ψ 18, 136; Pr. 31^{10-31}; 1 Ch 16^{8-36}: cf. also Jo 12^{9-24}; Ec 3^{2-8}; Est 9^{7-10}) has nothing to do with the question of metre in the above sense.

Words are used in poetry, for which others are customary in prose, e. g. σ אֱנוֹשׁ *man* = אָדָם; אֹרַח *path* = דֶּרֶךְ; מִלָּה *word* = דָּבָר; חָזָה *to see* = רָאָה; אָתָה *to come* = בּוֹא.

To the poetic *meanings of words* belongs the use of certain poetic *epithets* as substantives; thus, for example, אביר (only in constr. st. אַבִּיר) *the strong one* for *God*; אַבִּיר *the strong one* for *bull, horse*; לְבָנָה *alba* for *luna*; צַר *enemy* for אוֹיֵב.

Of word-forms, we may note, e. g. the longer forms of prepositions of place (§ 103 *n*) עָלַי = עַל, אֵלַי = אֶל, עָדַי = עַד; the endings יְ־, וֹ in the noun (§ 90); the pronominal suffixes מוֹ, מֹו־, מֵו־ for ם, ם־, ם־ (§ 58); the plural ending ין־ for ים־ (§ 87 *e*). To the *syntax* belongs the far more sparing use of the article, of the relative pronoun, of the accusative particle אֵת; the construct state even before prepositions; the shortened imperfect with the same meaning as the ordinary form (§ 109 *i*); the wider governing power of prepositions; and in general a forcible brevity of expression.

t **7.** The *second* period of the Hebrew language and literature, after the return from the exile until the Maccabees (about 160 B.C.), is chiefly distinguished by a constantly closer approximation of the language to the kindred western Aramaic dialect. This is due to the influence of the Aramaeans, who lived in close contact with the recent and thinly-populated colony in Jerusalem, and whose dialect was already of importance as being the official language of the western half of the Persian empire. Nevertheless the supplanting of Hebrew by Aramaic proceeded only very gradually. Writings intended for popular use, such as the Hebrew original of Jesus the son of Sirach and the book of Daniel, not only show that Hebrew about 170 B.C. was still in use as a literary language, but also that it was still at least understood by the people.[1] When it had finally ceased to exist as a living language, it was still preserved as the *language of the Schools*—not to mention the numerous Hebraisms introduced into the Aramaic spoken by the Jews.

For particulars, see Kautzsch, *Gramm. des Bibl.-Aram.*, pp. 1–6. We may conveniently regard the relation of the languages which co-existed in this later period as similar to that of the High and Low German in North Germany, or to that of the High German and the common dialects in the south and in Switzerland. Even amongst the more educated, the common dialect prevails orally, whilst the High German serves essentially as the literary and cultured language, and is at least understood by all classes of the people. Wholly untenable is the notion, based on an erroneous interpretation of Neh 8^8, that the Jews immediately after the exile had completely forgotten the Hebrew language, and therefore needed a translation of the Holy Scriptures.

u The Old Testament writings belonging to this second period, in all of which the Aramaic colouring appears in various degrees, are: certain parts of the Pentateuch and of Joshua, Ruth, the books of Ezra, Nehemiah, Chronicles, Esther; the prophetical books of Haggai, Zechariah, Isaiah III(56–66), Malachi, Joel, Jonah, Daniel; of the poetical books, a large part of Proverbs, Job, Song of Songs, Ecclesiastes, and most of the Psalms. As literary compositions, these books are sometimes far inferior to those of the first period, although work was still produced which in purity of language and aesthetic value falls little short of the writings of the golden age.

v *Later words* (Aramaisms) are, e. g. אַחְוָה *declaration*, אָנַס *compel*, בַּר *son*, גִּיר *chalk*, זִמְן = עִדָּן *time*, זָקַף *raise up*, חסד Pi. *reproach*, טלל Pi. *roof over*,

[1] The extensive use of Hebrew in the popular religious literature which is partly preserved to us in the Midrašim, the Mišna, and the Liturgy, indicates, moreover, that Hebrew was widely understood much later than this. Cf. M. H. Segal, 'Mišnaic Hebrew and its relations to Biblical Hebrew and Aramaic,' in *J. Q. R.*, 1908, p. 647 ff. (also separately).

טָעָה *stray*, צֻף *rock*, מלך *advise*, סוֹף = קֵץ *end*, לָקַח = קִבֵּל *take*, רָצַץ = רָעַע *break*, שְׂנָא *be many*, מָלַךְ = שָׁלַט *rule*, תֹּקֶף = אָמֵץ *be strong*.—Later *meanings* are, e. g. אָמַר (to say) *to command*; עָנָה (to answer) *to begin speaking*.—*Orthographical* and *grammatical* peculiarities are, the frequent *scriptio plena* of וֹ and יִ־, e. g. דָּוִיד[1] (elsewhere דָּוִד), even קוֹדֶשׁ for קֹדֶשׁ, רוֹב for רֹב; the interchange of ה־ and א־ final; the more frequent use of substantives in וֹן, ־ָן, וֹת, &c. Cf. Dav. Strauss, *Sprachl. Studien zu d. hebr. Sirachfragmenten*, Zürich, 1900, p. 19 ff.; for the Psalms Cheyne, *Origin of the Psalter*, p. 461 ff., and especially Giesebrecht in *ZAW.* 1881, p. 276 ff.; in general, Kautzsch, *Die Aramaismen im A. T.* (i, Lexikal. Teil), Halle, 1902.

But all the peculiarities of these later writers are not Aramaisms. Several do not occur in Aramaic and must have belonged at an earlier period to the Hebrew vernacular, especially it would seem in northern Palestine. There certain parts of Judges, amongst others, may have originated, as is indicated, e. g. by שֵׁ, a common form in Phoenician (as well as אֵשׁ), for אֲשֶׁר (§ 36), which afterwards recurs in Jonah, Lamentations, the Song of Songs, the later Psalms, and Ecclesiastes.

Rem. 1. Of dialectical varieties in the old Hebrew language, only one *w*
express mention occurs in the O. T. (Ju 12^6), according to which the Ephraimites in certain cases pronounced the שׁ as ס. (Cf. Marquart in *ZAW.* 1888, p. 151 ff.) Whether in Neh 13^{24} by the *speech of Ashdod* a Hebrew, or a (wholly different) Philistine dialect is intended, cannot be determined. On the other hand, many peculiarities in the North Palestinian books (Judges and Hosea) are probably to be regarded as differences in dialect, and so also some anomalies in the Moabite inscription of Mêša' (see above, *d*). On later developments see L. Metman, *Die hebr. Sprache, ihre Geschichte u. lexikal. Entwickelung seit Abschluss des Kanons u. ihr Bau in d. Gegenwart*, Jerusalem, 1906.

2. It is evident that, in the extant remains of old Hebrew literature,[2] the entire store of the ancient language is not preserved. The canonical books of the Old Testament formed certainly only a fraction of the whole Hebrew national literature.

§ 3. *Grammatical Treatment of the Hebrew Language.*

Gesenius, *Gesch. der hebr. Sprache*, §§ 19–39; Oehler's article, 'Hebr. Sprache,' in Schmid's *Encykl. des ges. Erziehungs- u. Unterrichtswesens*, vol. iii. p. 346 ff. (in the 2nd ed. revised by Nestle, p. 314 ff.). Cf. also the literature cited above in the headings of §§ 1 and 2; also Böttcher, *Lehrb. der hebr. Spr.*, i. Lpz. 1866, p. 30 ff.; L. Geiger, *Das Studium der Hebr. Spr. in Deutschl. vom Ende des XV. bis zur Mitte des XVI. Jahrh.*, Breslau, 1870; B. Pick, 'The Study of the Hebrew Language among Jews and Christians,' in *Bibliotheca Sacra*, 1884, p. 450 ff., and 1885, p. 470 ff.; W. Bacher, article 'Grammar' in the *Jew. Encyclopaedia*, vol. vi, New York and London, 1904. Cf. also the note on *d*.

1. At the time when the old Hebrew language was gradually *a*
becoming extinct, and the formation of the O. T. canon was

[1] דָּוִיד in the Minor Prophets throughout (Ho 3^5, &c.) is due merely to a caprice of the Masoretes.

[2] According to the calculation of the Dutch scholar Leusden, the O. T. contains 5,642 different Hebrew and Aramaic words; according to rabbinical calculations, 79,856 altogether in the Pentateuch. Cf. also E. Nestle, *ZAW.* 1906, p. 283; H. Strack, *ZAW.* 1907, p. 69 ff.; Blau, 'Neue masoret. Studien,' in *JQR.* xvi. 357 ff., treats of the number of letters and words, and the ve sedivision in the O. T.

approaching completion, the Jews began to explain and critically revise their sacred text, and sometimes to translate it into the vernacular languages which in various countries had become current among them. The oldest *translation* is the Greek of the *Seventy* (more correctly *Seventy-two*) Interpreters (LXX), which was begun with the Pentateuch at Alexandria under Ptolemy Philadelphus, but only completed later. It was the work of various authors, some of whom had a living knowledge of the original, and was intended for the use of Greek-speaking Jews, especially in Alexandria. Somewhat later the Aramaic translations, or Targums (תַּרְגּוּמִים i. e. *interpretations*), were formed by successive recensions made in Palestine and Babylonia. The *explanations*, derived in part from alleged tradition, refer almost exclusively to civil and ritual law and dogmatic theology, and are no more scientific in character than much of the textual tradition of that period. Both kinds of tradition are preserved in the *Talmud*, the first part of which, the *Mišna*, was finally brought to its present form towards the end of the second century; of the remainder, the *Gemāra*, one recension (the *Jerusalem* or *Palestinian Gem.*) about the middle of the fourth century, the other (the *Babylonian Gem.*) about the middle of the sixth century A.D. The Mišna forms the beginning of the New-Hebrew literature; the language of the Gemaras is for the most part Aramaic.

b **2.** To the interval between the completion of the Talmud and the earliest grammatical writers, belong mainly the vocalization and accentuation of the hitherto unpointed text of the O. T., according to the pronunciation traditional in the Synagogues and Schools (§ 7 *h*, *i*), as well as the greater part of the collection of critical notes which bears the name of Masōra (מָסוֹרָה *traditio*?).[1] From this the text which has since been transmitted with rigid uniformity by the MSS.,

[1] On the name Masora (or Massora, as e. g. E. König, *Einleitung in das A. T.*, p. 38 ff.; *Lehrgeb. d. hebr. Sprache*, ii. 358 ff.), and the great difficulty of satisfactorily explaining it, cf. De Lagarde, *Mitteilungen*, i. 91 ff. W. Bacher's derivation of the expression (in *JQR.* 1891, p. 785 ff.; so also C. Levias in the *Hebrew Union College Annual*, Cincinnati, 1904, p. 147 ff.) from Ez 20^{37} (מָסֹרֶת הַבְּרִית; מסרה, i. e. מוֹסֵרָה, being an equally legitimate form) is rightly rejected by König, l. c. The correctness of the form מָסֹרָה (by the side of the equally well-attested form מַסֹּרֶת) does not seem to us to be invalidated by his arguments, nor by Blau's proposal to read מָסוֹרֶת (*JQR.* xii. 241). The remark of Levias (l.c.) deserves notice, that with the earlier Masoretes מסורת is equivalent to orthography, i. e. *plene-* and *defective* writing, and only later came to mean *traditio*.—G. Wildboer, in *ZAW.* 1909, p. 74, contends that as מסר *to hand on* is not found in the O. T., it must be a late denominative in this sense.

and is still the received text of the O.T., has obtained the name of the Masoretic Text.

E. F. K. Rosenmüller already (*Handbuch für d. Liter. der bibl. Kritik u. Exegese*, 1797, i. 247; *Vorrede zur Stereotyp-Ausg. des A. T.*, Lpz. 1834) maintained that our O. T. text was derived from Codices belonging to a single recension. J. G. Sommer (cf. Cornill, *ZAW.* 1892, p. 309), Olshausen (since 1853), and especially De Lagarde (*Proverbien*, 1863, p. 1 ff.), have even made it probable that the original Masoretic text was derived from a single standard manuscript. Cf., however, E. König in *Ztschr. f. kirchl. Wiss.*, 1887, p. 279 f., and especially his *Einleitung ins A. T.*, p. 88 ff. Moreover a great many facts, which will be noticed in their proper places, indicate that the Masora itself is by no means uniform but shows clear traces of different schools and opinions; cf. H. Strack in *Semitic Studies in memory of . . . Kohut*, Berlin, 1897, p. 563 ff. An excellent foundation for the history of the Masora and the settlement of the masoretic tradition was laid by Joh. Buxtorf in his *Tiberias seu Commentarius Masorethicus*, first published at Basel in 1620 as an appendix to the Rabbinical Bible of 1618 f. For more recent work see Geiger, *Jüdische Ztschr.*, iii. 78 ff., followed by Harris in *JQR.* i. 128 ff, 243 ff.; S. Frensdorff, *Ochla W'ochla*, Hanover, 1864; and his *Massor. Wörterb.*, part i, Hanover and Lpz. 1876; and Ch. D. Ginsburg, *The Massora compiled from Manuscripts, &c.*, 3 vols., Lond. 1880 ff., and *Introduction to the Massoretico-critical edition of the Hebr. Bible*, Lond. 1897 (his text, reprinted from that of Jacob b. Ḥayyîm [Venice, 1524–5] with variants from MSS. and the earliest editions, was published in 2 vols. at London in 1894, 2nd ed. 1906; a revised edition is in progress); H. Hyvernat, 'La langue et le langage de la Massore' (as a mixture of New-Hebrew and Aramaic), in the *Revue biblique*, Oct. 1903, p. 529 ff. and B: 'Lexique massorétique,' *ibid.*, Oct. 1904, p. 521 ff., 1905, p. 481 ff., and p. 515 ff. In the use of the Massora for the critical construction of the Text, useful work has been done especially by S. Baer, in the editions of the several books (only Exod.-Deut. have still to appear), edited from 1869 conjointly with Fr. Delitzsch, and since 1891 by Baer alone. Cf. also § 7 *h*.

c

The various readings of the Q^ere (see § 17) form one of the oldest and most important parts of the Masora. The punctuation of the Text, however, is not to be confounded with the compilation of the Masora. The former was settled at an earlier period, and is the result of a much more exhaustive labour than the Masora, which was not completed till a considerably later time.

d

3. It was not until about the beginning of the tenth century that the Jews, following the example of the Arabs, began their grammatical compilations. Of the numerous grammatical and lexicographical works of R. Sa'adya,[1] beyond fragments in the commentary on the Sepher Yeṣira (ed. Mayer-Lambert, pp. 42, 47, 75, &c.), only the explanation in Arabic of the seventy (more correctly ninety) *hapax legomena* in the O. T. has been preserved. Written likewise in Arabic, but frequently translated into Hebrew, were the still extant works of the grammarians R. Yehuda Ḥayyûǧ (also called Abu Zakarya Yaḥya, about the year 1000) and R. Yona (Abu 'l-Walid Merwân ibn Ǧanâḥ, about 1030). By the aid of these earlier labours, Abraham ben Ezra (commonly called Aben Ezra, ob. 1167) and R. David Qimḥi (ob. c. 1235) especially gained a classical reputation by their Hebrew grammatical writings.

[1] On his independent attitude towards the Masoretic punctuation, see Delitzsch, *Comm. zu den Psalmen*[4], p. 39.

From these earliest grammarians are derived many principles of arrangement and technical terms, some of which are still retained, e. g. the naming of the conjugations and weak verbs according to the paradigm of פעל, certain *voces memoriales*, as בְּגַדְכְּפַת and the like.[1]

c **4.** The father of Hebrew philology among Christians was John Reuchlin (ob. 1522),[2] to whom Greek literature also is so much indebted. Like the grammarians who succeeded him, till the time of John Buxtorf the elder (ob. 1629), he still adhered almost entirely to Jewish tradition. From the middle of the seventeenth century the field of investigation gradually widened, and the study of the kindred languages, chiefly through the leaders of the Dutch school, Albert Schultens (ob. 1750) and N. W. Schröder (ob. 1798), became of fruitful service to Hebrew grammar.

f **5.** In the nineteenth century[3] the advances in Hebrew philology are especially connected with the names of W. Gesenius (born at Nordhausen, Feb. 3, 1786; from the year 1810 Professor at Halle, where he died Oct. 23, 1842), who above all things aimed at the comprehensive observation and lucid presentation of the actually occurring linguistic phenomena; H. Ewald (ob. 1875, at Göttingen; *Krit. Gramm. der Hebr. Spr.*, Lpz. 1827; *Ausführl. Lehrb. d. hebr. Spr.*, 8th ed., Gött. 1870), who chiefly aimed at referring linguistic forms to general laws and rationally explaining the latter; J. Olshausen (ob. 1882, at Berlin; *Lehrb. der hebr. Sprache*, Brunswick, 1861) who attempted a consistent explanation of the existing condition of the language, from the presupposed primitive Semitic forms, preserved according to him notably in old Arabic. F. Böttcher (*Ausführl. Lehrb. d. hebr. Spr.* ed. by F. Mühlau, 2 vols., Lpz. 1866–8) endeavoured to present an exhaustive synopsis of the linguistic phenomena, as well as to give an explanation of them from the sphere of Hebrew

---

[1] On the oldest Hebrew grammarians, see Strack and Siegfried, *Lehrb. d. neuhebr. Spr. u. Liter.*, Carlsr. 1884, p. 107 ff., and the prefaces to the Hebrew Lexicons of Gesenius and Fürst; Berliner, *Beiträge zur hebr. Gramm. im Talmud u. Midrasch*, Berlin, 1879; Baer and Strack, *Die Dikduke ha-ṭᵉamim des Ahron ben Moscheh ben Ascher u. andere alte grammatisch-massorethische Lehrstücke*, Lpz. 1879, and P. Kahle's criticisms in *ZDMG.* lv. 170, n. 2; Ewald and Dukes, *Beiträge z. Gesch. der ältesten Auslegung u. Spracherklärung des A. T.*, Stuttg. 1844, 3 vols.; Hupfeld, *De rei grammaticae apud Judaeos initiis antiquissimisque scriptoribus*, Hal. 1846; W. Bacher, 'Die Anfänge der hebr. Gr.,' in *ZDMG.* 1895, 1 ff. and 335 ff.; and *Die hebr. Sprachwissenschaft vom* 10. *bis zum* 16. *Jahrh.*, Trier, 1892.

[2] A strong impulse was naturally given to these studies by the introduction of printing—the Psalter in 1477, the Bologna Pentateuch in 1482, the Soncino O. T. complete in 1488: see the description of the twenty-four earliest editions (down to 1528) in Ginsburg's *Introduction*, p. 779 ff.

[3] Of the literature or the subject down to the year 1850, see a tolerably full account in Steinschneider's *Bibliogr. Handb. f. hebr. Sprachkunde*, Lpz. 1859.

alone. B. Stade, on the other hand (*Lehrb. der hebr. Gr.*, pt. i. Lpz. 1879), adopted a strictly scientific method in endeavouring to reduce the systems of Ewald and Olshausen to a more fundamental unity. E. König[1] in his very thorough researches into the phonology and accidence starts generally from the position reached by the early Jewish grammarians (in his second part 'with comparative reference to the Semitic languages in general') and instead of adopting the usual dogmatic method, takes pains to re-open the discussion of disputed grammatical questions. The syntax König has 'endeavoured to treat in several respects in such a way as to show its affinity to the common Semitic syntax'.—Among the works of Jewish scholars, special attention may be called to the grammar by S. D. Luzzatto written in Italian (Padua, 1853–69).

The chief requirements for one who is treating the grammar of an ancient language are—(1) that he should *observe* as fully and accurately as possible the existing linguistic phenomena and *describe* them, after showing their organic connexion (the empirical and historico-critical element); (2) that he should try to *explain* these facts, partly by comparing them with one another and by the analogy of the sister languages, partly from the general laws of philology (the logical element).

Such observation has more and more led to the belief that the *g* original text of the O. T. has suffered to a much greater extent than former scholars were inclined to admit, in spite of the number of variants in parallel passages: Is $2^{2\,ff.}$ = Mi $4^{1\,ff.}$; Is 36–39 = 2 K 18^{13}–20^{19}, Jer 52 = 2 K 24^{18}–25^{30}, 2 S 22 = ψ 18, ψ 14 = ψ 53, ψ $40^{14\,ff.}$ = ψ 70, ψ 108 = ψ $57^{8\,ff.}$ and $60^{7\,ff.}$. Cf. also the parallels between the Chronicles and the older historical books, and F. Vodel, *Die konsonant. Varianten in den doppelt überlief. poet. Stücken d. masoret. Textes*, Lpz. 1905. As to the extent and causes of the corruption of the Masoretic text, the newly discovered fragments of the Hebrew Ecclesiasticus are very instructive; cf. Smend, *Gött. gel. Anz.*, 1906, p. 763.

The causes of *unintentional* corruption in the great majority of cases are:—Interchange of similar letters, which has sometimes taken place in the early 'Phoenician' writing; transposition or omission of

---

[1] *Historisch-krit. Lehrgeb. der hebr. Sprache mit steter Beziehung auf Qimchi und die anderen Autoritäten*: I, 'Lehre von der Schrift, der Aussprache, dem Pron. u. dem Verbum,' Lpz. 1881; II. 1, 'Abschluss der speziellen Formenlehre u. generelle Formenl.,' 1895; ii. 2, 'Historisch-kompar. Syntax d. hebr. Spr.,' 1897.

single letters, words, or even whole sentences, which are then often added in the margin and thence brought back into the text in the wrong place; such omission is generally due to homoioteleuton (cf. Ginsburg, *Introd.*, p. 171 ff.), i. e. the scribe's eye wanders from the place to a subsequent word of the same or similar form. Other causes are dittography, i. e. erroneous repetition of letters, words, and even sentences; its opposite, haplography; and lastly wrong division of words (cf. Ginsburg, *Introd.*, p. 158 ff.), since at a certain period in the transmission of the text the words were not separated.[1]— *Intentional* changes are due to corrections for the sake of decency or of dogma, and to the insertion of glosses, some of them very early.

Advance in grammar is therefore closely dependent on progress in *textual criticism*. The systematic pursuit of the latter has only begun in recent years: cf. especially Doorninck on Ju 1–16, Leid. 1879; Wellhausen, *Text der Bb. Sam.*, Gött. 1871; Cornill, *Ezechiel*, Lpz. 1886; Klostermann, *Bb. Sam. u. d. Kön.*, Nördl. 1887; Driver, *Notes on the Hebr. text of the Books of Sam.*, Oxf. 1890; Klostermann, *Deuterojesaja*, Munich, 1893; Oort, *Textus hebr. emendationes*, Lugd. 1900; Burney on *Kings*, Oxf. 1903; the commentaries of Marti and Nowack; the *Internat. Crit. Comm.*; Kautzsch, *Die heil. Schriften des A.T.*[2], 1909–10. A critical edition of the O.T. with full textual notes, and indicating the different documents by colours, is being published in a handsome form by P. Haupt in *The Sacred Books of the Old Test.*, Lpz. and Baltimore, 1893 ff. (sixteen parts have appeared: Exod., Deut., Minor Prophets, and Megilloth are still to come); Kittel, *Biblia hebraica*[2], 1909, Masoretic text from Jacob b. Ḥayyîm (see *c*), with a valuable selection of variants from the versions, and emendations.

§ 4. *Division and Arrangement of the Grammar.*

The division and arrangement of Hebrew grammar follow the three constituent parts of every language, viz. (1) articulate *sounds* represented by *letters*, and united to form *syllables*, (2) *words*, and (3) *sentences*.

The first part (the elements) comprises accordingly the treatment of *sounds* and their representation in writing. It describes the nature and relations of the sounds of the language, teaches the pronunciation

[1] This *scriptio continua* is also found in Phoenician inscriptions. The inscription of Mê'a' always divides the words by a point (and so the Siloam inscription; see the facsimile at the beginning of this grammar), and frequently marks the close of a sentence by a stroke.

of the written signs (orthoepy), and the established mode of writing (orthography). It then treats of the sounds as combined in syllables and words, and specifies the laws and conditions under which this combination takes place.

The second part (etymology) treats of words in their character as parts of speech, and comprises: (1) the principles of the *formation of words*, or of the derivation of the different parts of speech from the roots or from one another; (2) the principles of *inflexion*, i. e. of the various forms which the words assume according to their relation to other words and to the sentence.

The third part (syntax, or the arrangement of words): (1) shows how the word-formations and inflexions occurring in the language are used to express different shades of ideas, and how other ideas, for which the language has not coined any forms, are expressed by periphrasis; (2) states the laws according to which the parts of speech are combined in sentences (the principles of the sentence, or syntax in the stricter sense of the term).

FIRST PART

ELEMENTARY PRINCIPLES OR THE SOUNDS AND CHARACTERS

CHAPTER I

THE INDIVIDUAL SOUNDS AND CHARACTERS

§ 5. *The Consonants: their Forms and Names.*

(Cf. the Table of Alphabets.)

Among the abundant literature on the subject, special attention is directed to: A. Berliner, *Beiträge zur hebr. Gramm.*, Berlin, 1879, p. 15 ff., on the names, forms, and pronunciation of the consonants in Talmud and Midrash; H. Strack, *Schreibkunst u. Schrift bei d. Hebräern, PRE.*[3], Lpz. 1906, p. 766 ff.; Benzinger, *Hebr. Archäologie*[2], Tübingen, 1907, p. 172 ff.; Nowack, *Lehrbuch d. hebr. Archäol.*, Freiburg, 1894, i. 279 ff.; Lidzbarski, *Handbuch d. nordsem. Epigraphik*, Weimar, 1898, i. 173 ff.; also his art. 'Hebrew Alphabet,' in the *Jewish Encyclopaedia*, i, 1901, p. 439 ff. (cf. his *Ephemeris*, i. 316 ff.); and 'Die Namen der Alphabetbuchstaben', in *Ephemeris*, ii. 125 ff.; Kenyon, art. 'Writing,' in the *Dictionary of the Bible*, iv. Edinb. 1902, p. 944 ff.; Nöldeke, 'Die semit. Buchstabennamen,' in *Beitr. zur semit. Sprachwiss.*, Strassb. 1904, p. 124 ff.; F. Praetorius, *Ueber den Ursprung des kanaan. Alphabets*, Berlin, 1906; H. Grimme, 'Zur Genesis des semit. Alphabets,' in *ZA.* xx. 1907, p. 49 ff.; R. Stübe, *Grundlinien zu einer Entwickelungsgesch. d. Schrift*, Munich, 1907; Jermain, *In the path of the Alphabet*, Fort Wayne, 1907.—L. Blau, *Studien zum althebr. Buchwesen, &c.*, Strassb. 1902; and his 'Ueber d. Einfluss d. althebr. Buchwesens auf d. Originale', &c., in *Festschr. zu Ehren A. Berliners*, Frkf. 1903.

The best tables of alphabets are those of J. Euting in G. Bickell's *Outlines of Heb. Gram.* transl. by S. I. Curtiss, Lpz. 1877; in Pt. vii of the *Oriental Series* of the Palaeographical Soc., London, 1882; and, the fullest of all, in Chwolson's *Corpus inscr. Hebr.*, Petersburg, 1882; also Lidzbarski's in the *Jewish Encycl.*, see above.

a 1. The Hebrew letters now in use, in which both the manuscripts of the O. T. are written and our editions of the Bible are printed, commonly called the *square character* (כְּתָב מְרֻבָּע), also the *Assyrian character* (כְּ׳ אַשּׁוּרִי),[1] are not those originally employed.

Old Hebrew (or *Old Canaanitish*[2]) writing, as it was used on

[1] The name אַשּׁוּר (Assyria) is here used in the widest sense, to include the countries on the Mediterranean inhabited by Aramaeans; cf. Stade in *ZAW.* 1882, p. 292 f. On some other names for Old Hebrew writing, cf. G. Hoffmann, ibid. 1881, p. 334 ff.; Buhl, *Canon and Text of the O. T.* (transl. by J. Macpherson), Edinb. 1892, p. 200.

[2] It is tacitly assumed here that this was the mother of *all* Semitic alphabets. In *ZDMG.* 1909, p. 189 ff., however, Prätorius has shown good

public monuments in the beginning of the ninth and in the second half of the eighth century B.C., is to be seen in the inscription of Mêša', as well as in that of Siloam. The characters on the Maccabaean coins of the second century B.C., and also on ancient gems, still bear much resemblance to this (cf. § 2 *d*). With the Old Hebrew writing the Phoenician is nearly identical (see § 1 *k*, § 2 *f*, and the Table of Alphabets). From the analogy of the history of other kinds of writing, it may be assumed that out of and along with this monumental character, a less antique and in some ways more convenient, rounded style was early developed, for use on softer materials, skins, bark, papyrus, and the like. This the Samaritans retained after their separation from the Jews, while the Jews gradually[1] (between the sixth and the fourth century) exchanged it for an Aramaic character. From this gradually arose (from about the fourth to the middle of the third century) what is called the *square character*, which consequently bears great resemblance to the extant forms of Aramaic writing, such as the Egyptian-Aramaic, the Nabatean and especially the Palmyrene. Of Hebrew inscriptions in the older square character, that of 'Arâq al-Emîr (15½ miles north-east of the mouth of the Jordan) probably belongs to 183 B.C.[2]

The Jewish sarcophagus-inscriptions of the time of Christ, found in Jerusalem in 1905, almost without exception exhibit a pure square character. This altered little in the course of centuries, so that the age of a Hebrew MS. cannot easily be determined from the style of the writing. The oldest known biblical fragment is the Nash papyrus (found in 1902), containing the ten commandments and the beginning of Dt 6[4 f.], of the end of the first or beginning of the second century A.D.; cf. N. Peters, *Die älteste Abschr. der* 10 *Gebote*, Freibg. i. B. 1905. Of actual MSS. of the Bible the oldest is probably one of 820–850 A.D. described by Ginsburg, *Introd.*, p. 469 ff., at the head of his sixty principal MSS.; next in age is the codex of Moses ben Asher at Cairo (897 A.D., cf. the art. 'Scribes' in the *Jew. Encycl.* xi and Gottheil in *JQR.* 1905, p. 32). The date (916 A.D.) of the Codex prophetarum Babylon. Petropol. (see § 8 *g*, note) is quite certain.—In the synagogue-rolls a distinction is drawn between the Tam-character (said to be so called from Rabbi Tam, grandson of R. Yiṣḥâqî, in the twelfth century) with its straight strokes, square corners and 'tittles' (tâgîn), in German and Polish MSS., and the *foreign* character with rounded letters and tittles in Spanish MSS. See further E. König, *Einl. in das A. T.*, Bonn, 1893, p. 16 ff.

---

grounds for believing that the South Semitic alphabet is derived not from the Mêša' character, or from some kindred and hardly older script, but from some unknown and *much* earlier form of writing.

[1] On the effect of the transitional mixture of earlier and later forms on the constitution of the text, see R. Kittel, *Ueber d. Notwendigk. d. Herausg. einer neuen hebr. Bibel*, Lpz. 1901, p. 20 ff.—L. Blau, 'Wie lange stand die althebr. Schrift bei den Juden im Gebrauch?' in *Kaufmanngedenkbuch*, Breslau, 1900, p. 44 ff.

[2] Not 176, as formerly held. Driver and Lidzbarski now read ערביה, correctly, not טוביה.

b **2.** The Alphabet consists, like all Semitic alphabets, solely of consonants, twenty-two in number, some of which, however, have also a kind of vocalic power (§ 7 *b*). The following Table shows their form, names, pronunciation, and numerical value (see *k*):—

FORM.	NAME.	PRONUNCIATION.	NUMERICAL VALUE.
א	*'Ālĕph*	*' spiritus lenis*	1
ב	*Bêth*	*b* (*bh*, but see § 6 *n*)	2
ג	*Gīmĕl* (*Giml*)	*g* (*gh*, „ „ „)	3
ד	*Dālĕth*	*d* (*dh*, „ „ „)	4
ה	*Hē*	*h*	5
ו	*Wāw* (*Wāu*)	*w* (*u*) [1]	6
ז	*Záyĭn*	*z*, as in English (soft *s*)	7
ח	*Ḥêth*	*ḥ*, a strong guttural	8
ט	*Ṭêth*	*ṭ*, emphatic *t*	9
י	*Yôd*	*y* (*i*) [1]	10
כ, final ך	*Kaph*	*k* (*kh*, but see § 6 *n*)	20
ל	*Lāmĕd*	*l*	30
מ, final ם	*Mêm*	*m*	40
נ, final ן	*Nûn*	*n*	50
ס	*Sāmĕkh*	*s*	60
ע	*'Áyĭn*	*'* a peculiar guttural (see below)	70
פ, final ף	*Pê*	*p* (*f*, see § 6 *n*)	80
צ, final ץ	*Ṣādê*	*ṣ*, emphatic *s*	90
ק	*Qôf*	*q*, a strong *k* [2] formed at the back of the palate	100
ר	*Rêš*	*r*	200
שׂ	*Śîn*	*ś*	300
שׁ	*Šîn* [3]	*š*, pronounced *sh*	
ת	*Tāw* (*Tāu*)	*t* (*th*, but see § 6 *n*)	400

[1] Philippi, 'Die Aussprache der semit. Consonanten ו und י,' in *ZDMG.* 1886, p. 639 ff., 1897, p. 66 ff., adduces reasons in detail for the opinion that 'the Semitic ו and י are certainly by usage consonants, although by nature they are vowels, viz. *u* and *i*, and consequently are consonantal vowels'; cf. § 8 *m*.

[2] As a representation of this sound the Latin *q* is very suitable, since it occupies in the alphabet the place of the Semitic ק (Greek κόππα).

[3] Nestle (*Actes du onzième Congrès . . . des Orientalistes*, 1897, iv. 113 ff.) has shown that the original order was שׂ, שׁ.

3. As the Table shows, five letters have a special form at the end *c* of the word. They are called final letters, and were combined by the Jewish grammarians in the mnemonic word כַּמְנְפָּ֫ץ *Kamnèphäṣ*, or better, with A. Müller and Stade, כַּמְנַפָּ֫ץ i. e. *as the breaker in pieces*.[1] Of these, ך, ן, ף, ץ are distinguished from the common form by the shaft being drawn straight down, while in the usual form it is bent round towards the left.[2] In the case of ם the letter is completely closed.

4. Hebrew is read and written from right to left.[3] Words must *d* not be divided at the end of the lines;[4] but, in order that no empty space may be left, in MSS. and printed texts, certain letters suitable for the purpose are dilated at the end or in the middle of the line. In our printed texts these *literae dilatabiles* are the five following: א ה ל ת ם (mnemonic word אֲהַלְתֶּם *'ahaltèm*). In some MSS. other letters suitable for the purpose are also employed in this way, as ר, כ, ד; cf. Strack in the *Theol. Lehrb.*, 1882, No. 22; Nestle, *ZAW.* 1906, p. 170 f.

Rem. 1. The forms of the letters originally represent the rude outlines of *e* perceptible objects, the names of which, respectively, begin with the consonant represented (akrophony). Thus *Yôd*, in the earlier alphabets the rude picture of a hand, properly denotes *hand* (Heb. יָד), but as a letter simply the sound ' (*y*), with which this word begins; *'Ayin*, originally a circle, properly an *eye* (עַיִן), stands for the consonant ע. In the Phoenician alphabet, especially, the resemblance of the forms to the objects denoted by the name is still for the most part recognizable (see the Table). In some letters (נ, ו, ז, ם, ש) the similarity is still preserved in the square character.

It is another question whether the present names are all original. They may be merely due to a later, and not always accurate, interpretation of the forms. Moreover, it is possible that in the period from about 1500 to 1000 B. C. the original forms underwent considerable change.

The usual explanation of the present names of the letters[5] is: אֶלֶף *ox*, *f*

---

[1] In the Talmud, disregarding the alphabetical order, מִן־צָפְךָ *of thy watcher*, i. e. *prophet*. See the discussions of this mnemonic word by Nestle, *ZAW.* 1907, p. 119 ff., König, Bacher (who would read מִן־צַפְיְךָ = proceeding *from thy prophets*, Is 52^8), Krauss, Marmorstein, ibid. p. 278 ff. All the twenty-two letters, together with the five final forms, occur in Zp 3^8.

[2] Chwolson, *Corpus Inscr. Hebr.*, col. 68, rightly observes that the more original forms of these letters are preserved in the *literae finales*. Instances of them go back to the time of Christ.

[3] The same was originally the practice in Greek, which only adopted the opposite direction exclusively about 400 B. C. On the *boustrophēdon* writing (alternately in each direction) in early Greek, early Sabaean, and in the Safa-inscriptions of the first three centuries A. D., cf. Lidzbarski, *Ephemeris*, i. 116 f.

[4] This does not apply to early inscriptions or seals. Cf. Měša', ll. 1–5, 7, 8, &c., Siloam 2, 3, 5, where the division of words appears to be customary.

[5] We possess Greek transcriptions of the Hebrew names, dating from the fifth century B. C. The LXX give them (in almost the same form as Eusebius, *Praep. Evang.* 10. 5) in La 1–4, as do also many Codices of the Vulgate (e. g. the

בַּיִת *house*, גָּמָל *camel* (according to Lidzbarski, see below, perhaps originally גַּרְזֶן *axe* or *pick-axe*), דֶּלֶת *door* (properly *folding door*; according to Lidzbarski, perhaps דַּד *the female breast*), הֵא *air-hole* (?), *lattice-window* (?), וָו *hook, nail*, וַיִן *weapon* (according to Nestle, comparing the Greek ζῆτα, rather זַיִת *olive-tree*), חֵית *fence, barrier* (but perhaps only differentiated from ה by the left-hand stroke), טֵית *a winding* (?), according to others a *leather bottle* or a *snake* (but perhaps only differentiated from ת by a circle round it), יוֹד *hand*, כַּף *bent hand*, לָמֶד *ox-goad*, מַיִם *water*, נוּן *fish* (Lidzbarski, 'perhaps originally נָחָשׁ *snake*,' as in Ethiopic), סָמֶךְ *prop* (perhaps a modification of ן), עַיִן *eye*, פֵּא (also פֵּי) *mouth*, צָדֵי *fish-hook* (?), קוֹף *eye of a needle*, according to others *back of the head* (Lidzb., 'perhaps קֶשֶׁת *bow*'), רֵישׁ *head*, שִׁין *tooth*, תָּו *sign, cross*.

g With regard to the origin of this alphabet, it may be taken as proved that it is not earlier (or very little earlier) than the fifteenth century B. C., since otherwise the el-Amarna tablets (§ 2 *f*) would not have been written exclusively in cuneiform.[1] It seems equally certain on various grounds, that it originated on Canaanitish soil. It is, however, still an open question whether the inventors of it borrowed

(*a*) From the Egyptian system—not, as was formerly supposed, by direct adoption of hieroglyphic signs (an explanation of twelve or thirteen characters was revived by J. Halévy in *Rev. Sémit.* 1901, p. 356 ff., 1902, p. 331 ff., and in the *Verhandlungen des xiii. . . . Orient.-Kongr. zu Hamb.*, Leiden, 1904, p. 199 ff.; but cf. Lidzbarski, *Ephemeris*, i. 261 ff.), or of hieratic characters derived from them (so E. de Rougé), but by the adoption of the *acrophonic* principle (see *e*) by which e. g. the hand, in Egyptian *tot*, represents the letter *t*, the lion = *laboi*, the letter *l*. This view still seems the most probable. It is now accepted by Lidzbarski ('Der Ursprung d. nord- u. südsemit. Schrift' in *Ephemeris*, i (1900), 109 ff., cf. pp. 134 and 261 ff.), though in his *Nordsem. Epigr.* (1898) p. 173 ff. he was still undecided.

(*b*) From the Babylonian (cuneiform) system. Wuttke's and W. Deecke's derivation of the old-Semitic alphabet from new-Assyrian cuneiform is impossible for chronological reasons. More recently Peters and Hommel have sought to derive it from the old-Babylonian, and Ball from the archaic Assyrian cuneiform. A vigorous discussion has been aroused by the theory of Frdr. Delitzsch (in *Die Entstehung des ält. Schriftsystems od. der Urspr. der Keilschriftzeichen dargel.*, Lpz. 1897; and with the same title 'Ein Nachwort', Lpz. 1898, preceded by a very clear outline of the theory) that the old-Semitic alphabet arose in Canaan under the influence both of the Egyptian system (whence the acrophonic principle) and of the old-Babylonian, whence the principle of the graphic representation of objects and ideas by means of simple, and mostly rectilinear, signs. He holds that the choice of the objects was probably (in about fifteen cases) influenced by the Babylonian system. The correspondence of names had all the more effect since, according to Zimmern (*ZDMG.* 1896, p. 667 ff.), out of twelve names which are certainly identical, eight appear in the same order in the Babylonian arrangement of signs. But it must first be shown that the present names of the

---

Cod. Amiatinus) in ψψ 111, 112, 119, but with many variations from the customary forms, which rest on the traditional *Jewish* pronunciation. The forms *Deleth* (and *delth*), *Zai*, *Sen* (LXX also χσεν, cf. Hebr. שֵׁן *tooth*) are to be noticed, amongst others, for *Daleth*, *Zain*, *Šin*. Cf. the tables in Nöldeke, *Beiträge zur sem. Sprachwiss.*, p. 126 f. In his opinion (and so Lidzbarski, *Ephemeris*, i. 134) the form and meaning of the names point to Phoenicia as the original home of the alphabet, since *alf*, *bêt*, *dâlt*, *wâw*, *tâw*, *pei* = *pê*, *pi*, mouth, and the vowel of *ρω̂* = *rōš*, head, are all Hebraeo-Phoenician.

[1] In the excavations at Jericho in April, 1907, E. Sellin found a jar-handle with the Canaanite characters יה, which he dates (probably too early) about 1500 B C.

'Phoenician' letters really denote the original picture. The identity of the objects may perhaps be due simply to the choice of the commonest things (animals, implements, limbs) in both systems.

The derivation of the Semitic alphabet from the signs of the Zodiac and their names, first attempted by Seyffarth in 1834, has been revived by Winckler, who refers twelve fundamental sounds to the Babylonian Zodiac. Hommel connects the original alphabet with the moon and its phases, and certain constellations; cf. Lidzbarski, *Ephemeris*, i. 269 ff., and in complete agreement with him, Benzinger, *Hebr. Archäologie*[2], p. 173 ff. This theory is by no means convincing.

(*c*) From the hieroglyphic system of writing discovered in 1894 by A. J. Evans in inscriptions in Crete (esp. at Cnossus) and elsewhere. According to Kluge (1897) and others, this represents the 'Mycenaean script' used about 3000–1000 B. C., and according to Fries ('Die neuesten Forschungen über d. Urspr. des phöniz. Alph.' in *ZDPV.* xxii. 118 ff.) really supplies the original forms of the Phoenician alphabet as brought to Palestine by the Philistines about 1100 B. C., but 'the Phoenician-Canaanite-Hebrews gave to the Mycenaean signs names derived from the earlier cuneiform signs'. The hypothesis of Fries is thus connected with that of Delitzsch. But although the derivation of the Phoenician forms from 'Mycenaean' types appears in some cases very plausible, in others there are grave difficulties, and moreover the date, 1100 B.C., assigned for the introduction of the alphabet is clearly too late. [See Evans, *Scripta Minoa*, Oxf. 1909, p. 80 ff.]

(*d*) From a system, derived from Asia Minor, closely related to the Cypriote syllabary (Praetorius, *Der Urspr. des kanaan. Alphabets*, Berlin, 1906). On this theory the Canaanites transformed the syllabic into an apparently alphabetic writing. In reality, however, they merely retained a single sign for the various syllables, so that e. g. ק is not really *q*, but *qa*, *qe*, *qi*, &c. Of the five Cypriote vowels also they retained only the star (in Cypriote = *a*) simplified into an *'ālef* (see alphabetical table) to express the vowels at the beginning of syllables, and *i* and *u* as Yod and Waw. Praetorius claims to explain about half the twenty-two Canaanite letters in this way, but there are various objections to his ingenious hypothesis.

2. As to the *order* of the letters, we possess early evidence in the alphabetic[1] poems: ψ 9 (כ–א, cf. ψ 10[1] ל, and νν[12–17] ק–ת; cf. Gray in the *Expositor*, 1906, p. 233 ff., and Rosenthal, *ZAW.* 1896, p. 40, who shows that ψ 9[3.15.17] ב, ל, נ exactly fit in between ח, ט, י, and that ψ 10[1.3.5] therefore has the reverse order ל, כ, י); also ψψ 25 and 34 (both without a separate ו-verse and with פ repeated at the end[2]); 37, 111, 112, 119 (in which every eight verses begin with the same letter, each strophe, as discovered by D. H. Müller of Vienna, containing the eight leading words of ψ 19[8 ff.], *tôrā*, *'ēdûth*, &c.); La 1–4 (in 2–4 פ before ע[3], in chap. 3 every three verses with the same initial, see Löhr, *ZAW.* 1904, p. 1 ff., in chap. 5 at any rate as many verses as letters in the alphabet); Pr 24[1.3.5], 31[10–31] (in the LXX with פ before ע[3]); also in Na 1[2–10] Pastor Frohnmeyer of Württemberg (ob. 1880) detected traces of an alphabetic arrangement, but the attempt of Gunkel, Bickell, Arnold (*ZAW.* 1901, *h*

[1] On the supposed connexion of this artificial arrangement with magical formulae ('the order of the letters was believed to have a sort of magic power') cf. Löhr, *ZAW.* 1905, p. 173 ff., and *Klagelieder*[2], Gött. 1907, p. vii ff.

[2] On this superfluous פ cf. Grimme, *Euphemistic liturgical appendices*, Lpz. 1901, p. 8 ff., and Nestle, *ZAW.* 1903, p. 340 f., who considers it an appendage to the Greek alphabet.

[3] [Perhaps also originally in ψ 34.] פ before ע is probably due to a magic alphabet, see above, n. 1. According to Böhmer, *ZAW.* 1908, p. 53 ff., the combinations אב, נד, הו, &c., were used in magical texts; סע was excluded, but by a rearrangement we get סף and עץ.

p. 225 ff.), Happel (*Der Ps. Nah*, Würzb. 1900) to discover further traces, has not been successful. [Cf. Gray in *Expositor*, 1898, p. 207 ff.; Driver, in the Century Bible, *Nahum*, p. 26.]—Bickell, *Ztschr f. Kath. Theol.*, 1882, p. 319 ff., had already deduced from the versions the alphabetical character of Ecclus 51[13–30], with the omission of the נ-verse and with פ[1] at the end. His conjectures have been brilliantly confirmed by the discovery of the Hebrew original, although the order from ג to ל is partly disturbed or obscured. If נ before צ is deleted, ten letters are in their right positions, and seven can be restored to their places with certainty. Cf. N. Schlögl, *ZDMG.* 53, 669 ff.; C. Taylor in the appendix to Schechter and Taylor, *The Wisdom of Ben Sira*, Cambr. 1899, p. lxxvi ff., and in the *Journ. of Philol.*, xxx (1906), p. 95 ff.; *JQR.* 1905, p. 238 ff.; Löhr, *ZAW.* 1905, p. 183 ff.; I. Lévy, *REJ.* 1907, p. 62 ff.

The sequence of the three softest labial, palatal, and dental sounds ב, ג, ד, and of the three liquids ל, מ, נ, indicates an attempt at classification. At the same time other considerations also appear to have had influence. Thus it is certainly not accidental, that two letters, representing a hand (*Yôd*, *Kaph*), as also two (if *Qôph* = back of the head) which represent the head, and in general several forms denoting objects naturally connected (*Mêm* and *Nûn*, *'Ayin* and *Pê*), stand next to one another.

i The order, names, and numerical values of the letters have passed over from the Phoenicians to the Greeks, in whose alphabet the letters A to Υ are borrowed from the Old Semitic. So also the Old Italic alphabets as well as the Roman, and consequently all alphabets derived either from this or from the Greek, are directly or indirectly dependent on the Phoenician.

k 3. *a.* In default of special arithmetical figures, the consonants were used also as numerical signs; cf. G. Gundermann, *Die Zahlzeichen*, Giessen, 1899, p. 6 f., and Lidzbarski, *Ephemeris*, i. 106 ff. The earliest traces of this usage are, however, first found on the Maccabean coins (see above, § 2 *d*, end). These numerical letters were afterwards commonly employed, e.g. for marking the numbers of chapters and verses in the editions of the Bible. The units are denoted by א–ט, the tens by י–צ, 100–400 by ק–ת, the numbers from 500–900 by ת (= 400), with the addition of the remaining hundreds, e.g. תק 500. In compound numbers the greater precedes (on the right), thus יא 11, קכא 121. But 15 is expressed by טו 9+6, not יה (which is a form of the divine name, being the first two consonants of יהוה).[2] For a similar reason טז is also mostly written for 16, instead of יו, which in compound proper names, like יואל, also represents the name of God, יהוה.

The thousands are sometimes denoted by the units with two dots placed above, e.g. א 1000.

l *b.* The reckoning of the years in Jewish writings (generally ליצירה *after the creation*) follows either the *full chronology* (לפ"ג or לפרט גדול), with the addition of the thousands, or the *abridged chronology* (לפ"ק קטון), in which they are omitted. In the dates of the first thousand years after Christ, the Christian era is obtained by the addition of 240, in the second thousand years by the addition of 1240 (i.e. if the date falls between Jan. 1 and the Jewish new year; otherwise add 1239), the thousands of the Creation era being omitted.

m 4. Abbreviations of words are not found in the text of the O.T., but they occur on coins, and their use is extremely frequent amongst the later Jews.[3]

---

[1] See note 3 on p. 29.

[2] On the rise of this custom (יה having been originally used and afterwards הי), cf. Nestle in *ZAW.* 1884, p. 250, where a trace of this method of writing occurring as early as Origen is noted.

[3] Cf. Jo. Buxtorf, *De abbreviaturis Hebr.*, Basel, 1613, &c.; Pietro Perreau.

A point, or later an oblique stroke, serves as the sign of abridgement in old MSS. and editions, e. g. יש׳ for יִשְׂרָאֵל, פ׳ for פְּלֹנִי *aliquis*, ד׳ for דָּבָר *aliquid*, וגו׳ for וְגוֹמֵר *et complens*, i. e. *and so on*. Also in the middle of what is apparently a word, such strokes indicate that it is an abbreviation or a *vox memorialis* (cf. e. g. § 15 *d* תא״ם). Two such strokes are employed, from § 41 *d* onward, to mark the different classes of weak verbs.—Note also ״ or ״ (also ה׳) for יְהוָה.

5. Peculiarities in the tradition of the O. T. text, which are already *n* mentioned in the Talmud, are—(1) The 15 *puncta extraordinaria*, about which the tradition (from Siphri on Nu 9^{10} onwards) differs considerably, even as to their number; on particular consonants, Gn 16^5, 18^9, $19^{33.35}$, Nu 9^{10}; or on whole words, Gn 33^4, 37^{12}, Nu 3^{39}, 21^{30}, 29^{15}, Dt 29^{28}, 2 S 19^{20}, Is 44^9, Ez 41^{20}, 46^{22}, ψ 27^{13},—all no doubt critical marks; cf. Strack, *Prolegomena Critica*, p. 88 ff.; L. Blau, *Masoretische Untersuchungen*, Strassburg, 1891, p. 6 ff., and *Einleitung in die hl. Schrift*, Budapest, 1894; Königsberger, *Jüd. Lit.-Blatt*, 1891, nos. 29-31, and *Aus Masorah u. Talmudkritik*, Berlin, 1892, p. 6 ff.; Mayer-Lambert, *REJ.* 30 (1895), no. 59; and especially Ginsburg, *Introd.*, p. 318 ff.; also on the ten points found in the Pentateuch, see Butin (Baltimore, 1906), who considers that they are as old as the Christian era and probably mark a letter, &c., to be deleted. (2) The *literae majusculae* (e. g. ב Gn 1^1, ו Lv 11^{42} as the middle consonant of the Pentateuch, נ Nu 14^{17}), and *minusculae* (e. g. ה Gn 2^4). (3) The *literae suspensae* (Ginsburg, *Introd.*, p. 334 ff.) נ Ju 18^{30} (which points to the reading מְנַשֶּׁה for מֹשֶׁה), ע ψ 80^{14} (the middle of the Psalms [1]) and Jb $38^{13.15}$. (4) The 'mutilated' *Wāw* in שלום Nu 25^{12}, and ק Ex 32^{25} (בקמיהם), and Nu 7^2 (הפקודים). (5) *Mêm clausum* in לסרבה Is 9^6, and *Mêm apertum* in המ פרוצים Neh 2^{13}. (6) *Nûn inversum* before Nu 10^{35}, and after ver. 36, as also before ψ 107^{23-28} and [40]; according to Ginsburg, *Introd.*, p. 341 ff., a sort of bracket to indicate that the verses are out of place; cf. Krauss, *ZAW.* 1902, p. 57 ff., who regards the inverted *Nûns* as an imitation of the Greek obelus.

§ 6. *Pronunciation and Division of Consonants.*

P. Haupt, 'Die Semit. Sprachlaute u. ihre Umschrift,' in *Beiträge zur Assyriologie u. vergleich. semit. Sprachwissenschaft*, by Delitzsch and Haupt, i, Lpz. 1889, 249 ff.; E. Sievers, *Metrische Studien*, i, Lpz. 1901, p. 14 ff.

1. An accurate knowledge of the original phonetic value of each *a* consonant is of the greatest importance, since very many grammatical peculiarities and changes (§ 18 ff.) only become intelligible from the nature and pronunciation of the sounds. This knowledge is obtained partly from the pronunciation of the kindred dialects, especially the still living Arabic, partly by observing the affinity and interchange

---

Oceano delle abbreviature e sigle[2], Parma, 1883 (appendix, 1884); Ph. Lederer, *Hebr. u. Chald. Abbreviaturen*, Frankf. 1893; Händler, *Lexicon d. Abbreviaturen* (annexed to G. Dalman's *Aram.-neuhebr. WB.*, Frankf. 1897); Levias, art. 'Abbreviations,' in the *Jew. Encycl.*, i. 39 ff.; F. Perles, 'Zur Gesch. der Abbrev. im Hebr.' (*Archiv f. Stenogr.*, 1902, p. 41 ff.). On abbreviations in biblical MSS. see Ginsburg, *Introd.*, 165 ff.

[1] According to Blau, *Studien zum althebr. Buchwesen*, Strassburg, 1902, p. 167, properly a large ע, called *t'lûyā* because *suspended* between the two halves of the Psalter, and then incorrectly taken for a *littera suspensa*.

of sounds on Hebrew itself (§ 19), and partly from the tradition of the Jews.[1]

The pronunciation of Hebrew by the modern German Jews, which partly resembles the Syriac and is generally called 'Polish', differs considerably from that of the Spanish and Portuguese Jews, which approaches nearer to the Arabic. The pronunciation of Hebrew by Christians follows the latter (after the example of Reuchlin), in almost all cases.

b The oldest tradition is presented in the transcription of Hebrew names in Assyrian cuneiform; a later, but yet in its way very important system is seen in the manner in which the LXX transcribe Hebrew names with Greek letters.[2] As, however, corresponding signs for several sounds (ט, ע, צ, ק, שׁ) are wanting in the Greek alphabet, only an approximate representation was possible in these cases. The same applies to the Latin transcription of Hebrew words by Jerome, according to the Jewish pronunciation of his time.[3]

On the pronunciation of the modern Jews in North Africa, see Bargès in the *Journ. Asiat.*, Nov. 1848; on that of the South Arabian Jews, J. Dérenbourg, *Manuel du lecteur*, &c. (from a Yemen MS. of the year 1390), Paris, 1871 (extrait 6 du *Journ. Asiat.* 1870).

c **2.** With regard to the pronunciation of the several gutturals and sibilants, and of ט and ק, it may be remarked:—

1. Among the gutturals, the glottal stop א is the lightest, corresponding to the *spiritus lenis* of the Greeks. It may stand either at the beginning or end of a syllable, e. g. אָמַר *'āmár*, יַאֲשִׁם *yā'šám*. Even *before* a vowel א is almost lost to our ear, like the *h* in *hour* and in the French *habit, homme*. *After* a vowel א generally (and at the end of a word, always) coalesces with it, e. g. קָרָא *qārā* for an original *qārā'*, Arab. *qārā'a*; see further, § 23 *a*, 27 *g*.

d ה before a vowel corresponds exactly to our *h* (spiritus asper); after a vowel it is *either* a guttural (so always at the end of a syllable which is not final, e. g. נַהֲפֹךְ *nāhpakh*; at the end of a word the consonantal ה has a point —Mappîq—in it, see § 14), *or* it stands inaudible at the end of a word, generally as a mere orthographic indication of a preceding vowel, e. g. גָּלָה *gālā*; cf. §§ 7 *b* and 75 *a*.

e ע is related to א, but is a much stronger guttural. Its strongest sound is a rattled, guttural *g*, cf. e. g. עַזָּה, LXX Γάζα, עֲמֹרָה Γόμορρα; elsewhere, a weaker sound of the same kind, which the LXX reproduce by a *spiritus* (*lenis* or *asper*), e. g. עֵלִי Ἡλί, עֲמָלֵק Ἀμαλέκ.[4] In the mouth of the Arabs one hears in the former case a sort of guttural *r*, in the latter a sound peculiar to themselves formed in the back of the throat.—It is as incorrect to omit the ע

---

[1] Cf. C. Meinhof, 'Die Aussprache des Hebr.,' in *Neue Jahrb. f. Philol. u. Pädag.*, 1885, Bd. 132, p. 146 ff.; M. Schreiner, 'Zur Gesch. der Ausspr. des Hebr.,' in *ZAW.* 1886, p. 213 ff.

[2] Cf. Frankel, *Vorstudien zu der Septuag.*, Lpz. 1841, p. 90 ff.; C. Könneke, 'Gymn.-Progr.,' Stargard, 1885. On the transcription of eleven Psalms in a palimpsest fragment of the Hexapla at Milan, see Mercati, *Atti della R. Accad.*, xxxi, Turin, 1896. [Cf. Burkitt, *Fragments of . . . Aquila*, Cambr. 1897, p. 13.]

[3] Numerous examples occur in *Hieronymi quaestiones hebraicae in libro geneseos*, edited by P. de Lagarde, Lpz. 1868; cf. the exhaustive and systematic discussion by Siegfried, 'Die Aussprache des Hebr. bei Hieronymus,' in *ZAW.* 1884, pp. 34–83.

[4] It is, however, doubtful if the LXX always consciously aimed at reproducing the actual differences of sound.

entirely, in reading and transcribing words (עֵלִי *Eli*, עֲמָלֵק *Amalek*), as to pronounce it exactly like *g* or like a nasal *ng*. The stronger sound might be approximately transcribed by *gh* or *'g*; but since in Hebrew the softer sound was the more common, it is sufficient to represent it by the sign ', as אַרְבַּע *'arba'*, עַד *'ad*.

f ח is the strongest guttural sound, a deep guttural *ch*, as heard generally in Swiss German, somewhat as in the German *Achat*, *Macht*, *Sache*, *Docht*, *Zucht* (not as in *Licht*, *Knecht*), and similar to the Spanish *j*. Like ע it was, however, pronounced in many words feebly, in others strongly.

g As regards ר, its pronunciation as a palatal (with a vibrating uvula) seems to have been the prevailing one. Hence in some respects it is also classed with the gutturals (§ 22 *q*, *r*). On the *lingual* ר, cf. *o*.

h 2. The Hebrew language is unusually rich in sibilants. These have, at any rate in some cases, arisen from dentals which are retained as such in Aramaic and Arabic (see in the *Lexicon* the letters ז, צ and שׁ).

i שׁ and שׂ were originally represented (as is still the case in the unpointed texts) by only *one* form ש; but that the use of this one form to express two different sounds (at least in Hebrew) was due only to the poverty of the alphabet, is clear from the fact that they are differentiated in Arabic and Ethiopic (cf. Nöldeke in *Ztschr. f. wissensch. Theol.*, 1873, p. 121; Brockelmann, *Grundriss*, i. 133). In the Masoretic punctuation they were distinguished by means of the diacritical point as שׁ (*sh*) and שׂ (*s*).[1]

k The original difference between the sounds שׂ and ס[2] sometimes marks a distinction in meaning, e. g. סָבַר *to close*, שָׂכַר *to hire*, סָכַל *to be foolish*, שָׂכַל *to be prudent, to be wise*. Syriac always represents both sounds by ס, and in Hebrew also they are sometimes interchanged; as סָכַר for שָׂכַר *to hire*, Ezr 4[5]; שִׂכְלוּת for סִכְלוּת *folly*, Ec 1[17].

l ז (transcribed ζ by the LXX) is a soft whizzing *s*, the French and English *z*, altogether different from the German *z* (*ts*).

m 3. ט, ק, and probably צ are pronounced with a strong articulation and with a compression of the larynx. The first two are thus essentially different from ת and כ, which correspond to our *t* and *k* and also are often aspirated (see below, *n*). צ is distinguished from every other *s* by its peculiar articulation, and in no way corresponds to the German *z* or *ts*; we transcribe it by *ṣ*; cf. G. Hüsing, 'Zum Lautwerte des צ,' in *OLZ.* x. 467 ff.

n **3.** Six consonants, the weak and middle hard Palatals, Dentals, and Labials

ב ג ד כ פ ת (בְּגִדְכְּפַת)

have a twofold pronunciation, (1) a harder sound, as mutes, like

---

[1] The modern Samaritans, however, in reading their Hebrew Pentateuch pronounce שׁ invariably as שׂ.

[2] The original value of ס, and its relation to the original value of שׁ and שׂ, is still undetermined, despite the valuable investigations of P. Haupt, *ZDMG.* 1880, p. 762 f.; D. H. Müller, 'Zur Geschichte der semit. Zischlaute,' in the *Verhandlungen des Wiener Orient. Congresses*, Vienna, 1888, Semitic section, p. 229 ff.; De Lagarde, 'Samech,' in the *NGGW.* 1891, no. 5, esp. p. 173; Aug. Müller, *ZAW.* 1891, p. 267 ff.; Nöldeke, *ZDMG.* 1893, p. 100 f.; E. Glaser, *Zwei Wiener Publicationen über Habaschitisch-punische Dialekte in Südarabien*, Munich, 1902, pp. 19 ff.—On the phonetic value of צ see G. Hüsing, *OLZ.* 1907, p. 467 ff.

k, *p*, *t*, or initial *b*, *g* (hard), *d*; and (2) a softer sound as *spirantes*.[1] The harder sound is the original. It is retained at the beginning of syllables, when there is no vowel immediately preceding to influence the pronunciation, and is denoted by a point, *Dageš lene* (§ 13), placed in the consonants, viz. בּ *b*, גּ *g*, דּ *d*, כּ *k*, פּ *p*, תּ *t*. The weaker pronunciation appears as soon as a vowel sound immediately precedes. It is occasionally denoted, esp. in MSS., by *Rāphè* (§ 14 *e*), but in printed texts usually by the mere absence of the *Dageš*. In the case of בּ, כּ, פּ, תּ, the two sounds are clearly distinguishable even to our ear as *b* and *v*, *k* and German (weak) *ch*, *p* and *ph*, *t* and *th* (in *thin*). The Greeks too express this twofold pronunciation by special characters: בּ, כּ χ; פּ π, פּ φ; תּ τ, תּ θ. In the same way גּ should be pronounced like the North German *g* in *Tage*, *Wagen*, and דּ like *th* in *the*, as distinguished from גּ and דּ.

For more precise information on the cases in which the one or the other pronunciation takes place, see § 21. The modern Jews pronounce the aspirated בּ as *v*, the aspirated תּ as *s*, e.g. רַב *rav* (or even *raf*), בַּיִת *bais*. The customary transcription (used also in this Grammar) of the spirants בּ, כּ, תּ by *bh*, *kh*, *th* is only an unsatisfactory makeshift, since it may lead (esp. in the case of *bh* and *kh*) to an erroneous conception of the sounds as real aspirates, *b*-*h*, *k*-*h*.

o **4.** According to their special character the consonants are divided into—

(*a*) Gutturals	א ה ע ח;
(*b*) Palatals	ג כ ק;
(*c*) Dentals	ד ט ת;
(*d*) Labials	ב פ;
(*e*) Sibilants	ז שׁ שׂ ס צ;
(*f*) Sonants	נ מ, ר ל, ו י.

In the case of ר its hardest pronunciation as a *palatal* (see above, *g*, end) is to be distinguished from its more unusual sound as a lingual, pronounced in the front of the mouth.

On the twofold pronunciation of *r* in Tiberias, cf. Delitzsch, *Physiol. und Musik*, Lpz. 1868, p. 10 ff.; Baer and Strack, *Dikduke ha-ṭ'amim*, Lpz. 1879, p. 5, note *a*, and § 7 of the Hebrew text, as well as p. 82.

p In accordance with E. Sievers, *Metrische Studien*, i. 14, the following scheme of the Hebrew phonetic system is substituted for the table formerly given in this grammar:—

i. Throat sounds (Gutturals): א ה ע ח.

[1] So at any rate at the time when the present punctuation arose.

ii. Mouth-sounds:		w.	m.	e.	w.	m.
1. Mutes and Spirants:	Palatal	ג	כ	ק	ג	כ
	Dental	ד	ת	ט	ד	ת
	Labial	ב	פ	—	ב	פ
2. Sibilants:	...	ז	ש שׂ ס	צ		
3. Sonants:	...	ו י	ר ל	נ מ		

Rem. 1. The meaning of the letters at the top is, w. = weak, m. = middle hard, e. = emphatic. Consonants which are produced by the same organ of speech are called *homorganic* (e.g. ג and כ as palatals), consonants whose sound is of the same nature *homogeneous* (e.g. ו and י as semi-vowels). On their homorganic character and homogeneity depends the possibility of interchange, whether within Hebrew itself or with the kindred dialects. In such cases the soft sound generally interchanges with the soft, the hard with the hard, &c. (e.g. ד = ז, ת = שׁ, ט = צ). Further transitions are not, however, excluded, as e.g. the interchange of ת and ק (ת = כ = ק). Here it is of importance to observe whether the change takes place in an initial, medial, or final letter; since e.g. the change in a letter when medial does not always prove the possibility of the change when initial. That in certain cases the character of the consonantal sound also influences the preceding or following vowel will be noticed in the accidence as the instances occur. *q*

Rem. 2. Very probably in course of time certain nicer distinctions of pronunciation became more and more neglected and finally were lost. Thus e.g. the stronger ע *ʿg*, which was known to the LXX (see above, *e*), became in many cases altogether lost to the later Jews; by the Samaritans and Galileans ע and ח were pronounced merely as א, and so in Ethiopic, ע like א, ח like *h*, שׁ like *s*. *r*

Rem. 3. The consonants which it is usual to describe especially as *weak*, are those which readily coalesce with a preceding vowel to form a long vowel, viz. א, ו, י (as to ה, cf. § 23 *k*), or those which are most frequently affected by the changes described in § 19 *b-l*, as again א, ו, י, and נ, and in certain cases ה and ל; finally the gutturals and ר for the reason given in § 22 *b* and *q*. *s*

§ 7. *The Vowels in General, Vowel Letters and Vowel Signs.*

1. The original vowels in Hebrew, as in the other Semitic tongues, *a* are *a*, *i*, *u*. *E* and *o* always arise from an obscuring or contraction of these three pure sounds, viz. *ĕ* by modification from *ĭ* or *ă*; short *ŏ* from *ŭ*; *ê* by contraction from *ai* (properly *ay*); and *ô* sometimes by modification (obscuring) from *â*, sometimes by contraction from *au* (properly *aw*).[1] *a*

In Arabic writing there are vowel signs only for *a*, *i*, *u*; the combined sounds *ay* and *aw* are therefore retained uncontracted and pronounced as diphthongs (*ai* and *au*), e.g. שׁוֹט Arab. *sauṭ*, and עֵינַיִם Arab. *ʿainain*. It was

[1] In proper names the LXX often use the diphthongs *ai* and *aὐ* where the Hebrew form has *ê* or *ô*. It is, however, very doubtful whether the *ai* and *aὐ* of the LXX really represent the true pronunciation of Hebrew of that time; see the instructive statistics given by Kittel in Haupt's *SBOT.*, on 1 Ch 1^{2-20}.

only in later Arabic that they became in pronunciation *ê* and *ô*, at least after weaker or softer consonants; cf. בַּיִן Arab. *bain*, *bên*, יוֹם Arab. *yaum*, *yôm*. The same contraction appears also in other languages, e.g. in Greek and Latin (*θαῦμα*, Ionic *θῶμα*; *plaustrum* = *plostrum*), in the French pronunciation of *ai* and *au*, and likewise in the German popular dialects (*Oge* for *Auge*, &c.). Similarly, the obscuring of the vowels plays a part in various languages (cf. e.g. the *a* in modern Persian, Swedish, English, &c.).[1]

b **2.** The partial expression of the vowels by certain consonants (ה, ו, י; א), which sufficed during the lifetime of the language, and for a still longer period afterwards (cf. § 1 *k*), must in the main have passed through the following stages[2]:—

(*a*) The need of a written indication of the vowel first made itself felt in cases where, after the rejection of a consonant, or of an entire syllable, a long vowel formed the final sound of the word. The first step in such a case was to retain the original final consonant, at least as a vowel letter, i.e. merely as an indication of a final vowel. In point of fact we find even in the Old Testament, as already in the Mêša' inscription, a ה employed in this way (see below) as an indication of a final *o*. From this it was only a step to the employment of the same consonant to indicate also other vowels when final (thus, e.g. in the inflection of the verbs ל״ה, the vowels *ā*,[3] *ē*, *ê*). After the employment of ו as a vowel letter for *ô* and *û*, and of י for *ê* and *î*, had been established (see below, *e*) these consonants were also employed—although not consistently—for the same vowels at the end of a word.

c According to § 91 *b* and *d*, the suffix of the 3rd sing. masc. in the noun (as in the verb) was originally pronounced הוּ. But in the places where this הוּ with a preceding *a* is contracted into *ô* (after the rejection of the ה), we find the ה still frequently retained as a vowel letter, e.g. סוּסֹה, עֵירֹה Gn 49[11], cf. § 91 *e*; so throughout the Mêša' inscription בֵּיתֹה, אַרְצֹה (also בֵּתֹה), בְּנֹה, בָּה, לָהּ, הַלְּהַחֲמֹה; on the other hand already in the Siloam inscription יָמֶיהָ.[4] ימה Mêša', l. 8 = יָמָיו *his days* is unusual, as also רשה l. 20 if it is for ראשיו *his chiefs*. The verbal forms with ה suffixed are to be read וַיַּחְלְפֶהָ (l. 6), וְאֶסְחָבֶהָ (l. 12 f.) and וַיְנַרְשֶׁהָ (l. 19).

d As an example of the original consonant being retained, we might also include the י of the constr. state plur. masc. if its *ê* (according to § 89 *d*) is

[1] In Sanskrit, in the Old Persian cuneiform, and in Ethiopic, short *a* alone of all the vowels is not represented, but the consonant by itself is pronounced with short *a*.

[2] Cf. especially Stade, *Lehrb. der hebr. Gr.*, p. 34 ff.

[3] According to Stade, the employment of ה for *ā* probably took place first in the case of the locative accusatives which originally ended in ־ָה, as קָדְמָה, אַרְצָה.

[4] The form רעו contradicts the view of Oort, *Theol. Tijds.*, 1902, p. 374, that the above instances from the Mêša'-inscription are to be read *benhu*, *bahu*, *lahu*, which were afterwards vocalized as *beno*, *bo*, *lo*.

contracted from an original *ay*. Against this, however, it may be urged that the Phoenician inscriptions do not usually express this *ê*, nor any other final vowel.[1]

(*b*) The employment of ו to denote *ô*, *û*, and of י to denote *ê*, *î*, may *e* have resulted from those cases in which a ו with a preceding *a* was contracted into *au* and further to *ô*, or with a preceding *u* coalesced into *û*, and where י with *a* has been contracted into *ai* and further to *ê*, or with a preceding *i* into *î* (cf. § 24). In this case the previously existing consonants were retained as vowel letters and were further applied at the end of the word to denote the respective long vowels. Finally א also will in the first instance have established itself as a vowel letter only where a consonantal א with a preceding *a* had coalesced into *â* or *ā*.

The orthography of the Siloam inscription corresponds almost exactly with *f* the above assumptions. Here (as in the Mêša' inscr.) we find all the long vowels, which have not arisen from original diphthongs, *without* vowel letters, thus אֵשׁ, חֹצְבִם, מִימָן (or מְיָמָן); אַמּוֹת, קֹל, שֶׁלֹשׁ, צֵר. On the other hand מוֹצָא (from *mauṣa'*), עוֹד (from *'aud*); מימן also, if it is to be read מְיָמָן, is an instance of the retention of a י which has coalesced with *i* into *i*. Instances of the retention of an originally consonantal א as a vowel letter are מָאתַיִם, מוֹצָא, and קָרָא, as also רֹאשׁ. Otherwise final *ā* is always represented by ה: אַמָּה, הָיָה, זֹרֶה, נקבה. To this יִם alone would form an exception (cf. however the note on יוֹם, § 96), instead of יוֹם (Arab. *yaum*) *day*, which one would expect. If the reading be correct, this is to be regarded as an argument that a consciousness of the origin of many long vowels was lost at an early period, so that (at least in the middle of the word) the vowel letters were omitted in places where they should stand, according to what has been stated above, and added where there was no case of contraction. This view is in a great measure confirmed by the orthography of the Mêša' inscription. There we find, as might be expected, דיבן (= *Daibōn*, as the Δαιβών of the LXX proves), חורנן (*ô* from *au*), and בֵּיתֹה (*ê* from *ai*), but also even הוֹשַׁעֲנִי[2] instead of הוֹשִׁעֲנִי (from *hauš-*), ואשב = וְאוֹשִׁיב בֵּת four times, בֹּתה once, for בֵּית and בֵּיתֹה (from *bait*); ללה = לַיְלָה, אן = אַיִן or אֵין.

[1] Thus there occurs, e.g. in Melit. 1, l. 3 שנבנ = שְׁנֵי בְנֵי *the two sons*; elsewhere כ for כִּי (but כי in the Mêša' and Siloam inscrr.), ו for וֶה (the latter in the Siloam inscr.), בנת = בָּנְתִי (so Mêša') or בָּנְיתִי, &c. Cf. on the other hand in Mêša', אנכ = אנכי (unless it was actually pronounced *'anōkh* by the Moabites!). As final *ā* is represented by ה and א and final *i* by י, so final *û* is almost everywhere expressed by ו in Mêša', and always in the Siloam inscription. It is indeed not impossible that Hebrew orthography also once passed through a period in which the final vowels were left always or sometimes undenoted, and that not a few strange forms in the present text of the Bible are to be explained from the fact that subsequently the vowel letters (especially ו and י) were not added in all cases. So Chwolson, 'Die Quiescentia הוי in der althebr. Orthogr.,' in *Travaux du Congrès ... des Orientalistes*, Petersb. 1876; cf. numerous instances in Ginsburg, *Introd.*, p. 146 ff.

[2] השענ is the more strange since the name of king הוֹשֵׁעַ is represented as *A-u si'* in cuneiform as late as 728 B.C.

g (*c*) In the present state of Old Testament vocalization as it appears in the Masoretic text, the striving after a certain uniformity cannot be mistaken, in spite of the inconsistencies which have crept in. Thus the final long vowel is, with very few exceptions (cf. § 9 *d*, and the very doubtful cases in § 8 *k*), indicated by a vowel letter—and almost always by the same letter in certain nominal and verbal endings. In many cases the use of וֹ to mark an *ô* or *û*, arising from contraction, and of ִי for *ê* or *î*, is by far the more common, while we seldom find an originally consonantal א rejected, and the simple phonetic principle taking the place of the historical orthography. On the other hand the number of exceptions is very great. In many cases (as e.g. in the plural endings ־ִים and וֹת) the vowel letters are habitually employed to express long vowels which do not arise through contraction, and we even find short vowels indicated. The conclusion is, that if there ever was a period of Hebrew writing when the application of fixed laws to all cases was intended, either these laws were not consistently carried out in the further transmission of the text, or errors and confusion afterwards crept into it. Moreover much remained uncertain even in texts which were plentifully provided with vowel letters. For, although in most cases the context was a guide to the correct reading, yet there were also cases where, of the many possible ways of pronouncing a word, more than one appeared admissible.[1]

h 3. When the language had died out, the ambiguity of such a writing must have been found continually more troublesome; and as there was thus a danger that the correct pronunciation might be finally lost, the vowel signs or vowel points were invented in order to fix it. By means of these points everything hitherto left uncertain was most accurately settled. It is true that there is no historical account of the date of this vocalization of the O. T. text, yet we may at least infer, from a comparison of other historical facts, that it was gradually developed by Jewish grammarians in the sixth and seventh centuries A.D. under the influence of different Schools, traces of which have been preserved to the present time in various differences of tradition.[2] They mainly followed, though with independent regard to

[1] Thus e.g. קטל can be read *qāṭal*, *qāṭāl*, *qāṭôl*, *qᵉṭōl*, *qôṭēl*, *qiṭṭēl*, *qaṭṭēl*, *quṭṭal*, *qèṭel*, and several of these forms have also different senses.

[2] The most important of these differences are, (*a*) those between the Orientals, i. e. the scholars of the Babylonian Schools, and the Occidentals, i. e. the scholars of Palestine (Tiberias, &c.); cf. Ginsburg, *Introd.*, p. 197 ff.; (*b*) amongst the Occidentals, between Ben-Naphtali and Ben-Asher, who flourished in the first half of the tenth century at Tiberias; cf. Ginsburg, *Introd.*, p. 241 ff. Both sets of variants are given by Baer in the appendices

the peculiar nature of the Hebrew, the example and pattern of the older Syrian punctuation.[1]

See Gesenius, *Gesch. d. hebr. Spr.*, p. 182 ff.; Hupfeld, in *Theol. Studien u. Kritiken*, 1830, pt. iii, who shows that neither Jerome nor the Talmud mentions vowel signs; Berliner, *Beiträge zur hebr. Gramm. im Talm. u. Midrasch*, p. 26 ff.; and B. Pick, in *Hebraica*, i. 3, p. 153 ff.; Abr. Geiger, 'Zur Nakdanim-[Punctuators-]Literatur,' in *Jüd. Ztschr. für Wissensch. u. Leben*, x. Breslau, 1872, p. 10 ff.; H. Strack, *Prolegomena critica in Vet. Test. Hebr.*, Lips. 1873; 'Beitrag zur Gesch. des hebr. Bibeltextes,' in *Theol. Stud. u. Krit.*, 1875, p. 736 ff., as also in the *Ztschr. f. die ges. luth. Theol. u. K.*, 1875, p. 619 ff.; 'Massorah,' in the *Protest. Real.-Enc.*[3], xii. 393 ff. (a good outline); A. Merx, in the *Verhandlungen des Orientalistenkongresses zu Berlin*, i. Berlin, 1881, p. 164 ff. and p. 188 ff.; H. Graetz, 'Die Anfänge der Vokalzeichen im Hebr.,' in *Monatsschr. f. Gesch. u. Wissensch. d. Judenth.*, 1881, pp. 348 ff. and 395 ff.; Hersmann, *Zur Gesch. des Streites über die Entstehung der hebr. Punktation*, Ruhrort, 1885; Harris, 'The Rise . . . of the Massorah,' *JQR.* i. 1889, p. 128 ff. and p. 223 ff.; Mayer-Lambert, *REJ.* xxvi. 1893, p. 274 ff.; J. Bachrach, *Das Alter d. bibl. Vocalisation u. Accentuation*, 2 pts. Warsaw, 1897, and esp. Ginsburg, *Introd.* (see § 3 c), p. 287 ff.; Budde, 'Zur Gesch. d. Tiberiens. Vokalisation,' in *Orient. Studien zu Ehren Th. Nöldekes*, i. 1906, 651 ff.; Bacher, 'Diakrit. Zeichen in vormasoret. Zeit,' in *ZAW.* 1907, p. 285; C. Levias, art. 'Vocalization,' in the *Jewish Encycl.*— On the hypothesis of the origin of punctuation in the Jewish schools for children, cf. J. Dérenbourg in the *Rev. Crit.*, xiii. 1879, no. 25.

4. To complete the historical vocalization of the consonantal text *i* a phonetic system was devised, so exact as to show all vowel-changes occasioned by lengthening of words, by the tone, by gutturals, &c., which in other languages are seldom indicated in writing. The pronunciation followed is in the main that of the Palestinian Jews of about the sixth century A.D., as observed in the solemn reading of the sacred writings in synagogue and school, but based on a much older tradition. That the real pronunciation of early Hebrew is consistently preserved by this tradition, has recently been seriously questioned on good grounds, especially in view of the transcription of proper names in the LXX. Nevertheless in many cases, internal reasons, as well as the analogy of the kindred languages, testify in a high degree to the faithfulness of the tradition. At the same recension of the text, or soon after, the various other signs for reading (§§ 11–14, 16) were added, and the accents (§ 15).

§ 8. *The Vowel Signs in particular.*

P. Haupt, 'The names of the Hebrew vowels,' *JAOS.* xxii, and in the *Johns Hopkins Semitic Papers*, Newhaven, 1901, p. 7 ff.; C. Levias in the *Hebr. Union Coll. Annual*, Cincinnati, 1904, p. 138 ff.

---

to his critical editions. Our printed editions present uniformly the text of Ben-Asher, with the exception of a few isolated readings of Ben-Naphtali, and of numerous later corruptions.

[1] See Geiger, 'Massorah bei d. Syrern,' in *ZDMG.* 1873, p. 148 ff.; J. P. Martin, *Hist. de la ponctuation ou de la Massore chez les Syriens*, Par. 1875; E. Nestle, in *ZDMG.* 1876, p. 525 ff.; Weingarten, *Die syr. Massora nach Bar Hebraeus*, Halle, 1887.

Preliminary Remark.

The next two sections (§§ 8 and 9) have been severely criticized (Philippi, *ThLZ.* 1897, no. 2) for assigning a definite quantity to each of the several vowels, whereas in reality ◌ָ, ◌ֵ, ◌ֹ are merely signs for *ă*, *e*, *o*: 'whether these are long or short is not shown by the signs themselves but must be inferred from the rules for the pause which marks the breaks in continuous narrative, or from other circumstances.' But in the twenty-fourth and subsequent German editions of this Grammar, in the last note on § 8 *a* [English ed. p. 38, note 4], it was stated: 'it must be mentioned that the Masoretes are not concerned with any distinction between long and short vowels, or in general with any question of quantity. Their efforts are directed to fixing the received pronunciation as faithfully as possible, by means of writing. For a long time only שִׁבְעָה מְלָכִים *seven kings* were reckoned (*vox memor.* in Elias Levita וַיֹּאמֶר אֱלֹהִים), Šureq and Qibbuṣ being counted as one vowel. The division of the vowels in respect of quantity is a later attempt at a scientific conception of the phonetic system, which was not invented but only represented by the Masoretes (Qimchi, *Mikhlol*, ed. Rittenb. 136 *a*, distinguishes the five long as *mothers* from their five daughters).'

I have therefore long shared the opinion that 'the vowel-system represented by the ordinary punctuation (of Tiberias) was primarily intended to mark only differences of quality' (Sievers, *Metrische Studien*, i. 17). There is, however, of course a further question how far these 'later' grammarians were mistaken in assigning a particular quantity to the vowels represented by particular signs. In Philippi's opinion they were mistaken (excluding of course *î*, *ê*, *ô* when written *plene*) in a very great number of cases, since not only does ◌ָ stand, according to circumstances, for *ā̆* or *ă*, and ◌ָ for *ā̆* or *ă*, but also ◌ֵ for *ē* or *ĕ*, and ◌ֹ for *ō* or *ŏ*, e. g. כָּבֵד and קָטֹן, out of pause *kā̆bḗd*, *qā̆ṭṓn* (form קָטָל), but in pause *kā̆bḗd*, *qā̆ṭṓn*.

I readily admit, with regard to *Qameṣ* and *Seᵉgol*, that the account formerly given in § 8 f. was open to misconstruction. With regard to *Ṣere* and *Ḥolem*, however, I can only follow Philippi so long as his view does not conflict with the (to me inviolable) law of a long vowel in an open syllable before the tone and (except Pathaḥ) in a final syllable with the tone. To me כָּבֵד = *kā̆bḗd*, &c., is as impossible as e. g. עָנָב = *ʿĕnab* or בָּרָךְ = *bŏrakh*, in spite of the analogy cited by Sievers (p. 18, note 1) that 'in old German e. g. original *ĭ* and *ŭ* often pass into *ĕ* and *ŏ* dialectically, while remaining in a closed syllable.

a **1.** The full vowels (in contrast to the half-vowels or vowel trills, § 10 *a–f*), classified according to the three principal vowel sounds (§ 7 *a*), are as follows:—

First Class. A-sound.

A

1. ◌ָ [1] *Qāmĕṣ* denotes either *ā*, *â*, more strictly *ā̂* (the obscure Swedish *å*) and *ā̂̆*,[2] as יָד *yā̆d* (hand), רָאשִׁים *rā'šîm* (heads), or *ă* (in future transcribed as *ŏ*), called *Qāmeṣ ḥāṭûph*, i.e. hurried Qameṣ. The latter occurs almost exclusively as a modification of *ŭ*; cf. *c* and § 9 *u*.
2. ◌ַ *Páthāḥ*, *ă*, בַּת *bă̆th* (daughter).

---

[1] In early MSS. the sign for Qameṣ is a stroke with a point underneath, i. e. according to Nestle's discovery (*ZDMG.* 1892, p. 411 f.), Pathaḥ with *Ḥolem*, the latter suggesting the obscure pronunciation of *Qameṣ* as *â*. Cf. also Ginsburg, *Introd.*, p. 609.

[2] Instead of the no doubt more accurate transcription *ā̂̆*, *â̆* we have

Also 3. ֶ *Seǧôl*, an open *e*, *è* (*ā* or *ă̆*), as a modification of *ă*,[1] either in an untoned closed syllable, as in the first syllable of יֶדְכֶם *yădkhèm* (your hand) from *yădkhèm*—or in a tone-syllable as in פֶּסַח *pèsaḥ*; cf. *πάσχα*, and on the really monosyllabic character of such formations, see § 28 *e*. But *Seǧôl* in an open tone-syllable with a following י, as in גָּלְיָנָה *gelènā* (cf. § 75 *f*), יָדֶיךָ *yādèkhā* (cf. § 91 *i*), is due to contraction from *ay*.

Second Class. I- and E-sounds.

I

1. ִי *Ḥîrĕq* with *yod*, almost always *î*, as צַדִּיק *ṣaddîq* (righteous). *b*
2. ִ either *î* (see below, *i*), as צַדִּיקִים *ṣaddîqîm*, only orthographically different from צדיקם,—or *ĭ*, as צִדְקִי *ṣĭdqî* (his righteousness).

E

3. ֵי *Ṣerî* or *Ṣērê* with *yod* = *ê*, e. g. בֵּיתוֹ *bêthô* (his house).
4. ֵ either *ê*, but rarely (see below, *i*), or *ē* as שֵׁם *šēm* (name). *Ṣere* can only be *ĕ*, in my opinion, in few cases, such as those mentioned in § 29 *f*.
5. ֶ *Seǧôl*, *ă̆*, a modification of *ĭ*, e.g. חֶפְצִי *ḥăp̄ṣî* (ground-form *ḥĭp̄ṣ*); שֶׁן *šän* (ground-form *šĭn*).

Third Class. U- and O-sounds.

U

1. ֽ *Šûrĕq*, usually *û*, מוּת *mûth* (to die), rarely *ŭ*. *c*
2. ֻ *Qibbûṣ*, either *ŭ*, e.g. סֻלָּם *sŭllām* (ladder), or *û*, e.g. קוּמוּ *qūmū* (rise up), instead of the usual קִומוּ.

O

3. ִי and ִ *Ḥōlĕm*, *ô* and *ō*, קוֹל *qôl* (voice), רֹב *rōbh* (multitude). Often also a defective ִ for *ô*; rarely ִי for *ō*.
   On the question whether ִ under some circumstances represents *ŏ*, see § 93 *r*.
4. ָ On *Qāmĕṣ ḥāṭûph* = *ŏ*, generally modified from *ŭ*, as חָק *ḥŏq* (statute), see above, *a*.

---

retained *ā*, *ā* in this grammar, as being typographically simpler and not liable to any misunderstanding. For *Qameṣ ḥaṭuph*, in the previous German edition expressed by *ă̆*, we have, after careful consideration, returned to *ŏ* The use of the same sign ָ for *ā̆* (*ă̂*) and *ă̆*, shows that the Massoretes did not intend to draw a sharp distinction between them. We must not, however, regard the Jewish grammarians as making a merely idle distinction between *Qāmeṣ rāḥāb*, or broad Qameṣ, and *Qāmeṣ ḥaṭûph*, or light Qameṣ. It is quite impossible that in the living language an *ā* lengthened from *ă̆*, as in *dābār*, should have been indistinguishable from e. g. the last vowel in וַיֵּשֶׁב or the first in קָדְשִׁים.—The notation *á*, *é*, *ó* expresses here the vowels essentially long, either naturally or by contraction; the notation *ā*, *ē*, *ō* those lengthened only by the tone, and therefore changeable; *ă̆*, *ĕ*, *ŏ* the short vowels. As regards the others, the distinction into *i* and *ĭ*, *û* and *ŭ* is sufficient; see § 9.—The mark ˊ stands in the following pages over the tone-syllable, whenever this is not the last, as is usual, but the penultimate syllable of the word, e. g. יֵשֵׁבˊ.

[1] These *Seǧôls*, modified from *ă̆*, are very frequent in the language. The

d The names of the vowels are mostly taken from the form and action of the mouth in producing the various sounds, as פַּתַח *opening*; צֵרִי *a wide parting* (of the mouth), also שֶׁבָא (= *ĕ*) *breaking, parting* (cf. the Arab. *kasr*); חִירִק (also חִרֶק) *narrow opening*; חוֹלָם *closing*, according to others *fullness*, i. e. of the mouth (also מְלֹא פוּם [1] *fullness of the mouth*). קָמֶץ [2] also denotes a slighter, as שׁוּרֶק and קִבּוּץ (also קִבּוּן פּוּם) a firmer, compression or contraction of the mouth. *Segôl* (סְגוֹל *bunch of grapes*) takes its name from its form. So שְׁלֹשׁ נְקֻדוֹת (*three points*) is another name for *Qibbûṣ*.

e Moreover the names were mostly so formed (but only later), that the sound of each vowel is heard in the first syllable (קָמֶץ for קָמֶץ, פַּתַח for פַּתַח, צֵרִי for צֵרִי); in order to carry this out consistently some even write *Sägôl, Qomeṣ-ḥaṭûf, Qübbûṣ*.

f **2.** As the above examples show, the vowel sign stands regularly *under* the consonant, *after* which it is to be pronounced, ָ *rā*, ַ *ră*, ֵ *rē*, ֶ *rĕ*, &c. The *Pathaḥ* called *furtivum* (§ 22 *f*) alone forms an exception to this rule, being pronounced *before* the consonant, רוּחַ *rû^{a}ḥ* (wind, spirit). The *Ḥōlĕm* (without *wāw*) stands on the left above the consonant; ֹ *rō* (but לֹ = *lō*). If א, as a vowel letter, follows a consonant which is to be pronounced with *ō*, the point is placed over its right arm, thus בֹּא, רֹאשׁ; but e.g. בֹּאָם, since א here begins a syllable.

g No dot is used for the Ḥolem when *ō* (of course without *wāw*) is pronounced after *sin* or before *šin*. Hence שׂוֹנֵא *śônē* (hating), נֹשֵׂא *n^{e}śō* (to bear), מֹשֶׁה *môšĕ* (not מֹשֵׁה); but שֹׁמֵר *šômēr* (a watchman). When *ō* precedes the *śin*, the dot is placed over its right arm, e.g. יִרְפֹּשׂ *yirpōś* (he treads with the feet), הַנֹּשְׂאִים *hannōś^e'im* (those who carry).

In the sign וֹ, the ו may also be a consonant. The וֹ is then either to be read *ōw* (necessarily so when a consonant otherwise without a vowel precedes, e. g. לָוֶה *lôwĕ*, lending) or *wō*, when a vowel already precedes the ו, e. g. עָוֹן *'āwôn* (iniquity) for עָוֹן. In more exact printing, a distinction is at least made between וֹ (*wo*) and וֹ (i. e. either *ô* or, when another vowel follows the *wāw*, *ôw* [3]).

Babylonian punctuation (see § 8 *g*, note 1) has only one sign for it and tone-bearing Pathaḥ; see also Gaster, 'Die Unterschiedslosigkeit zwischen Pathach u. Segol,' in *ZAW.* 1894, p. 60 ff.

[1] On the erroneous use of the term *melo pum*, only in Germany, for *šûreq* (hence also pronounced *melu pum* to indicate *û*), see E. Nestle, *ZDMG.* 1904, p. 597 ff.; Bacher, ibid., p. 799 ff., Melopum; Simonsen, ibid., p. 807 ff.

[2] The usual spelling קָמֶץ and פַּתַח takes the words certainly rightly as Hebrew substantives; according to De Lagarde (*Gött. gel. Anz.* 1886, p. 873, and so previously Luzzatto), קָמֶץ and פָּתַח are rather Aram. participles, like *Dageš*, &c., and consequently to be transliterated *Qimēṣ* and *Pâthaḥ*.

[3] Since 1846 we have become acquainted with a system of vocalization different in many respects from the common method. The vowel signs, all except וֹ, are there placed *above* the consonants, and differ almost throughout in form,

3. The vowels of the first class are, with the exception of ◌ָ in the middle and ◌ָה, ◌ָא, ◌ָה at the end of the word (§ 9 *a–d*, *f*), represented *only* by vowel signs, but the long vowels of the I- and U-class largely by vowel letters. The vowel sound to which the letter *h*

---

and some even as regards the sound which they denote: ◌ַ = *á*, *ā*, ◌ַ = tone-bearing *ă* and *è*, ◌ֵ = *é*, *ē*, ◌ִ = *í*, ◌ִי, ◌ֹ = *ó*, *ō*, ◌ֹ or ◌ֺו = *ú*. In an unsharpened syllable ◌ַ = toneless *ă* and *è*, and also Ḥaṭeph Pathaḥ; ◌ֱ = toneless *ĕ* and Ḥaṭeph Seghôl; ◌ִ = *ĭ*, ◌ֻ = *ŭ*, ◌ֳ = *ŏ*, and Ḥaṭeph Qames. Lastly in toneless syllables before Dageš, ◌ַ = *ă*, ◌ֶ = *ĕ*, ◌ִ = *ĭ*, ◌ֻ = *ŭ*, ◌ָ = *ă̆*. Šᵉwâ is ◌ְ The accents differ less and stand in some cases under the line of the consonants. Besides this complicated system of the Codex Babylonicus (see below) and other MSS., there is a simpler one, used in Targums. It is still uncertain whether the latter is the foundation of the former (as Merx, *Chrest. Targ.* xi, and Bacher, *ZDMG.* 1895, p. 15 ff.), or is a later development of it among the Jews of South Arabia (as Praetorius, *ZDMG.* 1899, p. 181 ff.). For the older literature on this *Babylonian punctuation* (נְקוּד בָּבְלִי), as it is called, see A. Harkavy and H. L. Strack, *Katalog der hebr. Bibelhandschr. der Kaiserl. öffentl. Bibliothek zu St. Petersb.*, St. Petersb. and Lpz., 1875, parts i and ii, p. 223 ff. A more thorough study of the system was made possible by H. Strack's facsimile edition of the *Prophetarum posteriorum codex Babylonicus Petropolitanus* (St. Petersb., 1876, la. fol.) of the year 916, which Firkowitsch discovered in 1839, in the synagogue at Tschufutkale in the Crimea. The MS. has been shown by Ginsburg (*Recueil des travaux rédigés en mémoire . . . de Chwolson*, Berlin, 1899, p. 149, and *Introd.*, pp. 216 ff., 475 f.) to contain a recension of the Biblical text partly Babylonian and partly Palestinian; cf. also Barnstein, *The Targum of Onkelos to Genesis*, London, 1896, p. 6 f. Strack edited a fragment of it in *Hosea et Joel prophetae ad fidem cod. Babylon. Petrop.*, St. Petersb. 1875. Cf. also the publication by A. Merx, quoted above, § 7 *h*, and his *Chrestomathia Targumica*, Berlin, 1888; G. Margoliouth, in the *PSBA.* xv. 4, and M. Gaster, ibid.; P. Kahle, *Der masoret. Text des A. T. nach d. Überlief. der babyl. Juden*, Lpz. 1902, with the valuable review by Rahlfs in *GGA.* 1903, no. 5; Nestle, *ZDMG.* 1905, p. 719 (Babylonian ◌ַ = ע. According to the opinion formerly prevailing, this Babylonian punctuation exhibits the system which was developed in the Eastern schools, corresponding to and contemporaneous with the Western or Tiberian system, although a higher degree of originality, or approximation to the original of both systems of punctuation, was generally conceded to the latter. Recently, however, Wickes, *Accents of the Twenty-one Books*, Oxford, 1887, p. 142 ff, has endeavoured to show, from the accents, that the 'Babylonian' punctuation may certainly be *an* Oriental, but is by no means *the* Oriental system. It is rather to be regarded, according to him, as a later and not altogether successful attempt to modify, and thus to simplify, the system common to all the Schools in the East and West. Strack, *Wiss. Jahresb. der ZDMG.* 1879, p. 124, established the probability that the vowels of the superlinear punctuation arose under *Arab* influence from the vowel letters אוי (so previously Pinsker and Graetz), while the Tiberian system shows *Syrian* influence.

A third, widely different system (Palestinian), probably the basis of the other two, is described by A. Neubauer, *JQR.* vii. 1895, p. 361 ff., and Friedländer, ibid., p. 564 ff., and *PSBA.* 1896, p. 86 ff.; C. Levias, *Journ. of Sem. Lang. and Lit.*, xv. p. 157 ff.; and esp. P. Kahle, Beitr. zu der Gesch. der hebr. Punktation,' in *ZAW.* 1901, p. 273 ff. and in *Der masoret. Text des A. T.* (see above), chiefly dealing with the Berlin MS. Or. qu. 680, which contains a number of variants on the biblical text, and frequently agrees with the transcriptions of the LXX and Jerome.

points is determined more precisely by the vowel sign standing before, above, or within it. Thus—

י may be combined with *Ḥîrĕq*, *Ṣērê*, *Segôl* (יִ, ֵי, ֶי).

ו with *Šûrĕq* and *Ḥōlĕm* (וּ and וֹ).[1]

In Arabic the long *a* also is regularly expressed by a vowel letter, viz. *'Alĕph* (אָ), so that in that language three vowel letters correspond to the three vowel classes. In Hebrew א is rarely used as a vowel letter; see § 9 *b* and § 23 *g*.

i **4.** The omission of the vowel letters when writing *î*, *û*, *ê*, *ô* is called *scriptio defectiva* in contrast to *scriptio plena*. קוֹל, קוּם are written *plene*, קֹלֹת, קֻם *defective*.

Cf. Bardowitz, *Studien zur Gesch. der Orthogr. im Althebr.*, 1894; Lidzbarski, *Ephem.*, i. 182, 275; Marmorstein, 'Midrasch der vollen u. defekt. Schreibung,' in *ZAW.* 1907, p. 33 ff.

k So far as the choice of the full or defective mode of writing is concerned, there are certainly some cases in which only the one or the other is admissible, Thus the full form is necessary at the end of the word, for *û*, *ô*, *ō*, *î*, *ê*, *ē*, as well as for *è* in חָוָה &c. (§ 9 *f*), also generally with *â*, *ā* (cf. however § 9 *d*), e.g. קָטָלוּ, קָטַלְתִּי, יָדִי, מַלְכֵי. (But the Masora requires in Jer 26[6], 44[8]; Ezr 6[21]; 2 Ch 32[13] גּוֹיֵי instead of גּוֹיֵי; Zp 2[9] גּוֹי [perhaps an error due to the following י] for גּוֹיֵי; Is 40[31] וְקוֹיֵי [followed by י] for וְקוֹיֵי; Jer 38[11] בְּלוֹיֵי for בְּלוֹיֵי.) On the other hand the defective writing is common when the letter, which would have to be employed as a vowel letter, immediately precedes as a strong consonant, e.g. גּוֹיִם (*nations*) for גּוֹיִים, מִצְוֹת (*commandments*) for מִצְוֹות.

l That much is here arbitrary (see § 7 *g*), follows from the fact that sometimes the same word is written very differently, e.g. הֲקִימוֹתִי Ez 16[60]: הֲקַמֹתִי and also הֲקִמוֹתִי Jer 23[4]; cf. § 25 *b*. Only it may be observed,

(*a*) That the scriptio plena in two successive syllables was generally avoided; cf. e.g. נָבִיא but נְבִיאִים; צַדִּיק, but צַדִּיקִים; קוֹל, קֹלוֹת; יְהוֹשָׁעַ; מְצָאֲהוּ.

(*b*) That in the later Books of the O. T. (and regularly in post-biblical Hebrew) the full form, in the earlier the defective, is more usual.

m **5.** In the cognate dialects, when a vowel precèdes a vowel-letter which is not kindred (heterogeneous), e.g. וֹ, וּ, יוֹ, יִ, יֵ, יֶ, a diphthong (*au*, *ai*)[2] is formed if the heterogeneous vowel be *a*. This is also to be regarded as the Old Hebrew pronunciation, since it

[1] After the example of the Jewish grammarians the expression, 'the vowel letter rests (*quiesces*) in the vowel-sign,' has become customary. On the other hand, the vowel letters are also called by the grammarians, *matres lectionis* or *supports* (*fulcra*).

[2] Cf. T. C. Foote, *The diphthong* ai *in Hebrew* (Johns Hopkins Univ. Circulars, June, 1903, p. 70 ff.).

agrees with the vocalic character of ו and י (§ 5 *b*, note 2). Thus such words as וָו, חַי, גּוֹי, עֲשׂוּי, גֵּו, בַּיִת are not to be pronounced according to the usual Jewish custom[1] as *vāv, ḥay, gôy, ʿāsûy, gēv, bayith* (or even as *vaf*, &c.; cf. modern Greek *av af, ev ef* for *αὐ, εὐ*), but with the Italian Jews more like *wāu, ḥai*, &c. The sound of יִ֫ is the same as וּ֫, i.e. almost like *āu*, so that וּ֫ is often written defectively for יִ֫.

§ 9. *Character of the several Vowels.*

Numerous as are the vowel signs in Hebrew writing, they are yet *a* not fully adequate to express all the various modifications of the vowel sounds, especially with respect to length and shortness. To understand this better a short explanation of the character and value of the several vowels is required, especially in regard to their length and shortness as well as to their changeableness (§§ 25, 27).

I. *First Class. A-sound.*

1. *Qameṣ* (֫), when it represents a long *a*, is, by nature and origin, of two kinds:—

(1) The essentially long *â* (in Arabic regularly written א֫), which is not readily shortened and never wholly dropped (§ 25 *c*), e.g. כְּתָב *kᵉthâbh* (writing); very seldom with a following א, as רָאשׁ 2 S 12[1.4] (see the examples in § 72 *p*).[2]

The writing of קָאם Ho 10[14] for קָם would only be justifiable, if the *ā* *b*
of this form were to be explained as a contraction of *ăă*; cf. however § 72 *a*; דָּאג Neh 13[16] for דָּג (*dāg*) is certainly incorrect.—The rarity of the *â* in Hebrew arises from the fact that it has for the most part become an obtuse *ô*; see below, *q*.

(2)-*ā*, lengthened only by position (i.e. tone-long or at all events *c*
lengthened under the influence of the tone, according to the laws for the formation of syllables, § 27 *e–h*), either in the tone-syllable itself (or in the secondary tone-syllable indicated by *Mèthĕg*, see below), or just before or after it. This sound is invariably lengthened from an original *ă*,[3] and is found in open syllables, i. e. syllables ending in a vowel (§ 26 *b*), e.g. לָךְ, קָטַל, יָקוּם, אָסִיר (Arab. *lăkă, qătălă, yăqûmŭ, ʾăsîrŭ*), as well as in closed syllables, i.e. those ending in

[1] In MSS. ו and י, in such combinations as גֵּו, חַי, are even marked with Mappiq (§ 14 *a*).

[2] Of a different kind are the cases in which א has lost its consonantal sound by coalescing with a preceding *a*, § 23 *a–d*.

[3] In Arabic this *ă* is always retained in an open syllable.

a consonant, as יָד, כּוֹכָב (vulgar Arab. *yăd, kaukăb*). In a closed syllable, however, it can only stand when this has the tone, דָּבָר, עוֹלָם; whereas in an open syllable it is especially frequent *before* the tone, e.g. דָּבָר, זָקֵן, לָבָן. Where the tone is moved forward or weakened (as happens most commonly in what is called the construct state of nouns, cf. § 89 *a*) the original short *ă* (*Pathaḥ*) is retained in a closed syllable, while in an open syllable it becomes *Šᵉwâ* (§ 27 *i*): חָכָם, constr. state חַכַם (*ḥᵃkhăm*); דָּבָר, דְּבַר (*dᵉbhăr*); קָטָל, קְטָלָם. For examples of the retention, in the secondary tone-syllable, of *ā* lengthened from *ă*, see § 93 *xx*.

d In some terminations of the verb (תָ in the 2nd sing. masc. perf., תְ in the 2nd pl. fem. of the imperat., as well as in the 3rd and 2nd pl. fem. of the imperf.), in אַתְּ *thou* (masc.) and in the suffixes ךָ and הָ, the final *ā* can stand even without a vowel letter. A ה is, however, in these cases (except with הָ) frequently added as a vowel letter.

On ֲ for *ŏ* see below, *f*.

e **2.** *Pathaḥ*, or short *ă*, stands in Hebrew almost exclusively in a closed syllable with or without the tone (קָטַלְתָּם, קָטַל). In places where it now appears to stand in an open syllable the syllable was originally closed, and a helping vowel (*ă*, *ĭ*) has been inserted after the second radical merely to make the pronunciation easier, e.g. נַחַל (ground-form *naḥl*), בַּיִת (Arab. *bait*), see § 28 *d*, and with regard to two cases of a different kind, § 26 *g*, *h*. Otherwise *ă* in an open syllable has almost without exception passed into *ā* (ָ), see above, *c*.

On the very frequent attenuation of *ă* to *ĭ*, cf. below, *h*. On the rare, and only apparent union of Pathaḥ with א (אַ), see § 23 *d*, end. On *ă* as a helping-vowel, § 22 *f* (*Pathaḥ furtivum*), and § 28 *e*.

f **3.** Segôl (*ĕ*, *ê* [*ā*]) by origin belongs sometimes to the second, but most frequently to the first vowel class (§ 27 *o*, *p*, *u*). It belongs to the first class when it is a modification of *a* (as the Germ. *Bad*, pl. *Bäder*; Eng. *man*, pl. *men*), either in a toneless syllable, e.g. יֶדְכֶם (for *yadkhèm*), or with the tone, e.g. אֶרֶץ from *'arṣ*, קֶרֶן Arab. *qărn*, קֶמַח Arab. *ăqmḥ*. This *Segôl* is often retained even in the strongest tone-syllable, at the end of a sentence or of an important clause (in *pause*), as מֶלֶךְ, צֶדֶק (*mălăkh*, *ṣădăq*). As a rule, however, in such cases the *Pathaḥ* which underlies the *Segôl* is lengthened into *Qameṣ*, e.g. קָמַח, קָרָן. A *Segôl* apparently lengthened from *Šᵉwâ*, but in reality traceable to an original *ă*, stands in pausal forms, as פֶּרִי (ground-form *părỳ*), יֶהִי (*yăhỳ*), &c. On the cases where a י (originally consonantal) follows this Segôl, see § 75 *f*, and § 91 *k*.

II. *Second Class. I- and E-sounds.*

g **4.** The long *î* is frequently even in the consonantal writing indicated by י (a *fully* written *Ḥireq* יִ—); but a naturally long *î* can be also written *defectively* (§ 8 *i*), e.g. צַדִּיק (*righteous*), plur. צַדִּיקִים *ṣaddîqîm*; יָרֵא (*he fears*), plur. יְרֵאִי. Whether a *defectively* written *Ḥireq* is long may be best known from the origin of the form; often also from the nature of the syllable (§ 26), or as in יְרֵאִי from the *Metheg* attached to it (§ 16 *f*).

h **5.** The *short Ḥireq* (always[1] written *defectively*) is especially frequent in sharpened syllables (אִמִּי, קִטֵּל) and in toneless closed syllables (מִזְמוֹר *psalm*); cf. however וַיִּשְׁבָּ in a closed tone-syllable, and even וַיְהִי, with a helping Seǧôl, for *wayyíphn*. It has arisen very frequently by attenuation from *ă*, as in דִּבְרֵי from original *dăbărê*, צִדְקִי (ground-form *ṣădq*),[2] or else it is the original *ĭ*, which in the tone-syllable had become *ē*, as in אֹיְבֵךְ (*thy enemy*) from אֹיֵב (ground-form *'âyĭb*).[3] It is sometimes a simple helping vowel, as in בֵּיִת, § 28 *e*.

The earlier grammarians call every *Ḥireq* written *fully*, *Ḥireq magnum*; every one written *defectively*, *Ḥireq parvum*,—a misleading distinction, so far as quantity is concerned.

i **6.** The longest *ê* יֵ— (more rarely defective —, e.g. עֲנִי for עֲנִיִי Is 3[8]; at the end of a word also ה—) is as a rule contracted from יַ— *ay* (*ai*), § 7 *a*, e.g. הֵיכָל (*palace*), Arab. and Syriac *haikal*.

k **7.** The *Ṣere* without Yôdh mostly represents the tone-long *ē*, which, like the tone-long *ā* (see *c*), is very rarely retained except *in* and *before* the tone-syllable, and is always lengthened from an original *ĭ*. It stands in an open syllable with or before the tone, e.g. סֵפֶר (ground-form *sĭphr*) *book*, שֵׁנָה (Arab. *sĭnăt*) *sleep*, or with Metheg (see § 16 *d*, *f*) in the secondary tone-syllable, e.g. שְׁאֵלָתִי *my request*, נֵלְכָה *let us go*. On the other hand in a closed syllable it is almost always with the tone, as בֵּן *son*, אִלֵּם *dumb*.

l Exceptions: (*a*) *ē* is sometimes retained in a toneless closed syllable, in monosyllabic words before Maqqeph, e.g. עֵין־ Nu 35[18], as well as in the examples of *nāsôg 'āḥôr* mentioned in § 29 *f* (on the quantity cf. § 8 *b* 3 end); (*b*) in a toneless open final syllable, Ṣere likewise occurs in examples of the *nāsôg 'āḥôr*, as יֵצֵא Ex 16[29]; cf. Ju 9[39].

m **8.** The Seǧôl of the I(E)-class is most frequently an *ĕ* modified from original *ĭ*, either replacing a tone-long *ē* which has lost the tone, e.g.

[1] At least according to the Masoretic orthography; cf. Wellhausen, *Text der Bb. Sam.*, p. 18, Rem.

[2] Jerome (cf. Siegfried, *ZAW.* 1884, p. 77) in these cases often gives *ă* for *ĭ*.

[3] Cf. the remarks of I. Guidi, 'La pronuncia del ṣērē,' in the *Verhandl. des Hamburger Orient.-Kongr.* of 1902, Leiden, 1904, p. 208 ff., on Italian *e* for Latin *i*, as in *fede* = *fidem*, *pece* = *picem*.

תֶּן־ from תֵּן (*give*), יְצָרְךָ (*thy creator*) from יֹצֵר, or in the case discussed in § 93 *o*, חֶלְקִי, עֶזְרִי from the ground-forms *ḥilq*, *'izr*; cf. also § 64 *f*. *Segôl* appears as a simple helping-vowel in cases such as סֵפֶר for *siphr*, יֵגֶל for *yigl* (§ 28 *e*).

III. *Third Class. U- and O-sounds.*

n **9.** For the U-sound there is—

(1) the *long û*, either (*a*) written fully, וּ *Šureq*, e.g. גְּבוּל (*boundary*), or (*b*) defectively written ◌ֻ *Qibbûṣ*, גְּבֻלוֹ, יְמֻתוּן;

(2) the short *ŭ*, mostly represented by *Qibbûṣ*, in a toneless closed syllable and especially common in a sharpened syllable, in e.g. שֻׁלְחָן (*table*), סֻכָּה (*booth*).

o Sometimes also *ŭ* in a sharpened syllable is written וּ, e.g. הוּכָּה ψ 102[5], יוּדָּד Jb 5[7], כּוּלָּם Jer. 31[34], מְשׁוּבָּתוֹ Is 5[5], עֲרוּמִּים Gn 2[25] for עֲרֻמָּה, &c.

For this *u* the LXX write *o*, e.g. עֲדֹלָם Ὀδολλάμ, from which, however, it only follows, that this *ŭ* was pronounced somewhat indistinctly. The LXX also express the sharp *Ḥireq* by ε, e.g. אֱמֹר = Ἐμμήρ. The pronunciation of the *Qibbûṣ* like the German *ü*, which was formerly common, is incorrect, although the occasional pronunciation of the U-sounds as *ü* in the time of the punctators is attested, at least as regards Palestine[1]; cf. the Turkish *bülbül* for the Persian *bulbul*, and the pronunciation of the Arabic *dunyā* in Syria as *dünyā*.

p **10.** The O-sound bears the same relation to U as the E does to I in the second class. It has four varieties:—

(1) The *ô* which is contracted from *aw* (=*au*), § 7 *a*, and accordingly is mostly written fully; וֹ (*Ḥolem plenum*), e.g. שׁוֹט (*a whip*), Arab. *sauṭ*, עוֹלָה (*iniquity*) from עַוְלָה. More rarely *defectively*, as שׁרְךָ (*thine ox*) from שׁוֹר Arab. *ṯaur*.

q (2) The long *ô* which arose in Hebrew at an early period, by a general process of obscuring, out of an original *â*,[2] while the latter has been retained in Arabic and Aramaic. It is usually written *fully* in the tone-syllable, *defectively* in the toneless, e.g. קֹטֶל Arab. *qâṭil*. Aram. *qâṭēl*, אֱלוֹהַּ Arab. *'ilâh*, Aram. *'ĕlâh*, plur. אֱלֹהִים; שׁוֹק (*leg*), Arab. *sâq*; גִּבּוֹר (*hero*), Arab. *ǧabbâr*; חוֹתָם (*seal*), Arab. *ḫâtām*; רִמּוֹן (*pomegranate*), Arab. *rummân*; שִׁלְטוֹן (*dominion*), Aram. שִׁלְטָן and שָׁלְטָן Arab. *sulṭân*; שָׁלוֹם (*peace*), Aram. שְׁלָם, Arab. *salâm*. Sometimes the form in *â* also occurs side by side with that in *ô* as שִׁרְיָן and שִׁרְיוֹן (*coat of mail*; see however § 29 *u*). Cf. also § 68 *b*.

r (3) The tone-long *ō* which is lengthened from an original *ŭ*, or from an *ŏ* arising from *ŭ*, by the tone, or in general according to the

[1] Cf. Delitzsch, *Physiologie u. Musik*, Lpz. 1868, p. 15 f.

[2] Cf. above, *b*, end. On Jerome's transliteration of *o* for *ā*, see *ZAW.* 1884, p. 75.

laws for the formation of syllables. It occurs not only in the tone-syllable, but also in an open syllable before the tone, e.g. קֹדֶשׁ (ground-form *qŭdš*) *sanctuary*; בֹּרְכִי for *burrakh*, יִלְקֹטוּן ψ 104[28], as well as (with *Metheg*) in the secondary tone-syllable; אֱלֹהִים, פְּעָלוֹ. But the original *ŏ* (*ŭ*) is retained in a toneless closed syllable, whereas in a toneless open syllable it is weakened to *Šᵉwâ*. Cf. כֹּל *all*, but כָּל־ (*kŏl*), כֻּלָּם (*kŭllām*); יִקְטֹל, יִקְטְלָה and יִקְטְלוּ, where original *ŭ* is weakened to *Šᵉwâ*: *yiqᵉlû*, Arab. *yaqtŭlû*. This tone-long *ō* is only as an exception written fully.

(4) ֲ *Qameṣ-ḥaṭuph* represents *ŏ* (properly *ă*, cf. § 8 *a*, note 2) modified *s* from *ŭ* and is therefore classed here. It stands in the same relation to *Ḥolem* as the *Sᵉgôl* of the second class to *Sere*, כָּל־ *kŏl*, וַיָּקָם *wayyāqŏm*. On the distinction between this and *Qameṣ*, see below, *u*.

11. The following table gives a summary of the gradation of the *t* three vowel-classes according to the quantity of the vowels:—

First Class: A.	*Second Class*: I and E.	*Third Class*: U and O.
ָ original *â* (Arabic א ָ).	ֵי *ê*, from original *ay* (*ai*). ִי or ֵ long *î*.	וֹ *ô*, from original *aw* (*au*). וֹ or ָ *ô* obscured from *â*. וּ or ֻ *û*.
ָ tone-long *ā* (from original *ă*) chiefly in the tone-syllable but also just before it.	ֵ tone-long *ē* (from *î*) generally in the tone-syllable but also just before it.	ֹ tone-long *ō* (from original *ŭ*) in the tone-syllable, otherwise in an open syllable.
ֲ (as a modification of *ă*) sometimes a tone-long *è*, sometimes *ĕ*. ַ short *ă*. [ַ *ĭ* attenuated from *ă*; see *h*.] Utmost weakening to ֲ[a], ֱ[ĕ], ֶ[e].	ֶ *ĕ*. ִ short *ĭ*. Utmost weakening to ֲ[a], ֱ[ĕ], or ֶ[e].	ֳ *ŏ*, modified from *ŭ*. ֻ short *ŭ*, especially in a sharpened syllable. Utmost weakening to ֲ[a], ֱ[ĕ], ֳ[o], or ֶ[e].

Rem. *On the distinction between Qameṣ and Qameṣ-ḥaṭuph.*[1] *u*

According to § 8 *a*, long *ā* or *ā̆* (*Qameṣ*) and short *ŏ* or *ă* (*Qameṣ-ḥaṭuph*) are in manuscripts and printed texts generally expressed by the same sign (ָ), e.g. קָם *qām*, כָּל־ *kŏl*. The beginner who does not yet know the grammatical

[1] These statements, in order to be fully understood, must be studied in connexion with the theory of syllables (§ 26) and *Metheg* (§ 16 *c–i*).

origin of the words in question (which is of course the surest guide), may depend meanwhile on the following principal rules:—

1. *The sign* ◌ָ[1] *is* ŏ *in a toneless closed syllable*, since such a syllable can have only a short vowel (§ 26 *o*). The above case occurs—

(*a*) When *Šᵉwâ* follows as a syllable-divider, as in חָכְמָה *ḥŏkh-mâ* (wisdom), אָכְלָה *'ŏkh-lâ* (food). With *Metheg* ◌ֽ is *ā* (*ā̆*) and according to the usual view stands in an open syllable with a following *Šᵉwâ mobile*, e.g. אָכְלָה *'ā-khᵉlâ* (she ate); but cf. § 16 *i*.

(*b*) When a closed syllable is formed by *Dageš forte*, e.g. חָנֵּנִי *ḥŏnnēnî* (have mercy upon me); but בְּתִּים (with *Metheg*, § 16 *f* ζ) *bâttîm*.

(*c*) When the syllable in question loses the tone on account of a following *Maqqēph* (§ 16 *a*), e.g. כָּל־הָאָדָם *kŏl-hā-'ādām* (all men).

In ψ 35[10] and Pr 19[7] *Maqqēph* with כָּל is replaced by a conjunctive accent (*Merᵉkha*); so by *Darga*, Ju 19[5] with סָעַד, and Ez 37[8] with וַיִּקְרַם (so Baer after Qimḥi; ed. Mant., Ginsburg, Kittel ויקרם).

(*d*) In a closed final syllable without the tone, e.g. וַיָּקָם *wayyâqŏm* (and he stood up).—In the cases where *â* or *ā* in the final syllable has become toneless through *Maqqēph* (§ 16 *a*) and yet remains, e.g. כִּי־בַ־הַדָּת Est 4[8], שָׁת־לִי Gn 4[25], it has a *Metheg* in correct manuscripts and printed texts.

In cases like הֲלָאָה, לָמָּה *lâmmā*, the tone shows that ◌ָ is to be read as *ā*.

v 2. The cases in which ◌ָ appears to stand in an open syllable and yet is to be read as ŏ require special consideration. This is the case, (*a*) when *Ḥaṭeph-Qameṣ* follows, e.g. פֹּעֳלוֹ *his work*, or simple vocal *Šᵉwâ*, e.g. דָּרְבָן *ox goad*; בְּעַבְרוֹ Jo 4[7]; שָׁמְרָה (so ed. Mant., Ginsb.) *preserve* ψ 86[2], cf. 16[1] and the cases mentioned in § 48 *i*, n., and § 61 *f*, n.; other examples are Ob 11, Ju 14[16]); *Ḥaṭeph-Pathaḥ* follows in לְמִשְׁחָךְ (so Ginsburg; Baer לִמְשָׁחֲךָ) 1 S 15[1], לַהֲרִגֵךְ 24[11], and יְפַנְּשֵׁךְ (so Baer, Gn 32[18], others יְפַגְּשֵׁךְ); (*b*) before another *Qameṣ-ḥaṭuph*, e.g. פָּעָלֵךְ *thy work*; on אַרְהִ־לִי and קָרְבָּהִ־לִי Nu 23[7], see § 67 *o*; (*c*) in the two plural forms קָדָשִׁים *sanctuaries* and שָׁרָשִׁים *roots* (also written קֳדָשִׁים and שֳׁרָשִׁים). In all these cases the Jewish grammarians regard the *Metheg* accompanying the ◌ָ as indicating a Qāmeṣ raḥabh (broad Qameṣ) and therefore read the ◌ָ as *ā*; thus *pā-ʻlô*, *dā-ʻᵉbān*, *pā-ʻᵉlᵉkhā*, *qā-dāšim*. But neither the origin of these forms, nor the analogous formations in Hebrew and in the cognate languages, nor the transcription of proper names in the

[1] In the Babylonian punctuation (§ 8 *g*, note) *ā* and ŏ are carefully distinguished. So also in many MSS. with the ordinary punctuation and in Baer's editions of the text since 1880, in which ◌ָ is used for ŏ as well as for *ŏ*. Cf. Baer-Delitzsch, *Liber Jobi*, p. 43. But the identity of the two signs is certainly original, and the use of ◌ָ for ŏ is misleading.

LXX, allows us to regard this view as correct. It is just possible that Qameṣ is here used loosely for *ă*, as the equivalent of *ō*, on the analogy of פֹּעֲלוֹ &c., § 93 *q*. As a matter of fact, however, we ought no doubt to divide and read *pŏ'o-lô* (for *pŏ'-lô*), *pŏ'ŏ-l'khā*, *qŏdā-šim*.—Quite as inconceivable is it for *Methegh* to be a sign of the lengthening into *ā* in בְּחֳרִי־אָף (Ex 11[8]), although it is so in בְּאֳנִי *bā-'oni* (in the navy), since here the *ā* of the article appears under the ב.

§ 10. *The Half Vowels and the Syllable Divider* (Šᵉwâ).

a 1. Besides the full vowels, Hebrew has also a series of vowel sounds which may be called *half vowels* (Sievers, *Murmelvokale*). The punctuation makes use of these to represent extremely slight sounds which are to be regarded as remains of fuller and more distinct vowels from an earlier period of the language. They generally take the place of vowels *originally short* standing in *open syllables*. Such short vowels, though preserved in the kindred languages, are not tolerated by the present system of pointing in Hebrew, but either undergo a lengthening or are weakened to Šᵉwâ. Under some circumstances, however, the original short vowel may reappear.

b To these belongs first of all the sign ◌ְ, which indicates an extremely short, slight, and (as regards pronunciation) indeterminate vowel sound, something like an obscure half *ĕ* (*ᵉ*). It is called *Šᵉwâ*,[1] which may be either *simple Šᵉwâ* (*Šᵉwâ simplex*) as distinguished from the compound (see *f*), or *vocal Šᵉwâ* (*Šᵉwâ mobile*) as distinguished from *Šᵉwâ quiescens*, which is silent and stands as a mere syllable divider (see *i*) under the consonant which closes the syllable.

c The vocal *Šᵉwâ* stands under a consonant which is closely united, as a kind of grace-note, with the following syllable, either (*a*) at the beginning of the word, as קְטֹל *qᵉṭōl* (to kill), מְמַלֵּא *mᵉmallē* (filling), or (*b*) in the middle of the word, as קוֹטְלָה *qô-ṭᵉlā*, יִקְטְלוּ *yiq-ṭᵉlû*.

d In former editions of this Grammar *Šᵉwâ* was distinguished as *medium* when it followed a short vowel and therefore stood in a supposed 'loosely closed' or 'wavering' syllable, as in מַלְכִּי, בִּנְפֹל. According to Sievers, *Metrische Studien*, i. 22, this distinction must now be abandoned. These syllables are really closed, and the original vowel is not merely shortened, but entirely elided. The fact that a following Bᵉgadkᵉphath letter (§ 6 *n*) remains spirant instead of taking *Dageš lene*, is explained by Sievers on the 'supposition that the change from hard to spirant is older than the elision

[1] On שְׁוָא, the older and certainly the only correct form (as in Ben Asher), see Bacher, *ZDMG.* 1895, p. 18, note 3, who compares Šewayya, the name of the Syriac accentual sign of similar form ◌̣ (= Hebr. Zaqeph). The form שְׁבָא, customary in Spain since the time of Menaḥem b. Sarûq, is due to a supposed connexion with Aram. שְׁבָת *rest*, and hence would originally have denoted only *Šᵉwâ quiescens*, like the Arabic *sukūn* (rest). The derivation from שָׁבָה, שִׁיבָה (stem יָשַׁב, Levias, *American Journ. of Philol.*, xvi. 28 ff.) seems impossible.

of the vowel, and that the prehistoric *malakai* became *malakhai* before being shortened to *malkhē'*. In cases like פָּסְאוֹ (from כִּסֵּא), יִקְחוּ (from יִקַּח) the dropping of the *Dageš forte* shows that the original vowel is completely lost.

e The sound *ĕ* has been adopted as the normal transcription of simple *Šᵉwâ mobile*, although it is certain that it often became assimilated in sound to other vowels. The LXX express it by ε, or even by η, כְּרוּבִים Χερουβίμ, הַלְלוּ־יָהּ ἀλληλούια, more frequently by α, שְׁמוּאֵל Σαμουήλ, but very frequently by assimilating its indeterminate sound to the following principal vowel, e.g. סְדֹם Σόδομα, שְׁלֹמֹה Σολομών (as well as Σαλωμών), צְבָאוֹת Σαβαώθ, נְתַנְאֵל Ναθαναήλ.[1] A similar account of the pronunciation of *Šᵉwâ* is given by Jewish grammarians of the middle ages.[2]

How the *Šᵉwâ* sound has arisen through the vanishing of a full vowel is seen, e.g. in בְּרֵכָה from *bărăkă*, as the word is still pronounced in Arabic. In that language the full short vowel regularly corresponds to the Hebrew *Šᵉwâ mobile*.

f **2.** Connected with the *simple Šᵉwâ môbile* is the *compound Šᵉwâ* or *Ḥâṭēph* (*correptum*), i.e. a *Šᵉwâ* the pronunciation of which is more accurately fixed by the addition of a short vowel. There are three *Šᵉwâ*-sounds determined in this way, corresponding to the three vowel classes (§ 7 *a*):—

(ֲ) *Ḥâṭēph-Páthăḥ*, e.g. חֲמוֹר *ḥᵃmôr*, ass.

(ֳ) *Ḥâṭēph-Sᵉgôl*, e.g. אֱמֹר *'ᵉmōr*, to say.

(ֱ) *Ḥâṭēph-Qāmĕṣ*, e.g. חֳלִי, *ḥᵒlî*, sickness.

These *Ḥâṭēphs*, or at least the first two, stand especially under the four guttural letters (§ 22 *l*), instead of a *simple Šᵉwâ mobile*, since these letters by their nature require a more definite vowel than the indeterminate *simple Šᵉwâ mobile*. Accordingly a guttural at the beginning of a syllable, where the *Šᵉwâ* is necessarily vocal, can never have a mere *Šᵉwâ simplex*.

On ֲ the shorter Ḥaṭef as compared with ֳ cf. § 27 *v*.

g Rem. A. Only ֲ and ֳ occur under letters which are not gutturals. *Ḥaṭeph-Paṭaḥ* is found instead of *simple Šᵉwâ* (especially *Šᵉwâ mobile*), chiefly (*a*) under strengthened consonants, since this strengthening (commonly called doubling) causes a more distinct pronunciation of the *Šᵉwâ mobile*, שַׁבְּלֵי *branches*, Zc 4[12]. According to the rule given by Ben-Asher (which, however, appears to bo unknown to good early MSS. and is therefore rejected by Ginsburg, *Introd.*, p. 466; cf. Foote, *Johns Hopkins Univ. Circulars*, June 1903,

[1] The same occurs frequently also in the Greek and Latin transcriptions of Phoenician words, e.g. מְלָכָא *Malaga*, גְּבוּלִים *gubulim* (Schröder, *Die phöniz. Spr.*, p. 139 ff.). Cf. the Latin augment in *momordi*, *pupugi*, with the Greek in *τέτυφα*, *τετυμμένος*, and the old form *memordi*.

[2] See especially *Yehuda Ḥayyûǵ*, pp. 4 f. and 130 f. in Nutt's edition (Lond. 1870), corresponding to p. 200 of the edition by Dukes (Stuttg. 1844); Ibn Ezra's *Saḥoth*, p. 3; Gesenius, *Lehrgebäude der hebr. Sprache*, p. 68. The *Manuel du lecteur*, mentioned above, § 6 *b*, also contains express rules for the various ways of pronouncing *Šᵉwâ mobile*: so too the *Dikduke ha-ṭᵉamim*, ed. by Baer and Strack, Lpz. 1879, p. 12 ff. Cf. also Schreiner, *ZAW.* vi. 236 ff.

p. 71 f.), the *Ḥaṭeph* is *necessary*[1] when, in a strengthened *medial* consonant with *Šᵉwâ* (consequently not in cases like וַיְהִי, &c.), preceded by a Pathaḥ, the sign of the strengthening (*Dageš forte*) has fallen away, e. g. הַלְלוּ (but ed. Mant. and Ginsb. הַלֲלוּ) *praise ye!* וְתַאֲלֻצֵהוּ Ju 16[16]; no less universally, where after a consonant with *Šᵉwâ* the same consonant follows (to separate them more sharply, and hence with a *Metheg* always preceding), e. g. סוֹרְרִים ψ 68[7]; קִלְלָתְךָ (ed. Mant. and Ginsb. קִלֳלָ) Gn 27[13] (but not without exceptions, e. g. חִקְקֵי Ju 5[15], Is 10[1]; צִלְלֵי Jer 6[4], and so always הִנְנִי *behold me*, הִנֵּנוּ *behold us*; on כְּ before the suffix ךָ, see § 20 *b*); also in certain forms under *Kaph* and *Rêš* after a long vowel and before the tone, e. g. תְּאַבְּדֻנָּה Gn 3[17]; בְּרֵכִי ψ 103[1]; וְתִשְׁרַתֵהוּ 1 K 1[4] (but וְיִתְבָּרְכוּ ψ 72[17], cf. Jer 4[2], 1 Ch 29[20], because the tone is thrown back on to the *ā*. After *ē Šᵉwâ* remains even before the tone, as בֵּרְכוּ, &c.; but before Maqqef אֲלֻכָּה־נָּא Baer Ex 4[18], 2 S 15[7], Jer 40[15], but ed. Mant., Jabl., Ginsb. אֲלֻ֫[2]; (*b*) under initial sibilants after וְ copulative, e. g. וְזָהָב Gn 2[12]; cf. Jer 48[20]; וְסַחַר Is 45[14]; וְשֵׂרָה Lv 25[34]; וְשִׂקָּה Gn 27[26]; וְשָׁמַע Nu 23[18], Is 37[17], Dn 9[18], cf. Ju 5[12], 1 K 14[21], 2 K 9[17], Jb 14[1], Ec 9[7]—to emphasize the vocal character of the *Šᵉwâ*. For the same reason under the emphatic ט in וְטַלְלוּ Jer 22[28]; cf. Jb 33[25]; after *Qôph* in וְקִדְּמָתִי (so Baer, but ed. Mant., Jabl., Ginsb. וְקִ) Ez 23[41]; וְקֶרֶב־ ψ 55[22]; cf. Jer. 32[9]; under *Rêš* in אֶרְדָּה (ed. Mant. אֶ֫רְ) Gn 18[21]; וְרֶעֶם ψ 28[9]; even under ת Ezr 26[11]; under ב Est 2[8]; וּבְרַכְתָּךְ so Jabl., Ginsb., but ed. Mant. וּבְ֫רַכְתָּךְ Dt 24[13]; (*c*) under sonants, sibilants or *Qôph* after ĭ, e. g. יִצְחָק Gn 21[6], cf. 30[38] and Ez 21[28] (under ק); אִמְרוֹת ψ 12[7]; הַתְמַלְּכָךְ Jer 22[15]; בְּנָרוֹת Jos 11[2]; בְּסֶבֶךְ־ ψ 74[6],—for the same reason as the cases under *b*[3]; according to Baer also in שִׁפְמוֹת 1 S 30[28]; יִפְגְּשֶׁךָ Gn 32[18] after ŏ (cf. § 9 *v*), as well as after *a* in הַקְשִׁיבָה Dn 9[19]; הַבְּרָכָה Gn 27[38]; הַמְצָרְעִים 2 K 7[8].

B. The *Ḥaṭeph-Qameṣ* is less restricted to the gutturals than the first two, *h* and stands more frequently for a simple *Šᵉwâ mobile* when an original O-sound requires to be partly preserved, e. g. at the beginning, in רְאִי (ground-form *rŏ'y*) *vision* (cf. § 93 *z*); בְּנֳנֵיהוּ 2 Ch 31[12], &c., *Qᵉrê* (*Kᵉth.* כונ); עַמְּנִיוֹת *Ammonitish women*, 1 K 11[1] (sing. עַמּוֹנִית); יְרֻדְּכֶךָּ for the usual יְרִדְּכֶךָּ Ez 35[6], from יָרַד; תְּקֻבְּנוּ Nu 23[25], Jer 31[38], and elsewhere before suffixes, cf. § 60 *a*; קָדְקֳדוֹ *his pate* (from קָרְקֹר) ψ 7[17], &c.; אֶשְׁקְטָה Is 18[4] *Qᵉrê*. Further, like ֵ, it stands under consonants, which ought to have *Dageš forte*, as in לְקָחָה (for לֶקָּחָה) Gn 2[23]. In this example, as in וְסַעֲדָה 1 K 13[7]; וּסְאָה 2 K 7[18]; and וְצַעֲקִי Jer 22[20], the *Ḥaṭeph-Qameṣ* is no doubt due to the influence of the

[1] See Delitzsch, 'Bemerkungen über masoretisch treue Darstellung des alttestam. Textes,' in the *Ztschr. f. luth. Theol. u. Kirche*, vol. xxiv. 1863, p. 409 ff.

[2] On the uncertainty of the MSS. in some cases which come under *a*, see *Minḥat shay* (the Masoretic comm. in ed. Mant.) on Gn 12[3] and Ju 7[6].

[3] Ben-Asher requires ֶ for ֵ (even for *Šᵉwâ quiescens*) generally before a guttural or ר; hence Baer reads in 2 S 15[5] בְּקָרֶב־, ψ 18[7] אֶקְרָא; 49[15] לְשֶׁאוֹל; 65[5] תְּבַחֵר; 68[24] תְּמַחֵץ; Pr 3c[17] תְּלַעֵג; Jb 29[26] אֲבַחֵר; cf. Delitzsch, *Psalms*, 12[7], note.

following guttural as well as of the preceding U-sound. (Elsewhere indeed after וּ in similar cases *Ḥaṭeph-Pathaḥ* is preferred, see above, *b*; but with לָקְחָה cf. also סֻבְּלוֹ Is 9^3, 10^{27}, 14^{25}, where the U-sound must necessarily be admitted to have an influence on the *Šᵉwâ* immediately following.) In וְטָהֳרוּ (*û-ṭᵒhŏr*) Jb 17^9 it is also influenced by the following O-sound. In קָמְמִי $1\ S\ 28^8$ *Qᵉrê*, the original form is קָמֳמִי, where again the *ō* represents an *ŏ*. It is only through the influence of a following guttural that we can explain the forms נִקְרָאָה Est 2^{14}; נִבְהָל Pr 28^{22}; נִסְרָחָה Jer 49^7; אֶפְשָׁעָה Is 27^4; וְאֶשְׁתָּעָה Dn 8^{13}; שְׁתָעָה ψ 39^{13}; בַּסְעָרָה $2\ K\ 2^1$ (Baer's ed. also in ver. 11); הַקְהָתִים $2\ Ch\ 34^{12}$ (ed. Mant., Opitius, &c. הַקְּ). Finally in most of the examples which have been adduced, the influence of an emphatic sound (ק, ט, cf. also אַלְקָטָה Ru $2^{2.7}$), or of a sibilant is also to be taken into account.

i **3.** The sign of the *simple Šᵉwâ* ־ְ serves also as a mere syllable divider. In this case it is disregarded in pronunciation and is called *Šᵉwâ quiescens*. In the middle of a word it stands under every consonant which closes a syllable; at the end of words on the other hand it is omitted except in *final* ך (to distinguish it better from final ן), e.g. מֶלֶךְ *king*, and in the less frequent case, where a word ends with a mute after another vowelless consonant as in נֵרְדְּ *nard*, אַתְּ *thou* fem. (for *'ant*), קָטַלְתְּ *thou* fem. *hast killed*, וַיַּשְׁקְ *and he watered*, וַיִּשְׁבְּ *and he took captive*, אַל־תִּשְׁתְּ *drink thou not*; but וַיִּרָא, חָטָא.[1]

k However, in the examples where a mute closes the syllable, the final *Šᵉwâ* comes somewhat nearer to a vocal *Šᵉwâ*, especially as in almost all the cases a weakening of a final vowel has taken place, viz. אַתְּ *'attᵉ* from אַתִּי *'attî* (*'anti*), קָטַלְתְּ from קְטַלְתִּי (cf. in this form, the 2nd sing. fem. perf. Qal, even בָּאתְּ, after a vowel, Gn 16^8, Mi 4^{10}, &c., according to the readings of Baer), יִשְׁבְּ *yišbᵉ* from יֹשְׁבָה, &c. The Arabic actually has a short vowel in analogous forms. In נֵרְדְּ borrowed from the Indian, as also in קִשְׁטְ (*qĭšṭ*) Pr 22^{21}; and in אַל־תּוֹסְפְּ *ne addas* (for which we should expect תּוֹסֵף) Pr 30^6 the final mute of itself attracts a slight vowel sound.

l Rem. The proper distinction between *simple Šᵉwâ mobile* and *quiescens* depends on a correct understanding of the formation of syllables (§ 26). The beginner may observe for the present, that (1) *Šᵉwâ* is always *mobile* (*a*) at the beginning of a word (except in שְׁתֵּים, שְׁתֵּי § 97 *b*, note); (*b*) under a consonant with *Dageš forte*, e.g. גִּדְּפוּ *gid-dᵉphû*; (*c*) after another *Šᵉwâ*, e.g. יִקְטְלוּ *yiqṭᵉlû* (except at the end of the word, see above, *i*). (2) *Šᵉwâ* is *quiescens* (*a*) at the end of a word, also in the דְּ; (*b*) before another *Šᵉwâ*.

§ 11. *Other Signs which affect the Reading.*

Very closely connected with the vowel points are the *reading-signs*, which were probably introduced at the same time. Besides the diacritical point over שׁ and שׂ, a point is placed *within* a consonant

[1] On יתְּ as an ending of the 2nd sing. fem. perf. Qal of verbs ל״ה, see § 75 *m*.

to show that it has a stronger sound. On the other hand a horizontal stroke (*Rāphè*) *over* a consonant is a sign that it has *not* the stronger sound. According to the different purposes for which it is used the point is either (1) *Dageš forte*, a sign of strengthening (§ 12); or (2) *Dageš lene*, a sign of the harder pronunciation of certain consonants (§ 13); or (3) *Mappîq*, a sign to bring out the full consonantal value of letters which otherwise serve as vowel letters (§ 7 *b*), especially in the case of ה at the end of the word (§ 14 *a*). The *Rāphè*, which excludes the insertion of any of these points, has almost entirely gone out of use in our printed texts (§ 14 *e*).

§ 12. *Dageš in general,*[1] *and Dageš forte in particular.*

Cf. Graetz, 'Die mannigfache Anwendung u. Bedeut. des Dagesch,' in *Monatsschr. für Gesch. u. Wiss. d. Judent.*, 1887, pp. 425 ff. and 473 ff.

a **1.** *Dageš*, a point standing in the middle of a consonant,[2] denotes, according to § 11, (*a*) the *strengthening*[3] of a consonant (*Dageš forte*), e.g. קִטֵּל *qiṭṭēl* (§ 20); or (*b*) the *harder* pronunciation of the letters בְּגִדְכְּפַת (*Dageš lene*). For a variety of the latter, now rarely used in our printed texts, see § 13 *c*.

b The root דגש in Syriac means *to pierce through, to bore through* (with sharp iron); hence the name *Dageš* is commonly explained, solely with reference to its form, by *puncture, point*. But the names of all similar signs are derived rather from their grammatical significance. Accordingly דגש may in the Masora have the sense: *acuere* (*literam*), i.e. to *sharpen* a letter, as well as to *harden* it, i.e. to pronounce it as hard and without aspiration. דָּגֵשׁ *acuens* (*literam*) would then be a sign of sharpening and hardening (like *Mappîq* מַפִּיק *proferens*, as *signum prolationis*), for which purposes a *prick* of the *pen*, or *puncture*, was selected. The opposite of *Dageš* is רָפֶה *soft*, § 14 *e*, and § 22 *n*.

c **2.** In grammar *Dageš forte*, the *sign of strengthening*, is the more important. It may be compared to the *sicilicus* of the Latins (*Luculus* for *Lucullus*) or to the stroke over $\overline{m}$ and $\overline{n}$. In the unpointed text it is omitted, like the vowels and other reading signs.

For the different kinds of *Dageš forte*, see § 20.

---

[1] Oort, *Theol. Tijdschr.* 1902, p. 376, maintains that 'the Masoretes recognized no distinction between *Dageš lene* and *forte*. They used a *Dageš* where they considered that a letter had the sharp, not the soft or aspirated sound.' This may be true; but the old-established distinction between the two kinds of *Dageš* is essential for the right understanding of the grammatical forms.

[2] *Wāw* with *Dageš* (וּ) cannot in our printed texts be distinguished from a *wāw* pointed as *Šûrēq* (וּ); in the latter case the point should stand higher up. The וּ *û* is, however, easily to be recognized since it cannot take a vowel before or under it.

[3] Stade, *Lehrb. der hebr. Gr.*, Lpz. 1879, pp. 44, 103, rightly insists on the expression *strengthened pronunciation* instead of the older term *doubling*, since the consonant in question is only written once. The common expression arises from the fact that in transcription a *strengthened* consonant can only be indicated by writing it as double.

§ 13. *Dageš lene.*

Ginsburg, *Introd.*, p. 114 ff.: Dagesh and Raphe.

a **1.** *Dageš lene*, the sign of *hardening*, is in ordinary printed texts placed only within the בְּגַדְכְּפַת letters (§ 6 *n*) as a sign that they should be pronounced with their original hard sound (without aspiration), e.g. מֶלֶךְ *mèlĕkh*, but מַלְכּוֹ *mal-kô*; תָּפַר *tāphár*, but יִתְפֹּר *yith-pōr*; שָׁתָה *šāthā*, but יִשְׁתֶּה *yiš-tè*.

b **2.** The cases in which a *Dageš lene* is to be inserted are stated in § 21. It occurs almost exclusively at the beginning of words and syllables. In the middle of the word it can easily be distinguished from *Dageš forte*, since the latter always has a vowel before it, whereas *Dageš lene* never has; accordingly the *Dageš* in אַפֵּי *'appî*, רַבִּים *rabbîm* must be *forte*, but in יִגְדַּל *yigdal* it is *lene*.

c A variety of the *Dageš lene* is used in many manuscripts, as well as in Baer's editions, though others (including Ginsburg in the first two cases, *Introd.*, pp. 121, 130, 603, 662) reject it together with the Ḥatefs discussed in § 10 *g*. It is inserted in consonants other than the *Begadkephath* to call attention expressly to the beginning of a new syllable: (*a*) when the same consonant precedes in close connexion, e. g. בְּכָל־לְבָבִי ψ 9², where, owing to the *Dageš*, the coalescing of the two *Lameds* is avoided; (*b*) in cases like מַחְפִּי ψ 62⁸ = *maḥ-si* (not *măḥᵃ-sî*); (*c*) according to some (including Baer; not in ed. Mant.) in לֹא in the combination לוֹ לֹא Dt 32⁵, or לֹא לוֹ Hb 1⁶, 2⁶ &c. (so always also in Ginsburg's text, except in Gn 38⁹); see also § 20 *e* and *g*.—Delitzsch appropriately gives the name of *Dageš orthophonicum* to this variety of *Dageš* (*Bibl. Kommentar*, 1874, on ψ 94¹²); cf. moreover Delitzsch, *Luth. Ztschr.*, 1863, p. 413; also his *Complutensische Varianten zu dem Alttest. Texte*, Lpz. 1878, p. 12.

d **3.** When *Dageš forte* is placed in a *Begadkephath*, the strengthening necessarily excludes its aspiration, e.g. אַפֵּי, from אֲנַפִּי.

§ 14. *Mappîq and Rāphè.*

a **1.** *Mappîq*, like *Dageš*, also a point *within* the consonant, serves in the letters א ה ו י as a sign that they are to be regarded as full consonants and not as vowel letters. In most editions of the text it is only used in the consonantal ה at the end of words (since ה can never be a vowel letter in the middle of a word), e.g. גָּבְהָּ *gābháh* (to be high), אַרְצָהּ *'arṣāh* (her land) which has a consonantal ending (shortened from *-hā*), different from אַרְצָה *'árṣā* (to the earth) which has a vowel ending.

b Rem. 1. Without doubt such a *Hē* was distinctly aspirated like the Arabic *Hā* at the end of a syllable. There are, however, cases in which this ה has lost its consonantal character (the Mappiq of course disappearing too), so that it remains only as a vowel letter; cf. § 91 *e* on the 3rd fem. sing.

c The name מַפִּיק means *proferens*, i. e. a sign which brings out the sound of the letter distinctly, as a consonant. The same sign was selected for this

and for *Dageš*, since both are intended to indicate a hard, i. e. a strong, sound. Hence *Rāphè* (see *e*) is the opposite of both.

d 2. In MSS. Mappîq is also found with א, ו, י, to mark them expressly as consonants, e. g. גּוֹי (*gôy*), קָוּ (*qāw*, *qāu*), for which ֻ is also used, as עָשֻׂו, &c. For the various statements of the Masora (where these points are treated as *Dageš*), see Ginsburg, *The Massorah*, *letter* א, § 5 (also *Introd.*, pp. 557, 609, 637, 770), and 'The Dageshed Alephs in the Karlsruhe MS.' (where these points are extremely frequent), in the *Verhandlungen des Berliner Orientalisten-Kongresses*, Berlin, i. 1881, p. 136 ff. The great differences in the statements found in the Masora point to different schools, one of which appears to have intended that every audible א should be pointed. In the printed editions the point occurs only four times with א (אּ or אָ), Gn 43[26], Lv 23[17], Ezr 8[18] and Jb 33[21] (רְאִי֑ ; where the point can be taken only as an orthophonetic sign, not with König as *Dageš forte*). Cf. Delitzsch, *Hiob*, 2nd ed., p. 439 ff.

e 2. *Rāphè* (רָפֶה i.e. weak, soft), a horizontal stroke over the letter, is the opposite of both kinds of *Dageš* and *Mappîq*, but especially of *Dageš lene*. In exact manuscripts every בגדכפת letter has either *Dageš lene* or *Rāphè*, e. g. מֶלֶךְ *mèlĕkh*, תַּפַּר, שָׁתָה. In modern editions (except Ginsburg's 1st ed.) *Rāphè* is used only when the absence of a *Dageš* or *Mappîq* requires to be expressly pointed out.

§ 15. *The Accents.*

a On the ordinary accents (see below, *e*), cf. W. Heidenheim, מִשְׁפְּטֵי הַטְּעָמִים [*The Laws of the Accents*], Rödelheim, 1808 (a compilation from older Jewish writers on the accents, with a commentary); W. Wickes (see also below), טעמי כ"א ספרים [*The Accents of the Twenty-one Books*], Oxford, 1887, an exhaustive investigation in English; J. M. Japhet, *Die Accente der hl. Schrift* (exclusive of the books אֱמֶת), ed. by Heinemann, Frankf. a. M. 1896; Prätorius, *Die Herkunft der hebr. Accente*, Berlin, 1901, and (in answer to Gregory's criticism in the *TLZ.* 1901, no. 22) *Die Uebernahme der früh-mittelgriech. Neumen durch die Juden*, Berlin, 1902; P. Kahle, 'Zur Gesch. der hebr. Accente,' *ZDMG.* 55 (1901), 167 ff. (1, on the earliest Jewish lists of accents; 2, on the mutual relation of the various systems of accentuation; on p. 179 ff. he deals with the accents of the 3rd system, see above, § 8 *g*, note); Margolis, art. 'Accents,' in the *Jewish Encycl.* i (1901), 149 ff.; J. Adams, *Sermons in Accents*, London, 1906.—On the accents of the Books תא"ם (see below, *h*), S. Baer, תורת אמת [*Accentual Laws of the Books* אמ"ת], Rödelheim, 1852, and his appendix to Delitzsch's *Psalmencommentar*, vol. ii, Lpz. 1860, and in the 5th ed., 1894 (an epitome is given in Baer-Delitzsch's *Liber Psalmorum hebr.*, Lpz. 1861, 1874, 1880); cf. also Delitzsch's most instructive 'Accentuologischer Commentar' on Psalms 1–3, in his *Psalmencommentar* of 1874, as well as the numerous contributions to the accentual criticism of the text, &c., in the editions of Baer and Delitzsch, and in the commentaries of the latter; W. Wickes, טעמי אמ"ת [*Accents of the Poet. Books*], Oxford, 1881; Mitchell, in the *Journal of Bibl. Lit.*, 1891, p. 144 ff.; Baer and Strack, *Dikduke ha-ṭᵉamim*, p. 17 ff.

b 1. As Prätorius (see above) has convincingly shown, the majority of the Hebrew accents, especially, according to Kahle (see above), the 'Conjunctivi', were adopted by the Jews from the neums and punctuation-marks found in Greek gospel-books, and, like these, their primary purpose was to regulate minutely the public reading of the sacred

text. The complete transformation and amplification of the system (in three different forms, see § 8 *g*, note), which soon caused the Jews to forget its real origin, is clearly connected with the gradual change from the speaking voice in public reading to chanting or singing. The accents then served as a kind of musical notes.[1] Their value as such has, however, with the exception of a few traces, become lost in transmission. On the other hand, according to their original design they have also a twofold use which is still of the greatest importance for grammar (and syntax), viz. their value (*a*) as *marking the tone*, (*b*) as *marks of punctuation* to indicate the logical (syntactical) relation of single words to their immediate surroundings, and thus to the whole sentence.[2]

c **2.** As a mark of the tone the accent stands almost invariably (but see below, *e*) with the syllable which has the principal tone in the word. This is usually the ultima, less frequently the penultima. Amongst the Jewish grammarians a word which has the tone on the ultima is called *Milra'* (Aram. מִלְרַע i.e. accented below[3]), e.g. קָטַל *qāṭál*; a word which has the tone on the penultima is *Mil'ĕl* (Aram. מִלְעֵיל, accented *above*), e.g. מֶלֶךְ *mèlĕkh*. Besides this, in many cases a *secondary tone* is indicated in the word by *Mèthĕg* (cf. § 16). Examples such as יַחַד נַעֲמָדָה Is 50[8] (cf. 40[18], Ex 15[8], Jb 12[15], La 2[16]) are regarded by the Jewish grammarians as even *proparoxytone*.[4]

d **3.** As marks of interpunctuation the accents are subdivided into those which *separate* (*Distinctivi* or *Domini*) and those which *connect* (*Conjunctivi* or *Servi*). Further a twofold system of accentuation is to be noted: (*a*) the common system found in twenty-one of the Books (the כ״א i.e. twenty-one), and (*b*) that used in the first three Books of the *Hagiographa*, viz. Psalms, Proverbs, and Job, for which the *vox memor.* is אֱמֶת, from the initial consonants of the names, תְּהִלִּים Psalms, מִשְׁלֵי Proverbs, אִיּוֹב Job, or more correctly, according to their original sequence, תא״ם (תְּאוֹם *twin*), so that טַעֲמֵי תא״ם means the accents (sing. טַעַם) of these three Books. The latter system is not only richer and more complicated in itself, but also musically more significant than the ordinary accentuation.

---

[1] On the attempts of Christian scholars of the sixteenth century to express the Hebrew accents by musical notes, cf. Ortenberg, *ZDMG.* 1889, p. 534.

[2] At the same time it must not be forgotten that the value of the accent as a mark of punctuation is always relative; thus, e. g. *'Athnâḥ* as regards the logical structure of the sentence may at one time indicate a very important break (as in Gn 1[4]); at another, one which is almost imperceptible (as in Gn 1[1]).

[3] 'Above' in this sense means what comes before, 'below' is what comes after; cf. Bacher, *ZAW.* 1907, p. 285 f.

[4] Cf. Delitzsch on Is 40[18].

I. *The Common Accents.*

Preliminary remark. The accents which are marked as *prepositive* stand to the right over or under the initial consonant of the word; those marked as *postpositive*, to the left over or under the last consonant. Consequently in both cases the tone-syllable must be ascertained independently of the accent (but cf. below, *l*). *e*

A. Disjunctive Accents (*Distinctivi* or *Domini*).[1] *f*

1. (֫) סִלּוּק Sillûq (*end*) always with the tone-syllable of the last word before Sôph pāsûq (׃), the verse-divider, e.g. הָאָרֶץ׃.
2. (֑) אַתְנָח 'Athnâḥ or אַתְנַחְתָּא 'Athnaḥtā (*rest*), the principal divider within the verse.

3 *a*. (֒) סְגוֹלְתָא Segôltā, *postpositive*, marks the fourth or fifth subordinate division, counting backwards from 'Athnâḥ (e.g. Gn 1[7.28]).

3 *b*. (֓) שַׁלְשֶׁלֶת Šalšèleth (i.e. *chain*), as disjunctive, or Great Šalšèleth, distinguished by the following stroke[2] from the conjunctive in the poetic accentuation, is used for

---

[1] All the disjunctives occur in Is 39[2].—The earlier Jewish accentuologists already distinguish between מְלָכִים *Reges* and מְשָׁרְתִים *Servi*. The division of the disjunctive accents into Imperatores, Reges, Duces, Comites, which became common amongst Christian grammarians, originated in the *Scrutinium S. S. ex accentibus* of Sam. Bohlius, Rostock, 1636, and, as the source of manifold confusion, had better be given up. The order of the accents in respect to their disjunctive power is shown in general by the above classification, following Wickes. In respect to the height of tone (in chanting) 1, 2, 5, 4, 8, which were *low* and long sustained notes, are to be distinguished from the *high* notes (7, 3[a], 6, 13, 9), and the highest (3[b], 11, 12, 10); cf. Wickes, ט' כ"א p. 12 ff.—The name טְעָמִים (later = *accents* in general) was originally restricted to the disjunctives, see Kahle, l. c., p. 169.

[2] This stroke is commonly confused with *Paseq*, which has the same form. But Pâsēq (=*restraining, dividing*, also incorrectly called Pᵉsîq) is neither an independent accent, nor a constituent part of other accents, but is used as a mark for various purposes; see the Masoretic lists at the end of Baer's editions, and Wickes, *Accents of the Twenty-one Books*, p. 120 ff., where Pâsēq is divided into *distinctivum, emphaticum, homonymicum*, and *euphonicum*. The conjecture of Olshausen (*Lehrb.*, p. 86 f.), that Pâsēq served also to point out marginal glosses subsequently interpolated into the text, has been further developed by E. von Ortenberg, 'Die Bedeutung des Paseq für Quellenscheidung in den BB. d. A. T.,' in *Progr. des Domgymn. zu Verden*, 1887, and in the article, 'Paseq u. Legarmeh,' in *ZAW.* 1887, p. 301 ff. (but see Wickes, ibid. 1888, p. 149 ff.; also E. König, in the *Ztschr. f. kirchl. Wiss. u. kirchl. Leben*, 1889, parts 5 and 6; Maas, in *Hebraica*, v. 121 ff., viii. 89 ff.). Prätorius, *ZDMG.* 1899, p 683 ff., pointed out that *Paseq* (which is pre-masoretic and quite distinct from *Lᵉgarmēh*) besides being a divider (used especially for the sake of greater clearness) also served as a sign of abbreviation. For further treatment of *Paseq* see H. Grimme, 'Pasekstudien,' in the *Bibl. Ztschr.*, i. 337 ff., ii. 28 ff., and *Psalmenprobleme*, &c., Freiburg (Switzerland), 1902, p. 173, where it is argued that *Paseq* indicates variants in a difficult sentence; J. Kennedy, *The Note-line in the Heb. Scriptures*, Edinb. 1903, with an index of all the occurrences of *Paseq*, p. 117 ff. According to Kennedy the 'note-line', of which he distinguishes sixteen different kinds, is intended to draw attention to some peculiarity in the text; it existed long before the Masoretes, and was no longer understood by them. See, however, the reviews of E. König, *Theol.*

Segôltā (seven times altogether) when this would stand at the head of the sentence; cf. Gn 19[16], &c.

4 *a*. (֫) זָקֵף גָּדוֹל Zâqēph gādôl, and

4 *b*. (֪) זָקֵף קָטוֹן Zâqēph qāṭôn. The names refer to their musical character. As a disjunctive, Little Zâqēph is by nature stronger than Great Zâqēph; but if they stand together, the one which comes first is always the stronger.

5. (֖) טִפְחָא Ṭiphḥā or טַרְחָא Ṭarḥā, a subordinate disjunctive before Sillûq and 'Athnâḥ, but very often the principal disjunctive of the whole verse instead of 'Athnâḥ; always so when the verse consists of only two or three words (e.g. Is 2[18]), but also in longer verses (Gn 3[21]).

6. (֑) רְבִיעַ Rebhîa'.

7. (֒) זַרְקָא Zarqā, *postpositive*.

8 *a*. (֡) פַּשְׁטָא Pašṭā, *postpositive*,[1] and

8 *b*. (֚) יְתִיב Yethîbh, *prepositive*, and thus different from Mehuppākh. Yethîbh is used in place of Pašṭā when the latter would stand on a monosyllable or on a foretoned word, not preceded by a conjunctive accent.

9. (֓) תְּבִיר Tebhîr.

10 *a*. (֥) גֵּרֶשׁ Gèreš or טֵרֵס Ṭères, and

10 *b*. (֜) גְּרֵשַׁיִם Gerāšáyim[2] or Double Gèreš, used for Gèreš, when the tone rests on the ultima, and 'Azlā does not precede.

11 *a*. (֝) פָּזֵר Pâzēr, and

11 *b*. (֞) פָּזֵר גָּדוֹל Pâzēr gādôl (Great Pâzēr) or קַרְנֵי פָרָה Qarnê phārā (*cow-horns*), only used 16 times, for special emphasis.

12. (֟) תְּלִישָׁא גְדוֹלָה Telišā gedôlā or Great Telišā, *prepositive*.

13. (֠) לְגַרְמֵהּ Legarmēh, i.e. Mûnaḥ (see below) with a following stroke.

Stud. u. Krit., 1904, p. 448 ff., G. Beer, *TLZ.* 1905, no. 3, and esp. A. Klostermann, *Theol. Lit.-blatt*, 1904, no. 13, with whom Ginsburg agrees (*Verhandlungen des Hamb. Or.-kongresses von 1902*, Leiden, 1904, p. 210 ff.) in showing that the tradition with regard to the 479 or 480 uses of *Paseq* is by no means uniform. The purpose of *Paseq* is clearly recognizable in the five old rules: as a divider between identical letters at the end and beginning of two words; between identical or very similar words; between words which are absolutely contradictory (as *God* and *evil-doer*); between words which are liable to be wrongly connected; and lastly, between heterogeneous terms, as 'Eleazar the High Priest, and Joshua'. But the assumption of a far-reaching critical importance in *Paseq* is at least doubtful.—Cf. also the important article by H. Fuchs, 'Pesiq ein Glossenzeichen,' in the *Vierteljahrsschrift f. Bibelkunde*, Aug. 1908, p. 1 ff. and p. 97 ff.

[1] If the word in question has the tone on the penultima, Pašṭā is placed over it also, e.g תֹהוּ Gn 1[2]; cf. below, *l*.

[2] Wickes requires Geršáyim (גֶּרְשַׁיִם).

B. Conjunctive Accents (*Conjunctivi* or *Servi*). *g*

14. (ֽ) מוּנַח Mûnaḥ.
15. (ֽ) מְהֻפָּךְ Meḥuppākh or מַהְפָּךְ Mahpākh.
16 *a*. (ֽ) מֵירְכָא or מֵאִרְכָא Mêrᵉkhā, and
16 *b*. (ֽ) מֵ׳ כְּפוּלָה Mêrᵉkhā khᵉphûlā or Double Mêrᵉkhā.
17. (ֽ) דַּרְגָּא Dargā.
18. (ֽ) אַזְלָא 'Azlā, when associated with Gèreš (see above) also called Qadmā.
19. (ֽ) תְּלִישָׁא קְטַנָּה Telišā qᵉṭannā or Little Telišā, *postpositive*.
20. (ֽ) גַּלְגַּל Galgal or יֶרַח Yèraḥ.
[21. (ֽ) מְאַיְלָא Me'ayyelā or מָאֲיֵלָא Mâyᵉlā, a variety of Ṭiphḥa, serves to mark the secondary tone in words which have Sillûq or 'Athnâḥ, or which are united by Maqqēph with a word so accentuated, e.g. וַיֵּצֵא־נֹחַ Gn 8¹⁸.]

II. *The Accents of the Books* חא״ם.

A. Distinctivi. *h*

1. (ֽ) Sillûq (see above, I, 1).
2. (ֽ) עוֹלֶה וְיוֹרֵד 'Ôlè wᵉyôrēd,[1] a stronger divider than
3. (ֽ) 'Athnâḥ (see above, I, 2). In shorter verses 'Athnâh suffices as principal distinctive; in longer verses *'Ôlè wᵉyôrēd* serves as such, and is then mostly followed by 'Athnâḥ as the principal disjunctive of the second half of the verse.
4. (ֽ) Rᵉbhîa' gādôl (Great Rᵉbhîa').
5. (ֽ) Rᵉbhîa' mugrāš, i.e. Rᵉbhîa' with Gèreš on the same word.
6. (ֽ) Great Šalšèleth (see above, I. 3 *b*).
7. (ֽ) צִנּוֹר Ṣinnôr (Zarqā), as *postpositive*, is easily distinguished from צִנּוֹרִית Ṣinnôrîth similarly placed, which is not an independent accent, but stands only over an open syllable before a consonant which has Mêrᵉkhā or Mahpākh.
8. (ֽ) Rᵉbhîa' qāṭôn (Little Rᵉbhîa') immediately before 'Ôlè wᵉyôrēd.
9. (ֽ) דְּחִי Dᵉḥî or Ṭiphḥā, *prepositive*, to the right underneath the initial consonant, e.g. הַגּוֹי (consequently it does not mark the tone-syllable).

[1] Wrongly called also Mêrᵉkhā mᵉhuppākh (*Mêrᵉkha mahpakhatum*), although the accent underneath is in no way connected with Mêrᵉkhā; cf. Wickes, l. c., p. 14.

10. (֯) Pâzēr (see above, I, 11 *a*).

11 *a*. (|֯) Meḥuppākh legarmēh, i.e. Mahpākh with a following stroke.

11 *b*. (|֪) 'Azlā legarmēh, i.e. 'Azlā with a following stroke.

i B. Conjunctivi.

12. (֮) Mêreḵhā (see above, I. 16 *a*).

13. (֫) Mûnaḥ (see above, I. 14).

14. (֥) עִלּוּי 'Illûy or Mûnaḥ superior.

15. (֖) טַרְחָא Ṭarḥā (under the tone-syllable, and thus easily distinguished from No. 9).

16. (֬) Galgal or Yèraḥ (see above, I. 20).

17. (֭) Meḥuppākh or Mahpākh (see above, I. 15).

18. (֪) 'Azlā (see above, I. 18).

19. (֯) Šalšèleth qeṭannā (Little Šalšèleth).

The last three are distinguished from the disjunctives of the same name by the absence of the stroke.

[20. (֓) Ṣinnôrîth, see above under No. 7.]

Remarks on the Accents.

I. *As Signs of the Tone.*

k 1. As in Greek and English (cf. *εἰμί* and *εἶμι*, *cómpact* and *compáct*) so also in Hebrew, words which are written with the same consonants are occasionally distinguished by the position of the tone, e.g. בָּנוּ *banú* (they built), בָּנוּ *bánu* (in us); קָמָה *qáma* (she stood up), קָמָה *qamá* (standing up, *fem.*).

l 2. As a rule the accent stands on the tone-syllable, and properly on its initial consonant. In the case of prepositives and postpositives alone (see above, *e*) the tone-syllable must be ascertained independently of the accent. In many MSS. as well as in Baer's editions of the text, the postpositive sign in foretoned words stands also over the tone-syllable after the analogy of Paṣṭā (see above, I. 8 *a*, note); e.g. טָרֵם יִשְׁכָּבוּ Gn 19[4]; so the prepositive sign in cases like וַיְהִי Gn 8[13].

II. *As Signs of Punctuation.*

m 3. In respect to this use of the accents, every verse is regarded as a period which closes with Sillûq, or in the figurative language of the grammarians, as a province (*ditio*) which is governed by the great distinctive at the end. According as the verse is long or short, i.e. the province great or small, there are several subordinate *Domini* of different grades, as governors of greater and smaller divisions. When possible, the subdivisions themselves are also split up into parts according to the law of dichotomy (see Wickes, *The Accents of the Twenty-one Books*, p. 29 ff).—When two or more *equivalent* accents (Zâqēph, Rebhîa') occur consecutively, the accent which precedes marks a greater division than the one which follows; cf. e.g. the Zâqēph, Gn 1[20 *a*].

n 4. In general a conjunctive (*Servus*) unites only such words as are closely connected in sense, e.g. a noun with a following genitive or a noun with an

adjective. For the closest connexion between two or more words *Maqqēph* is added (§ 16 *a*).

o 5. The consecution of the several accents (especially the correspondence of disjunctives with their proper conjunctives) conforms in the most minute details to strict rules, for a further investigation of which we must refer to the above-mentioned works. Here, to avoid misunderstanding, we shall only notice further the rule that in the accentuation of the books תא״ם, the *Rᵉbhiᶜa mugrāš* before *Silluq*, and the *Dᵉḥi* before *'Athnāḥ*, must be changed into conjunctives, unless at least two toneless syllables precede the principal disjunctive. For this purpose Šᵉwâ *mobile* after Qameṣ, Seré, or Ḥolem (with Metheg) is to be regarded as forming a syllable. After 'Ôlè wᵉyôrēd the 'Athnāḥ does not necessarily act as pausal (cf. Delitzsch on ψ 45[6]). The condition of our ordinary texts is corrupt, and the system of accents can only be studied in correct editions [see Wickes' two treatises].

p 6. A double accentuation occurs in Gn 35[22], from וישכב onward (where the later accentuation, intended for public reading, aims at uniting vv. 22 and 23 into *one*, so as to pass rapidly over the unpleasant statement in v. 22); and in the Decalogue, Ex 20[2 ff.]; Dt 5[6 ff.]. Here also the later (mainly superlinear) accentuation which closes the first verse with עברים (instead of פני) is adopted simply for the purposes of public reading, in order to reduce the original twelve verses (with sublinear accentuation) to ten, the number of the Commandments. Thus עֲבָדִים at the end of v. 2 has Silluq (to close the verse) in the lower accentuation, but in the upper, which unites vv. 2-6 (the actual words of God) into a single period, only Rᵉbhiᶜa. Again פְּנֵי, regarded as closing v. 3, is pointed פָּנֵי (pausal Qameṣ with Silluq), but in the upper accentuation it is פָּנַי with Pathaḥ because not in pause. (Originally there may have been a third accentuation requiring עֲבָדִים and פָּנֵי, and thus representing vv. 2 and 3 as the first commandment.) Further the upper accentuation unites vv. 8–11 into one period, while in vv. 12–15 the lower accentuation combines commandments 5–8 into one verse. Cf. Geiger, *Urschrift u. Übersetzungen der Bibel*, p. 373; Japhet, *op. cit.*, p. 158, and esp. K. J. Grimm, *Johns Hopkins Univ. Circ.* xix (May, 1900), no. 145.

§ 16. *Of Maqqēph and Mèthĕg.*

These are both closely connected with the accents. *a*

1. Maqqēph (מַקֵּף i.e. *binder*) is a small horizontal stroke between the upper part of two words which so connects them that in respect of tone and pointing they are regarded as one, and therefore have only one accent. Two, three, or even four words may be connected in this way, e.g. כָּל־אָדָם *every man*, אֵת־כָּל־עֵשֶׂב *every herb*, Gn 1[29], אֵת־כָּל־אֲשֶׁר־לוֹ *all that he had*, Gn 25[5].

b Certain monosyllabic prepositions and conjunctions, such as אֶל־ *to*, עַד־ *until*, עַל־ *upon*, עִם־ *with*, אַל־ *ne*, אִם־ *if, whether*, מִן־ *from*, פֶּן־ *lest*, are almost always found with a following Maqqēph, provided they have not become independent forms by being combined with prefixes, e.g. מֵעַל, מֵעִם, in which case Maqqēph as a rule does not follow. Occasionally Maqqēph is replaced by a conjunctive accent (see above, § 9 *u*, 1 *c*), as, according to the Masora, in Dt 27[9], 2 S 20[23], Jer 25[30], 29[25], Ec 9[4] in the case of אֶל־ כָּל; ψ 47[5], 60[2], Pr 3[12] in the case of אֶת־, the objective particle. Longer words are, however, con-

nected by Maqqēph with a following monosyllable, e.g. הִתְהַלֶּךְ־נָ֫חַ Gn 6^{9}, שִׁבְעָה־עָשָׂר וַיְהִי־כֵן Gn 1^{7}; or two words of more than one syllable, e.g. *seventeen*, Gn 7^{11}. Cf. the Greek proclitics *ἐν, ἐκ, εἰς, εἰ, ὡς, οὐ*, which are *atonic*, and lean on the following word.

c **2.** Mètheg (מֶתֶג i.e. *a bridle*), a small perpendicular stroke under the consonant to the left of the vowel, indicates most frequently the secondary stress or counter-tone, as opposed to the principal tone marked by the accents. It serves, however, in other cases to point out that the vowel should not be hastily passed over in pronunciation, but should be allowed its full sound. Hence other names of *Mètheg* are *Ma'ᵃʿrîkh*, i.e. *lengthener*, and *Ga'yā*, i.e. *raising* of the voice, which is *Great Ga'yā* with long vowels, otherwise *Little Ga'yā*.[1]

d It is divided into: 1. The *light Mètheg*. This is subdivided again into (*a*) the ordinary Mètheg of the counter-tone, as a rule in the second (open) syllable before the tone, e.g. הָאָדָם (cf. also such cases as מֶלֶךְ־צֹר); but also in the third when the second is closed, e.g. הָאַרְבָּעִים (also in such cases as עֶבֶד־הַמֶּלֶךְ), and when the third is not suitable for it, even in the fourth (open) syllable before the tone. This Mètheg may be repeated in the fourth syllable before the tone, when it already stands in the second, e.g. שִׁבְעָתַיִם. Finally it is always added to the vowel of an open ultima, which is joined by Maqqēph to a word beginning with a toneless syllable and so without Mètheg (e.g. בְּנֵי־יִשְׂרָאֵל, on the other hand רִשְׁפֵי־קֶשֶׁת, לֹא־אֶהְיֶה), or to a word beginning with *Šᵉwâ* before the tone-syllable, e.g. מִי־לְךָ, שְׁלֹמֹה־בְּנִי, &c.; the object being to prevent the *Šᵉwâ* from becoming *quiescent*.

e The ordinary *light Mètheg* is omitted with a movable וְ *copulative*, consequently we do not find וּבָנִים, &c. (nor even וְבָנַי, &c., contrary to *b*, *a*; but וְזָהָב, &c., according to *b*, *δ*, cf. § 10 *g*. *b*).

f (*b*) The *firm* or *indispensable Mètheg*. (*a*) With all long vowels (except in certain cases, וְ *copulative*, see above), which are followed by a *Šᵉwâ mobile* preceding the tone-syllable; e.g. יִרְאוּ, יִשְׁנוּ, &c. (*β*) To emphasize a long vowel in a closed syllable immediately before Maqqēph, e.g. שָׁת־לִי Gn 4^{25} (not *šŏth-li*); hence also with כָּל־ *ψ* 138^{2}, and אֶת־ Jb 41^{26} (for כֹּל־ and אֵת־; cf. also מֵאֵת־ Jo 15^{18}, &c.). (*γ*) With Ṣere, which has become toneless through retraction of the tone, in order to prevent its being pronounced as *Sᵉghôl*, e.g. אֹהֵב דֵּעַת Pr 12^{1} (not *'ôhĕbh*). (*δ*) With all vowels before composite *Šᵉwâ*, e.g. יַעֲמֹד, צְעָקִים, &c. (except when the following consonant is strengthened, e.g. יְקַבְּנוּ Is 62^{2}, because the strengthening by *Dageš* excludes the retarding of the vowel by *Mètheg*); so in the cases discussed in § 28 *c*, where a short vowel has taken the place of a Ḥaṭeph, as יַעַמְדוּ, &c. (*ε*) In the preformative syllable of all forms of הָיָה *to be*, and חָיָה *to live*, when *Šᵉwâ quiescens* stands under the ה or ח, e.g. יִהְיֶה, תִּחְיֶה (*yih-yè*, *tiḥ-yè*), &c., cf.

[1] Cf. as the source of this account of *Mètheg*, the exhaustive treatment by S. Baer, 'Mètheg-Setzung nach ihren überlieferten Gesetzen,' in A. Merx's *Archiv für die wissenschaftl. Erforschung des A. Test.*, Heft i, Halle, 1867, p. 56 ff., and Heft ii. 1868, p. 194 ff.; Baer and Strack, *Dikduke ha-ṭᵉamim*, p. 30 ff.

§ 63 *q*. (ʃ) With the Qameṣ of the plural forms of בַּיִת *house* (thus בָּתִּים *bâttîm*, cf. § 96 under בַּיִת), and with אָנָּה [1] *prithee!* to guard against the pronunciation *bŏttîm*, *ŏnnā*.—Every kind of light Mèthĕg may in certain circumstances be changed into a conjunctive accent, e. g. בְּתִּים 2 Ch 34[11], &c.

g 2. The *grave Mèthĕg* (*Ga'yā* in the more limited sense) is especially employed in the following cases in order more distinctly to emphasize a short vowel or an initial Šᵉwâ: (*a*) with the Pathaḥ of the article or of the prefixes ב, כ, ל, when followed by *Šᵉwâ* under a consonant without *Dageš*, e. g. הַמְּסִלָּה, לַמְּסִלָּה, &c., but not before י (before which ַ also remains without *Mèthĕg*, with the exception of וַיְהִי and וַיְחִי, when they are followed by *Maqqēph*, or accented with *Pašṭā*), nor before the tone-syllable of a word, and neither *before* nor *after* the common *Mèthĕg*; likewise not in words which are connected by a conjunctive accent with the following word; (*b*) with the interrogative הַ with *Pathaḥ* (except when it precedes י, *Dageš forte* or the tone-syllable of the word), e. g. הַאֶלֶף. When a *Šᵉwâ* follows the הַ and after the *Šᵉwâ* there is an untoned syllable, Baer places the *Mèthĕg* to the right of the *Pathaḥ*, e. g. הַבְרָכָה Gn 27[38] (but ed. Mant. and Ginsb. הַבְ׳); (*c*) with the Pathaḥ or Sᵉgol of the article before a guttural (which cannot take Dageš), e. g. הָהָרִים, הֶהָרִים.—The *Šᵉwâ-Ga'yā* (ְ) is especially important in the accentuation of the תא״ם, for purposes of musical recitation; it stands chiefly in words whose principal tone is marked by a disjunctive without a preceding conjunctive, e. g. וְהִיא ψ 1[3].

h 3. The *euphonic Ga'yā*, to ensure the distinct pronunciation of those consonants which in consequence of the loss of the tone, or because they close a syllable, might easily be neglected, e. g. וַיִּשְׁכַּב לוֹ Gn 24[9]; פַּדָּנָה אֲרָם (here to avoid a hiatus) 28[2], or in such cases as רוּחַ־אֵל Jb 33[4], &c.; תִּדְשֵׁא Gn 1[11].

i *Mèthĕg* (especially in the cases mentioned in 1, *b*, *a*) is a guide to correct pronunciation, since it distinguishes *ā* from *ŏ* (except in the case noted in § 9 *v*, *b*) and *i* from *ĭ*; e. g. אָכְלָה *'ā-khᵉlā* (she has eaten), but אֹכֶל *'ŏkhlā* (food), since the ֶ stands here in a toneless closed syllable, and must therefore be a short vowel; thus also יִרְאוּ *yi-rᵉ'û* (they fear), but יִרְאוּ *yir'û* (they see), יִשְׁנוּ (they sleep), but יִשְׁנוּ (they repeat). The Jewish grammarians, however, do not consider the syllables lengthened by Mèthĕg as open. They regard the Šᵉwâ as *quiescent* in cases like אָכְלָה, and belonging to the preceding vowel; cf. Baer, *Thorat 'Emeth*, p. 9, and in Merx's *Archiv*, i. p. 60, Rem. 1, and especially *Dikduke ha-ṭᵉamim*, p. 13.

§ 17. *Of the Qᵉrê and Kᵉthîbh. Masora marginalis and finalis.*

On Qᵉrê and Kᵉthîbh see Ginsburg, *Intr.*, p. 183 ff.]

a 1. The margin of Biblical MSS. and editions exhibits variants of an early date (§ 3 *c*), called קְרִי [2] *to be read*, since, according to

[1] The common form is אָנָּא, with an accent on both syllables, in which case, according to Qimḥi, the tone is always to be placed on the former. For the above mode of writing and position of the tone cf. Is 38[3], Jon 1[14], 4[2], ψ 116[4].

[2] On the necessity of the punctuation קְרִי as passive participle (=*legendum*)

the opinion of the Jewish critics, they are to be preferred to the כְּתִיב, i.e. what is *written* in the text, and are actually to be read instead of it.

On this account the vowels of the marginal reading (the *Qerê*) are placed under the consonants of the text, and in order to understand both readings properly, the vowels in the text must be applied to the marginal reading, while for the reading of the text (the *Kethîbh*) its own vowels are to be used. Thus in Jer 42^{6} אֲנַנּוּ occurs in the text, in the margin אנחנו קרי. Read אֲנוּ *we* (or according to Jewish tradition אָנוּ) in the text, in the margin אֲנַחְנוּ. A small circle or asterisk in the text always refers to the marginal reading.

b **2.** Words or consonants which are to be passed over in reading, and are therefore left unpointed, are called כְּתִיב וְלֹא קְרִי (*scriptum et non legendum*), e.g. את Jer 38^{16}, אם 39^{12}, ידרך 51^{3}. Conversely, words not contained in the text, but required by the Masora (as indicated by the insertion of their vowels), are called קְרִי וְלֹא כְתִיב, e.g. 2 S 8^{3}, Jer 31^{38}. See further Strack, *Prolegomena Critica*, p. 85; *Dikduke ha-ṭeamim*, §§ 62, 64; Blau, *Masoretische Untersuchungen*, p. 49 ff.

c **3.** In the case of some very common words, which are *always* to be read otherwise than according to the *Kethîbh*, it has not been considered necessary to place the *Qerê* in the margin, but its vowels are simply attached to the word in the text. This *Qerê perpetuum* occurs in the Pentateuch in הוּא (Qerê הִיא) wherever הוא stands for the feminine (§ 32 *l*), and in נָעַר (Kethîbh נער, Qerê נַעֲרָה) always, except in Dt 22^{19} (but the Sam. text always has היא, נערה). The ordinary explanation of this supposed archaism, on the analogy of Greek ὁ παῖς and ἡ παῖς, our *child*, is inadequate, since there is no trace elsewhere of this epicene use; נער for נערה is rather a survival of a system of orthography in which a final vowel was written defectively, as in קָטַלְתָּ; cf. § 2 *n*.— Other instances are: יְשַׁשְׂכָר (Q. יִשָּׂשכָר) Gn 30^{18} &c., see the *Lexicon*, and Baer and Delitzsch, *Genesis*, p. 84, and below, note to § 47 *b*; יְרוּשָׁלַם (Q. יְרוּשָׁלַיִם), properly יְרוּשָׁלֵם; יְהוָה (Q. אֲדֹנָי *the Lord*), or (after אֲדֹנָי) יֱהוִה (Q. אֱלֹהִים) properly יַהְוֶה *Yahwè* (cf. § 102 *m*, and § 135 *q*, note); on שְׁנִים, שְׁתִּים for שְׁנֵי, שְׁתֵּי, see § 97 *d*, end.

d **4.** The masoretic apparatus accompanying the biblical text is divided into (*a*) *Masora marginalis*, consisting of (*a*) *Masora* (*marginalis*) *magna* on the upper and lower margins of MSS.; (*β*) *Masora* (*marginalis*) *parva* between and on the right and left of the columns;

---

instead of קְרִי *Qeri*, which was formerly common but is properly a past tense (= *lectum est*), see Kautzsch, *Gramm. des Bibl.-Aram.*, p. 81, note.

(*b*) *Masora finalis* at the end of the several books, counting Samuel, Kings, Minor Prophets, Ezra-Nehemiah, Chronicles, each as one book. On all three varieties see especially Ginsburg, *Introd.*, p. 423 ff., and the appendices containing (p. 983 ff.) the masoretic treatise from the St. Petersburg MS. of A.D. 1009, and (p. 1000 ff.) specimens of the *Masora parva* and *magna* on two chapters.

In nearly all printed editions only the *Masora finalis* is found, indicating the number of verses, the middle point of the book, &c., and a scanty selection from the *Masora parva*. The following alphabetical list of technical expressions (some of them Aramaic) and abbreviations, may suffice with the help of the lexicon to elucidate the subject. Further details will be found in the appendix to Teile's edition of the Hebrew O. T., p. 1222 ff. e

אוֹת *letter.* אֶלָּא *nisi, except.* אֶמְצַע *middle.* פ״ס = פְּסוּק אַתְנַח סוֹף in the formula בְּלֹא אס״ף *without 'Athnaḥ* or *Soph-pasuq* i. e. *although no 'Athnaḥ or Soph-pasuq is written.*

בְּ *with,* before names of vowels or accents, as קָמֶץ בְּזָקֵף *Qameṣ with Zaqeph* used instead of Pathaḥ (§ 29 *i*).—ב׳ as a numeral = *two*, as in ב׳ טְעָמִים *two accents.* במקצת, see מִקְצָת. בנ״א = בְּנוּסְחָא אַחֲרִינָא (Aramaic) *in another copy*; pl. בְּנוּסְחָן אַחֲרִינָן.—בס״א = בְּסִפְרִים אֲחֵרִים *in other books.* בָּתַר (Aram.) *after.*

דָּגוּשׁ fem. דְּגוּשָׁה *marked with Dageš* (or *Mappiq*). דַּף *leaf, page.*

זְעִיר fem. זְעִירָא (Aram.) *small.*

חוֹל *profane, not sacred*, e.g. אֲדֹנָי Gn 19² because not referring to God. חוּץ *except.* חָסֵר written *defectively*, also *wanting* as א׳ ח׳ *'aleph is omitted.*

טַעַם *accent* (see ב); טָעַם in Hiphil *to chant an accent.*

יָתֵיר *superfluous.*

כָּאן *here.* כְּלָל (Aram.) *total*, as adv. *in general.*

לֵית = לֵית (Aram., from לָא אִית *non est*) = the form *is not* found elsewhere.

מְדוּיָק *accurately corrected.* מָלֵא *full* i.e. written *plene.* מִלְּמַטָּה *below* = מִלְּרַע (§ 15 *c*). מִלְּמַעְלָה = מִלְּעֵיל (§ 15 *c*). מְנוּקָּדוֹת *separated*, the name of the strangely formed Nûns before ψ 107²³ ff. (§ 5 *n*). מִקְרָא *that which is read*, the name for all the O. T. scriptures. מִקְצָת *part.*

נָח fem. נָחָה *quiescent*, i.e. not sounded. נֶעְלָם *concealed*, i.e. only retained orthographically. נְקוּד *a point.* נָקוּד *pointed.*

ס״א see בְּ. סִימָן *σημεῖον, sign*, esp. *a mnemonic word* or, frequently, *sentence.* סְ׳ = סְכוּם = סך *total.* סוֹף פָּסוּק = ס״ף (§ 15 *f*).

עַמּוּד *column* of a page.

פָּסוּק a masoretic *verse.* פְּסֻקָא *a space*, esp. in the phrase פ׳ בְּאֶמְצַע פָּסוּק *a space within a verse*, e.g. Gn 35²²; cf. H. Grätz, *Monatschrift für Gesch. u. Wiss. des Judentums*, 1878, p. 481 ff., and H. Strack, ibid. 1879, p. 26 ff.

ק׳ = קְרִי, see above, c. קורם properly קֶדֶם *before.* קָמוּץ fem. קְמוּצָה *poin'ed with Qameṣ.* קוֹרֵא *reader* of the sacred text.

רַבְּתָא, רַבְּתִי (Aram, all fem. sing.) *large.*

תֵּיבָה *word* (consisting of more than one letter). תְּלוּיָה *suspensa* (§ 5 *n*, 3). תְּרֵי (Aram.) *two.*

CHAPTER II

PECULIARITIES AND CHANGES OF LETTERS: THE SYLLABLE AND THE TONE

§ 18.

THE changes which take place in the forms of the various parts of speech, depend partly on the peculiar nature of certain classes of letters and the manner in which they affect the formation of syllables, partly on certain laws of the language in regard to syllables and the tone.

§ 19. *Changes of Consonants.*

a The changes which take place among consonants, owing to the formation of words, inflexion, euphony, or to influences connected with the progress of the language, are *commutation, assimilation, rejection, addition, transposition, softening.*

1. *Commutation*[1] may take place between consonants which are either *homorganic* or *homogeneous* (cf. § 6 *q*), e.g. עָלַץ, עָלַם, עָלַז *to exult*, לָאָה, לָהָה, Aram. לְעָא *to be weary*, לָחַץ and נָחַץ *to press*, סָגַר and סָכַר *to close*, מָלַט and פָּלַט *to escape*. In process of time, and partly under the influence of Aramaic, the harder and rougher sounds especially were changed into the softer, e.g. צָחַק into שָׂחַק *to laugh*, נָאַל into נָעַל *to reject*, and the sibilants into the corresponding mutes: ז into ד, שׂ into ת, צ into ט. In many cases these mutes may be regarded as a return to an earlier stage of the pronunciation.

The interchange of consonants, however, belongs rather to the lexicographical treatment of stems[2] than to grammatical inflexion. To the latter belong the interchange (*a*) of ת and ט in *Hithpa'ēl* (§ 54 *b*); (*b*) of ו and י in verbs *primae Yôd* (§ 69), יָלַד for וָלַד, &c.

b 2. *Assimilation* usually takes place when one consonant which closes a syllable passes over into another beginning the next syllable, and forms with it a strengthened letter, as *illustris* for *inlustris, affero* for *adfero*, συλλαμβάνω for συνλαμβάνω. In Hebrew this occurs,

---

[1] Cf. Barth, *Etymologische Forschungen*, Lpz. 1893, p. 15 ff. ('Lautverschiebungen').

[2] See in the *Lexicon*, the preliminary remarks on the several consonants.

(*a*) most frequently with נ, e.g. מִשָּׁם (for *min-šām*) *from there*, מִזֶּה (for *min-zê*) *from this*, יִתֵּן (for *yintēn*) *he gives*. נ is *not* assimilated after the prefix לְ, e.g. לְנֹגַּף, nor as a rule before gutturals (except sometimes before ח), nor when it is the third consonant of the stem, e.g. שָׁכַנְתָּ (cf. however נָתַתָּ for *nāthántā*) except when another *Nun* follows, cf. § 44 *o*; nor in some isolated cases, as Dt 33[9], Is 29[1], 58[3], all in the principal pause; on תִּנְחָף and תִּנְחָף ψ 68[3], see § 51 *k*, and § 66 *f*. *c*

(*b*) Less frequently and only in special cases with ל, ת, ד, e.g. יִקַּח (for *yilqaḥ*) *he takes*; מִדַּבֵּר for *mithdabbēr*; יַטַּמָּא for *yithṭammā*; תִּבוֹנֵן for *tithkônēn*; תִּנַּשֵּׂא for תִּתְנַשֵּׂא; אַחַת for *'aḥadt*; but in 1 S 4[19] for לָלַת read probably לָלֶדֶת. *d*

(*c*) In isolated cases with ה, ו, י, e.g. אָנָּא *prithee!* if from אָהּ נָא; ו and י mostly before sibilants in the verbal forms enumerated in § 71. *e*

In all these cases, instead of the assimilated letter, a *Dageš forte* appears in the following consonant. *Dageš*, however, is omitted when the strengthened consonant would stand at the end of a word, since the strengthening would then be less audible (§ 20 *l*), e.g. אַף *nose* (from *'anp*), תֵּת *to give* (from *tint*). *f*

The cases are less frequent where a weak letter is lost in pronunciation,[1] and in place of it the preceding stronger sound is sharpened, i. e. takes *Dageš*, e.g. קְטָלַתְּהוּ from קְטָלַתָּהוּ (§ 59 *g*). אֶסְלַק for אֶסְקַל (§ 66 *e*) is an Aramaism.

3. Complete *rejection* takes place only in the case of weaker consonants, especially the sonants נ and ל, the gutturals א and ה, and the two half vowels ו and י. Such rejection takes place, *g*

(*a*) at the beginning of a word (*aphaeresis*), when these weak consonants (א, י, ל, נ) are not supported by a full vowel, but have only Šewâ, e.g. נַחְנוּ *we*, also אֲנַחְנוּ; דַּע for וְדַע; קַח for לָקַח; גַּשׁ for נְגַשׁ, הִי for נְהִי Ez 2[10]. *h*

Aphaeresis of a weak consonant with a full vowel is supposed to occur in רַד Ju 19[11] for יָרַד; in תַּתָּה 2 S 22[41] for נָתַתָּה; in שׁוֹב for יָשׁוֹב Je 42[10]; on קָח Ez 17[6] for לָקַח, and on קָחֶם Ho 11[3] for לָקָחֶם, see § 66 *g*, end. In reality, however, all these forms are to be regarded merely as old textual errors. *i*

(*b*) In the middle of a word (*syncope*), when Šewâ precedes the weak consonant[2]; thus in the case of א (see further § 23 *b–f*, and *k*

[1] Such a suppression of a letter is sometimes inaccurately called 'backward assimilation'.

[2] Syncope of a strong consonant (ע) occurs in בִּי *prithee!* if this stands for בְּעִי (see *Lexicon*), also in ונשקה Am 8[8], *K'thibh* for וְנָשְׁקָעָה (cf. וְשָׁקְעָה 9[5]), and

§ 68 *b–k*), e.g. in מוּם for מְאוּם. As a rule in such cases, however, the א is orthographically retained, e.g. לִקְרַאת for לִקְרָאת. Syncope occurs frequently in the case of ה, e.g. לַמַּלְכָּה for לְהַמְלִיכָהּ (§ 23 *k* and § 35 *n*), יַקְטִל for יַהְקְטִיל (§ 53 *a*).

Syncope of א with Šewâ occurs in such cases as בַּאֲדֹנָי for בַּאֲדֹנָי (cf. § 102 *m*); וַאֲעַשֶּׂר Zc 11[5].[1] On the cases in which א is wholly omitted after the article, see § 35 *d*.

Finally, the elision of ו and י in verbs ל״ה (§ 75 *h*) is an instance of syncope.—On the syncope of ה between two vowels, see § 23 *k*.

l (*c*) At the end of a word (*apocope*), e.g. גִּלֹה pr. name of a city (cf. גִּילֹנִי Gilonite); וַיִּרָא, where א though really rejected is orthographically retained, &c. On the apocope of ו and י in verbs ל״ה, see § 24 *g*, and § 75 *a*.

Bolder changes (especially by violent apocope), took place in earlier periods of the language, notably the weakening of the feminine ending ת_ *ath* to ה_ $_{\tau}$ *ā*, see § 44 *a*, and § 80 *f*.

m **4.** To avoid harshness in pronunciation a helping sound, Aleph prosthetic[2] with its vowel, is prefixed to some words, e. g. אֱזרוֹעַ and זְרוֹעַ *arm* (cf. χθές, ἐχθές; *spiritus*, French *esprit*).—A prosthetic ע occurs probably in עַקְרָב *scorpion*; cf. Arab. *'usfûr* bird (stem *ṣafara*).

n **5.** *Transposition*[3] occurs only seldom in the grammar, e. g. הִשְׁתַּמֵּר for הִתְשַׁמֵּר (§ 54 *b*) for the sake of euphony; it is more frequent in the lexicon (כֶּבֶשׂ and כֶּשֶׂב *lamb*, שִׂמְלָה and שַׂלְמָה *garment*), but is mostly confined to sibilants and sonants.

o **6.** *Softening* occurs e.g. in כּוֹכָב *star*, from *kaukabh*=*kawkabh* for *kabhkabh* (cf. Syriac *raurab*=*rabrab*); טוֹטָפוֹת *phylacteries* for *ṭaphṭâphôth*; according to the common opinion, also in אִישׁ *man* from *'inš*, cf. however § 96.

§ 20. *The Strengthening (Sharpening) of Consonants.*

a **1.** The strengthening of a consonant, indicated by *Dageš forte*, is necessary and essential (*Dageš necessarium*)

(*a*) when the same consonant would be written twice in succession

---

in בָּלָה Jos 19[3] for בְּעָלָה (as in 15[29]). Probably, however, ונשקה and בלה are only clerical errors, as is undoubtedly כָּאֹר Am 8[8] for כַּיְאֹר (9[5]).

[1] Frensdorff, *Ochla W'ochla*, p. 97 f., gives a list of forty-eight words with quiescent א.

[2] This awkward term is at any rate as suitable as the name *Alef protheticum* proposed by Nestle, *Marginalien u. Materialien*, Tübingen, 1893, p. 67 ff.

[3] Cf. Barth, *Etymologische Studien*, Lpz. 1893, p. 1 ff.; Königsberger, in *Zeitschrift f. wissenschaftliche Theologie*, 1894, p. 451 ff.

without an intermediate vowel or *Šᵉwâ mobile*; thus we have נָתַנּוּ for נָתַנְנוּ *nāthăn-nû* and שַׁתִּי for שַׁתְתִּי.

(*b*) in cases of assimilation (§ 19 *b–f*), e.g. יִתֵּן for *yintēn*.

In both these cases the *Dageš* is called *compensativum*.

(*c*) When it is characteristic of a grammatical form, e.g. לָמַד *he has learned*, לִמֵּד *he has taught* (*Dageš characteristicum*). In a wider sense this includes the cases in which a consonant is sharpened by Dageš forte, to preserve a preceding short vowel (which in an open syllable would have to be lengthened by § 26 *e*), e.g. גְּמַלִּים *camels* for *gᵉmālîm*; cf. § 93 *ee* and *kk*, § 93 *pp*.

b This coalescing of two consonants as indicated above does not take place when the first has a vowel or *Šᵉwâ mobile*. In the latter case, according to the correct Masora, a *compound Šᵉwâ* should be used, preceded by *Methĕg*, e.g. קְלָלַת, הוֹלְלִים, &c. (cf. §§ 10*g*, 16*f*). This pointing is not used before the suffix ךָ, e.g. תְּבָרֶכְךָּ Gn 27⁴, but the first כ has a *vocal Šᵉwâ*, otherwise the second כ would have *Dageš lene*. Also when the former of the two consonants has been already strengthened by *Dageš forte*, it can only have a *vocal Šᵉwâ*, and any further contraction is therefore impossible. This applies also to cases where *Dageš forte* has been omitted (see below, *m*), e.g. הַלְּלוּ properly הַלְלְוּ = *hal-lᵉlû*. The form חָנַּנְנִי ψ 9¹⁴ (not חָנְנֵנִי) might be explained as imperat. Pi'ēl = חַנֵּנְנִי; if it were imperat. *Qal* the non-contraction of the monosyllabic root would be as strange as it is in שָׁרְדוּ Jer 49²⁸, and in the imperf. יְשָׁרְדֵם Jer 5⁶.

c **2.** A consonant is sometimes strengthened merely for the sake of *euphony* (*Dageš euphonicum*), and the strengthening is then not so essential. This occurs[1]—

(*a*) when two words are closely united in pronunciation by *Dageš forte conjunctivum*: (1) in the first letter of a monosyllable or of a word having the tone (or occasionally the counter-tone) on the first syllable,[2] when closely connected with the preceding word, if that word ends in a tone-bearing *Qameṣ* (ה֫) with *Šᵉwâ mobile* preceding, or a tone-bearing ה֥,—called דְּחִיק (i. e. *compressed*) by the Jewish grammarians.

The term monosyllable here and in *f* (by § 28 *e*) includes Segholates like פֶּסֶל, שַׁחַר, &c., as well as forms like פְּרִי, שְׁאֹל, שְׁמוֹ, and even בְּנַעַן.

---

[1] Cf. Baer, 'De primarum vocabulorum literarum dagessatione,' in his *Liber Proverbiorum*, Lpz. 1880, pp. vii–xv; F. Prätorius, 'Über den Ursprung des Dag. f. conjunctivum,' in *ZAW.* 1883, p. 17 ff. (ascribed to an original assimilation of ת or נ).

[2] לֵאמֹר alone, although having the tone on the ultima, invariably takes the *Dageš forte conj.* when מֹשֶׁה with a conjunctive accent precedes, Ex 6¹⁰·²⁹, 15²⁴, &c.

Some limit the use of the *Dᵉḥiq* to the closest connexion of a monosyllable with a following *Bᵉgadkᵉphath*. However, it also applies to cases like לְכָה־נָּא Nu 22⁶; לִקְרָאתֹ־זֹאת Gn 2²³; יְצִיהֶ־לָּךְ ψ 91¹¹; and even with *Rĕš*, מַעֲנַה־רַךְ Pr 15¹; וּמִשְׁנֵה־כֶּסֶף Gn 43¹⁵. In all these examples the tone, were it not for the Maqqēph, would be on the ultima of the first word.

d Rem. 1. When זֶה *this* has *Maqqēph* after it, a *Dageš forte conj.* always follows, even if the next word is neither a monosyllable nor has the tone on the initial syllable; thus not only in וְזֶה־שָּׁמוֹ Jer 23⁶, but also in וְזֶה־פְּרִיהָ Nu 13²⁷, 1 Ch 22¹. In הִנֵּה נָּא־ Gn 19² (where Maqqēph is represented by a conjunctive accent, § 9 *u*, 1 *c*, and § 16 *b*), the Sᵉghôl coincides with the secondary tone-syllable. On the origin of *Dag. f. conj.* after מַה־ (for מָה) *what?*, see § 37 *b*, *c*.

e 2. Such cases as נָאוָה נָּאוָה Ex 15¹·²¹, the 2nd כָּמֹכָה in ver. 11, נָּאלְתָּ ver. 13, כָּאגְבָן ver. 16, do not belong here. In these the *Dageš* can only be intended for *Dag. lene*, see § 21 *d*.

f (2) In the first letter of a monosyllable, or of a word with the tone on the first syllable after a closely connected *mil'êl* ending in ־ֶה or ־ָה. Such a mil'êl is called by the Jewish grammarians אָתֵי מֵרַחַיק (Aram. = Heb. אֹתָה מֵרָחוֹק) *veniens e longinquo* (in respect of the tone). The attraction of the following tone-syllable by *Dageš forte conj.* is here also due to the exigencies of rhythm, e. g. שֶׁבִּיתָ שֶּׁבִי ψ 68¹⁹; הוֹשִׁיעָה נָּא ψ 118²⁵ (so ed. Mant., but Ginsburg and Kittel הוֹשִׁיעָה נָּא); הִרְחִיבָה שְׁאוֹל Is 5¹⁴; אַרְצָה כְּנַעַן Gn 11³¹. The Mil'êl may, however, also be due to a subsequent retraction of the tone (*nāsôg 'aḥôr*, § 29 *e*), as in עֲשֵׂה פְּרִי Gn 1¹¹.—The prefixes בְּ, כְּ, לְ and וְ alone do not take a Dageš in this case, except in לְךָ, always, and לְלֵילָה ψ 19³. Such forms as הִשְׁכִּיעָה לִי Gn 21²³, מְלֵאָה שְׂחַק ψ 26¹⁰, רְחֵקָה מֶנִּי Jb 21¹⁶, and even נַעֲמָדָה יַחַד Is 50⁸ (i. e. the cases where the tone is thrown back from the ultima on to the syllable which otherwise would have *Metheg*), are likewise regarded as *mil'êl*. On the other hand, e. g. חֲרֵה לָךְ Gn 4⁶, not לָךְ since the first *ā* of חָרָה could not have *Metheg*. When words are closely united by *Maqqēph* the same rules apply as above, except that in the first word *Metheg*, in the secondary tone, takes the place of the accent, cf. עֲשֵׂה־פְּרִי Gn 1¹²; הַגִּידָה־נָּא Gn 32³⁰, &c. Finally, the *Dageš* is used when the attracted word does not begin with the principal tone, but with a syllable having *Metheg*, הֻפַּח יֻרְשַּׁשׁ ψ 37⁹; אֻלֵּה יַעֲקֹב Is 44²¹; עֲשִׂיתָ קְעָרֹתָיו Ex 25²⁹, provided that the second word does not begin with a *Bᵉgadkᵉphath* letter (hence e. g. אֻלֵּה תּוֹלְדוֹת Gn 2⁴).

g Rem. Such cases as קְבָרְךָ Dt 32⁶, and כְּשִׂיתָ 32¹⁵, and נָעוֹת (so Baer, but not ed. Mant., &c.) 1 S 1¹³ are therefore anomalous; also, because beginning with

a B^egadk^ephath, בָּאֵלֶּם Ex 15[11] (cf. however above, *e*); תֵּל־ Jos 8[28]; בְּוֹרֹעַ ψ 77[16]; כֵּן־הִיא Jb 5[27].—It is doubtful whether we should include here those cases in which *Dageš forte* occurs after a word ending in a toneless *û*, such as קוֹמוּ צְאוּ Gn 19[14], Ex 12[31]; Ex 12[15] (שְׁאֹר), Dt 2[24]; also לֹא Gn 19[2], 1 S 8[19]; לוֹ Ju 18[19], Est 6[13] (where P. Haupt regards the *Dageš* as due to the enclitic character of the לו); מְעָט Ho 8[10]; גְּרוּ Jer 49[30]; דְּרוּ 1 S 15[6]. When we explained the *Dageš* in these examples not as conjunctive, but orthophonic (see above, § 13 *c*, and Delitzsch, *Psalmen*, 4th ed. on ψ 94[12 a]), we especially had in view those cases in which the consonant with *Dageš* has a *Šᵉwâ*. The extension of the use of *Dageš* to consonants with a strong vowel, seems, however, to indicate that these are cases of the אָתֵי מְרַחִיק, which was required by some Masoretes but not consistently inserted. On the other hand, the *Dageš forte* in י after a preceding *î* (ψ 118[5.18]), and even after *û* (ψ 94[12]), is due to an attempt to preserve its consonantal power; see König, *Lehrgeb.*, p. 54 *b*.

h (*b*) When a consonant with *Šᵉwâ* is strengthened by *Dageš forte dirimens* to make the *Šᵉwâ* more audible. In almost all cases the strengthening or sharpening can be easily explained from the character of the particular consonant, which is almost always a sonant, sibilant, or the emphatic *Qôph*; cf. עִנְּבִי Lv 25[5], Dt 32[32] (for עִנְבִי); בַּנְּחָךְ Is 33[1] (where, however, בְּבָלּוֹתְךָ is to be read); cf. Na 3[17], Jb 9[18], 17[2], Jo 1[17] (with מ); Is 57[6] (with ל); Ju 20[43],[1] 1 S 1[6] (with ר); Gn 49[10.17] (and so always in עֻקְּבִי Ju 5[22], Ct 1[8] and עֻקְּבוֹת ψ 77[20], 89[52]); Ex 15[17], Dt 23[11], Ju 20[32], 1 S 28[10] (ק)[2]; Ex 2[3], Is 58[3], Am 5[21], ψ 141[3], Pr 4[13] (צ); Pr 27[25] (שׁ); Is 5[28], ψ 37[15], Jer 51[56], Neh 4[7] (שׁ). Also, with כ Ho 3[2]; with ב Is 9[3], Jer 4[7]; with ת 1 S 10[11]. In many instances of this kind the influence of the following consonant is also observable.

i (*c*) When a vowel is to be made specially emphatic, generally in the principal *pause*, by a *Dageš forte affectuosum* in the following consonant. Thus in a following sonant, Ju 5[7] (חָדְלוּ), Jb 29[21] (וְיִחֲלוּ), 22[12] (רְמוּ); Ez 27[19] (in נ); in ת Is 33[12], 41[17], Jer 51[58], perhaps also Jb 21[13] (יְחַתּוּ).

k (*d*) When the sonants ל, מ, נ are strengthened by *Dageš forte firmativum* in the pronouns הַמָּה, הַנָּה, אַלֶּה, and in לָמָּה *why?* cf. also בַּמֶּה, בַּמָּה *whereby?* כַּמָּה *how much?* (§ 102 *k*, *l*), to give greater firmness to the preceding tone-vowel.

l 3. Omission of the strengthening, or at least the loss of the *Dageš forte* occurs,

(*a*) *almost always* at the end of a word, since here a strengthened

[1] The ordinary reading הִרְרִיפֻהוּ, where ר is without *Dageš*, is only intelligible if the ר has *Dageš*.

[2] Also in ψ 45[10] read בְּיִקְרוֹתָיִךְ with Baer and Ginsburg, following Ben Asher, and in Pr 30[17] לְיִקְהַת (Ben Naphthali בְּיִקְ and לְיִקְ).

consonant cannot easily be sounded.[1] In such cases the preceding vowel is frequently lengthened (§ 27 *d*), e. g. רַב *multitude*, from רבב; עָם *people*, with a distinctive accent or after the article, הָעָם, from עמם; but e. g. גַּן *garden*, בַּת *daughter*, with the final consonant virtually sharpened. On the exceptions אַתְּ *thou* (fem.) and נָתַתְּ *thou* (fem.) *hast given* Ez 16[33], see § 10 *k*.

m (*b*) Very frequently in certain consonants with *Šᵉwâ mobile*, since the absence of a strong vowel causes the strengthening to be less noticeable. This occurs principally in the case of ו and י (on וְ and יְ after the article, see § 35 *b*; on יְ after מַה־, § 37 *b*); and in the sonants מ,[2] נ and ל; also in the sibilants, especially when a guttural follows (but note Is 62[9], מְאַסְפָיו, as ed. Mant. and Ginsb. correctly read, while Baer has מְאָסְפָיו with compensatory lengthening, and others even מָאְסְפָיו; מְשְׁמַנֵּי Gn 27[28.39]; מְשְׁלֹשׁ 38[24] for מִשְׁלֹשׁ, הַשְׁלַבִּים 1 K 7[28]; מְשְׁהִים 1 K 19[20] from נָשַׁהּ, הַשְׁפַּתַּיִם Ez 40[43] and לַשְׁפַּנִּים ψ 104[18]; אֶשְׁקָה־ Jon 4[11], הַצְפַרְדְּעִים Ex 8[1] &c.);—and finally in the emphatic ק.[3]

Of the *Bᵉgadkᵉphath* letters, ב occurs without *Dageš* in מִבְצִיר Ju 8[2]; נ in מִנְּבוּרָתָם Ez 32[30]; ד in נִדְחֵי Is 11[12] 56[8], ψ 147[2] (*not* in Jer 49[36]), supposing that it is the Participle Niph'al of נָדַח; lastly, ת in תִּתְצוּ Is 22[10]. Examples, עֲוִרִים, וַיְהִי (so always the preformative יְ in the *imperf.* of verbs), מִלְּמַעְלָה, הַלָּלוּ, הִנֵּנִי, לְמֻנַּצֵּחַ, מִלְּאוּ, כְּסֹאִי, יִשְׁאוּ, יִקְחוּ, מַקְצֵה, מַקְלוֹת, &c. In correct MSS. the omission of the *Dageš* is indicated by the *Rāphè* stroke (§ 14) over the consonant. However, in these cases, we must assume at least a *virtual* strengthening of the consonant (*Dageš forte implicitum*, see § 22 *c*, end).

(*c*) In the Gutturals, see § 22 *b*.

n Rem. 1. Contrary to rule the strengthening is omitted (especially in the later Books), owing to the lengthening of the preceding short vowel, generally *hireq* (cf. *mîle* for *mille*), e. g. יְחִיתָן *he makes them afraid*, for יְחַתֵּן Hb 2[17] (where, however, it is perhaps more correct to suppose, with König, a formation on the analogy of verbs ע״ו, and moreover to read יְחִיתֵךְ with the LXX), וְיִקּוֹת Is 50[11] for וְזִקּוֹת.

o 2. Very doubtful are the instances in which compensation for the strengthening is supposed to be made by the insertion of a following נ. Thus for

---

[1] So in Latin *fel* (for *fell*), gen. *fellis*; *mel*, *mellis*; *os*, *ossis*. In Middle High German the doubling of consonants never takes place at the end of a word, but only in the middle (as in Old High German), e g. *val* (*Fall*), gen. *valles*; *swam* (*Schwamm* , &c., Grimm, *Deutsche Gramm.*, 2nd ed., i. 383.

[2] *Dageš forte* is almost always omitted in מְ when it is the prefix of the participle Pi'el or Pu'al, hence ψ 104[3] הַמְּקָרֶה *who layeth the beams*, but הַמְּקֹרָה *the roof* Ec 10[18] (cf. הַמְּלָאכָה *the work*, &c.).

[3] According to some also in ט in תִּטְעֵי Is 17[10]; but see Baer on the passage.

מְעוֹנֶיהָ Is 23[11], read מְעֻזֶּיהָ (or מְעֻנֶּיהָ); and for תָּמְנוּ La 3[22], read תַּמּוּ. In Nu 23[13] קָבְנוֹ is not an instance of compensation (see § 67 *o*, end).

§ 21. *The Aspiration of the Tenues.*[1]

a The *harder* sound of the six *Begadkephath* letters, indicated by *Dageš lene*, is to be regarded, according to the general analogy of languages, as their older and original pronunciation, from which the softer sound was weakened (§ 6 *n* and § 13). The original hard sound is maintained when the letter is initial, and after a consonant, but when it immediately follows a vowel or *Šewā mobile* it is softened and aspirated by their influence, e. g. פָּרַשׂ *pāraṣ*, יִפְרֹשׂ *yiphrōṣ*, כֹּל *kōl*, לְכֹל *lekhōl*. Hence the *Begadkephath* take *Dageš lene*

b (1) at the beginning of words: (*a*) without exception when the preceding word ends with a vowelless consonant, e. g. עַל־כֵּן *ʿal-kēn* (*therefore*), עֵץ פְּרִי *ʿēṣ pᵉrî* (*fruit-tree*); (*b*) at the beginning of a section, e. g. בְּרֵאשִׁית Gn 1[1], or at the beginning of a sentence, or even of a minor division of a sentence after a distinctive accent (§ 15 *d*), although the preceding word may end with a vowel. The distinctive accent in such a case prevents the vowel from influencing the following tenuis, e. g. וַיְהִי כַּאֲשֶׁר *and it was so, that when*, Ju 11[5] (but וַיְהִי־כֵן Gn 1[7]).

c Rem. 1. The vowel letters ה, י, ו, א, as such, naturally do not close a syllable. In close connexion they are therefore followed by the aspirated *Begadkephath*, e. g. וַתִּמְצָא בָהּ, &c. On the other hand, syllables are closed by the consonantal ו and י (except קִרְתֹּהוּ Is 34[11]; שָׁלְוָ בָהּ Ez 23[42]; אֶרְנִי בָּם ψ 68[18]), and by ה with *Mappiq*; hence e. g. there is *Dageš lene* in עָלֶיהָם and always after יְהוָה, since the *Qᵉrê perpetuum* of this word (§ 17) assumes the reading אֲדֹנָי.

d 2. In a number of cases *Dageš lene* is inserted, although a vowel precedes in close connexion. This almost always occurs with the prefixes בְּ and כְּ in the combinations בְּבְ, כְּכְ, בְּפְ (i. e. when a *Begadkephath* with *Šᵉwā* precedes the same or a kindred aspirate) and בְּמ (see Baer, *L. Psalmorum*, 1880, p. 92,[2] on ψ 23[3]); cf. e. g. 1 S 25[1], Is 10[9], ψ 34[2], Jb 19[2]; בְּנ is uncertain; בְּר, כְּר, and בְּכ according to David Qimḥi do not take Dageš, nor בְּנ, כְּנ, and כְּפ according to the *Dikduke ha-ṭᵉamim*, p. 30. Sometimes the *Begadkephath* letters, even with a full vowel, take *Dageš* before a spirant (and even before ח in בַּחֲמִשָּׁה 1 K 12[32]); cf. the instances mentioned above, § 20 *e* (mostly *tenues* before א). In all these cases the object is to prevent too great an accumulation of aspirates. The LXX, on the other hand, almost always represent the כ and

[1] Cf. Delitzsch, *Ztschr. f. luth. Theol. u. Kirche*, 1878, p. 585 ff.

[2] Also *L. Proverbiorum*, 1880, Praef. p. ix; and *Dikduke ha-ṭᵉamim*, p. 30 (in German in König's *Lehrgeb.*, i. p. 62).

פ, even at the beginning of a syllable, by χ and φ; Χερούβ, Χαλδαῖοι, Φαρφάρ, &c.—The forms בָּרְכֹד (after וְיִשְׁמְתִי) Is 54[12], and בָּלְכֶל (after וְנִלְאֵיתִי) Jer 20[9] are doubly anomalous.

e (2) In the middle of words after *Šᵉwâ quiescens*, i.e. at the beginning of a syllable immediately after a vowelless consonant,[1] e.g. יִרְפָּא *yirpā* (*he heals*), קְטַלְתֶּם *ye have killed*; but after *Šᵉwâ mobile*, e.g. רְפָא *rᵉphā* (*heal thou*), בָּבְדָה *she was heavy*.

f On וַיְקַטֵּל, וַיִּשְׁבְּ and similar forms, see § 10 *i*.

Whether *Šᵉwâ* be vocal and consequently causes the aspiration of a following *tenuis*, depends upon the origin of the particular form. It is almost always vocal

(*a*) When it has arisen from the weakening of a strong vowel, e.g. רִדְפוּ *pursue ye* (not רְדְפוּ) from רָדַף; מַלְכֵי (not מַלְכֵי), because originally *mālăkhé*, but מַלְכֵי from the ground-form *malk*.

(*b*) With the כ of the pronominal suffixes of the 2nd pers. ־ְךָ, ־ְכֶם, ־ְכֶן, since Šᵉwâ mobile is characteristic of these forms (see § 58*f*; § 91 *b*).

Rem. Forms like שָׁלַחְתְּ *thou* (fem.) *hast sent*, in which we should expect an aspirated ת after the vowel, cf. וַיִּחַדְּ Ex 18[9], have arisen from שָׁלַחְתְּ, יִחַדְּ, &c.; Pathaḥ being here simply a helping vowel has no influence on the tenuis; cf. § 28 *e*.

§ 22. *Peculiarities of the Gutturals.*

a The four gutturals ח, ה, ע, א, in consequence of their peculiar pronunciation, have special characteristics, but א, as the weakest of these sounds, and sometimes also ע (which elsewhere as one of the harder gutturals is the opposite of א), differ in several respects from the stronger ה and ח.

b 1. They do not admit of *Dageš forte*, since, in consequence of a gradual weakening of the pronunciation (see below, note 2), the strengthening of the gutturals was hardly audible to the Masoretes. But a distinction must be drawn between (*a*) the complete omission of the strengthening, and (*b*) the mere *echo* of it, commonly called *half* doubling, but better, *virtual* strengthening.

c In the former case, the short vowel before the guttural would stand in an open syllable, and must accordingly be lengthened or modified.[2]

---

[1] The exceptions יָקְחָאֵל Jos 15[38] (see *Minḥat shay*, on this passage), 2 K 14[7], and יָקְרְעָם Jos 15[56] may perhaps be due to the character of the ק.

[2] Cf. *terra* and the French *terre*, the German *Rolle* and the French *rôle*; German *drollig* and French *drôle*. The omission of the strengthening shows a deterioration of the language. Arabic still admits of the strengthening of gutturals in all cases.

For a distinction must again be drawn between the full lengthening of *Pathaḥ* into *Qameṣ*—mostly before א (*always* under the ה of the article, see § 35), as a rule also before ע, less frequently before ה, and least often before ח—and the modification of *Pathaḥ* to *Seghôl*, mostly before a guttural with *Qameṣ*. In the other case (*virtual* strengthening) the *Dageš* is still omitted, but the strengthening is nevertheless regarded as having taken place, and the preceding vowel therefore remains short. This *virtual* strengthening occurs most frequently with ח, usually with ה, less frequently with ע, and very seldom with א. Examples of (*a*) מֵאָז, הָאָדָם, הָעָם, הָהָר, יַחְבֵּא (for *yiḥḥābhē'*); also אֶחָד, הֶהָרִים, הֶחָג, הֶעָנִי (see more fully on the pointing of the article before ע in § 35).—Of (*b*) מַחֲדֶשׁ, מְחוּם (from *minḥûṭ*), הַהוּא, בְּעֵר, נֵאוֹן, &c.—In all these cases of virtual strengthening the *Dageš forte* is to be regarded at least as implied (hence called *Dageš forte implicitum*, *occultum*, or *delitescens*).

2. They prefer before them, and sometimes after them (cf. *h*), *d* a short A-sound, because this vowel is organically the nearest akin to the gutturals. Hence

(*a*) before a guttural, *Pathaḥ* readily (and always before ה, ח, ע closing a syllable) takes the place of another short vowel or of a rhythmically long *ē* or *ō*, e.g. זָבַח *sacrifice*, not *zèbĕḥ*; שָׁמַע *report*, not *šēmĕ'*. This is more especially so when *a* was the original vowel of the form, or is otherwise admissible. Thus in the Imperat. and Imperf. Qal of guttural verbs, שְׁלַח *send thou*, יִשְׁלַח *he will send* (not *yišlōḥ*); Perf. Pi'el שִׁלַּח (but in Pausa שִׁלַּח); יַחְמֹד *he will desire* (not *yiḥmōd*); וַיָּנַח *and he rested* (not *wayyānŏḥ*); נַעַר *a youth*. In שִׁלַּח and יַחְמֹד *ă* is the original vowel.

Rem. In such cases as דָּגְשָׁא, טָעְנָא, פָּלְאָ, פָּרְאָ, the א has no consonantal *e* value, and is only retained orthographically (see § 23 *a*).

(*b*) After a heterogeneous long vowel, i. e. after all except *Qameṣ*, *f* the hard gutturals[1] (consequently not א), when standing at the end of the word, require the insertion of a rapidly uttered *ă* (*Pathaḥ furtivum*) between themselves and the vowel. This *Pathaḥ* is placed under the guttural, but sounded *before* it. It is thus merely an orthographic indication not to neglect the guttural sound in pronunciation, e.g. רוּחַ *rûᵃḥ*, נוֹעַ, רֵעַ, הִשְׁלִיחַ, גְּבוֹהַ (when consonantal ה is

[1] Prätorius, *Ueber den rückweich. Accent im Hebr.*, Halle, 1897, p. 17, &c., remarks that Pathaḥ furtivum has not arisen merely under the influence of the guttural, but is due to a duplication of the accented syllable, so that e.g. יָשִׁיב, יָצוּד would also be pronounced *yasîⁱbh*, *yaṣûᵘdh* although the short intermediate vowel was not so noticeable as before a guttural.

final it necessarily takes Mappîq), but e. g. רוּחִי, &c., since here the rapidly uttered *ă* is no longer heard.

g I^a^*ch* for *ich*, &c., in some Swiss dialects of German, is analogous; a *furtive Pathaḥ* is here involuntarily intruded before the deep guttural sound. In Arabic the same may be heard in such words as *mesiaḥ*, although it is not expressed in writing. The LXX (and Jerome, cf. *ZAW.* iv. 79) write ε, sometimes *a*, instead of *furtive Pathaḥ*, e. g. נַחַ Νῶε, יַדּוּעַ Ἰεδδούα (also Ἰαδδού).

h Rem. 1. The guttural may also have an influence upon the *following* vowel, especially in Segholate forms, e. g. נַעַר (not *na'ĕr*) *a youth*, פֹּעַל (not *pō'ĕl*) *deed*. The only exceptions are אֹהֶל, בֹּהַן, לֶחֶם, רֶחֶם.

i 2. Where in the present form of the language an *ĭ*, whether original or attenuated from *Pathaḥ*, would stand before or after a guttural in the first syllable of a word, a *S^e^ghôl* as being between *ă* and *ĭ* is frequently used instead, e. g. יֶחְבַּשׁ (also יַחְבֹּשׁ), יֶהְגּוּ, חֶבְלִי, נֶאְדָּר, נֶעֱרָי, &c.

k On the other hand, the slighter and sharper *Ḥireq* is retained even under gutturals when the following consonant is sharpened by *Dageš forte*, e. g. חִפָּה, הִגָּה, הִלֵּל; but when this sharpening is removed, S^e^ghôl is again apt to appear, e. g. הֲגָיוֹן constr. הֶגְיוֹן, חֲזָיוֹן constr. חֶזְיוֹן.

l 3. Instead of *simple Šᵉwâ mobile*, the gutturals take without exception a *compound Šᵉwâ*, e. g. שֶׁחֱטוּ, אֶקַּטֵּל, אֱמֹר, אֲנִי, &c.

m 4. When a guttural with *quiescent Šᵉwâ* happens to close a syllable in the middle of a word, the strongly closed syllable (with *quiescent Šᵉwâ*) may remain; necessarily so with ח, ע, and ה at the end of the tone-syllable, e. g. שָׁלַחְתָּ, יָדַעְתָּ, but also *before* the tone (see examples under *i*), even with א.

But in the syllable before the tone and further back, the closed syllable is generally opened artificially by a *Ḥaṭeph* (as being suited to the guttural) taking the place of the *quiescent Šᵉwâ*, and in particular that *Ḥaṭeph* which repeats the sound of the preceding vowel, e. g. יַחֲשֹׁב (also יַחְשֹׁב); יֶחֱזַק (also יֶחْזַק); פָּעֳלוֹ *pŏ^o^lô* (for *pŏ'lô*). But when, owing to a flexional change, the strong vowel following the *Ḥaṭeph* is weakened into *Šᵉwâ mobile*, then instead of the *Ḥaṭeph* its full vowel is written, e. g. יַעַמְדוּ (from יַעֲמֹד), נַעַרְכוּ (from נַעֲרֹךְ), פָּעָלְךָ (from פָּעַל). The original forms, according to § 28 *c*, were *ya'^a^mᵉdhû*, *ne'^a^rᵉmâ*, *pŏ'^a^lᵉkhā*. Hence יַעַמְדוּ, &c., are really only different orthographic forms of יַעַמְדוּ, &c., and would be better transcribed by *ya'^a^mᵉdhû*, &c.

n Rem. 1. On the use of simple or compound Šᵉwâ in guttural verbs, see further §§ 62–65.

o 2. Respecting the choice between the three *Ḥaṭephs*, it may be remarked: (*a*) ח, ה, ע at the beginning of a syllable prefer ֲ, but א prefers ֱ, e. g. חֲמוֹר *ass*, הָרֹג *to kill*, אֱמֹר *to say*; when farther from the tone syllable, however, the ֱ even under א changes into the lighter ֲ, e. g. אֲלֵי (poetic for אֶל) *to*, but אֲלֵיכֶם *to you*, אֱכֹל *to eat*, but אֲכָלְךָ (*^a^khŏl*, toneless on account

of Maqqēph). Cf. § 27 *w*. The 1st pers. sing. imperf. Pi'ēl regularly has ֲ. Likewise ֲ is naturally found under א in cases where the *Ḥaṭeph* arises from a weakening of an original *ă* (e.g. אֲרִי *lion*, ground-form *'ary*), and ֲ if there be a weakening of an original *u* (e.g. אֲנִי *a fleet*, עֲנִי *affliction*, cf. § 93 *q, z*).

(*b*) In the middle of a word after a long vowel, a *Ḥaṭeph-Pathaḥ* takes the place of a *simple Šᵉwâ mobile*, e.g. הָעֲלָה מְאֹנָה (see § 63 *p*); but if a short vowel precedes, the choice of the *Ḥaṭeph* is generally regulated by it, e.g. *Perf. Hiph.* הֶעֱמִיד (see above, *i*), *Infin.* הַעֲמִיד (regular form הַקְטִיל); *Perf. Hoph.* הָעְמַד (regular form הָקְטַל); but cf. שְׁחֲדוּ Jb 6²² (§ 64 *a*). *p*

5. The ר, which in sound approximates to the gutturals (§ 6 *g*), shares with the gutturals proper their first, and to a certain extent their second, peculiarity, viz. *q*

(*a*) The exclusion of the strengthening, instead of which the preceding vowel is almost always lengthened, e.g. בֵּרַךְ *he has blessed* for *birrakh*, בָּרֵךְ *to bless* for *barrēkh*.

(*b*) The preference for *ă* as a preceding vowel, e.g. וַיַּרְא *and he saw* (from יָרְאָה); וַיָּסַר both for וַיָּסָר *and he turned back*, and for וַיָּסֶר *and he caused to turn back*. *r*

The exceptions to *a* are מָדַת *mŏrrăth*, Pr 14¹⁰; כָּרַת *khŏrrăth* and שָׁחַךְ *šŏrrēkh*, *S* Ez 16⁴ (cf. Pr 3⁸); שֶׁהַאֹשִׁי Ct 5²; הַהַעְמָה 1 S 1⁶; הַהַאִיתֶם 1 S 10²⁴, 17²⁵, 2 K 6³²; הַהַדִּיפָהוּ Ju 20⁴³ (cf. § 20 *h*); מְהַרְהַ 1 S 23²⁸, 2 S 18¹⁶; also on account of דחיק (§ 20 *c*), Pr 15¹, 20²², 2 Ch 26¹⁰; and on account of אתי מרחיק (§ 20 *f*) 1 S 15⁶, Jer 39¹², Hb 3¹³, Pr 11²¹, Jb 39⁹, Ez 9⁶. A kind of virtual strengthening (after מִ for מִן) is found in מֵרַנְנֵךְ Is 14³. In Samaritan and Arabic this strengthening has been retained throughout, and the LXX write e.g. Σάῤῥα for שָׂרָה.

§ 23. *The Feebleness of the Gutturals* א *and* ה.

1. The א, a light and scarcely audible guttural breathing, as a rule entirely loses its slight consonantal power whenever it stands without a vowel at the end of a syllable. It then remains (like the German *h* in *roh, geh, nahte*) merely as a sign of the preceding long vowel, e.g. מָצָא, מָלֵא, הוֹצִיא (but when a syllable is added with an introductory vowel, according to *b* below, we have, e.g. מְצָאֵנִי, הוֹצִיאֵנִי, since the א then stands at the beginning of the syllable, not מְצָאנִי, (הוֹצִיאנִי), מָצְאוּ, בָּלוּא (cf., however, § 74 *a*), מָצָאתָ (for *māṣa'tā*), תִּמְצָאנָה. Similarly in cases like חֵטְא, וַיִּרְא, שָׁוְא, &c. (§ 19 *l*), and even in פֶּלֶא, (see above, § 22 *e*), the א only retains an orthographic significance. *a*

2. On the other hand, א is in general retained as a strong consonant whenever it begins a syllable, e.g. אָמַר, מְאֹסוּ, or when it is protected by a *Ḥaṭeph* after a short syllable, e.g. לֶאֱכֹל, and finally, *b*

when it stands in a closed syllable with quiescent *Šᵉwâ* after a preceding *Sᵉghôl* or *Pathaḥ*, e.g. נָאְדָר, וַיֶּאְסֹר *nā'dār*, יַאְדִּימוּ *ya'dimû*. Even in such cases the consonantal power of א may be entirely lost, viz.

c (*a*) when it would stand with a long vowel in the middle of a word after *Šᵉwâ mobile*. The long vowel is then occasionally thrown back into the place of the *Šᵉwâ*, and the א is only retained orthographically, as an indication of the etymology, e.g. רָאשִׁים *heads* (for *rᵉ'āšîm*), מָאתַיִם *two hundred* (for *mᵉ'āthâyim*), שָׁאטְךָ Ez 25⁶ for שְׁאָטְךָ; בּוֹדָאם Neh 6⁸ for בְּוֹרְאָם; מאום Jb 31⁷, Dn 1⁴ for מָאוּם; פֵּארָה for פְּאֵרָה Is 10³³; חֹטְאִים *ḥôṭîm*, 1 S 14³³ for חֹטְאִים (cf. § 74 *h*, and § 75 *oo*); הֶרְאוּבֵנִי Nu 34¹⁴, from רְאוּבֵן; so always חַטּאת or חַטָּאוֹת 1 K 14¹⁶, Mi 1⁵, &c., for חַטָּאוֹת. Sometimes a still more violent suppression of the א occurs at the beginning of a syllable, which then causes a further change in the preceding syllable, e.g. מְלָאכָה *work* for מַלְאָכָה (as in the Babylonian punctuation), יִשְׁמָעֵאל for יִשְׁמַעְאֵל; שְׂמֹאל or שְׂמָאוֹל *the left hand*, ground form *sim'âl*.

d (*b*) When it originally closed a syllable. In these cases א is generally (by § 22 *m*) pronounced with a *Ḥaṭeph*, ֱ or ֳ. The preceding short vowel is, however, sometimes lengthened and retains the following א only orthographically, e.g. וַיֶּאֱצֹל Nu 11²⁵ for וַיֶּאֱצֶל (cf. Ju 9⁴¹), and פָּארוּר Jo 2⁶ for פַּאֲרוּר; לֶאֱמֹר for לֵאמֹר; לָאֱלֹהִים for לֵאלֹהִים; but the contraction does not take place in לָאֱלִילִים Is 10¹¹. The short vowel is retained, although the consonantal power of א is entirely lost, in וַאֲרֹנִי, &c. (see § 102 *m*), וַיֵּאת Is 41²⁵, וְאַבְּדְךָ Ez 28¹⁶ for וַאֲאַבֶּדְךָ; cf. Dt 24¹⁰, 1 K 11³⁹, Is 10¹³.

e Instead of this א which has lost its consonantal value, one of the vowel letters ו and י is often written according to the nature of the sound, the former with *ô* and the latter with *ê* and *i*, e.g. רִים *buffalo* for רְאֵם. At the end of the word ה also is written for א, יְמַלֶּה *he fills* for יְמַלֵּא Jb 8²¹ (see below, *l*).

f 3. When א is only preserved orthographically or as an indication of the etymology (quiescent), it is sometimes entirely dropped (cf. § 19 *k*), e.g. יָצָתִי Jb 1²¹ for יָצָאתִי; מָלֵתִי Jb 32¹⁸ for מָלֵאתִי; מָצָתִי Nu 11¹¹; וַתֹּהוּ 2 S 20⁹; וַיִּרְפוּ Jer 8¹¹ for וַיִּרְפְּאוּ; וַתְּזָרֵנִי 2 S 22⁴⁰, but ψ 18⁴⁰; תּוֹמֵם Gn 25²⁴ for תְּאוֹמֵם; אַחַטָּנָה 31³⁹ for אֲחַטְּאֶנָּה; שְׁלָתֵךְ 1 S 1¹⁷ for שְׁאֵלָתֵךְ; רֵמִים ψ 22²² for רְאֵמִים; גָּוָה Jb 22²⁹ for גְּאָוָה; הִבְּרֹתִי 1 Ch 11³⁹ for הַבְּאֵר, and so 2 S 23³⁷; שָׂרִית 1 Ch 12³⁸ for שְׁאֵרִית; לַהֲשׁוֹת 2 K 19²⁵ *Kᵉthîbh* for לְהַשְׁאוֹת (cf. Is 37²⁶); חֵמָה Jb 29⁶ for חֶמְאָה.[1] In מַכָּלָת

[1] In Jer 22²³, נֲחַנְתְּ is unquestionably a corruption of נגחת for נְאַנָּחַתְּ.

1 K 5[25] (for מֵאֵת) the strengthening of the following consonant by Dageš compensates for the loss of the א; in מְסֹרֶת Ez 20[37], if for מֵאֵת (but read מוּסָר, with Cornill), the preceding vowel is lengthened; cf. above, *c*. On אֹמַר for אֹאמַר, see § 68 *g*.

g Rem. 1. In Aramaic the א is much weaker and more liable to change than in Hebrew. In literary Arabic, on the other hand, it is almost always a firm consonant. According to Arabic orthography, א serves also to indicate a long *a*, whereas in Hebrew it very rarely occurs as a mere vowel letter after Qameṣ; as in קָאם Ho 10[14] for קָם *he rose up*; רָאשׁ Pr 10[4], 13[23] for רָשׁ *poor*; but in 2 S 11[1] the *K^ethibh* הַמַּלְאָכִים *the messengers*, is the true reading; cf. § 7 *b*.

h 2. In some cases at the beginning of a word, the א, instead of a compound *Šewâ*, takes the corresponding full vowel, e.g. אֱזוֹר for אְזוֹר *girdle*; cf. § 84 *a*, *q*, and the analogous cases in § 52 *n*, § 63 *p*, § 76 *d*, § 93 *r* (אֹהָלִים).

i 3. An א is sometimes added at the end of the word to a final *û*, *i*, or *ô*, e.g. הָלְכוּא for הָלְכוּ Jos 10[24] (before א!), אֲבוֹא Is 28[12]. These examples, however, are not so much instances of 'Arabic orthography', as early scribal errors, as in יִנָּשְׂאוּא Je 10[5] for יִנָּשְׂאוּ; and in נְשׂוּא ψ 139[20] for נְשׂוּ. Cf. also יְהוּא Ec 11[3] (§ 75 *s*); נָקִיא for נָקִי *pure*; לוּא for לוּ *if*; אֲפוּא for אֲפוֹ *then* (*enclitic*); רְבוּא for רְבוֹ *myriad*, Neh 7[66.71]. On הוּא and הִיא see § 32 *k*.

k **4.** The ה is stronger and firmer than the א, and never loses its consonantal sound (i.e. *quiesces*) in the middle of a word[1] except in the cases noted below, in which it is completely elided by syncope. On the other hand, at the end of a word it is always a mere vowel letter, unless expressly marked by *Mappîq* as a strong consonant (§ 14 *a*). Yet at times the consonantal sound of ה at the end of a word is lost, and its place is taken by a simple ה or more correctly הַ, with *Rāphè* as an indication of its non-consonantal character, e.g. לָהַּ *to her* for לָהּ, Zc 5[11], &c. (cf. § 103 *g*, and §§ 58 *g*, 91 *e*); cf. also יָהַּ for יָהּ (from יָהוּ) in proper names like יִרְמְיָהַ, &c.—Finally, in very many cases a complete elision of the consonantal ה takes place by *syncope*: (*a*) when its vowel is thrown back to the place of a preceding *Šewâ mobile* (see above, *c*, with א), e.g. לַבֹּקֶר for לְהַבֹּקֶר (the ה of the article being syncopated as it almost always is); בַּיּוֹם for בְּהַיּוֹם [but see § 35 *n*], בַּשָּׁמַיִם for בְּהַשָּׁמַיִם; יְוֹנָתָן for יְהוֹנָתָן; perhaps also בְּנֵיהֶם for בְּנֵיהֵם Ez 2[7.32]. (*b*) By contraction of the vowels preceding and following the ה, e.g. סוּסוֹ (also written סוּסֹה) from *sûsahu* (*a*+*u*=*ô*).—A violent suppression of ה together with its vowel occurs in בָּם (from בָּהֶם), &c.

---

[1] Only apparent exceptions are such *proper names* as עֲשָׂהאֵל, פְּרָהצוּר, which are compounded of two words and hence are sometimes even divided. Cf. forms like חֲזָואֵל for חֲזָהאֵל. Another exception is יְפֶהפִיָּה, the reading of many MSS. for the artificially divided form יְפֶה־פִיָּה in the printed texts, Je 46[20].

l Rem. In connexion with *ō* and *ē*, a ה which only marks the vowel ending is occasionally changed into ו or י (רָאוֹ=רָאֹה, חַבֵּי=חַבֵּה Ho 6⁹), and with any vowel into א in the later or Aramaic orthography, but especially with *ā*, e. g. שְׁנָא *sleep*, ψ 127² for שְׁנָה; נָשָׂא Jer 23³⁹ for נָשָׂה, &c. Thus it is evident that final ה as a vowel letter has only an orthographical importance.

§ 24. *Changes of the Weak Letters* ו *and* י.

Philippi, *Die Aussprache der semit. Konsonanten* ו *und* י (mentioned above, § 5 *b*, note 1), a thorough investigation of their phonetic value as consonantal, i. e. non-syllabic, vowel-sounds, not palatal or labial fricatives; cf. also E. Sievers, *Metrische Studien*, i. 15.

a ו and י are, as consonants, so weak, and approach so nearly to the corresponding vowels *u* and *i*, that under certain conditions they very readily merge into them. This fact is especially important in the formation of those weak stems, in which a ו or י occurs as one of the three radical consonants (§ 69 ff., § 85, § 93).

1. The cases in which ו and י lose their consonantal power, i. e. merge into a vowel, belong almost exclusively to the middle and end of words; at the beginning they remain as consonants.[1]

The instances may be classified under two heads:

b (*a*) When either ו or י with *quiescent* *Šᵉwâ* stands at the end of a syllable immediately after a *homogeneous* vowel (*u* or *i*). It then merges in the homogeneous vowel, or more accurately it assumes its vowel-character (ו as *u*, י as *i*), and is then contracted with the preceding vowel into *one* vowel, necessarily long, but is mostly retained orthographically as a (quiescent) vowel letter. Thus הוֹשַׁב for *huwšab*; יִיקַץ for *yiyqaṣ*; so also at the end of the word, e. g. עִבְרִי *a Hebrew*, properly *ʿibrîy*, fem. עִבְרִיָּה, pl. עִבְרִיִּים (and עִבְרִים); עָשׂוֹ Jb 41²⁵ for עָשׂוּ (cf. עֲשׂוּת 1 S 25¹⁸ *Kᵉthîbh*). On the other hand, if the preceding vowel be heterogeneous, ו and י are retained as full consonants (on the pronunciation see § 8 *m*), e.g. שְׁלֵוּ *quiet*, וְ *the month of May*, גּוֹי *nation*, גָּלוּי *revealed*. But with a preceding *ă* the ו and י are mostly contracted into *ô* and *ê* (see below, *f*), and at the end of a word they are sometimes rejected (see below, *g*).

Complete syncope of ו before *î* occurs in אִי *island* for אִיִּי; עִי *ruins* for עִיִּי; רִי *watering* Jb 37¹¹ for רְוִיִּי; [כִּי *burning* Is 3²⁴ for כְּוִיִּי, cf. §§ 84ᵃ *c*, *e*, 93 *y*].

---

[1] Or as consonantal vowels (see above), and are then transcribed by P. Haupt, Philippi, and others, as *u̯*, *i̯*, following the practice of Indogermanic philologists. וְ for וַ *and*, alone is a standing exception, see § 26. 1 and § 104 *e*. On י=*i* at the beginning of a word, cf. § 47 *b*, note. According to § 19 *a*, end, *initial* ו in Hebrew almost always becomes י; always in verbs originally פ״י, § 69 *a*. Apart from a few proper names, initial ו occurs only in וָו *hook*, וָלָד *child* Gn 11³⁰, 2 S 6²³ *Kᵉthibh* [elsewhere יָלֶד], and the doubtful וָזַר Pr 21⁸.

Thus an initial יְ after the prefixes בְּ, וְ, כְּ, לְ, which would then be *c* pronounced with *ĕ* (see § 28 *a*), and also almost always after מִ (see § 102 *b*), coalesces with the *ĕ* to *î*, e. g. בִּיהוּדָה *in Judah* (for בִּ֫יְ), וִיהוּדָה *and Judah*, כִּיאֹר *as the Nile*, לִיהוּדָה *for Judah*, מִידֵי *from the hands of*.

(*b*) When ו and י without a vowel would stand at the end of the *d* word after *quiescent Šᵉwâ*, they are either wholly rejected and only orthographically replaced by ה (e. g. בֶּכָה from *bikhy*, as well as the regularly formed בְּכִי *weeping*; cf. § 93 *x*) or become again vowel letters. In the latter case י becomes a homogeneous *Ḥireq*, and also attracts to itself the tone, whilst the preceding vowel becomes *Šᵉwâ* (e. g. פְּרִי from *piry*, properly *pary*); ו is changed sometimes into a toneless *u* (e. g. תֹּהוּ from *tuhw*).

Rem. In Syriac, where the weak letters more readily become vowel sounds, *e* a simple *i* may stand even at the beginning of words instead of ܝ or ܘ. The LXX also, in accordance with this, write Ἰουδά for יְהוּדָה, Ἰσαάκ for יִצְחָק. Hence may be explained the *Syriac usage* in Hebrew of drawing back the vowel *i* to the preceding consonant, which properly had a simple *vocal Šᵉwâ*, e. g. (according to the reading of Ben-Naphtali [1]) וַיִּלְלַת Jer 25[36] for וַיְלַלַת (so Baer), כִּיתְרוֹן Ec 2[13] for כְּיִתְרוֹן, cf. also the examples in § 20 *h*, note 2; even וַיִּחֲלוּ Jb 29[21] (in some editions) for וַיְחַלּוּ. According to Qimḥi (see § 47 *b*) יִקְטֹל was pronounced as *iqṭōl*, and therefore the 1st pers. was pointed אֶקְטֹל to avoid confusion. In fact the Babylonian punctuation always has *ĭ* for *ă* in the 1st pers.

2. With regard to the *choice* of the long vowel, in which ו and י *f* quiesce after such vocalization and contraction, the following rules may be laid down:

(*a*) With a short *homogeneous* vowel ו and י are contracted into the corresponding long vowel (*û* or *î*), see above, *b*.

(*b*) With short *ă* they form the diphthongs *ô* and *ê* according to § 7 *a*, e. g. מֵיטִיב from מַיְטִיב; יֵשִׁיב from יַוְשִׁיב, &c.[2]

Rem. The rejection of the half vowels ו and י (see above, *b*) occurs especially *g* at the end of words after a heterogeneous vowel (*ă*), if according to the nature of the form the contraction appears impossible. So especially in

[1] According to Abulwalid, Ben-Naphtali regarded the *Yodh* in *all* such cases as a vowel letter.

[2] Instances in which no contraction takes place after *ă* are, מַיְמִינִים 1 Ch 12[2]; אַיְסִירֵם Ho 7[12] (but cf. § 70 *b*); הַיְשַׁר ψ 5[9] *Qᵉrê*; the locatives בַּיְתָה, מְצַרַיְמָה, &c.—On the suffix יְכִי־ for יְךָ־ see § 91 *l*.—Sometimes both forms are found, as עַוְלָה and עָוְלָה; cf. חַי *living*, constr. state חֵי. Analogous is the contraction of מָוֶת (ground-form *mawt*) *death*, constr. מוֹת; עַיִן (ground-form *'ayn* [*'ain*]) *eye*, constr. עֵין.

verbs ל״ה, e. g. originally גָּלַי = גָּלַ(י) = גָּלָה, since *ă* after the rejection of the י stands in an open syllable, and consequently must be lengthened to *ā*. The ה is simply an orthographic sign of the long vowel. So also שָׁלָה for *šālaw*.[1] On the origin of יִגְלֶה, see § 75 *e*; on קָם as perf. and part. of קוּם, see § 72 *b* and *g*; on יֶלֶד, &c., from ולד, see § 69 *b*.—On the weakening of ו and י to א, see § 93 *x*.

§ 25. *Unchangeable Vowels.*

a What vowels in Hebrew are unchangeable, i.e. are not liable to attenuation (to Šewâ), modification, lengthening, or shortening, can be known with certainty only from the nature of the grammatical forms, and in some cases by comparison with Arabic (cf. § 1 *m*). This holds good especially of the *essentially* long vowels, i. e. those long by *nature* or *contraction*, as distinguished from those which are only lengthened *rhythmically*, i. e. on account of the special laws which in Hebrew regulate the tone and the formation of syllables. The latter, when a change takes place in the position of the tone or in the division of syllables, readily become short again, or are reduced to a mere *vocal Šewâ*.

b **1.** The essentially long and consequently, as a rule (but cf. § 26 *p*, § 27 *n*, *o*), unchangeable vowels of the *second* and *third* class, *î*, *ê*, *û*, *ô*, can often be recognized by means of the vowel letters which accompany them (יִ—, ֵי, וּ, וֹ); e.g. יֵיטִיב *he does well*, הֵיכָל *palace*, גְּבוּל *boundary*, קוֹל *voice*. The *defective* writing (§ 8 *i*) is indeed common enough, e.g. יֵטֵב and יִטִיב for יֵיטִיב; גְּבֶל for גְּבוּל; קֹל for קוֹל, but this is merely an orthographic licence and has no influence on the quantity of the vowel; the *û* in גְּבֶל is just as necessarily long, as in גְּבוּל.

As an exception, a merely tone-long vowel of both these classes is sometimes written *fully*, e. g. יִקְטוֹל for יִקְטֹל.

c **2.** The essentially or naturally long *â* (*Qameṣ impure*),[2] unless it has become *ô* (cf. § 9 *q*), has as a rule in Hebrew no representative among the consonants, while in Arabic it is regularly indicated by א; on the few instances of this kind in Hebrew, cf. § 9 *b*, § 23 *g*. The naturally long *â* and the merely tone-long *ā* therefore can only be distinguished by an accurate knowledge of the forms.

---

[1] The Arabic, in such cases, often writes etymologically גָּלַי, but pronounces *galā*. So the LXX Σινᾶ, Vulg. *Sina*; cf. Nestle, *ZAW.* 1905, p. 362 f. But even in Arabic שלא is written for שָׁלָו and pronounced *salā*.

[2] By *vocales impurae* the older grammarians meant vowels properly followed by a vowel letter. Thus כְּתָב *kᵉthâbh* was regarded as merely by a licence for כְּתָאב, &c.

3. Short vowels in closed syllables (§ 26 *b*), which are not final, are as a rule unchangeable, e. g. מַלְבּוּשׁ *garment*, מִדְבָּר *wilderness*, מַמְלָכָה *kingdom*; similarly, short vowels in sharpened syllables, i. e. before *Dageš forte*, e. g. גַּנָּב *thief*. *d*

4. Finally, those long vowels are unchangeable which, owing to the omission of the strengthening in a guttural or ר, have arisen by lengthening from the corresponding short vowels, and now stand in an open syllable, e. g. מֵאֵן for *mĕ''ēn*; בָּרְךְ for *burrakh*. *c*

§ 26. *Syllable-formation*[1] *and its Influence on the Quantity of Vowels.*

Apart from the unchangeable vowels (§ 25), the use of short or long vowels, i. e. their lengthening, shortening, or change into vocal *Šᵉwâ*, depends on the *theory of syllable-formation*. The initial and final syllables especially require consideration. *a*

1. The *initial* syllable. A syllable regularly begins with a consonant, or, in the case of initial ו and י (cf. note on § 5 *b*), a consonantal vowel.[2] The copula is a standing exception to this rule. According to the Tiberian pronunciation וְ *and* is resolved into the corresponding vowel וּ before *Šᵉwâ*, and the labials, e. g. וּדְבַר, וּמֶלֶךְ; the Babylonian punctuation in the latter cases writes וֹ, i. e. וְ before a full vowel.

2. The *final* syllable. A syllable may end— *b*

(*a*) With a vowel, and is then called an *open* or *simple* syllable, e. g. in קָטַלְתָּ where the first and last are open. See below, *e*.

(*b*) With *one* consonant, and is then called a *simple closed* or *compound* syllable, as the second in לֶבֶב, קָטַל. See below, *o*, *p*. Such are also the syllables ending in a strengthened consonant, as the first in קַטֶּל *qaṭ-ṭēl*. See below, *q*. *c*

(*c*) With *two* consonants, a *doubly closed* syllable, as קִשְׁטְ *qōšṭ*, קָטַלְתְּ. Cf. below, *r*, and § 10 *i*–*l*. *d*

3. *Open* or *simple* syllables have a long vowel, whether they have the tone as in בְּךָ *in thee*, יֶלֶךְ *he goes*, or are toneless as in קָטַל, עֹנָב *a bunch of grapes*.[3] A long vowel (Qameṣ, less frequently Ṣere) is *c*

---

[1] Cf. C. H. Toy, 'The Syllable in Hebrew,' *Amer. Journal of Philol.*, 1884, p. 494 ff.; H. Strack, 'The Syllables in the Hebrew Language,' *Hebraica*, Oct. 1884, p. 73 ff.

[2] We are not taking account here of the few cases in which initial *Yodh* is represented as simple *i*, by being written אִי or אִ, see § 24 *e*, and especially § 47 *b*, note; nor of certain other cases in which א with an initial vowel has only a graphic purpose, though it is indispensable in an unpointed text.

[3] In opposition to this fundamental law in Hebrew (a *long* vowel in an *open* syllable), the original short vowel is found always in Arabic, and sometimes

especially common in an open syllable before the tone (pretonic vowel), e. g. לְבָבְךָ, קְטַל, יְקוּם, לְהֵם.[1]

Short vowels in *open* syllables occur:

f (*a*) In apparently dissyllabic words formed by means of a helping vowel from monosyllables, as נַחַל *brook*, בַּיִת *house*, יִרְבֶּה *let him increase*, from *naḥl*, *bayt*, *yirb*; cf. also יִם the ending of the dual (§ 88). But see § 28 *e*.

g (*b*) In the verbal suffix of the 1st pers. sing. (נִי *me*), e. g. קְטָלַנִי (Arab. *qātālānī*). The uncommon form נִּי, however (Gn 30[6], cf. § 59*f*), proves that the tone-bearing *Pathaḥ* produces a sharpening of the following sonant, and thus virtually stands in a closed syllable, even when the *Nun* is not expressly written with *Dageš*. In cases like וְאַדָּנִי (§ 102*m*) *Pathaḥ* is retained in the counter-tone after the א has become quiescent.

h (*c*) Sometimes before the toneless ה *local* (§ 90*c*), e. g. מִדְבָּרָה *towards the wilderness*; only, however, in the constr. state (1 K 19[15]), since the toneless suffix ה does not affect the character of the form (especially when rapidly pronounced in close connexion); otherwise it is מִדְבָּרָה.

In all these cases the short vowel is also supported by the tone, either the principal tone of the word, or (as in *h*) by the secondary tone in the constr. st., or by the counter-tone with *Metheg*, as in וְאַדָּנִי above, *g*; cf. the effect of the *arsis* on the short vowel in classical prosody.

i (*d*) In the combinations ַעַ, ַעֲ, ַחַ, ַחֲ, ַהַ, ַהֲ, e. g. נַעֲרוֹ *his boy*, יַאְסֹר *he will bind*, פָּעֳלוֹ *his deed*. In all these cases the syllable was at first really closed, and it was only when the guttural took a *Ḥaṭeph* that it became in consequence open (but cf. e. g. יַאסֹר and יַאסֹר). The same vowel sequence arises wherever a preposition בְּ, כְּ, לְ, or וְ copulative is prefixed to an initial syllable which has a *Ḥaṭeph*, since the former then takes the vowel

---

in the other Semitic languages, except of course in the case of *naturally* long vowels. The above examples are pronounced in Arabic *bikă*, *qătălă*, *'ĭnăb*. Although it is certain therefore that in Hebrew also, at an earlier period, *short* vowels were pronounced in open syllables, it may still be doubted whether the present pronunciation is due *merely* to an artificial practice followed in the solemn recitation of the O. T. text. On this hypothesis we should have still to explain, e. g. the undoubtedly very old lengthening of ĭ and ŭ in an open syllable into ē and ō.

[1] That these pretonic vowels are really *long* is shown by Brockelmann, *ZA.* xiv. 343 f., from the transcription of Hebrew proper names in the Nestorian (Syriac) punctuation, and e. g. from the Arabic 'Ibrâhim = אַבְרָהָם. He regards their lengthening in the syllable before the tone as a means adopted by the Masoretes to preserve the pronunciation of the traditional vowels. This explanation of the pretonic vowels as due to a precaution against their disappearing, is certainly right; as to whether the precaution can be ascribed to the Masoretes, see the previous note. For the pretonic vowel the Arabic regularly has a short vowel (*lāhŭm*, *yăqūm*, &c.), the Aramaic simply a vocal *Šᵉwâ* (לְהוֹן, יְקוּם, קְטַל, לְבַב); and even in Hebrew, when the tone is thrown forward the pretonic vowel almost always becomes *Šᵉwâ*, see § 27. It would, however, be incorrect to assume from this that the pretonic vowel has taken the place of *Šᵉwâ* only on account of the following tone-syllable. It always arises from an original short vowel, since such a vowel is mostly lengthened in an open syllable before the tone, but when the tone is moved forward it becomes *Šᵉwâ*.

contained in the *Haṭeph* (see § 102 *d* and § 104 *d*). To the same category belong also the cases where these prepositions with Hireq stand before a consonant with simple Šᵉwâ mobile, e.g. בְּדָבָר, כְּדָבָר, &c.

k (*e*) In forms like יָחֻזְקוּ *yāḥŭzᵉqû* (they are strong), פָּעָלְךָ *pŏʿŏlᵉkhā* (thy deed). These again are cases of the subsequent opening of closed syllables (hence, e.g. יָחֻזְקוּ also occurs); פָּעָלְךָ is properly *pŏʿŏlᵉkhā*; cf. generally § 22 *m*, end, and § 28 *c*.

l Such cases as הַחֹדֶשׁ, אַחִים (§ 96), הַחְתֹּת (§ 67 *w*) do not come under this head, since they all have *ă* in a virtually sharpened syllable; nor does the tone-bearing *Sᵉghôl* in suffixes (e.g. דְּבָרֶךָ), nor *Sᵉghôl* for *ă* before a guttural with *Qameṣ* (§ 22 *c*). On שְׂרָשִׁים and קְדָשִׁים, see § 9 *v*.

m **4.** The independent syllables with a firm vowel which have been described above, are frequently preceded by a single consonant with vocal Šewâ, simple or compound. Such a consonant with vocal Šewâ never has the value of an independent syllable, but rather attaches itself so closely to the following syllable that it forms practically one syllable with it, e.g. לְחִי (cheek) *lᵉḥî*; חֳלִי (sickness) *ḥᵒlî*; יַלְמְדוּ *yil|-mᵉdhû*. This concerns especially the prefixes וְ, בְּ, כְּ, לְ. See § 102.

n The *Šᵉwâ mobile* is no doubt in all such cases weakened from an original full vowel (e.g. יִקְטְלוּ Arab. *yaqtŭlû*, בְּךָ Arab. *bīkă*, &c.); from this, however, it cannot be inferred that the Masoretes regarded it as forming a kind of *open* syllable, for this would be even more directly opposed to their fundamental law (viz. that a long vowel should stand in an open syllable), than are the exceptions cited above, *f–k*. Even the use of Metheg with Šᵉwâ in special cases (see § 16 *f*) is no proof of such a view on the part of the Masoretes.

o **5.** *Closed* syllables ending with one consonant, when without the tone, necessarily have *short* vowels, whether at the beginning or at the end of words,[1] e.g. מַלְכָּה *queen*, חָכְמָה *wisdom*, חָשְׁבוֹן *understanding*, וַיָּסָר *and he turned back*, וַיָּקָם, וַיָּקָם (*wayyāqŏm*).

p A *tone-bearing* closed syllable may have either a long or short vowel, but if the latter, it must as a rule be either Pathaḥ or Seghôl.[2] The tone-bearing closed penultima admits, of the *long* vowels, only the tone-long *ā*, *ē*, *ō*, not the longest *î*, *ê*, *ô*, *û*; of the *short* vowels, only *ă*, *ĕ*, not *ĭ*, *ŭ*, *ŏ* (but on *ĭ* and *ŭ*, see § 29 *g*). Thus יַקְטִילוּ (3rd pl. masc. Imperf. Hiph.) but תַּקְטַלְנָה 3rd pl. fem., and קִטְלוּ (2nd pl. masc. Imperat. Qal) but קִטְלְנָה fem.

---

[1] In exceptions such as יִשְׁתֶּ֫לִי Gn 4[25] (where *šāt* is required by the character of the form, although the closed syllable has lost the tone owing to the following Maqqeph), Metheg is used to guard against a wrong pronunciation; similarly *ē* is sometimes retained before Maqqeph, e.g. שֵׁם־ Gn 2[13]; עֵין־ Gn 2[16].

[2] See § 9 *e*, *f*. *ĭ* occurs thus only in the particles אִם, עִם, מִן; but these usually (מִן always) are rendered toneless by a following Maqqeph. Cf. also such forms as וַיִּשְׁבְּ § 26 *r* and § 75 *q*.

q **6.** A special kind of closed syllables are the *sharpened*, i. e. those which end in the same (strengthened) consonant with which the following syllable begins, e. g. אִמִּי *'im-mî*, בִּלְוֹ *kŭl-lô*. If without the tone, they have, like the rest, short vowels; but, if bearing the tone, either short vowels as כֹּלּוֹ, הִנֶּנּוּ, or long, as שֻׁמָּה, הֲמָּה.

On the omission of the strengthening of a consonant at the end of a word, see § 20 *l*.

r **7.** Syllables ending with *two* consonants occur only at the end of words, and have most naturally short vowels, קָטַלְתְּ, וַיִּשְׁבָּ; but sometimes *Ṣere*, as נֵרְךָ, וַיִּבְךְ, or *Ḥolem*, תּוֹסֶף קִשְׁטְ. Cf., however, § 10 *i*. Usually the harshness of pronunciation is avoided by the use of a helping vowel (§ 28 *e*).

§ 27. *The Change of the Vowels, especially as regards Quantity.*

a The changes in sound through which the Hebrew language passed, before it assumed the form in which we know it from the Masoretic text of the O.T. (see § 2 *k*), have especially affected its vowel system. A precise knowledge of these vowel changes, which is indispensable for the understanding of most of the present forms of the language, is derived partly from the phenomena which the language itself presents in the laws of derivation and inflexion, partly from the comparison of the kindred dialects, principally the Arabic. By these two methods, we arrive at the following facts as regards Hebrew:

b 1. That in an open syllable the language has frequently retained only a half-vowel (*Šᵉwâ mobile*), where there originally stood a full short vowel, e. g. עֲגָלָה (ground-form *'ăgălăt*) *a waggon*, צְדָקָה (ground-form *ṣădăqăt*) *righteousness*, קָטְלוּ (Arab. *qătălû*), יִקְטְלוּ (Arab. *jŭqattĭlû*).

c 2. That vowels originally short have in the tone-syllable, as also in the open syllable preceding it, been generally changed into the corresponding tone-long vowels, *ă* into *ā*, *ĭ* into *ē*, *ŭ* into *ō* (see § 9, *a–e*, *k*, *r*). If, however, the tone be shifted or weakened, these tone-long vowels mostly revert to their original shortness, or, occasionally, are still further shortened, or reduced to mere *Šᵉwâ mobile*, or, finally, are entirely lost through a change in the division of syllables; e. g. מָטָר (Arab. *măṭăr*) *rain*, when in close dependence on a following genitive in the *construct state*), becomes מְטַר; עָקֵב (Arab. *'ăqĭb*) *heel*, dual עֲקֵבַיִם, dual *construct* (with attenuation of the original *ă* of the first syllable to *ĭ*) עִקְבֵי [on the ק, see § 20 *h*]; יִקְטֹל (Arab. *yăqtŭl*), plur. יִקְטְלוּ (Arab. *yăqtŭlû*). For instances of complete loss, as in כַּסְפִּי, cf. § 93 *m*.

According to § 26, the following details of vowel-change must be observed:

1. The original, or a kindred short vowel reappears— *d*

(*a*) When a closed syllable loses the tone (§ 26 *o*). Thus, יָד *hand*, but יַד־יְהוָה *the hand of Yahwe*; בֵּן *son*, but בֶּן־הַמֶּלֶךְ *the son of the king*; כֹּל *the whole*, but כָּל־הָעָם *the whole of the people*; so also when a tone-bearing closed syllable loses the tone on taking a suffix, e.g. אֹיֵב *enemy*, but אֹיִבְךָ *thy enemy*; finally, when the tone recedes, יָקֹם, but וַיָּקָם (*wayyāqŏm*); יֵלֵךְ, but וַיֵּלֶךְ.

(*b*) To the same category belong cases like סֵפֶר *book*, but סִפְרִי *my book*; קֹדֶשׁ *holiness*, but קָדְשִׁי *my holiness*. In spite of the helping vowel, סֵפֶר and קֹדֶשׁ are really closed syllables with a tone-long vowel; when the syllable loses the tone, the original *ĭ* or *ŏ* (properly *ŭ*) reappears.

The same is true of syllables with a virtually sharpened final consonant: the lengthening of original *ĭ* to *ē* and *ŭ* to *ō* takes place only in a tone-bearing syllable; in a toneless syllable the *ĭ* or *ŏ* (or *ŭ*) remains, e.g. אֵם *mother*, but אִמִּי *my mother*; חֹק *law*, plur. חֻקִּים; but עֹז *strength*, עֻזִּי (and עָזִּי) *my strength*.

2. The lengthening of the short vowel to the corresponding long, takes place— *e*

(*a*) When a closed syllable becomes open by its final consonant being transferred to a suffix beginning with a vowel, or in general to the following syllable, e.g. קָטַל, קְטָלוֹ *he has killed him*; סוּכָתִי primarily from סֻכָּת. Similarly *ă* mostly becomes *ā* even before a suffix beginning with *Šᵉwâ mobile*; e.g. קָטְלָךְ from קָטַל, סוּכָתְךָ from סֻכָּת.

(*b*) When a syllable has become open by complete loss of the strengthening of its final consonant (a guttural or *Rêš*), e.g. בָּרְךָ for *birrakh*, see § 22 *c*. Cf. also § 20 *n*. *f*

(*c*) When a weak consonant (א, ו, י) following the short vowel quiesces in this vowel, according to § 23 *a*, *c*, *d*, § 24 *f*, e.g. מָצָא for מָצָא, where the א, losing its consonantal value, loses also the power of closing the syllable, and the open syllable requires a long vowel. *g*

(*d*) Very frequently through the influence of the *pause*, i.e. the principal tone in the last word of a sentence or clause (§ 29 *k*). Sometimes also through the influence of the article (§ 35 *o*). *h*

3. When a word increases at the end and the tone is consequently moved forward, or when, in the *construct state* (see § 89), or otherwise in close connexion with the following word, its tone is weakened, in such cases a full vowel (short or tone-long) may, by a change in the *i*

division of syllables, be weakened to *Šᵉwâ mobile*, or even be entirely lost, so that its place is taken by the mere syllable-divider (*Šᵉwâ quiescens*). Examples of the first case are, שֵׁם *name*, pl. שֵׁמוֹת, but שְׁמִי *my name*, שְׁמוֹתָם *their names*, דָּבָר *word*, constr. st. דִּבַר; צְדָקָה *righteousness*, constr. st. צִדְקַת; an example of the second case is, בְּרָכָה *blessing*, constr. st. בִּרְכַּת. Whether the vowel is retained or becomes *Šᵉwâ* (דָּם, דָּמִי, but שֵׁם, שְׁמִי), and which of the two disappears in two consecutive syllables, depends upon the character of the form in question. In general the rule is that only those vowels which stand in an open syllable can become *Šᵉwâ*.

Thus the change into *Šᵉwâ* takes place in—

k (*a*) The *ā* and *ē* of the first syllable, especially in the inflexion of nouns, e. g. דָּבָר *word*, plur. דְּבָרִים; גָּדוֹל *great*, fem. גְּדוֹלָה; לֵבָב *heart*, לְבָבִי *my heart*; but also in the verb, תָּשׁוּב *she will return*, plur. תָּשׁוּבְנָה, and so always, when the originally short vowel of the prefixes of the Imperfect comes to stand in an open syllable which is not pretonic. On the other hand, an *ā* lengthened from *ă* before the tone is retained in the *Perfect consecutive* of Qal even in the secondary tone, e. g. וְקָטַלְתָּ; cf. § 49 *i*.

l (*b*) The short, or merely tone-long, vowels *a*, *e*, *o* of the ultima, especially in verbal forms, e. g. קָטַל, fem. קָטְלָה *qāṭᵉlā*; יִקְטֹל, יִקְטְלוּ *yiqṭᵉlû*; but note also יִלְקְטוּן, תִּרְבָּקִין, &c., according to § 47 *m* and *o*. The helping vowels are either entirely omitted, e. g. מֶלֶךְ *king* (ground-form *malk*), מַלְכִּי *my king*; or, under the influence of a guttural, are weakened to Ḥaṭeph, e. g. נַעַר *boy*, נַעֲרוֹ *his boy*. If the tone remains unmoved, the vowel also is retained, notwithstanding the lengthening of the word, e. g. יִקְטֹלוּ pausal-form for יִקְטְלוּ.

m Where the tone moves forward two places, the former of the two vowels of a dissyllabic word may be shortened, and the second changed into *Šᵉwâ*. Cf. דָּבָר *word*; in the plur. דְּבָרִים; with heavy suffix דִּבְרֵיהֶם (cf. § 28 *a*) *their words*. On the attenuation of the *ă* to *ĭ*, see further, *s*, *t*.

n Rem. 1. An *ô* arising from *aw* = *au*, or by an obscuring of *â* (see § 9 *b*), sometimes becomes *û*, when the tone is moved forward, e. g. נָקוּמוֹתָ, נְקוּמוֹתָ (see Paradigm *Perf. Niph.* of קוּם); מָנוֹס *flight*, fem. מְנוּסָה, with suffix, מְנוּסִי. The not uncommon use of וּ in a sharpened syllable, as בְּחוּקַּי Ez 20[18] (for בְּחֻקַּי, cf. also the examples in § 9 *o*), is to be regarded as an orthographic licence, although sometimes in such cases *û* may really have been intended by the *Kᵉthibh*.

o Of the vowels of the *U*-class, *û* and tone-long *ō* stand in a tone-bearing

closed final syllable, and *ŏ* in a toneless syllable, e.g. יָקוּם *he will arise*, יָקֹם jussive, *let him arise*, וַיָּקָם *and he arose*. The only instance of *ŭ* in an ultima which has lost the tone is וַיָּרֻם Ex 16[20] (see § 67 *n*). Similarly, of vowels of the *I*-class, *ê*, *i*, and *ē* stand in a tone-bearing closed final syllable, and *ĕ* in a toneless syllable, e.g. יָקִים *he will raise*, יָקֵם *let him raise*, וַיָּקֶם *and he raised*. The only instance of *ĭ* in an ultima which has lost the tone is וַתָּרֶן Ju 9[53] (see § 67 *p*).

2. In the place of a *Pathaḥ* we not infrequently find (according to § 9 *f*) *p* a *Seghôl* (*ĕ*, *ê*) as a modification of *ă*:

(*a*) In a closed antepenultima, e.g. in the proper names אֶבְיָתָר and אֶבְיָסָף, where LXX Ἀβι-=אֲבִי, which is certainly the better reading, cf. Ulmer, *Die semit. Eigennamen*, 1901, p. 12; or in a closed penultima, e.g. יֶהְדֶּה, but also יֶדְכֶם *your hand*, for *yadᵉkhêm*. In all these cases the character of the surrounding consonants (see § 6 *q*) has no doubt had an influence.

(*b*) Regularly before a guttural with *Qameṣ* or *Ḥaṭeph Qameṣ*, *q* where the strengthening has been dropped, provided that a lengthening of the *Pathaḥ* into *Qameṣ* be not necessary, e.g. אֶחָיו *his brothers*, for *'aḥâw*; כֶּחָשׁ *false*, for *kaḥāš*; פֶּחָה *governor*, constr. st. פַּחַת; פֶּחָם *coal*; הֶחָי *the living* (with the article, הֶ for הַ); יִתְּנֶחָם Nu 23[19], &c., and so always before הָ and חָ, as הַחֳדָשִׁים *the months*, see § 35 *k*. Before הָ and עָ *Seghôl* generally stands only in the second syllable before the tone, e.g. הֶהָרִים *the mountains*; הֶעָוֹן *the guilt*; immediately before the tone *Pathaḥ* is lengthened into a (pretonic) *Qameṣ*, e.g. הָהָר, הָעָם; but cf. also הִטֶּהָרוּ Nu 8[7]. Before the weak consonants א and ר (cf. § 22 *c*, *q*), the lengthening of the *Pathaḥ* into *Qameṣ* almost always takes place, e.g. הָאָב *the father*, pl. רְאָבוֹת; רָאשׁ *the head*, pl. הָרְאָשִׁים. Exceptions, הֶרָה *towards the mountain*, Gn 14[10], in the tone-syllable, for *hárrā*; יְבֶרֶכְיָהוּ (pr. name) for יְבָרֶכְיָהוּ. On הֶ as a form of the interrogative הַ (הֲ), see § 100 *n*; on מֶה for מָה (מַה), § 37 *e*, *f*. Finally, אֶבֶלְךָ Ex 33[3] also comes partly under this head, in consequence of the loss of the strengthening, for אֲבַלְךָ, and יְחֶזְקֵאל *Ezekiel* for יְחַזְקֵאל=יְחִזְקֵאל *God strengthens*.

(*c*) As a modification of the original *Pathaḥ* in the first class of the segholate *r* forms (§ 93 *g*), when a helping vowel (§ 28 *e*) is inserted after the second consonant. Thus the ground-form *kalb* (*dog*), after receiving a helping *Seghôl*, is modified into כֶּלֶב (also in modern Arabic pronounced *kelb*),[1] *yarḥ* (*month*), with a helping *Pathaḥ*, יֶרַח. The same phenomenon appears also in the formation of verbs, in cases like יֶגֶל (jussive of the Hiph'il of גָּלָה), with a helping *Seghôl*, for *yagl*.

3. The attenuation of *ă* to *ĭ* is very common in a toneless closed syllable. *s*

(*a*) In a firmly closed syllable, מִדּוֹ *his measure*, for מַדּוֹ (in a sharpened syllable); יְלִדְתִּיךָ *I have begotten thee*, from יָלַדְתִּי with the suffix ךָ; cf. Lv 11[44], Ez 38[23], and § 44 *d*. Especially is this the case in a large number of *segholates*

[1] So the LXX write Μελχισεδέκ for מַלְכִּיצֶדֶק.

from the ground-form *qaṭl*, when combined with singular suffixes, e.g. צִדְקִי *my righteousness*, for *ṣadqi*.

t (*b*) In a loosely-closed syllable, i.e. one followed by an aspirated *Begadk*ᵉ*phath*, as דִּמְּכֶם *your blood*, for דַּמְכֶם, and so commonly in the *st. constr. plur.* of segholates from the ground-form *qaṭl*, e.g. בִּגְדֵי from בֶּגֶד (ground-form *bagd*) *a garment*. In most cases of this kind the attenuation is easily intelligible from the nature of the surrounding consonants. It is evident from a comparison of the dialects, that the attenuation was consistently carried out in a very large number of noun and verb-forms in Hebrew, as will be shown in the proper places.[1]

u 4. *S*ᵉ*ghôl* arises, in addition to the cases mentioned in *o* and *p*, also from the weakening of *ā* of the final syllable in the isolated cases (ה֫ for ה֫) in 1 S 28[15] (? see § 48 *d*), ψ 20[4] (?), Is 59[5], Pr 24[14] (see § 48 *l*); for examples of Locative forms in ה֫ see § 90 *i* end.

v 5. Among the *Haṭepḥ*-sounds ֲ is shorter and lighter than ֳ, and consequently the vowel group ֲ ַ is shorter than ֳ ָ; e.g. אֱדוֹם *Edom*, but אֲדֳמִי (*Edomite*), shortened at the beginning because the tone is thrown forward; אֱמֶת (*ᵉmêth*) *truth*, אֲמִתּוֹ *his truth*; נֶעֱלָם *hidden*, pl. נֶעֱלָמִים; הֶעֱבַרְתִּי but וְהֶעֱבַרְתִּי; but also conversely נֶעֱשָׂה fem. נֶעֱשָׂתָה, cf. § 63 *f*, 3.

w 6. To the chapter on vowel changes belongs lastly the *dissimilation* of vowels, i.e. the change of one vowel into another entirely heterogeneous, in order to prevent two similar, or closely related vowels, from following one another in the same word.[2] Hence לוּלֵא for *lû lô* (unless). Cf. also חִיצוֹן from חוּץ; רִאשׁוֹן from רֹאשׁ; תִּיכוֹן from תּוֹךְ; נִכְחוֹ from נֹכַח; עֵילִם from stem עוּר; most probably also יְלוֹד *offspring*, קִפּוֹד *porcupine*, for יָלִיד, קָפֹד, see § 68 *c*, note.—On the proper names יְהוֹא and יְשׁוֹעַ, which were formerly explained in the same way, see now Prätorius, *ZDMG.* 1905, p. 341 f.

§ 28. *The Rise of New Vowels and Syllables.*

a 1. According to § 26 *m* a half-syllable, i.e. a consonant with Šᵉwâ mobile (always weakened from a short vowel), can only occur in close dependence on a full syllable. If another half-syllable with simple Šᵉwâ follows, the first takes a full short vowel again.[3] This vowel is almost always *Ḥireq*. In most cases it is probably an attenuation of an original *ă*, and never a mere helping vowel. In some instances analogy may have led to the choice of the *ĭ*. Thus, according to § 102 *d*, the prefixes בְּ, כְּ, לְ before a consonant with *Šᵉwâ mobile* become בִּ, כִּ, לִ, e.g. בִּפְרִי, כִּפְרִי, לִפְרִי; before יְ they are pointed as in בִּיהוּדָה (from *bi-yᵉhûdā*, according to § 24 *c*); so too with *Wāw copulative*, e.g. וִיהוּדָה for וְיְ attenuated from וַיְ. The first half-

[1] Analogous to this attenuation of *ă* to *ĭ* is the Lat. *tango, attingo; laxus, prolixus*; to the transition of *ă* to *ĕ* (see above, *a*), the Lat. *carpo, decerpo*; *spargo, conspergo*.

[2] Cf. Barth, *Die Nominalbildung in den semit. Spr.*, p. xxix; A. Müller, *Theol. Stud. u. Krit.*, 1892, p. 177 f., and Nestle, ibid., p. 573 f.

[3] Except יְ *and*, which generally becomes יִ before a simple Šᵉwâ, cf. § 104 *c*.

syllable, after the restoration of the short vowel, sometimes combines with the second to form a firmly closed syllable, e. g. לִנְפֹּל Nu 14[3] for *lin^{e}phōl*, and so almost always in the infin. constr. after ל (§ 45 *g*); in isolated cases also with כְּ, as כְּוֻכַּר Jer 17[2].

b **2.** If a guttural with *Ḥaṭeph* follows, the original *ă* of the prefixes is retained before Ḥaṭeph Pathaḥ, but before Ḥaṭeph Seghol or Ḥaṭeph Qameṣ it is modified to the short vowel contained in the *Ḥaṭeph*. Thus arise the vowel groups חֲ֫, חֱ֫, חֳ֫, e. g. וַאֲנִי *and I*, כַּאֲשֶׁר *as*, לַעֲבֹד *to serve*, לֶאֱכֹל *to eat*, לַחֳלִי *in sickness*. On the Metheg with every such short vowel, see § 16 *f*, δ. Sometimes here also a fully closed syllable is formed. In such a case, the prefix takes the short vowel, which would have belonged to the suppressed *Ḥaṭeph*, e. g. לַחְטֹב for לַחֲטֹב; לַחְמָם for לַחֲמָם Is 47[14] (see § 67 *cc*); לֶאְסֹר but also לֶאֱסֹר; and even וַעְצֹר Jb 4[2], cf. Gn 32[16]. So always in the Infin. and Imperat. Qal of the verbs הָיָה *to be* and חָיָה *to live*, e. g. לִהְיוֹת *to be*, וִהְיוּ *and be ye*; even with מִן, as מֵהְיוֹת, on which cf. § 102 *b*; but וֶהְיֵה *and be*, וֶחְיֵה *and live*, have *ĕ* instead of *ĭ* under the prefix. For the Metheg, cf. § 16 *f*, ε.

c **3.** When a *Ḥaṭeph* in the middle of a word, owing to flexional changes, would stand before a vocal *Šᵉwâ*, it is changed into the short vowel, with which it is compounded. This applies especially to cases in which the *Ḥaṭeph* stands under a guttural instead of quiescent *Šᵉwâ*, as an echo of the preceding short vowel, e. g. יַעֲמֹד *he will stand* (for יְעַמֹּד), but plur. יַעַמְדוּ for *ya'^{a}m^{e}dhû*, and נֶהֶפְכוּ for *nĕh^{ă}ph^{e}khû* (*they have turned themselves*), פָּעָלְךָ *thy work*, cf. § 26 *k*. The syllables are to be divided *yă'ă-m^{e}dhû*, and the second *ă* is to be regarded exactly as the helping *Pathaḥ* in נַעַר, &c.[1]

d **4.** At the end of words, syllables occur which close with two consonants (§ 10 *i*, § 26 *r*), but only when the latter of the two is an emphatic consonant (ט, ק) or a tenuis (viz. ב, ד, ך, ת[2]), e. g. יִשְׁטְ *let him turn aside*, וַיַּשְׁקְ *and he caused to drink*, אָמַרְתְּ *thou* (fem.) *hast said*, וַיִּבְךְ *and he wept*, וַיֵּרְדְ *and let him have dominion*, וַיִּשְׁבְּ *and he took captive*.

c This harsh ending is elsewhere avoided by the Masora,[3] which inserts between the two final consonants a helping vowel, usually

---

[1] In Ju 16[13] read תְּאָרֵנִי not (with Opitius, Hahn and others) תארגי.

[2] With a final ךָ, the only example is תּוֹסְכְּ Pr 30[6], where several MSS. and printed editions incorrectly have ךְ without Dageš. Instead of this masoretic caprice we should no doubt read תּוֹסֵךְ.

[3] An analogy to this practice of the Masora is found among the modern Beduin, who pronounce such a helping vowel before *ḥ*, *ḫ*, *ḫ*, *ġ*; cf. Spitta, *Gramm. des arab. Vulgärdialektes von Aegypten*, Lpz. 1880, § 43 *d*.

Seghôl, but with medial or final gutturals a *Pathaḥ*,[1] and after י a *Ḥireq*, e. g. וַיִּגֶל *and he revealed*, for *wayyiyl*; יִרְבּ *let it multiply*, for *yirb*; קֹדֶשׁ *holiness*, ground-form *qudš*; נַחַל *brook*, ground-form *naḥl*; שָׁלַחְתָּ[2] for שָׁלַחְתְּ *thou hast sent*; בַּיִת *house*, ground-form *bayt*. These helping vowels are, however, to be regarded as exactly like *furtive Pathaḥ* (§ 22 *f*, *g*); they do not alter the monosyllabic character of the forms, and they disappear before formative suffixes, e. g. קָדְשִׁי *my holiness*, בֵּיְתָה *home-ward*.

f 5. On the rise of a full vowel in place of a simple *Šewâ*, under the influence of the *pause*, see § 29 *m*; on initial אֵ for אֶ, see § 23 *h*.

§ 29. *The Tone, its Changes and the Pause.*

a 1. The principal tone rests, according to the Masoretic accentuation (cf. § 15 *c*), as a rule on the final syllable, e. g. קָטַל, דָּבָר, דִּבְרֵי, דִּבָּרִים, קִרְדֹּן, קָטַלְתֶּם—in the last five examples on the formative additions to the stem. Less frequently it rests on the penultima, as in לַיְלָה *night*, קָטַלְתָּ, קָמוּ, נָלוּ; but a closed penultima can only have the tone if the ultima is open (e. g. קָטַלְתָּ, לִבְנָה, קָטְמָה), whilst a closed ultima can as a rule only be without the tone if the penultima is open, e. g. וַיָּקָם, וַיָּקָם; see also below, *e*.

b A kind of counter-tone or secondary stress, as opposed to the principal tone, is marked by *Metheg* (§ 16 *c*). Words which are closely united by *Maqqeph* with the following word (§ 16 *a*) can at the most have only a secondary tone.

c 2. The original tone of a word, however, frequently shifts its place in consequence either of changes in the word itself, or of its close connexion with other words. If the word is increased at the end, the tone is moved forward (*descendit*) one or two places according to the length of the addition, e. g. דָּבָר *word*, plur. דְּבָרִים; דִּבְרֵיכֶם *your words*; קֹדֶשׁ *holy thing*, plur. קְדָשִׁים; קָטַלְתָּ with suffix קְטַלְתָּהוּ, with *Wāw consecutive* וְקָטַלְתָּ. On the consequent vowel-changes, see § 27 *d*, *i–m*.

d 3. On the other hand, the original tone is shifted from the ultima to the penultima (*ascendit*):

---

[1] On the apparent exceptions דָּשֵׁא, &c., cf. § 22 *e*; other instances in which א has entirely lost its consonantal value, and is only retained orthographically, are חֵטְא *sin*, גַּיְא *valley* (also גַּי), שָׁוְא *vanity* (Jb 15[31] *Kethibh* שָׁו).

[2] In this form (§ 65 *g*) the *Dageš lene* remains in the final *Tāw*, although a vowel precedes, in order to point out that the helping *Pathaḥ* is not to be regarded as a really full vowel, but merely as an orthographic indication of a very slight sound, to ensure the correct pronunciation. An analogous case is יְחַד *yiḥăd* from חָדָה (§ 75 *r*).

(*a*) In many forms of the Imperfect, under the influence of a prefixed *Wāw consecutive* (וְ see § 49 *c–e*), e. g. יֹאמַר *he will say*, וַיֹּאמֶר *and he said*; יֵלֵךְ *he will go*, וַיֵּלֶךְ *and he went*. Cf. also § 51 *n* on the impf. Niph'al, and § 65 *g*, end, on the impf. Pi'el; on these forms in Pause, when the וְ *consec.* does not take effect, see below, *p*.

(*b*) For rhythmical reasons (as often in other languages), when *e* a monosyllable, or a word with the tone on the first syllable, follows a word with the tone on the ultima, in order to avoid the concurrence of two tone-syllables.[1] This rhythmical retraction of the tone, however (נָסוֹג אָחוֹר *receding*, as it is called by the Jewish grammarians), is only admissible according to *a*, above, provided that the penultima, which now receives the tone, is an open syllable (with a long vowel; but see *g*), whilst the ultima, which loses the tone, must be either an open syllable with a long vowel, e. g. קָרָא לָיְלָה Gn 1^5, 4^{17}, 27^{25}, Ex 16^{29}, ψ 5^{11}, 104^{14}, Dn 11^{13}, or a closed syllable with a short vowel, e. g. תֹּאכַל לָחֶם Gn 3^{19}, Jb 3^3, 22^{28}.[2] The *grave* suffixes -כֶם, -כֶן, -הֶם, -הֶן are exceptions, as they never lose the tone. Moreover a fair number of instances occur in which the above conditions are fulfilled, but the tone is not retracted, e. g. esp. with הָיָה, and before א; cf. Qimḥi, *Mikhlol*, ed. Rittenberg (Lyck, 1862), p. 4^b, line 13 ff.

Although *Ṣere* can remain in a closed ultima which has lost the tone, it *f* is perhaps not to be regarded in this case (see § 8 *b*) as a long vowel. At any rate it then always has, in correct editions, a retarding *Metheg*, no doubt in order to prevent its being pronounced as *Seghôl*, e. g. לִבְעֵר יָיִן Nu 24^{22}; cf. Nu 17^{23}, Ju 20^2, Is 66^3, Jer 23^{29}, Ez 22^{25}, ψ 37^7, and even with a following *furtive Pathaḥ* Pr 1^{19}, 11^{26}, &c., although there is no question here of two successive tone-syllables. In other cases the shortening into *Seghôl* does take place, e. g. הוֹלֵם פַּעַם *who smiteth the anvil*, Is 41^7, for הוֹלֵם פַּעַם; מֵאֵת שֵׁמֶר 1 K 16^{24}.—The retraction of the tone even occurs when a half-syllable with a Šewâ mobile precedes the original tone-syllable, e. g. וַיֹּאמְרוּ לוֹ Gn 19^5, and frequently; יוֹרְדֵי בוֹר ψ 28^1; סָמְנוּ לִי

[1] Even Hebrew *prose* proceeds, according to the accentuation, in a kind of iambic rhythm. That this was intended by the marking of the tone, can be seen from the use of Metheg.—Jos. Wijnkoop in *Darche hannesigah sive leges de accentus Hebraicae linguae ascensione*, Ludg. Bat. 1881, endeavours to explain, on euphonic and syntactical grounds, the numerous cases in which the usual retraction of the tone does not occur, e. g. וּבוֹרֵא חֹשֶׁךְ Is 45^7, where the object probably is to avoid a kind of hiatus; but cf. also Am 4^{13}. Prätorius, *Ueber den rückweich. Accent im Hebr.*, Halle, 1897, has fully discussed the *nasog 'aḥor*.

[2] The reading עֲרָיִים (so even Opitius and Hahn) Ez 16^7 for עָרִיּוֹת is rightly described by Baer as 'error turpis'.—That an unchangeable vowel in a closed final syllable cannot lose the tone is shown by Prätorius from the duplication of the accent (see above, § 22 *f*).

ψ 31[5]; מְטַעֲנֵי חֹרֶב Is 14[19]; as also when the tone-syllable of the second word is preceded by a half-syllable, e. g. עֹשֶׂה פְּרִי Gn 1[11] (on the *Dag. f.*, cf. § 20 *f*); לָתֵת לְךָ Gn 15[7] (cf. § 20 *c*).

g According to the above, it must be regarded as anomalous when the Masora throws back the tone of a closed ultima upon a *virtually* sharpened syllable with a short vowel, e. g. אַחַר כֵּן 1 S 10[5], § 101 *a*; וְכָחַשׁ בּוֹ Jb 8[18], cf. Lv 5[22], Ho 9[2]; לְצַחֵק בָּנוּ Gn 39[14.17]; whereas it elsewhere allows a closed penultima to bear the tone only when the ultima is open. Still more anomalous is the placing of the tone on a *really* sharpened syllable, when the ultima is closed, as in הֵקִם עָל 2 S 23[1]; נְכַר שׁוֹעַ Jb 34[19]; cf. also יְקִם־לָיְן Gn 4[24], with Metheg of the secondary tone. We should read either הֵקִם, or, with Frensdorff, *Massora Magna*, p. 167, Ginsb., Kittel, after Bomb., הֵקֵם. Other abnormal forms are וַיַּחֲזֵק בּוֹ Ex 4[4] (for similar instances see § 15 *c*, end) and וַיְהִיוּ שָׁם Dt 10[5].

h (*c*) In *pause*, see *i–v*.

The meeting of two tone-syllables (see *e*, *f*) is avoided also by connecting the words with Maqqèph, in which case the first word entirely loses the tone, e. g. וַיִּכְתָּב־שָׁם *and he wrote there*, Jos 8[32].

i **4.** Very important changes of the tone and of the vowels are effected by the *pause*. By this term is meant the strong stress laid on the tone-syllable in the last word of a sentence (verse) or clause. It is marked by a great *distinctive accent*, *Sillûq*, *'Athnâḥ*, and in the accentuation of the books תא"ם, *'Ôlè wᵉyôrēd* (§ 15 *h*). Apart from these principal pauses (*the great pause*), there are often pausal changes (*the lesser pause*) with the lesser distinctives, especially *Sᵉgolta*, *Zaqeph qaṭon*, *Rᵉbhîaʿ*, and even with *Pašṭa*, *Tiphḥa*, *Gereš*, and (Pr 30[4]) *Pazer*.[1] The changes are as follows:

k (*a*) When the tone-syllable naturally has a short vowel, it as a rule becomes tone-long in *pause*, e. g. קָטַל, קָטָל; מַיִם, מָיִם; קְטַלְתָּ, קְטָלְתָּ. An *ă* which has been modified to *Sᵉghôl* usually becomes *ā* in *pause*, e. g. קֶשֶׁר (ground-form *qašr*) in *pause* קָשֶׁר 2 K 11[14]; אֶרֶץ אֶרֶץ Jer 22[29];

[1] In most cases, probably on account of a following guttural or (at the end of a sentence) ה (cf. e. g. Ex 21[31], Jer 3[9] [but Ginsb. ותחנף], Ru 4[4], Ec 11[6] [but Ginsb. יכשר]; before ו Jer 17[11]) [see also § 29 *w*]. שָׂמָה אֶת־ 1 S 7[17], וְאֶרֶץ Is 65[17], Pr 25[3], where *ā* has *munaḥ*, are very irregular, but the lengthening here is probably only to avoid the cacophony *šăphāṭ 'ĕt*. In the same way הֵיצְלָח Ez 17[15] (with Mahpakh before הָ) and וַיִּקְרָם Ez 37[8] (with Darga before עָ) are to be explained. The four instances of אֲנִי for אֲנִי apparently require a different explanation; see § 32 *c*.—The theory of Olshausen and others that the phenomena of the *pause* are due *entirely* to liturgical considerations, i. e. that it is 'a convenient way of developing the musical value of the final accents by means of fuller forms' in liturgical reading (Sievers, *Metr. Studien*, i. 236, also explains pausal forms like קָטָלָה, יִקְטְלוּ, as 'late formations of the grammarians'), is contradicted by the fact that similar phenomena are still to be observed in modern vulgar Arabic, where they can only be attributed to rhythmical reasons of a general character.

also in 2 K 4^{31} read קָשֵׁב with ed. Mant., &c. (Baer קָשֵׁב).—דִּבֵּר becomes in *pause* דִּבֵּר.

l Sometimes, however, the distinct and sharper *ă* is intentionally retained in *pause*, especially if the following consonant is strengthened, e. g. יִבְחָנוּ Jb 4^{20}, or ought to be strengthened, e. g. בְּכֹרָה 2 S 12^3, בֵּן Is 8^1, &c.; but also in other cases as וְזָקַנְתִּי Gn 27^2, because from זָקֵן, cf. below, *q*; עֵד Gn 49^{27}; וְהִקְדִּישָׁנוּ 2 Ch 29^{19} (so Baer, but Ginsb. הִקְדִּישׁ, ed. Mant. הִקְדִּישׁ); and regularly in the numeral אַרְבַּע *four*, Lv 11^{20}, &c. In the accentuation of the three poetical books (§ 15 *d*) the use of *Pathaḥ* with *'Athnaḥ* is due to the inferior pausal force of *'Athnaḥ*, especially after *'Ôlè wᵉyored* (§ 15 *o*); cf. ψ 100^8, Pr 30^9, and Qimḥi, *Mikhlol*, ed. Rittenberg, p. 5^b, line 4 from below. Compare the list of instances of pausal *ă* and *è* in the appendices to Baer's editions.

m (*b*) When a full vowel in a tone-bearing final syllable has lost the tone before an afformative, and has been *vocal Šᵉwâ*, it is restored in *pause* as tone-vowel, and, if short, is lengthened, e. g. קָטַל, *fem.* קָטְלָה (*qāṭᵉlā*), in *pause* קָטְלָה; שָׁמְעוּ (*šimᵉû*), in *pause* שָׁמְעוּ (from sing. שָׁמַע); מָלְאָה, מָלְאָה; יִקְטְלוּ, יִקְטְלוּ[1] (sing. יִקְטֹל). The fuller endings of the Imperfect יֹן and יוּן (§ 47 *m* and *o*) alone retain the tone even when the original vowel is restored. In segholate forms, like לְחִי, פְּרִי (ground-form *laḥy*, *pary*), the original *ă* returns, though under the form of a tone-bearing *Sᵉghôl*, thus לֶחִי, פֶּרִי; original *ĭ* becomes *ē*, e. g. חֵצִי, in *pause* חֵצִי; original *ŏ* (*ŭ*) becomes *ō*, חֳלִי (ground-form *ḥuly*), in *pause* חֹלִי (§ 93 *x*, *y*, *z*).

n On the analogy of such forms as לֶחִי, &c., the shortened Imperfects יְהִי and יְחִי become in *pause* יֶהִי, יֶחִי, because in the full forms יִהְיֶה *he will be*, and יִחְיֶה *he will live*, the *ĭ* is attenuated from an original *ă*. Similarly שְׁכֶם *shoulder*, in *pause* שֶׁכֶם (ground-form *šakhm*), and the pron. אֲנִי *I*, in *pause* אָנִי; cf. also the restoration of the original *ă* as *è* before the suffix ךָ *thy, thee*, e. g. דְּבָרְךָ *thy word*, in *pause* דְּבָרֶךָ; יִשְׁמָרְךָ *he guards thee*, in *pause* יִשְׁמָרֶךָ; but after the prepositions בְּ, לְ, אֵת (אֶת) the suffix ךָ in *pause* becomes ךָ, e. g. בְּךָ, לְךָ, אִתְּךָ.

o (*c*) This tendency to draw back the tone in *pause* to the *penultima* appears also in such cases as אֲנֹכִי *I*, in *pause* אָנֹכִי; אַתָּה *thou*, in *pause* אָתָּה (but in the three poetically accented books also אָתָּה, since in those books *'Athnaḥ*, especially after *'Ôlè wᵉyôrēd*, has only the force of a *Zaqeph*; hence also יִמְלְאוּ Pr 24^4 instead of יִמָּלְאוּ[2]; עַתָּה *now*, עָתָּה; and in other sporadic instances, like כָּלוּ ψ 37^{20} for כָּלוּ; but in 1 S 12^{25}

[1] Such a pausal syllable is sometimes further emphasized by strengthening the following consonant, see § 20 *i*.

[2] יִפְּלוּ ψ 45^6, cf. also יִבְּלְמוּ ψ 40^{15}, is to be explained in the same way, but not הִמְּלָטִי Zc 2^{11}, where, on the analogy of הִשָּׁמְרוּ Je 9^3, we should expect הִמָּלְטִי.

תִּפְּפוּ with Baer and Ginsb., is to be preferred to the reading of ed. Mant., &c.

p (*d*) Conversely all forms of imperfects consecutive, whose final syllable, when not in *pause*, loses the tone and is pronounced with a short vowel, take, when in *pause*, the tone on the ultima with a tone-long vowel, e. g. וַיָּמָת *and he died*, in *pause* וַיָּמֹת.

q Of other effects of the *pause* we have still to mention, (1) the transition of an *ē* (lengthened from *ĭ*) to the more distinct *ă* (see above, *l*), e. g. הֵהֵתָּו for הֵתָּו Is 18[5] (cf. § 67 *v*; § 72 *dd*); קָמַל Is 33[9]; אָצַל 1 Ch 8[38] (beside אָצֵל [, see *v.* 37. Cf. : טָבְאַל Is 7[6] (טָבְאֵל Ezr 4[7]); : שָׁשָׁר Jer 22[14]; : סָפָרַד Ob 20; : וַיִּנָּפַשׁ Ex 31[17]; : וַיֹּאנַיְשׁ 2 S 12[15] (below, § 51 *m*)—S. R. D.]); הֲפַר Gn 17[14]; הַפְצַר 1 S 15[23]; תְּאַחַר ψ 40[18]; הַרְחַק Jb 13[21], mostly before liquids or sibilants (but also הָשְׁבָּ Is 42[22], and without the *pause* תֵּרַד La 3[48]). So also וַיֶּלֶךְ (shortened from יֵלֵךְ) becomes in *pause* וַיֵּלַךְ; cf. וַיֵּלַךְ La 3[2]; תֵּלַן for תָּלִן Ju 19[20]. On *Seghôl* in *pause* instead of Ṣere, cf. § 52 *n*, 60 *d*, and especially § 75 *n*, on וְהָיֶה Pr 4[4] and 7[2].

r (2) The transition from *ă* to *è* in the ultima; so always in the formula לְעוֹלָם וָעֶד (for עַד) *for ever and ever*.

s (3) The *pausal Qameṣ* (according to § 54 *k*, lengthened from original *ă*) in *Hithpa'ēl* (but not in *Pi'ēl*) for *Ṣere*, e. g. יִתְהַלָּךְ Jb 18[8] for יִתְהַלֵּךְ. But pausal forms like שָׁבָט, סָתָר (in the *absol. st.* שֵׁבֶט, סֵתֶר) go back to a secondary form of the *abs. st.* שֶׁבֶט, סֶתֶר.

t (4) The restoration of a final *Yodh* which has been dropped from the stem, together with the preceding vowel, e. g. בָּעָיו, אֵתָיו Is 21[12], for בְּעִי, אֶתִי, the latter also without the *pause* Is 56[9.12]; cf. Jb 12[6], and the same occurrence even in the word *before* the *pause* Dt 32[37], Is 21[12].

u (5) The transition from *ô* or *ō* to *ā* in *pause*: as שְׁאָלָה Is 7[11], if it be a locative of שְׁאֹל, and not rather imperat. Qal of שָׁאַל; שָׁכָלְתִּי Gn 43[14] for שָׁכֹלְתִּי; עָז Gn 49[3]; יִטְרָף Gn 49[27]; perhaps also שָׁרָץ 1 K 22[34], Is 59[17], and מַשְׁקָלֶת Is 28[17], cf. 2 K 21[13]. On the other hand the regular pausal form יֶחְפֵּץ (ordinary imperfect יַחְפֹּץ) corresponds to a perfect חָפֵץ (see § 47 *h*).

v (6) When a *Pathaḥ* both precedes and follows a virtually strengthened guttural, the second becomes *ā* in *pause*, and the first *Seghôl*, according to § 22 *c* and § 27 *q*, e. g. אַחַי *my brothers*, in *pause* אָחִי. Similarly in cases where an original *Pathaḥ* after a guttural has been attenuated to *i* out of *pause*, and then lengthened to *ē* with the tone (cf. § 54 *k*), e. g. יִתְנַחֵם, but in pause יִתְנֶחָם Dt 32[36]; cf. Nu 8[7], 23[19], Ez 5[13], ψ 135[14].—On pausal *Ṣere*, for *Seghôl*, in infin., imperat., and imperf. of verbs ל״ה, see § 75 *hh*.

w [Other instances of the full vowel in lesser pause, where the voice would naturally rest on the word, are Gn 15[14] יעבדו, Is 8[15], 40[24], Ho 4[12], 8[7], Dn 9[15], and very often in such cases.]

SECOND PART

ETYMOLOGY, OR THE PARTS OF SPEECH

§ 30. *Stems and Roots*[1]*: Biliteral, Triliteral, and Quadriliteral.*

a 1. Stems in Hebrew, as in the other Semitic languages, have this peculiarity, that by far the majority of them consist of three consonants. On these the meaning essentially depends, while the various modifications of the idea are expressed rather by changes in the vowels, e. g. עמק (עָמַק or עָמֹק; the 3rd pers. sing. perf. does not occur) *it was deep*, עָמֹק *deep*, עֹמֶק *depth*, עֵמֶק, *a valley, plain.* Such a stem may be either a verb or a noun, and the language commonly exhibits both together, e.g. זָרַע *he has sown*, זֶרַע *seed*; חָכַם *he was wise*, חָכָם *a wise man.* For practical purposes, however, it has long been the custom to regard as the stem the *3rd pers. sing. Perf. Qal* (see § 43), since it is one of the simplest forms of the verb, without any formative additions. Not only are the other forms of the verb referred to this stem, but also the noun-forms, and the large number of particles derived from nouns; e. g. קָדַשׁ *he was holy*, קֹדֶשׁ *holiness*, קָדוֹשׁ *holy.*

b Sometimes the language, as we have it, exhibits only the verbal stem without any corresponding noun-form, e. g. סָקַל *to stone*, נָהַק *to bray*; and on the other hand, the noun sometimes exists without the corresponding verb, e. g. אֶבֶן *stone*, נֶגֶב *south.* Since, however, the nominal or verbal stems, which are not now found in Hebrew, generally occur in one or more of the other Semitic dialects, it may be assumed, as a rule, that Hebrew, when a living language, also possessed them. Thus, in Arabic, the verbal stem *'ăbĭnă* (*to become compact, hard*) corresponds to אֶאֱבֶן, and the Aramaic verb *n^{e}gab* (*to be dry*) to נֶגֶב.

c Rem. 1. The Jewish grammarians call the stem (i.e. the 3rd pers. sing. Perf. Qal) שֹׁרֶשׁ *root.* Hence it became customary among Christian grammarians to call the stem *radix*, and its three consonants *litterae radicales*, in contradistinction to the *litterae serviles* or *formative letters.* On the correct use of the term *root*, see *g*.

[1] On the questions discussed here compare the bibliography at the head of § 79.

d 2. Others regard the three stem-consonants as a *root*, in the sense that, considered as *vowelless* and unpronounceable, it represents the common foundation of the verbal and nominal stems developed from it, just as in the vegetable world, from which the figure is borrowed, stems grow from the hidden root, e.g.

Root : מלך, the indeterminate idea of *ruling*.

Verb-stem, מָלַךְ *he has reigned*. Noun-stem, מֶלֶךְ *king*.

For the historical investigation of the language, however, this hypothesis of unpronounceable roots, with indeterminate meaning, is fruitless. Moreover, the term *root*, as it is generally understood by philologists, cannot be applied to the Semitic triliteral stem (see *f*).[1]

e 3. The 3rd sing. Perf. Qal, which, according to the above, is usually regarded, both lexicographically and grammatically, as the ground-form, is generally in Hebrew a dissyllable, e.g. קָטַל. The monosyllabic forms have only arisen by contraction (according to the traditional explanation) from stems which had a weak letter (ו or י) for their middle consonant, e.g. קָם from *qāwām*; or from stems whose second and third consonants are identical, e.g. צַר and צָרַר (but see below, §§ 67, 72). The dissyllabic forms have themselves no doubt arisen, through a loss of the final vowel, from trisyllables, e.g. קָטָל from *qătălă*, as it is in literary Arabic.

f **2.** The law of the triliteral stem is so strictly observed in the formation of verbs and nouns in Hebrew (and in the Semitic languages generally), that the language has sometimes adopted artificial methods to preserve at least an appearance of triliteralism in monosyllabic stems, e.g. שֶׁבֶת for the inf. constr. of verbs פ״י; cf. § 69 *b*. Conversely such nouns, as אָב *father*, אֵם *mother*, אָח *brother*, which were formerly all regarded as original monosyllabic forms (*nomina primitiva*), may, in some cases at least, have arisen from mutilation of a triliteral stem.

g On the other hand, a large number of triliteral stems really point to a biliteral base, which may be properly called a *root* (*radix primaria, bilitteralis*), since it forms the starting-point for several triliteral modifications of the same fundamental idea. Though in themselves unpronounceable, these roots are usually pronounced with *ă* between the two consonants, and are represented in writing by the sign √, e.g. √כר as the root of כָּרַר, כָּרָה, כּוֹר, אָכַר. The reduction of a stem to the underlying root may generally be accomplished with certainty when the stem exhibits one weak consonant with two strong ones, or when the second and third consonants are identical. Thus e.g. the stems דָּכַךְ, דּוּךְ, דָּכָא, דָּכָה may all be traced to the idea of *striking, breaking*, and the root common to them all is evidently the two strong consonants דך (*dakh*). Very frequently, however, the development of the root into a stem is effected by the addition of

[1] Cf. Philippi, 'Der Grundstamm des starken Verbums,' in *Morgenländische Forschungen*, Leipz. 1875, pp. 69-106.

a strong consonant, especially, it seems, a sibilant, liquid or guttural.[1] Finally, further modifications of the same root are produced when either a consonant of the root, or the letter which has been added, changes by phonetic laws into a kindred letter (see the examples below). Usually such a change of sound is accompanied by a modification of meaning.

h Examples: from the root קץ (no doubt *onomatopoetic*, i.e. imitating the sound), which represents the fundamental idea of *carving off, cutting in pieces*, are derived directly: קצץ and קצה *to cut, to cut off*; the latter also metaph. *to decide, to judge* (whence קָצִין, Arab. *qâḍi, a judge*); also קָצַב *to cut off, to shear*, קָצַף *to tear, to break*, קָצַע *to cut into*, קָצַר *to cut off, to reap*. With a dental instead of the sibilant, קט, קד, whence קָטַב *to cut in pieces, to destroy*, קָטַל *to cut down, to kill*, קָטַף *to tear off, to pluck off*. With the initial letter softened, the root becomes כס, whence כָּסַח *to cut off*, and כָּסַם *to shave*; cf. also נכס Syr. *to slay (sacrifice), to kill*. With the greatest softening to גז and גד; גָּזַז *to cut off, to shear*; גָּזָה *to hew stone*; גּוּז, גָּזַם, גָּזַע, גָּזַל, גָּזַר *to cut off, to tear off, eat up*; similarly גָּרַד *to cut into*, גָּרַע *to cut off*; cf. also גָּדַה, גָּדַף, גָּרַר. Allied to this root also is the series of stems which instead of a palatal begin with a guttural (ח), e.g. חָרַד *to split, cut*; cf. also חרל, חרק, חרר, חרשׁ, and further חצר, חצין, חצה, חצב, חסף, חסם, חסל, חטף, חטט, חטב, חזז, חזה, חוץ, חוּם in the Lexicon.

The root הם expresses the sound of *humming*, which is made with the mouth closed (*μύω*); hence נָהַם, הָמָה, הוּם, הָמַם (נָאַם), Arab. *hámhama, to buzz, to hum, to snarl*, &c.

As developments from the root רע cf. the stems רָעַד, רָעַל, רָעַם, רָעַע, רָעַן, רָעַשׁ. Not less numerous are the developments of the root בר (פל, פר) and many others.[2]

Closer investigation of the subject suggests the following observations:

i (*a*) These roots are mere *abstractions* from stems in actual use, and are themselves not used. They represent rather the hidden germs (*semina*) of the stems which appear in the language. Yet these stems are sometimes so short as to consist simply of the elements of the root itself, e.g. תַּם *to be finished*, קַל *light*. The ascertaining of the root and its meaning, although in many ways very difficult and hazardous, is of great lexicographical importance. It is a wholly different and much contested question whether there ever was a period in the development of the Semitic languages when purely *biliteral* roots, either isolated and invariable or combined with inflexions, served for the communication of thought. In such a case it would have to be admitted, that the language at first expressed extremely few elementary ideas, which were only gradually extended by additions to denote more delicate shades of meaning. At all events this process of transformation would belong to a period of the language which is entirely outside our range. At the most only the gradual multiplication of *stems* by means of phonetic change (see below) can be historically proved.

k (*b*) Many of these monosyllabic words are clearly imitations of sounds, and

[1] That *all* triliteral stems are derived from biliterals (as König, *Lehrg.* ii. 1, 370; M. Lambert in *Studies in honour of A. Kohut*, Berl. 1897, p. 354 ff.) cannot be definitely proved.

[2] Cf. the interesting examination of the Semitic roots QR, KR, XR, by P. Haupt in the *Amer. Journ. of Sem. Lang.*, xxiii (1907), p. 241 ff.

sometimes coincide with roots of a similar meaning in the Indo-Germanic family of languages (§ 1 *h*). Of other roots there is definite evidence that Semitic linguistic consciousness regarded them as onomatopoetic, whilst the Indo-Germanic instinct fails to recognize in them any imitation of sound.

l (*c*) Stems with the harder, stronger consonants are in general (§ 6 *r*) to be regarded as the older, from which a number of later stems probably arose through softening of the consonants; cf. פזר and בזר, צחק and שחק, צעק and שעק, עלץ and עלס; רקק and רכך, and the almost consistent change of initial ו to י. In other instances, however, the harder stems have only been adopted at a later period from Aramaic, e.g. טעה, Hebr. תעה. Finally in many cases the harder and softer stems may have been in use together from the first, thus often distinguishing, by a kind of sound-painting, the intensive action from the less intensive; see above קצץ *to cut*, גזז *to shear*, &c.

m (*d*) When two consonants are united to form a root they are usually either both emphatic or both middle-hard or both soft, e.g. קן, קט, קם, גן, גד never קז, גס, גט, גץ, בץ. Within (triliteral) stems the first and second consonants are never identical. The apparent exceptions are either due to reduplication of the root, e.g. דרה (ψ 42[5], Is 38[15]), Arabic دارا, or result from other causes, cf. e.g. בבה in the Lexicon. The first and third consonants are very seldom identical except in what are called concave stems (with middle ו or י), e.g. צוץ, גון; note, however, נתן, נגן, שׁמשׁ, שׁרשׁ, and on עלע Jb 39[30] see § 55*f*. The second and third consonants on the other hand are very frequently identical, see § 67.[1]

n (*e*) The softening mentioned under *l* is sometimes so great that strong consonants, especially in the middle of the stem, actually pass into vowels: cf. § 19 *o*, and עָוְלָה Lv 16[8 ff.] if it is for עַוָּלָה.

o (*f*) Some of the cases in which triliteral stems cannot with certainty be traced back to a biliteral root, may be due to a combination of two roots—a simple method of forming expressions to correspond to more complex ideas.

p 3. Stems of *four*, or even (in the case of nouns) of *five* consonants[2] are secondary formations. They arise from an extension of the triliteral stem: (*a*) by addition of a fourth stem-consonant; (*b*) in some cases perhaps by composition and contraction of two triliteral stems, by which means even *quinquiliterals* are produced. Stems which have arisen from reduplication of the biliteral root, or from the mere repetition of one or two of the three original stem-consonants, e.g. כִּלְכֵּל from כול or כיל, סְחַרְחַר from סחר, are usually not regarded as *quadriliterals* or *quinqueliterals*, but as *conjugational* forms (§ 55); so also the few words which are formed with the prefix שׁ, as שַׁלְהֶבֶת *flame* from לָהַב, correspond to the Aramaic conjugation *Šaph'ēl*, שַׁלְהֵב.

q Rem. on (*a*). The letters *r* and *l*, especially, are inserted between the first and second radicals, e.g. בָּרְסַם, פָּרְסַם *to eat up*; שַׁרְבִּיט = שַׁבָּט *sceptre* (this insertion of an *r* is especially frequent in Aramaic); זַלְעָפָה *hot wind* from זָעַף

[1] Consonants which are not found together in roots and stems are called *incompatible*. They are chiefly consonants belonging to the same class, e.g. גב, גק, בק, דט, תט, בף, מף, זד, זס, זין, צע, חע, &c., or in the reverse order.

[2] In Hebrew they are comparatively rare, but more numerous in the other Semitic languages, especially in Ethiopic.

to be hot. Cf. Aram. עַרְגֵּל *to roll*, expanded from עגל (conjugation *Pa'ēl*, corresponding to the Hebrew *Pi'ēl*). In Latin there is a similar expansion of *fid, scid, tud, jug* into *findo, scindo, tundo, jungo.* At the end of words the commonest expansion is by means of ל and ן, e.g. גַּרְזֶן *axe*, כַּרְמֶל *garden-land* (from כֶּרֶם), גְּבִעֹל *corolla* (גְּבִיעַ *cup*); cf. § 85, xi.

Rem. on (*b*). Forms such as צְפַרְדֵּעַ *frog*, חֲבַצֶּלֶת *meadow-saffron*, צַלְמָוֶת *shadow of death*,[1] were long regarded as compounds, though the explanation of them all was uncertain. Many words of this class, which earlier scholars attempted to explain from Hebrew sources, have since proved to be *loan-words* (§ 1 *i*), and consequently need no longer be taken into account. *r*

4. A special class of formations, distinct from the fully developed stems of three or four consonants, are (*a*) the *Interjections* (§ 105), which, as being direct imitations of natural sounds, are independent of the ordinary formative laws; (*b*) the *Pronouns.* Whether these are to be regarded as the mutilated remains of early developed stems, or as relics of a period of language when the formation of stems followed different laws, must remain undecided. At all events, the many peculiarities of their formation[2] require special treatment (§ 32 ff.). On the other hand, most of the particles (adverbs, prepositions, conjunctions) seem to have arisen in Hebrew from fully developed stems, although in many instances, in consequence of extreme shortening, the underlying stem is no longer recognizable (see § 99 ff.). *s*

§ 31. *Grammatical Structure.*

P. Lörwald, 'Die Formenbildungsgesetze des Hebr.' (*Hilfsbuch für Lehrer des Hebr.*), Berlin, 1897, is recommended for occasional reference.

1. The formation of the parts of speech from the stems (derivation), and their inflexion, are effected in two ways: (*a*) internally by changes in the stem itself, particularly in its vowels: (*b*) externally by the addition of formative syllables before or after it. The expression of grammatical relations (e.g. the comparative degree and some case-relations in Hebrew) periphrastically by means of separate words belongs, not to etymology, but to syntax. *a*

The external method (*b*) of formation, by affixing formative syllables, which occurs e.g. in Egyptian, appears on the whole to be the more ancient. Yet other families of language, and particularly the Semitic, at a very early period had recourse also to the internal method, and during their youthful vigour widely developed their power of forming derivatives. But the continuous decay of this power in the later periods of language made syntactical circumlocution more and more necessary. The same process may be seen also e.g. in Greek (including modern Greek), and in Latin with its Romance offshoots. *b*

[1] So expressly Nöldeke in *ZAW.* 1897, p. 183 ff.; but most probably it is to be read צַלְמוּת *darkness* from the stem צלם [Arab. *ẓalima*, to be dark].

[2] Cf. Hupfeld, 'System der semitischen Demonstrativbildung,' in the *Ztschr. f. d. Kunde des Morgenl.*, vol. ii. pp. 124 ff., 427 ff.

c **2.** Both methods of formation exist together in Hebrew. The internal mode of formation by means of vowel changes is tolerably extensive (קָטַל, קָטֵל, קָטֹל; קִטֵּל, קִטַּל, &c.). This is accompanied in numerous cases by external formation also (הִקְטִיל, הִתְקַטֵּל, נִקְטַל, &c.), and even these formative additions again are subject to internal change, e.g. הָקְטַל, הָתְקַטַּל. The addition of formative syllables occurs, as in almost all languages, chiefly in the formation of the persons of the verb, where the meaning of the affixed syllables is for the most part still perfectly clear (see §§ 44, 47). It is also employed to distinguish gender and number in the verb and noun. Of case-endings, on the contrary, only scanty traces remain in Hebrew (see § 90).

CHAPTER I

THE PRONOUN

Brockelmann, *Semit. Sprachwiss.*, p. 98 ff.; *Grundriss*, i. 296 ff. L. Reinisch, 'Das persönl. Fürwort u. die Verbalflexion in den chamito-semit. Sprachen' (*Wiener Akad. der Wiss.*, 1909).

§ 32. *The Personal Pronoun. The Separate Pronoun.*

a 1. The personal pronoun (as well as the pronoun generally) belongs to the oldest and simplest elements of the language (§ 30 *s*). It must be discussed *before* the verb, since it plays an important part in verbal inflexion (§§ 44, 47).

b 2. The independent principal forms of the personal pronoun serve (like the Gk. ἐγώ, σύ, Lat. *ego, tu*, and their plurals) almost exclusively to emphasize the nominative-subject (see, however, § 135 *d*). They are as follows:

	Singular.	*Plural.*
1.	*Com.* אָנֹכִי, in *pause* אָנֹכִי; אָנִי, in *pause* אָנִי — *I.*	1. *Com.* אֲנַחְנוּ, in *pause* אֲנָחְנוּ (נַחְנוּ), in *pause* נָחְנוּ (אנו) — *we.*
2.	*m.* אַתָּה (אַתְּ), in *pause* אָתָּה or אַתָּה; *f.* אַתְּ (אַתִּי properly אַתִּי), in *pause* אָתְּ — *thou.*	2. *m.* אַתֶּם; *f.* אַתֶּנָּה (אַתֶּנָה); אַתֶּן (אַתֶּנָ) — *ye.*
3.	*m.* הוּא *he (it).* *f.* הִיא *she (it).*	3. *m.* הֵמָּה (הֵם־), הֵם; *f.* הֵנָּה after *prefixes* הֵן, הֵנָ — *they.*

The forms enclosed in parentheses are the less common. A table of these pronouns with their shortened forms (*pronominal suffixes*) is given in Paradigm A at the end of this Grammar.

Remarks.

I. *First Person.*

c 1. The form אָנֹכִי is less frequent than אֲנִי.[1] The former occurs in

[1] On the prevalence of אָנֹכִי in the earlier Books compare the statistics collected by Giesebrecht in *ZAW.* 1881, p. 251 ff., partly contested by Driver in the *Journal of Philology*, 1882, vol. xi. p. 222 ff. (but cf. his *Introduction*, ed. 6, p. 135, line 1 f.), but thoroughly established by König in *Theol. Stud. u. Krit.*, 1893, pp. 464 ff. and 478, and in his *Einleitung in das A. T.*, p. 168, &c. In some of the latest books אנכי is not found at all, and hardly at all in the Talmud. [For details see the Lexicon, s. v. אֲנִי and אָנֹכִי.]

Phoenician, Moabite, and Assyrian, but in no other of the kindred dialects;[1] from the latter the suffixes are derived (§ 33). The *ô* most probably results from an obscuring of an original *â* (cf. Aram. אֲנָא, Arab. *'ána*). The pausal form אָנִי occurs not only with small disjunctive accents, but even with conjunctives; so always in חַי אָנִי *as I live!* also Is 49[18] with Munaḥ, ψ 119[125] with Merkha (which, however, has been altered from Dᵉḥî), and twice in Mal 1[6]. In all these cases there is manifestly a disagreement between the vocalization already established and the special laws regulating the system of accentuation.

d 2. The formation of the plural, in this and the other persons, exhibits a certain analogy with that of the noun, while at the same time (like the pronouns of other languages) it is characterized by many differences and peculiarities. The short form אנו (אָנוּ) from which the suffix is derived occurs only in Jer 42[6] *Kᵉthîbh*. The form נַחְנוּ (cf. § 19 *h*) only in Ex 16[7.8], Nu 3[32], La 3[42]; נַחְנוּ in *pause*, Gn 42[11]; in Arabic *năḥnu* is the regular form. In the Mišna אנו (אָנוּ) has altogether supplanted the longer forms.

e 3. The pronoun of the 1st person only is, as a rule in languages, of the *common gender*, because the person who is present and speaking needs no further indication of gender, as does the 2nd person, who is addressed (in Greek, Latin, English, &c., this distinction is also lacking), and still more the 3rd person who is absent.

II. *Second Person.*

f 4. The forms of the 2nd person אַתָּה, אַתְּ, אַתֶּם, אַתֶּנָּה, &c., are contracted from *'antā*, &c. The kindred languages have retained the *n* before the ת, e. g. Arab. *'ántā*, fem. *'ánti*, thou; pl. *'ántum*, fem. *'antúnna*, ye. In Syriac אַנְת, fem. אַנְתִי are written, but both are pronounced *'at*. In Western Aramaic אַנְתְּ is usual for both genders.

g אַתְּ (without ה) occurs five times, e. g. ψ 6[4], always as *Kᵉthîbh*, with אַתָּה as *Qᵉrê*. In three places אַתְּ appears as a masculine, Nu 11[15], Dt 5[24], Ez 28[14].

h The feminine form was originally אַתִי as in Syriac, Arabic, and Ethiopic. This form is found seven times as *Kᵉthîbh* (Ju 17[2], 1 K 14[2], 2 K 4[16.28], 8[1], Jer 4[30], Ez 36[13]) and appears also in the corresponding personal ending of verbs (see § 44 *f*), especially, and necessarily, before suffixes, as קְטַלְתִּינִי, § 59 *a* [c]; cf. also *i* as the ending of the 2nd fem. sing. of the imperative and imperfect. The final *i* was, however, gradually dropped in pronunciation, just as in Syriac (see above, *f*) it was eventually only written, not pronounced. The י therefore finally disappeared (cf. § 10 *k*), and hence the Masoretes, even in these seven passages, have pointed the word in the text as אַתְּ to indicate the *Qᵉrê* אַתְּ (see § 17). The same final י appears in the rare (Aramaic) forms of the suffix כִי, יכִי (§§ 58, 91).

i 5. The plurals אַתֶּם (with the second vowel assimilated to the fem. form) and אַתֶּן (אַתֶּנָּה), with the tone on the ultima, only partially correspond to the assumed ground-forms *'antumū*, fem. *'antinnā*, Arab. *'ántum* (Aram. אַתוּן, אַנְתוּן) and *'ántúnna* (Aram. אַתִין, אַנְתִין). The form אַתֶּן is found only in Ez 34[31] (so Qimḥi expressly, others אַתֶּנָּה); אַתֶּנָּה (for which some MSS. have

[1] In Phoenician and Moabite (inscription of Mêša', line 1) it is written אנך, without the final י. In Punic it was pronounced *anec* (Plaut. *Poen.* 5, 1, 8) or *anech* (5, 2, 35). Cf. Schröder, *Phöniz. Sprache*, p. 143. In Assyrian the corresponding form is *anaku*, in old Egyptian *anek*, Coptic *anok*, *nok*.

אַתֶּנָּה) only four times, viz. Gn 31[6], Ez 13[11.20], 34[17]; in 13[20] אַתֶּם (before a מ) is even used as feminine.

III. *Third Person.*

6. (*a*) In הוּא and הִיא (*hû* and *hî*) the א (corresponding to the *'Elif of pro-longation* in Arabic, cf. § 23 *i*) might be regarded only as an orthographic addition closing the final long vowel, as in לוּא, נָקִיא, &c. The א is, however, always written in the case of the separate pronouns,[1] and only as a toneless suffix (§ 33 *a*) does הוּא appear as הוּ, while הִיא becomes הִ. In Arabic (as in Syriac) they are written הוּ and הִי but pronounced *hûwă* and *hiyă*, and in Vulgar Arabic even *hûwa* and *hiyya*. This Arabic pronunciation alone would not indeed be decisive, since the vowel complement might have arisen from the more consonantal pronunciation of the ו and י; but the Ethiopic *we'etû* (=*hu'a-tû*) for הוּא, *ye'eti* (=*hi'a-ti*) for הִיא (cf. also the Assyrian *ya-u-a* for יְהוּא) show that the א was original and indicated an original vocalic termination of the two words. According to Philippi (*ZDMG.* xxviii. 172 and xxix. 371 ff.) הוּא arose from a primitive Semitic *ha-ua*, הִיא from *ha-ya*. *k*

(*b*) The form הוּא also stands in the consonantal text (*K'thibh*) of the Pentateuch[2] (with the exception of eleven places) for the *fem.* הִיא. In all such cases the Masora, by the punctuation הִוא, has indicated the *Q'rê* הִיא (*Q'rê perpetuum*, see § 17). The old explanation regarded this phenomenon as an archaism which was incorrectly removed by the Masoretes. This assumption is, however, clearly untenable, if we consider (1) that no other Semitic language is without the quite indispensable distinction of gender in the separate pronoun of the 3rd pers.; (2) that this distinction does occur eleven times in the Pentateuch, and that in Gn 20[5], 38[25], Nu 5[13.14] הִוא and הִיא are found close to one another; (3) that outside the Pentateuch the distinction is found in the oldest documents, so that the הִיא cannot be regarded as having been subsequently adopted from the Aramaic; (4) that those parts of the book of Joshua which certainly formed a constituent part of the original sources of the Pentateuch, know nothing of this epicene use of הוּא. Consequently there only remains the hypothesis, that the writing of הוּא for הִיא rests on an orthographical peculiarity which in some recension of the Pentateuch-text was almost consistently followed, but was afterwards very properly rejected by the Masoretes. The orthography was, however, peculiar to the Pentateuch-text alone, since it is unnecessary to follow the Masora in writing חִיא for הוּא in 1 K 17[15], Is 30[33], Jb 31[11], or הוּא for הִיא in ψ 73[16], Ec 5[8], 1 Ch 29[16]. The Samaritan recension of the Pentateuch has the correct form in the *K'thibh* throughout. Levy's explanation of this strange practice of the Masoretes is evidently right, viz. that originally הא was written for both forms (see *k*, note), and was almost everywhere, irrespective of gender, expanded into הוּא. On the whole question see Driver, *Leviticus* (in Haupt's Bible), p. 25 f. In the text Driver always reads הא. *l*

7. The plural forms הֵם (הֵמָּה) and הֵנָּה (after *prefixes* הֵן, הָן) are of doubtful origin, but הֵם, הֵמָּה have probably been assimilated to הֵנָּה which goes back to a form *hinnā*. In Western Aram. הִמּוֹן, הִמּוֹ (אִנּוּן, הִנּוּן), Syr. *henûn* *m*

[1] In the inscription of King Mêša' (see § 2 *d*), lines 6 and 27, we find הא for הוּא, and in the inscription of 'Ešmun'azar, line 22, for הִיא, but in the Zenjirli inscriptions (see § 1 *m*) both הא and הו occur (Hadad i, l. 29).

[2] Also in twelve places in the Babylonian Codex (Prophets) of 916 A. D.; cf. Baer, *Ezechiel*, p. 108 f.; Buhl, *Canon and Text of the O. T.* (Edinb. 1892), p. 240.

(*'enûn*), Arab. *hûmâ* (archaic form of *hum*), and Ethiop. *hômû*, an *ô* or *ú* is appended, which in Hebrew seems to reappear in the poetical suffixes מוֹ—, מֹ֫ , מוֹ֫ (§ 91 *l*, 3).

n In some passages הֵמָּה stands for the feminine (Zc 5^{10}, Ct 6^{8}, Ru 1^{22}; cf. the use of the suffix of the 3rd masc. for the 3rd fem., § 135 *o* and § 145 *t*). For the quite anomalous עַד־הֵם 2 K 9^{18} read עָדֵיהֶם (Jb 32^{12}).

o 8. The pronouns of the 3rd person may refer to *things* as well as persons. On their meaning as *demonstratives* see § 136.

§ 33. *Pronominal Suffixes.*

Brockelmann, *Semit. Sprachwiss.*, p. 100 f.; *Grundriss*, i. 306 ff. J. Barth, 'Beiträge zur Suffixlehre des Nordsemit.,' in the *Amer. Journ. of Sem. Lang.*, 1901, p. 193 ff.

a **1.** The independent principal forms of the personal pronoun (the *separate pronoun*), given in the preceding section, express only the nominative.[1] The accusative and genitive are expressed by forms, usually shorter, joined to the end of verbs, nouns, and particles (*pronominal suffixes* or simply *suffixes*); e. g. הוּ (toneless) and וֹ (from *āhû*) *eum* and *eius*, קְטָלָתִּיהוּ *I have killed him* (also קְטָלְתִּיו), קְטָלְתָּהוּ or (with *āhû* contracted into *ô*) קְטָלְתּוֹ *thou hast killed him*; אוֹרֹה (also אוֹרֵהוּ) *lux eius*.

The same method is employed in all the other Semitic languages, as well as in the Egyptian, Persian, Finnish, Tartar, and others; in Greek, Latin, and German we find only slight traces of the kind, e. g. German, *er gab's* for *er gab es*; Greek, πατήρ μου for πατὴρ ἐμοῦ; Latin, *eccum*, *eccos*, &c., in Plautus and Terence for *ecce eum*, *ecce eos*.

b **2.** The *case* which these suffixes represent is—

(*a*) When joined to verbs, the accusative (cf., however, § 117 *x*), e. g. קְטָלָתִּיהוּ I have killed *him*.

c (*b*) When affixed to substantives, the genitive (like πατήρ μου, *pater eius*). They then serve as *possessive pronouns*, e. g. אָבִי (*'ābh-î*) *my father*, סוּסוֹ *his horse*, which may be either *equus eius* or *equus suus*.

d (*c*) When joined to particles, either the genitive or accusative, according as the particles originally expressed the idea of a noun or a verb, e. g. בֵּינִי, literally *interstitium mei*, *between me* (cf. *mea causa*); but הִנֵּנִי *behold me*, *ecce me*.

e (*d*) Where, according to the Indo-Germanic case-system, the dative or ablative of the pronoun is required, the suffixes in Hebrew are joined to prepositions expressing those cases (לְ sign of the dative, בְּ *in*, מִן *from*, § 102), e. g. לוֹ *to him* (*ei*) and *to himself* (*sibi*), בּוֹ *in him*, מִנִּי (usually מִמֶּנִּי) *from me*.

[1] On apparent exceptions see § 135 *d*.

3. The suffixes of the 2nd person (ךָ—, &c.) are all formed with a *k*-sound, not, like the *separate* pronouns of the 2nd person, with a *t*-sound. *f*

So in all the Semitic languages, in Ethiopic even in the verbal form (*qatalka, thou hast killed* = Hebr. קָטַלְתָּ).

4. The *suffix of the verb* (the accusative) and the *suffix of the noun* (the genitive) coincide in most forms, but some differ, e. g. נִי— *me*, ִי— *my*. *g*

Paradigm A at the end of the Grammar gives a table of all the forms of the *separate pronoun* and the *suffixes*; a fuller treatment of the *verbal suffix* and the mode of attaching it to the verb will be found in § 58 ff., of the *noun-suffix* in § 91, of the prepositions with suffixes in § 103, of adverbs with suffixes § 100 *o*.

§ 34. *The Demonstrative Pronoun.*

1. *Sing.* { *m.* זֶה [1] / *f.* זֹאת (זֶהּ, זוֹ) [2] } *this.* *Plur. com.* אֵלֶּה (rarely אֵל) *these.* *a*

Rem. 1. The feminine form זֹאת has undoubtedly arisen from זָאת, by obscuring of an original *â* to *ô* (for זָא = זֶה cf. the Arab. *hâ-dâ, this*, masc.; for ת as the feminine ending, § 80), and the forms זֹה, זוֹ, both of which are rare,[3] are shortened from זֹאת. In ψ 132[12] זוֹ is used as a *relative*, cf. זוּ below. In Jer 26[6], *K'thîbh*, הַזֹּאתָה (with the article and the demonstrative termination ה—) is found for זֹאת. The forms אֵלֶּה and אֵל are the plurals of זֶה and זֹאת by usage, though not etymologically. The form אֵל occurs only in the Pentateuch (but not in the Samaritan text), Gn 19[8.25], 26[3.4], &c. (8 times), always with the article, הָאֵל [as well as אֵלֶּה הָאֵלֶּה frequently], and in 1 Ch 2c[8] without the article [cf. Driver on Dt 4[42]].[4] Both the singular and the plural may refer to things as well as persons. *b*

2. In combination with prepositions to denote the oblique case we find לָזֶה *to this* (cf. for לְ, § 102 *g*), לָזֹאת, לָזֹאת *to this* (fem.), לָאֵלֶּה, לָאֵלֶּה *to these*; אֶת־זֶה *hunc*, אֶת־זֹאת *hanc*, אֶת־אֵלֶּה *hos*, also without אֶת־, even *before* the verb ψ 75[8], &c. Note also מִזֶּה *pretium huius* (1 K 21[2]), &c. *c*

---

[1] In many languages the demonstratives begin with a *d*-sound (hence called the *demonstrative sound*) which, however, sometimes interchanges with a sibilant. Cf. Aram. דֵּן, דֵּךְ *masc.*, דָּא, דָּךְ, *fem.* (this); Sansk. *sa, sâ, tat*; Gothic *sa, sô, thata*; Germ. *da, der, die, das*; and Eng. *the, this, that*, &c. Cf. J. Barth, 'Zum semit. Demonstr. *d*,' in *ZDMG.* 59, 159 ff., and 633 ff.; *Sprachwiss. Untersuchungen zum Semit.*, Lpz. 1907, p. 30 ff. [See the Lexicon, s. v. זֶה, and Aram. דִּי, דָּא.]

[2] That זֶה may stand for the feminine, cannot be proved either from Ju 16[28] or from the certainly corrupt passage in Jos 2[17].

[3] זֹה 2 K 6[19], and in seven other places; זוֹ only in Hos 7[16], ψ 132[12].

[4] According to Kuenen (cf. above, § 2 *n*) and Driver, on Lev 18[27] in Haupt's Bible, this אֵל is due to an error of the punctuators. It goes back to a time when the vowel of the second syllable was not yet indicated by a vowel letter, and later copyists wrongly omitted the addition of the ה. In Phoenician also it was written אל, but pronounced *ily* according to Plautus, *Poen*, v, 1, 9.

d 2. The secondary form זוּ occurs only in poetic style, and mostly for the relative, like our *that* for *who* [see Lexicon, s.v.]. Like אֲשֶׁר (§ 36), it serves for all numbers and genders.

e Rem. 1. This pronoun takes the article (הַזֶּה, הַזֹּאת, הָאֵלֶּה, הָאֵל) according to the same rule as adjectives, see § 126 *u*; e.g. הָאִישׁ הַזֶּה *this man*, but זֶה הָאִישׁ *this is the man*.

f 2. Rarer secondary forms, with strengthened demonstrative force, are הַלָּזֶה Gn 24^{65}, 37^{19}; הַלָּזוּ *fem.* Ez 36^{35}; and shortened הַלָּז, sometimes *masc.*, as in Ju 6^{20}, 1 S 17^{56}, 2 K 23^{17}, Zc 2^{8}, Dn 8^{16}, sometimes *fem.*, 2 K 4^{25}: cf. 1 S 14^{1} [and 20^{19} LXX; see Commentaries and Kittel].

g 3. The personal pronouns of the 3rd person also often have a demonstrative sense, see § 136.

§ 35. *The Article.*

J. Barth, 'Der heb. u. der aram. Artikel,' in *Sprachwiss. Untersuch. zum Semit.*, Lpz. 1907, p. 47 ff.

a 1. The article, which is by nature a kind of demonstrative pronoun, never appears in Hebrew as an independent word, but always in closest connexion with the word which is defined by it. It usually takes the form הַ־, with *ă* and a strengthening of the next consonant, e.g. הַשֶּׁמֶשׁ *the sun*, הַיְאֹר *the river*, הַלְוִיִּם *the Levites* (according to § 20 *m* for הַלְוִיִּם, הַיְאֹר).

b Rem. With regard to the *Dageš* in יְ after the article, the rule is, that it is inserted when a ה or ע follows the יְ, e.g. הַיְהוּדִים *the Jews*, הַיְעֵפִים *the weary* (בַּיְעֵנִים La 4^{3} *Q'rê* is an exception), but הַיְאוֹר, הַיְלָדִים, הַיְסוֹד, &c. *Dageš forte* also stands after the article in the prefix מַ in certain nouns and in the participles *Pi'ēl* and *Pu'al* (see § 52 *c*) before ה, ע and ר, except when the guttural (or ר) has under it a short vowel in a sharpened syllable; thus הַמְּהוּמָה Ez 22^{5}, הַמְּעָרָה *the cave*, בַּמְּרֵעִים ψ 37^{1} (cf. Jb 38^{40}, 1 Ch 4^{41}); but הַמְעַשְּׁקָה ψ $10^{4^{3}}$ (Ec 4^{15}, 2 Ch 23^{12}; before ע ψ $10^{3^{4}}$); הַמְרַגְּלִים Is 23^{12}; חַמְרַגְּלִים Jos 6^{22}. Before letters other than gutturals this מַ remains without Dageš, according to § 20 *m*.

c 2. When the article stands before a guttural, which (according to § 22 *b*) cannot properly be strengthened, the following cases arise, according to the character of the guttural (cf. § 27 *q*).

(1) In the case of the weakest guttural, א, and also with ר (§ 22 *c* and *q*), the strengthening is altogether omitted. Consequently, the *Pathaḥ* of the article (since it stands in an open syllable) is always lengthened to *Qameṣ*; e.g. הָאָב *the father*, הָאַחֵר *the other*, הָאֵם *the mother*, הָאִישׁ *the man*, הָאוֹר *the light*, הָאֱלֹהִים ὁ θεός, הָרֶגֶל *the foot*, הָרֹאשׁ *the head*, הָרָשָׁע *the wicked*.

d So also הָאֻשְּׁפוֹת Neh 3^{13}, because syncopated from הַאֲשֻׁפּוֹת (cf. verse 14 and Baer on the passage); הָאוּקִים (as in Nu 11^{4}, Ju 9^{41}, 2 S 23^{33}, with the א

orthographically retained), for הָאֲזִי Jer 40[4] (cf. בְּאוֹ verse 1); הַסּוּרִים Ec 4[14] for הָאֲסִם; הָרַמִּים 2 Ch 22[5] for הָאֲרִי (cf. 2 K 8[28]).

(2) In the case of the other gutturals either the virtual strengthening takes place (§ 22 *c*)—especially with the stronger sounds ח and ה, less often with ע—or the strengthening is wholly omitted. In the former case, the *Pathaḥ* of the article remains, because the syllable is still regarded as closed; in the second case, the *Pathaḥ* is either modified to *Seghôl* or fully lengthened to *Qameṣ*. That is to say:— *e*

A. When the guttural has any other vowel than *ā* (ָ) or *ŏ* (ָ). *f*
then

(1) before the stronger sounds ח and ה the article regularly remains הַ; e.g. הַהוּא *that*, הַחֹדֶשׁ *the month*, הַחַיִל *the force*, הַחָכְמָה *the wisdom*. Before ח, *ā* occurs only in הָחַי Gn 6[19] [not elsewhere], הָחֲרִיטִים Is 3[22], הָחַמָּנִים Is 17[8] [not elsewhere]; before ה, always in הָהֵם, הָהָמָּה.

(2) before ע the *Pathaḥ* is generally lengthened to *Qameṣ*, e.g. הָעַיִן *g* *the eye*, הָעִיר *the city*, הָעֶבֶד *the servant*, plur. הָעֲבָדִים; הָעֲגָלִים 1 K 12[32]; also in Gn 10[17] הָעַרְקִי is the better reading. Exceptions are בְּעוֹפֶרֶת Ex 15[10], הַעִוִּרִים 2 S 5[6.8], Is 42[18], בַּעֶבֶד Is 24[2], הַעִרְכִים Is 65[11], בַּעֲשֶׁק Ez 22[7], הַעֹזְבִים Pr 2[13] and הַעֹזֶבֶת Pr 2[17], לָעֲנִים 1 S 16[7], Ec 11[7]; but לָעִנִי Gn 3[6], Pr 10[26]. Cf. Baer on Is 42[18].

B. When the guttural has *ā* (ָ) then *h*

(1) immediately before a tone-bearing הָ or עָ the article is always הָ, otherwise it is הֶ; e.g. הָעָם *the people*, הָהָר *the mountain*, הָעַיִן (in *pause*) *the eye*, הָהָרָה *towards the mountain*; but (according to § 22 *c*) הֶהָרִים *the mountains*, הֶעָוֹן *the iniquity*.

(2) before חָ the article is invariably הֶ without regard to the tone; *i* e.g. הֶחָכָם *the wise man*, הֶחָג *the festival*.

C. When the guttural has ָ the article is הֶ before חָ; e.g. *k* הַחֳדָשִׁים *the months*; בֶּחֳרָבוֹת *in the waste places* (without the article בְּחָרְבָה *bŏḥo·rābhôth*) Ez 33[27], הַחֳרָבוֹת Ez 36[35.38], cf. 2 Ch 27[4]; but הָ before עָ, as הָעֳמָרִים *the sheaves* Ru 2[15].

The gender and number of the noun have no influence on the form of the article.

Rem. 1. The original form of the Hebrew (and the Phoenician) article הַ· *l* is generally considered to have been הַל, the ל of which (owing to the proclitic nature of the article) has been invariably assimilated to the following consonant, as in יַקַּח from *yilqaḥ*, § 19 *d*. This view was supported by the form of the Arabic article אַל (pronounced *hal* by some modern Beduin), the ל of which is also assimilated at least before all letters like *s* and *t* and before *l*, *n*, and *r*, e.g. *'al-Qur'án* but *'as-sånă* (Beduin *has-sana*) = Hebr. הַשָּׁנָה *the year*.

But Barth (*Amer. Journ. of Sem. Lang.*, 1896, p. 7 ff.), following Hupfeld and Stade, has shown that the Hebrew article is to be connected rather with the original Semitic demonstrative *hā*,[1] cf. Arab. *hāḏa*, Aram. *hādēn*, &c. The sharpening of the following consonant is to be explained exactly like the sharpening after וְ consecutive (§ 49*f*; cf. also cases like בַּמָּה, בַּמֶּה, &c., § 102*k*), from the close connexion of the *ha* with the following word, and the sharpening necessarily involved the shortening of the vowel.[2]

m The Arabic article is supposed to occur in the Old Testament in אַלְמֻגִּים 1 K 10[11.12] (also אַלְגֻּמִּים 2 Ch 2[7], 9[10.11]), *sandal-wood* (?), and in אֶלְגָּבִישׁ *hail*, *ice* = גָּבִישׁ (Arab. *ǵibs*) Ez 13[11.13], 38[22], but this explanation can hardly be correct. On the other hand, in the proper name אֶלְמוֹדָד Gn 10[26] the first syllable is probably אֵל *God*, as suggested by D. H. Müller (see Lexicon, s. v.) and Nöldeke, *Sitzungsber. der Berl. Akad.*, 1882, p. 1186. אֶלְקוֹם Pr 30[31], commonly explained as = Arab. *al-qaum*, the militia, is also quite uncertain.

n 2. When the prefixes בְּ, לְ, כְּ (§ 102) come before the article, the ה is elided, and its vowel is thrown back to the prefix, in the place of the Šᵉwâ (§ 19*k*, and § 23*k*), e. g. בַּשָּׁמַיִם *in the heaven* for בְּהַשָּׁמַיִם (so ψ 36[6]); לָעָם for לְהָעָם *to the people*, בָּהָרִים *on the mountains*, בַּחֳדָשִׁים *in the months*; also in Is 41[2], read כֶּעָפָר instead of the impossible כֶּהָעָפָר. Exceptions to this rule occur almost exclusively in the later Books: Ez 40[25], 47[22], Ec 8[1], Dn 8[16], Neh 9[19], 12[33], 2 Ch 10[7], 25[10], 29[27]; cf., however, 1 S 13[21], 2 S 21[20]. Elsewhere, e. g. 2 K 7[12], the Masora requires the elision in the *Qᵉrê*. A distinction in meaning is observed between כַּיּוֹם *about this time* (Gn 39[11], 1 S 9[13], &c.) and כְּיוֹם *first of all* (Gn 25[31], &c.). After the copula וְ (*and*) elision of the ה does not take place, e. g. וְהָעָם.

o 3. The words אֶרֶץ *earth*, הַר *mountain*, חַג *feast*, עַם *people*, פַּר *bull*, always appear after the article with a long vowel (as in *pause*); הָאָרֶץ, הָהָר, הֶחָג, הָעָם, הַפָּר; cf. also אָרוֹן *ark* (so in the absol. st. in 2 K 12[10], 2 Ch 24[8], but to be read אָרֹן), with the article always הָאָרוֹן.

§ 36. *The Relative Pronoun.*

The relative pronoun (cf. § 138) is usually the indeclinable אֲשֶׁר (*who*, *which*, &c.), originally a demonstrative pronoun; see further §§ 138 and 155. In the later books, especially Eccles. and the late Psalms, also Lam. (4 times), Jon. (1[7]), Chron. (twice), Ezra (once),—and always in the Canticle (cf. also Ju 7[12], 8[26], 2 K 6[11]), שֶׁ is used instead; more rarely שַׁ Ju 5[7], Ct 1[7] (Jb 19[29]?); once שָׁ before א Ju 6[17] (elsewhere שָׁ before a guttural), before ה even שֶׁ Ec 3[18], and according to some (e. g. Qimḥi) also in Ec 2[22].[3] [See Lexicon, s. v.]

[1] An original form *han*, proposed by Ungnad, 'Der hebr. Art.,' in *OLZ.* x (1907), col. 210 f., and *ZDMG.* 1908, p. 80 ff., is open to grave objections.

[2] In the Liḥyanitic inscriptions collected by Euting (ed. by D. H. Müller in *Epigraphische Denkmäler aus Arabien*, Wien, 1889) the article is ה, and also in a North Arabian dialect, according to E. Littmann, *Safa-inschriften*, p. 2, Rem., and p. 34.

[3] The full form אשר does not occur in Phoenician, but only אש (= אֲשֶׁ?), pronounced *asse*, *esse* (also *as*, *es*, *is*, *ys*, *us*), or—especially in the later Punic

§ 37. *The Interrogative and Indefinite Pronouns.*

a **1.** The interrogative pronoun is מִי *who?* (of persons, even before plurals, Gn 33[5], Is 60[8], 2 K 18[35], and sometimes also of things Gn 33[8], Ju 13[17], Mi 1[5]; cf. also בַּת־מִי *whose daughter?* Gn 24[23]; לְמִי *to whom?* אֶת־מִי *whom?*)—מָה, מַה (see *b*) *what?* (of things).—אֵי־זֶה *which? what?*

b The form ־מַה, ־מַ, &c. (followed by *Dageš forte conjunct.*: even in יְ, Hb 2[1], &c., against § 20 *m*) may be explained (like the art. ־הַ § 35 *l*, and ־וַ in the *imperf. consec.*) from the rapid utterance of the interrogative in connexion with the following word. Most probably, however, the *Dageš forte* is rather due to the assimilation of an originally audible ה (מַהּ, as Olshausen), which goes back through the intermediate forms *math*, *mat* to an original *mant*: so W. Wright, *Comparative Grammar*, Cambridge, 1890, p. 124, partly following Böttcher, *Hebräische Grammatik*, § 261. A ground-form *mant* would most easily explain מָן (*what?*), used in Ex 16[15] in explanation of מָן *manna*, while מַן is the regular Aramaic for *who*. Socin calls attention to the Arabic *mah* (in pause with an audible *h*: *Mufaṣṣal*, 193, 8). Observe further that—

c (*a*) In the closest connexion, by means of *Maqqeph*, מַה־ takes a following *Dageš* (§ 20 *d*), e.g. מַה־לָּךְ *what is it to thee?* and even in *one* word, as מַלָּכֶם *what is it to you?* Is 3[15]; cf. Ex 4[2], Mal 1[13], and even before a guttural, מהם Ez 8[6] *K^ethîbh.*

d (*b*) Before gutturals in close connexion, by means of *Maqqeph* or (e.g. Ju 14[18], 1 S 20[1]) a conjunctive accent, either מַה is used with a virtual strengthening of the guttural (§ 22 *c*), so especially before ה, and, in Gn 31[36], Jb 21[21], before וּ —or the doubling is wholly omitted. In the latter case either (cf. § 35 *e-k*) *ă* is fully lengthened to *Qames* (so always before the ה of the article, except in Ec 2[12]; also before הֲמָה, הֲנָה, and so ה (Hb 2[18]), א (2 S 18[22], 2 K 8[14]), ע (Gn 31[22], 2 K 8[13]), or modified to *S^eghôl*, especially before עָ, חָ, and generally before הָ. The omission of the strengthening also takes place as a rule with ה, ח, ע, when they have not *Qameṣ*, and then the form is either מָה or מַה, the latter especially before ח or ע, if *Maqqeph* follows.

e The longer forms מָה and מָּה are also used (מָּה even before letters which are not gutturals) when not connected by *Maqqeph* but only by a *conjunctive accent*. As a rule מָה is then used, but sometimes מַה when at a greater distance from the principal tone of the sentence, Is 1[5], ψ 4[3]. (On מָה in the combinations בַּמָּה, בַּמֶּה, and even לָמָּה, 1 S 1[8], cf. § 102 *k* and *l*.)

f (*c*) In the principal pause מָה is used without exception; also as a rule with the smaller *disjunctives*, and almost always before gutturals (מָה only in very few cases). On the other hand, מַה more often stands before letters which are not gutturals, when at a greater distance from the principal tone of the sentence, e.g. 1 S 4[6], 15[14], 2 K 1[7], Hag 1[9] (see Köhler on the passage), ψ 10[13], Jb 7[21]; cf., however, Pr 31[2], and Delitzsch on the passage.

g **2.** On מִי and מָה as indefinite pronouns in the sense of *quicunque, quodcunque*, and as relatives, *is qui, id quod*, &c., see § 137 *c*.

---

and in the *Poenulus* of Plautus—ש (*sa, si, sy, su*). Also in New Hebrew ־שֶׁ has become the common form. Cf. Schröder, *Phön. Sprache*, p. 162 ff. and below, § 155; also Bergsträsser, 'Das hebr. Präfix ש,' in *ZAW.* 1909, p. 40 ff.

CHAPTER II

THE VERB

§ 38. *General View.*

a Verbal stems are either original or derived. They are usually divided into—

(*a*) Verbal stems proper (*primitive verbs*), which exhibit the stem without any addition, e. g. מָלַךְ *he has reigned.*

b (*b*) *Verbal derivatives*, i. e. *secondary* verbal stems, derived from the pure stem (letter *a*), e. g. קִדֵּשׁ *to sanctify*, הִתְקַדֵּשׁ *to sanctify oneself*, from קָדַשׁ *to be holy*. These are usually called *conjugations* (§ 39).

c (*c*) *Denominatives*,[1] i. e. verbs derived from nouns (like the Latin *causari*, *praedari*, and Eng. *to skin*, *to stone*), or even from particles (see *d*, end) either in a primitive or derivative form, e. g. אָהַל, *Qal* and *Pīēl*, *to pitch a tent*, from אֹהֶל *tent*; הִשְׁרִישׁ and שִׁרֵּשׁ *to take root*, and שֵׁרֵשׁ *to root out*, from שֹׁרֶשׁ *root* (§ 52 *h*).

d This does not exclude the possibility that, for nouns, from which denominative verbs are derived, the corresponding (original) verbal stem may still be found either in Hebrew or in the dialects. The meaning, however, is sufficient to show that the denominatives have come from the noun, not from the verbal stem, e. g. לְבֵנָה *a brick* (verbal stem לבן *to be white*), denomin. לָבַן *to make bricks*; דָּג *a fish* (verbal stem דָּגָה *to be prolific*), denomin. דּוּג *to fish*; חָרַף *to winter* (from חֹרֶף *autumn*, *winter*, stem חָרַף *to pluck*); קוּץ *to pass the summer* (from קַיִץ *summer*, stem קיץ *to be hot*).

On 'Semitic verbs derived from particles' see P. Haupt in the *Amer. Journ. of Sem. Lang.*, xxii (1906), 257 ff.

§ 39. *Ground-form and Derived Stems.*

Brockelmann, *Sem. Sprachwiss.*, p. 119 ff.; *Grundriss*, p. 504 ff.

a **1.** The 3rd sing. masc. of the *Perfect* in the form of the pure stem (i. e. in *Qal*, see *e*) is generally regarded, lexicographically and grammatically, as the ground-form of the verb (§ 30 *a*), e. g. קָטַל *he has killed*, כָּבֵד *he was heavy*, קָטֹן *he was little*.[2] From this form the other

[1] Cf. W. J. Gerber, *Die hebr. Verba denom., insbes. im theol. Sprachgebr. des A. T.*, Lpz. 1896.

[2] For the sake of brevity, however, the meaning in Hebrew-English Lexicons is usually given in the Infinitive, e. g. לָמַד *to learn*, properly *he has learnt*.

persons of the *Perfect* are derived, and the *Participle* also is connected with it. קָטֹל or קָטַל, like the Imperative and Infinitive construct in sound, may also be regarded as an alternative ground-form, with which the Imperfect (see § 47) is connected.

b In verbs ע״ו (i.e. with ו for their second radical) the stem-form, given both in Lexicon and Grammar, is not the 3rd sing. masc. Perfect (consisting of two consonants), but the form with medial ו, which appears in the Imperative and Infinitive; e. g. שׁוּב *to return* (3rd pers. perf. שָׁב): the same is the case in most stems with medial י, e. g. דִּין *to judge*.

c **2.** From the pure stem, or *Qal*, the derivative stems are formed according to an unvarying analogy, in which the idea of the stem assumes the most varied shades of meaning, according to the changes in its form (intensive, frequentative, privative, causative, reflexive, reciprocal; some of them with corresponding passive forms), e. g. לָמַד *to learn*, לִמֵּד *to teach*; שָׁכַב *to lie*, הִשְׁכִּיב *to lay*; שָׁפַט *to judge*, נִשְׁפַּט *to contend*. In other languages such formations are regarded as new or *derivative* verbs, e. g. Germ. *fallen* (to fall), *fällen* (to fell); *trinken* (to drink), *tränken* (to drench); Lat. *lactere* (to suck, Germ. *saugen*), *lactare* (to suckle, Germ. *säugen*); *iacĕre* (to throw), *iacēre* (to lie down); *γίνομαι, γεννάω*. In Hebrew, however, these formations are incomparably more regular and systematic than (e. g.) in Greek, Latin, or English; and, since the time of Reuchlin, they have usually been called *conjugations* of the primitive form (among the Jewish grammarians בִּנְיָנִים, i.e. *formations*, or more correctly *species*), and are always treated together in the grammar and lexicon.[1]

d **3.** The changes in the primitive form consist either in internal modification by means of vowel-change and strengthening of the middle consonant (קָטַל, קִטֵּל; קוֹטַל, קוֹטֵל; cf. *to lie, to lay*; *to fall, to fell*), or in the repetition of one or two of the stem-consonants (קִטְלְטַל, קָטְלַל), or finally in the introduction of formative additions (נִקְטַל), which may also be accompanied by internal change (הִתְקַטֵּל, הַקְטִיל). Cf. § 31 *b*.

In Aramaic the formation of the conjugations is effected more by formative additions than by vowel-change. The vocalic distinctions have mostly become obsolete, so that, e. g. the reflexives with the prefix הִתְ, אִתְ, אֶתְ have entirely usurped the place of the passives. On the other hand, Arabic has preserved great wealth in both methods of formation, while Hebrew in this, as in other respects, holds the middle place (§ 1 *m*).

e **4.** Grammarians differ as to the *number* and *arrangement* of these conjugations. The common practice, however, of calling them by the

[1] The term *Conjugation* thus has an entirely different meaning in Hebrew and Greek or Latin grammar.

old grammatical terms, prevents any misunderstanding. The simple form is called *Qal* (קַל *light*, because it has no formative additions); the others (כְּבֵדִים *heavy*, being weighted, as it were, with the strengthening of consonants or with formative additions) take their names from the paradigm of פָּעַל *he has done*,[1] which was used in the earliest Jewish grammatical works. Several of these have passives which are distinguished from their actives by more obscure vowels. The common conjugations (including *Qal* and the passives) are the seven following, but very few verbs exhibit them all:

f

	Active.	*Passive.*
1. Qal	קָטַל *to kill.*	(Cf. § 52 *e*.)
2. Niph'al	נִקְטַל *to kill oneself* (rarely passive).	
3. Pi'ēl	קִטֵּל *to kill many, to massacre.*	4. Pu'al קֻטַּל.
5. Hiph'il	הִקְטִיל *to cause to kill.*	6. Hoph'al הָקְטַל.
7. Hithpa'ēl	הִתְקַטֵּל *to kill oneself.*	[Very rare, Hothpa'al הָתְקַטַּל.]

g There are besides several less frequent conjugations, some of which, however, are more common in the kindred languages, and even in Hebrew (in the weak verb) regularly take the place of the usual conjugations (§ 55).

In Arabic there is a greater variety of conjugations, and their arrangement is more appropriate. According to the Arabic method, the Hebrew conjugations would stand thus: 1. *Qal*; 2. *Pi'ēl* and *Pu'al*; 3. *Pō'ēl* and *Pō'al* (see § 55 *b*); 4. *Hiph'il* and *Hoph'al*; 5. *Hithpa'ēl* and *Hothpa'al*; 6. *Hithpō'ēl* (see § 55 *b*); 7. *Niph'al*; 8. *Hithpa'ēl* (see § 54 *l*); 9. *Pi'lēl* (see § 55 *d*). A more satisfactory division would be into three classes: (1) The intensive *Pi'ēl* with the derived and analogous forms *Pu'al* and *Hithpa'ēl*. (2) The causative *Hiph'il* with its passive *Hoph'al*, and the analogous forms (*Šaph'ēl* and *Tiph'ēl*). (3) The reflexive or passive *Niph'al*.

---

[1] This paradigm was borrowed from the Arabic grammarians, and, according to Bacher, probably first adopted throughout by Abulwalid. It was, however, unsuitable on account of the guttural, and was, therefore, usually exchanged in later times for פָּקַד, after the example of Moses Qimḥi. This verb has the advantage, that all its conjugations are actually found in the Old Testament. On the other hand, it has the disadvantage of indistinctness in the pronunciation of some of its forms, e. g. פְּקַדְתָּ, פְּקַדְתֶּם. The paradigm of קָטַל, commonly used since the time of Danz, avoids this defect, and is especially adapted for the comparative treatment of the Semitic dialects, inasmuch as it is found with slight change (Arab. and Ethiop. קתל) in all of them. It is true that in Hebrew it occurs only three times in *Qal*, and even then only in poetic style (ψ 139[19], Jb 13[15], 24[14]); yet it is worth retaining as a model which has been sanctioned by usage. More serious is the defect, that a number of forms of the paradigm of קטל leave the beginner in doubt as to whether or not there should be a *Dageš* in the *B^{e}gadk^{e}phath* letters, and consequently as to the correct division of the syllables.

§ 40. *Tenses. Moods. Flexion.*

A. Ungnad, 'Die gegenseitigen Beziehungen der Verbalformen im Grundstamm des semit. Verbs,' in *ZDMG.* 59 (1905), 766 ff., and his 'Zum hebr. Verbalsystem', in *Beiträge zur Assyriologie* ed. by Fr. Delitzsch and P. Haupt, 1907, p. 55 ff.

a **1.** While the Hebrew verb, owing to these derivative forms or conjugations, possesses a certain richness and copiousness, it is, on the other hand, poor in the matter of *tenses* and *moods*. The verb has only two *tense*-forms (*Perfect* and *Imperfect*, see the note on § 47 *a*), besides an *Imperative* (but only in the active), two *Infinitives* and a *Participle*. All relations of time, absolute and relative, are expressed either by these forms (hence a certain diversity in their meaning, § 106 ff.) or by syntactical combinations. Of moods properly so called (besides the *Imperfect Indicative* and *Imperative*), only the *Jussive* and *Optative* are sometimes indicated by express modifications of the Imperfect-form (§ 48).

b **2.** The *inflexion* of the *Perfect*, *Imperfect*, and *Imperative* as to persons, differs from that of the Western languages in having, to a great extent, distinct forms for the two genders, which correspond to the different forms of the *personal pronoun*. *It is from the union of the pronoun with the verbal stem that the personal inflexions of these tenses arise.*

c The following table will serve for the beginner as a provisional scheme of the formative syllables (*affformatives* and *preformatives*) of the two *tenses*. The three stem-consonants of the strong verb are denoted by dots. Cf. § 44 ff. and the Paradigms.

PERFECT.

Singular.		*Plural.*	
3. *m.*	. . .	3. *c.*	וּ . . .
3. *f.*	ה_ . . .		
2. *m.*	תָּ . . .	2. *m.*	תֶּם . . .
2. *f.*	תְּ . . .	2. *f.*	תֶּן . . .
1. *c.*	תִּי . . .	1. *c.*	נוּ . . .

IMPERFECT.

Singular.		*Plural.*	
3. *m.*	. . . י	3. *m.*	וּ . . . י
3. *f.*	. . . ת	3. *f.*	נָה . . . ת
2. *m.*	. . . ת	2. *m.*	וּ . . . ת
2. *f.*	י_ . . . ת	2. *f.*	נָה . . . ת
1. *c.*	. . . א	1. *c.*	. . . נ

§ 41. *Variations from the Ordinary Form of the Strong Verb.*

a The same laws which are normally exhibited in stems with strong (unchangeable) consonants, hold good for all other verbs. Deviations from the model of the strong verb are only modifications due to the special character or weakness of certain consonants, viz.:—

(*a*) When one of the stem-consonants (or *radicals*) is a guttural. In this case, however, the variations only occur in the vocalization (according to § 22), not in the consonants. The *guttural verbs* (§§ 62–65) are, therefore, only a variety of the *strong verb*.

b (*b*) When a stem-consonant (*radical*) disappears by assimilation (§ 19 *b-f*), or when the stem originally consisted of only two consonants (*verbs* פ״נ, ע״ע, and ע״ו, as נָגַשׁ, קָל, קוּם, §§ 66, 67, 72).

c (*c*) When one of the stem-consonants (*radicals*) is a weak letter. In this case, through aphaeresis, elision, &c., of the weak consonant, various important deviations from the regular form occur. Cf. § 68 ff. for these verbs, such as יָשַׁב, מָצָא, גָּלָה.

d Taking the old paradigm פָּעַל as a model, it is usual, following the example of the Jewish grammarians, to call the first radical of any stem פ, the second ע, and the third ל. Hence the expressions, *verb* פ״א for a verb whose first radical is א (*primae radicalis* [*sc. literae*] א); ע״ו for *mediae radicalis* ו; ע״ע for a verb whose second radical is repeated to form a third.

I. The Strong Verb.

§ 42.

As the formation of the strong verb is the model also for the weak verb, a statement of the general formative laws should precede the treatment of special cases.

Paradigm B, together with the Table of the personal preformatives and afformatives given in § 40 *c*, offers a complete survey of the normal forms. A full explanation of them is given in the following sections (§§ 43–55), where each point is elucidated on its first occurrence; thus e. g. the inflexion of the Perfect, the Imperfect and its modifications, will be found under Qal, &c.

A. The Pure Stem, or Qal.

§ 43. *Its Form and Meaning.*

a The common form of the 3rd sing. masc. of the *Perfect Qal* is קָטַל, with *ă* (*Pathaḥ*) in the second syllable, especially in *transitive* verbs (but see § 44 *c*). There is also a form with *ē* (*Ṣere*, originally *ĭ*), and another with *ō* (*Ḥolem*, originally *ŭ*) in the second syllable, both of which, however, have almost always an *intransitive*[1] meaning,

[1] But cf. such instances as Jer 48[5]. In Arabic also, transitive verbs are found with middle *i*, corresponding to Hebrew verbs with *ē* in the second

and serve to express states and qualities, e.g. כָּבֵד *to be heavy*, קָטֹן *to be small*.

In Paradigm B a verb *middle a*, a verb *middle ē*, and a verb *middle ō* are accordingly given side by side. The second example כָּבֵד is chosen as showing, at the same time, when the *Dageš lene* is to be inserted or omitted.

b Rem. 1. The vowel of the second syllable is the principal vowel, and hence on it depends the distinction between the transitive and intransitive meaning. The *Qameṣ* of the first syllable is lengthened from an original *ă* (cf. Arabic *qătălă*), but it can be retained in Hebrew only immediately before the tone, or at the most (with an open ultima) in the counter-tone with *Metheg*; otherwise, like all the pretonic vowels (*ā, ē*), it becomes *Šᵉwâ*, e. g. קְטַלְתֶּם 2nd *plur. masc.* In the Aramaic dialects the vowel of the first syllable is always reduced to Šᵉwâ, as קְטַל = Hebr. קָטַל. The intransitive forms in Arabic are *qătŭlă, qătŭlă*; in Hebrew (after the rejection of the final vowel) *ŭ* being in the tone-syllable has been regularly lengthened to *ē*, and *ŭ* to *ō*.

c 2. Examples of *denominatives* in *Qal* are: חָמַר *to cover with pitch*, from חֵמָר *pitch*; מָלַח *to salt*, from מֶלַח *salt*; שָׂבַר (usually *Hiph.*) *to buy* or *sell corn*, from שֶׂבֶר *corn*; see above, § 38 *c*.

§ 44. *Flexion of the Perfect of Qal.*[1]

a 1. The formation of the persons of the Perfect is effected by the addition of certain forms of the personal pronoun, and marks of the 3rd fem. sing. and 3rd pl. (as *affformatives*) to the *end* of the verbal-stem, which contains the idea of a predicate, and may be regarded, in meaning if not in form, as a *Participle* or *verbal adjective*. For the 3rd *pers. sing. masc. Perfect*, the pronominal or subject idea inherent in the finite verb is sufficient: thus, קָטַל *he has killed*, קָטַלְתְּ *thou hast killed* (as it were, *killing thou*, or *a killer thou*), *a killer wast thou* = קטל אַתָּה; יָרֵא *he was fearing*, יְרֵאתֶם *ye were fearing* = יראי אַתֶּם. The ending of the 1st pers. plur. (נוּ—) is also certainly connected with the termination of אֲנַחְנוּ, אנו *we* (§ 32 *b, d*). The affformative of the 1st pers. sing. (תִּי) is to be referred, by an interchange of כ and ת (cf. § 33 *f*), to that form of the pronoun which also underlies אָנֹכִי, I.[2] In the *third* person ה— (originally ת—, cf. below, *f*) is the mark of the feminine, as in a great number of nouns (§ 80 *c*), and וּ is the termination of the plural; cf., for the latter, the termination of the 3rd and 2nd pers. plur. Imperf. *ûna* in Arabic and *û* (often also וֹן)

syllable. Hence P. Haupt (*Proc. Amer. Or. Soc.*, 1894, p. ci f.) prefers to distinguish them as *verba voluntaria* (actions which depend on the will of the subject) and *involuntaria* (actions or states independent of the will of the subject).

[1] Cf. Nöldeke, 'Die Endungen des Perfects' (*Untersuchungen zur semit.* Gramm. ii.), in *ZDMG.* vol. 38, p. 407 ff., and more fully in *Beiträge zur sem. Sprachwiss.*, Strassb. 1904, p. 15 ff.

[2] According to Nöldeke, *l.c.*, p. 419, the original Semitic termination of the 1st sing. Perf. was most probably *kû*; cf. the Ethiopic *qatalku*, Arabic *qataltu*.

in Hebrew, also *ûna* (in the construct state *û*) as the plural termination of masc. nouns in literary Arabic.

b 2. The characteristic *Pathaḥ* of the second syllable becomes *Šᵉwâ* before an afformative beginning with a vowel, where it would otherwise stand in an open syllable (as קָטְלָה, קָטְלוּ; but in *pause* קָטָלָה, קָטָלוּ). Before an afformative beginning with a consonant the *Pathaḥ* remains, whether in the tone-syllable (קָטַלְתָּ, קָטַלְתְּ, קָטַלְתִּי, קָטַלְנוּ; in *pause* קָטָלְתָּ &c.) or *before* it. In the latter case, however, the *Qameṣ* of the first syllable, being no longer a pretonic vowel, becomes vocal *Šᵉwâ*; as קְטַלְתֶּם, קְטַלְתֶּן; cf. § 27 *i* and § 43 *b*. On the retention of *ā* with *Metheg* of the counter-tone in the *Perf. consecutive*, cf. § 49 *i*.

c Rem. 1. Verbs *middle ē* in Hebrew (as in Ethiopic, but not in Arabic or Aramaic) generally change the *E*-sound in their inflexion into *Pathaḥ* (frequently so even in the 3rd sing. masc. Perf.). This tendency to assimilate to the more common verbs *middle a* may also be explained from the laws of vocalization of the tone-bearing closed penultima, which does not readily admit of *Ṣere*, and never of *Ḥireq*, of which the *Ṣere* is a lengthening (cf. § 26 *p*). On the other hand, *Ṣere* is retained in an open syllable; regularly so in the weak stems לא (§ 74 *g*), before suffixes (§ 59 *i*), and in the pausal forms of the strong stem in an open tone-syllable, e. g. דְּבֵקָה *it cleaveth*, Jb 29¹⁰ (not דְּבָקָה), cf. 2 S 1²³, Jb 41¹⁵; even (contrary to § 29 *q*) in a *closed* pausal syllable, e. g. שָׂבְעֵן, Dt 33¹² (out of pause שָׂבַע, Is 32¹⁶); but קָמַל Is 33⁹, &c., according to § 29 *q*.

d 2. In some weak stems *middle a*, the *Pathaḥ* under the second radical sometimes, in a closed toneless syllable, becomes ֶ, and, in one example, ֵ. Thus from יָרַשׁ: וִירִשְׁתָּהּ *and thou shalt possess it*, Dt 17¹⁴; וְיִרְשְׁתֶּם Dt 19¹; וִירִשְׁתֶּם Dt 4¹, and frequently; from יָלַד *to bring forth, to beget*; יְלִדְתִּיךָ ψ 2⁷ (cf. Nu 11¹², Jer 2²⁷, 15¹⁰); from פּוּשׁ וּפְשִׁשְׁתֶּם Mal 3²⁰; from שָׁאַל; שְׁאֵלְתִּיו *I have asked him*, 1 S 1²⁰ (Ju 13⁶), and three times שְׁאֵלְתֶּם 1 S 12¹³, 25⁵, Jb 21²⁹. Qimḥi already suggests the explanation, that the *i* (*ĕ*) of these forms of שׁאל and ירשׁ is the original vowel, since along with שָׁאַל and יָרַשׁ are also found יְרֵשׁ and שְׁאֵל (see the Lexicon). The possibility of this explanation cannot be denied (especially in the case of יְרֵשׁ, see § 69 *s*); the *ĭ* in these forms might, however, equally well have arisen from an attenuation of *ă* (§ 27 *s*), such as must in any case be assumed in the other instances. Moreover, it is worthy of notice that in all the above cases the *ĭ* is favoured by the character of the following consonant (a sibilant or dental), and in most of them also by the tendency towards assimilation of the vowels (cf. § 54 *k* and § 64 *f*).

e 3. In verbs *middle ō*, the *Ḥolem* is retained in the tone-syllable, e. g. יָגֹרְתָּ *thou didst tremble*; יָכְלוּ in *pause* for יָכְלוּ *they were able*; but in a toneless closed syllable the original short vowel appears in the form of a *Qameṣ ḥaṭuph*; יְכָלְתִּיו *I have prevailed against him*, ψ 13⁵; וְיָכָלְתָּ (see § 49 *h*) *then shalt thou be able*, Ex 18²³; in a toneless open syllable it becomes vocal *Šᵉwâ*, e. g. יְכָלָה, יְכָלוּ.

f 4. Rarer forms[1] are: *Sing.* 3rd *fem.* in ת_ (as in Arabic, Ethiopic, and

[1] Many of these forms, which are uncommon in Hebrew, are usual in the

Aramaic), e.g. אָזְלַת *it is gone*, Dt $3^{2^{36}}$; וְנִשְׁכַּחַת Is 23^{15} (in the Aramaic form, for וְנִשְׁכְּחָה); from a verb ע״ו, וְשָׁבַת, cf. § 72 *o*. This original feminine ending *-ath* is regularly retained before suffixes, see § 59 *a*; and similarly in stems ל״ה, either in the form *āth* (which is frequent also in stems ל״א § 74 *g*), or with the *Pathaḥ* weakened to *vocal Šᵉwâ* before the pleonastic ending ־ָה, e.g. גָּלְתָה § 75 *i*. In Ez 31^{5} the Aramaic form נְבַהָא occurs instead of נְבְהָה.

g 2nd *masc.* תָּה for תָּ (differing only orthographically), e.g. בָּגַדְתָּה *thou hast dealt treacherously*, Mal 2^{14}; cf. 1 S 15^{3}, Gn 3^{12} (נָתַתָּה which is twice as common as נָתַתְּ, cf. § 66 *h*); Gn 21^{23}, 2 S 2^{26}, 2 K 9^{3}, Is 2^{6}, ψ 56^{9} (so also in *Hiph'il*; 2 K 9^{7}, Is 37^{23}, ψ 60^{4}).

h 2nd *fem.* has sometimes a Yodh at the end, as in הָלַכְתִּי *thou wentest*, Jer 31^{21}; cf. 2^{33}, $3^{4.5}$, 4^{19} (but read the ptcp. שֹׁמַעַת, with the LXX, instead of the 2nd fem.), 46^{11}, and so commonly in Jeremiah, and Ez (16^{18}, &c.); see also Mi 4^{13}, Ru $3^{3.4}$. הָלַכְתִּי, &c., is really intended, for the vowel signs in the text belong to the marginal reading הָלַכְתְּ (without י)[1] as in the corresponding pronoun אַתְּ (אַתִּי) § 32 *h*. The ordinary form has rejected the final *i*, but it regularly reappears when pronominal suffixes are added (§ 59 *a*, *c*).

i 1st *pers. comm.* sometimes without Yodh, as יָדַעְתִּ ψ 140^{13}, Jb 42^{2}, 1 K 8^{48}, Ez 16^{59} (all in Kᵉthîbh), ψ 16^{2}, without a Qᵉrê; in 2 K 18^{20} also אָמַרְתִּ is really intended, as appears from Is 36^{5}. The Qᵉrê requires the ordinary form, to which the vowels of the text properly belong, whilst the Kᵉthîbh is probably to be regarded as the remains of an earlier orthography, which omitted vowel-letters even at the end of the word.

k תֶּן as the termination of the 2nd *plur. m.* for תֶּם Ez 33^{26}, might just possibly be due to the following ת (cf., for an analogous case, Mi 3^{12}, § 87 *e*), but is probably a copyist's error. Plur. 2nd *fem.* in תֶּנָּה- (according to others תֶּנָּה-) Am 4^{3}, but the reading is very doubtful; since ה follows, it is perhaps merely due to dittography; cf., however, אַתֶּנָּה § 32 *i*.

l 3rd *plur. comm.* has three times the very strange termination ין[2]; יְדָעִין Dt $8^{3.16}$ (both before א, and hence, no doubt, if the text is correct, to avoid a hiatus), and in the still more doubtful form צָקִין Is 26^{16}; on ין in the Imperf. see § 47 *m*; on the affixed א in Jos 10^{24}, Is 28^{12}, see § 23 *i*.

m It is very doubtful whether, as in most Semitic languages (see § 47 *c*, note), the 3rd-*fem. plur.* in Hebrew was originally distinguished from the 3rd *masc.*

---

other Semitic dialects, and may, therefore, be called Aramaisms (Syriasms) or Arabisms. They must not, however, be regarded as cases of borrowing, but as a return to original forms.

[1] Where the Masora apparently regards the תִּי as the termination of the 2nd *sing. fem.*, e.g. in Jer 2^{20} (twice), Mi 4^{13}, it has rather taken the form as 1st *pers. sing.* (cf. Stade, *Gramm.*, p. 253); so in Ju 5^{7}, where לַמְתִּי, on account of verse 12, must either have originally been intended as 2nd *sing. fem.*, or is due to an erroneous pronunciation of the form קמת as לָמַתְּ instead of 3rd *sing. fem.* לָמַת (as LXX).

[2] That these examples can hardly be referred to a primitive Semitic ending *ûn* in the 3rd plur. Perf., has been shown by Nöldeke in *ZDMG.* vol. 38, p. 409 ff.; cf. also *ZDMG.* vol. 32, p. 757 f., where G. Hoffmann proves that the terminations in *Nûn* of the 3rd plur. in Aramaic, formerly adduced by us, are secondary forms. [See also Driver, *Heb. Tenses*³, p. 6 *note*.]

plur. by the termination ה־, as in Biblical Aramaic. Nöldeke (*ZDMG.* 38 [1884], p. 411) referred doubtfully to the textual readings in Dt 21^{7}, Jos 15^{4}, $18^{12.14.19}$, Jer 2^{15}, 22^{6}, where the Masora uniformly inserts the termination *ū*, and to Gn 4^{S10} in the Samaritan Pentateuch, Gn 49^{22}, 1 S 4^{15}, ψ 18^{35}, Neh 13^{10}. In his *Beiträge zur sem. Sprachwiss.*, p. 19, however, he observes that the construction of a fem. plural with the 3rd sing. fem. is not unexampled, and also that ה is often found as a mistake for ו. On the other hand Mayer Lambert (*Une série de Qeré ketib*, Paris, 1891, p. 6 ff.) explains all these K^{e}thibh, as well as ψ 73^{2}, Jer 50^{6} (?), and (against Nöldeke) 1 K 22^{49} (where ה is undoubtedly the article belonging to the next word), Jb 16^{16} (where the *masc.* פָּנַי requires the marginal reading), also Jer 48^{41}, 51^{56}, Ez 26^{2}, ψ 68^{14}, as remains of the 3rd *fem. plur.* in ה־. The form was abandoned as being indistinguishable from the (later) form of the 3rd *fem. sing.*, but tended to be retained in the perfect of verbs ל״ה, as היה K^{e}thibh six times in the above examples.

n 5. The afformatives תָּ, (תְּ), תִּי, נוּ are generally toneless, and the forms with these inflexions are consequently *Mil'el* (קָטַלְתָּ, &c.); with all the other afformatives they are *Milra'* (§ 15 *c*). The place of the tone may, however, be shifted: (*a*) by the *pause* (§ 29 *i–v*), whenever a vowel which has become vocal Š^{e}wā under the second stem-consonant is restored by the *pause*; as קָטַלָה for קָטְלָה (דָּבְּקָה for דָּבְקָה), and קָטְלוּ for קָטְלוּ (מָלְאוּ for מָלְאוּ); (*b*) in certain cases after *wāw consecutive* of the *Perfect* (see § 49 *h*).

o 6. Contraction of a final ת with the ת of the afformative occurs e. g. in בָּרַתִּי Hag 2^{5}, &c.; cf. Is 14^{20}, &c., in the *Perf. Po'el*; Dt 4^{25} in the *Hiph'il* of שׁחת; Is 21^{2}, &c., in the *Hiph'il* of שׁבת. Contraction of a final נ with the afformative נוּ occurs in נָתַנּוּ Gn 34^{15}; in *Niph.* Ezr 9^{7}, cf. 2 Ch 14^{10}; in *Hiph.* 2 Ch 29^{19}; with the afformative נָה in the *Imperfect Qal* Ez 17^{23}; *Pi'el* ψ 71^{23}, where with Baer and Ginsburg תְּרַנֵּנָה is to be read, according to others תְּרַנֵּנָה (cf. in *Polel* תְּקוֹנַנָּה Ez 32^{16}), but certainly not תְּרַנֵּנָה with the Mantua ed., Opitius and Hahn; with נָה in the *Imperat. Hiph.* Gn 4^{23}, Is 32^{9}.

§ 45. *The Infinitive.*

F. Prätorius, 'Ueber den sog. Inf. absol. des Hebr.,' in *ZDMG.* 1902, p. 546 ff.

a 1. The Infinitive is represented in Hebrew by two forms, a shorter and a longer; both are, however, strictly speaking, independent *nouns* (*verbal substantives*). The shorter form, *the Infinitive construct* (in Qal קְטֹל,[1] sometimes incorrectly קְטוֹל), is used in very various ways, sometimes in connexion with pronominal suffixes, or governing a substantive in the genitive, or with an accusative of the object (§ 115), sometimes in connexion with prepositions (לִקְטֹל *to kill*, § 114 *f*), and sometimes in dependence upon substantives as genitive, or upon verbs as accusative of the object. On the other hand, the use of the longer form, the *Infinitive absolute* (in Qal קָטוֹל, sometimes also קָטֹל, obscured from original *qāṭāl*), is restricted to those cases in which it emphasizes

[1] Cf. the analogous forms of the noun, § 93 *t*.

the abstract verbal idea, without regard to the subject or object of the action. It stands most frequently as an adverbial accusative with a finite verb of the same stem (§ 113 *h–s*).[1]

b The flexibility and versatility of the Infin. constr. and the rigidity and inflexibility of the Infin. absol. are reflected in their vocalization. The latter has unchangeable vowels, while the *ō* of the Infin. constr. may be lost. For קְטֹל, according to § 84*a*, *e*, goes back to the ground-form *qŭṭŭl*.

c Other forms of the Infin. constr. Qal of the strong verb are—

(*a*) קְטַל, e.g. שְׁכַב *to lie*, Gn 34[7]; שְׁפַל *to sink*, Ec 12[4]; especially with verbs which have *ă* in the second syllable of the Imperf.: hence sometimes also with those, whose second or third radical is a guttural (frequently besides the ordinary form). All the examples (except שְׁכַב, see above) occur in the closest connexion with the following word, or with suffixes (see § 61 *c*). In Ez 21[33] the Masora seems to treat לְטָבַח (verse 20, in *pause* לְטָבַח) as an Infinitive = לְטַבֵּחַ; probably לַטָּבַח should be read.

d (*b*) קַטְלָה and, attenuated from it, קִטְלָה; קָטְלָה and קִטְלָה (which are feminine forms[2] of קָטַל and קִטֹל, mostly from intransitive verbs, and sometimes found along with forms having no feminine ending in use), e.g. לְאַשְׁמָה *to be guilty*, Lv 5[26], אַהֲבָה *to love*, שִׂנְאָה *to hate*; לְיִרְאָה, often in Dt., *to fear*; זְקָנָה *to be old*; קְרָאָה *to meet* (in לִקְרַאת § 19*k*); לְרִבְעָה *to lie down*, Lv 20[16]; לְמָשְׁחָה *to anoint*, Ex 29[29]; לְרָחְצָה *to wash*, Ex 30[18], &c.; לְטָמְאָה (also a subst. = *uncleanness*, like טָמְאָה) *to be unclean*, Lv 15[32]; לְקָרְבָה *to approach*, Ex 36[2], &c.; cf. Lv 12[4.5], Dt 11[22], Is 30[19], Ez 21[16], Hag 1[6]; also רְחֹקָה *to be far off*, Ez 8[6]; חָמְלָה *to pity*, Ez 16[5]; cf. Ho 7[4]. On the other hand in חֶמְלָה Gn 19[16], the original *ă* has been modified to *ĕ*; cf. חֶזְקָה Is 8[11], &c.

e (*c*) In the Aramaic manner (מְקָטַל but cf. also Arab. *maqtal*) there occur as *Infin. Qal*: מְשָׁלוֹחַ *to send*, Est 9[19]; מְקָרָא *to call* and מַסָּע *to depart*, Nu 10[2] (Dt 10[11]); מְסָקָה *to take*, 2 Ch 19[7], &c.; מַשָּׂא *to carry*, Nu 4[24], &c. (cf. even לְמַשָּׂאוֹת Ez 17[9]); also with a feminine ending מַעֲלָה *to go up*, Ezr 7[9], &c.; cf. for these forms (almost all very late) Ryssel, *De Elohistae Pentateuchici sermone*, p. 50, and Strack on Nu 4[24].

(*d*) קְטֹלֶת in יְבֹשֶׁת Gn 8[7]; יְכֹלֶת Nu 14[16]; probably also חֲרֹשֶׁת Ex 31[5], 35[33].

f **2.** A kind of *Gerund* is formed by the *Infin. constr.* with the preposition לְ; as לְקָטֹל *ad interficiendum*, לִנְפֹּל *ad cadendum* (see § 28 *a*).

---

[1] The terms *absolute* and *construct* are of course not to be understood as implying that the Infin. constr. קָטֹל forms the *construct state* (see § 89) of the Infin. absol. (קָטוֹל ground-form *qăṭāl*). In the Paradigms the *Inf. constr.*, as the principal form, is placed before the other, under the name of Infinitive simply.

[2] According to the remark of Elias Levita on Qimḥi's *Mikhlol*, ed. Rittenb., 14 *a*, these feminine forms occur almost exclusively in connexion with the preposition לְ.

g The blending of the לְ with the *Infin. constr.* into a single grammatical form seems to be indicated by the firmly closed syllable, cf. לִשְׁבַּב Gn 34[7]; לִנְפֹּל ψ 118[13], with *Dageš lene* in the פ = *lin-pōl*; hence, also *liq-ṭōl*, &c.; but בִּנְפֹל *bin'phōl*, Jb 4[13]; כְּנָפֹל 2 S 3[34]. Exceptions לְצָבְא Nu 4[23], 8[24]; לְנָתוֹשׁ וְלִנְתוֹץ Jer 1[10], 18[7], 31[28]; לְשָׁדוֹד Jer 47[4]; לְטָבוֹחַ Jer 11[19], &c., ψ 37[14]; לְבָרוֹק 2 Ch 34[10]; according to some also לְטָבְחָ Nu 21[4] and לְבָבְשׁ 2 Ch 28[10] (Baer לְכָבְשׁ); on the other hand בְּשָׁכְבָן Gn 35[22]; כְּזָבֹר Jer 17[2]. For the meaningless לְדָרְיוֹשׁ Ezr 10[16] read לְדָרֹשׁ.

§ 46. *The Imperative.*

a 1. The ground-forms of the Imperative, קְטֹל (properly *qᵉṭŭl*, which is for an original *qŭṭŭl*), and קְטַל (see below, *c*), the same in pronunciation as the forms of the Infin. constr. (§ 45), are also the basis for the formation of the Imperfect (§ 47).[1] They represent the *second* person, and have both fem. and plur. forms. The third person is supplied by the Imperfect in the Jussive (§ 109 *b*); and even the second person must always be expressed by the Jussive, if it be used with a negative, e. g. אַל־תִּקְטֹל *ne occidas* (not אַל־קְטֹל). The passives have no Imperative, but it occurs in the reflexives, as Niph'al and Hithpa'ēl.[2]

b 2. The Afformatives of the *2nd sing. fem.* and the *2nd plur. masc.* and *fem.* are identical in every case with those of the Imperfect (§ 47 *c*). In the same way, the Imperative of the *2nd sing. masc.*, in common with the Imperfect, admits of the lengthening by the ה֫— *paragogicum* (§ 48 *i*), as, on the other hand, there are certain shortened forms of this person analogous to the Jussive (§ 48. 5).

c Rem. 1. Instead of the form קְטֹל (sometimes also *plene*, e.g. שְׁמוֹר Ec 12[13]; before *Maqqeph* קְטָל־ with *Qameṣ ḥaṭuph*), those verbs which have an *a* in the final syllable of the *Imperf.* (i. e. especially verbs middle *ē*) make their Imperative of the form קְטַל, e.g. לְבַשׁ *dress!* (Perf. לָבַשׁ and לָבֵשׁ); שְׁכַב *lie down!* in *pause* שְׁכָב 1 S 3[5.6.9].

d 2. The first syllable of the sing. fem. and plur. masc. are usually to be pronounced with *Šᵉwâ mobile* (*qiṭᵉli*, *qiṭᵉlû*, and so שִׁמְעִי, &c., without *Dageš lene*, and even מִשְׁכְּבוּ with *Metheg*, Ex 12[21]; but cf. אִסְפִּי Jer 10[17], and with the same phonetic combination חִשְׁפִּי Is 47[2]; see analogous cases in § 93 *m*); less frequently we find an *ŏ* instead of the *ĭ*, e.g. מָלְכִי *rule*, Ju 9[10]; מֹשְׁכוּ *draw*, Ez 32[20]; חָרְבִי Jer 2[12] (cf. חָרְבִי Is 44[27]); on קָמְמִי 1 S 28[8] *Qᵉrê*, צָעֲקִי Jer. 22[20] (cf. 1 K 13[7]), see § 10 *h*. This *ŏ* arises (see above, *a*) from a singular ground-form *qŭṭŭl*, not from a retraction of the original *ŭ* of the second syllable. We must abandon the view that the forms with *ĭ* in the first syllable (cf. also

[1] The *Infin. absol.*, like the Greek Infin., is also sometimes used for the Imperative (§ 113 *bb*). Cf. in general, Koch, *Der semitische Inf.* (Schaffhausen, 1874).

[2] In *Hoph'al* an Imperative is found only twice (Ez 32[19], Jer. 49[8]), and closely approximating in meaning to the reflexive.

עִבְרִי, מְכָרִי, חֲנֻרִי, אֲמָרִי) arise from a weakening of the characteristic vowel ă. They, or at least some of them, must rather be regarded with Barth (*ZDMG.* 1889, p. 182) as analogous to the original *i*-imperfects. See further analogies in §§ 47 *i* and 48 *i*; 61 *b*, 63 *n*.

The *pausal* form of the 2nd plur. masc. is גְּזָרוּ 1 K 3[26]; from שְׁמָע, שְׁמָעוּ, *e* &c.; similarly the 2nd sing. fem. in *pause* is עֲבֹרִי Is 23[12]; even without the *pause* מְלוֹכִי Ju 9[10.12], *Keth.*; קְסוֹמִי 1 S 28[8], *Keth.* (cf. with this also מְלוֹכָה, &c., § 48 *i*); from שְׁמַח, שִׂמְחִי Jo 2[21].

3. In the 2nd plur. fem. שְׁמַעְנָה occurs once, in Gn 4[23] (for שִׁמַּעְנָה) with loss *f* of the ה_ and insertion of a helping vowel, unless it is simply to be pointed שְׁמַעְנָ. Also instead of the abnormal קְרָאְנָ Ex 2[20] (for קְרָאנָה) we should perhaps read as in Ru 1[20] קְרֶאן (cf. מְצָאן 1[9] and לְכֶן 1[12]).

On the examples of a 2nd plur. fem. in _ֶ_, Is 32[11], see § 48 *i*.

§ 47. *The Imperfect and its Inflexion.*

1. The persons of the Imperfect,[1] in contradistinction to those of *a* the Perfect, are formed by placing abbreviated forms of the personal pronoun (preformatives) *before* the stem, or rather before the abstract form of the stem (קְטֹל). As, however, the tone is retained on the characteristic vowel of the Stem-form, or even (as in the *2nd sing. fem.* and the *3rd* and *2nd plur. masc.*) passes over to the afformatives, the preformatives of the Imperfect appear in a much more abbreviated form than the afformatives of the Perfect, only *one* consonant (י, ת, א, נ) remaining in each form. But as this preformative combined with the

[1] On the use of the Semitic Perfect and Imperfect cf. § 106 ff. and the literature cited in § 106. For our present purpose the following account will suffice:—The name *Imperfect* is here used in direct contrast to the Perfect, and is to be taken in a wider sense than in Latin and Greek grammar. The Hebrew (Semitic) *Perf.* denotes in general that which is *concluded*, *completed*, and *past*, that which has happened and has come into effect; but at the same time, also that which is *represented* as accomplished, even though it be continued into present time or even be actually still future. The *Imperf.* denotes, on the other hand, the *beginning*, the *unfinished*, and the *continuing*, that which is just happening, which is conceived as in process of coming to pass, and hence, also, that which is yet future; likewise also that which occurs repeatedly or in a continuous sequence in the past (Latin Imperf.). It follows from the above that the once common designation of the Imperf. as a *Future* emphasizes only *one* side of its meaning. In fact, the use of Indo-Germanic tense-names for the Semitic tenses, which was adopted by the Syrians under the influence of the Greek grammarians, and after their example by the Arabs, and finally by Jewish scholars, has involved many misconceptions. The Indo-Germanic scheme of three periods of time (past, present, and future) is entirely foreign to the Semitic tense-idea, which regards an occurrence only from the point of view of completed or incomplete action.—In the formation of the two tenses the chief distinction is that in the Perfect the verbal stem precedes and the indication of the person is added afterwards for precision, while in the Imperf. the subject, from which the action proceeds or about which a condition is predicated, is expressed by a prefixed pronoun.

stem-form was not always sufficient to express at the same time differences both of gender and number, the distinction had to be further indicated, in several cases, by special *affórmatives*. Cf. the table, § 40 *c*.

b **2.** The derivation and meaning, both of the preformatives and the afformatives, can still, in most cases, be recognized.

In the *first* pers. אֶקְטֹל, plur. נִקְטֹל, א is probably connected with אֲנִי, and נ with נַחְנוּ; here no indication of gender or number by a special ending was necessary. As regards the vocalization, the Arabic points to the ground-forms *'ăqṭŭl* and *năqṭŭl*: the *ŭ* of the 1st plur. is, therefore, as in the other preformatives, attenuated from *a*. The *Seghôl* of the 1st sing. is probably to be explained by the preference of the א for this sound (cf. § 22 *o*, but also § 51 *p*); according to Qimḥi, it arises from an endeavour to avoid the similarity of sound between אֶקְטֹל (which is the Babylonian punctuation) and יִקְטֹל, which, according to this view, was likewise pronounced *iqṭōl*.[1]

c The preformative ת of the *second* persons (תִּקְטֹל, ground-form *tăqṭŭl*, &c.) is, without doubt, connected with the ת of אַתָּה, אַתֶּם, &c., and the *afformative* ־ִי of the 2nd fem. sing. תִּקְטְלִי with the *i* of the original feminine form אַתִּי (see § 32 *h*). The *afformative* וּ of the 2nd masc. plur. תִּקְטְלוּ (in its more complete form, וּן, see *m*) is the sign of the plural, as in the 3rd pers., and also in the Perfect (§ 44 *a*). In the Imperfect, however, it is restricted in both persons to the masculine,[2] while the afformative נָה (also ־ָן) of the 3rd and 2nd plur. fem. is probably connected with הֵנָּה *eae* and אַתֶּנָה *vos* (fem.).

d The preformatives of the *third* persons (י in the masc. יִקְטֹל, ground-form *yăqṭŭl*, plur. יִקְטְלוּ, ground-form *yăqṭŭlû*; ת in the fem. תִּקְטֹל, plur. תִּקְטֹלְנָה) have not yet met with any satisfactory explanation. With ת might most obviously be compared the original feminine

---

[1] Cf. § 24 *e*. In favour of the above view of Qimḥi may be urged the phonetic orthography אִשׁ (in Pr 18^{24} אִישׁ), 2 S 14^{19} (unless, with Perles, אָשֵׁב is to be read), Mi 6^{10}, for יֵשׁ, and אִישַׁי 1 Ch 2^{13} for יִשַׁי (as verse 12). Also הַאֲוֵהּ Mi 6^{11} is probably for הָאִוֵּן = הַוִּין, אפקר Is 10^{12} for יִפְקֹר; אנחמך Is 51^{19} for יְנַחֲמֵךְ; and conversely ישׁשכר is for אישׁ שָׂכָר = אִישׁשׂכָר. Similarly, ישׁוי 1 S 14^{49} is probably for אִשְׁיָו or אִשְׁיָה; in 2 S 23^{8} ישׁב בשבת is, according to the LXX, an error for אִשְׁבַּעְשֶׁת = ישבעשת. In Assyrian also the simple *i* corresponds to the Hebrew י as the preformative of the Impf. Qal.

[2] This is also the proper gender of the plural syllable *û*, *ûn*. In Hebrew, indeed, it is used in the 3rd plur. *Perfect* for both genders, but in the kindred languages even there only for the masculine, e.g. in Syriac *qeṭálû*, *qeṭálûn*, with the feminine form *qeṭálên*, in Western Aram. *qeṭálû*, fem. *qeṭálā*; in Arab. *qătălû*, fem. *qătălnă*, Eth. *qătălû*, *qătălâ*.

ending ת_ of nouns, and of the 3rd fem. sing. perfect. For the afformatives וּ (ן) and נָה, see *c*.

3. The characteristic vowel of the second syllable becomes *Šᵉwâ* *e* before tone-bearing afformatives which begin with a vowel, but is retained (as being in the tone-syllable) before the toneless afformative נָה. Thus: תִּקְטְלִי, תִּקְטְלוּ, יִקְטְלוּ, תִּקְטֹלְנָה (but in *pause* תִּקְטְלִי, &c.), תִּקְטֹלְנָה.

Rem. 1. The *ō* of the second syllable (as in the inf. constr. and imperat.), being lengthened from an original *ŭ* in the tone-syllable, is only tone-long (§ 9 *r*). Hence it follows that: (*a*) it is incorrectly, although somewhat frequently, written *plene*; (*b*) before *Maqqeph* the short vowel appears as *Qameṣ ḥaṭuph*, e.g. וַיִּכְתָּב־שָׁם *and he wrote there*, Jos 8³² (but cf. also Ex 21³⁷, Jos 18²⁰); (*c*) it becomes *Šᵉwâ* before the tone-bearing afformatives י_ and וּ (see above, *e*; but Jerome still heard e.g. *iezbuleni* for יִזְבְּלֵנִי; cf. *ZAW.* iv. 83). *f*

Quite anomalous are the three examples which, instead of a shortening to *Šᵉwâ*, exhibit a long *û*: יְשַׁפּוּטוּ הֵם Ex 18²⁶, immediately before the principal pause, but according to Qimḥi (ed. *Rittenb.* p. 18ᵇ), ed. Mant., Ginsb., Kittel against the other editions, with the tone on the ultima; likewise לֹא־תַעֲבוּרִי מִזֶּה Ru 2⁸; תִּשְׁמוּרֵם (in principal pause) Pr 14³. In the first two cases perhaps יְשַׁפֹּוטוּ and תַּעֲבוֹרִי (for יְשַׁפְּטוּ, &c.) are intended, in virtue of a retrogressive effect of the pause; in Pr 14³ תִּשְׁמְרוּם is to be read, with August Müller. *g*

2. The *ō* of the second syllable is to be found almost exclusively with transitive verbs middle *a*, like קָטַל. Intransitives *middle a* and *ē* almost always take *ă* (*Pathaḥ*)[1] in the impf., e.g. רָבַץ, יִרְבַּץ *to couch*, שָׁכַב, יִשְׁכַּב *to lie down* (לָמַד, יִלְמַד *to learn* is also originally intransitive = *to accustom oneself*); גָּדַל, יִגְדַּל *to become great* (but cf. שָׁכַן and שָׁבַן imperf. יִשְׁכֹּן *to dwell* and *to inhabit*, נָבַל imperf. יִבֹּל *to wither*); also from verbs *middle ō*, as קָטֹן *to be small*, the imperf. has the form יִקְטַן. *h*

Sometimes both forms occur together; those with *ō* having a transitive, and those with *ă* an intransitive meaning, e.g. יִקְצֹר *he cuts off*, יִקְצַר *he is cut off*, i.e. *is short*; חָלַשׁ impf. *ō*, *to overcome*, Ex 17¹³; impf. *ă*, *to be overcome*, Jb 14¹⁰. More rarely both forms are used without any distinction, e.g. יִשֹּׁךְ and יִשַּׁךְ *he bites*, יָחֹפֵן and יַחְפֵּן *he is inclined* (but only the latter with a transitive meaning = *he bends*, in Jb 40¹⁷). On the *a* of the impf. of verbs middle and third guttural, cf. § 64 *b*; § 65 *b*. In some verbs first guttural (§ 63 *n*), ע״ע (§ 67 *p*), פ״י (§ 69 *b*), and פ״א (§ 68 *c*), and in יִתֵּן for *yintēn* from נָתַן *to give*, instead of *ă* or *ō* a movable *Ṣere* (originally *ĭ*) is found in the second syllable. A trace of these *i*-imperfects[2] in the ordinary strong verb is probably to be found in וַיִּטְמְנוּ 2 K 7⁸, since טמן otherwise only occurs in Qal. We call these three forms of the imperfect after their characteristic vowel impf. *o*, impf. *a*, impf. *e*. *i*

3. For the *3rd sing. fem.* תִּקְטֹל (= *tiq-ṭōl*), Baer requires in 1 S 25²⁰ תִּפְגֹּשׁ (but read with ed. Mant., &c. תִּפְגַּשׁ). For the *2nd sing. fem.* (תִּקְטְלִי) the form *k*

[1] This *ă* is, however, by no means restricted to intransitive *strong* verbs; apart from verbs third guttural (§ 65 *b*), it is to be found in פ״ן and ע״ע, and in many verbs פ״א and פ״י (§§ 69–71).

[2] Cf. Barth, 'Das *i*-Imperfekt im Nordsemitischen,' *ZDMG.* 1889, p. 177 ff.

תִּקְטֹל is found in Is 57[8], Jer 3[5], Ez 22[4], 23[32], in every case after the regular form; but cf. also Ez 26[14]. In Is 17[10], where the 2nd fem. precedes and follows, probably זְ֭ תִּזְרָעִין is to be read with Marti for תִּזְרָעֵנוּ.—For the *3rd plur. fem.* תִּקְטֹלְנָה we find in Jer 49[11], in pause תִּבְטָחוּ (for תִּבְטַחְנָה), and thrice (as if to distinguish it from the 2nd pers.) the form יִקְטֹלְנָה with the preformative י (as always in Western Aram., Arab., Eth., and Assyr.), in Gn 30[38], 1 S 6[12], Dn 8[22]. On the other hand, תִּקְטֹלְנָה appears in some cases to be incorrectly used even for the fem. of the 3rd pers. or for the masc. of the 2nd pers. *sing.* as תִּשְׁלַחְנָה Ju 5[26] (where, however, perhaps תִּשְׁלַחְנָה is to be read), and Ob[13], for 2nd sing. masc., according to Olshausen a corruption of תִּשְׁלַח יָד; in Pr 1[20], 8[3] for תָּרֹנָּה read תְּרֹנָּה as in Jb 39[28]; in Ex 1[10] read תִּקְרָאֵנוּ with the Samaritan.—In Is 27[11], 28[3], as also in Jb 17[16] (if we read טֹובָתִי with LXX for the 2nd תקותי), it is equally possible to explain the form as a plural. This small number of examples hardly justifies our finding in the above-mentioned passages the remains of an emphatic form of the Impf., analogous to the Arab. *Modus energicus I*, with the termination *ănnă*.

l For נָה we frequently find, especially in the Pentateuch and mostly after *wāw consecutive*, simply ָן *nā*, e.g. Gn 19[33.36], 37[7], Ex 1[18.19], 15[20], Nu 23[2], Ez 3[20], 16[55]; in Arab. always *nă*. According to Elias Levita תִּלְבַּשְׁן (2 S 13[18]) is the only example of this kind in the strong verb. The form וַתִּגְבַּהֶיהָ (so also Qimḥi and ed. Mant.; but Baer, Ginsb. וַתִּגְבְּהֶנָה) for וַתִּגְבַּהְנָה *they were high*, Ez 16[50], is irregular, with ֶ inserted after the manner of verbs ע״ע and ע״ו, § 67 *d*; § 72 *i*; according to Olshausen it is an error caused by the following form.

m **4.** Instead of the plural forms in ו there are, especially in the older books, over 300 forms[1] with the fuller ending ון (with *Nûn paragogicum*), always bearing the tone; cf. § 29 *m* and § 44 *l*; on its retention before suffixes, see § 60 *e*; also defectively יִרְיבֻן Ex 21[18], 22[8], &c. This usually expresses marked emphasis, and consequently occurs most commonly at the end of sentences (in the principal pause), in which case also the (pausal) vowel of the second syllable is generally retained. Thus there arise full-sounding forms such as יִלְקְטוּן *they collect*, ψ 104[28]; יִרְגְּזוּן *they tremble*, Ex 15[14]; תִּשְׁמָעוּן *ye shall hear*, Dt 1[17]; cf. Ex 34[13], with Zaqeph qaṭon, Athnaḥ, and Silluq; Jos 24[15], with Segolta; Is 13[8] and 17[13] with Zaqeph qaṭon, 17[12] with Athnaḥ and Silluq, 41[5] after *wāw consec.* Without the pause, e.g. ψ 11[2] יְדְרְכוּן קֶשֶׁת, cf. 4[3], Gn 18[28.29.30 ff.], 44[1], Nu 32[23], Jos 4[6] (יִשְׁאָלֻן); Is 8[12], 1 S 9[13], Ru 2[9] (יְקַצְּרוּן and יִשְׁאֲבוּן); Ju 11[18] after *wāw consec.*

Some of these examples may be partly due to euphonic reasons, e.g. certainly Ex 17[2], Nu 16[29], 32[20], 1 S 9[13], 1 K 9[6], and often, to avoid a hiatus before א or ע. It was, however, the pause especially which exerted an influence on the restoration of this older and fuller termination (cf. § 159 *c*, note), as is manifest from Is 26[11]: בַּל־יֶחֱזוּן יֶחֱזוּ וְיֵבֹשׁוּ *they see not; may they see and become*

[1] [See details in F. Böttcher, *Lehrb.*, § 930; and cf. Driver on 1 S 2[15].]

ashamed. All this applies also to the corresponding forms in the Imperfect of the derived conjugations.[1] In Aramaic and Arabic this earlier ן (old Arabic *ûnă*) is the regular termination; but in some dialects of vulgar Arabic it has also become *û*.

n With an affixed א we find (in the imperf. Niph'al) יִנָּשׂוּא Jer 10[5], evidently an error for יִנָּשֵׂא, caused by the preceding נִשָּׂא.—In יִשָּׂשׂוּם Is 35[1], since מ follows, the ם is no doubt only due to dittography.

o 5. Corresponding to the use of ן for ו there occurs in the 2nd sing. fem., although much less frequently, the fuller ending ִין_ (as in Aram. and Arab.; old Arab. *înă*), also always with the tone, for ִי_, generally again in the principal pause, and almost in all cases with retention of the vowel of the penultima; thus תִּדְבָּקִין Ru 2[8.21], cf. 3[4.18], 1 S 1[14] (תִּשְׁתַּבְּרִין), Jer 31[22], Is 45[10].

p 6. On the reappearance in pause of the *ō* which had become *Šᵉwâ* in the forms תִּקְטְלִי, &c., see above, *e*; similarly, the imperfects with *ă* restore this vowel in pause and at the same time lengthen it (as a tone-vowel) to *ā*, hence, e.g. יִגְדָּלִי, תִּגְדָּלִי. This influence of the pause extends even to the forms without affortmatives, e.g. וַיִּגְדַּל, in pause וַיִּגְדָּל. But the fuller forms in *ûn* and *în* have the tone always on the ultima, since the vowels *û* and *î* in a closed final syllable never allow of the retraction of the tone.

q 7. On the numerous instances of passive forms in the imperfect, mostly treated as Hoph'al, see § 53 *u*.

§ 48. *Shortening and Lengthening of the Imperfect and Imperative. The Jussive and Cohortative.*

a 1. Certain modifications which take place in the form of the imperfect, and express invariably, or nearly so, a distinct shade of meaning, serve to some extent as a compensation for the want of special forms for the *Tempora relativa* and for certain *moods* of the verb.

b 2. Along with the usual form of the imperfect, there exists also a lengthened form of it (the *cohortative*), and a shortened form (the *jussive*).[2] The former occurs (with few exceptions) only in the 1st person, while the latter is mostly found in the 2nd and 3rd persons, and less frequently in the 1st person. The laws of the tone, however, and of the formation of syllables in Hebrew, not infrequently precluded the indication of the jussive by an actual shortening of the form; consequently it often—and, in the imperfect forms with afformatives, always—coincides with the ordinary imperfect (*indicative*) form.

In classical Arabic the difference is almost always evident. That language distinguishes, besides the indicative *yăqtŭlŭ*, (*a*) a subjunctive, *yăqtŭlă*; (*b*) a

[1] It is to be observed that the Chronicles often omit the *Nûn*, where it is found in the parallel passage in the Books of Kings; cf. 1 K 8[38.43] with 2 Ch 6[29.33]; 1 K 12[24], 2 K 11[5] with 2 Ch 11[4], 23[4].

[2] The perfect has only *one* form, since it cannot be used, like the imperfect, to express mood-relations (see § 106 *p*).

jussive, *yāqtŭl*; (*c*) a double 'energetic' mood of the impf., *yāqtŭlannā* and *yāqtŭlān*, in pause *yāqtūlā*, the last form thus corresponding to the Hebrew cohortative.

c 3. The characteristic of the cohortative form is an *ā* (הָ֫) affixed to the 1st pers. sing. or plur., e.g. אֶקְטְלָה from אֶקְטֹל.[1] It occurs in almost all conjugations and classes of the strong and weak verb (except of course in the passives), and this final הָ֫ has the tone wherever the afformatives וּ and ִי would have it. As before these endings, so also before the הָ֫ cohortative, the movable vowel of the last syllable of the verbal form becomes *Šewâ*, e.g. in Qal אֶשְׁמְרָה *I will observe*, in Pi'el נְנַתְּקָה *let us break asunder*, ψ 2[3]; on אֶשְׁקְטָה Is 18[4] *Qerê* (cf. also 27[4], Ezr 8[25], &c.), see § 10 *h*; with the *Kethîbh* of these passages, compare the analogous cases וישפוטו, &c., § 47 *g*.—On the other hand, an unchangeable vowel in the final syllable is retained as tone-vowel before the הָ֫, as (e.g.) in Hiph. אוֹדִיָּרָה *I will praise*. In pause (as before *û* and *î*), the vowel which became *Šewâ* is restored as tone-vowel; thus for the cohortative אֶשְׁמְרָה the pausal form is אֶשְׁמָ֫רָה ψ 59[10]; cf. Gn 18[21], Is 41[26].

d The change of הָ֫ into the obtuse הָ֫ seems to occur in 1 S 28[15], unless, with Nestle, we are to assume a conflate reading, וְאֶקְרָא and וְאֶקְרָה; and with the 3rd pers. ψ 20[4], in a syllable sharpened by a following *Dageš forte conjunct.*; cf. similar cases of the change of הָ֫ into the obtuse הָ֫ in *l* and in §§ 73 *d*, 80 *i*, 90 *i*. In ψ 20[4], however, יְרַשְּׁנָה—with suffix—is probably intended. An הָ֫ cohort. is also found with the 3rd pers. in Is 5[19] (twice); Ez 23[20], and again in verse 16 according to the *Qerê*, but in both these cases without any effect on the meaning. Probably another instance occurs in Jb 11[17], although there תִּעֲפָה might also, with Qimḥi, be regarded as 2nd masc. For the doubly irregular form תְּבֹוּאָתָה Dt 33[16] (explained by Olshausen and König as a scribal error, due to a confusion with תבואת in verse 14), read תְּבֻוּאָנָה. For תְּבוּאָתְךָ Jb 22[21] the noun תְּבוּאָתְךָ *thine increase*, might be meant, but the Masora has evidently intended an imperfect with the ending *ath*, instead of הָ֫, before the suffix, on the analogy of the 3rd sing. fem. perfect, see § 59 *a*; on ותבאתי 1 S 25[34], see § 76 *h*.

e The *cohortative* expresses the direction of the will to an action and thus denotes especially self-encouragement (in the 1st plur. an exhortation to others at the same time), a resolution or a wish, as an *optative*, &c., see § 108.

f 4. The general characteristic of the *jussive* form of the imperfect is rapidity of pronunciation, combined with a tendency to retract

[1] Probably this *ā* goes back to the syllable *an*, which in Arabic (see above, Rem. to *b*) is used for the formation of the 'energetic' mood, and in Hebrew (see the footnote to § 58 *i*) often stands before suffixes.

the tone from the final syllable, in order by that means to express the urgency of the command in the very first syllable. This tendency has, in certain forms, even caused a material shortening of the termination of the word, so that the expression of the command appears to be concentrated on a single syllable. In other cases, however, the jussive is simply marked by a shortening of the vowel of the second syllable, without its losing the tone, and very frequently (see above, *b*) the nature of the form does not admit of any alteration. It is not impossible, however, that even in such cases the jussive in the living language was distinguished from the indicative by a change in the place of the tone.

g In the strong verb the jussive differs in *form* from the indicative only in *Hiph'il* (juss. יַקְטֵל, ind. יַקְטִיל), and similarly in the weak verb, wherever the imperfect indicative has *î* in the second syllable, e. g. from יָשַׁב impf. *Hiph.* יוֹשִׁיב, juss. יוֹשֵׁב; from מוּת, יָמִית and יָמֵת; also in *Qal* of the verbs ע״ו and ע״י, as יָמוֹת, ind. יָמוּת; יָגֵל, ind. יָגִיל; in all conjugations of verbs ל״ה, so that the rejection (*apocope*) of the ending ־ָה in *Qal* and *Hiph.* gives rise to monosyllabic forms, with or without a helping vowel under the second radical, e. g. *Qal* ind. יִגְלֶה, juss. יִגֶל; *Hiph.* ind. יַגְלֶה, juss. יַגֶל; and in the *Pî'ēl* יְצַו from the indic. יְצַוֶּה (called apocopated imperfects). But almost all[1] the plural forms of the jussive coincide with those of the indicative, except that the jussive excludes the fuller ending ־וּן. Neither do the forms of the 2nd sing. fem., as תַּקְטֹלִי, תָּמוּתִי, תִּגְלִי, &c., admit of any change in the jussive, nor any forms, whether singular or plural, to which suffixes are attached, e. g. תְּמִיתֵנִי as ind. Jer 38[15], as jussive Jer 41[8].

h The meaning of the jussive is similar to that of the cohortative, except that in the jussive the command or wish is limited almost exclusively to the 2nd or 3rd pers. On special uses of the jussive, e. g. in hypothetical sentences (even in the 1st pers.), see § 109 *h*.

i 5. The imperative, in accordance with its other points of connexion with the imperfect in form and meaning, admits of a similar lengthening (by ־ָה, Arab. *imper. energicus*, with the ending *-ănnă* or *-ān*, in pause *-ā*) and shortening. Thus in *Qal* of the strong verb, the lengthened form of שָׁמֹר *guard* is שָׁמְרָה[2] (*šŏmᵉrâ*, cf. קִטְלִי *qiṭᵉlî*, § 46 *d*); עָזַב, עָזְבָה Jer 49[11]; שָׁכַב, שִׁכְבָה *lie down*; שָׁמַע, שִׁמְעָה *hear*, in lesser pause שִׁמְעָה

[1] Only in 1st plur. do we find a few shortened forms, as נִשְׁאֵר 1 S 14[36], parallel with cohortatives; and נֵרֵא Is 41[23] *Kᵉth.*

[2] On the reading שִׁמְרָה (i. e. *šimᵉra*, according to the Jewish grammarians), required by the Masora in ψ 86[2], 119[167] (cf. also Is 38[14], and שִׁמְרֵנִי ψ 16[1]), see § 9 *v*; on מלוכה, Ju 9[8] *Kᵉth.*, see § 46 *e*.

Dn 9^{19}; in Niph'al הִשָּׁבְעָה Gn 21^{23}. Cf., however, also מִכְרָה *sell*, Gn 25^{31}, notwithstanding the impf. יִמְכֹּר; עֶרְכָה Jb 33^{5} (cf. עֶרְכוּ Jer 46^{3}), but impf. יַעֲרֹךְ; אֶסְפָה *collect*, Nu 11^{16} (for אֹסְפָה cf. § 63 *l* and the plural אֶסְפוּ), but 2nd masc. אֶסֹף; נִצְרָה ψ 141^{3}. Barth (see above, § 47 *i* note) finds in these forms a trace of old imperfects in *i*, cf. § 63 *n*. On the other hand, קָרְבָה ψ 69^{19} (also Imperat. קְרַב Lv 9^{7}, &c.), but impf. יִקְרַב. Without ה, we have the form לֵךְ *go*, Nu 23^{13}, Ju 19^{13}, 2 Ch 25^{17}. The form קְטֹל in pause becomes קְטֹלָה, the form קְטַל becomes קְטָלָה, e. g. יְרָשָׁה Dt 33^{23}. But also without the pause we find מְלוֹנָה Ju 9^{8} *Ke'th.* and צְרוֹפָה ψ 26^{2} *Ke'th.*, on which see § 46 *e*. On the other hand רַנָּה, פְּשֹׁטָה, עֹרָה, תְּגוֹרָה Is 32^{11} are to be explained as aramaizing forms of the 2nd plur. fem.; also for חֵרְדוּ v. 11 read חֲרֵדָה, and for סְפֹרִים v. 12 read סִפְרָה.

k The shortened imperative is found only in verbs ל״ה, e. g. in *Pi'ēl* גַּל from גַּלֵּה. The shade of meaning conveyed by the imperatives with ה֫ is not always so perceptible as in the cohortative forms of the imperfect, but the longer form is frequently emphatic, e. g. קוּם *rise up*, קוּמָה *up!* תֵּן *give*, תְּנָה *give up!*

l Rem. The form דְּעָה for דָּעָה, best attested in Pr 24^{14} (where it is taken by the Masora as imperat., not as infin., דַּעַת) is evidently due to the influence of the ה which follows it in close connexion (so Strack, on the analogy of Jb 31^{2}); for other examples of this change of *a* to S^e^ghol, see above, under *d*, § 73 *d*, and § 80 *i*. On the other hand, it is doubtful whether רַבֵּה Ju 9^{29} (from רָבָה) is intended for רַבֵּה, and not rather for the common form of the imperative *Pi'ēl* רַבֵּה. In favour of the former explanation it may be urged that the imperative צֵאָה (from יָצָא) follows immediately after; in favour of the latter, that the ending ה֫, with imperatives of verbs ל״ה, is not found elsewhere, and also that here no guttural follows (as in Pr 24^{14}).

§ 49. *The Perfect and Imperfect with Wāw Consecutive.*

a **1.** The use of the two tense-forms, as is shown more fully in the Syntax (§§ 106, 107, cf. above, § 47, note on *a*), is by no means restricted to the expression of the past or future. One of the most striking peculiarities in the Hebrew *consecution* of tenses[1] is the phenomenon that, in representing a series of past events, only the first

[1] The other Semitic languages do not exhibit this peculiarity, excepting the Phoenician, the most closely related to Hebrew, and of course the Moabitish dialect of the *Mēša'* inscription, which is practically identical with Old Hebrew. It also appears in the inscription of זכר of Hamāth (cf. Nöldeke, *ZA.* 1908, p. 379) where we find ואשא ידי *and I lifted up my hand*, ויענני *and he answered me*, after a perfect of narration.

verb stands in the perfect, and the narration is continued in the imperfect. Conversely, the representation of a series of future events begins with the imperfect, and is continued in the perfect. Thus in 2 K 20[1], *In those days was Hezekiah sick unto death* (perf.), *and Isaiah . . . came* (imperf.) *to him, and said* (imperf.) *to him*, &c. On the other hand, Is 7[17], *the Lord shall bring* (imperf.) *upon thee . . . days*, &c., 7[18], *and it shall come to pass* (perf. וְהָיָה) *in that day . . .*

This progress in the sequence of time, is regularly indicated by *b* a pregnant *and* (called *wāw consecutive*[1]), which in itself is really only a variety of the ordinary *wāw copulative*, but which sometimes (in the imperf.) appears with a different vocalization. Further, the tenses connected by *wāw consecutive* sometimes undergo a change in the tone and consequently are liable also to other variations.

2. The *wāw consecutive* of the *imperfect* is (*a*) pronounced with *c* *Pathaḥ* and a *Dageš forte* in the next letter, as וַיִּקְטֹל *and he killed*; before א of the *1st pers. sing.* (according to § 22 *c*) with *Qameṣ*, as וָאֶקְטֹל *and I killed*. Exceptions are, וַאֲכַפֵּךְ Ez 16[10] according to the *Dikduke ha-ṭᵉamim*, § 71; also וַאֲמֹתֵתֵהוּ 2 S 1[10] according to Qimḥi; but in Ju 6[9] וַאֲנַרְשׁ should be read according to Baer, and וָאֵ in both places in Ju 20[6]. *Dageš forte* is always omitted in the preformative וַ, in accordance with § 20 *m*.

(*b*) When a shortening of the imperfect form is possible (cf. § 48 *g*), *d* it takes effect, as a rule (but cf. § 51 *n*), after *wāw consec.*, e.g. in Hiphil וַיַּקְטֵל (§ 53 *n*). The tendency to retract the tone from the final syllable is even stronger after *wāw consec.* than in the jussive. The throwing back of the tone on to the penultima (conditional upon its being an open syllable with a long vowel, § 29 *a*), further involves the greatest possible shortening of the vowel of the ultima, since the vowel then comes to stand in a toneless closed syllable, e.g. וַיָּקֻם, juss.

---

[1] This name best expresses the prevailing syntactical relation, for by *wāw consecutive* an action is always represented as the direct, or at least temporal *consequence* of a preceding action. Moreover, it is clear from the above examples, that the *wāw consecutive* can only be thus used in immediate conjunction with the verb. As soon as *wāw*, owing to an insertion (e.g. a negative), is separated from the verb, the imperfect follows instead of the perfect *consecutive*, the perfect instead of the imperfect *consecutive*. The fact that whole Books (Lev., Num., Josh., Jud., Sam., 2 Kings, Ezek., Ruth, Esth., Neh., 2 Chron.) begin with the imperfect *consecutive*, and others (Exod., 1 Kings, Ezra) with *wāw copulative*, is taken as a sign of their close connexion with the historical Books now or originally preceding them. Cf., on the other hand, the independent beginning of Job and Daniel. It is a merely superficial description to call the wāw consecutive by the old-fashioned name *wāw conversive*, on the ground that it always converts the meaning of the respective tenses into its opposite, i.e. according to the old view, the future into the preterite, and vice versa.

וָאָקָם, with *wāw consec.* וַיָּקָם *and he arose* (§ 67 *n* and *x*, § 68 *d*, § 69 *p*, § 71, § 72 *t* and *aa*, § 73 *e*).[1]

c In the *first* pers. sing. alone the retraction of the tone and even the reducing of the long vowel in the final syllable (*â* to *ō*, *î* to *ē*, and then to *ŏ* and *ĕ*) are not usual,[2] at least according to the Masoretic punctuation, and the apocope in verbs ל״ה occurs more rarely; e.g. always וָאָקוּם (or וָאָקֻם, a merely orthographic difference) *and I arose*; *Hiph.* וָאָקִים (but generally written וָאָקֵם, implying the pronunciation *wā'āqem*, as וָאָקֵם implies *wā'āqŏm*); וָאֵרְאֶה *and I saw*, more frequently than וָאֶרְאֶה, § 75 *t*. On the other hand, the form with final ה_ is often used in the 1st pers. both sing. and plur., especially in the later books, e. g. וָאֲשַׁלְחָה *and I sent*, Gn 32^{6}, 41^{11}, 43^{21}, Nu 8^{19} (וָאֶתְּנָה, as in Ju 6^{9}, 1 S 2^{28}, and often, probably a sort of compensation for the lost נ); Ju 6^{10}, 12^{3}, 2 S 22^{24}, ψ 3^{6}, 7^{5}, 90^{10}, 119^{55}, Jb $1^{15ff.}$, 19^{20}, Ez 7^{28}, 8^{25}, 9^{3}, Neh 2^{13}, $5^{7.8.13}$, 6^{11}, $13^{7-11.21\,f.}$, &c.—Sometimes, as in ψ 3^{6}, with a certain emphasis of expression, and probably often, as in Ju 10^{12}, וָאוֹשִׁיעָה before א, for euphonic reasons. In Is 8^{2} וָאָעִידָה may have been originally intended; in ψ 73^{16} וָאֶחׄ and in Jb 30^{26} וָאֲיׄ. In Ez 3^{3} read וָאֹכְלָה or וָאֹכְלָה.

f This ·ו is in meaning a strengthened *wāw copulative*, and resembles in pronunciation the form which is retained in Arabic as the ordinary copula (*wă*).[3] The close connexion of this *wă* with the following consonant, caused the latter in Hebrew to take Dageš, especially as *ă* could not have been retained in an open syllable. Cf. בְּמָה, בַּמָּה, לָמָּה (for לַמָּה), where the prepositions בְּ and לְ, and the particle מָה, are closely connected with מָה in the same way (§ 102 *k*).

g The retraction of the tone also occurs in such combinations, as in לָמָּה (for לַמָּה § 102 *l*).—The identity of many *consecutive* forms with jussives of the same conjugation must not mislead us into supposing an intimate relation between the moods. In the consecutive forms the shortening of the vowel (and the retraction of the tone) seems rather to be occasioned solely by the strengthening of the preformative syllable, while in the jussives the shortening (and retraction) belongs to the character of the form.

h **3.** The counterpart of *wāw consecutive* of the *imperfect* is *wāw consecutive* of the *perfect*, by means of which perfects are placed as

---

[1] The plural forms in ן also occur less frequently after *wāw consecutive*; cf., however, וַיָּרִיבוּן Ju 8^{1}, 11^{18}, Am 6^{3}, Ez 44^{8}, Dt 4^{11}, 5^{20}. The 2nd fem. sing. in ין_ never occurs after *wāw consecutive*.

[2] In the 1st plur. וַנַּעֲמִיד Neh 4^{3} is the only instance in which the vowel remains unreduced (cf. וְנִשּׁוּב, i. e. וְנָשׁוּבָה, 4^{9} *K'th.*; *Q'ré* וְנָשָׁב). On the treatment of the tone in the imperfect, imperative, and infinitive *Niph'al*, see § 51 *n*.

[3] In usage the Hebrew *wāw* does duty for the Arabic *fă* (*wāw apodosis*, see § 143 *d*) as well as *wă*.

the sequels in the future to preceding actions or events regarded as incomplete at the time of speaking, and therefore in the imperfect, imperative, or even participle. This *wāw* is in form an ordinary *wāw copulative*, and therefore shares its various vocalization (וְ, וָ, וֶ, as 2 K 7^4, and וּ); e. g. וְהָיָה, after an imperfect, &c., *and so it happens = and it will happen*. It has, however, the effect, in certain verbal forms, of shifting the tone from the penultima, generally on to the ultima, e.g. הָלַכְתִּי *I went*, consecutive form וְהָלַכְתִּי *and I will go*, Ju 1^3, where it is co-ordinated with another *perfect consecutive*, which again is the consecutive to an *imperative*. See further on this usage in § 112.

As innumerable examples show, the *Qameṣ* of the first syllable is retained *i* in the strong perf. consec. Qal, as formerly before the tone, so now in the secondary tone, and therefore necessarily takes *Metheg*. On the other hand, the *ō* of the second syllable in verbs *middle ō* upon losing the tone necessarily becomes *ŏ*, e.g. וַיִּכְלֹתָ Ex 18^{23}.

k The shifting forward of the tone after the *wāw consecutive* of the *perfect* is, however, not consistently carried out. It is omitted—(*a*) always in the 1st *pers. pl.*, e.g. וַיִּשַּׁבְנוּ Gn 34^{16}; (*b*) regularly in Hiph'il before the afformatives הָ— and וּ, see § 53 *r*; and (*c*) in many cases in verbs ל״א and ל״ה, almost always in the 1st sing. of ל״א (Jer 29^{14}), and in ל״ה if the vowel of the 2nd syllable is *i*, Ex 17^6, $26^{4.6.7.10\ ff.}$, Ju 6^{26}, &c., except in *Qal* (only Lv 24^5, before א) and the 2nd sing. masc. of Hiph'il-forms before א, Nu 20^8, Dt 20^{13}, 1 S 15^3, 2 K 13^{17}; similarly in Pi'ēl before א, Ex 25^{24}, Jer 27^4. On the other hand the tone is generally moved forward if the second syllable has *ê* (in ל״א Gn 27^{10} &c., in ל״ה Ex 40^4, Jer 33^6, Ez 32^7); but cf. also וַיֵּרָאתָ Lv $19^{14.32}$ and frequently, always before the counter-tone, Jo 4^{21}, ψ 19^{14}.[1] With *ā* in the penultima the form is וְנָשָׂאתָ Is 14^4, and probably also וְקָרָאתָ Jer 2^2, 3^{12}, 1 S 10^2 with little T^{e}liša, a postpositive accent.

l But before a following א the ultima mostly bears the tone on phonetic grounds, e.g. וּבָאתָ אֶל־ Gn 6^{18}, Ex 3^{18}, Zc 6^{10} (by the side of וּבָתָּ), &c. (cf., however, וְקָרָאתָ, before א, Gn 17^{19}, Jer 7^{27}, Ez 36^{29}); וְהִכִּיתָ אֶת־ Ju 6^{16}, cf. Ex 25^{11}, Lv 24^5 (but also וְצִוִּיתִי אֶת־ Lv 25^{21}). Likewise, before ה, Am 8^9, and ע, e.g. Gn 26^{10}, 27^{12}, Lv 26^{25} (cf., however, וְקָרָאתִי עָלָיו, Ez 38^{21}); on verbs ע״ע, see § 67 *k* and *ee*.

m (*d*) The tone always keeps its place when such a perfect stands in *pause*, e.g. וְשִׁבְעָתָ Dt 6^{11}, 11^{15}; וְאָמַרְתָּ Is 14^4, Ju 4^8; sometimes even in the lesser pause, as Dt 2^{28}, Ez 3^{26}, 1 S 29^8 (where see Driver), with *Zaqeph qaṭon*; and frequently also immediately *before* a tone-syllable (according to § 29 *e*), as in וַיִּשְׁכַּבְתָּה בְּהּ Dt 17^{14}, Ez 14^{13}, 17^{22}, Am $1^{4.7.10.12}$—but also וְחִשַּׁקְתָּ בָּהּ Dt 21^{11}, 23^{14}. 24^{19}, 1 K 8^{48}.

---

[1] The irregularity in the tone of these perfects manifestly results from following conflicting theories, not that of Ben Asher alone.

§ 50. *The Participle.*

a **1.** Qal has both an active participle, called *Pô'ēl* from its form (פֹּעֵל), and a passive, *Pā'ûl* (פָּעוּל).[1]

Pā'ûl is generally regarded as a survival of a passive of Qal, which still exists throughout in Arabic, but has been lost in Hebrew (see, however, § 52 *e*), just as in Aramaic the passives of *Pi'ēl* and *Hiph'îl* are lost, except in the participles. But instances of the form *quṭṭāl* are better regarded as remnants of the passive participle Qal (see § 52 *s*), so that פָּעוּל must be considered as an original verbal noun; cf. Barth, *Nominalbildung*, p. 173 ff.

b **2.** In the intransitive verbs *mid. e* and *mid. o*, the form of the participle active of Qal coincides in form with the 3rd sing. of the perfect, e. g. יָשֵׁן *sleeping*, from יָשֵׁן; יָגוֹר (only orthographically different from the perf. יָגֹר) *fearing*; cf. the formation of the participle in *Niph'al*, § 51 *a*. On the other hand, the participle of verbs *mid. a* takes the form קֹטֵל (so even from the *transitive* שָׂנֵא *to hate*, part. שֹׂנֵא). The *ô* of these forms has arisen through an obscuring of the *â*, and is therefore unchangeable, cf. § 9 *q*. The form קָטֵל (with a changeable *Qameṣ* in both syllables), which would correspond to the forms יָשֵׁן and יָגֹר, is only in use as a noun, cf. § 84[a] *f*. The formation of the participle in *Pi'ēl*, *Hiph'îl*, and *Hithpa'ēl* follows a different method.

c **3.** Participles form their feminine (קֹטְלָה or קֹטֶלֶת) and their plural like other nouns (§ 80 *e*, § 84[a] *r*, *s*, § 94).

d Rem. 1. From the above it follows, that the *ā* of the form יָשֵׁן is lengthened from *ă*, and consequently changeable (e.g. *fem.* יְשֵׁנָה); and that the *ô* of קֹטֵל on the other hand is obscured from an unchangeable *â*.[1] In Arabic the verbal adjective of the form *qātil* corresponds to the form *qāṭēl*, and the part. *qâtil* to *qôṭēl*. In both cases, therefore, the *ē* of the second syllable is lengthened from *ĭ*, and is consequently changeable (e. g. קֹטֵל, plur. קֹטְלִים; כָּבֵד, constr. pl. כִּבְדֵי).

e תּוֹמִיךְ ψ 16[5], instead of the form *qôṭēl*, is an anomaly; it is possible, however, that תּוֹמִיךְ (incorrectly written fully) is intended (cf. סֹבִיב 2 K 8[21]), or even the *imperfect Hiph'il* of יָמַךְ. The form יִסַּף in Is 29[14], 38[5] appears to stand for יֹסֵף, but most probably the Masora here (as certainly in יוֹסִיף Ec 1[18]) intends the 3rd sing. imperf. Hiph., for which the better form would be יוֹסֵף; אוֹכִיל 1 Ch 27[30], being a proper name and a foreign word, need not be considered.—אֹבֵד (constr. state of אֹבֵד), with *ă* in the second syllable, occurs in Dt 32[28] (cf. moreover, § 65 *d*). On הוֹלֵם Is 41[7] (for הוֹלֵם), see § 29 *f*.

f **2.** A form like the pass. ptcp. *Pā'ûl*, but not to be confused with it, is sometimes found from *intransitive verbs*, to denote an inherent quality, e. g. אָמוּן *faithful*; אָנוּשׁ *desperate*, Jer 15[18], &c.; בָּטוּחַ *trustful*, Is 26[3], ψ 112[7]; עָצוּם *strong*; שָׁכוּר *drunken*, Is 51[21]; and even from transitive verbs, אָחוּז *handling*, Ct 3[6]; זָכוּר *mindful*, ψ 103[14]; יָדוּעַ *knowing*, Is 53[3]; cf. § 84[a] *m*.

---

[1] The constr. st. נְאֻם in the formula נְאֻם יהוה, *the word* (properly the *whispering*) *of the Lord*, &c., is always written defectively.

[2] Cf. Vollers, 'Das Qâtil-partizipium,' in *ZA.* 1903, p. 312 ff.

B. Verba Derivativa, or Derived Conjugations.

§ 51. *Niph'al*.[1]

a 1. The essential characteristic of this conjugation consists in a prefix[2] to the stem. This exists in two forms: (*a*) the (probably original) prepositive *nă*, as in the Hebrew perfect and participle, although in the strong verb the *ă* is always attenuated to *ĕ*: נִקְטַל for original *nă-qăṭăl*, participle נִקְטָל, infinitive absolute sometimes נִקְטוֹל; (*b*) the (later) proclitic *in* (as in all the forms of the corresponding Arabic conjugation VII. *'inqătălă*), found in the imperfect יִקָּטֵל for *yinqāṭēl*, in the imperative and infinitive construct, with a secondary ה added, הִקָּטֵל (for *hinqāṭēl*), and in the infinitive absolute הִקָּטֹל The inflexion of *Niph'al* is perfectly analogous to that of Qal.

b The features of *Niph'al* are accordingly in the perfect and participle the prefixed *Nūn*, in the imperative, infinitive, and imperfect, the *Dageš* in the first radical. These characteristics hold good also for the weak verb. In the case of an initial guttural, which, according to § 22 *b*, cannot take *Dageš forte*, the omission of the strengthening invariably causes the lengthening of the preceding vowel (see § 63 *h*).

c 2. As regards its meaning, *Niph'al* bears some resemblance to the Greek *middle voice*, in being—(*a*) primarily *reflexive* of Qal, e.g. נִלְחַץ *to thrust oneself* (*against*), נִשְׁמַר *to take heed to oneself*, φυλάσσεσθαι, נִסְתַּר *to hide oneself*, נִגְאַל *to redeem oneself*; cf. also נֶעֱנָה *to answer for oneself*. Equally characteristic of *Niph'al* is its frequent use to express emotions which react upon the mind; נִחַם *to trouble oneself*, נֶאֱנַח *to sigh* (*to bemoan oneself*, cf. ὀδύρεσθαι, *lamentari*, *contristari*); as well as to express actions which the subject allows to happen to himself, or to have an effect upon himself (*Niph'al tolerativum*), e. g. דָּרַשׁ *to search, to inquire*, Niph. *to allow oneself to be inquired of*, Is 65[1], Ez 14[3], &c.; so the Niph. of מָצָא *to find*, יָסַר *to warn, to correct*, Jer 6[8], 31[18], &c.

d (*b*) It expresses *reciprocal* or mutual action. e.g. דִּבֶּר *to speak*, Niph. *to speak to one another*; שָׁפַט *to judge*, Niph. *to go to law with one another*; יָעַץ *to counsel*, Niph. *to take counsel*, cf. the *middle* and *deponent* verbs βουλεύεσθαι (נוֹעַץ), μάχεσθαι (נִלְחָם), *altercari*, *luctari* (נָצָה *to strive with one another*) *proeliari*.

e (*c*) It has also, like *Hithpa'ēl* (§ 54 *f*) and the Greek *middle*, the meaning of the active, with the addition of *to oneself* (*sibi*), *for one-*

[1] Cf. A. Rieder, *De linguae Hebr. verbis, quae vocantur derivata nifal et hitpael*, Gumbinnen (Progr. des Gymn.), 1884, a list of all the strong Niph'al forms (81) and Hithpa'ēl forms (36) in the Old Testament; and especially M. Lambert, 'L'emploi du Nifal en Hébreu,' *REJ.* 41, 196 ff.

[2] See Philippi in *ZDMG.* 1886, p. 650, and Barth, ibid. 1894, p. 8 f.

self, e. g. נִשְׁאַל *to ask* (something) *for oneself* (1 S 20[6.28], Neh 13[6]), cf. *αἰτοῦμαί σε τοῦτο, ἐνδύσασθαι χιτῶνα, to put on* (oneself) *a tunic.*

f (*d*) In consequence of a looseness of thought at an early period of the language, *Niph'al* comes finally in many cases to represent the *passive*[1] of *Qal*, e. g. יָלַד *to bear*, Niph. *to be born*; קָבַר *to bury*, Niph. *to be buried.* In cases where *Qal* is intransitive in meaning, or is not used, *Niph'al* appears also as the passive of *Pi'ēl* and *Hiph'il*, e. g. כָּבֵד *to be in honour*, Pi'ēl *to honour*, Niph. *to be honoured* (as well as Pu'al כֻּבַּד); כִּחֵד Pi'ēl *to conceal*, Hiph. *to destroy*, Niph. passive of either. In such cases *Niph'al* may again coincide in meaning with Qal (חָלָה Qal and Niph. *to be ill*) and even take an accusative.

g Examples of denominatives are, נִוָּלַד *to be born a male*, Ex 34[19] (from זָכָר; but probably הַזָּכָר should here be read); נִלְבַּב *cordatum fieri*, Jb 11[12] (from לֵב *cor*); doubtless also נִבָּנָה *to obtain children*, Gn 16[2], 30[3].

h The older grammarians were decidedly wrong in representing *Niph'al* simply as the *passive* of *Qal*; for *Niph'al* has (as the frequent use of its imperat. shows), in no respect the character of the other passives, and in Arabic a special conjugation (*'inqātălă*) corresponds to it with a passive of its own. Moreover, the forms mentioned in § 52 *e* point to a differently formed passive of *Qal*.—The form נְגְאֲלוּ Is 59[3], La 4[14], is not to be regarded as a passive of Niph'al, but with Kōnig and Cheyne as a *forma mixta*, in the sense that the punctuators intended to combine two optional readings, נִגְאֲלוּ, perf. Niph., and גֹּאֲלוּ, perf. Pu'al [cf. also Wright, *Compar. Gramm.*, p. 224]. Although the passive use of Niph'al was introduced at an early period, and became tolerably common, it is nevertheless quite secondary to the reflexive use.

i Rem. 1. The *infin. absol.* נִקְטוֹל is connected in form with the perfect, to which it bears the same relation as קָטוֹל to קָטַל in Qal, the *ō* in the second syllable being obscured from an original *ā*. Examples are, נִכְסֹף Gn 31[30]; נִלְחֹם Ju 11[25]; נִשְׁאוֹל 1 S 20[6.28], all in connexion with the perfect.

k Examples of the form הִקָּטֵל (in connexion with imperfects) are, הִנָּתֵן Jer 32[4]; הֵאָכֵל Lv 7[18]; once אִדָּרֵשׁ Ez 14[3], where, perhaps, the subsequent אִדָּרֵשׁ has led to the substitution of א for ה.—Moreover, the form הִקָּטֵל is not infrequently used also for the infin. absol.,[2] e. g. Ex 22[3], Nu 15[31], Dt 4[26], 1 K 20[39]. On the other hand, כְּהִנָּדֵף should simply be read for the wholly abnormal כְּהֵהִנְדֹּף ψ 68[3] (commonly explained as being intended to correspond in sound with the subsequent תִּנְדֹּף, but probably a 'forma mixta', combining the readings כְּהִנָּדֵף and כְּנִדֹּף).

---

[1] Cf. Halfmann, *Beiträge zur Syntax der hebräischen Sprache*, 1. Stück, Wittenb., 1888, 2. St. 1892 (Gymn.-Programm), statistics of the Niph'al (Pu'al, Hoph'al, and qāṭûl) forms at different periods of the language, for the purpose of ascertaining the meaning of Niph. and its relation to the passive; the selection of periods is, however, very questionable from the standpoint of literary criticism.

[2] But, like הִקָּטֵל, *only* in connexion with imperfects, except Jer 7[9]. Barth is therefore right in describing (*Nominalbildung*, p. 74) both forms as later analogous formations (in addition to the original Semitic נִקְטוֹל), intended to assimilate the infinitive to the imperfect which it strengthens.

l Elision of the ה after prepositions is required by the Masora in בְּכִשְׁלוֹ Pr 24[17] (for בִּכְשֶׁלְהֹ), בְּהָרֵנִי Ez 26[15] and בְּעָטֵף La 2[11]; also in verbs ל״ה Ex 10[3] (לֶעָנוֹת); 34[24], Dt 31[11], Is 1[12] (לֶרָאוֹת); in verbs ע״ו Jb 33[30] (לֶאוֹר). It is, however, extremely doubtful whether the *infin. Qal* of the *K'thîbh* is not rather intended in all these examples; it certainly is so in La 2[11], cf. ψ 61[3].

m 2. Instead of the *Ṣere* in the ultima of the imperfect, *Pathaḥ* often occurs in pause, e.g. וַיִּנָּמַל Gn 21[8]; cf. Ex 31[17], 2 S 12[16] (with final שׁ); 17[23] (with ק); Jon 1[5] (with מ); see § 29 *q*. In the 2nd and 3rd plur. fem. *Pathaḥ* predominates, e.g. תִּוָּכַרְנָה Is 65[17]; *Ṣere* occurs only in תֵּעָנֶנָּה Ru 1[13], from ענן, and hence, with loss of the doubling, for תֵּעָנֵנָּה; cf. even תֵּאָמֵנָה Is 60[4].—With *Nûn paragogicum* (see § 47 *m*) in the 2nd and 3rd plur. masc. are found, יִלָּכְדוּן, תִּלָּחֲמוּן, &c., in *pause* יִבָּהֲלוּן, תִּשָּׁמְדוּן, &c.; but Jb 19[21] (cf. 24[24]) יִחָצְבוּן.

n 3. When the imperfect, the infinitive (in *ē*), or the imperative is followed in close connexion by a monosyllable, or by a word with the tone on the first syllable, the tone is, as a rule (but cf. וַיֵּאָבֶק אִישׁ Gn 32[25]), shifted back from the ultima to the penultima, while the ultima, which thus loses the tone, takes *Seghôl* instead of *Ṣere*; e.g. יִכָּשֵׁל בָּהּ Ez 33[12]; וַיֵּעָתֶר לוֹ Gn 25[21]; in the imperative, 13[9].—So always הִשָּׁמֶר לְךָ (since לְךָ counts as *one* syllable) Gn 24[6], &c., cf. 1 S 19[2]; and even with *Pathaḥ* in the ultima, תֵּעָוֵב אָרֶץ Jb 18[4] (but cf. וַיֵּעָתֵר אֱלֹהִים 2 S 21[14]). Although in isolated cases (e.g. Gn 32[25], Ezr 8[23]) the tone is not thrown back, in spite of a tone-syllable following, the retraction has become usual in certain forms, even when the next word begins with a toneless syllable; especially after ו *consec.*, e.g. וַיִּשָּׁאֶר Gn 7[23]; וַיִּלָּחֶם Nu 21[1] and frequently, וַיִּצָּמֶד 25[3]; and always so in the imperative הִשָּׁמֶר Ex 23[21], Jb 36[21], and (before Metheg of the counter-tone) Dt 24[8], 2 K 6[9]. On the avoidance of pausal-forms in the imperative (Am 2[12] with *Silluq*, Zc 2[11] with *Athnaḥ*), and imperfect (Pr 24[4], &c.), see § 29 *o*, and note; on the other hand, always הִמָּלֵט, יִמָּלֵט, &c.

o In the *imperative*, נִקָּבְצוּ, for הִקָּבְצוּ, with the rejection of the initial ה, occurs in Is 43[9], and in Joel 4[11] in *pause* נָקְבָצוּ (cf. נָלְווּ Jer 50[5]); but in these examples either the reading or the explanation is doubtful. The 2nd sing. imperat. of נִשְׁבַּע is always (with ה_ *paragogicum*) הִשָּׁבְעָה לִי *swear to me*, Gn 21[23], &c. (also הִשָּׁבְעָה לִי Gn 47[31], 1 S 30[15]).

p 4. For the 1st sing. of the *imperfect*, the form אֶקְטֶל is as frequent as אֶקָּטֵל, e.g. אִדָּרֵשׁ *I shall be inquired of*, Ez 14[3]; אִשָּׁבֵעַ *I will swear*, Gn 21[24]; cf. 16[2], Nu 23[15], Ez 20[36], and so always in the cohortative, e.g. אִנָּקְמָה *I will avenge me*, Is 1[24]; cf. 1 S 12[7], Ez 26[2], and in the impf. Niph. of פ״ו (§ 69 *t*). The Babylonian punctuation admits only ĭ under the preformative of the 1st person.

§ 52. *Pi'ēl and Pu'al.*

a 1. The *characteristic* of this conjugation consists in the strengthening of the middle radical. From the simple stem *qaṭal* (cf. § 43 *b*) the form קִטֵּל (cf. the Arabic conj. II. *qāttălă*) would naturally follow as

the *perfect* of the active (*Pi'ēl*). The *Pathaḥ* of the first syllable is, however, with one exception (see *m*), always attenuated to *ĭ* in the *perfect*. In the second syllable, *ă* has been retained in the majority of cases, so that the conjugation should more correctly be called *Pi'al*; but very frequently [1] this *ă* also is attenuated to *ĭ*, which is then regularly lengthened to *ē*, under the influence of the tone. Cf. in Aram. קְטֵל; but in Biblical Aramaic almost always קַטֵל. On the three cases in which *ă* before a final ר or ם has passed into *Seghôl*, see below, *l*.—Hence, for the *3rd sing. masc. perfect*, there arise forms like אֵבֵד, לֵמַד, קֵדֵּשׁ; נֵהֵף, כֵּבֵד, &c.—Before afformatives beginning with a consonant, however, *ă* is always retained, thus קִטַּלְתָּ, קִטַּלְתֶּם, קִטַּלְנוּ, &c. In the *infinitives* (*absol.* קַטֹּל, obscured from *qaṭṭâl*; *constr.* קְטֹל), *imperfect* (יְקַטֵּל), *imperative* (קַטֵּל), and *participle* (מְקַטֵּל) the original *ă* of the first syllable reappears throughout. The vocal *Šewâ* of the preformatives is weakened from a short vowel; cf. the Arabic imperfect *yŭqăttĭl*, participle *mŭqăttĭl*.

b The *passive* (*Pu'al*) is distinguished by the obscure vowel *ŭ*, or very rarely *ŏ*, in the first syllable, and *ă* (in pause *ā*) always in the second. In Arabic, also, the passives are formed throughout with *ŭ* in the first syllable. The inflexion of both these conjugations is analogous to that of *Qal*.

c Rem. 1. The preformative מְ, which in the remaining conjugations also is the prefix of the participle, is probably connected with the interrogative or indefinite (cf. § 37) pronoun מִי *quis? quicunque* (fem. i. e. neuter, מָה); cf. § 85 *e*.

d 2. The Dageš *forte*, which according to the above is characteristic of the whole of *Pi'ēl* and *Pu'al*, is often omitted (independently of verbs *middle guttural*, § 64 *d*) when the middle radical has *Šewâ* under it (cf. § 20 *m*), e. g. שְׁלָחָה for שִׁלְּחָה Ez 17[17]; בְּקְשֵׁהוּ 2 Ch 15[15] (but in the *imperative* always בַּקְּשׁוּ 1 S 28[7], &c.), and so always in הַלְלוּ *praise*. The vocal character of the *Šewâ* under the *litera dagessanda* is sometimes in such cases (according to § 10 *h*) expressly emphasized by its taking the form of a *Ḥaṭeph*, as in לָקְחָה Gn 2[23], with ֳ owing to the influence of the preceding *u*, cf. פֻּעֳלוֹ for פֻּעְלוֹ, &c.; Gn 9[14], Ju 16[16]. In the *imperfect* and *participle* the *Šewâ* under the preformatives (*Ḥaṭeph-Pathaḥ* under א in the *1st sing. imperfect*) serves at the same time as a characteristic of both conjugations (Gn 26[14 f.]).

e 3. According to the convincing suggestion of Böttcher[2] (*Ausführliches Lehrbuch*, § 904 ff. and § 1022), many supposed perfects of *Pu'al* are in reality

[1] So in all verbs which end in *Nûn*, and in almost all which end in *Lamed* (Olsh. p. 538). Barth is probably right in supposing (*ZDMG.* 1894, p. 1 ff.) that the vowels of the strengthened perfects have been influenced by the *imperfect*.

[2] As Mayer Lambert observes, the same view was already expressed by Ibn Ǧanâḥ (see above, § 3 *d*) in the *Kitâb el-luma'*, p. 161. Cf. especially Barth, 'Das passive Qal und seine Participien,' in the *Festschrift zum Jubiläum Hildesheimer* (Berlin, 1890), p. 145 ff.

passives of Qal. He reckons as such all those *perfects*, of which the *Pi'ēl* (which ought to express the corresponding active) is either not found at all, or only (as in the case of יִלֵּד) with a different meaning, and which form their *imperfect* from another conjugation, generally Niph'al. Such *perfects* are the *quṭṭal* form of the stems אבל (*imperfect* תְּאֻבָּלוּ Is 1[20]), חפשׂ, טרף, ילד, יצר, לקח, עבד, שגל, שטף, שׁפף. Barth (see below) adds to the list the apparent *Pu'al-perfects* of אסר, בזז, בצע, גנה, זנה, חצב, כרת, נפח, עוב, עשׁה, ראה, and of verbs with middle ר (hence with *ŭ* of the first syllable lengthened to *ō*), הרה, הרנ Jb 3[3] [זרה, see § 67 *m*], זרע, זרק, טרף, מרט, קרא, שׁרף; also the infinitives absolute הֹרוֹ וְהֹנוֹ Is 59[13]. In these cases there is no need to assume any error on the part of the punctuators; the sharpening of the second radical may have taken place in order to retain the characteristic *ŭ* of the first syllable (cf. Arab. *qŭtŭlă* as passive of *qătălă*), and the *a* of the second syllable is in accordance with the vocalization of all the other passives (see § 39 *f*). Cf. § 52 *s* and § 53 *u*.

f **2.** The fundamental idea of *Pi'ēl*, to which all the various shades of meaning in this conjugation may be referred, is *to busy oneself eagerly* with the action indicated by the stem. This intensifying of the idea of the stem, which is outwardly expressed by the strengthening of the second radical, appears in individual cases as—(*a*) a *strengthening* and *repetition* of the action (cf. the *intensive* and *iterative* nouns with the middle radical strengthened, § 84*b*),[1] e. g. צָחַק *to laugh*, Pi'ēl *to jest, to make sport* (to laugh repeatedly); שָׁאַל *to ask*, Pi'ēl *to beg*; hence when an action has reference to *many*, e. g. קָבַר *to bury* (a person) Gn 23[4], Pi'ēl *to bury* (many) 1 K 11[15], and often so in Syr. and Arab. Other varieties of the *intensive* and *iterative* meaning are, e. g. פָּתַח *to open*, Pi'ēl *to loose*; סָפַר *to count*, Pi'ēl *to recount*: [cf. כָּתַב, חָשַׁב, חִלֵּךְ, רָפָא, חָפַשׂ; תִּפֵּשׂ, מָאַהֵב, מְרַצֵּחַ].

g The eager pursuit of an action may also consist in *urging* and *causing* others to do the same. Hence *Pi'ēl* has also—(*b*) a *causative* sense (like *Hiph'îl*), e. g. לָמַד *to learn*, Pi'ēl *to teach*. It may often be turned by such phrases as *to permit to, to declare* or *hold as* (*the declarative Pi'ēl*), *to help to*, e. g. חִיָּה *to cause to live*, צִדֵּק *to declare innocent*, יִלֵּד *to help in child-bearing*.

h (*c*) *Denominatives* (see § 38 *b*) are frequently formed in this conjugation, and generally express a being occupied with the object expressed by the noun, either to form or to make use of it, e. g. קִנֵּן *to make a nest, to nest* (from קֵן), עִפֵּר *to throw dust, to dust* (from עָפָר),

[1] Analogous examples, in which the strengthening of a letter has likewise an *intensive* force, are such German words as *reichen, recken* (Eng. *to reach, to rack*); *streichen* (*stringo*), *strecken*: cf. *Strich* (*a stroke*), *Strecke* (*a stretch*); *wacker* from *wachen*; others, in which it has the *causative* sense, are *stechen, stecken*; *wachen* (*watch*), *wecken* (*wake*); τέλλω *to bring to an end* (cf. the stem τέλω *to end*, in τέλος, τελέω); γεννάω *to beget*, from the stem γένω *to come into being* (cf. γένος).

עָנַן *to gather the clouds together* (from עָנָן), שָׁלַשׁ *to divide in three parts*, or *to do a thing for the third time* (from שָׁלֹשׁ); probably also דָּבַר *to speak*, from דָּבָר *a word*. Or again, the denominative may express taking away, injuring, &c., the object denoted by the noun (*privative Pi'ēl*, cf. our *to skin, to behead, to bone*), e. g. שָׁרַשׁ, from שֹׁרֶשׁ *to root out, to extirpate*, זָנַב prop. to *injure the tail* (זָנָב), hence *to rout the rear* of an army, *to attack it*; לִבֵּב *to ravish the heart*; דִּשֵּׁן *to remove the ashes* (דֶּשֶׁן), חִטֵּא *to free from sin* (חֵטְא), עִצֵּם *to break any one's bones* (עֶצֶם; cf., in the same sense, גֵּרֵם from גֶּרֶם); סָעַף *to lop the boughs*, Is 10[33] (from סָעִיף *a bough*). Some words are clearly denominatives, although the noun from which they are derived is no longer found, e. g. סִקֵּל *to stone, to pelt with stones* (also used in this sense in *Qal*), and *to remove stones* (from a field), *to clear away stones*; cf. our *to stone*, used also in the sense of *taking out the stones* from fruit.

The meaning of the *passive* (*Pu'al*) follows naturally from the above, e. g. בֻּקַּשׁ Pi'ēl *to seek*, Pu'al *to be sought*.

i In *Pi'ēl* the literal, concrete meaning of the verb has sometimes been retained, when *Qal* has acquired a figurative sense, e. g. גָּלָה, Pi'ēl *to uncover*, Qal *to reveal*, also *to emigrate*, i. e. to make the land bare.

k Also with an intransitive sense *Pi'ēl* occurs as an intensive form, but only in poetic language, e. g. חתת in Pi'ēl *to be broken in pieces*, Jer 51[56]; פִּחַד *to tremble*, Is 51[13], Pr 28[14]; רִוָּה *to be drunken*, Is 34[5.7]; [מִעֵט *to be few*, Ec 12[3]]; but in Is 48[8], 60[11] instead of the Pi'ēl of פתח the Niph'al is certainly to be read, with Cheyne.

l Rem. 1. The (more frequent) form of the perfect with *Pathaḥ* in the second syllable appears especially before *Maqqeph* (Ec 9[15], 12[9]) and in the middle of sentences in continuous discourse, but at the end of the sentence (in *pause*) the form with *Ṣere* is more common. Cf. גָּדֵל Is 49[21] with גָּדַל Jos 4[14], Est 3[1]; מִלֵּט Ez 33[5] with מִלַּט Ec 9[15]; קִצֵּץ 2 K 8[16] with קִצַּץ ψ 129[4]; but Qameṣ never appears in this pausal form. The *3rd sing. fem.* in *pause* is always of the form קִטְּלָה, except קִבְּצָה Mi 1[7]; the 3rd plur. always as קִטְּלוּ; the *2nd* and *1st sing.* and *1st plur.* of course as קִטַּלְתָּ, קִטַּלְתִּי, קִטַּלְנוּ (but always דִּבַּרְתִּי and לִפַּדְתִּי), קִטַּלְתְּ. In the *3rd sing. perf.* דִּבֶּר *to speak*, כִּפֶּר *to pardon*, and כִּבֶּס *to wash clothes* (also כִּבֵּס Gn 49[11]) take *Seghôl*, but become in *pause* דִּבֶּר, כִּבֶּס (2 S 19[25]); the *pausal* form of כִּפֶּר does not occur.

m *Pathaḥ* in the first syllable (as in Aramaic and Arabic) occurs only once, Gn 41[51], נַשַּׁנִי *he made me forget*, to emphasize more clearly the play on the name מְנַשֶּׁה.

n 2. In the *imperfect* (and *jussive* Ju 16[25]), *infinitive, and imperative Pi'ēl* (as also in *Hithpa'ēl*) the *Ṣere* in the final syllable, when followed by *Maqqeph*, is usually shortened into *Seghôl*, e. g. יְבַקֶּשׁ־לוֹ *he seeks for himself*, Is 40[20]; קַדֶּשׁ־לִי *sanctify unto me*, Ex 13[2]. *Pausal-forms* with *Seghôl* instead of *Ṣere*, as יְרַחֶף Dt 32[11], אֲרַחֶם Ho 2[6] (cf. Ex 32[6] in the infinitive, and Gn 21[9] in the participle), owe their origin to some particular school of Masoretes, and are wrongly accepted by Baer; cf. the analogous cases in § 75 *n* and *hh*. If the final syllable of the *imperfect Pi'ēl* has Pathaḥ (before a guttural or ר), it remains

even in *pause*; cf. § 29 *s* and 65 *e*. In the 1st sing. imperfect the *e*-sound occurs in two words for *Ḥaṭeph-Pathaḥ*, under the preformative א; אֶזְנֶה Lv 26^{33}, Ez 5^{12}, 12^{14} and וְאֶסְעָרֵם Zc 7^{14} (in accordance with § 23 *h*).—Before the full plural ending ון (see § 47 *m*) the *Ṣere* is retained in *pause*, e.g. תְּדַבְּרוּן ψ 58^{2} (but Gn 32^{20} תְּדַבְּרֻן), cf. 2 K 6^{19}, Dt 12^{3}; so before *Silluq* ψ 58^{3}, Jb 21^{11} and even before *Zaqeph qaṭon* Dt 7^{5}. Instead of תְּקַטַּלְנָה, forms like הְקַטַּלְנָה are also found, e.g. Is 3^{16}, 13^{18}, in both cases before a sibilant and in pause. Also בַּלַּע ψ 55^{10} occurs as the 2nd sing. imperative (probably an intentional imitation of the sound of the preceding בַּלַּע) and קָרַב (for *qarrabh*) Ez 37^{17}.

o 3. The *infinite absolute* of *Pi'ēl* has sometimes the special form קַטֹּל given in the paradigm, e.g. יַסֹּר *castigando*, ψ 118^{18}; cf. Ex 21^{19}, 1 K 19^{10} (from a verb ל״א); ψ 40^{2} (from a verb ל״ה); but much more frequently the form of the *infinitive construct* (קַטֵּל) is used instead. The latter has also, in exceptional cases, the form קִטֵּל (with *ă* attenuated to *ĭ* as in the *perfect*), e.g. in 1 Ch 8^{8} שִׁלְּחוֹ; perhaps also (if not a substantive) קִטֵּר Jer 44^{21}; and for the sake of assonance even for *infinitive absolute* in 2 S 12^{14} (נָאֵץ נִאַצְתָּ). On the other hand, שַׁלֵּם Dt 32^{35} and דַּבֵּר Jer 5^{13} are better regarded as substantives, while דַּבֵּר Ex 6^{28}, Nu 3^{1}, Dt 4^{15} (in each case after בְּיוֹם), Ho 1^{2} (after תְּחִלַּת), in all of which places it is considered by König (after Qimḥi) to be *infinitive construct*, is really perfect of *Pi'ēl*.

p The infinitive construct *Pi'ēl*, with the *fem.* ending (cf. § 45 *d*), occurs in יַסְּרָה Lv 26^{18}; וַמְּרָה ψ 147^{1}; with ת of the *fem.* before a suffix צַדֶּקְתֵּךְ Ez 16^{52}. On the verbal nouns after the form of the Aram. inf. *Pa'il* (קַטָּלָה), see § 84^{b} *e*.

Instead of the abnormal מְאַסְּפָיו (so Baer, Is 62^{9}) as ptcp. Pi'el, read מְאַסְּפָיו with ed. Mant. and Ginsburg.

q 4. In Pu'al *ŏ* is sometimes found instead of *ŭ* in the initial syllable, e.g. מְאָדָּם *dyed red*, Ex 25^{5}, &c., Na 2^{4}, cf. 3^{7} שְׁדֻדָה; Ez 16^{4}, ψ 72^{20}, 80^{11}. According to Baer's reading also in הְרָצְחוּ ψ 62^{4}, and so also Ben Ašer, but Ben Naphtali תְּרַצְּחוּ. It is merely an orthographic licence when *ŭ* is written fully, e.g. יוּלַד Ju 18^{29}.

r 5. As *infinitive absolute* of *Pu'al* we find נֻגֹּב Gn 40^{15}.—No instance of the *inf. constr.* occurs in the strong verb in *Pu'al*; from ל״ה with suffix עֲנוֹתוֹ ψ 132^{1}.

s 6. A few examples occur of the *participle Pu'al* without the preformative (מְ), e.g. אֻכָּל Ex 3^{2}; יוּלָד (for מְיֻלָּד) Ju 13^{8}; לֻקָּח 2 K 2^{10}; סֻעָרָה Is 54^{11}. These *participles* are distinguished from the *perfect* (as in *Niph'al*) by the *ā* of the final syllable. For other examples, see Is 30^{24}, Ec 9^{12} (where יוּקָשִׁים, according to § 20 *n*, stands for מְיֻקָּשִׁים = יְקֻשִׁים); but, according to the Masora, *not* Ez 26^{17}, since הַהֲלָלָה as *Mit'ēl* can only be the *perfect*. The rejection of the מְ may be favoured by an initial מ, as in Is $18^{2.7}$ (but also מְמֻשָּׁךְ); Pr 25^{19} (where, however, read מוֹעֶדֶת); so also in the participle *Pi'ēl* מָאֵן Ex 7^{27}, 9^{2} (always after אִם, but cf. also הַמְאֲנִים Jer 13^{10}, where, however, הַמְמָאֲנִים = הַמְמָאֲנִים is to be read, with Brockelmann, *Grundriss*, p. 264 f.) and מָהֵר Zp 1^{14} (and Is $8^{1.3}$?). Notice, however, Barth's suggestion (*Nominalbildung*, p. 273) that, as the active of forms like אֻכָּל only occurs in *Qal*, they are perfect participles of former *passives* of Qal (see *e*), and in Jer 13^{10}, 23^{32}, perfect participles of Pi'ēl.—On מְרֻבָּע Ez 45^{2}, see § 65 *d*.

§ 53. *Hiphʿîl and Hophʿal.*

a **1.** The characteristic of the active (*Hiphʿîl*) is a prefixed הַ (on its origin see § 55 *i*) in the perfect הִ (with the *ă* attenuated to *ĭ*, as in *Piʿēl*), which forms a closed syllable with the first consonant of the stem. The second syllable of the perfect had also originally an *ă*; cf. the Arabic conj. IV. *ʾaqtălă*, and in Hebrew the return of the *Pathaḥ* in the 2nd and 1st pers. הִקְטַלְתָּ, &c. After the attenuation of this *ă* to *ĭ*, it ought by rule to have been lengthened to *ē* in the tone-syllable, as in Aramaic אַקְטֵל, beside הַקְטֵל in Biblical Aramaic. Instead of this, however, it is always replaced in the strong verb by *î*,[1] יְ—, but sometimes written defectively —; cf. § 9 *g*. Similarly in the infinitive construct הַקְטִיל, and in the imperfect and participle יַקְטִיל and מַקְטִיל, which are syncopated from יְהַקְטִיל and מְהַקְטִיל; § 23 *k*. The corresponding Arabic forms (*juqtĭl* and *muqtĭl*) point to an original *ĭ* in the second syllable of these forms. In Hebrew the regular lengthening of this *ĭ* to *ê* appears in the strong verb at least in the *jussive* and in the *imperfect consecutive* (see *n*), as also in the *imperative* of the 2nd sing. masc. (see *m*); on הַקְטֵלָנָּה, תַּקְטֵלְנָה cf. § 26 *p*. On the return of the original *ă* in the second syllable of the *Imperat., Jussive*, &c, under the influence of a guttural, cf. § 65 *f*.

b In the *passive* (*Hophʿal*) the preformative is pronounced with an obscure vowel, whilst the second syllable has *ă* (in pause *ā*), as its characteristic, thus:—*Perf.* הָקְטַל or הָקְטַל, *Imperf.* יָקְטַל (syncopated from יְהָקְטַל) or יָקְטַל, *Part.* מָקְטָל or מָקְטָל (from מְהָקְטָל); but the *infinitive absolute* has the form הָקְטֵל.

Thus the characteristics of both conjugations are the ה preformative in the *perfect*, *imperative*, and *infinitive*; in the *imperfect* and *participle Hiphʿil*, Pathaḥ under the preformatives, in the *Hophʿal* *ŏ* or *ŭ*.

c **2.** The *meaning* of *Hiphʿîl* is primarily, and even more frequently than in *Piʿēl* (§ 52 *g*), *causative* of *Qal*, e. g. יָצָא *to go forth*, Hiph. *to bring forth, to lead forth, to draw forth*; קָדַשׁ *to be holy*, Hiph. *to sanctify*. Under the *causative* is also included (as in *Piʿēl*) the *declarative* sense, e. g. הִצְדִּיק *to pronounce just*; הֶרְשִׁיעַ *to make one an evil doer* (*to pronounce guilty*); cf. עקשׁ, in *Hiphʿîl*, Jb 9[20], *to represent as perverse*. If Qal has already a transitive meaning, *Hiphʿîl* then takes two accusatives (see § 117 *cc*). In some verbs, *Piʿēl* and *Hiphʿîl* occur side by side in the same sense, e. g. אָבַד *periit*, Piʿēl and Hiphʿil, *perdidit*; as a rule,

[1] This *î* may have been transferred originally from the imperfects of verbs ע״ע, as a convenient means of distinction between the indicative and jussive, to the *imperfect* of the strong verb and afterwards to the whole of *Hiphʿîl*; so Stade, Philippi, Praetorius, *ZAW.* 1883, p. 52 f.

however, only one of these two conjugations is in use, or else they differ from one another in meaning, e.g. כָּבֵד *gravem esse*, Pi'ēl *to honour*, Hiph'il *to bring to honour*, also *to make heavy*. Verbs which are intransitive in *Qal* simply become transitive in *Hiph'il*, e.g. נָטָה *to bow oneself*, Hiph. *to bow, to bend*.

d Among the ideas expressed by the *causative* and *transitive* are included, moreover, according to the *Hebrew* point of view (and that of the Semitic languages in general, especially Arabic), a series of actions and ideas, which *we* have to express by periphrasis, in order to understand their being represented by the Hiph'il-form. To these *inwardly transitive* or *intensive* Hiph'ils belong: (*a*) Hiph'il stems which express the obtaining or receiving of a concrete or abstract quality. (In the following examples the *Qal* stems are given, for the sake of brevity, with the addition of the meaning which—often together with other meanings—belongs to the *Hiph'il*.) Thus אהל, זהר, יפע, צוץ *to be bright, to shine* (to give forth brightness); opposed to חשׁך *to become dark*; אמץ, גבר, חזק *to be strong* (to develop strength), עטף *to be weak*; ארך *to be long* (to acquire length); גבה *to be high*; הום *to be in tumult*, זעק *to cry out*, רנן, רוע *to make a noise, to exult*; חלף *to sprout* (to put forth shoots), cf. פרח *to bloom*, שׁוק, ערף *to overflow*; מתק *to be sweet*; צלח *to have success*; שׁפל *to be low*; אדם *to become red*, לבן *to become white*.

e (*b*) Stems which express in *Hiph'il* the entering into a certain condition and, further, the being in the same: אמן *to become firm, to trust in*; באשׁ *to become stinking*; זוד *to become boiling, to boil over*; חלה *to become ill*; הסר *to come to want*; חרה *to become hot*; יבשׁ *to become dry, to become ashamed*; יתר *to attain superiority*; סכן *to become familiar*; עור, קוץ *to become awake*; קשׁה *to become hard*; רגע, שׁקט *to become quiet* (to keep quiet); שׁמם *to be astonished*. The Hiph'il forms of some verbs of motion constitute a variety of this class: נגשׁ *to draw near*; קרב *to come near*; רחק *to withdraw far off* (all these three are besides used as causatives); קדם *to come before*.

f (*c*) Stems which express action in some particular direction: חטא *to err*; חלק *to flatter* (to act smoothly); יטב *to act well, to do good*; סכל *to act foolishly*, שׂכל *to act wisely*; ערם *to act craftily*; צנע *to act submissively*; רעע, רשׁע *to act wickedly, godlessly*; שׁחת, תעב *to act corruptly, abominably*; שׁלם *to act peacefully, to be at peace, to be submissive*.

g Further, there are in *Hiph'il* a considerable number of *denominatives* which express the *bringing out*, the *producing* of a thing, and so are properly regarded as causatives,[1] e.g. אצר *to set over the treasury*, Neh 13[13] (unless וְאֲצָרֶיהָ is to be read, as in Neh 7[2]); בכר *to bring forth a firstborn*; נשׁם *to cause to rain*; זרע *to produce seed*; ימן (*Hiph'il* הֵימִין) *to go to the right*, cf. הִשְׂמְאִיל *to go to the left*; פרס *to get* or *to have hoofs*; קרן *to get* or *to have horns*; שׁכל *to produce abortion*; שׁלג *to become snow-white*; שׁמן *to grow fat*; שׁרשׁ *to put forth roots*, &c.; so also according to the ordinary acceptation הֶאֱוִיחוּ Is 19[6], *they have become stinking*, from אָוְחָ *stinking* or *stench*, with retention of the א prosthetic, § 19*m* (but see below, *p*).

[1] The same ideas are also paraphrased by the verb עָשָׂה (*to make*), e.g. *to make fat*, for, to produce fat upon his body, Jb 15[27]; *to make fruit, to make branches*, for, to put forth, to yield, Jb 14[9], Ho 8[7], cf. the Lat. *corpus, robur, sobolem, divitias facere*, and the Ital. *far corpo, far forze, far frutto*.

Of a different kind are the *denominatives* from: אזן (scarcely *to prick up the ears*, but) *to act with the ears, to hear*; cf. לשׁן *to move the tongue, to slander*, and the German *äugeln* (to make eyes), *füsseln, näseln, schwänzeln*; שׁבר *to sell corn*; שׁכם *to set out early* (to load the back [of the camel, &c.]?); opposed to הֶעֱרִיב.

h 3. The meaning of *Hoph'al* is (*a*) primarily that of a *passive* of *Hiph'il*, e.g. הִשְׁלִיךְ *proiecit*, הָשְׁלַךְ or הָשְׁלָךְ *proiectus est*; (*b*) sometimes equivalent to a passive of *Qal*, as נָקַם *to avenge*, Hoph. *to be avenged* (but see below, *u*).

i Rem. 1. The *i* of the 3rd sing. masc. perf. *Hiph'il* remains, without exception, in the 3rd fem. (in the tone-syllable). That it was, however, only lengthened from a short vowel, and consequently is changeable, is proved by the forms of the *imperative* and *imperfect* where *ē* (or, under the influence of gutturals, *ă*) takes its place. In an open syllable the *i* is retained almost throughout; only in very isolated instances has it been weakened to *Šᵉwá* (see *n* and *o*).

k 2. The *infinitive absolute* commonly has *Ṣere* without *Yodh*, e.g. הַקְדֵּשׁ Ju 17³; less frequently it takes ◌ִי, e.g. הַשְׁמִיד Am 9⁸; cf. Dt 15¹⁴, Is 59⁴, Jer 3¹⁵, 23³², 44²⁵, Jb 34³⁵, Ec 10¹⁰. With א instead of ה (probably a mere scribal error, not an Aramaism) we find אַשְׁבִּים Jer 25³. Rare exceptions, where the form with *Ṣere* stands for the *infinitive construct*, are, e.g. Dt 32⁸ (Sam. בְּהַנְחִיל; read perhaps בְּהַנְחֵל), Jer 44¹⁹.²⁵, Pr 25², Jb 13³ (?); on the other hand, for לַעֲשֹׂר Dt 26¹² (which looks like an infinitive Hiph'il with elision of the ה, for לְהַעֲשִׁיר) the right reading is simply לְעַשֵּׂר, since elsewhere the Pi'ēl alone occurs with the meaning *to tithe*; for בַּעֲשֵׂר Neh 10³⁹ perhaps the inf. Qal (בְּעָשְׂר) was intended, as in 1 S 8¹⁵.¹⁷ (= *to take the tithe*). At the same time it is doubtful whether the present punctuation does not arise from a conflation of two different readings, the Qal and the Pi'ēl.

l Instead of the ordinary form of the *infinitive construct* הִקְטִיל the form הִקְטִיל sometimes occurs, e.g. הַשְׁמִיד *to destroy*, Dt 7²⁴, 28⁴⁸; cf. Lv 14⁴⁶, Jos 11¹⁴, Jer 50³⁴. 51³³ and הִקְצוֹת for הַקְצוֹת Lv 14⁴³ from קָצָה; scarcely, however, Lv 7³⁵ (see § 155 *l*), 2 S 22¹ (ψ 18¹), 1 K 11¹⁶ (after עַד), and in the passages so explained by König (i. 276) where הַשְׁאִיר appears after prepositions[1]; [cf. Driver on Dt 3³, 4¹⁵, 7²⁴, 28⁵⁵].

With *ă* in the second syllable there occurs הִזְכִּרְכֶם Ez 21²⁹ (cf. the substantival infin. הַפְצַר 1 S 15²³).—In the Aram. manner לְהַשְׁמָעוּת is found in Ez 24²⁶ (as a construct form) for the *infinitive Hiph'il* (cf. the *infinitive Hithpa'el*, Dn 11²³). On the elision of the ה after prefixes, see *q*.

m 3. In the *imperative* the *i* is retained throughout in the open syllable, according to *i*, and consequently also before suffixes (see § 61 *g*) and ◌ֶה *paragogic*, e.g. הַקְשִׁיבָה *attend to*, הוֹשִׁיעָה נָּא ψ 118²⁵, as in ed. Mant., Jabl., Baer, not הוֹשִׁיעָה נָא as Ginsb. and Kittel; with the tone at the end only הַצְלִיחָה ibid. v. 25ᵇ. On the other hand, in the 2nd sing. masc. the original *ĭ* (cf. Arabic *'aqtīl*) is lengthened to *ē*, e.g. הַשְׁחֵן *make fat*, and becomes *Sᵉghôl* before *Maqqeph*, e.g. הַסְכֵּן־נָא Jb 22²¹.—The form הַקְטֵל for הַקְטֵל appears anomalously a few times: ψ 94¹, Is 43⁸, Jer 17¹⁸ (cf. § 69 *v* and § 72 *y*); elsewhere the Masora has preferred the punctuation הַקְטִיל, e.g. 2 K 8⁶; cf. ψ 142⁵.—In La 5¹ הַבִּיטָה is required by the *Qᵉré* for הביט.

[1] As to the doubtfulness, on general grounds, of this form of the Inf. Hiph., see Robertson Smith in the *Journ. of Philol.*, xvi. p. 72 f.

4. In the *imperfect Hiph'il* the *shorter* form with *Ṣere* prevails for the jussive *lt* in the *3rd masc.* and *fem.* and *2nd masc. sing.*, e. g. אַל־תְּגַדֵּל *make not great*, Ob 12; יַכְרֵת *let Him cut off!* ψ 12⁴; even incorrectly תְּגִיד Ex 19³ and יַגִּיד Ec 1c²⁰; cf. also יַבְעֵר Ex 22⁴, where the jussive form is to be explained according to § 109 *h*, and יַאֲבֵר Jb 39²⁶ before the principal pause. Similarly, after ו consec., e. g. וַיַּבְדֵּל *and He divided*, Gn 1⁴. On the other hand, *i* is almost always retained in the 1st sing., e. g. וְאַשְׁמִיד Am 2⁹ (but generally without י, as וְאַסְתִּר Ez 39²³ f., &c.); cf. § 49 *e* and § 74 *l*, but also § 72 *aa*; in 1st plur. only in Neh 4³; in the 3rd sing. ψ 105²⁸. With *ă* in the principal pause וְתוֹתַר Ru 2¹⁴, and in the lesser pause, Gn 49⁴; before a sibilant (see § 29 *q*) וַיַּשׁ Ju 6¹⁹; in the lesser pause וַיַּקְהּ La 3⁵. Before *Maqqeph* the Ṣere becomes *Seghôl*, e. g. וַיַּחֲזֶק־בּוֹ Ju 19⁴. In the plural again, and before suffixes, *î* remains in the forms יַקְטִילוּ, תַּקְטִילוּ, even in the jussive and after ו consecutive, e. g. וַיַּדְגִּיקוּ Ju 18²². The only exceptions, where the *î* is weakened to *Šewâ*, are וַיִּדְרְכוּ Jer 9²; וַיִּדְבְּקוּ 1 S 14²², 31², 1 Ch 1c²; יַעְבְּרוּ Jer 11¹⁵; וְאוֹצְרָה Neh 13¹³, if it is *Hiph'il* of אצר, but probably וְאֶצְּוֶה is to be read, as in 7²; perhaps also תַּהְפְּכֵהוּ Jb 19⁹ (according to others, *imperfect Qal*). The same weakening occurs also in the imperfect in 3rd and 2nd masc. sing. before suffixes, 1 S 17²⁵, 1 K 2c³³, ψ 65¹⁰, and in Jb 9²⁰, unless the form be *Pi'ēl*=וַיְעַקְּשֵׁנִי, since the *Hiph'il* is not found elsewhere. It is hardly likely that in these isolated examples we have a trace of the ground-form, *yaqtîl*, or an Aramaism. More probably they are due partly to a misunderstanding of the defective writing, which is found, by a purely orthographic licence, in numerous other cases (even in 3rd sing. יְשַׁלֵּם Is 44²⁸), and partly are intended, as *formae mixtae*, to combine the forms of *Qal* and *Hiph'il*. Instead of the firmly closed syllable, the Masora requires in Gn 1¹¹ תַּדְשֵׁא, with euphonic Ga'ya (see § 16 *h*).

5. In the *participle*, מֹוצִיא ψ 135⁷ appears to be traceable to the ground-form, *O* *maqtîl*; yet the Ṣere may also possibly be explained by the retraction of the tone. The Masora appears to require the weakening of the vowel to *Šewâ* (see above, *n*) in מַהְלְכִים Zc 3⁷ (probably, however, מְהַלְכִים should be read), also in מַחְלְמִים Jer 29⁸, מַעְזְרִים 2 Ch 28²³ (but as ם precedes, and accordingly dittography may well have taken place, the participle Qal is probably to be read in both places; the reading of the text is perhaps again intended to combine *Qal* and *Hiph'il*, see above, *n*), and in the *Qerê* מַחְצְרִים 1 Ch 15²⁴ &c. (where the *Kethîbh* מְחַצְּרִים is better).—The fem. is ordinarily pointed as מַמְגֶּרֶת Nu 5¹⁵, מַשְׂגֶּת Lv 14²¹; in pause מַשְׂבֶּלֶת Pr 19¹⁴.

6. In the *perfect* there occur occasionally such forms as הֲכִלַּמְנוּ 1 S 25⁷; *p* cf. Gn 41²⁸, 2 K 17¹¹, Jer 29¹, Mi 6³, Jb 16⁷; with the original *ā* in the first syllable וְהֵרְאִיתִי Na 3⁵.—In אֲנָאֲלְתִי[1] *I have stained*, Is 63³, א stands at the beginning instead of ה, cf. above, *k*, on אַשְׁבִּים. On the other hand, וְהֵאוֹנִיחוּ

[1] Most probably, however, גֹּאַלְתִּי (*perfect Pi'ēl*) is to be read, and the א is only an indication of the change of the *perfect* into the *imperfect*, as also previously, by a change of punctuation, ואדרכם and ויז (instead of וְאֶדְרֹךְ and וַיָּז) are made future instead of past. Jewish exegesis applied these Edom-oracles to the Roman (i. e. Christian) empire. So G. Moore in *Theol. Literaturzeitung*, 1887, col. 292.

Is 19[6] (see above, *g*) is a mere error of the scribe, who had the Aramaic form in mind and corrected it by prefixing ה.

q 7. In the *imperfect* and *participle* the characteristic ה is regularly elided after the preformatives, thus יַקְטִיל, מַקְטִיל; but it is retained in the *infinitive* after prepositions, e.g. לְהַקְטִיל. The exceptions are in the imperfect, יְהוֹשִׁיעַ *He will save* for יוֹשִׁיעַ 1 S 17[47], ψ 116[6] (in *pause*); יְהוֹדֶה *He will praise* for יוֹדֶה Neh 11[17], ψ 28[7], 45[18] (cf. the proper name יְהוּכַל Jer 37[3], for which 38[1] יוּכַל [and יְהוֹסֶף ψ 81[6]]); [יְהֵילִילוּ (§ 70 *d*) Is 52[5], יְהֵתַּלּוּ Jer 9[4], תְּהֵתַּלּוּ Jb 13[9]] and מְהֵקְצָעוֹת Ez 46[22]; in the *infinitive* (where, however, as in *Niph'al*, § 51 *l*, the *infinitive Qal* is generally to be read) לְהַסְתִּיר Is 29[15] for לַסְתֵּר; and לַצְבוֹת Nu 5[22]; לְהַעֲבִיר 2 S 19[19]; לְהַלֵּךְ Jer 37[12]; לְחַטִּיא Ec 5[5]; לְלַבֵּן (doubly anomalous for לְהַלְבִּין) Dn 11[35]; לְשַׁמֵּעַ ψ 26[7]; לְאַדִּיב 1 S 2[33]; לְשַׁמֵּד Is 23[11]; וְלַשְׁבִּית Am 8[4] (certainly corrupt); בְּעִיר for בְּהָעִיר ψ 73[20] (but *in the city* is probably meant); לְבִיא Jer 39[7] (2 Ch 31[10]); לְמֵרוֹת Is 3[8], ψ 78[17]; לְנַחוֹתָם Ex 13[21]; בְּגֵלוֹת (see, however, § 20 *h*) Is 33[1]; לְרָאוֹתְכֶם Dt 1[33]: cf. further, from verbs ל״ה, Nu 5[22], Jer 27[20]; on Dt 26[12] and Neh 10[39], see above, *k*; for לְמָחוֹת Pr 31[3] read לְמִמַּחוֹת or לְמִמְחוֹת.

r 8. With regard to the tone it is to be observed that the afformatives וּ and ה֫ in Hiph'il have *not* the tone, even in the *perfect* with *waw consecutive* (except in Ex 26[33] before ה, Lv 15[29] before א, to avoid a hiatus); but the plural ending וּן (see § 47 *m*) always has the tone, e.g. תַּקְרִבוּן Dt 1[17].

s 9. The passive (Hoph'al) has *ŭ* instead of Qameṣ ḥaṭuph in the first syllable (הָקְטַל), in the strong verb less frequently in the perfect and infinitive, but generally in the participle, through the influence of the initial מ (but cf. מָשְׁחָת Pr 25[26]); e.g. הֻשְׁכַּב Ez 32[32] (beside הָשְׁכְּבָה 32[19]); הֻשְׁלַךְ *impf.* יֻשְׁלַךְ, *part.* מֻשְׁלָךְ 2 S 20[21] (beside הָשְׁלַכְתְּ Is 14[19]) הֻמְלַחַת Ez 16[4]; in the partic. Hoph. without elision of the ה: מְהֻקְצָעוֹת Ez 46[22]; on the other hand, verbs פ״ן always have *ŭ* (in a sharpened syllable): יֻגַּד, הֻגַּד (cf. § 9 *n*).

t 10. The *infinitive absolute* has in *Hoph'al* (as in *Hiph'il*) *Ṣere* in the last syllable, e.g. הָחְתֵּל and הָמְלֵחַ Ez 16[4]; הֻגֵּד Jos 9[24]. An *infinitive construct* does not occur in the strong verb.

11. With regard to the *imperative Hoph'al*, see above, § 46 *a*, note.

u 12. According to Böttcher (*Ausführliches Lehrbuch*, § 906) and Barth (see above, § 52 *e*) a number of supposed imperfects Hoph'al are, in fact, imperfects of the passive of *Qal*. As in the case of the perfects passive of Qal (see above, § 52 *e*) the question is again of verbs of which neither the corresponding causative (i. e. here the Hiph'il), nor the other tense of the same conjugation (i. e. here the perfect Hoph'al) is found; so with יֻקַּם (for יְנֻקַּם, cf. *yuqtălū* as imperfect Qal in Arabic) and יֻתַּן, from נָקַם and נָתַן; יֻקַּח from לָקַח (cf. § 66 *g*); יוּאַר Nu 22[8] from אָרַר; יֻחַן from חָנַן; יוּשַׁר Ho 10[14] (cf. Is 33[1]) from שָׁרַד; Barth adds the verbs פ״ן: תֻּתַּשׁ Ez 19[12] from נתשׁ; יֻתַּן Lev 11[35] from נתן; the verbs ע״ע: יֻחָקוּ Jb 19[23] from חקק; יֻבַּת &c. from כתת; the verb ע״ו: יוּדַשׁ from דּוּשׁ; the verbs ע״י: יוּחַל, יוּשַׁר, יוּשַׁת from חיל, שִׁיר and שִׁית. On וַיִּישֵׂם &c., § 73 *f*. In point of fact it would be very strange, especially in the case of יֻתַּן and יֻקַּח, that of these frequently used verbs,

amongst all the forms of Hiph'il and Hoph'al, only the *imperfect* Hoph'al should have been preserved. A passive of Qal is also indicated in the Tell-el-Amarna letters, according to Knudtzon, by a number of imperfect forms, which are undoubtedly due to Canaanite influence, cf. *Beitr. zur Assyriologie*, iv. 410.

§ 54. *Hithpa'ēl.*

1. The *Hithpa'ēl*[1] is connected with *Pi'ēl*, being formed by prefixing *a* to the *Pi'ēl*-stem (*qaṭṭēl*, *qaṭṭal*) the syllable הִתְ (Western Aramaic אִתְ, but in Biblical Aramaic הִתְ; Syr. *'et*[2]). Like the preformative נ (הִנְ) of *Niph'al*, הִתְ has also a reflexive force.

2. The ת of the prefix in this conjugation, as also in *Hothpa'al* *b* (see *h*), *Hithpô'ēl*, *Hithpa'lēl* and *Hithpalpel* (§ 55), under certain circumstances, suffers the following changes:

(*a*) When the stem begins with one of the harder sibilants ס, צ, or ש, the ת and the sibilant change places (cf. on this *metathesis*, § 19 *n*), and at the same time the ת after a צ becomes the corresponding emphatic ט: thus הִשְׁתַּמֵּר *to take heed to oneself*, for הִתְשַׁמֵּר; הִסְתַּבֵּל *to become burdensome*, for הִתְסַבֵּל; הִצְטַדֵּק *to justify oneself*, from צָדַק. The only exception is in Jer 49[3], וְהִתְשׁוֹטַטְנָה, to avoid the cacophony of three successive *t*-sounds.

(*b*) When the stem begins with a *d*- or *t*-sound (ד, ט, ת), the ת of *c* the preformative is assimilated to it (§ 19 *d*), e. g. מִדַּבֵּר *speaking, conversing*; הִדָּכֵא *to be crushed*, הִטַּהֵר *to purify oneself*, הִטַּמֵּא *to defile oneself*, הִתַּמֵּם *to act uprightly*. (An exception occurs in Ju 19[22].) The assimilation of the ת occurs also with נ and כ, e. g. הִנַּבֵּא *to prophesy*, as well as הִתְנַבֵּא (cf. Nu 24[7], Ez 5[13], Dn 11[14]); תִּכַּוֹנָן Nu 21[27] (cf. Is 54[14], ψ 59[5]); תִּכַּפֶּה Pr 26[26]; with שׁ Ec 7[16]; with ר Is 33[10].

Rem. Metathesis would likewise be expected, as in the cases under *b*, *d* when ת and ז come together, as well as a change of ת to ד. Instead of this, in the only instance of the kind (הִזַּכּוּ Is 1[16]) the ת is assimilated to the ז, —unless indeed הַזַּכּוּ, *imperative Niph'al* of זכך, is intended.

3. As in form, so also in meaning, *Hithpa'ēl* is primarily (*a*) *reflexive* of *Pi'ēl*, e. g. הִתְאַזֵּר *to gird oneself*, הִתְקַדֵּשׁ *to sanctify oneself*. Although in these examples the intensive meaning is not distinctly marked, it is so in other cases, e. g. הִתְנַקֵּם *to show oneself revengeful* (*Niph.* simply *to take revenge*), and in the numerous instances where the *Hithpa'ēl* expresses *to make oneself* that which is predicated by the stem, *to conduct oneself* as such, *to show oneself, to imagine oneself, to*

[1] A. Stein, *Der Stamm des Hithpael im Hebr.* pt. 1, Schwerin, 1893, gives alphabetical statistics of the 1151 forms.

[2] So also in Hebrew אֶתְחַבַּר 2 Ch 20[35]; cf. ψ 76[6] (אֶשְׁתּוֹלְלוּ).

affect to be of a certain character. E. g. הִתְנַדֵּל *to make oneself great, to act proudly*; הִתְחַכֵּם *to show oneself wise, crafty*; הִתְחַלָּה *to pretend to be ill*; הִתְעַשֵּׁר *to make*, i. e. *to feign oneself rich*; הִשְׁתָּרֵר Nu 16^{13}, *to make oneself a prince*; הִתְנַבֵּא 1 S 18^{10}, *to act in an excited manner like a prophet, to rave*. The meaning of *Hithpa'ēl* sometimes coincides with that of *Qal*, both forms being in use together, e. g. אָבַל *to mourn*, in Qal only in poetic style, in *Hithpa'ēl* in prose. On the accusative after Hithpa'ēl (regarded as a transitive verb), see § 117 *w*.

f (*b*) It expresses *reciprocal* action, like *Niph'al*, § 51 *d*, e. g. הִתְרָאָה *to look upon one another*, Gn 42^{1}; cf. ψ 41^{8};—but

(*c*) It more often indicates an action less directly affecting the subject, and describes it as performed *with regard to* or *for* oneself, in one's own special interest (cf. *Niph'al*, § 51 *e*). Hithpa'ēl in such cases readily takes an accusative, e. g. הִתְפָּרֵק Ex 32^{3} and הִתְנַצֵּל Ex 33^{6} *to tear off from oneself*; הִתְפַּשֵּׁט *exuit sibi* (*vestem*), הִתְפַּתַּח *solvit sibi* (*vincula*); הִצְטַיֵּד Jos 9^{12}, *to take* (*something*) *as one's provision*; without an accusative, הִתְהַלֵּךְ *to walk about for oneself* (*ambulare*); הִתְפַּלֵּל *sibi intercedere* (see Delitzsch on Is 1^{15}); הִתְחַקָּה *to draw a line for oneself*, Job 13^{27}; on Is 14^{2}, see § 57, note.

g (*d*) Only seldom is it *passive*, e. g. הִיא תִתְהַלָּל Pr 31^{30} *she shall be praised*; הִשְׁתַּכַּח *to be forgotten*, Ec 8^{10}, where the reflexive sense (*to bring oneself into oblivion*) has altogether disappeared. Cf. Niph'al, § 51 *f*.

h The passive form *Hothpa'al* is found only in the few following examples: הִטַּמְּאָ *to be defiled*, Dt 24^{4}; *infinitive* הִכַּבְּסָ *to be washed*, Lv $13^{55.56}$; הֻדַּשְּׁנָה (for הִתְדַּשְּׁנָה, the נָה being treated as if it were the afformative of the *fem. plur.*) *it is made fat*, Is 34^{6}. On הָתְפָּקְדוּ, see *l*.

i Denominatives with a reflexive meaning are הִתְיַהֵד *to embrace Judaism*, from יְהוּדִי (יְהוּדָה) *Judah*; הִצְטַיֵּד *to provision oneself for a journey*, from צֵידָה *provision for a journey* (see § 72 *m*).

k Rem. 1. As in *Pi'ēl*, so in *Hithpa'ēl*, the perfect very frequently (in stems ending in נ, ק, מ, פ) has retained the original *Pathaḥ* in the final syllable (while in the ordinary form it is attenuated, as in *Pi'ēl*, to *ĕ* and then lengthened to *ē*), e. g. הִתְאַנַּף Dt 4^{21}, &c.; cf. 2 Ch 13^{7}, 15^{8}; with וְ *consecutive* Is 8^{21}; so also in the imperfect and imperative, e. g. תִּתְחַכַּם Ec 7^{16}; cf. Dt $9^{8.18}$, 1 S 3^{10}, 2 S 10^{12}, 1 K 11^{9}, Is 55^{2}, 58^{14}, 64^{11}, ψ 55^{2}; הִתְחַזַּק 1 K 20^{22}, ψ 37^{4}, Est 5^{10}; וְאִתְאַפַּק 1 S 13^{12}.—In Lv 11^{44}, 20^{7} and Ez 38^{23}, *ĭ* takes the place of *ă* in the final syllable of the stem before שׁ (cf. § 44 *d*), and in the last passage before ל. In the *perfect*, *imperfect* (with the exception of Ec 7^{16}), and *imperative* of *Hithpa'ēl* (as well as of *Hithpō'ēl*, *Hithpa'lēl*, *Hithpalpēl*, § 55) the original *ă* always returns in *pause* as *Qameṣ*, e. g. הִתְאַזָּר ψ 93^{1}; יִתְאַבָּל Ez 7^{27}; יִתְהַלָּךְ Jb 18^{8}; יִתְלַבָּדוּ 38^{30}; הִתְקוֹשָׁשׁוּ Jos 3^{5}; cf. Jb 33^{5} and § 74 *b*.—The *ā* also appears before the fuller ending ן in the plural of the imperfect (cf. § 47 *m*) in ψ 12^{9}, Jb

9^{6}, 16^{10}.—Like the *Pi'ēl* תְּקַטֵּלְנָה (§ 52 *n*), forms occur in *Hithpa'ēl* like תִּתְהַלַּכְנָה Zc 6^{7}; cf. Am 8^{13}, and so in *Hithpo'ēl*, Jer 49^{3}, Am 9^{13}; with *ē* only in La 4^{1}.—In the Aramaic manner an *infinitive Hithpa'ēl* הִתְחַבְּרוּת occurs in Dn 11^{23} (cf. the *Hiph'il* inf. הַשְׁמָעוּת in Ez 24^{26}).

l 2. As instances of the *reflexive* הִתְקַטֵּל (connected with *Pi'ēl*) a few reflexive forms of the verb פָּקַד (*to examine*) are also probably to be reckoned. Instead of a *Pathaḥ* in a sharpened syllable after the first radical, these take *Qameṣ* in an open syllable, e. g. הִתְפָּקְדוּ Ju $20^{15.17}$, *imperfect* יִתְפָּקֵד 20^{15}, 21^{9}. The corresponding passive form הָתְפָּקְדוּ also occurs four times, Nu 1^{47}, 2^{33}, 26^{62}, 1 K 20^{27}. According to others, these forms are rather reflexives of *Qal*, in the sense of *to present oneself for review, to be reviewed*, like the Aramaic *'Ithpe'ēl* (Western Aramaic אִתְקְטֵל, Syr. ܐܶܬܩܛܶܠ) and the Ethiopic *taqaṭ'ela*, Arab. *'iqtatala*, the last with the *t* always placed after the first radical (cf. above, *b*); but they are more correctly explained, with König, as *Hithpa'ēl* forms, the doubling of the ק being abnormally omitted.—Such a reflexive of *Qal*, with the ת transposed, occurs in הלתחם (on the analogy of O. T. Hebrew to be pronounced הִלָּתֵחֶם) in the inscription of the Moabite king *Mēša'*, with the meaning of the O. T. *Niph'al* נִלְחַם *to fight, to wage war*: see the inscription, lines 11, 15, 19, and 32; in the first two places in the *imperfect* with *wāw consecutive* וְאֶלָּתֵחֶם; in line 19 in the *infinitive* with suffix, בְּהִלָּתְחֵמֹה בִי *in his fighting against me.*

§ 55. *Less Common Conjugations.*

a Of the less common conjugations (§ 39 *g*) some may be classed with *Pi'ēl*, others with *Hiph'îl*. To the former belong those which arise from the lengthening of the vowel or the repetition of one or even two radicals, in fact, from an internal modification or development of the stem; to the latter belong those which are formed by prefixing a consonant, like the ה of Hiph'il. Amongst the conjugations analogous to *Pi'ēl* are included the *passive* forms distinguished by their vowels, as well as the reflexives with the prefix הִתְ, on the analogy of *Hithpa'ēl*.

b The following conjugations are related to *Pi'ēl*, as regards their inflexion and partly in their meaning:

1. *Pō'el* קוֹטֵל, passive *Pō'al* קוֹטַל, reflexive *Hithpō'ēl* הִתְקוֹטֵל, corresponding to the Arabic conj. III. *qâtâlă*, pass. *qûtîlă*, and conj. VI. reflexive *tāqâtâlă*; *imperfect* יְקוֹטֵל, *participle* מְקוֹטֵל, *imperfect passive* יְקוֹטַל &c. Hence it appears that in Hebrew the *ô* of the first syllable is in all the forms obscured from *â*, while the passive form is distinguished simply by the *a*-sound in the second syllable. In the strong verb these conjugations are rather rare. Examples: *participle* מְשׂוֹטְטִי *mine adversary, who would contend with me*, Jb 9^{15}; מְלוֹשְׁנִי (denominative from לָשׁוֹן *the tongue*) *slandering* (as if *intent on injuring with the tongue*) ψ 101^{5} *Kᵉth.* (The *Qᵉrê* requires מְלָשְׁנִי *mᵉlāšnî* as Na 1^{3} גְּדוֹל־); זָרְמוּ *they have poured out*, ψ 77^{18} (if not rather *Pu'al*); יוֹדַעְתִּי *I have appointed*, 1 S 21^{3} (unless הוֹדַעְתִּי should be read); יְסֹעֵר Ho 13^{3}; שׁוֹרֵשׁ *to take root*, passive

שׁוֹרֵשׁ, *denominative* from שֹׁרֶשׁ *root* (but שֹׁרֶשׁ *to root out*); in Hithpô'ēl הִתְנוֹעֲשׁוּ *they shall be moved*, Jer 25^{16}; imperf. 46^{8}; from a verb ל״ה שׁוֹשֵׁתִי Is 10^{13}. The *participle* מְנֹאָיִן Is 52^{5} is probably a *forma mixta* combining the readings מְנֹאָיִן and מִתְנֹאֲאִין.

c *Po'el* proper (as distinguished from the corresponding conjugations of verbs ע״ע § 67 *l* and ע״ו § 72 *m*, which take the place of the ordinary causative *Pi'ēl*) expresses an aim or endeavour to perform the action, especially with hostile intent, and is hence called, by Ewald, the stem expressing *aim* (Ziel-stamm), *endeavour* (Suche-stamm) or *attack* (Angriffs-stamm); cf. the examples given above from Jb 9^{15}, ψ 101^{5}, and עוֹיֵן 1 S 18^{9} *Qerê* (probably for מְעוֹיֵן, cf. § 52 *s*; § 55 *f*: *seeking to cast an evil eye*).

With קוֹטֵל is connected the formation of quadriliterals by the insertion of a consonant between the first and second radicals (§ 30 *p*, § 56).

d 2. *Pa'lēl*, generally with the *ă* attenuated to *ĕ* = *Pi'lēl*[1] (*Pi'lal*), קִטֵּל and קִטַּל; the *ē* in the final syllable also arises from *ĕ*, and this again from *ă*; passive *Pu'lal* קֻטַּל, reflexive *Hithpa'lēl* הִתְקַטֵּל, like the Arabic conjugations IX. *'iqtălă* and XI. *'iqtāllă*, the former used of permanent, the latter of accidental or changing conditions, e. g. of colours; cf. שַׁאֲנַן *to be at rest*, רַעֲנַן *to be green*, passive אֻמְלַל *to be withered*, all of them found only in the *perfect* and with no corresponding *Qal* form. (For the barbarous form צְמִתְּתוּנִי ψ 88^{17} read צִמַּתְּתִנִי; for נְבֻלַּל Ez 28^{23}, which has manifestly arisen only from confusion with the following חלל, read נָבַל). These forms are more common in verbs ע״ו, where they take the place of *Pi'ēl* and *Hithpa'ēl* (§ 72 *m*). Cf. also § 75 *kk*.

e 3. *Pe'al'al*: קְטַלְטַל with repetition of the last two radicals, used of movements repeated in quick succession; e. g. סְחַרְחַר *to go about quickly, to palpitate* (of the heart) ψ 38^{11}, from סָחַר *to go about*; passive חֲמַרְמַר *to be in a ferment, to be heated, to be red*, Jb 16^{16}, La 1^{20}, 2^{11}. Probably this is also the explanation of חֲצוֹצְרַי (denom. from חֲצוֹצְרָה *a trumpet*, but only in the *participle*, 1 Ch 15^{24} &c. *Kᵉthibh*.) for חֲצַרְצַר, by absorption of the first ר, lengthening of *ă* in the open syllable, and subsequent obscuring of *ā* to *ô*. On the other hand, for the meaningless אֲהֵבוּ הֵבּוּ Ho 4^{18} (which could only be referred to this conjugation if it stood for אֲהַבְהֲבוּ) read אֲהֵבוּ, and for the equally meaningless יְפַיְפִיתָ ψ 45^{3} read יְפִיתָ. In both these cases a scribal error (*dittography*) has been perpetuated by the punctuation, which did not venture to alter the *Kᵉthibh*. On the employment of *Pe'al'al* in the formation of nouns, cf. § 84^{b} *n*. Closely related to this form is—

f 4. *Pilpēl* (pass. *Pōlpal*), with a strengthening of the two essential radicals in stems ע״ע, ע״ו, and ע״י, e. g. גִּלְגֵּל *to roll*, from גָּלַל = גָּלְגַל; *reflexive* הִתְגַּלְגֵּל *to roll oneself down*; כִּלְכֵּל from כּוּל, *passive* כֻּלְכַּל; cf. also טֵאטֵא (so Baer and Ginsb. after Qimḥi; others טְאַטֵּא) Is 14^{23}, and with *ă* in both syllables owing to the influence of ר, קַרְקַר from קוּר Nu 24^{17} (cf. however, in the parallel passage, Jer 48^{45} קָרְקֹד) and Is 22^{5}, in the *participle*; שִׂגְשֵׂג Is 17^{11} *to hedge in*, acc. to others *make to grow*. Probably to this form also belongs יְלַעְלְעוּ, the emended reading of Jb 39^{30} instead of the impossible יְעַלְעוּ; also

[1] Cf. Wolfensohn, 'The Pi'lel in Hebrew,' *Amer. Journ. of Or. Studies*, xxvii (1907), p. 303 ff.

סַאסְאָה Is 27[8], if that form is to be referred to an *infinitive* סַאסְאָ; perhaps also שִׁשְּׁא Ez 39[2] for שׁאשׁא. This form also commonly expresses rapidly repeated movement, which all languages incline to indicate by a repetition of the sound,[1] e.g. צְפְצֵף *to chirp*; cf. in the Lexicon the nouns derived from גָּרַר, עוּף, and צָלַל.

g As *Hithpalpel* we find יִשְׁתַּקְשְׁקוּן Na 2[5]; וַתִּתְחַלְחַל Est 4[4]; וַיִּתְמַרְמַר Dn 8[7], 11[11]. Of the same form is אֶתְדַּוֶּה Is 38[15], if contracted from אֶתְדַּוְדֶּה or אתדירה from the root דו or די), and also הִתְמַהְמְהוּ *tarry ye*, Is 29[9] (but read probably הִתַּמְּהוּ), וַיִּתְמַהְמָהּ (in *pause*) Gn 19[16], &c., if it is to be derived from מָהַהּ, and not Hithpa'el from מָהַמָּה.

h Only examples more or less doubtful can be adduced of—

5. *Tiph'ēl* (properly *Taph'ēl*[2]): תַּקְטֵל, with ת prefixed, cf. תִּרַגְּלְתִּי *to teach to walk, to lead* (denominative from רֶגֶל *a foot?*) Ho 11[3]; from a stem ל״ה, the *imperfect* יְרִחֲרֶה *to contend with*, Jer 12[5]; *participle*, 22[15] (from חָרָה *to be hot, eager*). Similarly in Aramaic, תַּרְגֵּם *to interpret*, whence also in Hebrew the *passive participle* מְתֻרְגָּם Ezr 4[7].

i 6. *Šaph'ēl*: שַׁקְטֵל, frequent in Syriac, e. g. שַׁלְהֵב from להב *to flame*; whence in Hebrew שַׁלְהֶבֶת *flame*. Perhaps of the same form is שַׁבְּלוּל *a snail* (unless it be from the stem שבל), and שַׁקְעֲרוּרֹת *hollow strakes*, cf. § 85, No. 50. This conjugation is perhaps the original of *Hiph'il*, in which case the ה, by a phonetic change which may be exemplified elsewhere, is weakened from a sibilant.

* * *

k Forms of which only isolated examples occur are:—

7. קְטַטְלַט, *passive* קֻטְטַלַּט; as מְחֻסְפָּס *peeled off, like scales*, Ex 16[14], from חָסַף, חָשַׂף *to peel, to scale*.

8. קַטְקַל, in זַרְזִיף *a rain-storm*, from זָרַף.

9. נִתְקַטֵּל (regularly in Mishnic Hebrew[3]) a form compounded of *Niph'al* and *Hithpa'ēl*; as וְנִוַּסְּרוּ for וְנִתְוַסְּרוּ *that they may be taught*, Ez 23[48]; נְכַפֵּר probably an error for הִתְכַּפֵּר *to be forgiven*, Dt 21[8]. On נִשְׁתַּוָּה Pr 27[15], see § 75 *x*.

§ 56. *Quadriliterals.*

On the origin of these altogether secondary formations cf. § 30 *p*. While quadriliteral *nouns* are tolerably numerous, only the following examples of the verb occur:

[1] Cf. Lat. *tinnio, tintinno*, our *tick-tack, ding-dong*, and the German *wirrwarr, klingklang*. The repetition of the radical in verbs ע״ע also produces this effect; as in לָקַק *to lick*, דָּקַק *to pound*, טָפַף *to trip along*. The same thing is expressed also by *diminutive* forms, as in Latin by the termination *-illo*, e. g. *cantillo*, in German by *-eln, -ern*, e. g. *flimmern, trillern, tröpfeln, to trickle*.

[2] The existence of a *Taph'ēl* is contested on good grounds by Barth, *Nominalbildung*, p. 279.

[3] [See Segal, *Mišnaic Hebrew*, Oxf. 1909, p. 30 ff.]

(*a*) On the analogy of *Pi'ēl*: פִּרְסֵם, *imperfect* יְכַרְסְמֶנָּה *he doth ravage it*, ψ 80[14] from כָּסַם, cf. נָזַם. *Passive* רְטֻפַּשׁ *to grow fresh again*, Jb 33[25]. *Participle* מְכֻרְבָּל *girt, clothed* (cf. Aramaic כְּבַל *to bind*), 1 Ch 15[27]. It is usual also to include among the quadriliterals פַּרְשֵׁן Jb 26[9], as a *perfect* of Aramaic form with *Pathaḥ* not attenuated. It is more correctly, however, regarded, with Delitzsch, as the *infinitive absolute* of a *Pi'lel* formation, from פָּרַשׂ *to spread out*, with euphonic change of the first שׂ to שׁ, and the second to ן. Moreover, the reading פַּרְשֵׂן also is very well attested, and is adopted by Baer in the text of Job; cf. the Rem. on p. 48 of his edition.

(*b*) On the analogy of *Hiph'il*: הִשְׂמְאִיל, by syncope הִשְׂמִיל and הִשְׂמִיל *to turn to the left* (denom. from שְׂמֹאל) Gn 13[9], Is 30[21], &c. On הֶאֱזִינְחוּ cf. § 53 *p*.

C. Strong Verb with Pronominal Suffixes.[1]

§ 57.

The accusative of the personal pronoun, depending on an active verb,[2] may be expressed (1) by a separate word, אֵת the accusative sign (before a suffix אֶת, אֵת) with the pronominal suffix, e. g. קָטַל אֹתוֹ *he has killed him*; or (2) by a mere suffix, קְטָלָהוּ or קְטָלוֹ *he has killed him*. The latter is the usual method (§ 33), and we are here concerned with it alone.[3] Neither of these methods, however, is employed when the accusative of the pronoun is *reflexive*. In that case a reflexive verb is used, viz. Niph'al or Hithpa'ēl (§§ 51 and 54), e. g. הִתְקַדֵּשׁ *he sanctified himself*, not קִדְּשׁוֹ, which could only mean *he sanctified him*.[4]

Two points must be specially considered here: the form of the suffix itself (§ 58), and the form which the verb takes when suffixes are added to it (§§ 59–61).

---

[1] This subject of the verbal suffixes is treated here in connexion with the strong verb, in order that both the forms of the suffixes and the general laws which regulate their union with verbal forms may be clearly seen. The rules which relate to the union of the suffixes with weak verbs will be given under the several classes of those verbs.

[2] An accusative suffix occurs with *Niph'al* in ψ 109[3] (since נִלְחַם is used in the sense of *to attack*), and according to some, in Is 44[21]; with *Hithpa'ēl* Is 14[2] (הִתְנַחֵל to appropriate somebody *to oneself as a possession*); cf. above, § 54 *f*, and § 117 *w*.

[3] On the cases where אֵת is necessary, see § 117 *e*.

[4] The exceptions in Jer 7[19], Ez 34[2.8.10] are only apparent. In all these instances the sharp antithesis between אֹתָם (*themselves*) and another object could only be expressed by retaining the same verb; also in Ex 5[19] אֹתָם after an active verb serves to emphasize the idea of *themselves*.

§ 58. *The Pronominal Suffixes of the Verb.*

Cf. the statistics collected by H. Petri, *Das Verbum mit Suffixen im Hebr.*, part ii, in the נביאים ראשנים, Leipzig, 1890. W. Diehl, *Das Pronomen pers. suff. . . . des Hebr.*, Giessen, 1895. J. Barth, 'Beiträge zur Suffixlehre des Nordsem.,' *AJSL.* xvii (1901), p. 205 f. Brockelmann, *Semit. Sprachwiss.*, i. 159 f.; *Grundriss*, p. 638 ff.

1. The *pronominal suffixes* appended to the verb express the accusative of the *personal pronoun.* They are the following :— *a*

	A. *To a form ending in a Vowel.*	B. *To a form in the Perf. ending in a Consonant.*	C. *To a form in the Imperf. ending in a Consonant.*	
Sing.	1. com. נִי־	נִי־ (in *pause* נִי֫־)	נִי֫־	*me.*
	2. m. כָ֫־	כָ֫־ (in *pause* כָ֑־, also כָ־)		*thee.*
	f. כִ֫־	כִ֫־, rarely כִ־	כִ֫־	
	3. m. הוּ־, וֹ	הוּ־, וֹ (הֹ)	הוּ֫־	*him.*
	f. הָ֫־	הָ־	הָ֫־	*her.*
Plur.	1. com. נוּ־	נוּ־	נוּ֫־	*us.*
	2. m. כֶם־	כֶם֫־		*you* (*vos*).
	f. . . . . [1]			
	3. m. ם, הֶם֫־[1]	ם־ (from הֶם֫־), ֵם	ם־ (from הֶם֫־)	*eos.*
	poet. מוֹ־	מוֹ־	מוֹ֫־	
	f. ן־	ן־, ֵן	. . . . .[1]	*eas.*

2. That these suffixes are connected with the corresponding *forms of the personal pronoun* (§ 32) is for the most part self-evident, and only a few of them require elucidation. *b*

The suffixes נִי, נוּ, הוּ, הָ (and כָ, when a long vowel in an open syllable precedes) never have the tone, which always rests on the preceding syllable; on the other hand, כֶם and הֶם always take the tone. *c*

In the 3rd pers. masc. הוּ־, by contraction of *a* and *u* after the rejection of the weak ה, frequently gives rise to *ô* (§ 23 *k*), ordinarily written וֹ, much less frequently הֹ (see § 7 *c*). In the *feminine*, the suffix הָ should be pronounced with a preceding *a* (cf. below, *f*, note), as הָ֫־ or הָ֑־, on the analogy of *āhû*; instead of הָ֫־, however, it was simply pronounced הָ־, with the rejection of the final vowel, *d*

[1] According to Diehl (see above), p. 61, כֶם occurs only once with the perfect (see § 59 *e*), 7 times with the imperfect, but never in pre-exilic passages, whereas the accus. אֶתְכֶם occurs 40 times in Jer. and 36 times in Ezek.—הֶם occurs only once as a *verbal* suffix (Dt 32^{26}, unless, with Kahan, *Infinitive u. Participien*, p. 13, אַפְאִיהֶם from פֻּאַה is to be read), while the forms כֶּן (*2nd f. pl.*) and ן־ and הֶן (*3rd f. pl.*), added by Qimḥi, never occur.

and with *Mappiq*, since the ה is consonantal; but the weakening to ה֫ is also found, see below, *g*.

e **3.** The *variety* of the suffix-forms is occasioned chiefly by the fact that they are modified differently according to the form and tense of the verb to which they are attached. For almost every suffix three forms may be distinguished:

(*a*) One beginning with a consonant, as נִי֫, הוּ֫, וֹ (only after *î*), נוּ֫, (הֶם) ם, &c. These are attached to verbal forms which end with a vowel, e.g. יִקְטָלֻנִי; קָטַלְתִּיהוּ, for which by absorption of the ה we also get קָטַלְתִּיו, pronounced *qᵉṭaltîu*; cf. § 8 *m*.

f (*b*) A second and third with what are called *connecting vowels*[1] (נִי֫, נִי֫), used with verbal forms ending with a consonant (for exceptions, see § 59 *g* and § 60 *e*). This *connecting vowel* is *a* with the forms of the perfect, e.g. קְטָלַנִי, קְטָלָנוּ, קְטָלָם (on קְטָלְךָ, the ordinary form of the 3rd masc. perf. with the 2nd fem. suffix, cf. below, *g*); and *e* (less frequently *a*) with the forms of the imperfect and imperative, e.g. יִקְטְלֵם; also with the infinitive and participles, when these do not take noun-suffixes (cf. § 61 *a* and *h*). The form ִי also belongs to the suffixes of the perfect, since it has arisen from הִי֫ (cf., however, § 60 *d*). With ךָ, כֶם, the connecting sound is only a vocal *Šᵉwâ*, which has arisen from an original short vowel, thus ךָ֯, כֶם֯, e.g. קְטָלְךָ (*qᵉṭālᵉkhā*), or when the final consonant of the verb is a guttural, ךָ֫, e.g. שְׁלָחְךָ. In *pause*, the original short vowel (*ă*) reappears as *Sᵉghôl* with the tone ךָ֑ (also ךָ֣, see *g*). On the appending of suffixes to the final ן of the imperfect (§ 47 *m*), see § 60 *e*.

g Rem. 1. As *rare* forms may be mentioned *sing.* 2nd pers. *masc.* כָה֫ Gn 27[7], 1 K 18[44], &c., in *pause* also כָה֑ (see below, *i*); *fem.* כִי, כִי֑ ψ 103[4], 137[6]. Instead of the form ךָ֯, which is usual even in the perfect (e.g. Ju 4[20], Ez 27[26]), ךָ֫ occurs as *fem.* Is 60[9] (as *masc.* Dt 6[17], 28[45], Is 30[19], 55[5] always in *pause*); with *Munaḥ* Is 54[6], Jer 23[37].—In the *3rd masc.* הּ Ex 32[25], Nu 23[8]; in the *3rd fem.* ה֫ without *Mappiq* (cf. § 91 *e*) Ex 2[3], Jer 44[19]; Am 1[11], with

[1] We have kept the term *connecting* vowel, although it is rather a superficial description, and moreover these vowels are of various origin. The connective *a* is most probably the remains of the old verbal termination, like the *i* in the 2nd pers. *fem.* sing. קָטַלְתִּיהוּ. Observe e.g. the Hebrew form *qᵉṭāl-ani* in connexion with the Arabic *qatala-ni*, contrasted with Hebrew *qᵉṭālat-ni* and Arabic *qatalat-ni*. König accordingly prefers the expression 'vocalic ending of the stem', instead of 'connecting syllable'. The connective ē, ā, as Prätorius (*ZDMG.* 55, 267 ff.) and Barth (ibid. p. 205 f.) show by reference to the Syriac connective *ai* in the imperf. of the strong verb, is originally due to the analogy of verbs ל״י (מְחֵנִי = מְחֵינִי from *mᵉḥaini*), in which the final *é* was used as a connecting vowel first of the imperat., then of the impf. (besides many forms with *a*, § 60 *d*), and of the infin. and participle.

retraction of the tone before a following tone-syllable, but read certainly שְׁמַר לְנֻצַּח.—The forms מוֹ־, מוֹ־, מוֹ־ occur 23 times, all in poetry[1] (except Ex 23[31]) [viz. with the perfect Ex 15[10], 23[31], ψ 73[6]; with the imperfect Ex 15[5] (מוֹ for מוֹ), 15[7.9.9.12.15.17.17], ψ 2[5], 21[10.13], 22[5], 45[17], 8c[6], 14c[10]; with the imperative ψ 5[11], 59[12.12], 83[12]]. On the age of these forms, see § 91 *l* 3; on ־ֵמוֹ and ־ָמוֹ as suffixes of the 3rd fem. plur. of the imperfect, § 60 *d*.—In Gn 48[9] קָחֵם־נָא (cf. וַיִּכֵּם־שָׁם 1 Ch 14[11] according to Baer), ־ֵם has lost the tone before *Maqqeph* and so is shortened to ־ֶם.—In Ez 44[8] וַתְּשִׁימוּן is probably only an error for וְתִשְׁמוּם.

h 2. From a comparison of these verbal suffixes with the noun-suffixes (§ 91) we find that (*a*) there is a greater variety of forms amongst the verbal than amongst the noun-suffixes, the forms and relations of the verb itself being more various;—(*b*) the verbal suffix, where it differs from that of the noun, is longer; cf. e.g. ־ֵנִי, ־ֵנִי, ־ֵנִי (*me*) with ־ִי (*my*). The reason is that the pronominal object is less closely connected with the verb than the possessive pronoun (the genitive) is with the noun; consequently the former can also be expressed by a separate word (אֹתִי in אֹתִי, &c.).

i 4. A verbal form with a suffix gains additional strength, and sometimes intentional emphasis, when, instead of the mere connecting vowel, a special connecting-syllable[2] (*ăn*)[3] is inserted between the suffix and the verbal stem. Since, however, this syllable always has the tone, the *ă* is invariably (except in the 1st pers. sing.) modified to tone-bearing *Seghôl*. This is called the *Nûn energicum*[4] (less suitably *demonstrativum* or *epentheticum*), and occurs principally (see, however, Dt 32[10] *bis*) in pausal forms of the imperfect, e.g. יְבָרְכֶנְהוּ *he will bless him* (ψ 72[15], cf. Jer 5[22]), אֶתְּקָנְךָ Jer 22[24]; יְכַבְּדֶנְנִי *he will honour me* (ψ 50[23]) is unusual; rarely in the perfect, Dt 24[13] בֵּרַכְךָ. On examples like דָּנֵנִי Gn 30[6], cf. § 26 *g*, § 59 *f*. In far the greatest number of cases, however, this *Nûn* is assimilated to the following consonant (נ, כ), or the latter is lost in pronunciation (so ה), and the *Nûn* consequently sharpened. Hence we get the following series of suffix-forms:—

---

[1] Thus in ψ 2 מוֹ־ occurs five times [four times attached to a noun or preposition, §§ 91 *f*, 103 *c*], and ־ֵם only twice.

[2] It is, however, a question whether, instead of a connecting syllable, we should not assume a special verbal form, analogous to the Arabic *energetic mood* (see *l*, at the end) and probably also appearing in the Hebrew cohortative (see the footnote on § 48 *c*).—As M. Lambert has shown in *REJ.* 1903, p. 178 ff. ('De l'emploi des suffixes pronominaux . . .'), the suffixes of the 3rd pers. with the impf. without *waw* in prose are ־ֶנּוּ and ־ָהּ, but with *waw consec.* ־ֵהוּ and ־ֶהָ or ־ֶהּ; with the jussive in the 2nd and 3rd pers. always ־ֵהוּ, ־ֶהָ, . . . the 1st pers. more often ־ֶנּוּ than ־ֵהוּ, and always ־ֶנָּהּ.

[3] According to Barth 'n-haltige Suffixe' in *Sprachwiss. Untersuchungen*, Lp. 1907, p. 1 ff., the connecting element, as in Aramaic, was originally *in*, which in Hebrew became *en* in a closed tone-syllable.

[4] So König, *Lehrgeb.*, i. p. 226.

1st pers. נִי־ (even in pause, Jb 7^{14}, &c.), נִי֫ (for נִנִי־, נִנִי֫).
2nd pers. ךָ֫ (Jer 22^{24} in pause נְךָ֫) and, only orthographically different,
כָה֫ (Is 10^{24}, Pr 2^{11} in *pause*).
3rd pers. נּוּ֫ (for נְהוּ֫),[1] *fem.* הָ֫ for נְהָ֫.
[*1st pers. plur.* נוּ֫ (for נְנוּ֫), see the Rem.]
In the other persons Nûn energetic does not occur.

k Rem. The uncontracted forms with *Nûn* are rare, and occur only in poetic or elevated style (Ex 15^{2}, Dt 32^{10} [*bis*], Jer 5^{22}, 22^{24}); they are never found in the *3rd fem. sing.* and *1st plur.* On the other hand, the contracted forms are tolerably frequent, even in prose. An example of נּוּ֫ as *1st plur.* occurs perhaps in Jb 31^{15} [but read נוּ and cf. § 72 *cc*], hardly in Ho 12^{5}; cf. הִנֶּנּוּ *behold us*, Gn 44^{16}, 50^{18}, Nu 14^{40} for הִנֵּנוּ (instead of הִנְּנֵנוּ; see § 20 *m*).—In Ez 4^{12} the Masora requires תְּעֻגֶנָּה, without Dageš in the Nûn.

l That the forms with *Nûn energicum* are intended to give greater emphasis to the verbal form is seen from their special frequency in *pause*. Apart from the verb, however, *Nûn energicum* occurs also in the union of suffixes with certain particles (§ 100 *o*).
This Nûn is frequent in Western Aramaic. In Arabic the corresponding forms are the two *energetic moods* (see § 48 *b*) ending in *an* and *anna*, which are used in connexion with suffixes (e. g. *yaqtulan-ka* or *yaqtulanna-ka*) as well as without them.

§ 59. *The Perfect with Pronominal Suffixes.*

a **1.** The endings (*affformatives*) of the perfect occasionally vary somewhat from the ordinary form, when connected with pronominal suffixes; viz.:—

(*a*) In the *3rd sing. fem.* the original feminine ending תְ־ or תַ־ is used for הָ֫.

(*b*) In the *2nd sing. masc.* besides תָּ֫ we find תְ, to which the connecting vowel is directly attached, but the only clear instances of this are with נִי־.[2]

(*c*) In the *2nd sing. fem.* תִּי֫, the original form of תְ, appears; cf. אַתִּי, קָטַלְתִּי, § 32 *f*; § 44 *g*. This form can be distinguished from the 1st pers. only by the context.

(*d*) *2nd plur. masc.* תּוּ for תֶּם. The only examples are Nu 20^{5}, 21^{5}, Zc 7^{5}. The *fem.* קְטַלְתֶּן never occurs with suffixes; probably it had the same form as the masculine.

We exhibit first the forms of the perfect *Hiphʿîl*, as used in connexion with suffixes, since here no further changes take place in the stem itself, except as regards the tone (see *c*).

---

[1] On נֻּ = נְהוּ־ Nu 23^{13}, see § 67 *o*.

[2] On the *ă* as an original element of the verbal form, see § 58 *f*, note.

Singular.	*Plural.*
3. *m.* הִקְטִיל	3. *c.* הִקְטִילוּ
3. *f.* הִקְטִילַת	
2. *m.* הִקְטַלְתָּ, הִקְטַלְתְּ	2. *m.* הִקְטַלְתֶּם
2. *f.* הִקְטַלְתְּ, הִקְטַלְתִּי	
1. *c.* הִקְטַלְתִּי	1. *c.* הִקְטַלְנוּ

The beginner should first practise connecting the suffixes with these *Hiph'il* forms and then go on to unite them to the *Perfect Qal* (see *d*).

c **2.** The addition of the suffix generally causes the tone to be thrown forward towards the end of the word, since it would otherwise fall, in some cases, on the ante-penultima; with the *heavy* suffixes (see *e*) the tone is even transferred to the suffix itself. Considerations of tone, especially in the Perfect *Qal*, occasion certain vowel changes: (*a*) the *Qameṣ* of the first syllable, no longer standing *before* the tone, always becomes vocal *Šᵉwâ*; (*b*) the original *Pathaḥ* of the second syllable, which in the *3rd sing. fem.* and *3rd plur.* had become *Šᵉwâ*, reappears before the suffix, and, in an open syllable before the tone, is lengthened to *Qameṣ*; similarly original *ĭ* (as in the *3rd sing. masc. without* a suffix) is lengthened to *ē*, e. g. אֲהַבְתֵּךְ 1 S 18[22], Pr 19[7].

d The forms of the perfect of Qal consequently appear as follows:—

Singular.	*Plural.*
3. *m.* קָטַל	3. *c.* קָטְלוּ
3. *f.* קָטְלַת (קָטַלְתָ, see *g*)	
2. *m.* קָטַלְתָּ (קָטַלְתְּ, see *h*)	2. *m.* קְטַלְתֶּם
2. *f.* קָטַלְתְּ (קָטַלְתִּי, see *h*)	
1. *c.* קָטַלְתִּי	1. *c.* קָטַלְנוּ

The connexion of these forms with all the suffixes is shown in *Paradigm C*. It will be seen there also, how the *Ṣere* in the Perfect *Pi'ēl* changes sometimes into *Sᵉghôl*, and sometimes into *vocal Šᵉwâ*.

e Rem. 1. The suffixes of the 2nd and 3rd pers. plur. כֶּם and הֶם, since they end in a consonant and also always have the tone, are distinguished as *heavy* suffixes (*suffixa gravia*) from the rest, which are called *light* suffixes. Compare the connexion of these (and of the corresponding feminine forms כֶּן and הֶן) with the *noun*, § 91. With a perfect כֶּם alone occurs, ψ 118[26]. The form קָטַל which is usually given as the connective form of the 3rd sing. masc. before כֶּם and כֶּן is only formed by analogy, and is without example in the O. T.

f 2. In the *3rd sing. masc.* קָטְלָהוּ (especially in verbs ל״ה; in the strong verb only in Jer 20[15] in *Pi'ēl*) is mostly contracted to קִטְּלוֹ, according to § 23 *k*; likewise in the 2nd sing. masc. קִטַּלְתָּהוּ to קִטַּלְתּוֹ.—As a suffix of the 1st sing. נִי occurs several times with the 3rd sing. masc. perf. Qal of verbs ל״ה, not only in *pause* (as עָנָנִי ψ 118[5]; קָנָנִי Pr 8[22] with *Dᵉḥi*), but even with a con-

junctive accent, as הִרָּנִי Jb 30[19]; עֲנָנִי 1 S 28[15] (where, however, the reading עָנַנִי is also found). With a sharpened נ: דִּנַּנִי Gn 30[6], יְסַבֵּנִי ψ 118[18].

g 3. The *3rd sing. fem.* קְטָלַת (= קְטָלָה) has the twofold peculiarity that (*a*) the ending *ath* always takes the tone,[1] and consequently is joined to those suffixes which form a syllable of themselves (נִי, ךָ, הוּ, הָ, נוּ), without a connecting vowel, contrary to the general rule, § 58 *f*; (*b*) before the other suffixes the connecting vowel is indeed employed, but the tone is drawn back to the *penultima*, so that they are pronounced with shortened vowels, viz. ךָ ـַـְـ, ם ـַـֶـ, e.g. אֲהֵבַתְךָ *she loves thee*, Ru 4[15], cf. Is 47[10]; נְגֵבַתַם *she has stolen them*, Gn 31[32]; שְׂרָפַתַם *it burns them*, Is 47[14], Jos 2[6], Ho 2[14], ψ 48[7]. For תִּנִי ـַـְـ, תֵךְ ـַـֶـ &c., in *pause* תִּנִי ـֵـ is found, Jer 8[21], ψ 69[10], and תֵךְ ـֵ Ct 8[5]; and also without the *pause* for the sake of the assonance חִבְּלָתֵךְ, *she was in travail with thee*, ibid. The form קְטָלַהוּ (e.g. Ru 4[15]) has arisen, through the loss of the ה and the consequent sharpening of the ת (as in נְפָּהוּ ـָـּ and for נְהוּ ـָ and נָהּ ـָ, cf. § 58 *i*), from the form קְטָלָתְהוּ, which is also found even in *pause* (אֲהֵבָתְהוּ 1 S 18[28]; elsewhere it takes in *pause* the form סְמָכָתְהוּ Is 59[16]); so קְטָלָתָה from קְטָלַתְהָ; cf. 1 S 1[6], Is 34[17], Jer 49[24], Ru 3[6]; in *pause* Ez 14[15], always, on the authority of Qimḥi, without *Mappiq* in the ה, which is consequently always a mere vowel-letter.

h 4. In the *2nd sing. masc.* the form קְטַלְתָּ is mostly used, and the suffixes have, therefore, no connecting vowel, e.g. זְנַחְתָּנוּ פָּרַצְתָּנוּ *thou hast cast us off, thou hast broken us down*, ψ 60[3]; but with the suff. of the 1st sing. the form קְטַלְתַּנִי is used, e.g. חֲמַרְתַּנִי ψ 139[1]; in *pause*, however, with *Qameṣ*, e.g. עֲזַבְתָּנִי ψ 22[2]; Ju 1[15] (with *Zaqeph qaṭon*); but cf. also צָרַפְתָּנִי ψ 17[3] with *Merᵉkha*.—In the *2nd sing. fem.* תִּי ـִـ is also written defectively, רְמִיתַנִי 1 S 19[17], Ju 11[35], Jer 15[10], Ct 4[9]. Occasionally the suffix is appended to the ordinary form תְּ ـְـ, viz. הִשְׁבַּעְתָּנוּ *thou* (*fem.*) *dost adjure us*, Ct 5[9], Jos 2[17.20]; cf. Jer 2[27], and, quite abnormally, with *Ṣere* הוֹרַדְתֵּנוּ *thou* (*fem.*) *didst let us down*, Jos 2[18], where הוֹרַדְתָּנוּ would be expected. In Is 8[11] וַיְסָרֵנִי is probably intended as an *imperfect*.

i 5. In verbs *middle ē*, the ē remains even before suffixes (see above, *c*), e.g. אֲהֵבְךָ Dt 15[16], אֲהֵבַתְהוּ 1 S 18[28], cf. 18[22]; יְרֵאוּהוּ Jb 37[24]. From a verb *middle ō* there occurs יְכָלְתִּיו *I have prevailed against him*, ψ 13[5], from יָכֹל with ŏ instead of ō in a syllable which has lost the tone (§ 44 *e*).

§ 60. *Imperfect with Pronominal Suffixes.*

a In those forms of the *imperfect* Qal, which have no afformatives, the vowel ō of the second syllable mostly becomes ֶ (simple *Šᵉwâ mobile*), sometimes ֵ; thus in the principal *pause*, Nu 35[20], Is 27[3], 62[2], Jer 31[33], Ez 35[6], Ho 10[10]; before the principal *pause*, ψ 119[33]; before a secondary *pause*, Ez 17[23]; even before a conjunctive accent, Jos 23[5]. Before ךָ ـְـ,

[1] חִבְּלָתֵךְ Ct 8[5] is an exception. כֶּם would probably even here have the tone (see *e*); but no example of the kind occurs in the O.T. In Is 51[2] the *imperfect* is used instead of the *perfect* with a suffix.

־כֶם, however, it is shortened to *Qameṣ ḥaṭuph*, e.g. יִשְׁמָרְךָ (but in *pause* יִשְׁמָרֶךָּ or וְיִשְׁמָרֶךָּ; with *Nûn energicum*, see § 58 *i*), יִשְׁמָרְכֶם, &c. Instead of תִּקְטֹלְנָה, the form תִּקְטֹלְנָּה [1] is used for the 2nd and 3rd *fem. plur.* before suffixes in three places: Jer 2[19], Jb 19[15], Ct 1[6].

Rem. 1. יְחָבְרֶךָּ ψ 94[20] is an anomalous form for יַחְבְּרֶךָ (cf. the analogous יְחָנֶךָּ § 67 *n*) and יְפַנְּשֶׁךָּ (so Baer; others יְפַגְּשֶׁךָ) Gn 32[18] for יִפְגְּשֶׁךָ. To the same category as יְחָבְרֶךָּ belong also, according to the usual explanation, תְּעָבְדֶם (from תַּעֲבֹד), Ex 20[5], 23[24], Dt 5[9], and נְעָבְדֶךָּ Dt 13[3]. As a matter of fact, the explanation of these forms as imperfects of *Qal* appears to be required by the last of these passages; yet why has the retraction of the ŏ taken place only in these examples (beside numerous forms like יַעַבְדֻנִי)? Could the Masora in the two Decalogues and in Ex 23[24] (on the analogy of which Dt 13[3] was then wrongly pointed) have intended an imperfect *Hoph'al* with the suffix, meaning *thou shalt not allow thyself to be brought to worship them*? *b*

Verbs which have *a* in the second syllable of the *imperfect*, and imperative, *Qal* (to which class especially *verba tertiae* and *mediae gutturalis* belong, § 64 and § 65) do *not*, as a rule, change the *Pathaḥ* of the *imperfect* (nor of the imperative, see § 61 *g*) into *Šᵉwâ* before suffixes; but the Pathaḥ, coming to stand in an open syllable before the tone, is lengthened to *Qameṣ*, e.g. וַיִּלְבָּשֵׁנִי Jb 29[14]; יְנַאֲלוּהוּ 3[5]; וַיִּשְׁלָחֵם Jos 8[3]; יִקְרָאֻהוּ ψ 145[18]; but יִקְרָאוֹ Jer 23[6], is probably a *forma mixta* combining the readings יִקְרָאוֹ and יִקְרָאוּ, cf. § 74 *e*. *c*

2. Not infrequently suffixes with the connecting vowel *a* are also found with the imperfect, e.g. תִּרְבָּקֵנִי Gn 19[19], cf. 29[32], Ex 33[20], Nu 22[33], 1 K 2[24] *Qᵉrê*, Is 56[3], Jb 9[18]; also ־נִי, Gn 27[19.31], Jb 7[14], 9[34], 13[21] (in principal *pause*); וַיִּכְּרֵהוּ Gn 37[33], cf. 16[7], 2 S 11[27], Is 26[5], Jb 28[27], 1 Ch 20[2]; יְבָרְכֵנוּ Is 63[16] (manifestly owing to the influence of the preceding יְיַעֲנֵנוּ); יְלַבְּשֵׁם Ex 29[30], cf. 2[17], Nu 21[30], Dt 7[15], ψ 74[8]; even אֲמִילֵם 118[10-12]; וַיּוֹשִׁיעֵן Ex 2[17], and יְחִיתֵן Hb 2[17] (where, however, the ancient versions read יְחַתֵּךְ); even יְרַדְּפוּ (*ŏ* from *āhu*) Ho 8[3]; cf. Ex 22[29], Jos 2[4] (but read וַתִּצְפְּנֵם); 1 S 18[1] *Kᵉthîbh*, 21[14] (where, however, the text is corrupt); 2 S 14[6] (where read with the old versions וַיַּךְ); Jer 23[6] (see § 74 *e*), ψ 35[8], Ec 4[12].—On pausal *Sᵉghôl* for *Ṣere* in וְאֵבְרֵכֶם Gn 48[9] and וַתְּאַלְצֵהוּ (so Baer, but ed. Mant., Ginsb. וַתְּאַלְּצֵהוּ) Ju 16[16], see § 29 *q*. *d*

3. Suffixes are also appended in twelve passages to the plural forms in ־וֹן, viz. תְּרַכְּאוּנַנִי *will ye break me in pieces*? Jb 19[2]; יְשֻׁרָתוּנֶךָ (here necessarily with a connecting vowel) Is 60[7.10]; Pr 5[22] (י but probably corrupt); elsewhere always without a connecting vowel; יְקָרְאֻנִי with two other examples Pr 1[28], 8[17], Ho 5[15]; cf. וּנְךָ ־ ψ 63[4], 91[12]; וּנְהוּ ־ Jer 5[22]; וּנָהּ ־ Jer 2[24], all in principal pause. [See Böttcher, *Lehrb.*, § 1047 f.] *e*

4. In *Pi'ēl*, *Pô'ēl*, and *Po'lēl*, the *Ṣere* of the final syllable, like the ō in Qal, becomes vocal *Šᵉwâ*; but before the suffixes ךָ־ and כֶם־ it is shortened to *Sᵉghôl*, e.g. יְכַבֶּצְךָ Dt 30[4], ψ 34[12], Is 51[2]. With a final guttural, however, אֲשַׁלֵּחֲךָ Gn 32[27]; also in Pr 4[8], where with Qimḥi תְּחַבְּקֶךָ is to be read. *ē* is *f*

[1] This form is also found as feminine without a suffix, in Jer 49[11], Ez 37[7]. In the latter passage וַתִּקְרְבוּ is probably to be regarded, with König, as a clumsy correction of the original וַיִּקְ, intended to suggest the reading וַתִּקְרַבְנָה, to agree with the usual gender of עֲצָמוֹת.

retained in the tone-syllable; an analogous case in *Hiph'il* is וְיַגֶּדְךָ Dt 32^{7}. Less frequently *Ṣere* is sharpened to *Ḥireq*, e.g. אֲאַמְּצֶכֶם Jb 16^{5}, cf. Ex 31^{13}, Is 1^{15}, 52^{12}; so in *Po'lēl*, Is 25^{1}, ψ 30^{2}, 37^{34}, 145^{1}, and probably also in *Qal* אֹסִפְךָ 1 S 15^{6}; cf. § 68 *h*.

g 5. In *Hiph'il* the *i* remains, e.g. תַּלְבִּישֵׁנִי Jb 10^{11} (after *wāw consecutive* it is often written defectively, e.g. וַיַּלְבֵּשֵׁם Gn 3^{21} and often); but cf. above, *f*, Dt 32^{7}. Forms like תַּעְשְׁרֶנָּה *thou enrichest it*, ψ 65^{10}, 1 S 17^{25}, are rare. Cf. § 53 *n*.

h 6. Instead of the suffix of the 3rd plur. fem. (ן), the suffix of the 3rd plur. masc. (ם) is affixed to the afformative וּ, to avoid a confusion with the personal ending ן; cf. וַיִּמָּלְאוּם Gn 26^{15} (previously also with a perf. סִתַּמוּם); Gn 26^{18}, 33^{13}, Ex 2^{17} (where וַיּוֹשִׁעָן occurs immediately after); $39^{18.20}$, 1 S 6^{10} (where also בְּנֵיהֶם is for בְּנֵיהֶן, a neglect of gender which can only be explained by § 135 *o*).—For יְהַרְגֵן Zc 11^{5} read perhaps יְהָרְגֵן with M. Lambert.

§ 61. *Infinitive, Imperative and Participle with Pronominal Suffixes.*

a 1. The *infinitive construct* of an *active verb* may be construed with an accusative, and therefore can also take a *verbal suffix*, i.e. the *accusative* of the personal pronoun. The only undoubted instances of the kind, however, in the O. T. are infinitives with the verbal suffix of the 1st pers. sing., e.g. לְדָרְשֵׁנִי *to inquire of me*, Jer 37^{7}. As a rule the infinitive (as a *noun*) takes *noun*-suffixes (in the *genitive*, which may be either subjective or objective, cf. § 115 *c*), e.g. עָבְרִי *my passing by*; מָלְכוֹ *his reigning*, see § 115 *a* and *e*. The infinitive *Qal*, then, usually has the form *qŏṭl*, retaining the original short vowel under the first radical (on the probable ground-form *qŭṭŭl*, see § 46 *a*). The resulting syllable as a rule allows a following B^{e}gadk^{e}phath to be spirant, e.g. בְּכָתְבוֹ *in his writing*, Jer 45^{1}; cf., however, הָפְכִי Gn 19^{21}; נָגְפוֹ (so ed. Mant.; others נִגְּפוֹ) Ex 12^{27}; עָצְבִי 1 Ch 4^{10}; before ךָ— and כֶם— also the syllable is completely closed, e.g. בְּאָסְפְּךָ Ex 23^{16}, Lv 23^{39} (but in pause לְהָרְגֶךָּ Gn 27^{42}), unless the vowel be retained in the second syllable; see *d*. With the form קְטֹל generally, compare the closely allied nouns of the form קִטֶּל (before a suffix קִטְלִ or קִטְלֵ), § 84^{a} *a*; § 93 *q*.

b Rem. 1. The infin. of verbs which have ō in the last syllable of the *imperfect* of *Qal*, sometimes takes the form *qiṭl* before suffixes, e.g. בִּבְנֹתוֹ Ex 21^{8}; מִכְרָם Am 2^{6} (but מָכְרָה Ex 21^{8}), נִפְלוֹ 2 S 1^{10} (but נָפְלוֹ 1 S 29^{3}), לְשַׁטְנוֹ Zc 3^{1}, שִׁבְרִי Lv 26^{26}, Ez 30^{18} &c. According to Barth (see above, § 47 *i* with the note) these forms with *i* in the first syllable point to former *i*-imperfects.

c Infinitives of the form קָטֵל (§ 45 *c*) in verbs middle or third guttural (but cf. also שָׁכְבָה Gn $19^{33.35}$—elsewhere שָׁכְבְּךָ and שָׁכְבוֹ) before suffixes sometimes take the form *qaṭl*, as וַעְפוֹ Jon 1^{16} (and, with the syllable loosely closed.

פַּעֲמוֹ Ju 13[25]), מַחְאֲךָ and רַקְּעֲךָ Ez 25[6]; sometimes *qiṭl*, with the *a* attenuated to *i*, especially in verbs third guttural; as בִּטְחֵךְ, בִּלְעִי, בִּקְעָם, בִּנְעוֹ, פִּתְחִי, רִבְעָהּ.—Contrary to § 58*f* נִי־ (1 Ch 12[17]) and נוּ־ (Ex 14[11]) are sometimes found with the *infinitive* instead of נִי־ and נוּ־. On דרופי *my following* ψ 38[21] (but *Qerê* דָּרְפִי), cf. the analogous examples in § 46 *e*.

2. With the suffixes ךָ־ and כֶם־, contrary to the analogy of the corresponding nouns, forms occur like אֲכָלְךָ *thy eating*, Gn 2[17]; אֲכָלְכֶם Gn 3[5]; עֲמָדְךָ (others עָמְדָךְ) Ob [11], i.e. with *ō* shortened in the same way as in the *imperfect*, see § 60. But the analogy of the nouns is followed in such forms as קְצֻרְכֶם *your harvesting*, Lv 19[9], 23[22] (with retention of the original *ŭ*), and מְאָסְכֶם (read *mŏ'ŏs'khèm*) *your despising*, Is 30[12]; cf. Dt 20[2]; on בְּמֹצַאֲכֶם Gn 32[20] (for בְּמָצְ׳), see § 74*h*.—Very unusual are the infinitive suffixes of the 2nd sing. masc. with נ *energicum* (on the analogy of suffixes with the imperfect, § 58*i*), as יַפְרֶכָּנְךָ Dt 4[36], cf. 23[5], Jb 33[32], all in principal pause. *d*

Examples of the *infinitive Niph'al* with suffixes are, הִשָּׁמְרִי Ex 14[13]; הִשָּׁמְרְךָ Dt 28[20] (in *pause*, הִשָּׁמְדֶךָּ verse 24); הִשָּׁפְטוֹ ψ 37[33]; הִזָּכְרֶם Ez 21[29]; הִשָּׁמְדֶם Dt 7[23]. In the *infinitive* of *Pi'ēl* (as also in the *imperfect*, see § 60*f*) the *ē* before the suff. ךָ־, כֶם־ becomes *S'ghôl*, e.g. דַּבֶּרְךָ Ex 4[10], and with a sharpening to *i* פָּרִשְׂכֶם Is 1[15] (see § 60*f*). In the *infinitive Pô'ēl*, בּוֹשַׁסְכֶם occurs (with *a* for *ĕ* or *ĭ*) Am 5[11], but probably בּוּסְכֶם, with Wellhausen, is the right reading; the correction ם has crept into the text alongside of the *corrigendum* ש. *e*

2. The leading form of the *imperative Qal* before *suffixes* (קְטֹל) is due probably (see § 46*d*) to the retention of the original short vowel of the first syllable (ground-form *qŭṭŭl*). In the *imperative* also *ŏ* is not followed by *Dageš lene*, e.g. כָּתְבֵם *kŏthbhēm* (not *kŏthbēm*), &c.[1] As in the *imperfect* (§ 60*d*) and *infinitive* (see above, *c*), so also in the *imperative*, suffixes are found united to the stem by an *a*-sound; e.g. כָּתְבָהּ Is 30[8]; cf. 2 S 12[28].—The forms קִטְלִי, קִטְלוּ, which are not exhibited in Paradigm C, undergo no change. Instead of קִטְלֶנָּה, the masc. form (קִטְלוּ) is used, as in the *imperfect*. *f*

In verbs which form the *imperative* with *a*, like שְׁלַח (to which class belong especially verbs *middle* and *third guttural*, §§ 64 and 65), this *a* retains its place when pronominal suffixes are added, but, since it then stands in an open syllable, is, as a matter of course, lengthened to *Qameṣ* (just as in *imperfects Qal* in *a*, § 60*c*), e.g. שְׁלָחֵנִי *send me*, Is 6[8], בְּחָנֵנִי ψ 26[2], קָרָאֵנִי ψ 50[15], שָׁמְעֵנִי Gn 23[8]. In Am 9[1], בְּצָעֵם (so ed. Mant., Baer, Ginsb., instead of the ordinary reading בְּצַעֵם) is to be explained, with Margolis, *AJSL.* xix, p. 45 ff., from an original בְּצָעְמוֹ, as וְהִרְגַתֵם Am 9[4] from original וְהִרְגַתְמוֹ.—In the imperative *Hiph'îl*, the form used in conjunction with suffixes is not the 2nd *sing. masc.* *g*

[1] שָׁמְרֵנִי *šām'rēnî* required by the Masora in ψ 16[1] (also שָׁמְרָה ψ 86[2], 119[167]; cf. Is 38[14] and עָמְדָךְ Ob [11]), belongs to the disputed cases discussed in § 9*c* and § 48*i* note.

הַקְטֵל, but הַקְטִיל (with *î* on account of the open syllable, cf. § 60 *g*), e. g. הַקְרִיבֵהוּ *present it*, Mal 1[8].

h 3. Like the infinitives, the participles can also be united with either verbal or noun-suffixes; see § 116*f*. In both cases the vowel of the participles is shortened or becomes *Šᵉwâ* before the suffix, as in the corresponding noun-forms, e. g. from the form קֹטֵל: רֹדְפִי, רֹדְפוֹ, &c.; but before *Šᵉwâ mobile* יֹצְרֵךְ, &c., or with the original *ĭ*, אֵיְבְךָ Ex 23[4], &c., אֹסְפֵךְ 2 K 22[20] (coinciding in form with the 1st *sing. imperfect Qal*, 1 S 15[6]; cf. § 68 *h*); with a middle guttural (נֹאֲלִי), נֹאֲלֵךְ; with a third guttural, בֹּרְאֲךָ Is 43[1], but שֹׁלַחֲךָ, מְשֻׁלַּחֲךָ Jer 28[16], cf. § 65 *d*. The form מְקַטֵּל, with suffix מְקַטְּלִי; before *Šᵉwâ* sometimes like מְלַמֶּדְךָ Is 48[17], מְנַחֲמְכֶם 51[12], sometimes like מְאַסְּפְכֶם 52[12]. In Is 47[10] רֹאָנִי is irregular for רֹאֵנִי; instead of the meaningless בַּלֹּה מְקַלְלֻנִי Jer 15[10] read בַּלֹּהֵם קִלְלוּנִי.

Also unusual (see above, *d*) with participles are the suffixes of the 2nd sing. masc. with נ *energicum*, as עֹנֶךָּ Jb 5[1]; cf. Dt 8[5], 12[14.28].

§ 62. *Verbs with Gutturals.*

Brockelmann, *Grundriss*, p. 584 ff.

Verbs which have a guttural for one of the three radicals differ in their inflexion from the ordinary strong verb, according to the general rules in § 22. These differences do not affect the consonantal part of the stem, and it is, therefore, more correct to regard the guttural verbs as a subdivision of the strong verb. At the most, only the entire omission of the strengthening in some of the verbs *middle guttural* (as well as in the *imperfect Niph'al* of verbs *first guttural*) can be regarded as a real weakness (§§ 63 *h*, 64 *e*). On the other hand, some original elements have been preserved in guttural stems, which have degenerated in the ordinary strong verb; e. g. the *ă* of the initial syllable in the *imperfect Qal*, as in יַחְמֹד, which elsewhere is attenuated to *ĭ*, יִקְטֹל.—In guttural verbs א and ה are only taken into consideration when they are actual consonants, and not vowel-letters like the א in some verbs פ״א (§ 68), in a few ע״א (§ 73 *g*), and in most ל״א (§ 74). In all these cases, however, the א was at least originally a full consonant, while the ה in verbs ל״ה was never anything but a vowel letter, cf. § 75. The really consonantal ה at the end of the word is marked by *Mappîq*.—Verbs containing a ר also, according to § 22 *q*, *r*, share some of the peculiarities of the guttural verbs. For more convenient treatment, the cases will be distinguished, according as the guttural is the first, second, or third radical. (Cf. the Paradigms D, E, F, in which only those conjugations are omitted which are wholly regular.)

§ 63. *Verbs First Guttural*, e. g. עָמַד *to stand.*

In this class the deviations from the ordinary strong verb may be *a* referred to the following cases:—

1. Instead of a *simple Šᵉwâ mobile*, the initial guttural takes a *compound Šᵉwâ* (*Ḥaṭeph*, § 10 *f*, § 22 *l*). Thus the *infinitives* עָמֹד, אֶכֹל *to eat*, and the *perfects*, *2nd plur. masc.* חֲפַצְתֶּם, עֲמַדְתֶּם from חָפֵץ *to be inclined*, correspond to the forms קְטֹל and קְטַלְתֶּם; also אֲבָלוֹ to קְטָלוֹ, and so always with initial ֲ before a suffix for an original *ă*, according to § 22 *o*.

2. When a preformative is placed before an initial guttural, either *b* the two may form a closed syllable, or the vowel of the preformative is repeated as a *Ḥaṭeph* under the guttural. If the vowel of the preformative was originally *a*, two methods of formation may again be distinguished, according as this *a* remains or passes into Seghôl.

Examples: (*a*) of firmly closed syllables after the original vowel *c* of the preformative (always with *ō* in the second syllable, except וְהִתְעַנַּב Ez 23⁵, תַּעְדֶּה &c. from עָדָה *to adorn oneself*, and יַעְטֶה; but cf. *e*): יַחְמֹד, יַחְמֹל, יַחְשֹׁב, יַחְשֹׁף, יַעְקֹב Jer 9⁵ (probably to distinguish it from the name יַעֲקֹב, just as in Jer 10¹⁹, &c., the participle fem. Niph'al of חָלָה is נַחֲלָה to distinguish it from נֶחֱלָה), &c., and so generally in the *imperfect Qal* of stems beginning with ח, although sometimes parallel forms exist, which repeat the *ă* as a *Ḥaṭeph*, e. g. יַחֲשֹׁב, &c. The same form appears also in the *imperfect Hiph'il* יַחְסִיר, &c. Very rarely the original *ă* is retained in a closed syllable under the preformative נ of the *perfect Niph'al*: נַחְפָּאתָ Gn 31²⁷; cf. 1 S 19², Jos 2¹⁶; also the *infinitive absolute* נַחְתּוֹם Est 8⁸, נַעְתּוֹר 1 Ch 5²⁰, and the *participle fem.* נַחְלָה (see above), *plur.* נַעְתָּרוֹת Pr 27⁶. In these forms the original *ă* is commonly kept under the preformative and is followed by *Ḥaṭeph-Pathaḥ*; thus in the *perfect* of some verbs ל״ה, e. g. נַעֲשָׂה, &c.; in the *infinitive absolute*, נַהְפּוֹךְ Est 9¹; in the *participle* נַעֲרָץ, ψ 89⁸, &c.

(*b*) Of the corresponding *Ḥaṭeph* after the original vowel: יַחְבֹּשׁ *d* (but יַחְבֹּשׁ Jb 5¹⁸ in pause), יַחְלֹם, יַעְמֹד, יַחְרֹם, and so almost always with ע and often with ה in the *imperfects* of *Qal* and *Hiph'il*; in *Hoph'al*, הָעְמַד, יָעְמַד; but cf. also הָחְבְּאוּ Is 42²², הָחְתֵּל Ez 16⁴.

The *ă* of the preformative before a guttural almost always (§ 22 *i*, *e* cf. § 27 *p*) becomes *Seghôl* (cf., however, *q*). This *Seghôl* again appears sometimes

(*c*) in a closed syllable, e. g. יֶחְבַּשׁ, יֶחְסַר, יֶעְתַּר, יֶאְשַׁם, always with *ă* in the second syllable, corresponding to the imperfects of verbs ע״ע,

with original *ĭ* in the first and *ă* in the second syllable, § 67 *n*, and also to the imperfects of verbs ע״ו, § 72 *h*; but cf. also יֶאְסֹר, יֶאְפֹּד, and יֶהְדֹּף; in *Niph.*, e. g. נֶהְפַּךְ; נֶחְלוּ Am 6⁶, &c.; in *Hiph.* הֶחְסִיר, הֶעֱלִים 2 K 4⁷, &c.: sometimes

(*d*) followed by *Ḥaṭeph-Segh*ôl, e.g. יֶחֱזַק, יֶאֱסֹף, יֶחֱשַׁף, יֶעֱרַב in *imperfect Qal*; הֶעֱמִיד *Hiph'il*; נֶעֱנַשׁ *Niph'al*.

f Rem. With regard to the above examples the following points may also be noted: (1) The forms with a firmly closed syllable (called the hard combination) frequently occur in the same verb with forms containing a loosely closed syllable (the soft combination). (2) In the 1st *sing. imperfect Qal* the preformative א invariably takes *Segh*ôl, whether in a firmly or loosely closed syllable, e. g. אֶחְבְּשׁ (with the cohortative אֶחְבְּשָׁה), אֶחְסֹךְ (in *pause*), &c. In Jb 32¹⁷ אֶעֱנֶה must unquestionably be *Hiph'il*, since elsewhere the pointing is always אֶעֱנֶ֫ה. Cohortatives like אֶהֱרְגָה Gn 27⁴¹ and אַחְדְּלָה Jb 16⁶, are explained by the next remark. (3) The shifting of the tone towards the end frequently causes the *Pathaḥ* of the preformative to change into *Segh*ôl, and vice versa, e.g. וַיַּעֲשֶׂה, but וַתַּעֲשֶׂ֫הָ 3rd *sing. fem.*; יֶאֱסֹף, but תֶּאֱסֹפִי; הֶעֱמִיד, but with *wāw consecutive* וְהַעֲמַדְתָּ֫, &c.; so וַיֶּחְסְרוּ Gn 8³ the plur. of וַיֶּחְסַר, cf. Gn 11⁸; and thus generally a change of the stronger *Ḥaṭeph-Segh*ôl group (ֱ ֲ) into the lighter *Ḥaṭeph-Pathaḥ* group takes place whenever the tone is moved one place toward the end (cf. § 27 *v*).

g 3. When in forms like יַעֲמֹד, נַעֲמַד, the vowel of the final syllable becomes a *vocal Šewâ* in consequence of the addition of an affformative (נ, י, ת, ה) or suffix, the *compound Šewâ* of the guttural is changed into the corresponding short vowel, e. g. יַעֲמֹד, *plur.* יַעַמְדוּ (*ya-'a-m^{e}-dhû* as an equivalent for *ya'-m^{e}-dhû*); נֶעֱזָבָה *she is forsaken*. But even in these forms the hard combination frequently occurs, e. g. יַחְבְּלוּ *they take as a pledge* (cf. in the *sing.* תַּחְבֹּל, also יַחֲבֹל); יֶחֱזְקוּ (also יֶחֶזְקוּ) *they are strong*. Cf. *m* and, in general, § 22 *m*, § 28 *c*.

h 4. In the *infinitive, imperative, and imperfect Niph'al*, where the first radical should by rule be strengthened (הִקָּטֵל, יִקָּטֵל), the strengthening is always omitted, and the vowel of the preformative lengthened to *Ṣere*; יֵעָמֵד for *yi"āmēd*,[1] &c. Cf. § 22 *c*.—For תֵּיעָשֶׂה Ex 25³¹ (according to Dillmann, to prevent the pronunciation תַּעֲשֶׂה, which the LXX and Samaritan follow) read תֵּעָשֶׂה.

REMARKS.

I. *On Qal.*

i 1. In verbs פ״א the *infinitive construct* and *imperative* take *Ḥaṭeph-Segh*ôl in the first syllable (according to § 22 *o*), e. g. אֱזֹר *gird thou*, Jb 38³, אֱהַב *love thou*,

[1] אֶעֱנֶה Jb 19⁷ (so even the Mantua ed.) is altogether abnormal: read אֶעָנֶה, with Baer, Ginsb.

Ho 3^{1}, אֱחֹז *seize thou*, Ex 4^{4} (on אֲפוּ *bake ye*, Ex 16^{23}, see § 76 *d*); אָכַל *to eat*; infinitive with a prefix לֶאֱכֹל, לְאָכְלָה, בְּאָכְלָה Is 5^{24}; לֶאֱהֹב Ec 3^{8}. Sometimes, however, *Ḥateph-Pathaḥ* is found as well, e. g. *infinitive* אֲחֹז 1 K 6^{6}; בַּאֲכֹל הָאֵשׁ Nu 26^{10} (before a suffix אֲכָלְךָ, אֲמָרְךָ, אֲכָלְכֶם, אֲמָרְכֶם § 61 *d*); cf. Dt 7^{20}, 12^{23}, Ez 25^{8}, ψ 102^{5}, Pr 25^{7} (אֲמָר־לְךָ), Jb 34^{18}, always in close connexion with the following word. With a firmly closed syllable after ל cf. לַחְפֹּר Is 30^{2}; לַחְסוֹת Jos $2^{2\,f.}$ (on Is 2^{20}, cf. § 84^{b} *n*); לַחְתּוֹת Is 30^{14}, Hag 2^{16}; לַחְשֹׁב Ex 31^{4}, &c.; לַעְזֹר 2 S 18^{3} *Qerê*, but also בְּעָזֹר 1 Ch 15^{26}.

k הֶחְדַּלְתִּי Ju $9^{9.11.13}$ is altogether anomalous, and only a few authorities give הֶחֱדַלְתִּי (Hiph'il), adopted by Moore in Haupt's Bible. According to Qimḥi, Olshausen, and others, the Masora intended a *perfect Hoph'al* with syncope of the preformative after the ה interrogative = הֲהָחְדַּלְתִּי, or (according to Olshausen) with the omission of the ה interrogative. But since the *Hiph'il* and *Hoph'al* of חָדַל nowhere occur, it is difficult to believe that such was the intention of the Masora. We should expect the *perfect Qal*, הֶחְדַּלְתִּי. But the *Qameṣ* under the ח, falling between the tone and counter-tone, was naturally less emphasized than in חָדַלְתִּי, without the ה interrogative. Consequently it was weakened, not to simple *Šᵉwâ*, but to ֱ, in order to represent the sound of the *Qameṣ* (likewise pronounced as *â*) at least in a shortened form. The *Sᵉghôl* of the ה interrogative is explained, in any case, from § 100 *n* (cf. the similar pointing of the article, e. g. in הַחֳדָשִׁים, § 35 *k*). For the accusative after חָדַל, instead of the usual מִן, Jb 3^{17} affords sufficient evidence.

l Also in the other forms of the *imperative* the guttural not infrequently influences the vowel, causing a change of *ĭ* (on this *ĭ* cf. § 48 *i*) into *Sᵉghôl*, e. g. אֱסְפָה *gather thou*, Nu 11^{16}; עֱרָכָה *set in order*, Jb 33^{5}; חֱשְׂפִי *strip off*, Is 47^{2} (on this irregular *Dageš* cf. § 46 *d*), especially when the second radical is also a guttural, e. g. אֱהֳבוּ Am 5^{15}, ψ 31^{24}; cf. Ze 8^{19}; אֱחֳזוּ Ct 2^{15}; cf. also in verbs ל״ה, עֱנִי *sing ye*, Nu 21^{17}, ψ 147^{7} (compared with עֲנוּ *answer ye*, 1 S 12^{3}) and אֱלִי Jo 1^{8}.—*Pathaḥ* occurs in חֲבָלֵהוּ *hold him in pledge*, Pr 20^{16}, and probably also in ψ 9^{14} (חֳנֵנִי).—As a pausal form for חָרְבִי (cf. the *plur.* Jer 2^{12}) we find in Is 44^{27} חָרְבִי (cf. the *imperf.* יַחֲרֵב) with the *ŏ* repeated in the form of a *Ḥateph-Qameṣ*. For other examples of this kind, see § 10 *h* and § 46 *e*.

m 2. The pronunciation (mentioned above, No. 2) of the imperfects in *ă* with *Sᵉghôl* under the preformative in a firmly closed syllable (e. g. יֶחְפַּר, יֶחְדַּל) regularly gives way to the soft combination in verbs which are at the same time ל״ה, e. g. יֶחֱזֶה, יֶחֱצֶה, &c. (but cf. יַהְגֶּה &c., יַחְתֶּה Pr 6^{27}, אֶעֱשֶׂה ed. Mant., Ex 3^{20}). Even in the strong verb וַיֶּחֱזַק is found along with וַיֶּחֱזַק. Cf. also וַתַּעֲגֵב Ez 23^{5}; וַיַּעֲקְבֵנִי Gn 27^{36} (so Ben-Asher; but Ben-Naphtali וַיַּעְקְבֵנִי); וַתַּחֲלֵקֶם Neh 9^{22}, and so always in the *imperfect Qal* of עָוַר with suffixes, Gn 49^{25}, &c.—תֶּאֱהַבוּ Pr 1^{22} is to be explained from the endeavour to avoid too great an accumulation of short sounds by the insertion of a long vowel, but it is a question whether we should not simply read תֶּאֱהֲבוּ with Haupt in his Bible, *Proverbs*, p. 34, l. 44 ff.; cf. the analogous instances under *p*, and

such nouns as וְאֵב, בְּאֵר, § 93 *t*.—On יְחַבְּרֵךְ ψ 94[20] for יַחַבְּרֵךְ (according to Qimḥi, and others, rather *Pi'al*) cf. § 60 *b*.

n יַאֲטֵם ψ 58[5] and יַעְרֵם *to deal subtilly*, 1 S 23[22], Pr 15[5], 19[25], may be explained with Barth (*ZDMG.* 1889, p. 179) as *i*-imperfects (see above, § 47 *i*),—the latter for the purpose of distinction from the causative יְעָרֵים ψ 83[4].—Instead of the unintelligible form וַיְחַלְּקֵם (so ed. Mant.; Baer and Ginsb. as in 24[3]) 1 Ch 23[6] and וַיְחַ 24[3] (partly analogous to תְּעַבְּרֵם § 60 *b*) the Qal וַיַּחְלְקֵם is to be read. The form יָרֵדְּ ψ 7[6] which is, according to Qimḥi (in *Mikhlol*; but in his Lexicon he explains it as *Hithpa'el*), a composite form of *Qal* (יְרֵדְּ) and *Pi'el* (יְרַדֵּךְ), can only be understood as a development of יָרַדְּ (cf. § 64 *h* on יִצְחַק, and § 69 *x* on תְּהַלֵּךְ Ex 9[23], ψ 73[9]). Pathaḥ has taken the place of *Ḥaṭeph-Pathaḥ*, but as a mere helping-vowel (as in שְׁמַעַתְּ § 28 *e*, note 2) and without preventing the closing of the syllable. It is much simpler, however, to take it as a *forma mixta*, combining the readings יְרֵדְּ (impf. Qal) and יְרַדֵּךְ (impf. Pi'el).

II. *On Hiph'il and Hoph'al.*

o 3. The above-mentioned (*f*, 3) change of ֵ֫ to ֶ֫ occurs in the *perfect Hiph'il*, especially when *wāw consecutive* precedes, and the tone is in consequence thrown forward upon the afformative, e. g. הֶעֱמַדְתָּ, but וְהַעֲמַדְתָּ Nu 3[6], 8[13], 27[19]; הֶעֱבַרְתִּי, but וְהַעֲבַרְתִּי Jer 15[14], Ez 2c[37]; even in the 3rd *sing.* וְהַאֲזִין ψ 77[2].—On the contrary ֶ֫ occurs instead of ֵ֫ in the *imperative Hiph'il*, Jer 49[8.30]; and in the *infinitive* Jer 31[32]. The preformative of עתר in *Hiph'il* always takes *a* in a closed syllable: Ex 8[4] הַעְתִּירוּ; verse 5 אַעְתִּיר; also verse 25 and Jb 22[27].

p 4. In the *perfect Hiph'il* ֶ֫ is sometimes changed into ֵ֫, and in *Hoph'al* ָ֫ into ֵ֫ (cf. § 23 *h*); הֶעְבַּרְתָּ Jos 7[7], הֶעֱלָה Hb 1[15], הָעֱלָה Ju 6[28], 2 Ch 2c[34], Na 2[8], always before ע, and hence evidently with the intention of strengthening the countertone-syllable (הֶ or הָ) before the guttural. On a further case of this kind (וְעֶמָה) see § 64 *c*. Something similar occurs in the formation of segholate nouns of the form *qŏṭl*; cf. § 93 *q*, and (on אֱמוּן &c. for אֱמֶת) § 84[a] *q*.—In the imperfect consecutive וַיֶּחֱזַק בּוֹ the tone is thrown back on to the first syllable. On the *Hoph'al* תָּעְבְּרֵם Ex 20[5], &c., see § 60 *b*.

III. חָיָה *and* חָיָה.

q 5. In the verbs חָיָה *to be*, and חָיָה *to live*, the guttural hardly ever affects the addition of preformatives; thus *imperfect Qal* יִחְיֶה and יִחְיֶה, *Niph'al* נִהְיָה; but in the *perfect Hiph'il* הֶחֱיָתָם (2nd *plur.* וְהַחֲיִתֶם Jos 2[13], and even without *wāw consecutive*, Ju 8[19]). Initial ה always has *Ḥaṭeph-Seghôl* instead of *vocal Šᵉwâ*; הָיָה, הֱיוֹת, הֱיִיתֶם (except הֲיִי *be thou! fem.* Gn 24[60]). The 2nd *sing. fem. imperative* of חָיָה is חֲיִי *live thou*, Ez 16[6]; the infinitive, with suffix, חֲיוֹתָם Jos 5[8]. After the prefixes וְ, בְּ, כְּ, לְ, מִ (=מִן) both ה and ח retain the *simple* Šᵉwâ (§ 28 *b*) and the prefix takes *ĭ*, as elsewhere before strong consonants with *Šᵉwâ*; hence in the *perfect Qal* וְהָיִיתָם, *imperative* וְהִיוּ, *infinitive* לִהְיוֹת, בִּהְיוֹת &c. (cf. § 16 *f*, ε). The only exception is the 2nd *sing. masc.* of the *imperative* after *wāw*; וְהֱיֵה Gn 12[2], &c., וְחֱיֵה Gn 20[7].

§ 64. *Verbs Middle Guttural*, e.g. שָׁחַט *to slaughter.*

The slight deviations from the ordinary inflexion are confined *a* chiefly to the following[1]:—

1. When the guttural would stand at the beginning of a syllable with simple *Šᵉwâ*, it necessarily takes a *Ḥaṭeph*, and almost always *Ḥaṭeph-Pathaḥ*, e.g. *perfect* שָׁחֲטוּ, *imperfect* יִשְׁחֲטוּ, *imperative Niph'al* הִשָּׁחֲטוּ. In the *imperative Qal*, before the afformatives *î* and *û*, the original *Pathaḥ* is retained in the first syllable, and is followed by *Ḥaṭeph-Pathaḥ*, thus, זַעֲקִי, זַעֲקוּ, &c.; in אֶהֱבוּ the preference of the א for *Seghôl* (but cf. also יֶאֱחֻזוּךָ Jer 13[21]) has caused the change from *ă* to *ĕ*; in שַׁחֲטוּ Jb 6[22], even *ĭ* remains before a *hard* guttural.

So in the *infinitive Qal fem.*, e.g. אַהֲבָה *to love*, דַּאֲבָה *to pine*; and in the *infinitive* with a suffix לְסַעֲרָה Is 9[6]; the doubtful form שַׁחֲטָה Ho 5[2], is better explained as *infinitive Pi'ēl* (= שַׁחֲתָה).

2. Since the preference of the gutturals for the *a*-sound has less *b* influence on the following than on the preceding vowel, not only is *Ḥolem* retained after the middle guttural in the *infinitive Qal* שָׁחֹט (with the fem. ending and retraction and shortening of the *o* רָחְצָה and רָחֳקָה, cf. § 45 *b*), but generally also the *Ṣere* in the *imperfect Niph'al* and *Pi'ēl*, e.g. יִלָּחֵם *he fights*, יְנַחֵם *he comforts*, and even the more feeble *Seghôl* after *wāw consecutive* in such forms as וַיִּלָּחֶם, וַתִּפְגָּעֶם Gn 41[8] (cf., however, וַיִּוָּעֵץ 1 K 12[6], &c.). But in the *imperative* and *imperfect Qal*, the final syllable, through the influence of the guttural, mostly takes *Pathaḥ*, even in transitive verbs, e.g. שְׁחַט, יִשְׁחַט; זְעַק, יִזְעַק; בְּחַר, יִבְחַר; with *suffixes* (according to § 60 *c*), *imperative* בְּחָנֵנִי, שְׁאָלוּהוּ, *imperfect* יִנְאָלוּהוּ.

With *ō* in the *imperative Qal*, the only instances are נְעֹל 2 S 13[17]; *c* אֱחֹז Ex 4[4], 2 S 2[21], *fem.* אֲחֹזִי Ru 3[15] (with the unusual repetition of the lost *ō* as *Ḥaṭeph-Qameṣ*; 2nd *plur. masc.* in *pause* אֱחֹזוּ Neh 7[3]; without the *pause* אֲחֹזוּ Ct 2[15]); סְעָר Ju 19[8].[2] Finally וְעָמָה for וְזָעֲמָה, Nu 23[7], is an example of the same kind, see § 63 *p*. Just as rare are the imperfects in *ō* of verbs *middle guttural*, as תִּמְעַל, יֶאֱהַב, יִנְהַם Lv 5[15], Nu 5[27] (but וַיִּמְעַל 2 Ch 26[16]); cf. וְתִשְׁחֲרִי Ez 16[38]; תִּפְעָל־ Jb 35[6]. Also in the *perfect Pi'ēl*, *Pathaḥ* occurs somewhat more frequently than in the strong verb, e.g. נִחַם *to comfort* (cf., however, כִּהֵן, כִּחֵד, כִּחֵשׁ, שִׁחֵת);

[1] *Hoph'al*, which is not exhibited in the paradigm, follows the analogy of *Qal*; *Hiph'il* is regular.

[2] Also Ju 19[5] (where Qimḥi would read *seʿād*), read *seʿōd*, and on the use of the conjunctive accent (here *Darga*) as a substitute for Metheg, cf. § 9 *u* (c) and § 16 *b*.

but א and ע always have *ē* in 3rd *sing.*—On the *infinitive* with suffixes, cf. § 61 *b*.

d 3. In *Pi'ēl*, *Pu'al*, and *Hithpa'ēl*, the *Dageš forte* being inadmissible in the middle radical, the preceding vowel, especially before ה, ח, and ע, nevertheless, generally remains short, and the guttural is consequently to be regarded as, at least, *virtually* strengthened, cf. § 22 *c*; e. g. *Pi'ēl* שִׁחֵק, נִחֲלוּ Jos 14[1], וּבְעֵרְתִּי 1 K 14[10], נְהַג Ex 10[13] (cf., however, אַחַר Gn 34[19]; נַהַלְתָּ Ex 15[13], but in the *imperfect* and *participle* יְנַהֵל, &c.; in verbs ל״ה, e.g. רֵעָה), *infinitive* שַׂחֵק, *Pu'al* רֻחַץ (but cf. דֻּחוּ ψ 36[13] from דָּחָה, also the unusual position of the tone in בֻּחַן[1] Ez 21[18], and in the *perfect Hithpa'ēl* הִתְרַחַצְתִּי Jb 9[30]); *Hithpa'ēl perfect* and *imperative* הִטַּהֲרוּ, &c.; in *pause* (see §§ 22 *c*, 27 *q*, 29 *v*, 54 *k*) הִטָּהֲרוּ Nu 8[7], 2 Ch 30[18]; יִתְנָחֵם Nu 23[19], &c.

e The complete omission of the strengthening, and a consequent lengthening of the preceding vowel, occurs invariably only with ר (כָּרַת Ez 16[4] is an exception; כָּרָתָה also occurs, Ju 6[28]), e. g. בָּרַךְ (in *pause* בָּרֵךְ), *imperfect* יְבָרֵךְ, *Pu'al* בֹּרַךְ. Before א it occurs regularly in the stems בָּאַר, נָאַל, מָאַן, פָּאַר, and in the *Hithpa'ēl* of בּאשׁ, ראה, and שׁאה; on the other hand, א is *virtually* strengthened in the *perfects*, נָאַף (once in the imperfect, Jer 29[23]) *to commit adultery*, נָאַץ *to despise* (in the *participle*, Nu 14[23], Is 60[14], Jer 23[17]; according to Baer, but not ed. Mant. or Ginsb., even in the *imperfect* יְנַאֵץ ψ 74[10]), נָאַר *to abhor* La 2[7] (also נֶאֱרָתָה ψ 89[40]) and שָׁאַל ψ 109[10]; moreover, in the *infinitive* יָאַשׁ Ec 2[20], according to the best reading. On the *Mappîq* in the *Pu'al* רֻאֲוּ Jb 33[21], cf. § 14 *d*.

f Rem. 1. In the verb שָׁאַל *to ask, to beg*, some forms of the *perfect Qal* appear to be based upon a secondary form *middle e*, which is *Ṣere* when the vowel of the א stands in an open syllable, cf. שְׁאֵלֵךְ Gn 32[18], Ju 4[20]; שְׁאֵלוּנִי ψ 137[3]; but in a closed syllable, even without a suffix, שְׁאֵלְתֶּם 1 S 12[13], 25[5], Jb 21[29]; שְׁאֵלְתִּיהוּ Ju 13[6], 1 S 1[20]. Cf., however, similar cases of attenuation of an original *ă*, § 69 *s*, and especially § 44 *d*. In the first three examples, if explained on that analogy, the *ī* attenuated from *ă* would have been lengthened to *ē* (before the tone); in the next three *ĭ* would have been modified to *ĕ*. Also in the *Hiph'il*-form הִשְׁאֵלְתִּיהוּ 1 S 1[28] the א is merely attenuated from אַ.

g 2. In *Pi'ēl* and *Hithpa'ēl* the lengthening of the vowel before the guttural causes the tone to be thrown back upon the penultima, and consequently the *Ṣere* of the ultima to be shortened to *Seghôl*. Thus (*a*) before monosyllables, according to § 29 *e*, e.g. לְשָׁרְתוֹ שָׁם *to minister there*, Dt 17[12], even in the case of a guttural which is *virtually* strengthened, Gn 39[14], Jb 8[18] (see § 29 *g*). (*b*) after *wâw consecutive*, e.g. וַיְבָרֶךְ *and he blessed*, Gn 1[22] and frequently, וַיְגָרֶשׁ *and he drove out*, Ex 10[11], וַתִּתְפָּעֶם Dn 2[1].

---

[1] בֻּחַן is explained by Abulwalid as the 3rd pers. *perfect Pu'al*, but by Qimḥi as a noun.

3. The following are a few rarer anomalies; in the *imperfect Qal* יִצְחַק Gn 21[6] *h* (elsewhere תִּצְחַק, &c., in *pause* יִצְחָק, cf. § 10 *g* (c) and § 63 *n*); וְאֶחַר Gn 32[5] (for וְאֶאְחַר); in the *perfect Pi'ēl* אֶחֲרוּ Ju 5[28] (perhaps primarily for אֶחְרוּ; according to Gn 34[19] אֶחֲרוּ would be expected), and similarly יְחַמַּתְנִי ψ 51[7] for יְחֲמַתְנִי; in the *imperative Pi'ēl* קָרֵב Ez 37[17] (cf. above, § 52 *n*); finally, in the *imperative Hiph'il* הָרְחֵק Jb 13[21] and הַמְעֵר ψ 69[24], in both cases probably influenced by the closing conso ant, and by the preference for *Pathaḥ* in *pause* (according to § 29 *q*); without the pause הַרְחֵק Pr 4[24], &c.; but also הַנְחֵת Jo 4[11].

4. As *infinitive Hithpa'ēl* with a suffix we find הִתְיַחֲשָׂם Ezr 8[1], &c., with *i* a firmly closed syllable, also the *participle* מִתְיַחֲשִׂים Neh 7[64]; Baer, however, reads in all these cases, on good authority, הִתְיָהֲשָׂם &c.—The quite meaningless *K'thibh* ונאשאר Ez 9[8] (for which the *Q'rê* requires the equally unintelligible וְנִשְׂאָר) evidently combines two different readings, viz. וְנִשְׁאָר (*part. Niph.*) and וְאָשְׁאַר (*imperf. consec.*); cf. König, *Lehrgebäude*, i. p. 266 f.—In יְתָאֲרֵהוּ Is 44[13] (also יְתָאֲרֵהוּ in the same verse) an *imperfect Pō'ēl* appears to be intended by the Masora with an irregular shortening of the *ô* for *ā*; cf. § 55 *b* מָלְשֵׁנִי ψ 101[5] *Q'rê*; on the other hand Qimḥi, with whom Delitzsch agrees, explains the form as *Pi'ēl*, with an irregular ֵ for ֶ, as in the reading אֶלְקָטָה Ru 2[2.7]; cf. § 10 *h*.

5. A few examples in which א, as middle radical, entirely loses its consonantal value and quiesces in a vowel, will be found in § 73 *g*.

§ 65. *Verbs Third Guttural*, e.g. שָׁלַח *to send*.[1]

1. According to § 22 *d*, when the last syllable has a vowel incom- *a* patible with the guttural (i.e. *not* an *a*-sound), two possibilities present themselves, viz. either the regular vowel *remains*, and the guttural then takes *furtive Pathaḥ*, or *Pathaḥ* (in pause *Qameṣ*) takes its place. More particularly it is to be remarked that—

(*a*) The unchangeable vowels ִ—, ֻ, וּ (§ 25 *b*) are always retained, even under such circumstances; hence *inf. abs. Qal* שָׁלוֹחַ, *part. pass.* שָׁלוּחַ, *Hiph.* הַשְׁלִיחַ, *imperf.* יַשְׁלִיחַ, *part.* מַשְׁלִיחַ. So also the less firm *ō* in the *inf. constr.* שְׁלֹחַ is almost always retained: cf., however, שְׁלַח, in close connexion with a substantive, Is 58[9], and נְוֹעַ Nu 20[3]. Examples of the *infinitive* with suffixes are בְּבָרְחֲךָ Gn 35[1]; בְּפִנְעוֹ Nu 35[19]; לִרְבָעָהּ Lv 18[23], &c.

(*b*) The *imperfect* and *imperative Qal* almost always have *ă* in the *b* second syllable, sometimes, no doubt, due simply to the influence of the guttural (for a tone-long *ō*, originally *ŭ*), but sometimes as being the original vowel, thus שְׁלַח, יִשְׁלַח, &c.; with suffixes שְׁלָחֵנִי, יִשְׁלָחֵנִי, see § 60 *c*.

[1] Verbs ל״ה in which the ה is *consonantal* obviously belong also to this class, e.g. גָּבַהּ *to be high*, תָּמַהּ *to be astonished*, מָהַהּ (only in *Hithpalpel*) *to delay*.

Exceptions, in the *imperfect* אסלוח Jer 5^{7}, *K^eth.* (אֶסְלַח *Q^erê*); in the *imperative* טְבַח Gn 43^{16}. On such cases as אֶפְשְׁעָה Is 27^{4}, cf. § 10 *h*.

c (c) Where *Ṣere* would be the regular vowel of the final syllable, both forms (with $\bar{e}^{a}$ and $\check{a}$) are sometimes in use; the choice of one or the other is decided by the special circumstances of the tone, i. e.:—

d Rem. 1. In the *absolute state* of the *participle Qal*, *Pi'ēl* and *Hithpa'ēl*, the forms שֹׁלֵחַ (with suff. שֹׁלְחִי, but שֹׁלַחְתָּ), מְשֻׁלָּחַ (with suff. מְשֻׁלַּחְתָּ), and מִשְׁתַּגֵּעַ are used exclusively; except in verbs ל״ע where we find, in close connexion, also נֹטַע ψ 94^{9}, רֹבַע Is 51^{15}, Jer 31^{35}, רֹקַע Is 42^{5}, 44^{24}, רוֹקַע ψ 136^{6}, שֹׁבַע Lv 11^{7}, all with the tone on the last syllable.—The part. Pu'al is מְרֻבָּע Ez 45^{2} according to the best authorities (Kittel מְרֻבָּע).

e 2. Similarly, in the *imperf.* and *inf. Niph'al*, and in the *perf. inf.* and *imperf. Pi'ēl* the (probably more original) form with *ă* commonly occurs in the body of the sentence, and the fuller form with $\bar{e}^{a}$ in *pause* (and even with the lesser distinctives, e.g. with *Dᵉḥi* ψ 86^{4} in the *imperative Pi'ēl*; with *Ṭiphḥa* 1 K 12^{32} in the *infinitive Pi'ēl*; Jer 4^{31} *imperfect Hithpa'ēl*; Jer 16^{6} *imperfect Niph'al*), cf. e.g. יִנָּגֵעַ Nu 27^{4}, with יִנָּגֵעַ 36^{3}; וַיִּשָּׁבַע Dt 1^{34}, even with retraction of the tone in the *inf. abs. Niph'al* הִשָּׁבַע Nu 30^{3} (elsewhere הִשָּׁבֵעַ Jer 7^{9}, 12^{16} twice, in each case without the pause); תְּבֻקַּע־ Hb 3^{9}, with תְּבֻקָּעַ Ez 13^{11}; בַּלַּע *to devour* Hb 1^{13}, Nu 4^{20} with בָּלַע La 2^{8}; for *infinitive Hithpa'ēl*, cf. Is 28^{20}. The *infinitive absolute Pi'ēl* has the form שַׁלֵּחַ Dt 22^{7}, 1 K 11^{22}; the *infinitive construct*, on the other hand, when without the pause is always as שַׁלַּח except לְשַׁלֵּחַ Ex 10^{4}.—יְזַבֵּחַ Hb 1^{16} has *ē*, though not in *pause*, and even וַיְזַבֵּחַ 2 K 16^{4}, 2 Ch 28^{4}; but *a* in *pause* in the *imperative Niph'al* הֵאָנֵחַ Ez 21^{11}; *jussive Pi'ēl* תְּאַחַר ψ 40^{18}; cf. § 52 *n*. An example of *ă* in the *imperative Pi'ēl* under the influence of a final ר is בַּתַּר־ Jb 36^{2}, in the *imperfect Niph'al* וְתֵעָצַר Nu 17^{13}, &c.—In יִבְּרַח Jb 14^{9} (cf. ψ 92^{14}, Pr 14^{11}), Barth (see above, § 63 *n*) finds an *i-imperfect* of *Qal*, since the intransitive meaning is only found in *Qal*.

f 3. In the 2nd *sing. masc.* of the *imperative*, and in the forms of the *jussive* and *imperfect consecutive* of *Hiph'il* which end in gutturals, *a* alone occurs, e.g. הַצְלַח *prosper thou*, יַבְטַח *let him make to trust*, וַיַּצְמַח *and he made to grow* (so in *Hithpalpel* יִתְמַהְמַהּ, &c., Hb 2^{3}); even in *pause* וַיַּצְלַח 1 Ch 29^{23}, and, with the best authorities, וַיּוֹכַח 1 Ch 12^{17}; וַיִּשְׁעֲךָ Is 35^{4} is perhaps to be emended into וְיִשַׁע (=וְיוֹשִׁיעַ).—In the *infinitive absolute Ṣere* remains, e.g. הַגְבֵּהַ *to make high*; as *infinitive construct* הוֹכַח also occurs in close connexion (Jb 6^{26}); on הוֹשַׁע as *infinitive construct* (1 S $25^{26.33}$), cf. § 53 *k*.

g **2.** When the guttural with *quiescent Šᵉwâ* stands at the end of a syllable, the ordinary strong form remains when not connected with suffixes, e. g. שָׁלַחְתִּי, שָׁלַחְתָּ. But in the 2nd *sing. fem. perfect* a *helping-Pathaḥ* takes the place of the *Šᵉwâ*, שָׁכַחַתְּ Jer 13^{25} (§ 28 *e*); also in 1 K 14^{3}, לָקַחַתְּ is to be read, not לָקַחְתְּ.

h Rem. The soft combination with *compound Šᵉwâ* occurs only in the 1st *plur. perfect* with suffixes, since in these forms the tone is thrown one place farther forward, e.g. יְדַעְנֻךָ *we know thee*, Ho 8^{2} (cf. Gn 26^{29}, ψ 44^{18}, 132^{6}). Before the *suffixes* ךָ and כֶם, the guttural must have ַ, e.g. אֶשְׁלָחֲךָ *I will send thee*, 1 S 16^{1}; וַאֲשַׁמְּעֲךָ Gn 31^{27}; אַשְׁמִיעֲךָ Jer 18^{2}.

On the weak verbs ל״א, see especially § 74.

II. The Weak Verb.[1]

§ 66. *Verbs Primae Radicalis Nûn* (פ״נ), e.g. נָגַשׁ *to approach*

Brockelmann, *Semit. Sprachwiss.*, p. 138 ff.; *Grundriss*, p. 595 ff.

The weakness of initial נ consists chiefly in its suffering *aphaeresis* *a* in the *infinitive construct* and *imperative* in some of these verbs (cf. § 19 *h*). On the other hand, the *assimilation* of the נ (see below) cannot properly be regarded as weakness, since the triliteral character of the stem is still preserved by the strengthening of the second consonant. The special points to be noticed are—

1. The *aphaeresis* of the Nûn (*a*) in the *infinitive construct*. This *b* occurs only (though not necessarily) in those verbs which have *a* in the second syllable of the *imperfect*. Thus from the stem נגשׁ, *imperfect* יִגַּשׁ, *infinitive* properly גַּשׁ, but always lengthened by the feminine termination ת to the segholate form גֶּשֶׁת[2]; with *suffix* גִּשְׁתּוֹ Gn 33[3]; with the concurrence of a guttural נָגַע *to touch*, imperfect יִגַּע, infinitive גַּעַת (also נְגֹעַ, see below); נָטַע *to plant*, infinitive טַעַת (also נְטֹעַ, see below); on the verb נָתַן *to give*, see especially *h* and *i*. On the other hand, *aphaeresis* does not take place in verbs which have *ō* in the *imperfect*, e.g. נָפַל *to fall*, imperfect יִפֹּל, infinitive נְפֹל, with *suffix* נָפְלוֹ, also נִפְלוֹ; לִנְהֹר Nu 6[2], &c.; cf., moreover, לִנְגֹּעַ Gn 20[6], &c., וּנְגֹעַ Ex 19[12] (even לִנְגּוֹעַ Jb 6[7]; cf. Jer 1[10]); with *suffix* בְּנָגְעוֹ Lv 15[23]. Also לִנְטֹעַ Is 51[16] (but לָטַעַת Ec 3[2]); נִישָׁא Is 1[14], 18[3]; with *suffix* בְּנָשְׂאִי ψ 28[2] (elsewhere שְׂאֵת, cf. § 74 *i* and § 76 *b*), לְנָשְׁקְ־ 2 S 20[9].

(*b*) In the *imperative*. Here the *Nûn* is always dropped in verbs *c* with *a* in the *imperfect*, e.g. נגשׁ, *imperative* גַּשׁ (more frequently with *paragogic ā*, גְּשָׁה; before *Maqqeph* also גְּשׁ־ Gn 19[9]), *plur.* גְּשׁוּ, &c. Parallel with these there are the curious forms with *ō*, גְּשִׁי Ru 2[14] (with *retarding* Metheg in the second syllable, and also *nasog 'aḥor*, according to § 29 *e*, before הַלָּם) and גְּשׁוּ Jos 3[9] (before הַגֶּה), 1 S 14[38] (before הַלֹּם) and 2 Ch 29[31]; in all these cases without the *pause*. With *Nûn* retained, as if in a strong verb, נָהַג *drive*, 2 K 4[24] (*imperfect* יְנַהֵג, without assimilation of the *Nûn*), וְנִטְעוּ 2 K 19[29], Is 37[30], Jer 29[5.28]; cf. also the verbs ל״ה, which are at the same time פ״נ; נְהֵה Ez 32[18], נְחֵה Ex 32[34], נְטֵה Ex 8[1], &c.; the verb ל״א, נְשָׂא ψ 10[12] (usually שָׂא); cf. § 76 *b*. But, as in the infinitive, the *aphaeresis* never takes place in verbs which have *ō* in the *imperfect*, e.g. נְצֹר, נְתֹן, &c.

---

[1] Cf. the summary, § 41.

[2] The law allowing the addition of the feminine termination to the unlengthened form, instead of a lengthening of the vowel, is suitably called by Barth 'the law of compensation' (*Nominalbildung*, p. xiii).

d 2. When, through the addition of a *preformative, Nûn* stands at the end of a syllable, it is readily assimilated to the second radical (§ 19 *c*); thus in the *imperfect Qal*,[1] e. g. יִפֹּל for *yinpōl, he will fall*; יִנַּשׁ for *yingaš*; יִתֵּן for *yintēn, he will give* (on this single example of an *imperfect* with original *i* in the second syllable, cf. *h*)[2]; also in the *perfect Niph'al* נִנַּשׁ for *ningaš*; throughout *Hiph'il* (הִנִּישׁ, &c.) and *Hoph'al* (which in these verbs always has *Qibbuṣ*, in a sharpened syllable, cf. § 9 *n*) הֻנַּשׁ.

The other forms are all quite regular, e. g. the *perfect, infinitive absolute* and *participle Qal*, all *Pi'ēl, Pu'al*, &c.

In Paradigm H, only those conjugations are given which differ from the regular form.

e The *characteristic* of these verbs in all forms with a preformative is *Dageš* following it in the second radical. Such forms, however, are also found in certain verbs פ״י (§ 71), and even in verbs ע״ע (§ 67). The *infinitive* נָּשֵׁת and the *imperative* גַּשׁ, also גֹּשׁ (Gn 19[9]) and תֵּן, resemble the corresponding forms of verbs פ״נ (§ 69).—On יִקַּח, קַח, and לָקַחַת, from לָקַח *to take*, see *g*.—In יְקוֹם (*imperfect Niph'al* of קוּם), and in similar forms of verbs ע״ו (§ 72), the *full* writing of the *ô* indicates, as a rule, that they are not to be regarded as *imperfects Qal* of נָקַם, &c.—Also אֶסְפֹּק (ψ 139[8]) is not to be derived from נסק, but stands for אֶסְלַק (with a sharpening of the ס as compensation for the loss of the ל), from סָלַק *to ascend*, see § 19 *f*, and Kautzsch, *Gramm. des Bibl.-Aram.*, § 44. Similarly the *Hiph'il*-forms הִשְׁיִקוּ Ez 39[9], יַשְׁיִק Is 44[15], and the Niph'al נִשְׁקָה ψ 78[21] are most probably from a stem שׁלק, not נשׁק.

f Rem. 1. The instances are comparatively few in which the forms retain their *Nûn* before a firm consonant, e. g. נָטַר, imperfect יִנְטֹר Jer 3[5] (elsewhere יִטֹּר); also from נָצַר the pausal form is *always* יִנְצֹר (without the *pause* יִצֹּר Pr 20[28]); similarly in Is 29[1], 58[3], ψ 61[8], 68[3] (where, however, תִּנָּדֵף is intended), 140[2.5], Pr 2[11], Jb 40[21], the retention of the *Nûn* is always connected with the *pause*. In *Niph'al* this never occurs (except in the irregular *inf.* כְּהִנָּהֵף ψ 68[3], cf. § 51 *k*), in *Hiph'il* and *Hoph'al* very seldom; e. g. לְהַנְחִיל Ez 22[20], הִנָּחֲקוּ Ju 20[31]; for לְנַגֵּף Nu 5[22] read לְנָגֵף, according to § 53 *q*. On the other hand, the *Nûn* is regularly retained in all verbs, of which the second radical is a guttural, e. g. יִנְחַל *he will possess*, although there are rare cases like יֶחֱת (also יִנְחַת) *he will descend*, Jer 21[13] (even תֶּחֱתֵּי Pr 17[10]; without apparent reason accented as *Mil'ēl*), *plur.* יֶחֱתוּ Jb 21[13] (cf. § 20 *i*; the Masora, however, probably regards יֶחֱת and יֶחֱתוּ as *imperfect Niph'al* from חָתַת); *Niph'al* נִחַם for נִנְחַם *he has grieved*.

g 2. The ל of לָקַח *to take* is treated like the *Nûn* of verbs פ״נ (§ 19 *d*). Hence *imperfect Qal* יִקַּח, cohortative (§ 20 *m*) אֶקְחָה, *imperative* קַח, in *pause* and

[1] Cf. Mayer Lambert, 'Le futur qal des verbes פ״ו, פ״ן, פ״א,' in the *REJ.* xxvii. 136 ff.

[2] An imperfect in *a* (יִגַּשׁ) is given in the Paradigm, simply because it is the actual form in use in this verb.

before *suffixes* קָח (on קָחֶם־נָא Gn 48[9], see § 61 *g*), *paragogic* form קָחָה; יִקְחִי, &c. (but cf. also לִקַּח Ex 29[1], Ez 37[16], Pr 20[16], לִקְחִי 1 K 17[11], perhaps a mistake for לָהּ קְחִי, cf. LXX and Lucian); *infinitive construct* קַחַת (once קָחַת 2 K 12[9], cf. § 93 *h*); with לְ, לָקַחַת; with *suffix* קַחְתִּי; *Hoph'al* (cf., however, § 53 *u*) *imperfect* יֻקַּח; *Niph'al*, however, is always נִלְקַח.—The meaningless form קָח Ez 17[5] is a mistake; for the equally meaningless קָחֵם Ho 11[3] read וָאֶקָּחֵם.

h 3. The verb נָתַן *to give*, mentioned above in *d*, is the only example of a verb פ״ן with *imperfect* in *ē* (יִתֵּן for *yintēn*; נְתַן־[1] only in Ju 16[5], elsewhere before *Maqqeph* תֵּן־, &c.), and a corresponding *imperative* תֵּן or (very frequently) תְּנָה (but in ψ 8[2] the very strange reading תְּנָה is no doubt simply meant by the Masora to suggest נְתָנָה); before *Maqqeph* תֶּן־, *fem.* תְּנִי, &c. Moreover, this very common verb has the peculiarity that its final *Nûn*, as a weak nasal, is also assimilated; נָתַתִּי for *nāthāntī*, נָתַתָּ or, very frequently, נָתַתָּה, with a kind of orthographic compensation for the assimilated *Nûn* (cf. § 44 *g*); *Niph'al perfect* נִתַּתֶּם Lv 26[25], Ezr 9[7].

i In the *infinitive construct Qal* the ground-form *tint* is not lengthened to *tèneth* (as גֶּנֶשׁ from גָּנַשׁ), but contracted to *titt*, which is then correctly lengthened to תֵּת, with the omission of *Dageš forte* in the final consonant, see § 20 *l*; but with suffixes תִּתִּי, תִּתּוֹ, &c.; before *Maqqeph* with the prefix לְ = לָתֶת־, e. g. Ex 5[21], and even when closely connected by other means, e. g. Gn 15[7]. However, the strong formation of the *infinitive construct* also occurs in נְתָן Nu 20[21] and נְתָן־ Gn 38[9]; cf. § 69 *m*, note 2. On the other hand, for לָתֵת 1 K 6[19] read either לָתֶתּוֹ or simply לָתֶת, just as the *Qᵉrê*, 1 K 17[14], requires תֵּת for תתן.

k In other stems, the נ is retained as the third radical, e. g. שָׁכַנְתִּי, זָקַנְתִּי, cf. § 19 *c* and § 44 *o*. On the entirely anomalous aphaeresis of the *Nûn* with a strong vowel in תַּתָּה (for נָתַתָּ) 2 S 22[41], cf. § 19 *i*.—On the *passive imperfect* יִתַּן, cf. § 53 *u*.

§ 67. *Verbs* ע״ע, e. g. סָבַב *to surround.*

Brockelmann, *Semit. Sprachwiss.*, p. 155 ff.; *Grundriss*, p. 632 ff.

a **1.** A large number of Semitic stems have verbal forms with only two radicals, as well as forms in which the stem has been made triliteral by a *repetition of the second radical*, hence called verbs ע״ע. Forms with two radicals were formerly explained as being due to contraction from original forms with three radicals. It is more correct

[1] P. Haupt on Ju 16[5] in his Bible, compares the form of the Assyrian imperfect *iddan* or *ittan* (besides *inâdin*, *inamdin*) from *nadânu* = נתן. But could this one passage be the only trace left in Hebrew of an imperf. in *a* from נתן?

to regard them as representing the original stem (with two radicals), and the forms with the second radical repeated as subsequently developed from the monosyllabic stem.[1] The appearance of a general contraction of triliteral stems is due to the fact that in biliteral forms the second radical regularly receives *Dageš forte* before afformatives, except in the cases noted in § 22 *b* and *q*. This points, however, not to an actual doubling, but merely to a strengthening of the consonant, giving more body to the monosyllabic stem, and making it approximate more to the character of triliteral forms.

The development of biliteral to triliteral stems (ע״ע) generally takes place in the 3rd *sing. masc.* and *fem.* and 3rd *plur. perfect Qal* of *transitive* verbs, or at any rate of verbs expressing an activity, e. g. סָבַב, סָבְבָה, סָבְבוּ : חָנַן Gn 33[5] (but with suffix חַנֵּנִי, ver. 11); sometimes with an evident distinction between transitive and intransitive forms, as צָרַר *to make strait*, צַר *to be in a strait*; see further details, including the exceptions, in *aa*. The development of the stem takes place (*a*) necessarily whenever the strengthening of the 2nd radical is required by the character of the form (e. g. חִלֵּל, שִׁבֵּר), and (*b*) as a rule, whenever the 2nd radical is followed or preceded by an essentially long vowel, as, in Qal, סָבוֹב, סָבוּב, in Pô'ēl and Pô'al, סוֹבֵב, סוֹבַב.

b **2.** The biliteral stem always (except in *Hiphʿîl* and the *imperfect Niphʿal*, see below) takes the vowel which would have been required between the *second* and *third* radical of the ordinary strong form, or which stood in the ground-form, since that vowel is characteristic of the form (§ 43 *b*), e. g. תַּם answering to קָטֹל, תַּמָּה to the ground-form *qāṭălă*, תַּמּוּ to the ground-form *qāṭălû*; *infinitive*, סֹב to קְטֹל.

c **3.** The insertion of *Dageš forte* (mentioned under *a*), for the purpose of strengthening the second radical, never takes place (see § 20 *l*) in the final consonant of the word, e. g. תַּם, סֹב, not תַּמּ, סֹבּ; but it appears again on the addition of afformatives or suffixes, e. g. תַּמּוּ, סַבּוּנִי, &c.

d **4.** When the afformative begins with a consonant (נ, ת), and hence the strongly pronounced second radical would properly come at the end of a closed syllable, a *separating vowel* is inserted between the stem-syllable and the afformative. In the *perfect* this vowel is ֹ, in the *imperative* and *imperfect* ־ֶ, e. g. סַבּוֹתָ, סַבּוֹנוּ, *imperfect* תְּסֻבֶּינָה (for *sabb-tā*, *sabb-nû*, *tasōbb-nā*). The artificial opening of the syllable

[1] So (partly following Ewald and Böttcher) A. Müller, *ZDMG.* xxxiii. p. 698 ff.; Stade, *Lehrbuch*, § 385 *b*, *c*; Nöldeke, and more recently Wellhausen, 'Ueber einige Arten schwacher Verba im Hebr.' (*Skizzen u. Vorarb.* vi. 250 ff.). Against Böttcher see M. Lambert, *REJ.* xxxv. 330 ff., and Brockelmann, as above.

by this means is merely intended to make the strengthening of the second radical audible.[1]

The *perfect* תַּמְנוּ (for תַּמַּנּוּ) Nu 17^{28}, ψ 64^{7} (Jer 44^{18} תָּמְנוּ with *Silluq*), owing *e* to omission of the separating vowel, approximates, if the text is right, to the form of verbs ע״ו (cf. קָמְנוּ from קוּם).

5. Since the preformatives of the *imperfect Qal*, of the *perfect* *f* *Niph'al*, and of *Hiph'il* and *Hoph'al* throughout, before a monosyllabic stem form an open syllable, they take a *long* vowel before the tone (according to § 27 *e*), e.g. *imperfect Hiph'il* יָסֵב for *yă-sēb*, *imperative* הָסֵב for *hă-sēb*, &c. Where the preformatives in the strong verb have *ĭ*, either the original *ă* (from which the *ĭ* was attenuated) is retained and lengthened, e.g. יָסֹב in *imperfect Qal* for *yă-sōb*, or the *ĭ* itself is lengthened to *ē*, e.g. הֵסֵב *perfect Hiph'il* for *hĭ-sēb* (see further under *h*). The vowel thus lengthened can be maintained, however, only before the tone (except the *û* of the *Hoph'al*, הוּסַב for *hŭ-săb*); when the tone is thrown forward it becomes *Šᵉwâ*, according to § 27 *k* (under א and ה *compound Šᵉwâ*), e.g. תְּסֹב, but תְּסֻבֶּינָה; *imperfect Hiph'il* תָּסֵב, but תְּסֵבֶּינָה; *perfect* הֲסִבֹּתִי, &c.

Besides the ordinary form of the imperfects, there is another (common in *g* *Aramaic*), in which the *imperfect Qal* is pronounced יִסַּב or יִסָּב, the *first* radical, not the second, being strengthened by *Dageš forte*, cf. יִשַּׁם 1 K 9^{8}, וַיִּקַּד Gn 24^{26}; with *a* in the second syllable, יִגַּר Lv 11^{7}, יִהַל Is 17^{4}, וַיִּשַּׁח Is 2^{9}, &c., יִהַם Am 5^{13} and frequently, וְאֶכַּת Dt 9^{21}, &c., יִסַּב (*turn* intrans.) 1 S 5^{8}, &c., וַיִּקַּב Lv 24^{11}, יִהַם Ez 47^{12}, &c., יִחַם (with *Dageš forte implicitum*) 1 K 1^{1}; in the plural, יְתַּמּוּ Nu 14^{35}, &c. (in pause יְתַמּוּ ψ 102^{28}); perhaps also יִמַּל, יִמַּךְ (unless these forms are rather to be referred to *Niph'al*, like יִמָּחוּ 1 S 2^{9}; יִמָּלוּ Jb 24^{24}); with suffix תִּקְּבֵנוּ occurs (cf. § 10 *h*) in Nu 23^{25}; *Imperfect Hiph'il* יַחֵם, *Hoph'al* יָבֵת, &c. The vowel of the preformative (which before *Dageš* is, of course, short) follows the analogy of the ordinary strong form (cf. also *u* and *y*). The same method is then extended to forms with afformatives or suffixes, so that even before these additions the second radical is not strengthened, e.g. וַיִּקְדֹּד Gn 43^{28}, &c., for וַיִּקֹּדוּ *and they bowed the head*; וַיִּכְתוּ *and they beat down*, Dt 1^{44} (from כָּתַת); וַיִּתְמוּ Dt 32^{8}; יְדִמּוּ Ex 15^{16}, Jb 29^{21} (cf., however, וַיִּסַּבּוּ Ju 18^{23}, 1 S 5^{8}, יִבַּתוּ Jer 46^{5}, Jb 4^{20}). To the same class of apparently strong formations belongs תְּצַלְּנָה (without the separating vowel, for תְּצִלֶּינָה, cf. 1 S 3^{11} and below, *p*) *they shall tingle*, 2 K 21^{12}, Jer 19^{3}.—On the various forms of the *Niph'al*, see under *t*.

[1] Of all the explanations of these separating vowels the most satisfactory is that of Rödiger, who, both for the *perfect* and *imperfect* (Ewald and Stade, for the *imperfect* at least), points to the analogy of verbs ל״ה. We must, however, regard סַבּוֹתָ as formed on the analogy not of גָּלִיתָ, but (with P. Haupt) of a form גָּלּוֹתָ (=*gālautā*, cf. Arab. *ǵazauta*), while תְּסֻבֶּינָה follows the analogy of תְּגֻלֶּינָה. [See also Wright, *Comp. Gr.*, 229 f.]

h **6.** The original vowel is retained, see *f*, (*a*) in the preformative of the *imperfect Qal* יָסֹב for *yă-sōb* (cf. §§ 47 *b*, 63 *b*, and for verbs ע״ו § 72); (*b*) in the *perfect Niph'al* נָסַב for *nă-săb* (§ 51 *a*); (*c*) in *Hoph'al* הוּסַב, with irregular lengthening (no doubt on the analogy of verbs פ״ו) for *hōsāb* from *hŭ-sab*, imperfect יוּסַב from *yŭ-sab*, &c.

i On the other hand, an already attenuated vowel (*i*) underlies the intransitive *imperfects Qal* with *ă* in the second syllable (probably for the sake of dissimilating the two vowels), e. g. יָמַר for *yĭ-măr* (see *p*); and in the preformative of *Hiph'îl* הֵסֵב from *hĭ-sēb* (ground-form הַקְטֵל, § 53 *a*), as well as of the participle מֵסֵב (ground-form מַקְטֵל), on the analogy of the perfect. In the second syllable of the Perf. the underlying vowel is *ĭ*, attenuated from an original *ă*, which in the strong verb is abnormally lengthened to *î* (§ 53 *a*). The *ē* lengthened from *ĭ* is, of course, only tone-long, and hence when without the tone and before *Dageš forte* we have e. g. הֲסִבֹּתָ. On the retention of the original *ă* in the second syllable, cf. *v*.

k **7.** The *tone*, as a general rule, tends to keep to the stem-syllable, and does not (as in the strong verb) pass to the afformatives הָ֫, וּ and ִי (2nd *sing. fem. imperfect*); e. g. 3rd *sing. fem. perfect* חַתָּה, in *pause* חָתָה; with ר and gutturals מָרָה (for מַרָּה), שָׁחָה ψ 44[26]; on the other hand, with *wāw consecutive* וְרַבָּה Is 6[12] (but וְחָיְתָה Ex 1[16]). In the 3rd *plur. perfect* the tone-syllable varies; along with דָּלְלוּ, קָלְלוּ, we also find דָּלְלוּ and קָלְלוּ, רַבּוּ Is 59[12], שָׁחֲחוּ Hb 3[6], &c.; but in *pause* always חָתְמוּ, חָתַמוּ, &c. The tone likewise remains on the stem-syllable in the *imperfect Qal* in תִּסֹּבִי, יָסֹבּוּ; *perfect Hiph'îl* הֵסֵבּוּ, הֵסֵבָּה; *imperfect* תְּסֵבִּי, יָסֵבּוּ, &c. In the forms with separating vowels, the tone is moved forward to these vowels (or to the final syllable, cf. *ee*), e. g. סַבּוֹתָ, תְּסֻבֶּינָה, &c.; except before the endings תֶּם and תֶּן in the *perfect*, which always bear the tone. This shifting of the tone naturally causes the shortening of the merely tone-long vowels *ē* and *ō* to *ĭ* and *ŭ* (or *ŏ*, see *n*), hence הֲסִבּוֹתָ from הֵסֵב, תְּסֻבֶּינָה from יָסֹב; on cases in which the vowel of the preformative becomes *Šᵉwâ*, see above, *f*.

l **8.** In several verbs ע״ע, instead of *Pi'ēl*, *Pu'al* and *Hithpa'ēl*, the less frequent conjugation *Pō'ēl*, with its passive and reflexive, occurs (most probably on the analogy of the corresponding forms of verbs ע״ו, cf. § 72 *m*), generally with the same meaning,[1] e. g. עוֹלֵל *to ill-treat*, passive עוֹלַל, reflexive הִתְעוֹלֵל (from עָלַל; cf. the *Hithpō'ēl* from רָעַע

[1] Sometimes both *Pi'ēl* and *Pō'ēl* are formed from the same stem, though with a difference of meaning, e. g. רִצֵּץ *to break in pieces*, רוֹצֵץ *to oppress*; חִנֵּן *to make pleasing*, חוֹנֵן *to have pity*; סִבֵּב *to turn, to change*, סוֹבֵב *to go round, to encompass*.

and פַּרַר Is $24^{19\,f.}$); in a few verbs also *Pilpēl* (§ 55 *f*) is found, e. g. גִּלְגֵּל *to roll, Hithpalpēl* הִתְגַּלְגֵּל *to roll oneself* (from גָּלַל); imperative with suffix סַלְסְלֶהָ *exalt her*, Pr 4^{8}; שַׁעֲשַׁע *to comfort, to delight in*; passive שֹׁעֲשַׁע *to be caressed* (from שָׁעַע). These forms cannot appear in a biliteral form any more than *Pi'ēl*, *Pu'al*, and *Hithpa'ēl*; cf. עִוְעִים (Is 19^{14}) and קִוְקוֹ (Is $18^{2,7}$).—For תִּתְבָּר 2 S 22^{27} read, according to ψ 18^{27}, תִּתְבָּרַר.

Remarks.

I. *On Qal.*

m 1. In the *perfect*, isolated examples are found with *ō* in the first syllable, which it is customary to refer to triliteral stems with middle *ō* (like יָכֹל, § 43 *a*); viz. רֹמּוּ *they are exalted*, Jb 24^{24} to רָמּוּ; רֹבּוּ *they shot*, Gn 49^{23} to רָבַב; זֹרוּ Is 1^{6} to זָרַר. But this explanation is very doubtful: זֹרוּ especially is rather to be classed among the passives of Qal mentioned in § 52 *e*.

n 2. *Imperfects Qal* with *ō* in the second syllable keep the original *a* in the preformative, but lengthen it to *ā*, as being in an open syllable, hence יָחֹן, יָמוֹד, יָעוֹ, יָרֹן, יָרֹעַ (trans. *he breaks in pieces*, but יָרַע intrans. = *he is evil*); imperfects with *ă* have, in the preformative, an *ē*, lengthened from *ĭ*. See the examples below, under *p*, § 63 *c* and *e*, § 72 *h*, and specially Barth in *ZDMG.* 1894, p. 5 f.

The *Hōlĕm* of the *infinitive*, *imperative*, and *imperfect* (יִסֹּב, סֹב) is only tone-long, and therefore, as a rule, is written defectively (with a few exceptions, chiefly in the later orthography, e. g. צוֹר *bind up*, Is 8^{16}; גּוֹל ψ 37^{5}; דּוֹם ver. 7; לָבוֹז for לָבֹז *to plunder*, Est 3^{13}, 8^{11}). When this *ō* loses the tone, it becomes in the final syllable *ŏ*, in a sharpened syllable *ŭ*, or not infrequently even *ŏ* (see above, *k*). Examples of *ŏ* are: (*a*) in a toneless final syllable, i. e. before *Maqqeph* or in the *imperfect consecutive*, רָנֹּ (*rŏn*) *to rejoice*, Jb 38^{7}; וַיָּכָב Ju 11^{18} (once even with *ŭ* in a toneless final syllable, וַיָּרֻם Ex 16^{21}); on the other hand, in the *plur.* וַיָּסֹבּוּ, *fem.* וַתְּסֹבֶּינָה; (*b*) before a tone-bearing *affromative* or *suffix*, e. g. *imperative 2nd sing. fem.* רָנִּי, גְּוִי (cf. *ff*); חָנֵּנִי *pity me*; סָלְלוּהָ Jer 50^{26}; יְשֻׁרֵם Pr 11^{3} *Qerē*; הַחֲנֻהוּ Ex 12^{14} (for the defective writing, cf. יִסַּבֶּהוּ Jb 40^{22}). In יְחֹנְךָ Gn 43^{29}, Is 30^{19} (for יְחָנֶךָּ) this *ŏ* is thrown back to the preformative.

o On the 2nd plur. fem. imperat. עֹרֶינָה *make yourselves naked* Is 32^{11}, cf. the analogous forms in § 48 *i*.—Quite abnormal is the *infinitive absolute* רֹעַ Is 24^{19} (as ה follows, probably only a case of dittography for רֹעַ, cf. קֹב Nu 23^{25} and שֹׁל Ru 2^{16}); so also are the *imperatives* קָבָה־לִי Nu $22^{11.17}$, and אָרָה־לִי 22^{6}, 23^{7}, with ה *paragogic*. We should expect אָרֹה, קָבֹה. If these forms are to be read *qŭballi*, *'ŏralli*, they would be analogous to such cases as מְרֻבָּרָה (§ 90 *i*), the addition of the *paragogic* ה causing no change in the form of the word (קָבֹ־ like רָנֹ־ above). If, however, as Jewish tradition requires, they are to be read *qāballi*, *'āralli*, then in both cases the *Qameṣ* must be explained, with

Stade, as the equivalent of *ō* (קְלָבֵה־לִי, &c.; cf. § 9 *v*). Still more surprising is קָבְנוֹ *curse him*, Nu 23[13], for קַבֵּנוּ or קְבֹ׳.[1]

p 3. Examples with *Pathaḥ* in the *infinitive*, *imperative*, and *imperfect* are בַּר (in לְבָרֵם *to prove them*, Ec 3[18]); רַד Is 45[1]; שַׁגּ Jer 5[26]; בְּשַׁגָּם *in their error*, Gn 6[3] (so ed. Mant., but there is also good authority for בְּשַׁגַּם, from שַׁגּ = שַׁגָּה and גַּם *also*; so Baer and Ginsburg). Also גַּל *take away*, ψ 119[22]; and the *imperfects* יַחַם *it is hot*, Dt 19[6], &c. (on the *ē* of the preformative cf. *n*); יַמַר *it is bitter*, Is 24[9]; יַצַר *it is straitened*; יַרַךְ *it is soft*, Is 7[4]; תִּשַׁם *it is desolate*, Ez 12[19] (in *pause* תִּשָּׁם Gn 47[19]); וַתִּקַל *she was despised*, Gn 16[4] (but elsewhere in the *impf. consec.* with the tone on the penultima, e.g. וַיֵּצֶר Gn 32[8], &c.; וַיֵּרַע Gn 21[11], &c., cf. Ez 19[7]); in the 1st *sing. imperfect* אֵיתָם[2] ψ 19[14], abnormally written fully for אֶתָּם, unless אֶתָּם is to be read, as in some MSS., on the analogy of the 3rd sing. יְהֹם.—In the *impf. Qal* of שׁלל the reading of Hb 2[8] varies between יְשַׁלּוּךָ (Baer, Ginsb.) and יְשֹׁלְלוּךָ (ed. Mant., Jabl.).—The following forms are to be explained with Barth (*ZDMG.* xliii. p. 178) as imperfects Qal with original *ĭ* in the second syllable, there being no instances of their Hiph'il in the same sense: וַיַּגֶל Gn 29[10]; יָנֶן Is 31[5], &c.; וְיָסֶךְ Ex 4c[21], ψ 91[4], &c.; perhaps also תְּצַלֶּינָה 1 S 3[11] and יְהַל Jb 31[26], &c.; in accordance with this last form, (בְּ)הִלּוֹ Jb 29[3] would also be an *infinitive Qal*, not Hiph'il (for בְּהָהֲלוֹ), as formerly explained below, under *w*. Finally the very peculiar form וַתָּרִין Ju 9[53] may probably be added to the list.

q Imperfects, with an original *u* in the second syllable, are also found with this *ū* lengthened to *û* (instead of *ō*), e.g. יָרוּן, if the text is correct, in Pr 29[6]; יְשׁוּד ψ 91[6] (unless it be simply an imperfect from שׁוּד *to be powerful, to prevail*); יָרוּץ (if from רצץ) Is 42[4], &c. (also defectively אָרִץ ψ 18[30]; but in Ec 12[6], according to Baer, וְתָרוּץ); תְּתֻם Ez 24[11] (on the sharpening of the ת cf. *g* above).[3]

r A similar analogy with verbs ע״ו is seen in the infinitives לָבוּר (for בַּר) Ec 9[1]; בְּחָקוֹ Pr 8[27] (cf. בְּחָקוֹ Pr 8[29]) for בְּחֻקּוֹ, and in the *imperfect* אֲמֻשָׁךְ Gn 27[21]. (The forms חֲנוֹת in ψ 77[10], שַׁמּוֹת Ez 36[3], חֲלוֹתִי ψ 77[11], formerly treated here as infinitives from ע״ע stems, are rather to be referred to ל״ה stems, with Barth, *Wurzeluntersuchungen*, Lpz. 1902, p. 21.) On other similar cases, see below, under *ee*. For examples of the *aramaïzing imperfect*, see above, *g*.

s 4. In the *participle*, the aramaïzing form שְׁאַסַּיְךָ for שְׁסַסְּיְךָ occurs in K*ethibh*, Jer 30[16] (the *Qerê* indicates a *participle* from שָׁסָה); רֹעָה Pr 25[19] appears to be a contraction from רֹעֲעָה, *part. fem. = breaking in pieces*.

---

[1] For נוֹ as suffix of the 3rd person a parallel might be found in יְשֵׁנוֹ, § 100 *o*, and probably also in the *Nûn* of the Phoenician suffix נם: cf. Barth, *ZDMG.* xli. p. 643, and the note on § 100 *o*.

[2] Also in Ez 6[6], instead of תִּישַׁמְנָה, which could only come from יָשַׁם, תִּישׁ׳ is intended, and יֶאְשְׁמוּ in the same verse is probably only an error for יִשַּׁמּוּ.

[3] According to Stade, *Grammatik*, § 95, Rem., the pronunciation with *û*, since it also appears in Neo-Punic [and in Western Syriac, see Nöldeke, *Syr. Gramm.*, § 48], was that of everyday life.

II. *On Niph'al.*

t 5. Besides the ordinary form of the *perfect* נָסַב with *Pathaḥ* (in *pause* נָסָב) and the *participle* נָסָב with *Qameṣ* in the second syllable, there is also another with *Ṣere*, and a third with *Ḥolem*, e.g. *perfect* נָמֵס *it melts*, Ez 21[12], 22[15]; נָקֵל (for נָסַבָּה) Ez 26[2]; *part.* נָמֵס *molten*, 1 S 15[9], Na 2[11]; נָקֵל *it is a light thing*, 2 K 20[10], Is 49[6] (*perf.* נָקַל); with *ō*, e.g. נָגֹלּוּ *they are rolled together*, Is 34[4]; cf. 63[19], 64[2], Am 3[11], Na 1[12], Ec 12[6*b*]. In the *imperfect* with *ō* in the second syllable, on the analogy of verbs ע״ו (from which König would also explain the *perfects* with *ō*), we find תִּדֹּמִי *thou shalt be brought to silence*, Jer 48[2] (unless this form should be referred to *Qal* with Qimḥi, Olshausen, König); יֵרוֹעַ *he suffers hurt*, Pr 11[15], 13[20]; תֵּרוֹן (for *tirrōṣ*) Ez 29[7]; with *ē* in the second syllable תֵּחֵל *she profanes herself*, Lv 21[9], but וְאֶחַל Ez 22[26], and יֵחֵל Is 48[11], יֵחַת Is 7[8], &c. For *infinitives*, cf. הֵמֵס *to melt*, *ψ* 68[3] (as *inf. constr.*; 2 S 17[10] as *inf. absol.*); again, with compensatory lengthening in the first syllable, הָחֵל Ez 20[9], 14[22], but with suffix הָחֳלוֹ Lv 21[4]; also הָבוֹז *to be plundered*, and הָבוֹק *to be emptied*, Is 24[3]; in the *imperative*, only הֵבָּרוּ *be ye clean*, Is 52[11]. On הֵרֹמּוּ *get you up*, Nu 17[10], and the corresponding *imperf.* יֵרֹמּוּ Ez 10[17], &c., cf. 72 *dd*.

u Examples of the *perfect Niph'al* with sharpening of the initial syllable are, נֶחַל *it is profaned*, Ez 22[16], 25[3] (from חָלַל); נֶחַר (from חָרַר) *ψ* 69[4], 102[4] (also נָחַר Jer 6[29]); נֶחַת *fractus est* (from חָתַת) Mal 2[5]; cf. with this in the *participle*, נֶחָמִים (for *niḥḥāmim*) Is 57[5], and נֵאָרִים Mal 3[9]: in the *imperative* and *infinitive Niph'al* such a virtual strengthening of the guttural after preformatives never occurs.—The occurrence of *u* instead of *ô* as a separating vowel in the *perfect* נְשֹׁדֵנוּ Mic 2[4] is abnormal.

III. *On Hiph'il and Hoph'al.*

v 6. The second syllable in *Hiph'il* sometimes has *Pathaḥ* instead of *Ṣere*, especially under the influence of ר and the gutturals, e.g. *perfect* הֶמַר *he made bitter*, הֶשַׁח *he bowed*, הֶפַר *he hath broken*, Gn 17[14], in *pause*, cf. § 29 *q*; otherwise הֵפֵר, *plur.* הֵפֵרוּ Is 24[5]. In הֵפִיר *ψ* 33[10], Ez 17[19], cf. *ψ* 89[34], and in הֶשְׁיִרוּ Ho 8[4] (perhaps also in יְחִיתֵן Hab 2[17], but cf. § 20 *n*) there is an assimilation to the corresponding forms of verbs ע״ע, see *z*. Also הֶצַר Dt 28[52], הֶחַז (in *pause*) Is 18[5]; *inf.* לְהֶבַר *to cleanse*, Jer 4[11], in *pause*. But also with other consonants, e.g. הֶרַק 2 K 23[15], הֶקַל Is 8[23]; הֶרַךְ Jb 23[16]; *plur.* הֶסַבּוּ 1 S 5[9.10] (and so usually in the 3rd *plur. perf*, except before ר and gutturals, e.g. הֶרֵעוּ); *imper.* הָשֵׁע *besmear*, Is 6[10]; *plur.* הָשֵׁמּוּ *be astonished*, Jb 21[5]; *imperfect* תָּרַע *Thou dost afflict*; *part.* מֶצַל (on *ē* in the first syllable, see under *i*) *shadowing*, Ez 31[3] (but מֵסִיךְ Ju 3[24] is assimilated to the form of verbs ע״ו, unless, with Moore, we simply read מֵסֵךְ, or, with incorrect spelling, מֵסִיךְ. So in the *imperative* הֲמִישֵׁנִי Ju 16[26] *Qerê*, and in the *infinitive* הֲחִמֵךְ Is 33[1]).

w The *ē* of the second syllable, when without the tone, may become *ĕ*, e.g. חֲלֵל בִּי Gn 31[7] (see also *x*). It is unusual (cf. § 53 *k*) to find the *ē* written fully as in the *infinitive* לְהֵפֵיר Zc 11[10]. Instead of *Ḥaṭeph-Pathaḥ* a *Ḥaṭeph-*

Sᵉghôl is found under the preformative in הֶקְלַתָּנִי 2 S 19[44], and a *Pathaḥ* occurs before ח (with a virtual sharpening of the ח) in such forms as הַחְתֹּתָ Is 9[3]; cf. Gn 11[6], Dt 2[31], 3[24], 1 S 22[15], Est 6[13]—in all these cases before ח.—On בְּהִלּוֹ Jb 29[3], see above, *p*: on וְהַחְתַּתִּי Jer 49[37], see below, *dd*.

x 7. In the *imperfect consecutive* of verbs whose second radical is a guttural, *ă* is retained (§ 22 *d*) in the second syllable instead of *ĕ*, e.g. וַיִּרַע 1 K 16[25]: so also with ר, as וַיִּצַר 2 Ch 28[20], Dt 2[9]—but cf. also וַיִּפַּר Neh 4[9].

y 8. Aramaïzing forms (but cf. Rem. : § 67 *g*) in *Hiph'il* and *Hoph'al* are, וַיַּסֵּב Ex 13[18], &c.; cf. Ju. 18[23]; אַל־תַּמֵּר Ex 23[21], but read אַל־תָּמֶר from מָרָה: וַיַּכְּתוּ Dt 1[44] (cf. Nu 14[45]), but וַיַּסֵּבוּ Ju 18[23], 1 S 5[8], 2 Ch 29[6]; אַחֵל *profanabo*, Ez 39[7]; תַּחֵם Jb 22[3]; without elision of the ה (cf. § 53 *q*), וַיְהַתֵּל 1 K 18[27], but Jer 9[4] יְהַתֵּלוּ, Jb 13[9] תְּהַתֵּלוּ; with *î* in the second syllable יְשִׁים Jer 49[20], 50[45]; cf. וַנְּשִׁים Nu 21[30]; in the *perfect* הִוֵּילוּהָ La 1[8]. In *Hoph'al*, הָמְּכוּ *they are brought low*, Jb 24[24]; יֻכַּת *he is smitten*, Is 24[12] (*plur.* יֻכַּתּוּ Jer 46[5], Mi 1[7]); in *pause*, יֻחְקוּ Jb 19[23], but also יֻכַּתּוּ Jb 4[20] (so Baer, Ginsb., but ed. Mant., Jabl. יֻכֻּהוּ); with *ŏ* in the initial syllable, הָשַּׁמָּה (*infinitive* with *suffix* = הָשַּׁמָּתָה, cf. § 91 *e*) Lv 26[34 f.], cf. 2 Ch 36[21]; בָּהְשַּׁמָּה, with irregular syncope for בְּהָשַּׁמָּה, Lv 26[43].

IV. *In General.*

≈ 9. Verbs ע״ע are most closely related as regards inflexion to verbs ע״ו (§ 72). The form of verbs ע״ע is generally the shorter (cf. e.g. יָסֹב and יָקוּם, הֵסֵב and הֵקִים); in a few cases, however, the two classes exactly coincide, e.g. in the *imperfect Qal* and *Hiph'il* with *wāw consecutive*, in *Hoph'al* and in the less common conjugations (see above, *l*).

aa 10. The developed forms (with three radicals), as mentioned in *a*, are especially frequent in the 3rd *sing. masc.* and *fem.*, and the 3rd *plur. perf. Qal* (i.e. in forms without an afformative or with an afformative beginning with a vowel) of transitive verbs, or verbs, at any rate, expressing action, e.g. סָבַב, סָבְבוּ (but before a suffix also סִבַּנִי, סִבְּבוּנִי, שִׁנַּנִי, שִׁנְּנוּנִי, &c.); זָמַם, זָמְמָה, אָפַף, אָפְפוּ, &c. Sometimes the contracted, *as well as* the uncontracted form, is found, e.g. בָּזַז *to plunder*, *plur.* בָּזְזוּ; in other parts, only בָּזֹזְנוּ Dt 2[35], as well as בַּזּוֹנוּ Dt 3[7]; זָמַמְתִּי Zc 8[14.15] and זַמּוֹתִי Jer 4[28]. Other examples of biliteral forms in 2nd *sing. masc.* are Dt 25[12], Pr 30[32]; in 1st *sing.*, Jos 5[9]. Apart from Qal the only example of a developed form is וְהַחְתַּתִּי Jer 49[37].

bb On the other hand, the biliteral forms are the more common in the 3rd *sing.* and *plur.* of perfects which are *intransitive*, and express a state; cf. דַּק Dt 9[21] (Ex 32[20] דָּק; elsewhere always a transitive verb); חַת, *fem.* חַתָּה; מַר, *fem.* מָרָה (for *marrā*); צַר, *fem.* צָרָה (cf. וְתָרָה Ez 24[11]); רַךְ, שַׁח, *fem.* שַׁחָה, תַּם, &c.; *plur.* חַתּוּ, תַּמּוּ, &c. (but on the tone, cf. *ee* below). Exception, עָשְׁשָׁה ψ 6[8].

cc The intransitive but developed perfects הָלַלוּ (also הֹלּוּ), חָלַל, נָדְדָה, נָדְדוּ, (in *pause* נָדֹדוּ), סָרַר, עָשְׁשָׁה (*plur.* in *pause* עָשְׁשׁוּ ψ 31[11]), צָלַלוּ, שָׁחֲחוּ (also שָׁחֹחוּ), almost all have, as Mayer Lambert observes, at least an active, not a stative meaning. Triliteral forms of the *infinitive* after לְ are לְסֹבֵב Nu 21[4]; לְשָׁדוֹד Jer 47[4]; לְגָוֹז Gn 31[19] (also לָגֹז Gn 38[13]); cf. also לַחְמָם Is 47[14], in *subordinate pause*, for לַחֲמָם; with *suffix* לַחֲנָנְכֶם Is 30[18], and, from the same

form חָנַן, with retraction and modification of the vowel, לְחָנְנָהּ ψ 102[14]; also שְׁחוֹחַ Is 6o[14], בְּנָוֹו 1 S 25[2], כְּמִסַּס Is 10[18], בְּעָוֹו Pr 8[28], בְּצֹרוֹר Pr 26[8].—*Imperative* שְׁרֹדוּ Jer 49[28] (cf. § 20 *b*, and ibid. also on חָנְנֵנִי ψ 9[14]); in the *imperfect*, יְהוֹר Na 3[7] (ψ 68[13]; cf. Gn 31[40]) from נדר; the strong form here, after the assimilation of the *Nûn*, was unavoidable. On the other hand, יְשָׁרְדֵם Jer 5[6] is anomalous for יְשָׁדֵּם (Pr 11[3] *Qerê*; the eastern school read the Po'el ישודדם in the *Kᵉthibh*); the strengthening of the second radical has been afterwards resolved by the insertion of a *vocal Šᵉwâ*. Cf. also יְחָנֵן Am 5[15] (elsewhere יָחֹן). In *Niph'al*, the triliteral form יִלָּבֵב is found, Jb 11[12]; in *Hiph'il*, all the forms of רנן, thus *imperative* הַרְנִינוּ, *imperfect* תַּרְנִין; *infinitive* הַשְׁמֵם Mi 6[13]; *participle* מַשְׁמִים Ez 3[15]. That the developed (triliteral) forms possess a certain emphasis is seen from their frequent use in *pause*, as in ψ 118[11] after a biliteral form (סַבּוּנִי גַם־סְבָבוּנִי).

11. The above-mentioned (see *g*) neglect of the strengthening in aramaïzing forms, such as יְדַמּוּ and the like, occurs elsewhere tolerably often; in the *perfect Qal* תַּמְנוּ for תַּמֹּונוּ Nu 17[28] (Jer 44[18]; cf. above, *e*); *imperfect* נָבְזָה 1 S 14[36] (ה־ *parag.* without any influence on the form, cf. *o*); even with the firm vowel reduced to *vocal Šᵉwâ*; יְבַלָּה Gn 11[7] for נְבַלָּה (cohortative from בָּלַל); יְזַמּוּ for יָזֹמּוּ ibid. ver. 6, *they purpose*; following the analogy of verbs ע״ו, אֲמַשְׁשֵׁךְ (see above, *r*); from *intransitive imperfects Qal*, יְצַרְרוּ Is 49[19] (*plur. masc.* Jb 18[7]); יְרַעוּ Neh 2[3]; also תִּישְׁמְנָה Ez 6[6] (for which read תִּשֵּׁם=תִּישׁ) might be explained in the same way.—*Perfect Niph'al* נְסַבָּה for נָסַבָּה Ez 41[7]; נְזֻלוּ Ju 5[5] for נָזֹלּוּ; נְמַלְתֶּם for נָמַלְתֶּם Gn 17[11] (as if from מָלַל not מוּל *to circumcise*), cf. Is 19[3], Jer 8[14]; *imperfect* תִּפַּקְנָה Zc 14[12]; *participle* נְחַמִּים, cf. *u*. So also נָפַץ 1 S 13[11], נְפַצָה Gn 9[19] (cf. Is 33[3]), are perfects *Niph'al* from פצץ (=פוץ), not *Qal* from נָפַץ.—In *Hiph'il* הֵחַלְתָּ (for הֶחֱלֵתָּ) Ju 16[10] (2 S 15[34]); הֵעָזָה for הֶעֱזָה Pr 7[13] (cf. Ct 6[11], 7[13]).

No less irregular is the suppression of the vowel of the stem-syllable in לְהַפְרֵכֶם Lv 26[15].—On the perfect דַּלְיוּ Pr 26[7], cf. § 75 *u*.

12. Cases in which the tone is thrown forward on the afformatives (see *k*) are (*a*) in the *perfect*, the 1st *sing.* regularly (but cf. וְהַצַּלְתִּי Jer 10[18] before לָהֶם) after ו *consec.*, Ex 33[19.22], 2 K 19[34], &c., also Is 44[16] (חַמּוֹתִי before ר); ψ 92[11] (but the text is certainly corrupt; see the Lexicon), 116[6], perhaps also Jb 19[17], וְחַנֹּתִי (though in this passage, and in ψ 17[3], the form might be an *infinitive* in *ôth*; see Delitzsch on Jb 19[17]); in the 2nd *sing.* וְקַצֹּתָה (before א) Dt 25[12]; in the 3rd *plural*, רַבּוּ *multi sunt*, ψ 3[2], 104[24], Jer 5[6], 1 S 25[10]; רַכּוּ *they are soft*, ψ 55[22] קַלּוּ *they are swift*, Jer 4[13], Hb 1[8]; זַכּוּ *they are pure*, Jb 15[15], 25[5], La 4[7]; שַׁחוּ *they did bow*, Hb 3[6]; חָרוּ *they are burned*, Is 24[6]. A by form of שָׁחוּ (ע״ע, cf. § 72 *dd*) is שַׁחֹתוּ ψ 49[15], 73[9].

(*b*) In the *imperative* (a command in an emphatic tone) רָנִּי *sing*, Is 54[1], Zp 3[14], Zc 2[14]; רָנּוּ Is 44[23], 49[13], Jer 31[7] (but רֹנִּי *lament*, La 2[19]), חָגּוּ *keep* (*thy feasts*), Na 2[1], Jer 7[29]; עוּזָּה (=עֻזָּה) before א, ψ 68[29]. On the retention of the short vowels *ŭ* (*ŏ*) and *ĭ* before *Dageš forte*, in place of the tone-long *ō* and *ē*, see above, *k*; on the change of the vowel of the preformative into *Šᵉwâ*, when it no longer stands before the tone, see *g*.

THE WEAKEST VERBS (*Verba Quiescentia*).

§ 68. *Verbs* פ״א e. g. אָכַל *to eat.*

Brockelmann, *Semit. Sprachwiss.*, p. 140 ff.; *Grundriss*, p. 589 ff.

a So far as א retains its full consonantal value as a guttural, these verbs share all the peculiarities of verbs *primae gutturalis*, mentioned in § 63. They are, however, to be treated as *weak* verbs, when the א loses its value as a consonant, and coalesces with the preceding vowel (originally short) to form one long syllable. This takes place only in the following very common verbs and forms, as if through phonetic decay:—

b **1.** In the *imperfect Qal*, five verbs (viz. אָבַד *to perish*, אָבָה *to be willing*, אָכַל *to eat*, אָמַר *to say*, אָפָה *to bake*) regularly make the א quiesce in a long *ô*, e. g. יֹאבַל.[1] In a few others the ordinary (strong) form is also in use, as יֹאחֵז (18 times) and יֶאֱחָז (3 times) *he takes hold*; יֹסֵף (see *h*), also יֶאֱסֹף, *he collects.* This *ô* has primarily arisen from an obscuring of *â* (§ 9 *q*), and the *â* from אָ—, the weak consonant א coalescing with *ă* to *â*; cf. § 23 *a*.

c In the second syllable *ō* (for original *ŭ*) never appears, but either *ē*[2] or *ă*; and in *pause* almost always *ē*, even before the tone-bearing *heavy* afformative וּן, e. g. יֹאכְלוּן Dt 18[1], without the pause יֹאכְלוּן Dt 4[28]. In the 3rd *sing. masc.* and 1st *sing.* of אָמַר, however, *ă* is always retained in pause, יֹאמַר and אֹמַר; but in the 2nd *masc.* תֹּאמֶר 1 K 5[20], in the 3rd *fem.* תֹּאמֶר Pr 1[21]; in the *plural* יֹאמְרוּ Jer 5[2], ψ 145[6.11], תֹּאמְרוּ Jer 23[38], with *Segolta*; cf. also תֹּאכַל 1 S 1[7], &c. But with conjunctive accents in the body of the sentence, *ă* (as being a lighter vowel) is used, e. g. תֹּאבַד לָעַד ψ 9[19], but in *pause* תֹּאבֵד ψ 1[6]; cf. a similar interchange of *ē* and *ă* in § 65 *c*. The 3rd *fem. plur. impf.* always has the form תֹּאכַלְנָה Zc 11[9].

d When the tone moves back, the final syllable of the *imperfects* of אָבַד and אָכַל, with a conjunctive accent, also always takes *Pathaḥ*, e. g. יֹאבַד יוֹם Jb 3[3], וַיֹּאכַל *and he did eat*; in אָמַר the loss of the tone from the final syllable only occurs in the form with *wāw consecutive*

---

[1] So in the modern vulgar Arabic of South Palestine, *ya'kul* (*he eats*) becomes *yōkul*.

[2] On this *ē* (originally *ĭ*) as a dissimilation from *ō* (originally *ŭ*), cf. § 27 *w*, and F. Philippi, in the *Zeitschrift für Völkerpsychologie und Sprachwissenschaft*, xiv. 178. The latter rightly observes that the existence of an original *u* in the *imperfect* of אָכַל is indicated by the form of the *imperative* אֱכֹל, the Arabic *ya'kul* and the Aramaic יֵאכֶל, as well as by the fact that יֶאֱחָז and יֶאֱסֹף are found along with יֹאחֵז and יֹאסֵף.

(but never in the 1st *sing.* וָאֹמַר ; cf. וָאֹכַל), and then the final syllable, if without the *pause*, always takes *Seghôl*, וַיֹּאמֶר *and he said* (except וַתֹּאמַר לוֹ Pr 7[13]).

c In *pause*, however, the *imperfect consecutive* (except the 1st pers. of אָכַל, see below) always has the form וַיֹּאכַל (but *plur.* always יֹאכְלוּ, וַיֹּאכְלוּ), וַיֹּאמַר; except וַיֹּאמֶר in the poetic portion of the book of Job, as 3[2], 4[1], &c., but not in 32[6], in the middle of the verse. The weak *imperfect* of אָחַז is always יֹאחֵז and וַיֹּאחֵז, but in the 1st *sing.*, according to § 49 *e*, וָאֹחֵז Ju 20[6]; cf. וָאֹכַל Gn. 3[12.13] in *pause*.—אָבָה and אָפָה are, at the same time, verbs ל״ה, hence *imperfect* יֹאבֶה (§ 75 *c*).

f Before *light* suffixes the vowel of the second syllable becomes vocal Šewâ, as יֹאכְלֵנוּ, תֹּאכְלֵם, but תֹּאכַלְכֶם.—In a few cases, instead of the *ô* in the first syllable an *ê* is found, which is due to contraction from the group ־ֵיְ (or ־ֵיִ) in place of ־ֹיְ; e.g. תֵּאָתֶה *it shall come*, Mi 4[8], from תֵּאְיֶתֶה (from אָתָה); אֵהֵב (for אֵהֶב) *I love*, Pr 8[17], also (four times) אֵהַב Mal 1[2], &c., with suffixes אֲהֵבָהוּ Ho 11[1], 14[5], &c. (but only in 1st *sing.*, otherwise יֶאֱהַב, &c., from אָהַב, אֲהַב); וְאֵחַר *and I stayed*, Gn 32[5]. The *infinitive construct* of אָמַר with לְ is always לֵאמֹר *dicendo*, for לֶאֱמֹר.—According to Barth (*ZDMG.* 1889, p. 179) וַיֵּאָצֵל Nu 11[25] is to be regarded as an *imperfect Qal*, without the obscuring of א to *ô*, not as *imperfect Hiph'il*, since אצל elsewhere occurs only in the *perfect Qal* and *Niph'al*; on the original *i* in the second syllable, see above, § 67 *p*. For תֵּאָכְלֵהוּ Jb 20[26] we should simply emend תֹּאכְלֵהוּ; the view that it is *imperfect Pô'el* (which nowhere else occurs) can, as regards the change of *ô* to *ŏ*, be supported only by the very doubtful analogies of ψ 62[4] (see § 52 *q*) and ψ 101[5] *Qerê* (see § 55 *b*), while the view that it is *Pi'el* (תְּאַכֵּ֫ל = תְּאֵכֵ֫ל = תְּאַכֵּ֫ל) rests on no analogy whatever. It would be more admissible to suppose that תְּאָכְ֫ stands for תְּאָכֵ֫, *Pu'al* (cf. אֲכֻלָּךְ for אֲכֻלֵךְ, § 27 *q*); but no reason has been discovered for this departure from the natural punctuation תֹּאכַל.

g **2.** In the 1st *pers. sing. imperfect*, where two א's would ordinarily come together, the second (which is radical) is regularly dropped (§ 23 *f*), as אֹמַר[1] (for אֶאֱמַר), &c., and even *plene* וָאוֹמַר Neh 2[7], &c., אוֹמְרָה ψ 42[10]. In the other cases, also, where the א is ordinarily regarded as *quiescing* in *ô* or *ê*, it is only retained orthographically, and on etymological grounds. Hence the possibility of its being dropped in the following cases:—

h Always in the contracted forms of אָסַף, as תֹּסֶף for תֹּאסֶף ψ 104[29]; וַיֹּסֶף 2 S 6[1] (but for יֶאֱסֹף Jb 27[19] read יוֹסֵף = יֹאסֵף with the LXX); cf. also in

[1] The regularity of this orthography indicates that the contraction of אֶא to *á* in this 1st pers. occurred at a time when in the 3rd and 2nd persons the א was still audible as a consonant (which accordingly was almost always retained in writing). Nöldeke (*ZDMG.* xxxii. 593) infers this from the fact that also in Arabic the 3rd and 2nd persons are still written *yā'kŭlŭ*, *tā'kŭlŭ*, but the 1st pers. *'ākŭlŭ*, not *'ā'kŭlŭ*.

the 1st *pers.* Mi 4^6 and אֹסִפָּךְ 1 S 15^6, which is apparently (from the *Metheg* with the *i*), intended for an *imperfect Hiph'il*: instead of it, however, read, with the Mantua edition, אֹסְפָךְ (with *ĕ*, according to § 60 *f*). But תִּאסְפוּן Ex 5^7 (for תְּכוּס), וַיֹּאסֶף 1 S 18^{29} (for וַיּוֹסֶף), and יאסף Jb 27^{19} (see above) are due to a mistake, since all three forms must be derived from the stem יָסַף. Furthermore, יִמְרֹךְ ψ 139^{20} (where certainly יַמְרוּ is to be read); תֹּבֵא Pr 1^{10} (cf. § 75 *hh*); וַתֹּפֶהוּ 1 S 28^{24}; יוֹכְלוּ Ez 42^6; תִּמְרוּ 2 S 19^{14}; וַתֹּחֶן 2 S 20^9; תְּזֹלְלִי *thou gaddest about* (from אָזַל), Jer 2^{36}; וַיִּתֵּא Dt 33^{21} (for וַיֵּאָתֶה), according to other readings (on the analogy of the cases mentioned in § 75 *p*) וַיִּתֵּא, וַיֵּתֵא or וַיֶּתֵא.

Paradigm I shows the weak forms of the *imperfect Qal*, and merely indicates the other conjugations, which are regular.

i Rem. 1. In the derived conjugations only isolated weak forms occur: *Perfect Niphal* נֶאֱחֲזוּ Nu 32^{30}, Jos 22^9; *Hiph.* וַיָּאצֶל Nu 11^{25} (but the statement in verse 17 is וְאָצַלְתִּי, therefore Qal); equally doubtful is the punctuation of וַיָּרֶב (for וַיְיָרֶב?) *and he laid wait*, 1 S 15^5, and אָזִין *I listen*, Jb 32^{11} (on the analogy of verbs ע״ו); cf. also אוֹכִיל (*ô* from *â*) *I give to eat*, Hos 11^4; אֲבֵידָה (*ê* from *â*) *I will destroy*, Jer 46^8; וַיּוֹחֶר 2 S 20^5 *Qerê* (for וַיֹּאחֶר); the *Kethîbh* appears to require the *Pi'ēl* וַיְיַחֵר, from יחר as a secondary form of אחר; but וַיִּיחַר = וַיִּיאָחַר for וַיֵּאָחַר as *imperfect Qal* is not impossible. On וְאוֹצְרָה Neh 13^{13}, cf. § 53 *n*.—*Infinitive* לְהָכִיל Ez 21^{33} (=לְהַכְאִיב unless it is rather *infin. Hiph.* from כּוּל); *Participle* מֵזִין *giveth ear*, Pr 17^4 (clearly by false analogy of verbs ע״ע, for מֵאֵזִין); *Imperative* הֲתָתִי *bring* (from אָתָה) Jer 12^9. (On the same form used for the *perfect* in Is 21^{14}, cf. § 76 *d*.)

k 2. In the *Pi'ēl* the א is sometimes elided (like ה in יְהַקְטִיל, יַקְטִיל), thus מַלָּךְ (as in Aramaic and Samaritan) *teaching*, for מְאַלֵּף Jb 35^{11}; יַהֵל (if not a mere scribal error) for יְאַהֵל Is 13^{20}; וַתְּזָרֵנִי *thou hast girded me*, 2 S 22^{40}, for וַתְּאַזְּרֵנִי, as ψ 18^{40}; וְאַבָּרֵךְ Ez 28^{16}; cf. § 23 *c*.

§ 69. *Verbs* פ״י. *First Class, or Verbs originally* פ״ו, e.g. יָשַׁב *to dwell.*

Brockelmann, *Semit. Sprachwiss.*, p. 141 f.; *Grundriss*, p. 596 ff.

a Verbs which at present begin with Yôdh when without preformatives are divided into two classes according to their origin and consequent inflexion: (*a*) Verbs which (as still in Arabic and Ethiopic) originally began with *Wāw*, e.g. יָלַד *to give birth to*, Arab. and Eth. *wălădă*. In consequence of a phonetic change which prevails also with few exceptions in the noun, this *Wāw* in Hebrew and Aramaic always becomes a *Yôdh*, at least when it is the initial consonant; but after preformatives it either reappears, or is again changed into

Yôdh, or, lastly, is altogether elided; (*b*) Verbs which (as in Arabic) originally began with *Yôdh* (called *Verba cum Iod originario*, see § 70). A few verbs again (some with original *Yôdh*, and some with original *Wāw*) form a special class, which in certain forms assimilates the *Wāw* or *Yôdh* to the following consonant on the analogy of the *Nûn* in verbs פ״נ (see § 71).

With regard to verbs פ״ו (i. e. פ״י with original *Wāw*) it is to be noticed that— *b*

1. In the *imperfect*, *imperative* and *infinitive construct Qal* there is a twofold inflexion, according as the *Wāw* is wholly rejected or only changed into *Yôdh*. The complete rejection (or *elision*) takes place regularly in eight verbs (see *h*) in the following manner:

A. *Imperfect* יֵשֵׁב, יֵדַע with an unchangeable[1] *Ṣere* in the first syllable and original *ĭ* in the second, which in the tone-syllable (according to § 27 *c*) becomes *ē* (thus יֵלֵד, יֵצֵא, יֵרֵד; יָלְדָה, see *x*), or, under the influence of a guttural, with *ă* in the second (יֵדַע, יֶחְדַּל, יֶחֱדַל).

The tone-long *ē* of the second syllable is of course liable to be shortened or to become *Še*wâ, e.g. וַיֵּשֶׁב, וַיֵּשְׁבוּ, &c.; in the same way *ă* becomes *Še*wâ in such cases as יְדָעוּ, &c., but is lengthened to *Qameṣ* in *pause* (יָדָעוּ) and before suffixes (יְדָעֵם).

B. *Imperative* שֵׁב with *aphaeresis* of the *Wāw* and with tone-long *ē*, from *ĭ*, as in the *imperfect*.

C. *Infinitive* שֶׁבֶת from original *šibh*, by addition of the feminine ending (ת) lengthened to a *segholate* form; as in verbs פ״נ (cf. § 66 *b*) this lengthening affords a certain compensation for loss of the initial consonant.

Rem. Since the infinitives דְּעָה, לֶדֶת (see below, *m*) point to a ground-form *di'at*, *lidat*, we must, with Philippi (*ZDMG.* xxxii. 42) and Barth (ibid. xli. 606), assign to שֶׁבֶת, &c., the ground-form *šibt* (which, therefore, reappears in שִׁבְתִּי, &c.); the apparent ground-form *šabt* rests upon the law that the *ĭ* of the stem-syllable is changed into *a* whenever the syllable becomes doubly closed by the addition of the vowelless feminine ending. *c*

---

[1] The *e* of the first syllable is really *ê*, not tone-long *ē*, since it is retained not merely before the tone, and in the counter-tone (e.g. וַיִּרְעֵם Ho 14[10]), but also in אֶדְרָעֲךָ Ex 33[13.17]. It is no objection to this view that the *scriptio plena* of this *ê* occurs (with the exception of יֵיקַר ψ 72[14], elsewhere pointed יֵקַר) only in Mi 1[8] and Ez 35[9] *K'th.*; in ψ 138[6] the Masora prefers to point יֵירֵעַ.—Of the various explanations of the *ê* the most satisfactory is that of Philippi (*ZDMG.* xl. p. 653) that an original *yălīd*, for example (see above), became *yĭlid* by assimilation of the vowel of the first syllable to that of the second; this then became *yêlēd* instead of *yēlēd*, in an attempt to raise the word again in this way (by writing *ê* instead of *ē*) to a triliteral form.

d In more than half the number of verbs פ״ו the original *Wāw* in the above-mentioned forms gives place to *Yôdh*, which, unless it suffers aphaeresis (see *f*), appears:—

in the *imperatives* יְצֹק, יְרַשׁ and *infinitives* יְסֹד, יְרֹא, as a strong consonant, but

in the *imperfect* יִירַשׁ, properly *yiyrăš*, merges with the preceding ĭ into î.

In the second syllable *imperfects* of this form regularly have *ă*.

e (*a*) That the latter forms are derived from verbs with an original *Wāw* (not *Yôdh*) is shown partly by the inflexion of these verbs in *Niph'al*, *Hiph'il*, and *Hoph'al* (where the original *Wāw* reappears throughout), and partly by the Arabic, in which verbs פ״ו likewise exhibit a twofold formation; cf. *wălădă*, imperf. *yălidu*, with elision of the *Wāw*, and *wăǰălă*, *yauǰalu*, with retention of the *Wāw*.

f (*b*) Sometimes both forms, the weaker and the stronger, occur in the same verb; cf. צָק 2 K 4[41] and יָצַק *pour*, Ez 24[3] (cf. יְצֻקוּ 1 K 18[34] and the *infin.* צֵקֶת Ex 38[27]); רֵשׁ *take possession*, Dt 1[21], 1 K 21[15] (but cf. *s*), רָשׁ (in *pause* for רַשׁ) Dt 2[24.31]; *plur.* רָשׁוּ Dt 1[8], 9[23], but also, with ה_ *paragogic*, יְרָשָׁה Dt 33[23]. In the *imperfect* יִיקַר Dt 32[22] and יָקַר Is 10[16] *it shall be kindled*; וַיִּיקַר *it was precious*, 1 S 18[30] and יֵקַר ψ 49[9] (cf. יִיקַר ψ 72[14]).—The form וַיִּחַמּוּ Gn 30[39], for וַיִּחֲמוּ, beside וַיַּחַמְנָה verse 38, is remarkable; cf. § 47 *k*.

g (*c*) On רַד Ju 19[11] for יָרַד and שׁוּב Jer 42[10] for the *infinitive absolute* יָשׁוֹב, cf. § 19 *i*.—But יָרַד Ju 5[13] (twice) is not intended by the Masora either as *perfect* (for יָרַד, which really should be restored) or as *imperative* of יָרַד, but as an apocopated *imperfect Pi'el* from יָרָה (= יְיָרֵד) *to have dominion*.

h (*d*) The eight verbs,[1] of which the initial consonant in the above-mentioned forms always suffers elision or aphaeresis, are יָלַד *to bring forth*, יָצָא *to go forth*, יָשַׁב *to sit, to dwell*, יָרַד *to descend*, also הָלַךְ *to go* (cf. below, *x*); and with *ă* in the second syllable of the *imperfect*, יָדַע *to know*, יָחַד *to be united*, יָקַע *to be dislocated*. Examples of the other formation (יִירַשׁ, &c.) are יָעֵף *to be wearied*, יָעַץ *to counsel*, יָשֵׁן *to sleep*, יָרֵא (*imperfect* יִירָא, *imperative* יְרָא) *to fear*.

i **2.** The original *Wāw* is retained as a firm consonant: (*a*) in the *infinitive*, *imperative*, and *imperfect Niph'al*, being protected by the strengthening, e.g. הִוָּשֵׁב, יִוָּשֵׁב, which are consequently strong forms like הִקָּטֵל, יִקָּטֵל; (*b*) in the *Hithpa'el* of some verbs, e.g. הִתְוַדַּע from יָדַע, הִתְוַבַּח from יָבַח, הִתְוַדָּה from יָדָה; otherwise a radical *Wāw* at the beginning of a word is now found only in a few nouns, e.g. יֶלֶד *offspring* from יָלַד *to bear*. At the end of a syllable *Wāw* with the homogeneous

[1] A ninth יָסַף *to add*, is also to be included. In the Mēša'-inscription, l. 21, the *infinitive* is written לספת (cf. יספתי, l. 29); hence read in Is 30[1] (Nu 32[14], Dt 29[18]) סֶפֶת for סְפוֹת. The 2nd *plur. masc. imperative* סְפוּ Is 29[1], Jer 7[21] corresponds to שְׁבוּ; thus in proof of a supposed סָפָה *addere*, there remains only אַסְפֵּה Dt 32[21], for which, according to 2 S 12[8], read אֹסִפָה.

vowel *ŭ* coalesces into *û*; so throughout *Hoph'al*, e. g. הוּשַׁב for *hŭwšabh*; but with a preceding *a* the *Wāw* is contracted into *ô* (וֹ); so in the *perfect* and *participle Niph'al* and throughout *Hiph'îl*, e. g. נוֹשַׁב from an original *năwšābh*, הוֹשִׁיב from an original *hăwšîbh*.

k The first radical always appears as *Yôdh* in the *perfect* and *participle Qal*, יָשַׁב, &c., יֹשֵׁב, יָשׁוּב, even when וְ precedes, e. g. וַיֵּשֶׁב (but וַיְשַׁבְתֶּם, according to § 24 *b*), also throughout *Pî'ēl* and *Pu'al*, e. g. יִחֵל *to wait*, יֻלַּד *to be born*, and in the *imperfect* and *participle Hithpa'el*, e. g. מְיֻדָּע *known* (from יָדַע), and, as a rule, also in *Hithpa'el*, e. g. הִתְיַלֵּד, הִתְיַצֵּב, הִתְיַחֵשׂ (as against הִתְוַדַּע, &c., with *Wāw*).

l The beginner may recognize verbs פ״י in the *imperfect Qal* partly by the *Ṣere* under the preformatives; in *Niph'al* and *Hiph'il* by the *Wāw* (וֹ, וּ) before the second radical. (The defective writing, as in הֹלִיד, is rare.) Verbs פ״ו have forms like שֶׁבֶת (יָדַע), שֶׁבֶת, in common with verbs פ״ן. Similarly *Hoph'al* has the same form as in verbs ע״ע and ע״ו.

m Rem. 1. The *infinitive Qal* of the weaker form (שֶׁבֶת, ground-form *šibt*, cf. above, *c*) with suffixes is pointed as שִׁבְתִּי,[1] רִשְׁתּוֹ (the strong form only in לְיָרְשֵׁנוּ Ju 14[15]). The masculine form is very rare, e. g. דֵּעַ *to know*, Jb 32[6.10], as also the feminine ending ה֫, e. g. הֲדָעָה[2] Ex 2[4], לֵדָה Is 37[3] (2 K 19[3]); Jer 13[21], Ho 9[11]; יְרֵדָה[2] *to descend*, Gn 46[3], where the change of the *ē* into vocal *Šewâ* is to be explained, with König, from its position between the principal and secondary tone. From יָדַע, under the influence of the guttural, דַּעַת is formed, with *suff.* דַּעְתִּי, &c.; but from יצא, צֵאת. From יָרַד there occurs in ψ 30[4] in *Qerê* מִיְּרְדִי (the *Kᵉth.* requires מִיּוֹרְדֵי) a very remarkable case of the strong form (for מֵרִדְתִּי). For לַת 1 S 4[19] (generally explained as a case of assimilation of ד to ת in the supposed ground-form *ladt*; according to Mayer Lambert pausal of לֶדֶת = *lidt*, see above, *c*) read simply לֶדֶת.

n Examples of the strong form of the *infinitive* are יְרֹא *to fear*, Jos 22[25], with preposition לְיִסֹּר Is 51[16] (but 2 Ch 31[7] according to Ben Naphtali לְיִסֹּוד, where the י is only retained orthographically, but is really assimilated to the ס; the reading of Ben Asher, לְיָסוּד, accepted by Baer, is meaningless); לִישׁוֹן Ec 5[11]; לְרֹא 1 S 18[29] is irregular, but probably לִרְאֹת (for לִירֹא) is intended. With *suff.* בְּיָסְדִי Jb 38[4], cf. Ju 14[15], Ezr 3[12]; with ת *fem.* יְכֹלֶת *to be able*, Nu 14[16]. On יְבַשֶּׁת, which is likewise usually referred to this class, cf. the note on § 70 *a*.

---

[1] וְשַׁבְתִּי ψ 23[6] can hardly be intended for an *infin.* with suffix from יָשַׁב, but rather for a *perf. consec.* from שׁוּב; but read וְיָשַׁבְתִּי.

[2] The infinitives הֲדָעָה and יְרֵדָה belong to the source marked E (Dillmann's B) in the modern criticism of the Pentateuch. The same document also has נְתֹן *to give*, for תֵּת; הֲלֹךְ *to go*, for לֶכֶת; and עֲשׂוֹת *to make*, for עֲשׂוֹת. See Dillmann, *Die BB. Num., Deut., Jos.*, p. 618.

o 2. The *imperative Qal* frequently has the lengthening by ה_, e.g. שָׁבָה *sit thou*, רְדָה *descend thou*. From יָהַב *to give*, Arab. *wāhăbă*, only the *imperative* is used in Hebrew; it has the form הַב *give*, lengthened הָבָה generally with the meaning *age, go to*, hence in Gn 11$^{3.4}$ even addressed to several persons (Gn 29^{21} הָבָה before א to avoid the hiatus); *fem.* הָבִי Ru 3^{15}, *Milra'* on the analogy of the plural הָבוּ (once in Jb 6^{22} הָבֻ֫ before the tone-syllable; but cf. Dt 32^{3}), whilst, on the analogy of other *imperatives Qal* of verbs פ״י, הָחֲבִי, הָבוּ would be expected.—On דְּעֵה Pr 24^{14}, cf. § 48 *l*.

p 3. The *imperfect* with ו elided takes *ă* in the second syllable, besides the cases mentioned above (under *f*), also in תֵּרַד Jer 13^{17} (cf. La 3^{48}) and in the pausal form יֵלַךְ֫ Jb 27^{21}, &c. (from הָלַךְ, see *x*); on יֵקַד Is 10^{16} see above, *f*. The *ă* in the second syllable, when followed by the affformative נָה (תֵּרַדְנָה &c.), is in accordance with the law mentioned above (under *c*), by which *ă* takes the place of *ĭ* in a doubly closed syllable. Forms with *ē* in the second syllable shorten the *ē* to *Sᵉghôl*, when the tone is drawn back (before a tone-syllable or after *wāw consecutive*), e.g. יֶשְׁבֶ֫נָּא Gn 44^{33}; וַיֵּרֶד, וַיֶּשֶׁב; but *ē* is retained in an open syllable, even with Mil'el-tone, in יֵצֵא Ex 16^{29}, Ju 9^{39}, in both cases with *nasog 'aḥor*, § 29 *e*. The *pausal* is either of the form וַיֵּשֶׁב Ru 4^{1} or וַיֵּרֶד *ψ* 18^{10}; the 1st pers. sing., whether in or out of pause, is וְאֵרֵד, וְאֵלֵךְ, &c., except וְאֵלֵ֫ךְ Jb 19^{10}, see *x*.—For יֵיטַב *ψ* 13^{36} (cf. the note above, on *b* and the analogous cases in § 70 *d*) יֵיטַע is intended.

q The *imperfect* of the form יֵרַשׁ is frequently (especially before affformatives) written defectively, in which case the *i* can always be recognized as a long vowel by the *Metheg* (see § 16 *f*), e.g. יְעַפּוּ Is 40^{30}, יְגֵעוּ Is 65^{23}; and so always יִרְאוּ *they fear*, as distinguished from יְרָאוּ *they see* (*imperf. Qal* of רָאָה).—On וַיְיַשֵּׁם Gn 50^{26}, 24^{33} *Kᵉth*, and וַיְסָךְ Ex 30^{32}, see § 73 *f*.

r From יָכַל *to prevail, to be able*, the *imperfect Qal* is יוּכַל, which can only have arisen through a depression of the vowel from יוֹכַל (ground-form *yaukhal* = *yawkhal*), to distinguish it, according to Qimḥi, from אוֹכַל, just as, according to § 47 *b*, אֶקְטֹל is differentiated from יִקְטֹל. Cf. the Arabic *yaqru'u* (*yôru'u*) from *waru'a*, *yauǵalu* (*yôǵalu*) from *waǵila*, as also the vulgar Arabic (among towns-people) *yûṣal*, &c., from *waṣala*. Others regard יוּכַל as an *imperfect Hoph'al* (*he is enabled* = *he can*), always used instead of the *imperfect Qal*; cf., however, § 53 *u*.—וַתּוּכַל occurs in Jer 3^{5} as 2nd *sing. fem.* for וַתּוּכְלִי, according to König because the 2nd *fem.* had been sufficiently indicated previously.—Further יוֹרֶה or יֹרֶה is to be regarded with M. Lambert (*REJ.* xxxvii, no. 73) as *impf. Qal* (not *Hiph'il*) of יָרָה *to throw, shoot* (the supposed *impf. Qal* וְנִיר֫וּ Nu 21^{30} is critically very doubtful). This is shown especially by the passages in which the *impf.* יוֹרֶה is immediately preceded by the *imperat. Qal* (2 K 13^{17}) or *infin. Qal* (*ψ* 64^{5}), or is followed by the *participle Qal* (2 Ch 35^{23}; but in 2 S 11^{24} by the *participle Hiph'il*).

s 4. The attenuation of *ă* to *ĭ* in the *perfect* (in a toneless, closed syllable) which is discussed in § 44 *d* (cf. § 64 *f*) occurs in verbs פ״ו in a few forms of יָלַד Nu 11^{12}, Jer 2^{27}, *ψ* 2^{7}, &c. (always after י), as well as of יָרַשׁ, e.g. וַיִּרְשֵׁ֫תֶם, &c., Dt 4^{1}, 8^{1}, 17^{14}, 19^{1}, 26^{1}, 31^{3} (always after וְ for וַ). In both cases the attenuation might be explained from the tendency to assimilate the vowels, especially if the initial י was pronounced, as in Syriac, like *i* (§ 47 *b*). In the case of יָרַשׁ, however, a secondary form יֵרַשׁ (cf. § 44 *d*) is probably to be assumed, since in Arabic also the verb is *wārīṯa*. The forms

וְיִרַשְׁתּוּהָ Ez 36[12] and וְיִרְשׁוּהָ ψ 69[36], &c., are most simply explained from the return of this *i*.

5. As an exception, the *imperfect Niph'al* sometimes has a י instead of the *t* ו, e.g. וַיִּיָּחֶל *and he stayed*, Gn 8[12] (unless the *Pi'ēl* or וַיָּחֶל, as in ver. 10, is to be read), cf. Ex 19[13]; 1 S 13[8] *K'thibh*.—The first person always has the form אָוּשֵׁב, not אָוֻשֵּׁב, cf. § 51 *p*.—In the *participle* the plural נוֹגֵי (from יָגָה, with depression of *ô* to *û*, cf. § 27 *n*) is found in Zp 3[18]; cf. La 1[4]. While in these cases some doubt may be felt as to the correctness of the Masoretic pointing, much more is this so in the perfect נוּלְּדוּ *null'dhû*, 1 Ch 3[5], 20[8], for נֻלְּדוּ which appears to be required by the *wāw* in the initial syllable.

6. In the *imperfect Pi'ēl* elision of the first radical (י) sometimes takes place *u* after *wāw consec.* (as in the case of א, § 68 *k*), e.g. וַיֵּגֶה for וַיֵּיגֶה *and he has grieved*, La 3[33], וַיַּדּוּ for וַיֵּידּוּ *and they have cast*, verse 53, from יָדָה, which may also be a true verb פ״ו (on the other hand, in יַדּוּ גוֹרָל *they have cast lots*, Jo 4[3], Ob [11], Na 3[10], a *perfect Qal* of יָדַד is required by the context; but as this, being a *transitive* perfect, ought to have the form יָדְדוּ according to § 67 *a*, perhaps we should read יִדּוּ). So from a verb פ״י, of the second class, וַיַּבֵּשׁ for וַיֵּיבַשׁ *and he made it dry*, Na 1[4]; cf. וַיְשָׁרֵם 2 Ch 32[30] *Q'rê* (the *K'th.* points either to *Pi'ēl* וַיֵּישָׁרֵם or *Hiph'il* וַיְיַשְּׁרֵם).

7. The *imperative Hiph'il*, instead of the usual form הוֹשֵׁב, sometimes has *i* in *v* the second syllable; הוֹצִיא Is 43[8]; הוֹפִיעַ ψ 94[1] (before ה, hence probably a mere mistake for הוֹפִיעָה). On the uncertainty of the tone in הוֹשִׁיעָה־נָּא see § 53 *m*. When closed by a guttural the second syllable generally has *ă*, as הוֹדַע, הוֹשַׁע, cf. also הַכֵּר Pr 25[17] (as in the *infin. constr.* הוֹכַח Jb 6[25]; see § 65 *f*). On the other hand, *i* always appears when the syllable is open, thus הוֹשִׁיבָה, הוֹשִׁיבִי, and so also before suffixes (§ 61 *g*). הֵיצֵא Gn 8[17] *Q'rê* (*K'th.* הוֹצֵא, see § 70 *b*) is irregular.—The *jussive* and the *imperfect consecutive Hiph'il* when the tone is drawn back take *S'ghôl* in the second syllable, as in *Qal*, e.g. יַרְבֶּה *that he may increase*, Pr 1[5], before חָ, לָ; cf. Ex 10[28] and Dt 3[26] after אַל־; וַיַּסֶּף (תּוֹסֵף Pr 30[6] is anomalous); in *pause*, however, also תּוֹסֵף as *jussive*, Jb 40[32] (usual *jussive* in *pause* יוֹשֵׁב, &c., which occurs even without the pause after *wāw consecutive*, Gn 47[11], Jos 24[3], 2 S 8[4], &c.). With a final guttural יִרַע and יוֹכַח (*jussive*) and וַיּוֹכַח, &c.; with a final ר in *pause* וַתִּתֵּר Ru 2[14]: on וְיַשַּׁעֲכֶם Is 35[4], cf. § 65 *f*).—On forms like יְהוֹשִׁיעַ, see § 53 *q*.

In *Hoph'al ô* stands instead of וּ, in הוֹדַע (for הוּדַע) Lv 4[23.28], הֻנָּה 2 S 20[13], *w* and perhaps in יוֹרָא (for יוּרָה) Pr 11[25]; but cf. Delitzsch on the passage.—*Ptcp.* מוּרַעַת Is 12[5] *Q'rê* (מְיֻדַּעַת *K'th.*).—An *infinitive Hoph'al* with feminine ending occurs in הֻלֶּדֶת Gn 40[20], for הוּלַדְתּ = הוּלַד; cf. above, *t*, on נוּלְּדוּ, and § 71 at the end.

8. The verb הָלַךְ *to go*, also belongs in some respects to the פ״ו class, since it *x* forms (as if from וָלַךְ) *imperfect* יֵלֵךְ, with *wāw consecutive* וַיֵּלֶךְ (in *pause* וַיֵּלֶךְ Gn 24[61], &c.), 1st sing. וְאֵלֵךְ (but in Jb 19[10] וְאֵלֶךְ); *infinitive construct* לֶכֶת with suff. לֶכְתִּי (*S'ghôl* under the influence of the following palatal, as in נֶגְדִּי, cf. also נֶגְדּוֹ); *imperative* לֵךְ, לֶךְ־, in the lengthened form לְכָה (as an interjection referring even to a *feminine*, Gn 19[32], or a *plural*, Gn 31[44]) and לֵךְ (Nu 23[13], Ju 19[13], 2 Ch 25[17]); *Hiph.* הוֹלִיךְ (also in Ex 2[9] הוֹלִיכִי 2nd *fem. imperative* is to be read for הֵילִיכִי, which probably arose merely through

confusion with the following הֵינִקָהוּ) ; *imperfect* יוֹלִיךְ, but in the 1st sing. of the *imperfect consecutive* always וְאוֹלִךְ Lv 26^{13}, Am 2^{10}, &c. Rarely, and almost exclusively late or in poetry, the regular inflexions of הָלַךְ are also found : *imperf.* יְהַלֶּךְ- (ψ 58^{9}, &c. ; but תְּהַלַּךְ Ex 9^{23}, ψ 73^{9} ; cf. § 64 *a* and *h*) ; אֶהֱלֹךְ Jb 16^{22}, also Mêša' inscription, line 14, אהלך ; *infin.* הָלֹךְ (Ex 3^{19}, Nu $22^{18\,f.16}$, [1] Ec $6^{8.9}$) ; *imperative plur.* הִלְכוּ Jer 51^{50}. On the other hand, the *perfect Qal* is always הָלַךְ, *participle* הוֹלֵךְ, *infinitive absolute* הָלוֹךְ, *Niph'al* נֶהֱלַךְ, *Pi'ēl* הִלֵּךְ, *Hithpa'ēl* הִתְהַלֵּךְ, so that a י never appears unmistakably as the first radical. The usual explanation of the above forms is nevertheless based on a supposed obsolete יָלַךְ. It is, however, more correct to regard the apparent פ״י forms of הלך with Praetorius (*ZAW.* ii. 310 ff.) as originating with the Hiph'il, of which the ground-form *hahlikh* became *hâlikh*, and this again, on the analogy of the *imperfect Qal* of verbs פ״א, *hôlikh*. This *hôlikh* being referred to a supposed *haulikh* (properly *hawlikh*) gave rise to new formations after the manner of verbs פ״י.

§ 70. *Verbs* פ״י. *Second Class, or Verbs properly* פ״י, e. g. יָטַב *to be good. Paradigm L.*

Brockelmann, *Semit. Sprachwiss.*, p. 143 ff. ; *Grundriss*, p. 603 ff.

Verbs properly פ״י differ from verbs פ״ו in the following points :

a **1.** In *Qal* the initial Yôdh never suffers aphaeresis or elision ; hence the *infinitive* has the form יְבֹשׁ,[2] the *imperfect* יִיטַב, יִיקַן, יִינַק (in *pause* יִינָק), also written יִטַּב, &c. ; and so always with a tone-bearing *ă* in the second syllable. even after *wāw consec.*, e. g. וַיִּיקַן, except וַיֵּקֶן Gn 9^{24}, and וַיֵּיצֶר Gn $2^{7.19}$, unless יָצַר is to be included among verbs פ״י (cf. נוֹצַר Is 43^{10}).

b **2.** In *Hiph'il* the original form הַיְטִיב is regularly contracted to הֵיטִיב (rarely written הַטִּיב, הֵיטַב, &c.) ; *imperfect* יֵיטִיב, וַיֵּיטֶב. Instances of the uncontracted form are יַיְשְׁרוּ Pr 4^{25}, according to Barth (see above, § 67 *p*), an example of an *i-imperfect* of *Qal*, since the *Hiph'il* is otherwise always *causative* ; הַיְשַׁר (*imperative*) ψ 5^{9} *Qᵉrê* (the *Kᵉth.* requires הוֹשֵׁר according to the form of verbs פ״ו ; cf. Is 45^{2}, אוֹשֵׁר *Kᵉth.*, אַיְשֵׁר *Qᵉrê*), cf. Gn 8^{17} *Qᵉrê* ; מַיְמִינִים 1 Ch 12^{2}, to be explained as a denominative from יָמִין ; אַיְסִירֵם Ho 7^{12} (§ 24 *f*, note), but perhaps the punctuation here is only intended to suggest another reading אֲיַסְּרֵם.

---

[1] Cf. above, *m*, note 2.

[2] This may be inferred from בִּיבֹשׁ (= בִּי) Is 27^{11}, which with its fem. יְבֹשֶׁת Gn 8^{7}, is the only example of an infinitive *construct Qal* of these verbs. No example of the *imperative Qal* is found : consequently the forms יְטַב, &c. (in Paradigm L of the earlier editions of this Grammar), are only inferred from the *imperfect*.

Rem. 1. The only verbs of this kind are: יָטַב *to be good* (only in the *imperfect Qal* and in *Hiph'il*; in the *perfect Qal* טוֹב, a verb ע״ו, is used instead), יָנַק *to suck*, יָקִין *to awake*, יָצַר *to form* (but see above, *a*), יָלַל only in *Hiph'il* הֵילִיל *to bewail*, יָשַׁר *to be straight, right*, also יָבֵשׁ (Arabic *yăbīsă*) *to be dry* (but *Hiph'il* הוֹבִישׁ 2 S 19[6], on the analogy of verbs פ״י; on Is 30[5], cf. § 72 *x*), and the *Hiph'il* הֵימִין (denominative from יָמִין), infin. לְהֵמִין 2 S 14[19] *to go to the right*.

2. In some examples of the *imperfect Hiph'il* the preformative has been subsequently added to the contracted form: יְיֵטִיב Jb 24[21]; יְיֵלִיל Is 15[2.3], 16[7]; אֲיֵלִיל Jer 48[31]; plur. יְיֵלִילוּ Ho 7[14], cf. Is 65[14]. Qimḥi and others explain the above forms from a phonetic interchange of *Yôdh* and *He*, arising from the unsyncopated forms יְהֵילִיל, &c. (cf. Is 52[5]). It is, perhaps, more correct to suppose that the regular forms (יֵיטִיב. יֵילִיל) were originally intended, but that in the later pronunciation the syllable was broken up in order to restore artificially the preformative which had become merged in the first radical.

Isolated anomalies are: *perfect Hiph'il* וְהֵיטַבְתִּי Ez 36[11] with separating vowel (for הֵיטַבְתִּי) on the analogy of verbs ע״ו; *imperfect* יֵיטִיב for יֵיטֵב 1 K 1[47]; תֵּיטְבִי (*imperfect Qal* for תֵּיטִבִי) Na 3[8]; וַתְּנִיקֵהוּ *imperfect Hiph'il* Ex 2[9], either an error for וַתֵּנֶק, or an irregular shortening of the first syllable, caused by the forward movement of the tone. Similarly, the *Hiph'il* הֲקִין (from קוּן) is always used instead of הֵיקִין from יָקִין; hence also הֲקִיצוֹתִי, *imperat.* הָקִיצָה, *infin.* הָקִין.—On וַיְבִשֶּׁהָ Na 1[4], see § 69 *u*).

§ 71. *Verbs* פ״י. *Third Class, or Verbs with Yôdh assimilated.*

In some verbs פ״י, the *Yôdh* (or the original *Wāw*) does not quiesce in the preceding vowel, but is regarded as a full consonant, and, like *Nûn*,[1] is assimilated to the following consonant. These forms, therefore, belong properly to the class of strong verbs. Assimilation invariably takes place in יָצַע (prop. וצע) *to spread under*; *Hiph'il* הֵצִיעַ, *Hoph'al* הֻצַּע; יָצַת *to burn*, imperfect יִצַּת, *Niph'al* נִצַּת, *Hiph'il* הִצִּית (in Is 27[4] also אַצִּיתֶנָּה is to be read with König; in 2 S 14[30] the Masora has rightly emended the *K'thîbh* והוציתיה, which could only be the 1st sing. perf. of a verb פ״ו, to the imperative וְהַצִּיתוּהּ in agreement with the context and all the early versions); יָצַג, *Hiph'il* הִצִּיג *to place*, *Hoph'al* הֻצַּג; and probably also in the forms ordinarily derived from נָצַב, viz. נִצַּב (*Niph'al*), הִצִּיב, יַצִּיב, הֻצַּב; at any rate a stem יָצַב is implied by the *Hithpa'ēl* הִתְיַצֵּב; instead of the anomalous וַתִּתַצַּב Ex 2[4] read with the Samaritan ותתיצב, i.e. וַתִּתְיַצֵּב. Besides the common form we find once אֶצֹּק in Is 44[3] (from יָצַק *to pour*) with a *transitive* meaning, beside וַיֵּצֶק *intransitive*, 1 K 22[35]. Elsewhere the *imperfect*

[1] These verbs, like verbs ע״ע (cf. above, note on § 67 *g*), may perhaps have been influenced by the analogy of verbs פ״ן.

consecutive has the form וַיִּצֹק Gn 28[18], 35[14], &c., cf. § 69 *f*, where also other forms of יָצַק are given; וַיֵּיצֶר and יֹצֵר (Is 44[12], 49[8], Jer 1[5] *Qᵉrê*), from יָצַר *to form*, are, however, used in the same sense. Cf. also אֶפְרֹם Ho 10[10]; וַיִּשְׁרָנָה (for וַתִּ according to § 47 *k*) 1 S 6[12]; לִיסֹּד 2 Ch 31[7] (cf. § 69 *n*) and מוּסָּד Is 28[16]. This assimilation is found always with sibilants (most frequently with צ) except in the case of וַיִּכֹּן 1 K 3[15] (so ed. Mant., Ginsb., Kittel; but Jabl., Baer וַיָּכֵן) and in הַלֶּדֶת Gn 40[20], Ez 16[5] (cf. הוּלֶּדֶת verse 4), *infinitive Hoph'al* of יָלַד (cf. נוּלְדוּ § 69 *t*).

§ 72. *Verbs* ע״ו (*vulgo* ע״ע), e.g. קוּם *to rise up*. *Paradigm M.*

Brockelmann, *Semit. Sprachwiss.*, p. 144 ff.; *Grundriss*, p. 605 ff.

a **1.** According to § 67 *a* a large number of monosyllabic stems were brought into agreement with the triliteral form by a strengthening, or repetition, of the second radical, i.e. of the *consonantal* element in the stem. In another large class of stems the same object has been attained by strengthening the *vocalic* element. The ground-form used for these verbs is not, as in other cases (§ 39 *a*), the 3rd *sing. masc. perfect*, but always the *infinitive construct* form (§ 39 *b*), the *û* of which is characteristic also of the *imperative* and of the *imperfect indicative Qal*. These stems are consequently termed verbs ע״ו or more correctly (see below) ע״וּ.[1]

[1] The term ע״ו was consequent on the view that the *Wāw* (or י in the case of verbs ע״י) in these stems was originally consonantal. This view seemed especially to be supported by the return of the *Wāw* in *Pi'ēl* (עִוֵּד, the ו usually passing into י as in קִיַּם, cf. Arabic *qâwwămă*), and by certain forms of the *absolute state* of the nouns of such stems, e.g. מָוֶת *death*, compared with מוּת *to die*. Hence in explaining the verbal forms a supposed stem *qawam* (in verbs ע״י e.g. *šayat*) was always assumed, and יָקוּם was referred to an original *yaqwŭm*, the *infinitive absolute* קוֹם to original *qawôm*, the *participle passive* קוּם to original *qawûm*. It must, however, be admitted: (1) that forms like עִוֵּד, קִיַּם (see *m*) are only to be found in the latest books, and are hence evidently secondary as compared with the pure Hebrew forms קוֹמֵם, &c.; (2) that to refer the verbal forms invariably to the stem קָוַם, leads in many cases to phonetic combinations which are essentially improbable, whereas the assumption of original *middle-vowel* stems renders a simple and natural explanation almost always possible. These ע״וּ stems are therefore to be rigidly distinguished from the real ע״ו stems of the strong forms, such as רָוַח, גָּוַע, &c. (see below, *gg*).—As early as the eleventh century the right view with regard to ע״וּ stems was taken by Samuel Hannagid (cf. Bacher, *Leben und Werke des Abulwalîd*, p. 16); recently by Böttcher (*Lehrbuch*, § 1112), and (also as to ע״ע stems) especially by Müller, Stade, and Wellhausen (see above, § 67 *a*, note). On the other hand, the old view of ו and י as consonants has been recently revived by Philippi, Barth, M. Lambert, and especially Brockelmann (op. cit.).

2. As in the case of verbs ע״ע, the monosyllabic stem of verbs ע״י *b* generally takes the vowel which would have been required in the *second* syllable of the ordinary strong form, or which belonged to the ground-form, since this is essentially characteristic of the verbal form (§ 43 *b*; § 67 *b*). However, it is to be remarked: (*a*) that the vowel, short in itself, becomes of necessity long in an open syllable as well as in a tone-bearing closed *ultima* (except in *Hoph'al*, see *d*), e. g. 3rd *sing. masc. perf.* קָם, *fem.* קָמָה, *plur.* קָמוּ, but in a closed *penultima* קַמְתָּ, &c.[1]; (*b*) that in the forms as we now have them the lengthening of the original short vowel sometimes takes place irregularly. Cf. *f*.

Intransitive verbs *middle e* in the *perfect Qal* have the form מֵת *he c is dead*; verbs *middle o* have the form אוֹר *he shone*, בּוֹשׁ *he was ashamed*, טוֹב *he was good*.[2] Cf. *n–r*.

3. In the *imperfect Qal*, *perfect Niph'al*, and throughout *Hiph'il* and *d Hoph'al* the short vowel of the preformatives in an open syllable before the tone is changed into the corresponding tone-long vowel. In *Qal* and *Niph'al* the original *ă* is the basis of the form and not the *ĭ* attenuated from *ă* (§ 67 *h*; but cf. also *h* below, on יָבוֹשׁ), hence יָקוּם, for *yăqûm*; נָקוֹם for *năqôm*; on the other hand, in the *perfect Hiph'il* הֵקִים for *hăqîm*; *participle* מֵקִים (on the Ṣere cf. *z*); *perfect Hoph'al* הוּקַם for *hŭqam*.

A vowel thus lengthened before the tone is naturally changeable and *e* becomes *vocal Šᵉwâ* when the tone is moved forward, e.g. יְמִיתֶנּוּ *he will kill him*; so also in the 3rd *plur. imperfect Qal* with *Nûn paragogic*; יְמוּתֻנוּן (without *Nûn* יָמוּתוּ). The wholly abnormal *scriptio plena* of *ē* in הַהֱיִמִיר Jer 2[11] (beside הֵמִיר in the same verse) should, with König, be emended to הֲיָמִיר; the incorrect repetition of the interrogative necessarily led to the pointing of the form as *perfect* instead of *imperfect*.—But in *Hoph'al* the *û* is retained throughout as an unchangeable vowel, when it has been introduced by an abnormal lengthening for the tone-long *ō* (as in the *Hoph'al* of verbs ע״ע).

---

[1] In Aramaic, however, always קָמְתָּ; also in Hebrew grammars before Qimḥi קָמְתָּ, קָמְתִּי, &c., are found, but in our editions of the Bible this occurs only in *pause*, e.g. קָמְתִּי Mi 7[8], מָתְנוּ 2 K 7[3.4].

[2] According to Stade (*Grammatik*, § 385 *e* and *f*) the *e* in מֵת is of the nature of a diphthong (from *ai*, which arose from the union of the vowel *ĭ*, the sign of the intransitive, with the *ă* of the root), and likewise the *o* in אוֹר, &c. (from *au*). But *ô* (from *au*) could not, by § 26 *p*, remain in a closed penultima (בֹּשְׁתָּ, &c.); consequently the *o* of these forms can only be tone-long, i.e. due to lengthening of an original *ŭ*, and similarly the *ē* of מֵת to lengthening of an original *ĭ*. This is confirmed by the fact that the *ō* in בֹּשְׁתָּ, בֹּשְׁתִּי, בֹּשְׁנוּ is always, and in בֹּשׁוּ, 3rd *plur. perfect*, nearly always (the instances are 11 to 2), written defectively. Forms like בּוֹשָׁה, בּוֹשׁוּ, אוֹרוּ, &c., are therefore due to orthographic licence.

f **4.** The cases of unusual vowel lengthening mentioned in *b* are: *imperfect Qal* יָקוּם (also in Arabic *yăqûmu*), but *jussive* with normal lengthening (§ 48 *g*), יָקֻם, with retraction of the tone יָקֻם (*yāqŏm*), וַיָּקֻם (in *pause* וַיָּקָם); *imperative* קוּם, with normal lengthening of the *ŭ* in the 2nd *plur. fem.* קֻמְנָה, since, according to § 26 *p*, the *û* cannot be retained in a closed penultima; *infinitive construct* קוּם. In *Hiph'îl* the original *ĭ* is naturally lengthened to *î* (הֲקִים, *imperfect* יָקִים, *jussive* יָקֶם, with retraction of the tone יָקֶם, וַיָּקֶם); on the transference of this *î* to the *Hiph'îl* of the strong verb, cf. § 53 *a*.

g The following forms require special consideration: the *participle Qal* קָם is to be traced to the ground-form with *â* unobscured, Arab. *qâtĭl*, § 9 *q*, and § 50 *b*. On this analogy the form would be *qâĭm*,[1] which after absorption of the *ĭ* became קָם, owing to the predominating character of the *â*. The unchangeableness of the *â* (*plur.* קָמִים, *constr.* קָמֵי, &c.) favours this explanation.

h In the *imperfect Qal*, besides the forms with original *ŭ* (now *û*) there are also forms with original *ă*. This *ă* was lengthened to *ā*, and then further obscured to *ô*; hence especially יָבוֹא (יָבֹא), וַיָּבֹא, &c., from the *perfect* בָּא *he has come*. In the *imperfects* יֵאוֹר (but cf. וְתֵאָרְנָה 1 S 14[27]) and יָבוֹשׁ from the *intransitive perfects* אוֹר, בּוֹשׁ (see above, *c*), most probably also in יֵאָתוּ 2 K 12[9], נָאוֹת Gn 34[15] from an unused אוֹת *to consent*, and perhaps in וַתֵּהֹם 1 S 4[5], &c., as in the cases noticed in § 63 *e* and especially § 67 *n*, the *ē* of the preformative is lengthened from *ĭ* (which is attenuated from original *ă*) and thus *yĭ-bāš* became *yī-bāš*, and finally *yē-bôš*. Finally the *Niph.* נָקוֹם (*nă-qām*), *imperfect* יִקּוֹם from *yiqqām*, originally (§ 51 *m*) *yinqăm*, arises in the same way from the obscuring of *ā* lengthened from *ă*.

i **5.** In the *perfect Niph'al* and *Hiph'îl* a ִי is inserted before the afformatives beginning with a consonant in the 1st and 2nd persons, and ִי— regularly (but see Rem.) in the *imperfect Qal*, sometimes also in the *imperfect Hiph'îl* (as in תְּבִיאֶינָה Lv 7[30], cf. תְּהִילֶּנּוּ Mi 2[12]), before the termination נָה. As in verbs ע״ע (§ 67 *d* and note) these *separating vowels* serve as an artificial opening of the preceding syllable, in order to preserve the long vowel; in the *perfect Hiph'îl*, however, before the ִי, instead of the *î* an *ē* is somewhat often found[2] (as a normal lengthening of the original *ĭ*), especially after *wāw con-*

[1] So in Arabic, prop. *qâ'im*, since the two vowels are kept apart by the insertion of an א, cf. Aram. קָאֵם; but also contracted, as *šâk*, *hâr*, for *šâ'ik*, &c. (cf. Wright's *Gramm. of the Arabic Language*, 2nd ed. vol. i. p. 164).

[2] וַהֲשִׁיבֹתֶם 1 S 6[7] (cf. 2 Ch 6[25]) could only be an orthographic licence for וְהֵשִׁיבֹתֶם; perhaps, however, וְהֵשִׁיב was originally intended.

secutive, Dt 4^{39}, 30^{1}, as well as before the affformatives תֶּם and תֶּן or before suffixes, Dt 22^{2}, 1 S 6^{8}, 1 K 8^{34}, Ez 34^{4}. For in all these cases the tone is removed from the î to the following syllable, and this forward movement of the tone produces at the same time a weakening of the *î* to *ē*; thus הֵקִימוֹתָ, הֲקִימוֹתָ (or הֲקִ׳ ; on הַעֲלֹתָה Ex 19^{23}, cf. *x*), but וַהֲקֵמוֹתָ, &c., Ex 26^{30}, &c.; Dt 4^{39}, Nu 18^{26} (cf., however, וַהֲקִמֹנוּ Mi 5^{4}). In the same way in the 1st *pers. sing.* of the *perfect Niph'al*, the *ô* before the separating vowel is always modified to *û* (נְקוּמוֹתִי) ; cf. *v.* In the *imperfect Qal* and *Hiph'îl* the separating vowel י֫ always bears the tone (תְּקוּמֶיהָ).

k Without the separating vowel and consequently with the tone-long *ō* and *ē* instead of *û* and *î* we find in *imperfect Qal* תְּבֹאנָה (see § 76 *g*) ; תְּשֹׁבֶן Ez 16^{55} (also תְּשׁוּבֶינָה in the same verse) ; וַתָּשֹׁבְנָה 1 S 7^{14} (cf. Ez 35^{9} *Qerê*; on the *Kethibh* תֵּישַׁבְנָה cf. above, note on § 69 *b*) ; וַתָּאֹרְנָה 1 S 14^{27} from אוֹר (*Kethibh* וַתְּרֶאֶינָה *and they saw*, see § 75 *w*) ; in *Hiph'îl*, e.g. הֲנִפֹתָ Ex 20^{25}, also הֲנִיפוֹתִי Jb 31^{21} ; וְהֵטַלְתִּי Jer 22^{26}; תְּשִׁבְנָה Jb 20^{10}; with a separating vowel, e.g. תְּבִיאֶינָה Lv. 7^{30} from בּוֹא. *Segholî* without י occurs in the *imperfect Qal* in תְּמוּתֶנָה Ez 13^{19}, Zc 1^{17} ; and in *Hiph'îl* Mi 2^{12} : the Dageš in the *Nûn* is, with Baer, to be rejected in all three cases according to the best authorities. Wholly abnormal is תְּקֹיְמֶנָה Jer 44^{25}, probably an erroneous transposition of יְמ (for תְּקֻמֶינָה), unless it originates from an incorrect spelling תְּקֹיֵמֶנָה or תְּקִיֵּמֶנָה.

l **6.** The tone, as in verbs ע״ע (cf. § 67 *k*), is also generally retained on the stem-syllable in verbs ע״י before the affformatives ה֫ , ִי , ֶי ; thus קָמָה (but also בָּזָה לְךָ 2 K 19^{21}, probably for the sake of rhythmical uniformity with the following לָעֲנָה לָךְ ; after *wāw consecutive* וְשָׁבָה Is 23^{17}); קָמוּ (but also קָמוּ, cf. Is 28^{7}, 29^{9}, Na 3^{18}, ψ 76^{6}, Pr 5^{6}, La 4^{18}; וְרָצוּ 1 S 8^{11} ; so especially before a following א, cf. § 49 *l*, Nu 13^{32} ; וְנָעוּ Is 19^{1} ; before ע, ψ 131^{1}, Pr 30^{13}, La 4^{14}); תָּקוּמִי, תָּקוּמוּ, but before a *suffix* or with *Nûn paragogic* וַיְקִימֻם 2 Ch 28^{15} ; יְקוּמֻנּוּ Dt 33^{11}, &c.

m **7.** The formation of the conjugations *Pi'ēl*, *Pu'al*, and *Hithpa'ēl* is, strictly speaking, excluded by the nature of verbs ע״י. It is only in the latest books that we begin to find a few secondary formations, probably borrowed from Aramaic, on the analogy of verbs ע״ו (with consonantal ו, see below, *gg*); e.g. the *Pi'ēl* עִוֵּד *to surround*, only in עִוַּנְנִי ψ 119^{61}; and with change of ו to י, קִיְּמוּ Est 9^{31}, קִיְּמוּ Est 9^{27}, *impf.* וַאֲקַיְּמָה ψ 119^{106}, *infin.* קַיֵּם Ez 13^{6}, Ru 4^{7} &c., Est 9^{21} &c., *imperat.* קַיְּמֵנִי ψ 119^{28} ; וְחִיַּבְתֶּם Dn 1^{10} from חוּב *to be guilty*. The *Hithpa'ēl* הִצְטַיְּדוּ Jos 9^{12}, which belongs to the older language, is probably a denominative from צַיִד. On the other hand the otherwise less common conjugation *Pôlēl* (see § 55 *c*), with its passive and reflexive, is usually

employed in the sense of *Pi'ēl* and as a substitute for it, e. g. קוֹמֵם *to set up* from קוּם; מוֹתֵת *to slaughter*, 1 S 14[13], 17[51], 2 S 1[9], from מוּת; רוֹמֵם *to exalt*, passive רוֹמַם, from רוּם; reflexive הִתְעוֹרֵר *to stir up oneself* (cf. יִתְעָרֵר Jb 17[8] in *pause*) from עוּר; reciprocal הִתְבּוֹשֵׁשׁ *to be ashamed before one another*, Gn 2[25]. The conjugation *Pilpēl* (§ 55 *f*), on the analogy of verbs ע״ע, is less common, e. g. טַלְטֵל *to hurl away* from טוּל; כִּלְכֵּל *to contain* from כּוּל; קִרְקֵר *to destroy* from קוּר.

n Remarks.

I. *On Qal.*

1. Of verbs *middle e* and *o*, in which, as in the strong verb, the *perfect* and *participle* have the same form (§ 50. 2), the following are the only examples: מֵת *he is dead, fem.* מֵתָה, 2nd *masc.* מַתָּה (cf. § 44 *g*; § 66 *h*); 1st *sing.* מַתִּי, וָמַתִּי (even in *pause*, Gn 19[19]); *plur.* מָתוּ, 1st *pers.* מַתְנוּ, in *pause* מָתְנוּ; בּוֹשׁ *he was ashamed*, בּשְׁתָּ, בּשְׁתִּי, בּשְׁנוּ, בּשְׁתֶּם; אוֹר *it has shone, plur.* אֹורוּ; טוֹב *to be good*, טֹבוּ. *Participles* מֵת *a dead man* (*plur.* מֵתִים, מֵתֵי); בּוֹשִׁים *ashamed*, Ez 32[30]. For נָד Is 27[11] read נָד, or, with LXX, עַד.

o Isolated anomalies in the *perfect* are: וְשָׁבַת (with the original ending of the *fem.* for וְשָׁבָה) Ez 46[17] (see § 44 *f*); צָקוּן Is 26[16] (see § 44 *l*).—In בָּנוּ 1 S 25[8] (for בָּאנוּ from בוֹא) the א has been dropped contrary to custom. In בֹּאוּ Jer 27[18] (instead of בָּאוּ) the Masora seems to point to the *imperfect* יָבֹאוּ which is what would be expected; as *Yōdh* precedes, it is perhaps simply a scribal error.

p The form קָם occurs (cf. § 9 *b*) with א in the *perfect*, קָאם Ho 10[14], also in the *participles* לָאט *softly*, Ju 4[21], רָאשׁ *poor*, 2 S 12[1.4], Pr 10[4], *plur.* 13[23]; שָׁאטִים *doing despite unto* (unless שֹׁאֲטִים is to be read, from a stem שׁאט whence שָׁאַט Ez 25[15], 36[5]), Ez 28[24.26]; *fem.* 16[57]; also in Ze 14[10] רָאמָה is to be read with Ben-Naphtali for רָאמָה. On the analogy of participles of verbs *middle ō* (like בּוֹשִׁים, see above) קוֹמִים occurs for קָמִים 2 K 16[7] and even with a transitive meaning לוֹט *occultans*, Is 25[7]; בּוֹסִים Ze 1c[5].—*Participle passive*, מוּל *circumcised*; but סוּג *a backslider*, Pr 14[14], and סוּרָה *put aside*, Is 49[21] (cf. Jer 17[13] *Q^ᵉrê*), are verbal adjectives of the form *qāṭūl* (§ 50 *f*), not passive participles. For חָשִׁים *hastening*, Nu 32[17], read חֲמֻשִׁים as in Ex 13[18]; for שׁוּבִי Mi 2[8] read שָׁבֵי.

q 2. Imperfects in *û* almost always have the corresponding *imperative* and *infinitive construct* in *û*, as יָקוּם, *imperative* and *infinitive* קוּם (also defectively written קֻם, יָקֻם); but יָדוּשׁ *he threshes* (*infin.* דּוּשׁ), has *imperative* דּוֹשִׁי (*fem.*), Mi 4[13]; יָמוּט *it slippeth, infinitive* מוֹט (ψ 38[17], 46[3]); cf. נוֹחַ (also נוּחַ) Nu 11[25] and נוֹעַ Is 7[2] (elsewhere נוּעַ) with the *imperfects* יָנוּחַ and יָנוּעַ; לָעוֹז Is 30[2]; שׁוֹב Jos 2[16]; רוֹם Ez 10[17] (verse 16 רוּם).

r Where the *imperfect* (always intransitive in meaning) has *ô* the *imperative* and *infinitive* also have it; thus *imperfect* יָבוֹא (יָבֹא), *infin.* and *imper.* בּוֹא or בֹּא[1]; וַיֹּאר 2 S 2[32], אֹורִי; אֹורוּ, יָבוֹשׁ, בּוֹשׁ, &c.—יָקוֹט Jb 8[14] (if it be a verb at all and not rather a substantive) is formed on the analogy of verbs ע״ע,

[1] In 1 K 14[12] (בְּבֹאָה before a genitive), the text is evidently corrupt: read with Klostermann after the LXX בְּבֹאֵךְ.

since the *imperfect* of קוּם appears as אָקוּם in ψ 95[10]. On the other hand יָקְשׁוּן (as if from קוּשׁ, on the analogy of יָבוֹא, &c.) occurs as *imperfect* of יָקַשׁ (פ״י). The *imperfect* יָדוֹן, with *ô*, Gn 6[3], probably in the sense of *to rule*, has no corresponding *perfect*, and is perhaps intentionally differentiated from the common verb יָדִין *to judge* (from דִּין, ע״י). Or can יָדוֹן be a *jussive* after לֹא (cf. § 109 *d*)? Similarly לֹא תָחוֹס עֵינִי (עֵינְךָ) might be taken as a case of a jussive after לֹא, with irregular *scriptio plena* (as in Ju 16[30]), in Dt 7[16], 13[9], 19[13.21], 25[12], Ez 5[11], 7[4.9], 8[18], 9[10]. But perhaps in all these cases לֹא תָחוֹס was originally intended, as in Is 13[18], Jer 21[7], while cases like יָחֹס ψ 72[13] are to be explained as in § 109 *k*.—The *infinitive absolute* always has *ô*, e.g. קוֹם יָקוּמוּ Jer 44[29].

s 3. In the *imperative* with afformatives (קוּמִי, קוּמוּ) the tone is on the stem syllable (cf., however, עוּרִי Ju 5[12] intentionally varied from עֹורִי; also עוּרִי Zc 13[7] and Is 51[9] beside עֹורִי בֵּיתִי; גּוּלִי Zc 9[9]; צוּרִי Is 21[2], שׁוּבִי ψ 116[7], likewise for rhythmical reasons). So also the lengthened form, as שׁוּבָה Jer 3[12], ψ 7[8], and עוּרָה verse 7. But if an א follows in close connexion, the lengthened *imperative* usually has the form קוּמָה, &c.,[1] in order to avoid a hiatus, e.g. Ju 4[18], ψ 82[8]; hence also before יְהוָה, *Qᵉrê perpetuum* אֲדֹנָי (§ 17 *c*), e.g. ψ 3[8], 7[7] קוּמָה (cf., however, in the same verse עוּרָה and in Jer 40[5], שֻׁבָה before א), and so even before ר ψ 43[1], 74[22], &c. (רִיבָה).

t 4. In the *jussive*, besides the form יָקָם (see above, *f*), יָקוֹם also occurs (as subjunctive, Ec 12[4]; נָסוֹג ψ 80[19] may also, with Delitzsch, be regarded as a voluntative), incorrectly written *plene*, and יָקֹם (Gn 27[31]; cf. Ju 6[18], Pr 9[4.16]), which, however, is only orthographically different from יָקוּם (cf. Jer 46[6]). In the *imperfect consecutive* (וַיָּקָם, in *pause* וַיָּקֹם, see above, *f*) if there be a guttural or ר in the last syllable, *ă* often takes the place of *ŏ*, e.g. וַיָּנַח *and he rested*; וַיָּנַע *and it was moved*; וַיָּסַר *and he turned aside*, Ju 4[18], Ru 4[1] (distinguished only by the sense from *Hiph'il* וַיָּסַר *and he removed*, Gn 8[13]); וַיָּצַר Ex 21[4], 2 K 5[23], 17[5] (but also וַיָּגָר from both גּוּר *to sojourn*, and גּוֹר *to fear*); וַיָּעַף (to be distinguished from וַיָּעָף *and he flew*, Is 6[6]) *and he was weary*, Ju 4[21], 1 S 14[28.31], 2 S 21[15], but probably in all these cases וַיֵּעַף for וַיִּיעַף from יָעֵף is intended. For ותלוש 2 S 13[8] *Kᵉth.*, the Qᵉrê rightly requires וַתִּלָּשׁ. On the other hand, in an open syllable always וַיָּקוּמוּ, וַיָּסוּרוּ, &c. On וַיָּאקֻם (וַיָּאקֹם), see § 49 *e*.

u Examples of the full plural ending ן with the tone (see above, *l*) are תְּמַתֵּן Gn 3[3.4]; יְנוּסַּן ψ 104[7]; יְרוּצַן Jo 2[4.7.9].

II. *On Niph'al.*

v 5. The form of the 1st *sing. perf.* נָקוּמֹותִי, which frequently occurs (נָסוּגֹתִי, נָפוּגֹתִי, cf. also the *ptcp. plur.* נְבוּכִים Ex 14[3]), serves as a model for the 2nd *sing.* נָקוּמֹותָ, נָקוּמוֹת, and the 1st *plur.* נָקוּמֹונוּ given in the paradigm, although no instances of these forms are found; but of the 2nd *plur.* the

[1] Cf. Delitzsch's commentary on ψ 3[8].

only examples found have *ô* (not *û*), viz. נְפֹוצֹתֶם *ye have been scattered*, Ez 11[17], 20[34.41], and וְנִקְטֹתֶם *and ye shall loathe yourselves*, Ez 20[43], 36[31].—To the *ĭ* (instead of *ă*) of the preformative may be traced the *perfect* נֶעְוֹר Zc 2[17] (analogous to the *perfect* and *participle* נָמוֹל, see below, *ee*), *imperfect* יֶעְוַר for *yi*ʿ*ōr*.—The *infinitive construct* הַדּוּשׁ occurs in Is 25[10]; in לֶאְוֹר Jb 3[30], the Masora assumes the elision of the ה (for לְהָאִוֹר); but probably לָאוֹר (*Qal*) is intended (see § 51 *l*).—נַמּוֹג Is 14[31], נָסוֹג Is 59[13] are to be regarded as *infinitives absolute*.

III. *On Hiph'il, Hoph'al, and Pi'lēl.*

w 6. Examples of the *perfect* without a separating vowel (see above, *k*) are: הֱבֵאת, &c. (see further, § 76 *g*); הֲמַתָּה (from מוּת) for *hēmáth-tā* (cf. § 20 *a*); הֲכַנּוּ 1st *plur. perfect Hiph'il* from כּוּן 2 Ch 29[19], even הֲמִתֶּם (§ 27 *s*) Nu 17[6], &c.; cf. 1 S 17[35], 2 S 13[28], also וְהֲמִתָּן Ex 1[16], and וְהֲמִתִּיהָ Ho 2[5]; but elsewhere, with *wāw consecutive* וְהֲמַתִּי Is 14[30]; cf. וְהֲטַלְתִּי Jer 16[13], and וְהֲנַפְתִּי Ex 29[24], &c.—In these cases the *ē* of the first syllable is retained in the secondary tone; elsewhere in the second syllable before the tone it becomes ֵ (1 Ch 15[12], &c.) or more frequently ֶ, and in the syllable before the antepenultima it is necessarily ֶ (e. g. וְהַקְמֹתִי Gn 6[18]). Before a suffix in the 3rd *sing. masc.* (except Gn 40[19]) and *fem.*, and in the 3rd *plur.*, the vowel of the initial syllable is *Haṭeph-Segôl*, in the other persons always *Haṭeph-Pathaḥ* (König); on הֲקִמֹתוֹ 2 K 9[2], ψ 89[44], cf. Ex 19[23], Nu 31[28], Dt 4[39], 22[2], 27[2], 30[1], Ez 34[4], and above, *i*. The 3rd *fem. perf. Hiph.* הֲמַתָּה 1 K 21[23] is quite abnormal for הֵמִיתָה from סוּת or סִית.

x As in verbs ע״ע with ה for their first radical (§ 67 *w*), all the forms of עוּד Ex 19[23] (where against the rule given under *i* we find הֶעֱרֹתָה with *ē* instead of *î*), Dt 8[19], Neh 9[34], Jer 42[19], and עוּר Is 41[25], 45[13], take Pathaḥ in these conjugations instead of ֶ. The irregular וְהוֹשְׁבוֹתִים Zc 10[6] has evidently arisen from a combination of two different readings, viz. וְהוֹשַׁבְתִּים (from יָשַׁב) and וְהֵשִׁבוֹתִים (from שׁוּב): the latter is to be preferred.—On הֱבִישׁ and הוֹבִישׁ as a (metaplastic) *perfect Hiph'il* of בּוֹשׁ, cf. § 78 *b*.

y 7. In the *imperative*, besides the short form הָקֵם (on הָשֵׁב Is 42[22] with Silluq, cf. § 29 *q*; but in Ez 21[35] for הָשֵׁב read the *infinitive* הָשֵׁב) the lengthened form הָקִימָה is also found. With *suffix* הֲקִימֵנִי, &c. The *imperative* הָבִיא Jer 17[18] is irregular (for הָבֵא Gn 43[16]); perhaps הָבִיא (as in 1 S 20[40]; cf. 2 K 8[6]) is intended, or it was originally הָבִיאָה.

z In the *infinitive*, elision of the ה occurs in לָבִיא Jer 39[7], 2 Ch 31[10] (for לְהָבִיא); ה֫ *fem.* is added in לַהֲנַפָּה Is 30[28]; cf. Est 2[18] and the analogous *infinitive Haph'el* in biblical Aramaic, Dn 5[20].—As *infinitive absolute* הָכֵן occurs in Ez 7[14] (perh. also Jos 4[3], Jer 10[23]).—The *participles* have *ē*, on the analogy of the *perfect*, as the vowel of the preformative, like verbs ע״ע (§ 67 *i*). On מֵבִי 2 S 5[2], &c. (in *Kᵉthibh*), see § 74 *k*.

aa On the shortened forms of the *imperfect* (וַיָּקֶם, יָקֶם, but always וַיָּבֵא; in the *jussive* also with retraction of the tone אַל־תָּשֵׁב 1 K 2[20]) see above, *f*. With a guttural or ר the last syllable generally has *Pathaḥ* (as in *Qal*), e. g. וַיַּעַר *and he testified*, 2 K 17[13]; יָרַח *let him smell*, 1 S 26[19]; וַיָּרַח Gn 8[21]; וַיָּסַר

and he took away, Gn 8[13]. The 1st *sing.* of the *imperfect consecutive* commonly has the form וְאָשִׁיב Neh 2[20], or, more often, defectively וְאָעֵר 1 K 2[42], less frequently the form וְאָשֵׁב Jos 14[7].—For אָסֵף Zp 1[2] (after אֶסְּפָה) and in verse 3, read אֹסֵף from אָסַף, on the analogy of אֹמֵר § 68 *g*: similarly in Jer 8[13] אֹסִיפֵם instead of אֲסִיפֵם.

bb In the *imperfect Pôlēl* the tone is moved backwards before a following tone-syllable, but without a shortening of the vowel of the final syllable; e.g. תְּרוֹמֵם Pr 14[34]; תְּחוֹלֵל לוֹ Jb 35[14]; cf. Pr 25[23], and acc. to Baer וַתִּתְבֹּנֵן בִּי Jb 30[20] (ed. Mant., Ginsb. וְתִתְבֹּנֵן בִּי), always in principal pause; on the *Metheg* with *Ṣere*, cf. § 16*f*. γ.—As *Pôlal* cf. יְרֹעָע Is 16[10].

As *participle Hoph'al* הַמּוּשָׁב occurs in close connexion, Gn 43[12]; cf. § 65 *d*.

cc Peculiar contracted forms of *Pôlēl* (unless they are transitives in *Qal*) are וַיְכֹנְנֵנִי Jb 31[15], יְעוּדֶנּוּ 41[2], וַתְּמֹגְגֵנִי Is 64[6] for וַיְכֹנְנֵנִי, &c. [but read וַיְכֹנְנֵנִי (§ 58 *k*), יְעִירֶנּוּ or יְעוֹרְרֶנּוּ, and וַתְּמַגְּגֵנִי]; also תְּרֹמֵם Jb 17[4], for תְּרוֹמֵם.—In Is 15[5] יְעֹעֲרוּ appears to have arisen from the *Pilpel* יְעַרְעֲרוּ, the *ă* after the loss of the ר having been lengthened to *ā*, which has then been obscured to *ô*.—For the strange form בְּתִקְוֹמְמֶיךָ ψ 139[21], which cannot (according to § 52 *s*) be explained as a *participle* with the מ omitted, read בְּמִתְקָךְ.

IV. *In General.*

dd 8. The verbs ע״ו are primarily related to the verbs ע״ע (§ 67), which were also originally biliteral, so that it is especially necessary in analysing them to pay attention to the differences between the inflexion of the two classes. Several forms are exactly the same in both, e.g. *imperfect Qal* and *Hiph'il* with *wāw consecutive*, the whole of *Hoph'al*, the *Pi'lēl* of verbs ע״ו, and the *Pō'ēl* of verbs ע״ע; see § 67 *z*. Owing to this close relation, verbs ע״ו sometimes have forms which follow the analogy of verbs ע״ע, e.g. *perfect Qal* בּוֹ *he has despised* (from בּוּז, as if from בָּזַז) Zc 4[10]; *perfect Niph'al* נָמַר Jer 48[11] (for נָמוֹר from מוּר, as if from מָרַר). The same explanation equally applies to נָקְטָה Jb 10[1] for נָקַטָה (cf. § 67 *dd*) = נָקוֹטָה from קוּט, and נָקְטוּ Ez 6[9] (for נָקוֹטוּ); יְרֻמּוּ Ez 10[17] and וְיִרֹּמוּ verse 15; הָרֹמוּ (*imperative*) Nu 17[10]; יְסֹג Mi 2[6]; *Hiph'il perfect* הֵתָז Is 18[5] for הֵתִז (cf. § 29 *q*), which is for הֵתִיז from תּוּז. On the other hand the *imperfects* יָמֵר Ez 48[14] (unless it be intended for יָמוֹר, cf. ψ 15[4]) and יָפֵחַ Hb 2[3], are to be regarded according to § 109 *i*, simply as rhythmically shortened forms of יָמִיר and יָפִיחַ.

ee 9. In common with verbs ע״ע (§ 67 *g*) verbs ע״ו sometimes have in *Niph'al* and *Hiph'il* the quasi-Aramaic formation, by which, instead of the long vowel under the preformative, they take a short vowel with *Dageš forte* in the following consonant; this variety is frequently found even along with the ordinary form, e.g. הִפִּית *to incite*, imperfect יַפִּית (also יָסִית, הֵסִית, יָסִית); הֲפִיג, imperfect יַפִּיג *to remove* (from סוּג), also *Hoph'al* הֻפַּג Is 59[14] (on הֻקַּם cf. § 29 *g*); sometimes with a difference of meaning, as הֲנִיחַ *to cause to rest*,[1] but הִנִּיחַ (*imperfect* יָנִיחַ, *consecutive* וַתַּנַּח Gn 39[16]; *imperative* הַנַּח, *plur.* הַנִּיחוּ) *to set down*; for וְהִנִּיחָה (Baer, Ginsburg וְהֵנִ׳) Zc 5[11] (which at any rate could only be explained as an isolated passive of *Hiph'il* on the analogy of the biblical Aramaic הֻקִימַת Dn 7[4]) we should probably read וְהֻנִּיחָה with

[1] As the passive of this *Hiph'il* we should expect the *Hoph'al* הוּנַּח, which is, no doubt, to be read for הוּנָּח in La 5[5].

Klostermann after the LXX. In Dn 8^{11} the *K^ethibh* הרים is intended for a *perfect Hiph'il*. There is also a distinction in meaning between יָלִין *to spend the night*, *to remain*, and יַלִּין Ex 16^{7} *Q^erê* (*K^ethibh* תְּלוֹנוּ; conversely, verse 2 *K^ethibh* יַלִּינוּ, *Q^erê* יְלֹנוּ), *participle* מַלִּין Ex 16^{8}, Nu 14^{27}, 17^{20}, *to be stubborn*, *obstinate*: in the latter sense from the form יָלִין only וַיִּלֶּן is found, Ex 17^{3}. Other examples are *Niph'al* נִמּוֹל *he was circumcised*, Gn $17^{26\,f.}$; *participle* 34^{22} (from מוּל, not מָלַל); נָעוֹר *he is waked up*, Zc 2^{17} (see above, *v*); *Hiph'il* הֵילִילוּ La 1^{8}; יַלְּיזוּ Pr 4^{21}.

ff Perhaps the same explanation applies to some forms of verbs *first guttural* with *Dageš forte implicitum*, which others derive differently or would emend, e. g. וַתַּחַשׁ for וַתְּחַשׁ *and she hastened* (from חוּשׁ) Jb 31^{5}; וַיַּעַט (another reading is וַיְעַט), וְתַּעַט 1 S 15^{19}, 25^{14} (14^{32} *Q^erê*) from עוּט or עִיט *to fly at anything*. Both, as far as the first is concerned, would be correct *apocopated imperfects* from חָשָׁה and עָטָה (ל״ה), but these stems only occur with a wholly different meaning.

gg 10. Verbs with a consonantal *Wāw* for their second radical, are inflected throughout like the strong form, provided the first or third radical is not a weak letter, e. g. חָוַר, *imperfect* יְחוַר *to be white*; גָּוַע, *imperfect* יָגְוַע *to expire*; רָוַח *to be wide*; צָוַח *to cry*; *Pi'ēl* עִוֵּל, *imperfect* יְעַוֵּל *to act wickedly*; עָוַת *to bend*, *Hithpa'ēl* הִתְעַוֵּת *to bend oneself*; and this is especially the case with verbs which are at the same time ל״ה, e. g. צָוָה, *Pi'ēl* צִוָּה *to command*, קָוָה *to wait*, רָוָה *to drink*, *Pi'ēl* רִוָּה (on אֲרַוֶּיךָ Is 16^{9}, see § 75 *dd*) and *Hiph'il* הִרְוָה *to give to drink*, &c.

§ 73. *Verbs middle i* (*vulgo* ע״י), e. g. בִּין *to discern*. *Paradigm N.*

a **1.** These verbs agree, as regards their structure, exactly with verbs ע״ו, and in contrast to them may be termed ע״י, or more correctly, *'ayin-î* verbs, from the characteristic vowel of the *impf.*, *imper.*, and *infin. constr.* This distinction is justified in so far as it refers to a difference in the pronunciation of the *imperfect* and its kindred forms, the *imperative* and *infin. constr.*—the ע״ו verbs having *û* lengthened from original *ŭ* and ע״י having *î* lengthened from original *ĭ*. In other respects verbs ע״י simply belong to the class of really monosyllabic stems, which, by a strengthening of their *vocalic* element, have been assimilated to the triliteral form[1] (§ 67 *a*). In the *perfect Qal* the monosyllabic stem, as in ע״ו, has *ā* lengthened from *ă*, thus: שָׂת *he has set*; *infinitive* שִׂית, *infinitive absolute* שׂוֹת, *imperative* שִׂית, *imperfect* יָשִׂית, *jussive* יָשֶׂת (§ 48 *g*), *imperfect consecutive* וַיָּשֶׂת.—The *perfect Qal* of some verbs

[1] That verbs ע״ו and ע״י are developed from biliteral roots at a period before the differentiation of the Semitic languages is admitted even by Nöldeke (*Beiträge zur sem. Sprachwiss.*, Strassburg, 1904, p. 34 ff.), although he contests the view that בִּינֹתִי and רִיבֹתָ are to be referred to *Hiph'il* with the preformative dropped.

used to be treated as having a double set of forms, a regular series, and others like *Hiph'îl* without the preformative, e. g. בִּין Dn 10[1]; בִּינֹתִי Dn 9[2], also בַּגְנָתְּ ψ 139[2]; רִיבוֹתְ *thou strivest*, Jb 33[13], also רַבְתָּ La 3[58]. The above *perfects* (בִּין, רִיב, &c.) might no doubt be taken as forms *middle ē* (properly *ĭ*), the *ĭ* of which has been lengthened to *î* (like the *ŭ* lengthened to *û* in the *imperfect Qal* of קוּם). It is more probable, however, that they are really shortened forms of *Hiph'îl*. This is supported by the fact that, especially in the case of בִּין, the shortened forms are few and probably all late, while the corresponding unshortened forms with the same meaning are very numerous, e. g. *perfect* הֲבִינוֹתָם (but בִּין only in Dn 10[1]), *infinitive* הָבִין (but *infin. abs.* בִּין only in Pr 23[1]), *imperative* הָבֵן (only in Dn 9[23] בִּין immediately before וְהָבֵן, also בִּינוּ three times, and בִּינָה ψ 5[2]), *participle* מֵבִין.[1] Elsewhere *Hiph'îl*-forms are in use along with actual *Qal*-forms with the same meaning, thus: מֵרִיב (also רָב), מֵשִׂים *placing* (but only in Jb 4[20], which, with the critically untenable הָשִׂימִי Ez 21[21], is the only instance of שׂוּם in *Hiph'îl*), מֵנִיחַ *breaking forth* Ju 20[33], with *infin. Qal* נִיחוֹ; הֵחִישׁוּ *they rushed forth* Ju 20[37], with חָשׁ, חָשְׁתִּי; מֵצִיץ *glancing*, also in *perfect* צָץ; הֵקִיא *he spat out*, with *imperat. Qal* קִיא. As *passives* we find a few apparent *imperfects Hoph'al*, which are really (according to § 53 *u*) *imperfects passive* of *Qal*, e. g. יוּחַל Is 66[8] from חִיל *to turn round*, יוּשַׁר from שִׁיר *to sing*, יוּשַׁת from שִׁית *to set*.

2. The above-mentioned *Hiph'îl*-forms might equally well be derived *b* from verbs ע״ו; and the influence of the analogy of verbs ע״ו is distinctly seen in the *Niph'al* נָבוֹן (ground-form *nabān*), *Pôlēl* בּוֹנֵן, and *Hithpôlēl* הִתְבּוֹנֵן. The very close relation existing between verbs ע״י and ע״ו is evident also from the fact that from some stems both forms occur side by side in *Qal*, thus from חִיל *to turn round*, *imperative* also חוּלִי Mi 4[10]; שִׂים *to place*, *infinitive construct* commonly שׂוּם (2 S 14[7] שִׂים *Qᵉre*), *imperfect* יָשִׂים, but Ex 4[11] יָשׂוּם. In other verbs one form is, at any rate, the more common, e. g. גִּיל *to exult* (גּוֹל only Pr 23[24] *Kᵉthibh*); from לִין (perhaps denominative from לַיִל) *to spend the night*, לָלַן occurs six times as *infinitive construct*, לִין only in Gn 24[23]; but the *imperative* is always לִין, &c.—Of verbs ע״י the most common are שִׁית *to set*, רִיב *to strive*, דִּין *to judge*, שִׂישׂ *to rejoice*; cf. also *perfect* כָּל (*middle*

[1] Since בנת ψ 139[2] might be intended for בִּנָּתְּ, there remains really no form of בין which must *necessarily* be explained as a Qal, except the *ptp. plur.* בָּנִים Jer 49[7]. Nevertheless it is highly probable that all the above instances of Hiph'îl-forms, parallel with Qal-forms of the same meaning, are merely due to a secondary formation from the *imperfects Qal* יָבִין, יָשִׂים, &c., which were wrongly regarded as *imperfects Hiph'îl*: so Barth, *ZDMG.* xliii. p. 190 f., and *Nominalbildung*, p. 119 f.

Yôdh in Arabic) *to comprehend, to measure*, Is 40[12]; עִים (as in Arabic and Syriac) *to rush upon*, and the denominative *perfect* קַיִן (from קַיִץ) *to pass the summer*, Is 18[6]. On the other hand, וְרִיגוּם *and they shall fish them*, Jer 16[16], generally explained as *perfect Qal*, denominative from דָּג *fish*, probably represents a denominative *Pi'ēl*, וְרִיגֵּם.

c Corresponding to verbs properly ע״ו, mentioned in § 72 *gg*, there are certain verbs ע״י with consonantal *Yôdh*, as אָיַב *to hate*, עָיֵף *to faint*, הָיָה *to become, to be*, חָיָה *to live*.

d Rem. 1. In the *perfect Qal* 3rd *fem. sing.* וְלָנָה occurs once, Ze 5[4], for וְלָנָה, with the weakening of the toneless *ā* to *ĕ* (as in the *fem. participle* זוֹרֶה Is 59[5]); cf. the analogous examples in § 48 *l* and § 80 *i*.—2nd *sing. masc.* שַׁתָּה ψ 90[8], *Qᵉrê* (before ע; cf. § 72 *s*); 1st *sing.* once שַׁתִּי ψ 73[28], *milra'*, without any apparent reason; 1st *plur.* וָלַנּוּ Ju 19[13] for *lán-nû*. The lengthened *imperative* has the tone on the ultima before gutturals, רִיבָה יהוה ψ 35[1]; see further, § 72 *s*.—Examples of the *infinitive absolute* are: רֹב *litigando*, Ju 11[25], Jb 4c[2]; שׂוֹם Jer 42[15]; שׂת *ponendo*, Is 22[7]. On the other hand, רִיב יָרִיב (for רֹב) Jer 5c[34], בִּין תָּבִין Pr 23[1], חול תחיל Ez 30[16] *Kᵉth.*, are irregular and perhaps due to incorrect *scriptio plena*; for the last the *Qᵉrê* requires הגל תָּחוּגֹל, but read חוֹל; cf. § 113 *x*.

e 2. The *shortened imperfect* usually has the form יָבֶן, יָשֶׁת, יָשֵׂם; more rarely, with the tone moved back, e.g. וַיָּרָב לוֹ Ju 6[31], cf. Ex 23[1], אַל־תָּשֶׁת 1 S 9[20]. So with *wāw consecutive* וַיָּשֶׂם *and he placed*, וַיָּבֶן *and he perceived*; with a middle guttural וַיַּעַט בָּהֶם 1 S 25[14] (see § 72 *ee*); with ר as 3rd radical, וַתָּשַׂר Ju 5[1]. As jussive of לִין, תָּלֶן is found in Ju 19[20] (in *pause*) and Jb 17[2], for תָּלֵן.—For אַל־תָּרוֹב Pr 3[30] *Kᵉth.* (*Qᵉre* תָּרִיב) read תָּרָב.

f 3. As *participle active Qal* לָן *spending the night*, occurs once, Neh 13[21]; *participle passive* שִׂים Nu 24[21], 1 S 9[24], Ob[4]; *feminine* שׂוּמָה 2 S 13[32], in the *Qᵉrê*, even according to the reading of the Oriental schools (see p. 38, note 2): the *Kᵉthîbh* has שִׂימָה. A *passive of Qal* (cf. above, § 52 *e* and *s*, and § 53 *u*) from שִׂים may perhaps be seen in וַיִּישֶׂם Gn 5c[26] (also Gn 24[33] *Kᵉthîbh* ויישם, *Qᵉrê* וַיּוּשָׂם; the Samaritan in both places has ויושם), and also in יִסָּךְ Ex 3c[32], Samaritan יוסך. Against the explanation of יסך as a *Hoph'al*-form from סוּךְ, Barth (*Jubelschrift . . . Hildesheimer*, Berlin, 1890, p. 151) rightly urges that the only example of a Hiph'il of סוּךְ is the doubtful וְיָסֶךְ, which is probably an *i*-imperfect of *Qal*.—The explanation of יישם, &c., as a *passive* of *Qal* arising from *yiysam*, &c. = *yuysam* (so Barth, ibid., note 1), is certainly also unconvincing, so that the correctness of the traditional reading is open to question.

* * * * * *

g 4. In verbs ע״א the א always retains its consonantal value; these stems are, therefore, to be regarded as verbs *middle Guttural* (§ 64). An exception is יָנְאִין Ec 12[5] if it be *imperfect Hiph'il* of נאין (for יְנַאְיִן); but if the form has really been correctly transmitted, it should rather be referred to נָצִין, and regarded as incorrectly written for יָנִין. On נָאוּ (from נָוָה), which was formerly treated here as ע״א, see now § 75 *x*.

§ 74. *Verbs* ל״א, e. g. מָצָא *to find. Paradigm O.*

a The א in these verbs, as in verbs פ״א, is treated in some cases as a consonant, i. e. as a guttural, in others as having no consonantal value (as a quiescent or vowel letter), viz.:

1. In those forms which terminate with the א, the final syllable always has the regular vowels, if long, e. g. מֹצֵא, מְצֵא, מָצוֹא, הִמְצִיא, i. e. the א simply quiesces in the long vowel, without the latter suffering any change whatever. It is just possible that after the altogether heterogeneous vowel *û* the א may originally have preserved a certain consonantal value. On the other hand, if the final א quiesces in a preceding *ă* (as in the *perfect, imperfect,* and *imperative Qal,* in the *perfect Niph'al,* and in *Pu'al* and *Hoph'al*) this *ă* is necessarily lengthened to *ā,* by § 27 *g,* as standing in an open syllable; e. g. מָצָא, יִמְצָא, &c.

b The *imperfect* and *imperative Qal* invariably have *ā* in the final syllable, on the analogy of verbs *tertiae gutturalis*; cf., however, § 76 *e*.—In the *imperfect Hithpa'ēl* *ā* occurs in the final syllable not only (according to § 54 *k*) in the principal pause (Nu 31[23]), or immediately before it (Jb 10[16]), or with the lesser disjunctives (Lv 21[1.4], Nu 19[13.20]), but even out of pause with *Mer'ekha,* Nu 6[7], and even before *Maqqeph* in Nu 19[12].

c 2. When א stands at the end of a syllable before an affomative beginning with a consonant (ת, נ), it likewise quiesces with the preceding vowel; thus in the *perfect Qal* (and *Hoph'al,* see below) quiescing with *ă* it regularly becomes *Qameṣ* (מָצָאתָ for מָצַאְתָּ, &c.); but in the *perfect* of all the other active and reflexive conjugations, so far as they occur, it is preceded by *Ṣere* (נִמְצֵאתָ, &c.), and in the *imperative* and *imperfect* by *Seghôl,* מְצֶאנָה, תִּמְצֶאנָה.

d (*a*) The *Seghôl* of these forms of the imperfect and imperative might be considered as a modification, and at the same time a lengthening of an original *ă* (see § 8 *a*). In the same way the *ē* of the *perfect* forms in *Pi'ēl, Hithpa'ēl,* and *Hiph'il* might be traced to an original *i* (as in other cases the *ē* and *i* in the final syllable of the 3rd *sing. masc. perfect* of these conjugations), although this *i* may have only been attenuated from an original *ă*. According to another, and probably the correct explanation, however, both the *Ṣere* and the *Seghôl* are due to the analogy of verbs ל״ה (§ 75 *f*) in consequence of the close relation between the two classes, cf. § 75 *nn*.—No form of this kind occurs in *Pu'al*; in the *perfect Hoph'al* only the 2nd *masc. sing.* הָבֻאתָה Ez 40[4], lengthened according to rule.

c (*b*) Before suffixes attached by a connecting vowel (e. g. יִקְרָאֵנִי) the א retains its consonantal value; so before ךָ and כֶם, e. g. אֶמְצָאֲךָ Ct 8[1]; הִבָּרְאָךְ Ez 28[13] (cf. § 65 *h*), not אֶמְצָאךָ, &c., since these suffixes, by § 58 *f*, are likewise attached to the verb-form by a connecting vowel in the form of *Śewâ mobile*.—As *infinitive Qal* with suffix notice מָחֳאָךְ Ez 25[6]; *participle* with suffix בֹּרְאֶךָ Is 43[1]; *infinitive Pi'ēl* בְּטַמְּאָכֶם.—The doubly anomalous form יִקְרָאוֹ Jer 23[6] (for יִקְרָאֶהוּ or יִקְרָאֶנּוּ) is perhaps a *forma mixta* combining the readings יִקְרָאוֹ and יִקְרָאֻהוּ.

f 3. When א begins a syllable (consequently before afformatives which consist of or begin with a vowel, as well as before suffixes) it is necessarily a firm consonant, and the form then follows the analogy of the strong verb, e. g. מָצָאתָ *māṣᵉ'ā*, מָצְאוּ, &c. (in *pause* מָצָאתָ, מָצְאוּ).

Remarks.

g 1. Verbs *middle e*, like מָלֵא *to be full*, retain the *Ṣere* also in the other persons of the *perfect*, e. g. מָלְאוּ (מָלְאוּ Est 7⁵ has ֶ owing to its transitive use; for יְרֵאתֶם Jos 4²⁴ read with Ewald יִרְאֵתֶם). Instead of מָצְאָה the form קָרְאַת *she names*, on the analogy of the ל״ה-forms noticed in § 75 *m*, occurs in Is 7¹⁴ (from קָרְאַת, cf. § 44 *f*), and with a different meaning (*it befalls*) in Dt 31²⁹, Jer 44²³, in both places before א, and hence, probably, to avoid a hiatus (on the other hand, וְחָטְאַת Ex 5¹⁶, could only be the 2nd *sing. masc.*; the text which is evidently corrupt should probably be emended to וְחָטְאַתָּ לְעַמֶּךָ with the LXX); in *Niph'al* נִפְלְאַת ψ 118²³; in *Hoph'al* הָבְאַת Gn 33¹¹.—The 2nd *fem. sing.* is written קָרְאַתְ by Baer, Gen 16¹¹, &c., according to early MSS.

h 2. The *infin. Qal* occurs sometimes on the analogy of verbs ל״ה (גְּלוֹת, &c., see § 75 *nn*) in the feminine form; so always מְלֹאת *to fill* (as distinguished from מְלֹא *fullness*), Lv 8³³, 12⁴·⁶, 25³⁰, Jer 29¹⁰, Ez 5², also written מְלֹאוֹת Jer 25¹², Jb 20²², &c., and מְלוֹאת Est 1⁵. Cf. further, קְרֹאת Ju 8¹; שְׁנֹאת Pr 8¹³; before suffixes, Ez 33¹², and likewise in *Niph.* Zc 13⁴; also in *Pi'el* לְמַלֹּאת Ex 31⁵, 35³³, or לְמַלְּאוֹת Dn 9², &c. *Kᵉthibh*; with suffix 2 S 21².—On the (aramaïzing) *infinitives* מַשֵּׂא and מַשָּׂאוֹת, see § 45 *e*; on לִקְרַאת *obviam*, § 19 *k*.—בְּמֹצַאֲכֶם *when ye find*, Gn 32²⁰, stands, according to § 93 *q*, for מְצֹאֲכֶם. The tone of the lengthened *imperative* רְפָאֶה Ps 41⁵ as *Milᵉra'* (before נַפְשִׁי) is to be explained on rhythmical grounds; cf. the analogous cases in § 72 *s*.—The 2nd *fem. plur. imperative* in Ru 1⁹ has, according to Qimḥi, the form מְצֶאנָה and in verse 20 קְרֶאנָה; on the other hand, the Mantua edition and Ginsburg, on good authority, read מְצָאנָה, קְרָאנָה.

i 3. The *participle fem.* is commonly contracted, e. g. מֹצַאת (for מֹצְאָאת) 2 S 18²², cf. Est 2¹⁵; so *Niph'al* נִפְלַאת Dt 30¹¹, Zc 5⁷ (but נִשְׂאָה Is 30²⁵), and *Hoph'al*, Gn 38²⁵; less frequent forms are מוֹצְאָת Ct 8¹⁰; נְשֹׂאת 1 K 10²² (cf. § 76 *b*, שְׂאֵת beside לָשֵׂאת as *infinitive construct* from נָשָׂא) and without א (see *k*) יוֹצֵת (from יָצָא) Dt 28⁵⁷. In the forms חֹטְאִים *sinning*, 1 S 14³³, cf. ψ 99⁶; בֹּרְאָם *feigning them*, Neh 6⁸, the א is elided, and is only retained orthographically (§ 23 *c*) after the retraction of its vowel; see the analogous cases in § 75 *oo*.—On the *plur. masc. ptcp. Niph.* cf. § 93 *oo*.

k 4. Frequently an א which is quiescent is omitted in writing (§ 23 *f*): (*a*) in the middle of the word, e. g. בָּנוּ 1 S 25⁸; מָצָתִי Nu 11¹¹, cf. Jb 1²¹; צָמָתִי Ju 4¹⁹, cf. Jb 32¹⁸. In the *imperfect* תִּשָּׂנָה Jer 9¹⁷, Zc 5⁹, Ru 1¹⁴ (but the same form occurs with *Yodh* pleonastic after the manner of verbs ל״ה in Ez 23⁴⁹, according to the common reading; cf. § 76 *b* and Jer 50²⁰); in *Pi'el* אֲחַשְּׂנָה (after elision of the א, cf. § 75 *oo*) Gn 31³⁹; and also in *Niph'al* נִטְמֵתֶם Lv 11⁴³; cf. Jos 2¹⁶. (*b*) at the end of the word; וַיִּבֹו 1 K 12¹² *Kᵉthibh*; *Hiph'il* הֶחֱטִי 2 K 13⁶, cf. Is 53¹⁰ (הֶהֱלִיא for *perfect Hiph'il* of חָלָה formed

after the manner of verbs ל״א); in the *imperfect Hiph'il* יַשֵּׁ֫ע ψ 55[16] *K^ethibh*; יָנִי ψ 141[5]; אָבִי 1 K 21[19], Mi 1[15]; in the *infinitive*, Jer 32[35]; in the *participle*, 2 S 5[2], 1 K 21[21], Jer 19[15], 39[16], all in *K^ethibh* (מֵבִי, always before א, hence perhaps only a scribal error).

l 5. In the *jussive*, *imperfect consecutive*, and *imperative Hiph'il* a number of cases occur with *i* in the final syllable; cf. יַשֵּׁא Is 36[14] (in the parallel passages 2 K 18[29], 2 Ch 32[15] יַשִּׁיא); וַיָּבִיא Neh 8[2] (before ע); וַיַּחֲטִא 2 K 21[11] (cf. 1 K 16[2], 21[22]); וַתַּחְבִּא 2 K 6[29]; וַיּוֹצִא Dt 4[20], 2 K 11[12], ψ 78[16], 105[43]; *imperative* הָבִיא Jer 17[18]; הוֹצִיא Is 43[8] (in both cases before ע). If the tradition be correct (which at least in the defectively written forms appears very doubtful) the retention of the *i* is to be attributed to the open syllable; while in the closed syllable of the 3rd *sing. masc.* and *fem.*, and the 2nd *sing. masc.* after ו *consecutive*, the *i* is always reduced to *ē*. In the examples before ע considerations of euphony may also have had some influence (cf. § 75 *hh*).—In Ez 40[3], Baer reads with the Western school וַיְבִיא, while the Orientals read in the *K^ethibh* ויבוא, and in the *Q^erê* וַיָּבֵא.

On the transition of verbs ל״א to forms of ל״ה see § 75 *nn*.

§ 75. *Verbs* ל״ה, e.g. גָּלָה *to reveal*. *Paradigm P.*

Brockelmann, *Semit. Sprachwiss.*, p. 149 ff.; *Grundriss*, p. 618 ff.—G. R. Berry, 'Original Waw in ל״ה verbs' in *AJSL.* xx. 256 f.

a These verbs, like the verbs פ״י (§§ 69, 70), belong to two different classes, viz. those originally ל״ו and those originally ל״י,[1] which in Arabic, and even more in Ethiopic, are still clearly distinguished. In Hebrew, instead of the original ו or י at the end of the word, a ה always appears (except in the *ptcp. pass. Qal*) as a purely orthographic indication of a final vowel (§ 23 *k*); hence both classes are called ל״ה, e.g. גָּלָה for גָּלַי *he has revealed*; שָׁלָה for שָׁלַו *he has rested*. By far the greater number of these verbs are, however, treated as originally ל״י; only isolated forms occur of verbs ל״ו.

b שָׁלָה *to be at rest* may be recognized as originally ל״ו, in the forms in which the *Wāw* appears as a strong consonant, cf. 1st *sing. perfect Qal* שָׁלַוְתִּי Jb 3[26], the *participle* שָׁלֵו and the derivative שַׁלְוָה *rest*; on the other hand the *imperfect* is יִשְׁלֶה (with *Yôdh*). In עָנָה (Arab. عني) *to answer*, and עָנָה (Arab. عنو)[2] *to be afflicted*, are to be seen two verbs originally distinct, which have been assimilated in Hebrew (see the Lexicon, s. v. עָנָה).

---

[1] According to Wellhausen, 'Ueber einige Arten schwacher Verba' in his *Skizzen*, vi. p. 255 ff., the ל״ה verbs, apart from some true ל״ו and some probable ל״י, are to be regarded as originally biliteral. To compensate for their arrested development they lengthened the vowel after the 2nd radical, as the ע״ו verbs did after the 1st radical. But although there is much to be said for this view, it fails to explain pausal forms like חָסָיָה (see *u*). It seems impossible that these should all be *late* formations.

[2] In the Mêša' inscription, line 5, ויענו *and he oppressed* occurs as 3rd *sing. masc. imperfect Pi'ēl*, and in line 6, אענו *I will oppress* as 1st *sing.*

Of quite a different class are those verbs of which the third radical is a *consonantal* ה (distinguished by *Mappiq*). These are inflected throughout like verbs *tertiae gutturalis*. Cf. § 65 note on the heading.

c The grammatical structure of verbs ל״ה (see Paradigm *P*) is based on the following laws:—

1. In all forms in which the original *Yôdh* or *Wāw* would stand at the end of the word, it is dropped (cf. § 24 *g*) and ה takes its place as an orthographic indication of the preceding long vowel. Such an indication would have been indispensable, on practical grounds, in the still unvocalized consonantal text. But even after the addition of the vowel signs, the orthographic rule remained, with insignificant exceptions (see § 8 *k*, and *ā* in קָטַלְתָּ, &c.), that a final vowel must be indicated by a vowel letter. In verbs ל״ה the ה which is here employed as a vowel letter is preceded by the same vowel in the same part of the verb throughout all the conjugations. Thus the endings are—

ה֫ in all perfects, גָּלָה, גָּלְתָה, גָּלוּ, &c.

ה֣ in all imperfects and participles, יִגְלֶה, גֹּלֶה, &c.

ה֥ in all imperatives, גְּלֵה, גְּלִי, &c.

ה֑ in the infinitive absolute (גָּלֹה, &c.), except in *Hiph'îl*, *Hoph'al*, and generally also *Pî'ēl*, see *aa* and *ff*.

The *participle passive Qal* alone forms an exception, the original י (or ו, see *v*) reappearing at the end, גָּלוּי; and so also some derived nouns (§ 84*a*, *c*, *e*, &c.).

The *infinitive construct* always has the ending וֹת (with ת *feminine*); *Qal* גְּלוֹת, *Pi'ēl* גַּלּוֹת, &c.; for exceptions, see *n* and *y*.

d These forms may be explained as follows:—in the *perfect Qal* גָּלָה stands, according to the above, for גָּלַל(י), and, similarly, in *Niph'al*, *Pu'al*, and *Hoph'al*. The *Pi'ēl* and *Hithpa'ēl* may be based on the forms קִטֵּל, הִתְקַטֵּל (§ 52 *l*; and § 54 *k*), and *Hiph'il* on the form הִקְטַל, on the analogy of the *ă* in the second syllable of the Arabic *'âqtălă* (§ 53 *a*). Perhaps, however, the final *ā* of these conjugations simply follows the analogy of the other conjugations.

e The explanation of the final tone-bearing ה֣ of the *imperfect* is still a matter of dispute. As to the various treatments of it, see Barth, *Nominalbildung*, i. p. xxx ff, with § 136, Rem., and *ZDMG.* xliv. 695 f., against Philippi's objections in the *Zeitschrift für Völkerpsychologie*, 1890, p. 356 f.; also *ZDMG.* lvi. 244, where Barth appeals to the rule that, in the period before the differentiation of the North Semitic dialects, final *iy* becomes ־֣ (*constr.* ה֣), not *î*; M. Lambert, *Journ. Asiat.* 1893, p. 285; Prätorius, *ZDMG.* lv. 365. The most probable explanation now seems to be, first, that the uniform pronunciation of *all* imperfects and participles with *Seghôl* in the last syllable merely follows the analogy of the *impf. Qal*, and secondly, that the *Seghôl* of the *impf. Qal* does perhaps ultimately represent a contraction of the original termination ־ַי֣ (= *ai*), although elsewhere (e.g. in the *imperative* of ל״ה) *ai* is usually contracted to *ê*.

2. When the original *Yôdh* stands at the end of the syllable before an affromative beginning with a consonant (ת, נ) there arises (*a*) in the *perfects*, primarily the diphthong *ai* (ַי). In the middle of the word this ought always to be contracted to *ê* (ֵי), but this *ê* is only found consistently in the passive conjugations, whilst regularly in *Qal*, and frequently in the other active and reflexive conjugations (especially in *Pî'ēl*), it appears as *î* (cf. *x*, *z*, *ee*). This *î*, however, in the *perf. Qal* is not to be explained as a weakening of an original *ê*, but as the original vowel of the *intransitive* form. It then became usual also in the *transitive* forms of *Qal* (and in some other conjugations on this analogy), whereas e. g. in Syriac the two kinds of forms are still carefully distinguished.—(*b*) In the *imperfects* and *imperatives*, ִי with the tone always appears before the affromative נָה. On the most probable explanation of this ִי, see above, *e*. *f*

Summary. Accordingly before affromatives beginning with a consonant the principal vowel is— *g*

In the perfect *Qal* *î*, e. g. גָּלִיתָ;

In the perfects of the other active and reflexive conjugations, sometimes *ê*, sometimes *î*, גִּלֵּיתָ and גִּלִּיתָ; נִגְלֵיתָ and נִגְלִיתָ;

In the perfects passive always *ê*, e. g. גֻּלֵּיתָ;

In the imperfects and imperatives always ִי, e. g. תְּגַלֶּינָה, תְּגֻלֶּינָה.

The diphthongal forms have been systematically retained in Arabic and Ethiopic; only as an exception and in the popular language is the diphthong contracted. In Aramaic the contracted forms predominate, yet the Syriac, for example, has in *Qal* 2nd *pers. sing.* *g*^{e}*lait* (but 1st *pers. sing.* גְּלִית), and so too the Western Aramaic גְּלֵיתְ, but also גְּלִיתְ.

3. Before the vocalic affromatives (וֹ, ִי, ה־ָ) the *Yôdh* is usually dropped altogether, e. g. גָּלוֹ (ground-form *gălāyû*), תִּגְלִי, *participle fem.* גֹּלָה, *plur. masc.* גֹּלִים; yet the old full forms also not infrequently occur, especially in *pause*, see *u*. The elision of the *Yôdh* takes place regularly before *suffixes*, e. g. גָּלְךָ (see *ll*). *h*

4. In the 3rd *sing. fem. perfect*, the original feminine ending ת־ *i* was appended to the stem; hence, after elision of the *Yôdh*, arose properly forms like גָּלָת, with *ā* in the final syllable with the tone. This form, however, has been but rarely preserved (see below, *m*). The analogy of the other forms had so much influence, that the common ending ה־ was added pleonastically to the ending ת־. Before the ה־ the vowel of the ending ת־, which thus loses the tone, becomes *Šᵉwâ*, and thus there arise such forms as גָּלְתָה, נִגְלְתָה, &c. (but in *pause* גָּלָתָה, &c.).

For similar cases see § 70 *d*; § 91 *m*.

k **5.** Finally, a strongly-marked peculiarity of verbs ל״ה is the rejection of the ending ה־ in forming the *jussive* and the *imperfect consecutive*. This shortening occurs in all the conjugations, and sometimes also involves further changes in the vocalization (see *o*, *y*, *bb*, *gg*). Similarly, in some conjugations a *shortened imperative* (cf. § 48 *k*) is formed by *apocope* of the final ה־ (see *cc*, *gg*).

l **6.** The ordinary form of the *imperfect* with the ending ה־ serves in verbs ל״ה to express the cohortative also (§ 48 *c*); cf. Gn 1[26], 2[18], 2 Ch 25[17], &c. With a final ה־ there occur only: in *Qal*, אֶשְׁעֶה ψ 119[117], אֶהְמֶיהָ (with the ׳ retained, see below, *u*) ψ 77[4]; and in *Hithpa'ēl* וְנִשְׂתַּעֶה Is 41[23] (with *Ṭiphḥa*, therefore in lesser pause).

Remarks.

I. *On Qal.*

m **1.** The older form of the *fem.* of the 3rd *sing. perf.* גָּלְתָה, mentioned above, under *i* (cf. § 74 *g*), is preserved in עָשְׂתָ (before א) Lv 25[21] (cf. 2 K 9[37] *Kᵉthibh*)[1]; likewise in *Hiph'il* הִרְצָת (before א) Lv 26[34]; הֶלְאָת Ez 24[12]; and in *Hoph'al* הָגְלָת (before י) Jer 13[19].—The 2nd *sing. fem.* is also written יתְ־; thus in the textus receptus וְהָיִיתְ 2 S 14[2], and always in Baer's editions (since 1872), as in most other verbs; חָזִיתְ and גָּלִיתְ Is 57[8]; עָשִׂיתְ Jer 2[23], Ez 16[48], &c. (so וְהוֹצֵאתְ 1 K 17[13] from יָצָא). In the 3rd *pers. plur.* the tone, instead of keeping its usual place (גָּלוּ, &c.), is retracted in ψ 37[20], כָּלוּ, both on account of the *paûse* and also in rhythmical antithesis to the preceding כָּלוּ; also in Is 16[8] תָּעוּ (according to Delitzsch for the sake of the assonance with נָבָעוּ); and in Jb 24[1] חָזוּ.—On the tone of the *perfect consecutive* see § 49 *k*.

n **2.** The *infin. absol.* frequently has ו (probably a survival of the older orthography) for ה־, e. g. הָיוֹ Gn 18[18]; עָשׂוֹ Jer 4[16], &c., Ez 31[11]; קָנוֹ 2 S 24[24]; רָאוֹ Gn 26[28], Is 6[9] (cf. 1 S 6[12]), &c., beside רָאֹה. The form שָׁתוֹת Is 22[13] (beside שָׁתוֹ in the same verse) appears to have been chosen on account of its similarity in sound to שָׂחֹט; so in Is 42[20] *Qᵉrê* and Ho 10[4], אָלוֹת (unless it is a substantive, *oaths*) and בָּרֹחַ; cf. also עָרוֹת Hb 3[13].—Conversely, instead of the *infinitive construct* גָּלוֹת such forms are occasionally found as גָּלֹה or גָּלוֹ, cf. רְאֹה Gn 48[11]; קְנֹה Pr 16[16]; עֲשֹׂה Gn 50[20], ψ 101[3], also עֲשׂוֹ Gn 31[28] (cf. Pr 31[4]), and even with the *suffix* הוּ the very remarkable form עֲשֹׂהוּ Ex 18[18].[2]—The feminine form רָאוֹה (for רְאוֹת) Ez 28[17], analogous to nouns like גָּאוֹה (cf. § 45 *d*), is strange, but הָיֹה as *infin.* Ez 21[15] is quite inexplicable.—The forms הִגּוֹ and הִרּוֹ Is 59[13] are perhaps to be regarded with Barth, *Nominalbildung*, § 51 *a*, as *infinitives absolute* of the *passive* of *Qal* (see above, § 53 *u*), not of *Pi'ēl*.—The 2nd *sing. masc. imperative* וְחִיֵּה occurs in the principal pause in Pr 4[4] and 7[2]; but

---

[1] In the Siloam inscription also (see above, § 2 *d*), line 3, היתּ may be read הָיְתָה quite as well as [הָיְתָ]ה.

[2] All these infinitives construct in *ô*, in the Pentateuch, belong to the document called E; cf. § 69 *m*, second note.

probably these forms are simply to be attributed to a Masoretic school, which in general marked the difference between certain forms by the use of *è* for *ē*, and conversely *ē* for *è*; cf. the analogous examples in § 52 *n*, and especially § 75 *hh*, also Kautzsch, *Grammatik des Bibl.-Aram.*, § 17, 2, Rem. 1.—On the reading וְרֵאֶינָה Ct 3[11] (for וְרֹאֶינָה, on the analogy of the reading מְצֵאנָה, &c., § 74 *h*), see Baer's note on the passage.

o 3. The *shortening* of the *imperfect* (see above, *k*, and the note on *hh*) occasions in *Qal* the following changes:

(*a*) As a rule the first radical takes a helping *Seghôl*, or, if the second radical is a guttural, a helping *Pathaḥ* (according to § 28 *e*). Thus יִגֶּל for יִגְלֶה; וַיִּבְז *and he despised*, Gn 25[34]; וַיִּבֶן *and he built*; יִשַּׁע *he looks*; וַיִּמַּח *and he destroyed*, Gn 7[23].

p (*b*) The *ĭ* of the preformative is then sometimes lengthened to *ē*, e.g. יֵרֶא *he sees*. This, however, mostly happens only after the preformative ת, whilst after י the homogeneous *ĭ* remains, e.g. וַתִּכֶל (but יִכְלֶה), וַתִּפֶן (but יִפֶן), וַתֵּרֶב (but וְיִרֶב); with middle guttural תִּתַּע, וְתִתַּבֵּהּ Jb 17[7] (from כָּהָה). The unusual position of the tone in תֵּרָא Zc 9[5], וְתֵרָא Mi 7[10] (so Baer and Ginsb.; ed. Mant. יֵרָא, וְיֵרָא) is best explained (except in יֵרָא Gn 41[33], before פ) on the analogy of קוֹמָה, &c., § 72 *s*, as due to the following א. But cf. also *hh*.

q (*c*) The helping vowel is elsewhere not used under the circumstances mentioned in § 28 *d*; וַיִּשְׁבַּ Nu 21[1], Jer 41[10], cf. וַיִּפְתְּ Jb 31[27]; on the other hand, with *ĭ* lengthened into *ē* (see *p*) וַיֵּשְׁתְּ, וַיֵּרְדְּ, וַיֵּבְךְ, וַיֵּשְׁבְּ. The form יֵרָא *he sees*, occurs parallel with וַיַּרְא *and he saw* (but 3rd *fem.* always וַתֵּרֶא), the latter with the original *Pathaḥ* on account of the following ר, and identical with the 3rd *sing. masc.* of the *imperf. consec. Hiph'il*, 2 K 11[4].

r (*d*) Examples of verbs *primae gutturalis* (§ 63), and at the same time ל״ה are וַיַּעַשׂ, in *pause* וַיַּעַשׂ *and he made*, from עָשָׂה; וַיַּעַן *and he answered*, from עָנָה (always identical with the corresponding forms in *Hiph'il*), וַיַּחַץ *and he divided*, from חצה. On some similar forms of פ״א see § 76 *d*.—In the following cases the initial (hard) guttural does not affect the form: וַיִּחַר *and he was wroth*, וַיִּחַן *and he encamped* (3rd plur. וַיִּחֲנוּ), יִחַד (with *Dageš lene* and *Šᵉwâ*) *let it rejoice*, Jb 3[6]; cf. Ex 18[9].—On וַיֵּט, וַיֵּן, וַיִּן (ל״ה as well as פ״נ), &c., see § 76 *b*, *c*, *f*.

s (*e*) The verbs הָיָה *to be*, and חָיָה *to live*, of which the shortened imperfects ought to be *yihy* and *yihy*, change these forms to יְהִי and יְחִי, the second *Yôd* being resolved into *î* at the end of the word; but in *pause* (§ 29 *n*) יְהִי, יְחִי, with the original *ă* modified to *Seghôl* with the tone (cf. also *nouns* like בֶּכִי for *bakhy.* in *pause* בְּכִי; עֱנִי for *'ôny*, &c., § 84[a] *c*, and § 93 *x*). For תְּהִי, however, in Dt 32[18], since no verb שָׁיָה exists, we must read either תֵּשׁ, or better תִּשֶּׁה (Samaritan תשא), as *imperfect Qal* of נָשָׁה *to forget*.—Analogous to יְהִי from הָיָה, there occurs once, from הָוָה *to be*, the form יְהוּא for יִהְיוּ *he will be*, Ec 11[3], but no doubt הוּא is the right reading.

t The *full* forms (without apocope of the ה־, cf. § 49 *c*) not infrequently occur after *wāw consecutive*, especially in the 1st pers. and in the later books, e.g. וָאֶרְאֶה *and I saw*, twenty times, and Jos 7[21] in *Kᵉthibh*, but never in the Pentateuch (וָאֵרֶא fifteen times, of which three are in the Pent.); also in the

3rd pers. וַיִּרְאֵהוּ Ez 18[28], Jb 42[16] *Qᵉre*; וַיַּעֲשֵׂהוּ *and he made*, four times (but וַיַּעַשׂ over 200 times); cf. also Ju 19[2] (וַתִּזְנֵהוּ); 1 K 10[29] (וַתַּעֲלֵהוּ); Dt 1[16] (וְאֶצַוֵּהוּ), and Gn 24[48]. So also occasionally for the *jussive*, cf. Gn 1[9], 41[34], Jer 28[8].—For the well attested, but meaningless תִּירְאוּ Jb 6[21] (doubtless caused by the following וְתִירָאוּ), read תֵּרְאוּ *ye see*, with Ginsburg.

u 4. The original י sometimes appears even before afformatives beginning with a vowel (cf. above, *h* and *l*), especially in and before the *pause*, and before the full plural ending ־ִין, or where for any reason an emphasis rests on the word. *Perfect* חָסָיְהִ *ψ* 57[2], חָסָיְוּ Dt 32[37], cf. *ψ* 73[2] *Qᵉrê*; *imperative* בְּעָיְוּ Is 21[12]. *Imperfect* יֵאחֲזוּהִי Jb 16[22], 30[14] (without the *pause*, *ψ* 68[32]); יְשַׁלְוּהִי *ψ* 122[6], Jb 12[6], cf. *ψ* 77[4]; יְרַבְּיִן Dt 8[13]; *ψ* 36[9]: more frequently like יְשַׁחֲתוּן *ψ* 78[44]; Is 17[12], 21[12], 26[11], 31[3], 33[7], 41[5], *ψ* 36[8], 39[7], 83[3]; before a suffix, Jb 3[25]. Also in Pr 26[7] דְּלָיְוּ, as *perf. Qal* from דָּלָה, was perhaps originally intended, but hardly דָּלְיוּ, since these full forms, though they may stand out of pause, do not begin sentences; דַּלְיוּ probably points to דַּלְיוּ from דָּלַל as the right reading, since the sense requires an intransitive verb. Cf. further, *v*, *x*, *dd*, *gg*.

v 5. The *participle active* (cf. Vollers, 'Das Qâtil-Partizipium,' *ZA.* 1903, p. 312 ff., and on the participles of ל״ה, *ibid.*, p. 316 ff.), besides feminine forms like עֹלָה Ju 20[31], &c., רֹאָה Pr 20[12], has also a *feminine* which retains the 3rd radical י, viz. בּוֹכִיָה (=בֹּכָה) *weeping*, La 1[16]; הוֹמִיָה *tumultuous*, Is 22[2] (*plur.* Pr 1[21]); צוֹפִיָה *spying*, Pr 31[27], פּוֹרִיָה *fruitful*, *ψ* 128[3], *plur.* אֹתִיּוֹת *the things that are to come*, Is 41[23]. With the ordinary strong inflexion י appears in עָטְיָה Ct 1[7], but perhaps there also עָטִיָה was intended, unless it should be טֹעִיָה *a wanderer*. For רֹאֲנִי Is 47[10], רֹאֲנִי is to be read.—On עֹשֵׂה 1 K 20[40] for עֹשֶׂה, cf. § 116 *g*, note.—In the *participle passive* the 3rd radical still sometimes appears as ו (§ 24 *b*), cf. עָשׂוּי *made*, Jb 41[25], צָפוּי Jb 15[22], contracted from עָשׂוּי, צָפוּי; and before a formative ending, it even has its consonantal sound, העשוים (read הָעֲשׂוּיִם) 2 K 23[4]; עשוות (read *ʿᵃśûwôth*) 1 S 25[18] *Kᵉthibh*, נטוות (read *nᵉṭûwôth*) Is 3[16] *Kᵉthibh*. The shortening of the *û* in רְאִיוֹת Est 2[9] is irregular.

w 6. The defective writing is rare in such forms as וְהִיִתָּ 2 S 15[33]; בָּנִתִי 1 K 8[44], cf. 1 K 9[3]; וַתִּרְלָנָה Ex 2[18] (cf. Jer 18[21], 48[6], 1 Ch 7[15], Jb 17[6], &c.), and the pronunciation תִּרְאֶינָה Mi 7[10], cf. תַּעֲנֶינָּה Ju 5[29] (unless they are *sing.* with *suff.* of the 3rd *sing. fem.*). Both cases are probably to be explained according to § 20 *i*.

II. *On Niph'al.*

x 7. Here the forms with ־ִי in the 1st and 2nd *pers. sing.* of the *perfect* predominate (־ִי only in נִקִּיתָ Gn 24[8]); on the other hand in the 1st *plur.* always ־ִינוּ, as נִגְלִינוּ 1 S 14[8]. No examples of the 2nd *plur.* occur.—With י retained in *pause* נִטְּיוּ Nu 24[6]; once with an initial guttural נֶחֱרוּ Ct 1[6] for נֶחֱרוּ, probably arising from the ordinary strong form *niḥru*, but the harshness of ח immediately followed by ר is avoided by pronouncing the ח with *Ḥaṭeph-Pathaḥ*.—In the 3rd *sing. fem.* נִשְׁחָתָה Pr 27[15] (in *pause* for נִשְׁחָתָה) ו and ת may be transposed for euphonic reasons; but probably we should simply read נִשְׁחָתָה.—Among Niph'al forms of ל״ה must be classed, with Buxtorf and

others (cf. Nöldeke, *ZDMG.* xxx. 185), נָאְוָה from אָוָה, not Pi'lel of נאה = נאו; hence, according to § 23 *d*, נָאוּ *they are beautiful* (for נָאְווּ) Is 52⁷, Ct 1¹⁰; but in ψ 93⁵, where Baer requires נַאֲוָה, read נָאְוָה with ed. Mant., Ginsb.

y 8. The *apocope* of the *imperfect* causes no further changes beyond the rejection of the ה__, e.g. יִגְלֶה from יִגְלֵה; in one verb *middle guttural*, however, a form occurs with the *Qameṣ* shortened to *Pathaḥ*, viz. יַמַּח (for יִמְּחוּ) ψ 109¹³, as in verbs ע״ע; but in *pause* תִּמְּחוּ verse 14. Cf. *bb*.—The *infinitive absolute* נִגְלוֹת emphasizing an *infinitive construct*, 2 S 6²⁰, is very extraordinary; probably it is a subsequent correction of an erroneous repetition of הגלות.—The *infin. constr.* לְחָרְאָה occurs in Ju 13²¹, 1 S 3²¹ for לִרְאוֹת; cf. above, *n*.—On the *infinitive Niph'al* with the ה elided, see § 51 *l*.—The irregular תֶּעָלֵּוּ Ez 36³ has probably arisen from a combination of the readings תֵּעָלֵוּ (*Qal*) and תֵּעָלְוּ (*Niph'al*). Similarly the solecism נְמָבְוָה 1 S 15⁹ might be due to a combination of the *participle fem. Niph'al* (נִבְוָה, cf. נֶחְלָה, נֶחְפָּה, נֶעֱשָׂה) with the *Hoph'al* (מָבְוָה); but it is more correct, with Wellhausen, to explain the מ from a confusion with נמם and to read, in fact, נִבְזָה וְנִמְאָסָה.

III. *On Pi'ēl, Pô'ēl, Pu'al, and Hithpa'ēl.*

z 9. In the 1st and 2nd persons of the *perfect Pi'ēl* the second syllable in most of the instances has ֵי__ on the analogy of *Qal* (see *f*), as קִוֵּיתִי, דִּבֵּיתָ; always so in the first *plur.*, and before *suffixes*, e.g. כִּסֵּינוּ Gn 37²⁶, דִּכְּיתָנוּ ψ 44²⁰. The form with ֵי__ is found only in the 1st *sing.* (e.g. Jo 4²¹; Is 5⁴, 8¹⁷ along with the form with *i*). On the tone of the *perf. consec. Pi'el* of ל״ה, see § 49 *k*.—*Hithpa'ēl* has (besides ֵי__ Jer 17¹⁶) as a rule ֵי__ (Pr 24¹⁰, 1 K 2²⁶, Jer 50²⁴). On the other hand, *Pu'al* always has ֵי__, e.g. עֻשִּׂיתִי ψ 139¹⁵.—A 1st *sing. perfect Pô'ēl* שׁוֹסִיתִי (= שׁוֹסֵיתִי) occurs in Is 10¹³.

aa 10. The *infinitive absolute Pi'ēl* takes the form כַּבֵּה, קַוֵּה (like קַטֵּל, the more frequent form even in the strong verb, see § 52 *o*); with *ô* only in ψ 40² קַוֹּה; with *ôth* Hb 3¹³ עָרוֹת (cf. above, *n*). On הָגוֹ and הָרוֹ, *infinitives absolute* of the passive of *Qal*, not of *Pô'ēl*, see above, *n*.—As *infinitive construct* חַבֵּי occurs in *Pi'ēl*, Ho 6⁹ (only orthographically different from חַבֵּה, if the text is correct); לְבַלֵּא Dn 9²⁴ (on the א see *rr*); עַד־לְכַלֵּה 2 Ch 24¹⁰, 31¹, for which in 2 K 13¹⁷.¹⁹, Ezr 9¹⁴ עַד־כַּלֵּה with *infin. abs.*; in *Pu'al* עֻנּוֹת ψ 132¹.

bb 11. The apocopated *imperfect* must (according to § 20 *l*) lose the *Dageš forte* of the second radical, hence וַיְצַו *and he commanded*, תְּעַר (for תְּעָרֶה = *t^e'arrè*) ψ 141⁸; cf. Gn 24²⁰; even in the principal pause אַל־תָּגֶל Pr 25⁹; *Hithpa'ēl* וַיִּתְגַּל *and he uncovered himself*, Gn 9²¹; תִּתְרַע Pr 22²⁴; cf. ψ 37¹.⁷.⁸. With the lengthening of *Pathaḥ* to *Qameṣ*, וַיָּתוֹ *and he made marks*, 1 S 21¹⁴ (but read with Thenius וַיָּתַח, and instead of the meaningless וַיְשַׁנּוֹ *ibid.* read וַיְשַׁן). In *Hithpa'ēl* אַל־תִּתְגָּר, in close connexion, Dt 2⁹.¹⁹; תִּשְׁתַּע Is 41¹⁰; according to Qimḥi also יִתְאוֹ תִּתְאוֹ ψ 45¹², Pr 23³.⁶, 24¹, 1 Ch 11¹⁷, whilst Baer and Ginsburg read with the best authorities יִתְאַו, תִּתְאַו (but cf. König, *Lehrgebäude*, i. 597).[1]—On אֲחַוּךָ Jb 15¹⁷ (for אֲאַחֲוֶךָ) cf. § 20 *m*; on אֲבַלֶּךָּ Ex 33³, see § 27 *q*;

[1] In Nu 34⁷ f., according to verse 10, תִּתְאוּ (= תִּתְאַוּ) is intended to be read for תִּתְאוּ (*imperfect Pi'ēl* from תָּאָה).

on יְרַד Ju 5^{13}, see § 69 *g*. Finally, on דַּלְיוּ, which is referred to *Pi'ēl* by some, as a supposed *imperative*, see above, *u*.

cc 12. Examples of apocopated *imperatives* in *Pi'ēl* and *Hithpa'ēl* are : צַו, also צַוֵּה *command thou*, גַּל *open thou*, ψ $119^{18.22}$; מַן *prepare thou*, ψ 61^{8} ; נַס for נַסֵּה *prove thou*, Dn 1^{12} ; הִתְחַל *feign thyself sick*, 2 S 13^{5} ; cf. Dt 2^{24}.—On רַבֵּה Ju 9^{29}, cf. § 48 *l*.—In ψ 137^{7} עָרוּ *rase it*, is found twice instead of עָרֹה (for *'arrû*) for rhythmical reasons (cf., however, וְיַעֲרוּ in the *imperfect*, 2 Ch 24^{11}).

dd 13. Examples of forms in which the *Yôdh* is retained are the *imperfects* תְּרַמְּיוּן Is 40^{18}, cf. verse 25 and 46^{5} ; יְכַסְּיֻמוּ *they cover them*, Ex 15^{5} ; *participle Pu'al* מְכֻסִּים Is 25^{6} ; for אֲרַגְּוֵךְ Is 16^{9} (from רָוָה) read with Margolis, אֲרַוֶּךָּ.

IV. *On Hiph'il and Hoph'al.*

ee 14. The 3rd *sing.perfect Hiph'il* sometimes has *Seghôl* in the first syllable instead of *î* (§ 53 *p*), especially in הֶגְלָה (but *perfect consecutive* וְהִגְלָה 2 K 24^{14}), הֶרְאָה, הֶלְאָה ; also with *suffixes*, e. g. הֶגְלָם 1 Ch 8^{7}, הֶלְאֵנִי Jb 16^{7}, וְהֶפְדָּה Ex 21^{8}. The *Seghôl* also occurs in the 1st *sing.*, e. g. הֶלְאֹתִיךְ Mi 6^{3}. On וְהַרְאֵיתִי Na 3^{5}, cf. § 53 *p*. The forms with *ê* in the second syllable (also written defectively, as וְהֵבֵאתִי Jer 21^{6}) are found throughout in the 1st *sing.* (except Pr 5^{13}), rarely in the 2nd *sing. masc.*, and never in the 1st *plur.* In the other persons they are about equally common with *i*, except in the 2nd *plur.*, where *î* predominates. Before *suffixes* the forms with *i* predominate throughout ; cf., however, *ê* in Ex 4^{12}, Mi 6^{3}, Pr 4^{11}. On the tone of the *perf. consec. Hiph.* of ל״ה, see § 49 *k*. In *Hoph'al* only ֶ__ occurs in the 2nd syllable.

ff 15. In the *infinitive Hiph'il* of רָבָה *to be abundant*, besides the *construct* הַרְבּוֹת we find the *absolute* הַרְבָּה taking the place of the common form הַרְבֵּה, which had come to be used invariably (but König calls attention to its use as *infinitive construct* in Ez 21^{20}) as an adverb, in the sense of *much* ; in 2 S 14^{11} the *Qerê* requires הַרְבֵּת for the *Kethibh* הַרְבִּית, an evident scribal error for הַרְבּוֹת. Cf. Gn 41^{49}, 22^{17}, Dt 28^{63} ; the pointing הַרְבֵּה Jer 42^{2} probably arises from regarding this form as a noun.—On הַמְרוֹת Jb 17^{2} (with *Dageš f. dirimens*) see § 20 *h*.—In 2 K 3^{24} הַכּוֹת (before א) is probably *infinitive absolute*, used in order to avoid the hiatus, cf. § 113 *x*, and on a similar case in *Qal*, see above, *n*.—On the *infinitives* with elision of the ה, cf. § 53 *q*.

gg 16. The *shortened imperfect Hiph'il* either takes no helping vowel, as יַפְתְּ *let him enlarge*, Gn 9^{27} ; יַרְדְּ *he shall subdue*, Is 41^{2} ; וַיַּשְׁקְ *and he watered*, Gn 29^{10}, &c. ; וַיַּרְא *and he showed*, 2 K 11^{4} (see § 28 *d*) : or else has a helping vowel, as יָגֶל (for יָגְל, see § 27 *r*), e. g. 2 K 18^{11} ; וַיָּפֶר ψ 105^{24} ; וַתָּמֶר Ez 5^{6} ; וַיָּחַע 2 Ch 33^{9} ; וארב i. e. probably וָאֶרֶב Jos 24^{3} *Kethibh* (וָאַרְבֶּה) *Qerê*).—Examples of verbs *first guttural*: וַיַּעַל Nu 23^{2}, וָאַעַל, &c., which can be distinguished as *Hiph'il* from the similar forms in *Qal* only by the sense.—The *apocopated imperative Hiph'il* always (except in verbs פ״נ, e. g. הַט, הַךְ, § 76 *c*) has a helping vowel, *Seghôl* or *Pathah*, e. g. הָרֶב *increase thou* (for *harb*, הַרְבֵּה) ψ 51^{4} *Qerê*, also Ju 20^{38} ; where, however, it cannot be explained the text stands; הֶרֶף *let alone* (for הַרְפֵּה Dt 9^{14}, &c. ; הַעַל (for הַעֲלֵה) Ex 8^{1}, 33^{12} ; but for הָשַׁע ψ 39^{14}, which could only be *imperative Hiph'il* of שָׁעַע (= *smear over*, as in Is 6^{10}), read with Baethgen שְׁעֵה *look away*.—The *imperfect Hiph'il* with *Yôdh* retained occurs only in תּוֹנִין Jb 19^{2}, from יָנָה. Cf. *u*.

V. *In General.*

17. In Aramaic the *imperfect* and *participle* of all the conjugations terminate in א__ or י__. The Hebrew *infinitives*, *imperatives*, and *imperfects* in ה__, less frequently א__ or י__, may be due to imitation of these forms. On the *infinitive construct Pi'ēl* חַכֵּי, see above, *aa*; *imperative Qal* הֱוֵא Jb 37⁶ (in the sense of *fall*); *imperfect* יֵרֵא *let him look out*, Gn 41³³ (but see above, *p*); יַעֲשֶׂה *he will do*, Is 64³; אַל־תְּהִיהִי Jer 17¹⁷; אַל־תֹּאבֶא *consent thou not*, Pr 1¹⁰; אַל־תַּעֲשֶׂה *do thou not*, 2 S 13¹² (the same form in Gn 26²⁹, Jos 7⁹, Jer 40¹⁶ *Q'rê*); אֶהְיֶה (so Baer and Ginsburg, after cod. Hillel, &c.) *I will be*, Jer 31¹; וַנַּעֲשֶׂה Jos 9²⁴; תִּרְאֶה Dn 1¹³. Cf. also in *Niph'al* יִמְצֵה Lv 5⁹; תִּבָּנֶה (according to Qimḥi) Nu 21²⁷; in *Pi'ēl* תְּנַלֶּה Lv 18⁷.⁸.¹²⁻¹⁷, 20¹⁹, in each case לֹא תְנַלֶּה, beside תְּגַלֶּה with a minor distinctive; יְנַקֶּה (Baer יְנַקֵּה) Na 1³; אֲזָרֶה Ez 5¹² (with *Zaqeph*; Baer אֲזָרֵה). The fact, however, that a great number of these forms occur in *pause* and represent at the same time a *jussive* or *voluntative* (Jos 7⁹), suggests the view that the *Ṣere* is used merely to increase the emphasis of the pausal form, and at the same time to make a distinction in sound between the *jussive* or *voluntative* and the ordinary *imperfect*.[1] Elsewhere (Gn 26²⁹, Lv 5⁹, Jer 40¹⁶, Dn 1¹³; according to Baer also Mi 7¹⁰, Zc 9⁵) the pronunciation with *ê* is probably intended to soften the hiatus caused by a following א or ע; cf. the analogous cases above, § 74 *l*. *hh*

The ending י__ appears to stand for ה__ in the *imperfect Qal* in וַתְּזֹנִי־שָׁם *and there hath she played the harlot*, Jer 3⁶; perhaps, however, the 2nd *sing. fem.* is intended, or it may have been introduced into the text of Jeremiah from Ez 16¹⁵, &c. Still more strange is it in the *imperfect Hiph'il* אַל־תָּמִהִי Jer 18²³; but the *Mil'ēl*-tone probably points to תָּמַהּ as the correct reading (cf. Neh 13¹⁴). The י__ stands for ה__ in the *perfect Hiph'il* הֶחֱלִי *he made sick*, Is 53¹⁰, which is probably for החליא from חלא, a secondary form of חלה; see *rr*. The *plur.* הִמְסִיו (Baer הִמְסִין) *they made to melt*, Jos 14⁸, is a purely Aramaic form. *ii*

18. In two verbs the rare conjugation *Pa'lēl* or its reflexive (§ 55 *d*) occurs: מְטַחֲוֵי *archers*, Gn 21¹⁶ (from טָחָה); but most frequently in שָׁחָה *to bend*, *Pa'lēl* שַׁחֲוָה not in use, whence reflexive הִשְׁתַּחֲוָה *to bow oneself, to prostrate oneself*, 2nd *pers.* in __ִיתְ and 1st *pers.* in __ִיתִי, *imperfect* יִשְׁתַּחֲוֶה, *consecutive* 3rd *sing. masc.* וַיִּשְׁתַּחוּ for *wayyištaḥw* (analogous to the noun-forms, like שָׁחוּ for *saḥw*); 3rd *plur.* וַיִּשְׁתַּחֲוּוּ.—Instead of the aramaizing *infinitive* with *suffix* בְּהִשְׁתַּחֲוֵיתִי 2 K 5¹⁸ read with König בְּהִשְׁתַּחֲוֹתִי; in Ez 8¹⁶ מִשְׁתַּחֲוִיתֶם is still more certainly a scribal error for מִשְׁתַּחֲוִים. *kk*

19. Before *suffixes* in all forms ending in ה, a connecting vowel is employed instead of the ה and the connecting vowel which precedes it (§ 58 *f*), e.g. נָתַנִי Gn 24²⁷; in *pause* עָנָנִי 1 K 2³⁰, &c., even with lesser disjunctives, ψ 118⁵, Pr 8²², or with a conjunctive accent, 1 S 28¹⁵ (but Baer עָנָנִי), Jb 30¹⁹; cf. § 59 *h*; עָנָךְ, in *pause* עָנָךְ, Is 30¹⁹ (and even when not in *pause* Jer 23³⁷) or like סָבָךְ Dt 32⁶; וַיְרַבֶּךָּ, וַיְפָרֶךָ Gn 28³; cf. also עָנָהוּ, עָנָם, *imperfect* יְעַנֶּהוּ, יְעַנָּךְ, *Hiph'il* הֶעֱלָךְ, הֲכָנִי, הֲכָהוּ. *ll*

Only very seldom does the *imperat.* or *impf.* end in י__ before suffixes, e.g. *mm*

[1] Possibly these examples (like the cases of *Seghôl* in *pause*, see *n*) represent the view of a particular Masoretic school, which was intended to be consistently carried out.

אֹפְאֵיהֶם Dt 32^{26}; יְכַפֵּימוֹ ψ 140^{10} *Q^ere^*; הַכֵּינִי *smite me*, 1 K $20^{35.37}$; cf. Hb 3^2, Is 38^{16}. Even in these examples a return to the original ending *ay* might be assumed; but perhaps they are merely due to a less correct *plene* writing. In the 3rd *sing. perf. fem.* the older form נָגְלַת (see *i*) is always used before a *suffix*, e. g. כְּכַלֹּתוֹ (for כְּכַלַּתּוֹ) Zc 5^4; in *pause* עָשְׂתָנִי Jb 33^4; רָאֻתָךְ 42^5.

VI. *The Relation between Verbs* ל״ה *and* ל״א.

nn 20. The close relation existing between verbs ל״א and ל״ה is shown in Hebrew by the fact that the verbs of one class often borrow forms from the other, especially in the later writers and the poets.

oo 21. Thus there are forms of verbs ל״א—

(*a*) Which have adopted the vowels of verbs ל״ה, e. g. *perfect Qal* כָּלֵאתִי *I have refrained*, ψ 119^{101}; *participle* חוֹטֵא (חֹטֵא) *sinning*, Ec 2^{26}, 8^{12}, $9^{2.18}$; cf. Is 65^{20}; מוֹצֵא Ec 7^{26}; נֹשֶׁא *lending*, 1 S 22^2; *Pi'ēl perfect* מִלֵּא *he has filled*, Jer 51^{34}; cf. 1 K 9^{11}, Am 4^2 (where, however, the *perfect Niph.* is perhaps intended), ψ 89^{11}, 143^3; רִפֵּאתִי *I heal*, 2 K 2^{21}; cf. Jer 51^9; *imperfect* יַנֵּמוּ Jb 39^{24}; *Niph'al perfect* נִפְלֵאתָה (like נִגְלֵתָה) *it was wonderful*, 2 S 1^{26}; *Hiph'il perfect* הִפְלֵא Dt 28^{59}; הֶחְבֵּאתָה (not אָתָה—, cf. above, 2 S 1^{26}) *she hid*, Jos 6^{17}. On the other hand, forms like חִטְאִים 1 S 14^{33}, קִרְאִים ψ 99^6, נִרְפְּאוּ Ez 47^8, תִּרְבְּאוּנֵנִי, according to the correct reading, Jb 19^2 (cf. Gn 31^{39} אֲחַטֶּנָּה), and יִרְאוּ *imperative plur. masc.* from יָרֵא Jos 24^{14}, 1 S 12^{24}, ψ 34^{10}, are due to the elision of the א, see § 74 *i*. On יִנָּשׂוּא Jer 10^6 and נָשׂוּא ψ 139^{20}, see § 23 *i*.

pp (*b*) Forms in ה, but keeping their ל״א vowels, e. g. *imperfect Qal* אֶרְפֶּה Jer 3^{22}; *imperative* רְפָה *heal thou*, ψ 60^4; *Niph'al* נֶחְבָּה Jer 49^{10} (which must evidently be a *perfect*; read with Ewald the *infinitive absolute* נֶחְבֹּה as in verse 23), and הֶחָבֵה *to hide oneself*, 1 K 22^{25}, cf. Jer 19^{11}; *Pi'ēl imperfect* יְמַלֶּה *he will fill*, Jb 8^{21}.

qq (*c*) Forms entirely of a ל״ה character, e. g. *perfect Qal* וְצָמְתָ *and when thou art athirst*, Ru 2^9, cf. 2 S 3^8; כָּלוּ *they shut up*, 1 S 6^{10}; cf. 25^{33}; מָלוּ *they are full*, Ez 28^{16}, cf. 39^{26}; *infinitive* חֲטוֹ (see above, *n*) *to sin*, Gn 20^6 (on מָלֹאת see above, § 74 *h*); *imperative sing. fem.* חֲבִי Is 26^{20}; *imperfect* יְכִלֶּה (for יְכִלָּא) *he will keep back*, Gn 23^6; תִּרְפֶּינָה *they heal*, Jb 5^{18}; *participle* בּוֹטֶה Pr 12^{18}; *fem.* צָאִי Ec 10^5; *plur.* צֹבִיָּה Is 29^7; *participle passive* נְשׂוּי ψ 32^1; *Niph'al* נִרְפָּתָה Jer 51^9; נִבֵּיתָ *thou hast prophesied*, Jer 26^9 (cf. ψ 139^{14}, Jb 18^3); *imperfect* וַיִּרְמוּ 2 K 2^{22} (*infinitive* Jer 19^{11}); *Pi'ēl imperfect* וַיִּרְפּוּ Jer 8^{11}, cf. Gn 31^{39}; *Hiph'il participle* מַקְנֶה Ez 8^3; *Hithpa'el* הִתְנַבִּיתָ 1 S 10^6; *infinitive* הִתְנַבּוֹת 1 S 10^{13}. For the *K^ethibh* להשות 2 K 19^{25}, Jablonski and others require as *Q^erê* the form לְהַשְׁוֹת (so Is 37^{26}); the *K^ethibh* would have to be read לְהָשׁוֹת, with elision of the א and retraction of the vowel.

rr 22. On the other hand, there are forms of verbs ל״ה, which wholly or in part follow the analogy of verbs ל״א, e. g. in their consonants אָתָא *he comes*, Is 21^{12}; בָּרָא 2 S 12^{17} (*textus receptus* בָּרָה); וְרָצֹאתִי Ez 43^{27}; יִשְׁנָא Jb 8^{11}; יִשְׁנָא La 4^1; וַיִּחְלָא 2 Ch 16^{12}; תִּקְרֶאנָה Ex 1^{10}, Lv 10^{19}; תְּלָאִים Dt 28^{66} (cf. Ho 11^7); נָקְרָא (*infin. absol. Niph'al* beside נִקְרֵיתִי) 2 S 1^6; שְׁנָא 2 K 25^{29}; מְרַפֵּא

Jer 38^4; יְשַׁנָּא Ec 8^1: in their vowels, אָתָּנוּ Jer 3^{22}; יִקְרָה Dn 10^{14}; תִּכְלָה 1 K 17^{14}: in both, יִקְרָא Gn 49^1; cf. 42^4, Is 51^{19}; תִּלְאוּם 2 S 21^{12} *Qerê*; לִירוֹא 2 Ch 26^{15} (cf. וּיִרְאוּ הַמּוֹרְאִים 2 S 11^{24} *Kᵉthîbh*); מְרֻאָה (*participle fem. Qal*) Zp 3^1; יַפְרִיא Ho 13^{15}; מְסַלָּאִים La 4^2.—For פִּרְאוֹת (so Baer, Ez 17^6, cf. 31^8), which can only be intended for פְּרָאוֹת *participle fem. plur.* from פָּרָא = פָּרָה, read פֹּארוֹת *branches*, according to Ez 31^5, &c.

§ 76. *Verbs Doubly Weak.*

1. In a tolerably large number of verbs two radicals are weak *a* letters, and are consequently affected by one or other of the anomalies already described. In cases where two anomalies might occur, usage must teach whether one, or both, or neither of them, takes effect.

Thus e.g. from נָדַד *to flee*, the *imperfect* is יִדּוֹד in Na 3^7 and יָדַד in Gn 31^{40} (on the analogy of verbs פ״נ); *Hiph'il* הֵנֵד (like a verb ע״ע), but the *imperfect Hoph'al* again יֻדַּד (as פ״נ).

2. The following are examples of difficult forms, which are derived *b* from doubly weak verbs:

(*a*) Verbs פ״נ and ל״א (cf. § 66 and § 74), e.g. נָשָׂא *to bear*, imperative שָׂא (ψ 10^{12} נְשָׂא, of which נְסָה ψ 4^7 is probably only an orthographic variation); *infinitive construct* שְׂאֵת (for שָׂאֵת; see the analogous noun-formations in § 93 *t*), also נְשֹׂא Is 1^{14}, 18^3; Gn 4^{13} נְשׂוֹא; ψ 89^{10} שׂוֹא (perhaps only a scribal error); after the *prefix* ל always לָשֵׂאת (otherwise the contracted form only occurs in מְשָׂתּוֹ Jb 41^{17}, with rejection of the א); *imperfect* תְּשֻׁנָה for תְּשֻׁאֲנָה Ru 1^{14}; wholly irregular are תְּשֻׁאֲיָנָה Ez 23^{49} (so Baer after Qimḥi; *textus receptus*, and also the Mantua ed., and Ginsburg, תְּשֻׂאֵינָה) and נְשֻׂאת 2 S 19^{43} as *infinitive absolute Niph'al* (on the analogy of the *infinitive construct Qal*?); but most probably נְשֹׂא is to be read, with Driver.

(*b*) Verbs פ״נ and ל״ה (cf. § 66 and § 75), as נָטָה *to bow, to incline*, נָכָה *to* *c* *smite*. Hence *imperfect Qal* יִטֶּה, *apocopated* וַיֵּט (Gn 26^{25} וַיֵּט־) *and he bowed*; וַיֵּז (so, probably, also Is 63^3 for וַיִּז) 2 K 9^{33} *and he sprinkled* (from נָזָה); *perfect Hiph'il* הִכָּה *he smote*, imperfect יַכֶּה, *apocopated* יַךְ, וַיַּךְ (even with *Athnaḥ* 2 K 15^{16}; but also ten times וַיַּכֶּה), וַיַּךְ Dt 2^{33}; so also וַיַּן Lv $8^{11.30}$; אַל־תַּט ψ 141^4 (cf. Jb 23^{11}); *imperative* הַכֵּה, *apocopated* הַךְ *smite thou* (like הַט *incline*, with הַטֵּה), *infinitive* הַכּוֹת, *participle* מַכֶּה; *Hoph'al* הֻכָּה, *participle* מֻכֶּה.

(*c*) Verbs פ״א and ל״ה (cf. § 68 and § 75), as אָבָה *to be willing*, אָפָה *to bake*, *d* אָתָה *to come*. E.g. *imperfect Qal* יֹאבֶה, יֹאפֶה, *plur.* יֹאפוּ; וַיֶּתֶא (cf. § 68 *h*) Dt 33^{21} for וַיֹּאתֶה (= וַיֹּ אֶתֶה); *imperfect apocopated* וַיֵּאת Is 41^{25} for וַיֵּאָתֶה; *imperative* אֱתִי Is 21^{12}, $56^{9.12}$ (cf. אֲפוּ *bake ye*, Ex 16^{23}) for אֱתָה, אֱתָנוּ (§ 23 *h*; § 75 *u*); *Hiph'il perfect* הֵתִי for הֵאתִי (הֵאתָה) Is 21^{14}; *imperfect apocopated* וַיֹּאֶל *and he adjured*, 1 S 14^{24}, properly יֵאָלֶה (יַאְלֶה) from אָלָה, whence יָאַל, and, with the obscuring to *ô*, יֹאלָה; instead of the simple *apocope* (וַיֹּאל) the א which had already become

quiescent, is made audible again by the helping *Seghôl* (unless perhaps there is a confusion with the *imperfect consecutive Hiph'il* of יאל).

e (*d*) Verbs פ״י and ל״א (cf. § 69, § 70, and § 74), as יָצָא *to go forth, imperative* צֵא *go forth*, with ה֫ *paragogic* צְאָה Ju 9^{29} in principal pause for צֵא; 2nd *fem. plur.* צֶאנָה Ct 3^{11}; *infinitive* צֵאת; *Hiph'il* הוֹצִיא *to bring forth.*—יָרֵא *to fear, imperfect* יִירָא and וַיִּירָא (or וַיִּרָא), *imperative* יְרָא; *imperfect Niph'al* יִוָּרֵא ψ 130^{4}, *participle* נוֹרָא.

f (*e*) Verbs פ״י and ל״ה (cf. § 69, § 70, and § 75), e.g. יָדָה *to throw*, Hiph'il *to confess, to praise*, and יָרָה *to throw* (both properly verbs פ״ו), and יָפָה *to be beautiful. Infinitive* יְרֹה, יְרוֹת; *imperative* יְרֵה; *imperfect consecutive* וַיֵּיטֶב Ez 31^{7} (cf. also וַתֵּיפִי 16^{13}); with *suffixes* וַנְּיָרֵם *we have shot at them* (from יָרָה) Nu 21^{30}; perhaps, however, it should be read with the LXX וְנִינָם *and their race* (also in the very corrupt passage ψ 74^{8} נִינָם is probably a *substantive*, and not the *imperfect Qal* with *suffix* from יָנָה); *Pi'ēl* וַיַּדּוּ for וַיְיַדּוּ (§ 69 *u*). *Hiph'il* הוֹרָה, הוֹרָה; *infinitive* הוֹרֹת (as *infinitive absolute* 2 Ch 7^{3}); *imperfect* יוֹרֶה, cf. אַל־תֹּגֶה Jer 22^{3}; *apocopated* וַיּוֹר 2 K 13^{17}.

g (*f*) Verbs ע״ו and ל״א, particularly בּוֹא *to come. Perfect* בָּא, בָּאתָ, בָּאת or בָּאתְ (Gn 16^{8}, 2 S 14^{3}, Mi 4^{10}; cf. § 75 *m*), once בָּנוּ for בָּאנוּ 1 S 25^{8}; for בֹּאוּ Jer 27^{18}, which is apparently the *perfect*, read יָבֹאוּ. In the *imperfect Qal* the separating vowel occurs (תְּבֹאֶינָה instead of the more common תָּבֹאנָה, cf. also תָּבֹאן Gn 30^{38}) only in Jer 9^{16}, ψ 45^{16}, and 1 S 10^{7} *Kethibh.*

h For וַתָּבֹאת 1 S 25^{34} *Qerê* (the *Kethibh* ותבאתי evidently combines the two readings וּבָאתְ and וַתָּבֹאי; cf. Nestle, *ZAW.* xiv. 319), read וַתָּבֹאי; on the impossible forms Dt 33^{16} and Jb 22^{21} cf. § 48 *d.*—In the *perfect Hiph'il* הֵבִיא, הֲבֵאתָ and (only before a suffix) הֲבִיאֹתָ; the latter form is also certainly intended in Nu 14^{31}, where the Masora requires וְהֲבִיאֹתִי, cf. 2 K 9^{2}, 19^{25}, Is 43^{23}, Jer 25^{13}, Ct 3^{4}. Before suffixes the *ē* of the first syllable in the 3rd *sing.* always becomes *Ḥaṭeph-Seghôl*, e.g. הֱבִיאַנִי, הֱבִיאֵךְ; elsewhere invariably *Ḥaṭeph-Pathaḥ*, e.g. הֲבִיאָתָנוּ or הֲבִיאֹתָנוּ. On the other hand, *ē* is retained in the secondary tone in the *perfect consecutive* when without suffixes, e.g. וְהֵבִאתָ. Cf. moreover, וְהַקְאֹתוֹ (וַהַקְאֹתוֹ in Opitius and Hahn is altogether incorrect), Pr 25^{16}, from קִיא; but קִיוּ *spue ye*, Jer 25^{27} (perhaps only a mistake for קִיאוּ), is not to be referred to קִיא but to a secondary stem קָיָה. In the *imperfect* וַתָּקִא is found once, Lv 18^{25}, besides וַיָּקִא (analogous to וַיָּבֵא).—On אָבִי (for אֲבִיא), יָנִי, מֵבִי, see § 74 *k.*

i (*g*) The form חָיָי *to live*, in the *perfect Qal*, besides the ordinary development to חָיָה (*fem.* חָיְתָה), is also treated as a verb ע״ע, and then becomes חַי in the 3rd *pers. perfect*, in *pause* חָי, and with *wāw consecutive* וְחַי Gn 3^{22}, and frequently. In Lv 25^{36} the contracted form וְחִי is perhaps *st. constr.* of חַי *life*, but in any case read וְחַי *perfect consecutive* as in verse 35. The form וְחָיָה occurs in Ex 1^{16} in *pause* for וְחַיָּה (3rd *fem.*) with *Dageš* omitted in the י on account of the pausal lengthening of *ă* to *ā*.

§ 77. *Relation of the Weak Verbs to one another.*

a The close relation which exists between some classes of the weak verbs (e. g. between פ״ו and פ״י, ל״א and ל״ה, ע״ע and ע״ו, ע״ע and ל״ה) appears not only in their similarity or identity of inflexion, or their mutual interchange of certain forms, but especially from the fact that frequently the same root (*radix bilittera*, see § 30 *g*) recurs in various weak stems of similar meaning. The meaning accordingly is inherent in the two constant root-consonants, while the third consonant, which is weak (and the particular class of weak verbs with it), does not establish any difference in the meaning. Thus from the root דך there occur with the same meaning דָּכַךְ, דּוֹךְ, דָּכָא *to strike, to crush*; and from the root נד there are נוּד, נָדַד, נָדָה *to flee*.

b In this manner the following classes are related in form and meaning:

1. Verbs ע״ו and ע״ע in which the first and third consonants are the same in both, as being essential to the meaning; e. g. מוּךְ and מָכַךְ *to become poor*; מוּשׁ and מָשַׁשׁ *to feel*; נוּד and נָדַד *to flee*.

c 2. Verbs פ״י and פ״ן; e. g. יָצַב and נָצַב *to place*, נָקַשׁ and יָקֹשׁ (*yāqōš*) *to lay snares*. Moreover, stems belonging to the classes mentioned in 1 (especially ע״ו) are frequently related also to verbs פ״י and פ״ן, e. g. נוּר and יָנַר *to fear*; טוֹב and יָטַב *to be good*; נָפַח and פּוּחַ *to blow*; נָפַץ and פּוּץ *to dash to pieces*. Verbs פ״א are less frequently connected with these classes, e. g. אָדַשׁ and דּוּשׁ *to thresh*, &c.

d 3. Verbs ל״א and ל״ה (in which the first two consonants form the real body of the stem) are sometimes related to each other, and sometimes to the above classes. To each other, in דָּכָא and דָּכָה *to crush*, קָרָא and קָרָה *to meet* (cf. § 75 *nn*); to verbs of the other classes, in מָצָה and מָצַץ *to suck*, דָּחָה and דּוּחַ *to thrust*, &c.

e 4. Verbs ע״ע and ל״ה, on which cf. Grimm, *Journal of Bibl. Lit.*, 1903, p. 196; e. g. אָנָה and אָנַן *to sigh*, דָּמָה and דָּמַם *to be quiet*, חָנָה and חָנַן *to incline*, כָּלָה and כָּלַל *to end*, קָלָה and קָלַל *to despise*, שָׁנָה and שָׁנַן *to err*, שָׁחָה and שָׁחַח *to bend down*, שָׁסָה and שָׁסַס *to plunder*.

f 5. Verbs ע״ו and ע״ה; e. g. מוּל and מָהַל (New Hebrew; in O. T. only מָהוּל Is 1^{22}) *to circumcise*, מוּר and מָהַר *to exchange*, נוּר (in מְנוֹרָה *a light*) and נָהַר *to shine*; cf. also לָהָטִים *secret arts*, Ex 7^{11} with לָט *secret*, from לוּט.

§ 78. *Verba Defectiva.*

a It often happens, when two kindred weak verbs are in use with the same meaning, that both are *defective*, i. e. do not occur in all the forms. Since, however, those tenses and forms which are not in use in the one verb are generally supplied by the other, they mutually complete one another, and thus form together, as it were, an entire

verb, as in Greek ἔρχομαι, aor. ἦλθον, fut. ἐλεύσομαι, and in Latin *fero, tuli, latum, ferre*, &c., but with this difference, that in Hebrew the roots of these verbs are almost always closely related.

b The most common verbs of this kind are—

בּוֹשׁ *to be ashamed.* *Hiph'il* הֵבִישׁ (inferred from הֲבִישׁוֹתָ), but also הוֹבִישׁ, הוֹבִישׁ, as if from יבשׁ, on the analogy of verbs פ״י; also in Is 30^{5} the *Q'rê* requires הוֹבִישׁ, where the *K'thîbh* has הֵבִאישׁ from בָּאַשׁ.

טוֹב *to be good.* *Perfect* טוֹב; but *imperfect* יִיטַב and *Hiph'il* הֵיטִיב from יָטַב (but cf. הֲטִיבֹתָ 2 K 10^{30}).

יָגוֹר *to be afraid.* *Imperfect* יָגוֹר (from גּוּר).

יָקַץ *to awake*, only in the *imperf.* יִיקַץ; for the *perfect*, the *Hiph'il* הֵקִיץ is used (from קוּץ).

נָפַץ *to break in pieces.* *Imperfect* יָפוּץ (from פּוּץ). *Imperative* פּוּץ. *Niph'al* נָפוּץ. *Pi'ēl* נִפֵּץ (from נָפַץ). *Pôlēl* פּוֹצֵץ (from פּוּץ). *Reflexive* הִתְפּוֹצֵץ. *Hiph'il* הֵפִיץ. Also פִּצְפֵּץ Jb 16^{12}.

נָצַב (*Qal* in post-biblical Hebrew, in Aramaic and Arabic) *to place*, whence (possibly) *Niph'al* נִצַּב and *Hiph'il* הִצִּיב (see above, § 71); but *Hithpa'ēl* הִתְיַצֵּב.

שָׁתָה *to drink*, used in *Qal*; but in *Hiph.* הִשְׁקָה *to give to drink*, from a *Qal* שָׁקָה which is not used in Hebrew.

On הָלַךְ (לָךְ) *to go*, see above, § 69 *x*.

c Rem. 1. To the same category belong also, to a certain extent, those cases where the *tenses* or *moods* not in use in one conjugation, are supplied by forms having the same meaning in other conjugations of the same verb. Thus:

יָסַף *to add.* The *infinitive* (but cf. § 69 *h*, note) and *imperfect*, unused in *Qal*, are supplied by the *Hiph'il* הוֹסִיף, יוֹסִיף (on יוֹסֵף as *imperfect indicative*, see § 109 *d*, cf. also § 109 *i*).

כָּשַׁל *to stumble.* *Perfect* from *Qal*, *imperfect* from *Niph'al.*

נגשׁ *to approach*, unused in *perf. Qal*, instead of which *Niph'al* נִגַּשׁ is used; but *imperfect* יִגַּשׁ, *imperative* גַּשׁ, and *infinitive* גֶּשֶׁת from *Qal* only are in use.

נָחָה *to lead.* *Perfect* usually נָחָה in *Qal*, so *imperative* נְחֵה, but *imperfect* and *infinitive* always in *Hiph'il.*

נתך *to be poured out.* *Perfect Niph'al* נִתַּךְ with *imperfect Qal* יִתֹּךְ, but the *perfect Qal* and *imperfect Niph'al* are not in use.

2. The early grammarians often speak of *mixed forms* (*formae mixtae*), i. e. forms which unite the supposed character and meaning of two different tenses, genders, or conjugations. Most of the examples adduced are at once set aside by accurate grammatical analysis; some others appear to have arisen from misapprehension and inaccuracy, especially from erroneous views of unusual *plene* forms. Others, again, are either merely wrong readings or represent an intentional conflation of two different readings.

CHAPTER III

THE NOUN

§ 79. *General View.*

For the literature, see De Lagarde, *Uebersicht über die im Aram., Arab. und Hebr. übliche Bildung der Nomina*, Göttingen, 1889; Index and Additions, 1891; J. Barth, *Die Nominalbildung in den semitischen Sprachen*, first half, *Simple nouns*, Leipzig, 1889; second half, *Nouns with external additions*, 1891; second edition, with indices of words and subjects, 1894; E. König, *Historisch-kritisches Lehrgebäude, &c.*, ii. 1, Leipzig, 1895, see above, § 3 *f*.—Of these three important works the first two especially have given rise to various articles. In support of De Lagarde: Hommel in *ZDMG.* xliv, p. 535 ff. (against De Lagarde and Hommel: Barth, *ibid.*, p. 679 ff.), and dealing with the Index, *ZDMG.* xlv, p. 340 ff.—Against Barth (though with many points of agreement): Philippi in the *Zeitschrift für Völkerpsychologie*, 1890, p. 344 ff. (answered by Barth in *ZDMG.* xliv, p. 692 ff.), and *ZDMG.* xlvi, p. 149 ff. (answered again by Barth, *ibid.*, xlviii, p. 10 ff.), also in the *Beiträge zur Assyriologie*, ii (1892), p. 359 ff. 'Die semitische Verbal- und Nominalbildung,' and lastly, in *ZDMG.* xlix, p. 187 ff.—Cf. also A. Müller, 'Semitische Nomina. Bemerkungen zu de Lagarde und Barth,' *ZDMG.* xlv, p. 221 ff.—The main points at issue in the works of De Lagarde and Barth are indicated below, § 83 *d*.—Brockelmann, *Semit. Sprachwiss.*, p. 104 ff.; *Grundriss*, p. 329 ff.

a **1.** Since, according to § 30 *a*, most word-stems are developed into verbal stems as well as into noun-stems, it has become customary (especially in the Lexicon) to refer the noun to the most simple ground-form of the verbal formation, viz. the 3rd *pers. sing. perfect Qal*, and, as it were, to derive it from that form. This is usual, not only in those noun-stems which can be directly connected with a corresponding verbal stem (*Nomina verbalia* or *derivativa*, § 83 ff.), but also with *Nomina primitiva*, i. e. those of which no verbal stem is now found in Hebrew (see § 82), as well as finally with *Nomina denominativa*, which have evidently been derived from other nouns (§ 86).

The adjective agrees in form entirely with the substantive. On the formation of adjectival ideas by giving to abstracts a concrete sense, see § 83 *c*.

b **2.** A special inflexion of the noun to express the various cases does not exist in Hebrew; only a few ancient and almost extinct traces of case-endings have survived (§ 90). The syntactical relation of a noun can therefore in general only be inferred from its position in the sentence, or from its being joined to prepositions. In either case, the form of the noun undergoes no change (except for the *construct*

state, § 89), and the representation of case-relations belongs therefore almost exclusively to the syntax (§ 117 ff.). The comparative and superlative of adjectives also can be expressed only by a syntactical combination (§ 133). On the other hand, several changes in the forms of nouns are occasioned by the additions of the plural, dual, and feminine terminations, as well as of the pronominal suffixes, and also by the close connexion of two nouns, by means of the *construct state*.[1]

§ 80. *The Indication of Gender in Nouns.*

Brockelmann, *Grundriss*, p. 404 ff.; 'Ueber die Femininendung *at*, *ah*, *ā*' in *Semit. Sprachwiss.*, p. 106 f.; *Grundriss*, pp. 105, 405 ff.; 'Die Femininendung *T* im Semit.' (*Sitzung d. orient.-sprachwiss. Sektion d. schlesischen Gesellschaft*, Feb. 26, 1903); against him J. Barth, *ZDMG.* 1903, p. 628 ff.; Brockelmann's reply, *ibid.*, p. 795 ff.; and Barth again, *ibid.*, p. 798 ff.

a **1.** The Hebrew, like all Semitic languages, recognizes only two genders in the noun, a *masculine* and a *feminine*. Inanimate objects and abstract ideas, which other languages sometimes indicate by the *neuter*, are regarded in Hebrew either as masculine or feminine, more often the latter (see the Syntax, § 122 *q*).

b **2.** The *masculine*, as being the more common and important gender, has no special indication.

Feminine nouns are also without an indication of gender when the meaning of the word naturally denotes a feminine, as אֵם *mother*, אָתוֹן *a she-ass*, עֵז *a she-goat*, רָחֵל *an ewe* (cf. § 122 *b*). As a rule, however, the *feminine* had originally the ending תַ־, as in the 3rd *sing. perfect* of verbs (§ 44 *a*). This תַ־, however, is regularly retained in Hebrew only in close connexion with a following genitive or suffix (cf. § 89 *e* and § 91 *o*), except where the form has arisen through the addition of a simple ת[2] (see below, *d*). Otherwise, the feminine ending of the independent form (the *absolute state*, § 89 *a*) is—

c (*a*) Most commonly a tone-bearing הָ־, e. g. סוּס *equus*, סוּסָה *equa*. Of nouns ending in ־, like עִבְרִי, the feminine (by § 24 *b*) is עִבְרִיָּה, cf. § 86 *h*. As in the 3rd *sing. fem. perfect* (קָטְלָה, &c.), this הָ־ seems to have arisen by the rejection of the final ת, and the lengthening of the *ă* in the open syllable, whereupon the ה was added as an orthographic indication of the final long vowel: cf. the exactly similar origin of such forms as גָּלְיָה for גָּלְיִי, § 75 *c*. It must, however, be

[1] To speak of these changes as a declension of the Hebrew noun, as is usually done, is accordingly incorrect.

[2] In Mal 1[14] מָשְׁחַת (so e. g. ed. Mant.) would stand for מָשְׁחָתַת, the ptcp. fem. Hoph'al; but מָשְׁחָת (so Baer and Ginsb.) is also supported by good authority.

noticed that in Arabic (see *m* and note) the pausal form of *at* is *ah*, of which a trace may be preserved in the Hebrew ־ָה.

d (*b*) Simple ת with nouns ending in a vowel, e. g. יְהוּדִי *Jew*, יְהוּדִית *Jewess*. The same ending ת is very frequently added to stems ending in a consonant, but only (except before suffixes) by means of a helping vowel, which, as a rule, is *Segholˆ*, but after gutturals *Pathaḥ*, e. g. קֹטֵל, *fem.* קֹטֶלֶת, *killing*; before suffixes, e. g. קְטַלְתִּי, according to the rule given in § 69 *c*, cf. also § 84*a s*; מוֹדַע *an acquaintance, fem.* מוֹדַעַת. The forms which arise in this way follow in every respect the analogy of the *segholate* forms (§ 94 *f*). The forms which have been developed by means of a helping vowel are retained even in the connective form (*construct state*); except וְיֶלֶדְתּ (for יֶלֶדֶת, which is used elsewhere) Gn 16[11], Ju 13[5.7]; cf. Jer 22[23] and 51[13] *Qereˆ*, also מְשָׁרֶתְ 1 K 1[15], *participle fem. Piʿēl*, properly *meˆšāratt*=מְשָׁרֶתֶת; also מְבַעֲטֶתְּ (*participle fem. Piʿēl* with suffix) arises from the form מְבַעֲטַת which was developed into מְבַעֲטֶת.

e Rem. 1. The fem. form in ־ֶת is in general less frequent, and occurs almost exclusively when the form in ־ָה is also in use. It is only in the participles and infinitives that it is the commoner, e. g. קֹטֶלֶת more common than קֹטְלָה, לֶדֶת than לֶדָה.

f 2. *Rarer* feminine endings are—(*a*) ־ַת with the tone, e. g. בָּרְקַת *emerald*, Ez 28[13] (also בָּרָקַת Ex 28[17]); שִׁפְעַת *a company*, 2 K 9[17], unless the reading is wrong; more frequently in proper names, especially of places among the Canaanites or Phoenicians (in whose language ־ַת was the usual fem. ending, § 2 *d*) and other neighbouring tribes,[1] e. g. צָרְפַּת *Zarephath*, גִּבְעַת *Gibeath*, קִרְיַת *Kiriath*, אֵילַת Greek *Ailana* in Idumea; אֲחוַּת Gn 26[26]: on the reading גָּלִית cf. *g*. Cf., moreover, גְּנִינַת ψ 61[1] (prob. originally גְּנִינֹת); חַיַּת (חַיּוֹת LXX) 74[19.a]; פִּגְּנַת La 2[18]; [רַבַּת *much*, in ψ 65[10], 120[6], 123[4], 129[1.2], is a form borrowed from the Aramaic (Syriac *rabbath*) in which the original *t* of the *fem.* is often retained to form *adverbs*, see Wright, *Comparative Grammar*, p. 135.]

g (*b*) ־ַת, which likewise occurs in some names of places, e. g. בֶּעָלַת, חֶלְקַת, as well as in the *masc.* proper name גָּלְיַת 1 S 17[4], &c. (in 17[23], and 21[10], ed. Mant. has גָּלִיַת), and in the *fem.* proper name שִׁמְעַת; otherwise, almost only in poetry, viz. וְמִרַת Ex 15[2], Is 12[2], ψ 118[14] (really for וְמִרָתִי *my song*; the absorption of the *i*, however, can scarcely have 'taken place in the Aramaic manner', as suggested by Duhm on Is 12[2], nor is it due merely to the following *Yôdh*, but is intended 'to facilitate the absorption of יהּ'; so Geiger, *Urschrift*, p. 277 f.); נַחֲלַת *heritage*, ψ 16[6] (either again for נַחֲלָתִי *my heritage*, or for נַחֲלָתָהּ, cf. § 90 *g*, as probably also עֶזְרַת *help*, ψ 60[13], 108[13] for עֶזְרָתָהּ). These forms are possibly

[1] In the list of Palestinian towns taken by Pharaoh Shoshenq, the feminine town-names all end in *t*. Cf. also the Měša' inscription, line 3, הבמת זאת *this high place*; line 26, המסלת *the highway* [see also Driver, *Tenses*, § 181, *note*].

survivals from a period when even final vowels were not supported by a vowel-letter. Cf. also בֹּרֶת *fecunda* (*a fruitful tree*) Gn 49[22]; יִתְרַת *abundance*, Jer 48[36] (before ע; but in Is 15[7] יִתְרָה); שְׁנָת *sleep* (for שְׁנָה) ψ 132[4]; and (unless the ת is radical) in prose קָאַת *pelican* (which reading is also preferable, in Is 34[11], to the form קָאָה), also מָחֳרַת *the morrow*, but in *construct state* always מִמָּחֳרַת.—תְּהִלַּת Jer 45[25] *Q'rê* is no doubt intended to indicate the reading תְּהִלָּתִי, parallel to מְשׁוֹשִׂי; cf. above, on זִמְרַת, &c.

h (*c*) א_, the Aramaic orthography for ה_, chiefly in the later writers; זְרָא *loathing*, Nu 11[20]; חָנָּא *a terror*, Is 19[17]; שְׁנָא *sleep*, ψ 127[2]; לְבָיָא *a lioness*, Ez 19[2] (unless לָבִיא is intended); מַטָּרָא *a mark*, La 3[12]; cf. also דָּשָׁא *threshing* (*participle Qal* from דּוּשׁ) Jer 50[11]; מָרָא *bitter*, Ru 1[20]. On the other hand, according to the western Masora, קָרְחָה *baldness* is to be read in Ez 27[31]; see Baer on the passage.

i (*d*) ה_, an obtuse form of ה_ (§ 27 *u*), only in הַזּוֹרָה for הַזּוֹרֶה Is 59[5] (unless it is again a *forma mixta* combining the *active ptcp. masc.* הַזּוֹרֶה and the *passive ptcp. fem.* הַזּוּרָה); cf. לָגָּה for לָגָה Zc 5[4]; אֲגָה 1 K 2[36.42] (§ 90 *i*, and § 48 *d*).

k (*e*) ה_ without the tone, e.g. רְחָמָה Dt 14[17] [Lv 11[18] רָחָם]; תַּנּוּר בֹּעֵרָה *an oven heated*, Ho 7[4]; cf. Ez. 40[19], 2 K 15[29], 16[18]. In all these examples the usual tone-bearing ה_ is perhaps intended, but the Punctuators, who considered the feminine ending inappropriate, produced a kind of *locative* form (see § 90 *c*) by the retraction of the tone. [In 2 K 16[18], Is 24[19], Ez 21[31] (note in each case the following ה), and in Jb 42[18], Ho 7[4], the text is probably in error.]

l (*f*) י_, as an old feminine termination, preserved also in Syriac (*ai*; see examples in Nöldeke's *Syrische Gram*, § 83), in Arabic and (contracted to *ê*) in Ethiopic, very probably occurs in the proper name שָׂרַי *Sarai*, cf. Nöldeke, *ZDMG.* xl. 183, and xlii. 484; also עֶשְׂרֵה *ten* (*fem.*) undoubtedly arises from an original *'esray*; so Wright, *Comparative Grammar*, p. 138; König, *Lehrgebäude*, ii. 427.

m 3. It is wholly incorrect to regard the *vowel*-ending ה_[2] as the original termination of the feminine, and the *consonantal* ending ת_ as derived from it. The Ethiopic still has the ת throughout, so too the Assyrian (*at, it*); in Phoenician also the feminines end for the most part in ת, which is pronounced *at* in the words found in Greek and Latin authors; less frequently in א (see Gesenius, *Monumm. Phoen.*, pp. 439, 440; Schröder, *Phön. Sprache*, p. 169 ff.). The ancient Arabic has the obtuse ending (*ah*) almost exclusively in *pause*; in modern Arabic the relation between the two endings is very much as in Hebrew.

---

[1] In 1 S 2c[27] also, where the Masora (see Baer on Jos 5[11]) for some unknown reason requires מִמָּחֳרַת, read with ed. Mant., Jablonski, Opitius, and Ginsburg, מִמָּחֳרָת.

[2] In this ending the ה *h* can only be considered consonantal in the sense that the ת was originally aspirated, and afterwards 'the mute ת was dropped before *h*, just as the old Persian *mithra* became in modern Persian *mihr*'; so Socin, who also points to the Arabic pausal form in *ah*, and observes that among some of the modern Beduin an *h* is still heard as a fem. ending, cf. Socin, *Diwan aus Centralarabien*, iii. 98, ed. by H. Stumme, Lpz. 1901. In Hebrew this consonantal termination was entirely abandoned, at any rate in later times.

§ 81. *Derivation of Nouns.*

Brockelmann, *Grundriss*, p. 329 ff.

Nouns are by their derivation either *primitive*, i. e. cannot be *a* referred to any verbal stem at present extant (see § 82), such as אָב *father*, אֵם *mother* (but see both words in the Lexicon; according to Stade and others אָבְ, אָמְ, &c., are children's words and terms of endearment, and so really primitive nouns), or *derivative*, i. e. either *Derivativa verbalia* (§§ 83–5), e. g. רָם *high*, רָמָה *high place*, מָרוֹם *height*, from רוּם *to be high*, or less frequently *Derivativa denominativa* (§ 86), e. g. מַרְגְּלוֹת *the place at the feet*, from רֶגֶל *foot*.

Rem. 1. The earlier grammarians consider the verb alone as stem, and *b* therefore *all* nouns as verbals, dividing them into (*a*) *Formae nudae*, i. e. such as have only the *three* (or *two*) radicals, and (*b*) *Formae auctae*, such as have formative letters or syllables added at the beginning or end, e. g. מַמְלָכָה, מַלְכוּת. The formative letters used for this purpose are ה א מ נ ת י ו (הָאֲמָנְתִּיו),[1] and the treatment of nouns formerly followed this order.

According to the view of *roots* and *stems* presented in § 30 *d*, nouns (other *c* than *denominatives*) are derived not from the verbal stem, but either from the (abstract) root or from the still undefined stem. In the following pages, however, the arrangement according to the verbal stem is retained as being simpler for the beginner. Cf. § 79 *a*.

2. *Compound* nouns as *appellatives* are very rare in Hebrew, e. g. בְּלִיַּעַל *d* *worthlessness, baseness*. On the other hand, they very frequently occur as proper names, e. g. גַּבְרִיאֵל (*man of God*), יְהוֹיָקִים (*Yahwe raises up*), יְהוֹנָתָן (*Yahwe gave*), &c.[2]

§ 82. *Primitive Nouns.*

The number of *primitive* nouns in the sense used in § 81 is small, since nouns, which in other languages are represented as independent noun-stems, can easily be traced back in Hebrew to the verbal idea, e. g. names of animals and natural objects, as שָׂעִיר *he-goat* (prop. *shaggy*, from שָׂעַר), שְׂעֹרָה *barley* (prop. *prickly*, also from שָׂעַר), חֲסִידָה *stork* (prop. *pia*, sc. *axis*), זָהָב *gold* (from זָהַב = צָהַב *to shine, to be yellow*). Thus there remain only a few nouns, e. g. several names of members of the body in men or beasts, to which a corresponding verbal stem cannot be assigned at all, or at any rate only indirectly (from other Semitic dialects), as קֶרֶן *horn*, עַיִן *eye*.

---

[1] From this *vox memorialis* the *nomina aucta* are also called by the older grammarians *nomina heemantica*.

[2] G. Rammelt (*Über die zusammengesetzten Nomina im Hebr.*, Halle, 1883, and Leipzig, 1884) recognizes as appellatives only צְפַרְדֵּעַ (cf. below, § 85 *w*) and צַלְמָוֶת (the latter certainly incorrectly [see, however, Nöldeke, *ZATW.* 1897, p. 183 ff.]). In p. 8 ff. the author gives a list of 'logical compounds', i. e. new terms formed by composition with the negatives לֹא, בְּלִי, מִבְּלִי.

§ 83. *Verbal Nouns in General.*

a 1. In Hebrew, as in Greek and Latin, the *verbal nouns* are connected in form and meaning primarily with certain forms of the verb, especially the participles and infinitives, which are themselves, even in their ordinary form, frequently used precisely like nouns, e. g. אֹיֵב *enemy*, דַּעַת *to know, knowledge*. Still oftener, however, certain forms of the infinitive and participle, which are seldom or never found as such in the strong verb, though in use in the weak verb and in the kindred dialects, came to be commonly used for the verbal noun; e. g. the participial form קָטֵל, the infinitives of the (Aramaic) form מִקְטַל (as a *noun* also מִקְטָל), further קִטְלַת, קִטְלָה, קָטְלָה, קָטְלָה (§ 45 *d*), &c. Others (as the Arabic shows) are properly intensive forms of the participle.

b 2. As regards their meaning, it follows from the nature of the case that nouns which have the form of the infinitive regularly denote the *action* or *state*, with other closely related ideas, and are therefore mostly *abstract*; while the participial nouns, on the contrary, denote for the most part the *subject* of the action or state, and are therefore *concrete*. Moreover, it is to be noticed, that a particular meaning is attached to many of the special forms of derivative nouns, although it does not appear equally in them all.

c Rem. It need not appear strange, when we consider the analogy of other languages, that a noun which in form is properly *abstract* afterwards acquired a *concrete* sense, and vice versa. So in English, we say *his acquaintance*, for the *persons* with whom he is *acquainted*; the *Godhead* for *God* himself; in Hebrew מוֹרַע *acquaintance* and *an acquaintance*.

d The inner connexion in thought between Semitic noun-forms and the corresponding verbal forms is investigated in the works of De Lagarde and Barth (see the titles at the head of § 79) on very different lines, but with many points of agreement. De Lagarde starts from the fact that language consists of sentences. A sentence which consists of only *one* word is called a verb, and anything which serves as a complement to it is a noun. The oldest form of the sentence is the imperative. Closely related to it are three kinds of sentences of the nature of verbal forms, differing according as the property of the particular object of sense is to be represented as invariable (form *qatula*), or as liable to change (form *qatila*), or, finally, as a circumstance which takes place before our eyes (form *qatala*). Like the imperative, these three forms of sentences have also been transformed into nouns, by means of certain phonetic changes,—especially by the omission of the final vowels and the addition of different terminations to the last consonant of the stem. But just as the forms of the verbal sentence undergo numerous modifications (in the tenses, moods, and conjugations), so also do the nouns, sometimes by assimilation of the unessential to the characteristic vowel (*qutul, qitil*), sometimes by the lengthening of the characteristic vowel (*qatûl, qatîl, qatâl*), or else through the displacement of the accent and the consequent reduction of the noun to a monosyllabic form (*qatl, qutl, qitl*), or, finally, by their being formed from the derived stems (or conjugations), e. g. *qattal, qattîl; qitt̂il, qittâl*, &c. Further modifications arise from the use of the various imperfect

and infinitive forms, and also from the employment of the prefix *m*. Lastly, *denominalia* are formed from *deverbalia* by appending certain suffixes.

De Lagarde does not, however, claim to be able to show in the case of each particular noun the sense it conveyed in primitive times; the origin of a number of nouns can now no longer be detected. In those, however, which are clearly derived from verbs, the original meaning is chiefly determined by the characteristic vowel.

Barth's system is based on the thesis that 'all Semitic nouns, adjectives, and participles are derived from either the perfect or the imperfect stem'. Thus, e. g. קְטוֹל is the infinitive of the perfect stem, קְטֹל the infinitive of the imperfect stem, יְשַׁבֵּב infinitive of יִשַּׁבֵּב, &c. In dissyllabic noun-forms the second vowel is always alone characteristic and essential, the first vowel unessential, and therefore variable. Further modifications of the simple form are effected by strengthening (sharpening) the second or third consonant, by lengthening the characteristic vowel (instead of which, however, the feminine termination may also be used), or by 'metaplasm', i. e. by the use of noun-forms derived from one of the two intransitive stems for the other, e. g. *qutl* for *qitl*, and vice versa.

In nouns of the perfect stem, the vowels *i* and *u* indicate intransitive formations, the vowel *a* a transitive sense. In nouns of the imperfect stem on the contrary, *u* and *i*, being characteristic vowels, indicate a transitive and *a* an intransitive sense: for *yaqtūlŭ* is imperfect of the transitive perfect *qatala*, and *yaqtălŭ* imperfect of the intransitive perfects *qatila* and *qatula*, &c. This explains how nouns, apparently identical in form, may yet in sense belong to different classes: a *qutl*-form from a *u*-imperfect has a transitive meaning, but the same form from a *u*-perfect has an intransitive meaning. This double system of perfect and imperfect forms runs through the whole scheme of noun-formation, not only the forms connected with the conjugations, but also the forms with prefixes and suffixes.

Against the whole theory it has been urged that it postulates for the development of the language a much too abstract mechanism, and further, that the meanings of words as we find them may in many cases be due to a modification of the original sense. But though many of the details (e. g. the alleged unessential character of the vowel of the first syllable) remain doubtful, yet the agreement between the characteristic vowel of certain noun formations and that of the perfect or imperfect stem, is supported by such a number of incontestable instances, that there can be no doubt as to a systematic, intimate connexion between the two. At the same time it must be admitted that De Lagarde has put forward many important and suggestive points, and both scholars agree in laying stress on *one* characteristic vowel as indicative of the meaning.

§ 84ª. *Nouns derived from the Simple Stem.*

Preliminary remark.—From the statement made above, § 83 *d*, it follows that *a* an external similarity between forms is no proof of their similar origin, and, vice versa, external difference does not exclude the possibility of their being closely related both in origin and meaning.

I. *Nouns with One Vowel, originally Short.*

R. Růžička, 'Beiträge zur Erklärung der nomina segolata,' in *Sitz.-ber. d. böhmischen Ges. d. Wiss.*, Prag, 1904.

1. Nouns with one of the three short vowels after the first radical: *present* ground-form *qătl*, *qĭtl*, *qŭtl*.

The supposition of *monosyllabic* ground-forms appeared to be required by the character of forms now existing in Hebrew, as well as in Arabic, &c. But there are strong reasons for believing that at least a large proportion of these forms go back to original dissyllabic bases with a short vowel in each syllable. When formative additions were made, the vowel of the 2nd syllable

was dropped, i.e. before case-endings in Assyrian and early Arabic, and before pronominal suffixes in Hebrew. From the forms thus produced, the bases *qaṭl*, *qiṭl*, *quṭl* have been assumed, although they never appear in Hebrew except in the singular and then in connexion with suffixes.

In support of this view of a large number of original dissyllabic bases, we must not, however, appeal to the Seghôl or Pathaḥ under the 2nd consonant of the existing developed forms, סֵפֶר, זֶרַע, &c. These are in no sense survivals or modifications of an original full vowel in the 2nd syllable, but are mere helping-vowels (§ 28 *e*) to make the monosyllabic forms pronounceable,[1] and consequently disappear when no longer needed. Under certain circumstances even (e.g. in קֹשְׁטָ) they are not used at all. Actual proofs of such original toneless full vowels in the 2nd syllable of existing Segholates are—

1. Forms like Arab. *málik*, for which rarely *malk*, corresponding to the Hebrew ground-form ; cf. De Lagarde, *Uebersicht*, p. 72 ff.

2. In Hebrew גֶּדֶר, יֶרֶךְ, כֶּבֶד, כֶּתֶף, the connective forms of גְּדֵר, יִרְךְ, &c., which latter can only come from ground-forms *gădĭr*, *yărĭk*, *kăbĭd*, *kătĭp*.

3. The forms treated under *e*, which are in many ways related to the Segholates proper, in so far as they are to be referred to original dissyllabic bases.

4. The plurals of Hebrew Segholates, since, with very rare exceptions, they take *Qameṣ* under the 2nd radical before the termination ־ִים, fem. ־וֹת, of the *absolute state*, as מְלָכִים, מְלָכוֹת, סְפָרִים, &c. This *Qameṣ* (see note 1 on § 26 *e*) can only be due to a lengthening of an original short vowel in the 2nd syllable, and hence it would seem as though the vowel were always *ă*. This is impossible from what has been said, especially under 1 and 2. Hence the explanation of the consistent occurrence of *Qameṣ* in the plurals of *all* Segholates can only be that the regularly formed plurals (i.e. from singulars with original *ă* in the 2nd syllable) became the models for all the others, and ultimately even for some really monosyllabic forms.[2]

(*a*) From the strong stem the above three ground-forms are further developed to קָטֶל,[3] קָטֶל, קֶטֶל (cf. § 27 *r* and in § 93 the explanations of Paradigm I, *a–c*) ; without a helping vowel (§ 28 *d*) קֹשְׁטָ *truth*. If the second

---

[1] According to Delitzsch (*Assyr. Gram.*, p. 157 f.) the same is true in Assyrian of the corresponding *qaṭl*-forms. Without case-endings they are *kalab*, *šamas*, *aban* (=כֶּלֶב, שֶׁמֶשׁ, אֶבֶן), with case-endings *kalbu*, *šamsu*, *abnu*. On the other hand, acc. to Sievers, *Metrik*, i. 261, Hebrew ground-forms probably have a twofold origin: they are shortened according to Hebrew rules partly from old absolute forms like *kálbu*, *sifru*, *qúdšu*, and partly from old construct-forms like the Assyrian types *kalab*, *sifir*, *quduš*.

[2] On the other hand, Ungnad, *ZA.* 1903, p. 333 ff., rejecting all previous explanations, maintains that the *a* in *melákhîm*, *melākhôth* is inserted merely to facilitate the pronunciation. From *qaṭlîm* arose *qaṭalîm*, then *qaṭalîm* and finally *qeṭālîm*. See, however, Nöldeke, 'Zur semit. Pluralendung,' *ZA.* 1904, p. 68 ff., who points out that the Semitic nouns *fa'l*, *fi'l*, *fu'l* with their corresponding feminines *fa'la*, &c., on assuming the plural termination commonly take an *a* before the 3rd radical, but that no satisfactory account can be given for it. M. Margolis, 'The plural of Segolates' (*Proc. of the Philol. Assoc. of the Pacific Coast*, San Francisco, 1903, p. 4 ff.), and S. Brooks, *Vestiges of the broken plural in Hebrew*, Dublin, 1883, explain melākhîm as a *pluralis fractus*.

[3] It is worthy of notice that St. Jerome also (cf. Siegfried, *ZAW.* iv. 76) frequently represents the vowel of the first syllable by *a*, e.g. *gader*, *aben*, *ader*, *areb*, for גֶּדֶר, אֶבֶן, אֶדֶר, חֶרֶב, but *cedem*, *secel*, *deber*, &c., for קֶדֶם, שֶׂכֶל, דֶּבֶר, &c.

or third radical be a guttural, a helping *Pathaḥ* takes the place of the helping *Seghôl*, according to § 22 *d*, e.g. זֶרַע *seed*, נֶצַח *eternity*, פֹּעַל *work*; but with middle ה or ח, note לֶחֶם *bread*, רֶחֶם (as well as רַחַם) *womb*, אֹהֶל *tent*, בֹּהֶן *thumb*; so with final א, פֶּרֶא *a wild ass*, &c.; with a middle guttural also the modification of the principal vowel *ă* to *è* does not occur, e.g. נַהַר, נַעַר, לַחַץ (exceptions, again, לֶחֶם, רֶחֶם). On the inflexion, cf. § 93, Paradigm I, *a-f*, and the explanations. In חֵטְא *sin*, the א has wholly lost its consonantal value.

Examples of feminines: מַלְכָּה (directly from the ground-form *malk*, *king*), *b* סִתְרָה *a covering* (also סֵתֶר), אָכְלָה *food* (also אֹכֶל); with a middle guttural נַעֲרָה *girl*, טָהֳרָה *purity* (also טֹהַר). Cf. § 94, Paragraph I.

(*b*) From weak stems: (*a*) from stems ע״ן, e.g. אַף *nose* (from *'ănp*, hence *c* with formative additions, e.g. אַפִּי for *'anpî*, *my nose*); עֵז *a she-goat* (ground-form *'inz*); fem. חִטָּה *wheat*; (*β*) from stems ע״ע (§ 93, Paragraph I, *l-n*); פַּת *a morsel*, עַם *people* (so, when in close connexion with the next word; unconnected עָם; with article הָעָם, לָעָם, &c.); רַב in the sense of *much*, but רָב *great*, *numerous* (in close connexion also רַב); רָע *evil*, with the article in close connexion הָרַע, unconnected הָרָע; with the *ă* always lengthened to *ā*, יָם *sea*; fem. חַיָּה *life*, and with attenuation of the *ă* to *i*, מִדָּה *measure*; from the ground-form *qĭṭl*, אֵם *mother*; fem. גִּזָּה *a shearing*; from the ground-form *qŭṭl*, חֹק *statute*, fem. חֻקָּה. (*γ*) from stems ע״ו (Paradigm I, *g* and *i*); מָוֶת *death* (from *mă-ut*, the *u* passing into the corresponding consonant, as in תָּוֶךְ *middle*) or contracted יוֹם *day*, שׁוֹט *whip*, שׁוֹר *a bull*; fem. עִוָּלָה *perverseness* (also contracted עוֹלָה); from the ground-form *qŭṭl*, צוּר *a rock*; fem. סוּפָה *a storm*. (*δ*) from stems ע״י (Paradigm I, *h*); זַיִת *an olive-tree* (with a helping *Ḥireq* instead of a helping *Seghôl*) from *zá-it*, the *i* passing into the corresponding consonant; or contracted חֵיק *bosom*, חֵיל 2 K 18[17] (elsewhere חַיִל) *host*; fem. שֵׂיבָה *grey hair*; from the ground-form *qĭṭl*, דִּין *judgement*; fem. בִּינָה *understanding*. (*ε*) from stems ל״ה (Paradigm I, *k*); partly forms such as בֶּכֶה *weeping*, הֶגֶה *murmuring*, לֶדֶת *a present*, קֵצֶה *the end*, partly such as אֲרִי, בְּכִי *a lion* (ground-form *bŭky*, *'ăry*); cf. also the forms from stems originally ל״ו, שָׂחוּ *swimming* (ground-form *sāḥw*); fem. שַׁלְוָה *rest*, נַאֲוָה *exaltation*; from stems ל״י, אַלְיָה *a fat tail*, and with attenuation of *ă* to *ĭ* שִׁבְיָה *captivity*, also שִׁבְיוֹת, formed no doubt directly from the masc. שִׁבְי with the fem. termination ת; from the ground-form *qĭṭl*, חֲצִי (from *ḥiṣy*); fem. חֶדְוָה *joy*, עֶרְיָה and עֶרְוָה *nakedness*; from the ground-form *qŭṭl*, בֹּהוּ (from *bŏhw*) *waste*, תֹּהוּ *emptiness*; דְּלִי, for דַּלְיִ, *bucket*; fem. אֳנִיָּה *a ship* (directly from אֳנִי *a fleet*).

The masculines as well as the feminines of these *segholate* forms may have *d* either an *abstract* or a *concrete* meaning. In the form קֹטֶל the *passive* or at any rate the *abstract* meaning is by far the more common (e.g. נֹעַר *youthfulness*, abstract of נַעַר *boy*; אֹכֶל *food*, &c.).[1]

[1] M. Lambert also (*REJ.* 1896, p. 18 ff.), from statistics of the Segholates, arrives at the conclusion that the *qaṭl*-form is especially used for concretes (in nouns without gutturals he reckons twenty concretes as against two abstracts), and the *qiṭl*-form, and less strictly the *quṭl*, for abstracts.

e 2. Nouns with one of the three short vowels under the second radical (present ground-form *qᵉṭāl, qᵉṭīl, qᵉṭūl*), e. g. דֶּבַשׁ *honey*, דַּוַי *sickness*, חֲתַת *terror*; and so always with middle א, בְּאֵר *a well*, זְאֵב *a wolf*, בְּאֹשׁ *stench*. In reality these forms, like the segholates mentioned in No. 1 (see above, *a*), are, probably, for the most part to be referred to original *dissyllabic* forms, but the tone has been shifted from its original place (the penultima) on to the ultima. Thus *dibāš* (originally *dibaš*) as ground-form of דְּבַשׁ is supported both by the Hebrew דִּבְשִׁי (with suffix of the first person), and by the Arabic *dibs*, the principal form; *biʾir* (according to Philippi with assimilation of the vowel of the second syllable to that of the first) as ground-form of בְּאֵר is attested by the Arabic *biʾr*; for בְּאֹשׁ (Arabic *buʾs*) similarly a ground-form *buʾūš* may be inferred, just as a ground-form *qāṭūl* underlies the infinitives of the form קְטֹל.[1]

II. *Nouns with an original Short Vowel in both Syllables.*

f 3. The ground-form *qāṭāl*, fem. *qāṭālāt*, developed in Hebrew to קָטָל (§ 93, Paradigm II, *a*, *b*) and קְטָלָה (§§ 94, 95, Paradigm II, *a*, *b*), mostly forms intransitive adjectives, as חָכָם *wise*, חָדָשׁ *new*, יָשָׁר *upright*; but also substantives, as דָּבָר *a word*, and even abstracts, as אָשָׁם *guilt*, רָעָב *hunger*, שָׂבָע *satiety*; in the fem. frequently abstract, as צְדָקָה[2] *righteousness*; with an initial guttural אַדָמָה *earth*.—Of the same formation from verbs ע״ע are בָּדָד *alone*, עָנָן *cloud*; passive חָלָל *pierced*.—In verbs ל״ה a final *Yôdh* is almost always rejected, and the *ā* of the second syllable lengthened to *ē*. Thus שָׂדֵי *field*, after rejection of the י and addition of ה as a vowel-letter, becomes שָׂדֵה (cf. § 93, Paradigm II, *f*); fem. e. g. שָׁנָה *year*; cf. § 95, Paradigm II, *c*. From a verb ל״ו the strong form עָנָו *afflicted* occurs.

g 4. The ground-form *qāṭūl*, fem. *qāṭūlāt*, developed to קָטֹל (§ 93, Paradigm II, *c–e*) and קְטֻלָה, is frequently used as participle of verbs middle *e* (§ 50 *b*), and hence mostly with an intransitive meaning; cf. זָקֵן *old, an old man*; כָּבֵד *heavy*; fem. בְּהֵמָה *cattle*, אֲפֵלָה and חֲשֵׁכָה *darkness*.—From verbs פ״י: irregularly, דְּלִיּוֹתָיו *the branches of it*, Jer 11[16], &c., generally referred to a *sing.* דָּלִית (stem דלה), and הֲרִיּוֹתָיו Ho 14[1] *their women with child* (from הָרָה, *st. constr.* הֲרַת, *plur. st. absol.* and *constr.* הָרוֹת).—From a verb ל״ו with consonantal Wāw: שַׁלְוָ *at ease*, incorrectly written *plene* שַׁלְוִי Jb 21[23].

h 5. The ground-form *qāṭūl*, developed to קָטֹל (also written קָטוֹל), generally forms adjectives, e. g. אָיֹם *terrible*, בָּרֹד *piebald*, מָתוֹק *sweet*, נָקֹד *speckled*, עָבֹת *interwoven*, עָגֹל *round*, עָמֹק *deep*, עָקֹב *hilly*, צָהֹב *golden*; קָטֹן *small*, only in sing. masc., with a parallel form קָטֶן of the class treated under *f*, fem. קְטַנָּה, plur. קְטַנִּים. These forms are not to be confounded with those in No. III, from

---

[1] On this theory cf. Stade, *Hebräische Grammatik*, § 199 *b*; De Lagarde, *Übersicht*, p. 57 f.; A. Müller, *ZDMG.* xlv, p. 226, and especially Philippi, *ZDMG.* xlix, p. 208.

[2] In St. Jerome's time these forms were still pronounced *ṣadaca* (צְדָקָה), *ṣaaca* (צְעָקָה), *nabala* (נְבָלָה), &c., see Siegfried, *ZAW.* iv. 79. Moreover, the numerous abstracts of this form (e. g. even קְצָצָה *a splintering*, צְוָחָה *a crying*, &c.) are undoubtedly to be regarded (with Barth, *Nominalbildung*, p. 87) as feminines of infinitives of the form *qāṭāl*, the lengthening of the second syllable being balanced, as in other cases, by the addition of the feminine termination.

the ground-form *qāṭāl*.—Fem. אֲיֻמָּה, כְּבוּדָה (*glorious*), עֲבֹתָה, עֲנֻגָּה (*delicate*), עֲנֻלָּה, עֲמֻקָּה, with sharpening of the third radical, in order to keep the original *ŭ* short, and similarly in the plurals נְקֻדִּים, בְּרֻדִים, עֲגֻלִּים, אֲסֻפִּים *stores*, &c.

i 6. The ground-form *qiṭāl* develops to קֶטָל (cf. § 93, Paradigm II, Rem. 1), e. g. לֶבָב *heart*, עֱנָב *a bunch of grapes*, שֵׁכָר *strong drink*; from a verb ל״ה, probably of this class is רֵעָה, generally contracted to רֵעַ *friend*, ground-form *ri'ay*: the full form is preserved in רֵעֵהוּ *his friend*, for רֵעֶיהוּ.

III. *Nouns with an original Short Vowel in the First and a Long Vowel in the Second Syllable.*

k 7. The ground-form *qăṭāl* in Hebrew always develops to the form קָטוֹל, the *ā* becoming an obscure *ô*. The fact that this form is also written קָטֹל must not lead to the confusion of these forms with those mentioned in No. 5, from the ground-form *qāṭŭl*.[1] Moreover the *qaṭôl*-class includes forms of various origin, and therefore of various meaning, as (*a*) intransitive adjectives like גָּדוֹל *great*, קָדוֹשׁ *holy*, fem. גְּדוֹלָה, the short vowel becoming Še·wâ, whereas in גָּדֹל, &c., *before the tone* it is lengthened to *ā*; (*b*) the *infinitives absolute* of the form קָטוֹל (§ 45 *a*) as representing the abstract idea of the verb, and abstract substantives like כָּבוֹד *honour*, שָׁלוֹם *peace* (Arab. *sālâm*); (*c*) substantives and adjectives in an active sense, as בָּחוֹן *assayer* (of metals), עָשׁוֹק *an oppressor*, חָמוֹץ *oppressing*; in the feminine בָּגוֹדָה *treacherous* Jer 3[7.10], the irregular retention of the *ā* in the third syllable from the end is no doubt to be explained, with Brockelmann, from Aramaic influence, the punctuator having in mind the Aramaic nomen agentis *qāṭôl*.

l 8. The ground-form *qăṭil* develops to קָטִיל (cf. § 93, Paradigm IV, *a* and *b*). Here also forms of various origin and meaning are to be distinguished: (*a*) adjectives used substantivally with a passive meaning to denote duration in a state, as אָסִיר *a prisoner*, מָשִׁיחַ *an anointed one*. These proper *qāṭil*-forms are parallel to the purely passive *qaṭûl*-forms (see *m*), but others are due to a strengthening of original *qaṭĭl*-forms. These are either (*b*) intransitive in meaning, as צָעִיר *small*, and, from ל״י stems, נָקִי *pure*, עָנִי *poor* (see § 93 *vv*), or (*c*) active, as נָבִיא *a speaker* (prophet), פָּקִיד *an overseer*.—Of a different kind again (according to De Lagarde, infinitives) are (*d*) forms like אָסִיף *the ingathering*, בָּצִיר *vintage*, חָרִישׁ *ploughing time*, קָצִיר *harvest*. On *qāṭṭil* forms with a kindred meaning, cf. § 84*b f*.

m 9. The ground-form *qăṭûl* develops to קָטוּל. As in the *qaṭál* and *qaṭil*-forms (see *k* and *l*), so here forms of various kinds are to be distinguished: (*a*) *qaṭûl*-forms proper, with passive meaning, especially all the passive participles of Qal; fem. e. g. בְּתוּלָה *virgin* (properly *secluded*). On the other hand, by strengthening an original *qaṭŭl*-form we get (*b*) certain stative adjectives (§ 50*f*), as אָנוּשׁ *incurable*, עָצוּם *strong*, עָרוּם *subtil*, or even transitive, as אָחוּז *holding*; (*c*) active substantives, as יָקוּשׁ *a fowler*. Further, some of the forms mentioned in § 84*b g* belong to this class; see above, the remark on *l*.

n 10. The ground-form *qiṭāl* or *qăṭāl*[2] in Hebrew changes the *ĭ* to vocal *Še·wâ*,

---

[1] In Na 1[3] only the *Qe·rê* requires גְּדָל־ (in the constr. state) for the *Ke·thîbh* גְּדוֹל.

[2] On the *fu'âl*-forms (regarded by Wellhausen as original diminutives) see Nöldeke, *Beiträge* (Strassb. 1904), p. 30 ff. He includes among them כְּעֹרֶת *two*, and טְחֹרִים *hemorrhoids*.

and develops to קָטָל (cf. § 93, Paradigm IV, *c*) or קָטוֹל, with *â* obscured to *ô* (as above, *k*). Cf. שְׁאָר *remnant*, יְקָר *honour*, כְּתָב *book* (Arab. *kĭtâb*), קְרָב *war* (the last three probably loan-words from the Aramaic); of the other form, חֲלוֹם *a dream*, חֲמוֹר *an ass* (Arab. *ḥĭmâr*), אֱלוֹהַּ *God* (Arab. *'ilâh*); with א *prosthetic* (§ 19 *m*), אֱזוֹר *arm* (twice: usually זְרוֹעַ); fem. בְּשׂוֹרָה *good news* (Arab. *bĭśârăt*); עֲבוֹדָה *service*, כְּתֹבֶת (Arab. *kĭtâbăt*) *tattooing*.

o 11. The ground-form *qĭṭîl* seems to occur e. g. in Hebrew אֱוִיל *foolish*, אֱלִיל *vanity*, בְּדִיל *lead*, כְּסִיל *a fool*, חֲזִיר *a swine* (the prop. name חֲזִיר points to the ground-form *qĭṭîl*, cf. Arab. *ḥĭnzir*).

p 12. The ground-form *qĭṭûl* or *qŭṭûl*, Hebr. קְטוּל, e. g. גְּבוּל *a boundary*, לְבוּשׁ *a garment*; fem. גְּבוּרָה *strength*, אֱמוּנָה *faithfulness*.

q Rem. When the forms *qᵉṭûl* and *qᵉṭôl* begin with א, they almost invariably take in the singular a *Ṣere* under the א instead of the ordinary *Ḥaṭeph-Sᵉghôl*; cf. אֲבוּס *a crib*, אֲטוּן *thread*, אֲמוּן *faithful*, אֵזוֹב *hyssop*, אָזוֹר *a waist-band*, אֲסוּר *a bond*, אֵפוֹד *an 'ephod'*; cf. § 23 *h*, and the analogous cases of *Ṣere* for *Ḥaṭeph-Sᵉghôl* in verbal forms § 52 *n*, § 63 *p*, § 76 *d*.

IV. *Nouns with a Long Vocal in the First Syllable and originally a Short Vowel in the Second Syllable.*

r 13. The ground-form *qâṭăl*, in Hebrew, always changes the *â* into an obscure *ô*, קוֹטָל (לְטָל), e. g. עוֹלָם (§ 93, Paradigm III, *a*), Arab. *'âlăm*, *eternity*; חוֹתָם (Arab. *ḥâtăm*) *a seal* (according to Barth a loan-word of Egyptian origin), fem. חוֹתֶמֶת (from *ḥôtămt*); תּוֹלָע *worm* (unless from a stem ולע, like תּוֹשָׁב from ושׁב; see the analogous cases in § 85 *b*). On the participles *Qal* of verbs ל״ה (§ 93, Paradigm III, *c*), cf. § 75 *e*; on the feminines of the participles *Qal*, which are formed with the termination ת, see below, *s*.

Rem. Of a different kind (probably from a ground-form *qauṭal*) are such forms as אוֹפָן (or אוֹפַן Ez 10⁹ in the same verse) *a wheel*; גּוֹזָל *a young bird*, דּוֹנַג *wax*, &c.

s 14. The ground-form *qâṭîl* also becomes in Hebrew almost invariably קוֹטֵל (קְטֵל). Besides *participles active masc. Qal* this class includes also feminines of the form קֹטֶלֶת, if their ground-form *qôṭalt* (§ 69 *c*) goes back to an original *qâṭîlt*. The substantives of this form, such as כֹּהֵן *priest* (Arab. *kâhĭn*), were also originally participles *Qal*. The fem. of the substantives has *ē* (lengthened from *ĭ*) retained before the tone, e. g. יוֹלֵדָה *a woman in travail* (cf. also בּוֹגֵדָה *the treacherous woman*, Jer 3⁸; הַצּוֹלַעָה *her that halteth*, Mi 4⁶ f., Zp 3¹⁹; סוֹחֵרָה *a buckler*, ψ 91⁴); the participles as a rule have the form יֹלֶדֶת, &c., the original *ĭ* having become *Šᵉwâ*; however, the form with *Ṣere* occurs also in the latter, Is 29⁶.⁸, 34⁹, ψ 68²⁶, 118¹⁶ (all in principal *pause*; in subordinate *pause* 2 S 13²⁰, Is 33¹⁴; with a conjunctive accent, Ct 1⁶).

t 15. The ground-form *qûṭăl*, Hebrew קוּטַל (as יוּבַל *river*, Jer 17⁸) or קוּטָל e. g. עוּגָב *a pipe*, commonly עֻגָב, and to be so read, with Baer, also in ψ 150⁴, not עֻגָב.

V. *Nouns with a Long Vowel in each Syllable.*

u 16. קִיטוֹל, e. g. קִיטוֹר *smoke*. The few forms of this kind are probably derived from the ground-form *qîṭâl* (*qîṭṭâl* ?), i. e. the original *â* has become an obscure *ô*.

§ 84[b]. *Formation of Nouns from the Intensive Stem.*

This includes all forms which have arisen, either through the *a* doubling of the middle radical, or the repetition of one or of two consonants of the simple stem.

VI. *Nouns with the Middle Consonant sharpened.*

As in the corresponding verbal stems (cf. § 52 *f*), so also in some noun-formations of this class, the Dageš in the second radical expresses an intensification of the idea of the stem, either emphasizing the energy of the action or relation, or else indicating a longer continuance of the relation or state. Other nouns of this character are evidently only by-forms of the nouns derived from the simple stem, which were treated in the last section: cf. the instances adduced under *f* and *g*, and Barth, *Nominalbildung*, Introd., p. x.

17. The ground-form *qāṭṭāl* is mostly lengthened in Hebrew to קָטָל; cf. *b* אַיָּל *a stag*, fem. אַיָּלָה, *constr. st.* אַיֶּלֶת (from *'ăyyālt*); cf. also the fem. (originating from *Qal*) לְהָבָה *a flame* (according to § 27 *q* for *lāhhābhā*), חֲרָבָה *dry land* (for *ḥarrābhā*), and קַדַּחַת קַלַּקַת *a burning fever*, יַבָּשָׁה and יַבֶּשֶׁת *dry land*, טַבַּעַת *a seal-ring*, שַׁחֶפֶת *consumption*. Adjectives of this class ('intensified participles of the active verb', Barth, *ibid.*, § 33) are חַטָּא *sinful*, נַזָּח *wont to gore*, קַנָּא *jealous*, כַּחַשׁ (for *kaḥḥāš*, by § 22 *c*) *lying*. *Nomina opificum* also, curiously enough, are so treated in Hebrew (at least in the *constr. state* of the sing.), although the corresponding Arabic form *qāttāl* points to an original (unchangeable) *ā* in the second syllable; cf. גַּנָּב *a thief*, דַּיָּן *a judge* (*constr. st.* דַּיַּן *ψ* 68[6]), טַבָּח *a cook*, חָרָשׁ (for *ḥarrāš*) *artificer* (*constr. st.* חָרַשׁ, but *plur. constr.* חֲרָשֵׁי); פָּרָשׁ *horseman* (for *parrāš*), *const. st.* פָּרַשׁ Ez 26[10].

18. The ground-form *qīṭṭāl* appears in צָחָה *dry*, גָּאֶה *haughty* (the *ī* being *c* lengthened to *ē* according to § 22 *c*), if these forms go back to original *ṣiḥḥāy*, *gi''āy*. On the analogy, however, of the adjectives denoting defects (see *d* below), we should rather expect a ground-form *qīṭṭūl*; moreover, *'iwwalt*, ground-form of the fem. אִוֶּלֶת *foolishness*, goes back to an original *iwwilt*, see § 69 *c*.

19. The ground-form *qŭṭṭāl* and *qŭṭṭŭl*; cf. the fem. כֻּתֹּנֶת *spelt*, כְּתֹנֶת *coat*.

20. The ground-form *qāṭṭūl*; from the intensive stem, the infinitives *Pi'ēl* of *d* the form קַטֵּל.

21. The ground-form *qiṭṭŭl*, in Hebrew lengthened to קִטֻּל. Of this form are a considerable number of adjectives which denote a bodily or mental fault or defect. Cf. אִטֵּר *disabled*, אִלֵּם *dumb*, גִּבֵּן *hump-backed*, עִוֵּר *blind*, חֵרֵשׁ *deaf* (for *ḥirrēš*), פִּסֵּחַ *lame*, קֵרֵחַ *bald*, עִקֵּשׁ *perverse*; פִּקֵּחַ *open-eyed* follows the same analogy.

22. The ground-form *qāṭṭāl*, cf. the remarks in *b* above, on the *nomina* *e* *opificum*; moreover, to this class belong infinitives *Pi'ēl* of the Aramaic form בַּקָּרָה *a searching out*; בַּקָּשָׁה *a request*; with middle guttural (see § 22 *c*) נָאצָה *contumely*; but cf. also נָאצוֹתֶיךָ Ez 35[12], with full lengthening of the original *ă* before א; נֶחָמָה *comfort*. From the attenuation of the *ă* of this form to *ĭ*, arises undoubtedly:

23. The ground-form *qiṭṭāl*, e. g. אִכָּר *husbandman* (Arab. *'ăkkār*).

24. The ground-form *qiṭṭōl*, most probably only a variety of the form *qāṭṭāl* with the *ă* attenuated to *ĭ* (as in No. 23), and the *ā* obscured to *ō* (as in *n* and

r); cf. גִּבּוֹר *hero* (Arab. *găbbâr*), יָסוֹר *caviller*, צִפּוֹר (*piper* or *chirper*) *a bird*, שִׁכּוֹר *drunkard*. On the other hand, יְלוֹד *born* probably arises from *yullôd*, an old *participle passive* of *Qal*, the *ŭ* being dissimilated in the sharpened syllable before *ô*: so Barth, *ibid.*, p. 41 f.

f 25. The ground-form *qăṭṭîl*, קַטִּיל, almost exclusively of persons, who possess some quality in an intensive manner, e.g. אַבִּיר *strong*, צַדִּיק *righteous*, בָּרִיחַ *fugitive* (for *barri*^{a}*ḥ*), עָרִיץ *violent* (for *'ărriṣ*).

That some of these are only by-forms of the *qăṭṭîl*-class (see above, remark on *a*), appears from the *constr. st.* פְּרִיץ *ravenous*, Is 35^{9} (but פָּרִיצֵי, always), and according to Barth (*ibid.*, 35 *a*) also from the *constr. st.* אֲבִיר (but also אַבִּיר 1 S 21^{8}) of אַבִּיר. However, the form אָבִיר, as a name of God, may be intentionally differentiated from אַבִּיר, a poetic term for the bull.

In the same way אָסִיר *prisoner*, סָרִיס *eunuch* (*constr. st.* always סְרִיס, plur. סָרִיסִים, *constr. st.* סְרִיסֵי Gn 40^{7}, but in the book of Esther always סָרִיסֵי, with *suffix* סָרִיסָיו, &c.), and עָתִיק *weaned*, may be regarded as by-forms of the *qăṭîl*-class with passive meaning, see § 84^{a} *l*.

g 26. The ground-form *qăṭṭûl*, קַטּוּל, e.g. חַנּוּן *gracious*, רַחוּם *compassionate* (with virtual strengthening of the ח), חָרוּץ *diligent* (for *ḥarrûṣ*), probably, again, to a large extent by-forms of the *qăṭṭûl*-class, § 84^{a} *m*. The same applies to substantives like אַשֻּׁר *a step* (in אַשֻּׁרַי, as well as אַשֻּׁרוֹ, &c.), עַמּוּד *pillar*; fem. חֲבוּרָה *a stripe* (*also* חַבֻּרְתּוֹ), בַּטֻּחוֹת *security*: cf. Barth, *ibid.*, § 84.

h 27. The ground-form *qăṭṭôl*; besides the infinitives absolute *Pi'ēl* of the form קַטֹּל, also קַנּוֹא *jealous* (as well as קַנָּא, an obscured form of *qăṭṭûl*, see *e*).

i 28. The ground-form *qĭṭṭûl*, קִטּוּל, e.g. צִפּוּי *a coating of metal*, שִׁלּוּם *requital*, שִׁקּוּי *drink*, שִׁקּוּץ *detestable thing*; with concrete meaning לְמוּד *a disciple*, עִזּוּז *strong*; frequently in the plural in an abstract sense, as גְּדוּפִים *reproach*, מִלֻּאִים *filling* (the induction of a priest), נֶחָמִים *consolations, compassion*, שְׁכֻלִים *bereavement*, שִׁלֻּחִים *dismissal*, שִׁמֻּרִים *observance*.

VII. *Nouns with the Third Consonant repeated.*

k 29. The ground-form *qăṭlăl*, e.g. שַׁאֲנָן (with sharpening of the second *Nûn*, in order to keep the preceding vowel short); רַעֲנָן *green*, plur. רַעֲנַנִּים.

l 30. The ground-form *qăṭlūl*, in Hebrew קִטְלֻל; of this form are e.g. the infinitives *Pi'lēl* (prop. *Pa'lēl*), cf. § 55 *d*.

m 31. The ground-form *qăṭlûl*; so the plur. גַּבְנֻנִּים *ridges* (with sharpening of the *Nûn*, as in No. 29).

32. The ground-form *qĭṭlăl*, in פִּרְחָח *a brood*.

33. The ground-form *qăṭlăl*, in אֻמְלָל *faint*.

34. The ground-form *qāṭlîl*, e.g. עַבְטִיט *plunder*, כְּנִיר *rain-storm*, שַׁפְרִיר *glittering tapestry*, Jer 43^{10} *Qᵉrê*; with attenuation of the *ă* to *i* כְּמִרְיִרִים *all that maketh black*, Jb 3^{5} (but the better reading is כַּמְרִירֵי).

35. The ground-form *qăṭlûl*, e.g. שַׁפְרוּר Jer 43^{10} *Kᵉth.*; נַאֲפוּפִים *adulteries*.

VIII. *Nouns with the Second and Third Consonants repeated.*

n 36–39. *Qᵉṭālṭăl*, *qᵉ;ālṭîl*, *qᵉṭālṭûl*; *qᵉṭālṭûl*, *qᵉṭālṭôl* (in *fem.* and *plur.* often with the last consonant sharpened for the reason given in *a* above); cf. הֲכַכְּבַּךְ

crooked, חֲלַקְלַקּוֹת *slippery places*, עֲקַלְקַלּוֹת *crooked (ways)*; פְּתַלְתֹּל *tortuous*; also words denoting colours, אַדְמֹנִי (Lv 13[42.49] in pause) *reddish*, fem. אַדְמֹנִית, plur. אַדְמֹנִים; יַרְקְרָק *greenish*, plur. fem. יַרְקְרָקוֹת; *qᵉṭalṭūl*, יְפֵיפִיָּה *very fair* (to be read in Jer 46[20] for יפהפיה); *qᵉṭalṭŭl*, שְׁחַרְחֹרֶת (fem.) *blackish*; אֲסַפְסֻף *a rabble* (augmented from אָסוּף *collected*). From a verb פ״י with aphaeresis of the initial syllable צְאֶצָאִים *offspring*. Moreover, of the same form, probably, is חֲצוֹצְרָה *a trumpet* (for חֲצַרְצָרָה, cf. § 55 *e*). Also in Is 2[20] לַחֲפַרְפָּרוֹת is to be read instead of לַחְפֹּר פְּרוֹת (from the *sing.* חֲפַרְפָּרָה a *digging* or *burrowing* animal, perhaps the *mole*). But פַּקְחָקוֹחַ *opening*, Is 61[1] (ed. Mant., Baer, Ginsb. פְּקַח־קוֹחַ), is an evident mistake due to dittography; read פְּקֹחַ as in 42[7]. *o*

IX. *Nouns in which the Whole (Biliteral) Stem is repeated.*

Naturally this class includes only isolated forms of the stems ע״ו and ע״ע (on פְּיָפִיּוֹת see § 96 under פֶּה).

40. גַּלְגַּל *a wheel*, and, with attenuation of the first *ă* to *ĭ*, גִּלְגָּל (from גלל); fem. חַלָּחָלָה *anguish* (from חוּל or חיל); כִּכָּר (for *kirkar*) *a talent*; cf. also כּוֹכָב *a star* (from *kăwkăb*, Arabic *kaukăb*, for כַּבְכַּב), טוֹטָפֹת *bands*, for טַפְטָפֹת; צָלְצַל probably *a whirring locust*.

41. בַּלְבֵּל infin. *Pilpēl* (prop. *Palpĭl*) from כּוּל; fem. טַלְטֵלָה *a hurling* (from טול). *p*

42. כַּדְכֹּד perhaps a *ruby* (for *kădkŭd*), from כרר.

43. קָרְקֹר *the crown of the head* (for *qŭdqŭd*), from קדד; fem. גֻּלְגֹּלֶת *a skull* (for *gŭlgŭl*), from גלל.

44. זַרְזִיר *girded*, from זרר; בַּקְבּוּק *a bottle*, from בקק; בַּרְבֵּרִים *fattened birds* (?).

§ 85. *Nouns with Preformatives and Afformatives.*

These include nouns which are directly derived from verbal forms *a* having preformatives (*Hiph'il, Hoph'al, Hithpa'ēl, Niph'al, &c.*), as well as those which are formed with other preformatives (א, י, מ, נ, ת), and finally those which are formed with afformatives. The quadriliterals and quinqueliterals also are taken in connexion with these formations, inasmuch as they arise almost always by the addition or insertion of one or two consonants to the triliteral stem.

X. *Nouns with Preformatives.*

45. Nouns with א prefixed. Cf. the substantives with א *prosthetic* (§ 19 *m*), *b* such as אֱזְרוֹעַ *arm* (Jer 32[21], Jb 31[22]; elsewhere always זְרוֹעַ); אֶצְבַּע *a finger*, אַרְבֶּה *a locust*, אֶגְרוֹף *fist* (others *maitock*, or *clod*), אַשְׁמוּרָה or אַשְׁכֻּרָת *a watch*. In these examples the א is a 'euphonic' prefix (Barth, *ibid.*, § 150 *b*); in other cases it is 'essential'; cf. especially the adjectives, אַכְזָב *deceitful*, אַכְזָר *cruel*, אֵיתָן *perennial* (for *'aitan*) [=the Arab. 'elative', used for expressing the compar. and superl. degrees]. The fem. אַזְכָּרָה *fragrant part*[1] (of the meal-

[1] Or perhaps more correctly with Jacob, *ZAW.* 1897, p. 79, '*declaration*,' i.e. the part of the meal-offering which 'announces the sacrifice and its object'.

offering) is a *nomen verbale* of *Hiph'il*, answering to the Aramaic infinitive of the causal stem (*'Aph'ēl*), hence with suff. אַזְכָּרָתָהּ Lv 2², &c.

c 46. Nouns with ה prefixed. Besides the ordinary infinitives of *Hiph'il* הַקְטֵל and הַקְטִיל, of *Niph'al* הִקָּטֵל, הִקָּטֹל (for *hinq.*), and of the conjugations formed with the prefix הִתְ, this class also includes some rare *nomina verbalia* derived from *Hiph'il* (cf. § 72 *z*), viz. הַכָּרָה *appearance* (from נָכַר), Is 3⁹; הֲנָפָה *a swinging* (from נוּף), [Is 30²⁸; הֲנָחָה *a rest-giving*, Est 2¹⁸]; הַצָּלָה *deliverance* (from נָצַל), [Est 4¹⁴ an Aram. form: cf. הַוְדָּה Dn 5²⁰]; perhaps also הֵיכָל *palace*, from *haikăl*, unless it is borrowed from the Assyrian; see the Lexicon.

d 47. Nouns with י prefixed, as יְצָהָר *oil*, יַלְקוּט *wallet*, יַנְשׁוּף *owl* (?); from verbs ע״ו, e. g. יְקוּם *a living thing*, יְתוֹר *a range*; from a verb ע״י יָרִיב *an adversary*. Of a different character are the many proper names which have simply adopted the imperfect form, as יַעֲקֹב, יִצְחָק, &c.

e 48. Nouns with מ prefixed. This *preformative Mêm*, which is no doubt connected with מִי *who*, and מָה *what* (see § 37 and § 52 *c*), appears in a very large number of nouns, and serves to express the most varied modifications of the idea of the stem: (1) מ *subjective*, when preformative of the participles *Pi'ēl*, *Hiph'il*, *Hithpa'ēl*, and other active conjugations. (2) מ *objective*, when preformative of the participles *Pu'al*, *Hoph'al*, and other passive conjugations, as well as of numerous nouns. (3) מ *instrumental*, as in מַפְתֵּחַ *a key*, &c. (4) מ *local*, as in מִדְבָּר *a drive for cattle*, &c.

f As regards the formation of these nouns, it is to be remarked that the preformative מ was originally in most cases followed by a short *ă*. This *ă*, however, in a closed syllable is frequently attenuated to *ĭ*; in an open syllable before the tone it is lengthened to *ā* (so also the *ĭ*, attenuated from *ă*, is lengthened to *ē*), and in מָגֵן *shield* (with suff. מָגִנִּי) it even becomes unchangeable *á*. But in an open syllable which does *not* stand before the tone, the *a* necessarily becomes *Šᵉwâ*.

g The following forms are especially to be noticed: (*a*) ground-form *măqtăl*, in Hebrew מִקְטָל,[1] e. g. מַאֲכָל *food*; fem. מַמְלָכָה *kingdom*, מַאֲכֶלֶת *a knife*, מַלְאָכָה (for מַלְאָכְתָה by § 23 *c*) *business*; from a verb פ״ן מַתָּן *a gift*; from verbs פ״ו מוֹצָא *a going forth*, מוֹשָׁב *a seat*; from verbs פ״י מֵיטָב *the best* (from *maiṭăb*); with י (or ו) assimilated, מַצָּע *a bed*; from verbs ע״ע מָסָךְ *a screen*, and with the shortening of the *ă* under the preformative, מָמָר *bitterness* (from מְמַר developed to a segholate), fem. מְשַׁמָּה *desolation*; from a verb ע״ו, probably of this class is מָקוֹם *place*, the *ă* lengthened to *ā* and obscured to *ô* (Arabic *măqâm*); from verbs ל״ה מַרְאֶה *appearance*, מַעַן (for מַעֲנָה) prop. *intention*, only in לְמַעַן *on account of, in order that*.

h (*b*) Ground-form *miqṭāl* (the usual form of the infin. *Qal* in Aramaic), Hebr. מִקְטָל, e. g. מִדְבָּר (in Jer 2³¹ also, where Baer requires הֲמִדְבָּר, read with ed. Mant., Ginsburg, &c. הַמִּדְבָּר) *a cattle-drive*, fem. מִלְחָמָה *war*, מֶרְכָּבָה *a chariot* (with *Sᵉghôl* instead of *ĭ*, but in *constr. st.* מִרְכֹּבֶת Gn 41⁴³; cf. מֶרְחָק *distance*), מִשְׁמֶרֶת *a watch*; from verbs ע״ע, e. g. מְסַב *surroundings* (from *mĭ-săb*; *ĭ* in the open syllable being lengthened to *ē*; but cf. also מַשַּׁק Is 33⁴ as *constr. state* from שִׁקֻּק with sharpening of the first radical; cf. § 67 *g*); from verbs ל״ה, מִקְנָה *a possession*, fem. מִקְנָה.

[1] In מְמַחֲקִים Ct 5¹⁶, Neh 8¹⁰, the first syllable is artificially opened to avoid the cacophony; on the *ă* of the second syllable cf. § 93 *ee*.

(*c*) Ground-form *măqṭīl*, Hebr. מַקְטִל, e.g. מַשְׁעֵן *a support* (fem. מַשְׁעֲנָה), *i* מַסְגֵּר *a smith*, מַעֲשֵׂר *a tithe*; fem. מַכְשֵׁלָה *a ruin*; from a verb פ״ן, מַפֵּלָה *an overthrow*, מַצֵּבָה *a pillar*; from verbs ע״ע, מָגֵן *a shield*; fem. מְגִלָּה *a roll* (from גָּלַל), מְאֵרָה *a curse* (for *mᵉʾirrā* from אָרַר); from a verb פ״ו, מוֹקֵשׁ *a snare* (from *māwqēš*).

(*d*) Ground-form *mĭqṭil*, Hebr. מִקְטַל, e.g. מִסְפֵּד *mourning*, מִזְבֵּחַ *an altar* *k* (*place of sacrifice*); from a verb ע״ע, e.g. מִסַּב (מְסֻבַּ?) *consessus*; (*e*) ground-form *măqṭūl*, Hebr. מַקְטוֹל; fem. מַאֲכֹלֶת *food*, מַשְׂכֹּרֶת *wages*; from a verb ע״ע, fem. מְסֻכָּה *a covering* (from סָכַךְ). Also from ע״ע, according to the Masora, מָעוֹז *a refuge*, with suffixes מָעֻזִּי and מְעוּזִּי, plur. מְעֻזִּים, but, very probably, most if not all of these forms are to be referred to the stem עוז *to flee for safety*, and therefore should be written מָעוֹזִי, &c. The form מָעֻז, if derived from the stem עזז, would mean *stronghold*.—Cf. also מֻרְכָּךְ *faintness*, developed to a segholate, probably from מֻרְכָּךְ, for *mărōkh* from רָכַךְ, like מְתֹם *soundness* of body, from תָּמַם.

With a long vowel in the second syllable: (*f*) ground-form *maqṭāl*, with *â* *l* always obscured to *ô*, e.g. מַחְסוֹר *want*, מַלְקוֹחַ *booty*; from verbs ע״ו, e.g. מָגוֹר *fear*, fem. מְגוֹרָה and מְגוּרָה (with the *ô* depressed to *û* in a toneless syllable; cf. § 27 *n*), מְהוּמָה, &c., Is 22⁵. (*g*) Ground-form *mĭqṭāl*, in Hebr. again מִקְטוֹל, e.g. מִסְתּוֹר *a covert*, מִכְשׁוֹל *a stumbling-block* (cf. above under *i*, *măkhšēlā*); fem. מִכְמֹרֶת *a fishing-net*; (*h*) the ground-forms *maqṭil*, *miqṭil* (cf. מְקִים) are found only in participles *Hiph'il*; the fem. מַבְלִינִית, *cheerfulness*, is a denominative formed from a participle *Hiph'il*; (*i*) ground-form *măqṭāl*, as מַלְבּוּשׁ *a garment*.

Rem. On מ as preformative of the participles of all the conjugations except *m* *Qal* and *Niph'al*, cf. § 52 *c*. Many of these participles have become substantives, as מְזַמֶּרֶת *snuffers*, מַשְׁחִית *destroyer*, *destruction*.

49. Nouns with נ prefixed. Besides the participles *Niph'al* (ground-form *n* *năqṭāl*, still retained e.g. in נוֹלָד for *năwlād*, but commonly attenuated to *nĭqṭāl*, Hebr. נִקְטָל) and the infinitive *Niph'al* of the form נִקְטוֹל, the prefix נ is found in נַפְתּוּלִים *wrestlings*, Gn 30⁸, which is also to be referred to *Niph'al*, and נָזִיד *boiled pottage* (stem זיד).

50. With שׁ prefixed, e.g. שַׁלְהֶבֶת *a flame*. On this *Šaph'ēl* formation, cf. § 55 *i*. *o*

51. Nouns with ת prefixed. Examples of this formation are numerous, *p* especially from weak stems, for the purpose of strengthening them phonetically (see Barth, *ibid.*, p. 283), and notably from verbs פ״ו and ע״ו. They may be classified as follows:—(*a*) the ground-form *tăqṭāl* in תַּחְמָס *ostrich* (?); from verbs פ״ו, תּוֹשָׁב *a settler*; fem. תּוֹחֶלֶת *expectation*, תּוֹכַחַת (from the *Hiph'il* תּוֹכִיחַ) *correction*; from a verb פ״י, תֵּימָן *the south*; from verbs פ״ו and ל״ה, תּוֹדָה *thanksgiving*, and תּוֹרָה *law*, both from *Hiph'il*; from a verb פ״ו and ל״א, תּוֹצָאוֹת *issues*; probably belonging to this class, from verbs ע״ע, תָּבֵל *confusion*, and תָּמֵס *a melting away* (developed from תְּבַל and תְּמַס, from בָּלַל and מָסַס).

(*b*) *Tiqṭāl*, e.g. fem. תִּפְאָרָה and תִּפְאֶרֶת *glory*; from a verb ל״ה, e.g. תִּקְוָה *q* *hope*; (*c*) *tăqṭūl*, e.g. תַּשְׁבֵּץ *chequer work*; fem. תַּרְדֵּמָה *deep sleep* (probably from the *Niph'al* נִרְדָּם); from a verb פ״ו, תּוֹכֵחָה *correction* (from the *Hiph'il*-stem, like the *constr. st. plur.* תּוֹלְדוֹת *generations*); from verbs ע״ע, תְּהִלָּה *praise*, תְּפִלָּה *prayer* (from the *Pi'ēl* of the stems הָלַל and פָּלַל).

r With a long vowel in the second syllable: (*d*) *tĭqtâl*, as תְּהוֹם *the ocean, the deep* (for *tihâm*; in Assyrian the fem. *tiâmtu*, constr. st. *tiâmat*, is the usual word for *sea*), unless it is to be derived with Delitzsch, *Prolegomena*, p. 113, from the stem תהם; (*e*) *tăqtîl* (in Arabic the usual form of the infinitive of conjugation II. which corresponds to the Hebrew *Pi'ēl*), e.g. from a verb ל״ה, fem. תַּכְלִית *completeness*; תַּרְבִּית *increase, usury*, with a parallel form מַרְבִּית; in a passive sense, תַּלְמִיד *a disciple*; (*f*) תַּקְטוּל, e.g. תַּפּוּחַ *an apple* (for *tănpû*^{a}*ḥ*); very frequently used to form abstracts, e.g. תַּגְמוּל *a benefit* (also גְּמוּל); from verbs ע״ו, תְּבוּסָה *a treading down*, תְּנוּפָה *a waving* (like תְּרוּמָה *a lifting up*, from the *Hiph'il* stem), תְּשׁוּקָה *a longing*, &c.; very frequently also as an abstract plural, e.g. תַּהְפֻּכוֹת *perverseness*, תַּחְבֻּלוֹת *guidance*, תַּמְרוּרִים *bitterness*, תַּנְחוּמִים and תַּנְחוּמוֹת *consolation*; from a verb ע״ו, תְּאֻנִים *toil*.

XI. *Nouns with Affformatives.*

s 52. Nouns with ל affixed. Perhaps חַשְׁמַל *amber* (?), and probably בַּרְזֶל *iron*, כַּרְמֶל *garden-land* (*S^{e}ghôl* in both cases is probably a modification of the original *ă* in the tone-syllable), גִּבְעֹל *bloom*, cf. § 30 *q*.—According to Prätorius, *ZDMG.* 1903, p. 530 ff., *al* is an affix of endearment in the proper names מִיכַל, חֲמוּטַל (*little lizard* ?) אֲבִיגַיִל (also אֲבִיגַל).

t 53. Nouns with ם affixed. With an original *ăm* as affformative, אוּלָם *vestibule* (although the *ā* in the *sing.* remains unchangeable), plur. אֻלָמִים; but in כִּנָּם *a swarm of gnats*, the ם is radical. With original affformative *ûm*, עֵרֹם (also עָרֹם) *naked* (from עור), plur. עֵרֻמִּים Gn 3^{7}, parallel form עָרוֹם, plur. עֲרוּמִּים Gn 2^{25}.—To this class also belong the adverbs in *ām* and *ōm*, mentioned in § 100 *g*, and many proper names, as גֵּרְשֹׁם, also גֵּרְשׁוֹם, and גֵּרְשֻׁנִּי (*patronymic* גֵּרְשֻׁנִּי), מִלְכָּם, עַמָּרָם, &c.; but for פְּדוּיִם *ransom* (?), Nu 3^{49}, probably פְּדוּיִם is to be read.

u 54. Nouns with ן affixed. The ן is added by means of a simple helping vowel in כְּנַעַן *Canaan*, and צִפֹּרֶן *a finger nail*; more frequently the addition is made by means of a tone-bearing *ă*, which in Hebrew is modified to *S^{e}ghôl* (as קֶנֶן *axe*) or lengthened to *ā* (but cf. also אֲחַרְנִית and קְרַבְנִית); e.g. קִנְיָן *a possession*, שֻׁלְחָן *a table*, קָרְבָּן *an offering*. From an original *â* being changed into an obscure *ô* we may probably explain such forms as דְּאָבוֹן *a pining away*; דָּרְבוֹן (also דָּרְבָן) *a goad*; רָעָבוֹן *hunger*; from verbs ל״ה, גָּאוֹן *pride*, הָמוֹן *noise*, חָזוֹן *a vision*; שִׁרְיוֹן *a coat of mail*; from a verb פ״ן, מַשָּׁאוֹן *guile* (the only instance with both מ preformative and *ôn* affformative)[1]; very frequently from the simple stem with an unorganic sharpening of the second radical, e.g זִכָּרוֹן *memorial*, כְּלִיוֹן *destruction* (*constr. st.* וְכִרוֹן and כְּלִיוֹן), &c.; cf. also הֵרָיוֹן *pregnancy* (for הָרְיוֹן) and § 93 *uu*; קִיקָלוֹן *shame*, for קִלְקָלוֹן. Proper names occur with the termination *ûn*, as יְשֻׁרוּן, § 86 *g*, and others.

---

[1] The plurals נְצָנִים *flowers*, Ct 2^{12}, and קִפּוֹדִנִּים *thorns* appear to be formed directly from the singulars נִין (cf. נְצָה) and קִפּוֹד with the insertion of *án* (which in קמו is obscured to *ôn*). See Nöldeke, *Mand. Gr.*, p. 169, Rem. 3; similarly, according to Hoffmann, 'Einige phöniz. Inschriften,' p. 15 (*Abh. der Gött. Ges. der Wiss.*, xxxvi), עִזְבוֹנִים *wares*, Ez 27$^{14.16}$ from עֵזֶב = עָזַב.

Rem. A large number of proper names now ending in ה__ or ו__ used to *v* be classed as nouns originally formed with the affix ון__. The subsequent rejection of the final *Nûn* seemed to be confirmed by the form מְנִדּוֹ, once used (Zc 12[11]) for מְנִדּוֹן (and conversely in Pr 27[20] *Kᵉthîbh* אֲבַדֹּה, *Qᵉrê* אֲבַדּוֹן for אֲבַדּוֹן *destruction*), also by the fact that for שְׁלֹמֹה the LXX give the form Σολωμών or Σαλωμών, and especially that in patronymics and tribal names (§ 86 *h*) a *Nûn* appears before the termination *i*, as גִּילֹנִי *Gilonite* from גִּלֹה and שִׁילֹנִי from שִׁילֹה (modern name *Sailûn*). Wetzstein, however (in Delitzsch's *Commentary on Job*, 1st ed., p. 599), explained the *Nûn* in מְנִדּוֹן as a secondary addition to the common old-Palestinian termination *ô* (יְרִיחוֹ, עֵבוֹ, רְפוּנוֹ, &c.), and Barth (*Nominalbildung*, § 224 *b*) has since shown the unsoundness of the prevailing view on other grounds: the rejection of the *Nûn* would be much more likely to occur in the numerous appellatives in *ôn* than in proper names, and גִּילֹנִי and שִׁילֹנִי are due to the necessity of avoiding, for euphonic reasons, such forms as *gîlô-i*, *šilô-i*, &c.; cf. also שִׁלְנִי from שִׁלֹה.

On the affomatives י__, י__, וֹת, יִת__, see below, § 86 *h–l*.

XII. *Quadriliterals and Quinqueliterals.*

55. גַּלְמוּד *barren*, חַלָּמִישׁ *a flint*, and the fem וַלְעָבָה *heat*, &c., have probably *w* arisen from the insertion of a ל; חַרְגֹּל *a locust*, קַרְדֹּם *an axe*, סַרְעַפָּה *a branch*, Ez 31[6] (verses 6, 8 סַעֲפָּה), שַׂרְעַפִּים (also שְׂעַפִּים) *anxious thoughts*, שַׁרְבִּיט *sceptre*, from insertion of a ר, which is common in Aramaic. Cf., moreover, חֶרְמֵשׁ *a sickle*, סְמָדַר *vine-blossom*; with an initial ע, עֲטַלֵּף *a bat*, עַכְבִּישׁ *a spider*, עַכְבָּר *a mouse*, עַקְרָב *a scorpion*,[1] &c.—Quinqueliteral, צְפַרְדֵּעַ *a frog*.

§ 86. *Denominative Nouns.*

1. Such are all nouns formed *immediately* from another noun, *a* whether the latter be primitive or derived from a verb, e. g. קַדְמוֹן *eastern*, immediately from קֶדֶם *the east* (verbal stem קָדַם *to be in front*).

2. Most of the forms which nouns of this class assume have already *b* been given in §§ 84 and 85, since the denominatives, as secondary (although in some cases very old) forms, invariably follow the analogy of the verbal derivatives. As, for instance, the verbals with a prefixed מ (§ 85 *e* to *m*) express the place, &c., of an action, so the denominatives with מ *local* represent the place where a thing is found or its neighbourhood (see *e*).

The most common forms of denominatives are— *c*

1. Those like the *participle Qal* (§ 84[a] *s*), e. g. שֹׁעֵר *a porter*, from שַׁעַר *a gate*; בֹּקֵר *a herdsman*, from בָּקָר *a herd*; כֹּרֵם *a vinedresser*, from כֶּרֶם *a vineyard*.

2. Those like the form *qāṭṭāl* (§ 84[b] *b*), e. g. קַשָּׁת *an archer*, from קֶשֶׁת *a bow*. *d*

[1] Derenbourg (*REJ.*, 1883, p. 165) infers from the above examples and a comparison of the Arabic *'uṣfûr*, *sparrow* (from *ṣafara*, *to chirp*), that ע was especially employed to form quadriliteral names of animals.

Both these forms (*c* and *d*) indicate customary occupations, inhering in the subject, like Greek nouns in *της, τεύς*, e. g. *πολίτης, γραμματεύς*.

e 3. Nouns with מ prefixed, denoting the place where a thing is (cf. § 85 *e*), or its neighbourhood, e. g. מַעְיָן *a place of fountains*, from עַיִן; מַרְגְּלוֹת *the place about the feet*, מְרַאֲשׁוֹת *the place about the head*, from רֶגֶל, רֹאשׁ; מִקְשֶׁה (for מִקְשָׁאָה) *a cucumber field*, from קִשֶּׁא *cucumber*. Cf. *ἀμπελών* from *ἄμπελος*.

f 4. Nouns with the termination ־ָן or ־ֹן expressing adjectival ideas: קַדְמוֹן *eastern*, from קֶדֶם; אַחֲרוֹן *posterior*, from אַחַר; חִיצוֹן *exterior*, from חוּץ; probably also לִוְיָתָן *coiled*, hence *coiled animal, serpent*, from לִוְיָה *a winding*; נְחֹשְׁתָן *brazen*, from נְחֹשֶׁת *brass*. Also *abstracts*, e. g. עִוָּרוֹן *blindness*, from עִוֵּר. Cf. § 85 *u*.—With a double termination (*ôn* or *án* with *î*) אַרְמֹנִי *reddish*, יִדְּעֹנִי *a knowing* (spirit); צִפְעֹנִי *basilisk*; רַחֲמָנִיוֹת *merciful* [fem. plur.].

g ־ִן appears to be used as a diminutive ending (cf. the Syriac ־ܝܢ) in אִישׁוֹן *little man* (in the eye), *apple of the eye*, from אִישׁ[1]; on the other hand שְׁפִיפֹן *adder*, which was formerly regarded as a diminutive, is properly an adjectival form from שָׁפַף *to rub* (hence, as it were, a *rubbing* creature); in the same way יְשֻׁרוּן is a *denominative* from יָשׁוּר (=יָשָׁר), properly *upright* (*righteous people*), and not a *diminutive* (*pious little people*, and the like); finally, שַׁהֲרוֹן is not *lunula*, but *an artificial moon* (used as an ornament), and צַוְּארֹנִים not *little neck*, but *necklace* (from צַוָּאר *neck*). Cf. Delitzsch on Ct 4[9].

h 5. Peculiar to denominatives is the termination ־ִי, which converts a substantive into an adjective, and is added especially to numerals and names of persons and countries, in order to form *ordinals*, *patronymics*, and *tribal names*; e. g. רַגְלִי *footman*, plur. רַגְלִים, from רֶגֶל *foot*; אַכְזָרִי *cruel*, נָכְרִי *strange*, from נֵכֶר *strangeness*, תַּחְתִּי *lower*, from תַּחַת *below*, fem. תַּחְתִּית and תַּחְתִּיָּה, plur. תַּחְתִּיִּים, תַּחְתִּיּוֹת; שִׁשִּׁי *the sixth*, from שֵׁשׁ *six*; מוֹאָבִי *Moabite*, from מוֹאָב, plur. מוֹאָבִים, fem. מוֹאֲבִיָּה and מוֹאֲבִית, plur. מוֹאֲבִיּוֹת; עִבְרִי *Hebrew*, plur. עִבְרִים and עִבְרִיִּים, fem. עִבְרִיָּה, plur. עִבְרִיּוֹת; יִשְׂרְאֵלִי *Israelite*, from יִשְׂרָאֵל. When the original substantive is a *compound*, it is resolved again into two words, e. g. בֶּן־יְמִינִי *Benjamite*, from בִּנְיָמִין (cf. on the use of the article in such cases, § 127 *d*).

i Instead of ־ִי we find in a few cases (*a*) the ending ־ִי (as in Aram.), e. g. כְּיִלִי (*crafty*, or, according to others, *churlish*) if it stands for נְכִילִי and is not rather from a stem כלא or כלה; חוֹרִי *white cloth*, Is 19[9] in pause; perhaps also גֹּבִי *a swarm of locusts*, Am 7[1] (גּוֹבֵי Na 3[17]); hardly נְגִינוֹתַי Is 38[20], Hb 3[19]; but certainly in proper names as בַּרְזִלַּי (*ferreus*) *Barzillai*;[2] and (*b*) ה־ֶ,

[1] Cf. Barth, § 212; König, ii. 1, 413. Diminutives in Semitic languages are, however, most commonly formed by inserting a *y* after the second radical, e. g. Aram. עוּלֵימָא, Syr. ܥܘܠܝܡܐ, Arab. غُلَيِّمٌ *a very young man, kulaib, a little dog*, &c. Since Olshausen (§ 180), זְעֵיר *a little* (Is 28[10.13], Jb 36[2]) has commonly been regarded as an example of the same form, to which others have added שְׁבִיסִים Is 3[18] (as though a foreign dialectical form for *šumais, little sun*), and אֲמִינֹן 2 S 13[20], as a contemptuous diminutive form of אֲמְנוֹן; cf. Ewald, § 167, W. Wright, *Arab. Gramm.*[2] i. § 269, De Lagarde, *Nominalbildung*, pp. 85–87, König. ii. 1, p. 143 f. The existence of the form in Hebrew is disputed by Barth, § 192 *d*.]

[1] On ־ִי as an old fem. ending, see above, § 80 *l*.

arising from *ăy*, in אִשָּׁה *belonging to fire* (אֵשׁ), i. e. *a sacrifice offered by fire*; לְבֹנָה (prop. *milky*) *the storax-shrub*, Arabic *lubnay*.

k 6. *Abstract* nouns formed from *concretes* by the addition of וּת, ־ִ]ת (§ 95 *t*), cf. our terminations *-dom*, *-hood*, *-ness*, e.g. יַלְדוּת *youth*, מַלְכוּת *kingdom* (the omission of the *Dageš* in כ shows that the *Šᵉwâ* is weakened from a full vowel; on *malik* as underlying the present form מֶלֶךְ cf. § 84ᵃ *a*); אַלְמָנוּת *widowhood*, from אַלְמָן *widower*, אַלְמָנָה *widow*. In Aram. this fem. ending וּת (or וּ with rejection of the ת) is a common termination of the infinitive in the derived conjugations (cf., as substantival infinitives of this kind, הַשְׁמָעוּת *the announcing*, Ez 24[26], and הִתְחַבְּרוּת *the making of a league*, Dn 11[23]); in Hebr. וּת as a termination to express abstract ideas (including some which appear to be directly derived from the verbal stem, as סִכְלוּת *folly*, רְפָאוּת *a healing*[1]) becomes more common only in the later books. It is affixed to adjectives ending in *î* (see above, *h*) in אַכְזָרִיּוּת *cruelty*, and קוֹמְמִיּוּת *upright position* (Lv 26[13], used adverbially).

l The ending ־ִית is found earlier, e.g. in שְׁאֵרִית *remainder*, רֵאשִׁית *principium*, from רֹאשׁ = רֵאשׁ (*head*) *princeps*. The termination *ôth* seems to occur in חָכְמוֹת *wisdom* (in Pr 1[20], 9[1], joined to a *singular*; so also חַכְמוֹת Pr 14[1], where, probably, חָכְמוֹת should likewise be read) and in הוֹלֵלוֹת Ec 1[17], &c., with the parallel form הוֹלֵלוּת Ec 10[13].

§ 87. *Of the Plural.*

Brockelmann, *Grundriss*, i. 426 ff., and on the feminines, p. 441 ff.; M. Lambert, 'Remarques sur la formation du pluriel hébreu,' *REJ.* xxiv. 99 ff., and 'Les anomalies du pluriel des noms en Hébreu,' *REJ.* xliii. 206 ff.; P. Lajčiak, *Die Plural- u. Dualendungen im semit. Nomen*, Lpz. 1903; J. Barth, 'Beiträge zur Pluralbildung des Semit.,' *ZDMG.* 1904, p. 431 ff., i. 'the *ai* of the constr. st.'

a **1.** The regular *plural* termination for the *masculine gender* is ־ִים, always with the tone, e.g. סוּס *horse*, plur. סוּסִים *horses*; but also very often written defectively ־ִם, especially when in the same word one of the vowel letters, וֹ or י, precedes, e.g. Gn 1[21] תַּנִּינִם. Nouns in ־ִי make their plural in ־ִיִם, e.g. עִבְרִי *a Hebrew*, plur. עִבְרִיִּים (Ex 3[18]); but usually contraction takes place, e.g. עִבְרִים; שָׁנִים *crimson garments*, from שָׁנִי.

b Nouns in ־ֶה lose this termination when they take the plural ending, e.g. חֹזֶה *seer*, plur. חֹזִים (cf. § 75 *h*).—In regard to the loss of the tone from the ־ִם in the two old plurals מַיִם *water* and שָׁמַיִם *heaven*, cf. § 88 *d* and § 96.

c The termination ־ִים is sometimes assumed also by feminines (cf. נָשִׁים *women*, § 96 under אִשָּׁה; שָׁנִים *years*, from שָׁנָה; רְחֵלִים *ewes*, from רָחֵל), so that an indication of gender is not necessarily implied in it (cf. also below, *m–p*).—On the use of this termination ־ִים to express abstract, extensive, and intensive ideas, cf. § 124.

[1] [See a complete list of instances in König, *Lehrgebäude*, ii. 1, p. 205 f.]

d The ending *îm* is also common in Phoenician, e. g. צדנם *Sidonii*; Assyrian has *âni* (acc. to P. Haupt originally *âmi*, cf. § 88 *d*); Aramaic has *în*; Arabic *ûna* (nominative) and *îna* (in the oblique cases, but in vulgar Arabic *în* is also used for the nominative); Ethiopic *ân*. Cf. also the verbal ending ן in the 3rd plur. perf. (§ 44 *l*) and in the 3rd and 2nd plur. impf. (§ 47 *m*).[1]

e Less frequent, or only apparent terminations of the plur. masc. are—

(*a*) ין־, as in Aramaic,[2] found almost exclusively in the later books of the O. T. (apart from the poetical use in some of the older and even the oldest portions), viz. מְלָכִין *kings*, Pr 31[3], צָדְנִין 1 K 11[33], רָצִין *the guard*, 2 K 11[13], חִטִּין *wheat*, Ez 4[9]; defectively אִיִן *islands*, Ez 26[18]; יְמִין *days*, Du 12[13]. Cf. also מְדִין *carpets*, Ju 5[10], in the North-Palestinian song of Deborah, which also has other linguistic peculiarities; עִיִין *heaps*, Mi 3[12] (before ת; cf. § 44 *k*); מְלִין *words* (from the really Aram. מְלָה), Jb 4[2], and twelve other places in Job (beside מִלִּים, ten times in Job); further, חַיִין Jb 24[22], אֲחַרִין 31[10], and שׁוֹמְמִין La 1[4], תַּנִּין 4[3].—The following forms are doubtful:

f (*b*) י־ (with the ם rejected, as, according to some, in the *dual* יְדַי for יָדַיִם Ez 13[18], cf. § 88 *c*), e. g. מְנֵי *stringed instruments*, ψ 45[9] for מְנִים (unless it is to be so written)[3]; עַמֵי *peoples*, ψ 144[2], and, probably, also La 3[14] (in 2 S 22[44] it may be taken as עַמִּי *my people*; cf. in the parallel passage ψ 18[44] עָם; also in Ct 8[2] the *i* of רַמֵּנִי is better regarded as a *suffix*); see also 2 S 23[8] as compared with 1 Ch 11[11], and on the whole question Gesenius, *Lehrgebäude*, p. 524 ff. More doubtful still is—

g (*c*) י־ (like the constr. state in Syriac), which is supposed to appear in e. g. שָׂרֵי *princes*, Ju 5[15] (perhaps *my princes* is intended: read either the constr. st. שָׂרֵי, which also has good authority, or with LXX שָׂרִים); for חַלּוֹנֵי וס׳ Jer 22[14] (according to others *dual*, see § 88 *c*, or a loan word, cf. *ZA*. iii. 93) read חַלּוֹנָיו סְפוּן. On גּוֹבֵי and חוֹרֵי, which have also been so explained, see above, § 86 *i*.—חֲשׁוּפֵי Is 20[4] (where the right reading is certainly חֲשׂוּפֵי) must be intended by the Masora either as a singular with the formative syllable י־ = *bareness* or, more probably, as a constr. st. with the original termination *ay* (cf. § 89 *d*) to avoid the harsh combination *hᵃsûfê šēt*[4]; in אֲדֹנֵי *the Lord* (prop. *my lord*, from the plur. *majestatis*, אֲדֹנִים *lord*), the *ay* was originally a *suffix*, § 135 *q*.

h (*d*) ם־ a supposed *plural* ending in כִּנִּים = כִּנָּם *gnats* (or *lice*), and סֻלָּם *ladder* (supposed by some to be a plur. like our *stairs*); but cf. on the former, § 85 *t*.

i **2.** The plural termination of the *feminine gender* is generally indicated by the termination וֹת (often written defectively ת׳—, e. g. תְּהִלָּה *song of praise, psalm*, plur. תְּהִלּוֹת (only in post-biblical Hebrew

---

[1] On the connexion between all these endings see Dietrich's *Abhandl. zur hebr. Gramm.*, Leipzig, 1846, p. 51 ff.; Halévy, *REJ.* 1888, p. 138 ff. [cf. also Driver, *Tenses*, § 6, *Obs.* 2].

[2] So also always in the Mēša' inscription, e. g. line 2 שלשן *thirty*; line 4 מלכן *kings*; line 5 ימן רבן *many days*, &c.

[3] According to some this *i* is simply due to a neglect of the point (§ 5 *m*), which in MSS. and elsewhere marked the abbreviation of the plur. ending.

[4] Prätorius, *ZDMG.* 1903, p. 525, regards חֲשׁוּפֵי as an instance of the affix of endearment (cf. כְּלוֹבֵי, אֲחוֹמֵי) transferred to an appellative, but such an explanation is rendered unlikely by the meaning of this isolated instance.

תְּהִלִּים, as in the headings of the printed editions, as well as סֵפֶר תְּהִלּוֹת *the Book of Psalms*); אִגֶּרֶת *a letter*, plur. אִגְּרוֹת; בְּאֵר *a well*, plur. בְּאֵרוֹת. Feminines in ית־ form their plural in יוֹת־, e.g. מִצְרִית *an Egyptian woman*, plur. מִצְרִיּוֹת; and those in וּת either make יוֹת־, as מַלְכוּת *kingdom*, plur. מַלְכֻיּוֹת, Dn 8[22] (cf. חֲנִיּוֹת *cells*, Jer 37[16]), or are inflected like עֵדוּת *testimonies* (pronounced *ʿēdhᵉwôth* for *ʿēdhŭwôth*).

k It is only from a mistake or disregard of these feminine endings וּת־ and יתּ־ that some words ending with them form their plural by the addition of ים־ or וֹת־, e.g. חֲנִית *spear*, plur. חֲנִיתִים and חֲנִיּוֹת; זְנוּת *whoredom*, plur. זְנוּתִים (by the side of זְנוּנִים); אַלְמְנוּתִים *widowhood*; שְׂחִיתוֹת *pits*, כְּסָתוֹת *amulets* (if connected with Assyr. *kâsu*, *to bind*), &c.

l The termination *-ôth* stands primarily for *-âth* (which is the form it has in Arab., Eth., in the *constr. st.* of Western Aramaic, in Eastern Syriac, and also in Assyrian; on the change of *â* into an obscure *ô*, see § 9 *q*). On the other hand, it is doubtful whether this *âth* is to be regarded as a lengthened and stronger form of the singular fem. ending *ăth* (cf. § 80 *b*).

How the changeable vowels of a noun are shortened or become *Šᵉwâ* in consequence of the addition of the plural endings is explained in §§ 92–5.

m **3.** Words which in the singular are used both as masculine and feminine (§ 122 *d*), often have in the plural parallel forms with the masculine and feminine terminations, e.g. עָב *cloud*, plur. עָבִים and עָבוֹת; and each form may be treated either as masculine or feminine, according to the usage of the particular word.—But even those words, of which the gender is invariable, sometimes have both plural forms, e.g. דּוֹר masc. *a generation*, plur. דּוֹרִים and דּוֹרוֹת; שָׁנָה fem. *a year*, plur. שָׁנִים and שָׁנוֹת (see the Rem.). In these words the gender of both plural forms remains the same as in the singular, e.g. אֲרִי masc. *a lion*, plur. אֲרָיוֹת masc., Zp 3[3], דּוֹרוֹת masc., Jb 42[16].

n Sometimes usage makes a distinction between the two plural forms of the same word. Thus, יָמִים *days*, שָׁנִים *years* are the usual, but יָמוֹת (only twice, in the *constr. st.* Dt 32[7], ψ 90[15]) and שָׁנוֹת (also only in the *constr. st.* and before suffixes) are rarer poetic forms.

o A difference of meaning appears in several names of members of the body, the dual (see § 88) denoting the living members themselves, while the plur. in וֹת expresses something like them, but without life (§ 122 *u*), e.g. יָדַיִם *hands*, יָדוֹת *artificial hands*, also e.g. the *arms* of a throne; כַּפַּיִם *hands*, כַּפּוֹת *handles* (Lat. *manubria*); פַּעֲמַיִם *foot*, פְּעָמוֹת *artificial feet* (of the ark), קַרְנַיִם *horns*, קְרָנוֹת *horns* (of the altar); עֵינַיִם *eyes*, עֵינוֹת *fountains*; cf. also אֲרָיוֹת *lions*, the *figures of lions* on Solomon's throne, תָּמָר *palm*, תְּמָרָה *a palm-like column*, plur. תְּמָרִים and תְּמֹרוֹת.

p **4.** A considerable number of masculines form their plural in וֹת, while many feminines have a plural in ים־. The gender of the singular, however, is as a rule retained in the plural.

Undoubted instances of masculines with (masculine) plural in וֹת— are: אָב *father*, אוֹצָר *treasure*, בְּאֵר and בּוֹר *cistern*, זָנָב *tail*, חֲלוֹם *dream*, כִּסֵּא *throne*, לֵב and לֵבָב *heart*, לוּחַ *tablet*, לַיִל and לַיְלָה *night*, מִזְבֵּחַ *altar*, מָקוֹם *place*, נֹאד *skin-bottle*, נֵר *lamp*, עוֹר *skin*, קוֹל *voice*, שֻׁלְחָן *table*, שֵׁם *name*, שׁוֹפָר *trumpet*.

q Feminines ending in ה_ which take in the plural the termination ים_ are אֵלָה *terebinth*, אֵימָה *terror* (but also אֵימוֹת), דְּבֵלָה *a cake* of figs, חִטָּה *wheat*, לְבֵנָה *a brick*, מִלָּה (only in poetry) *a word*, סְאָה *seā, a dry measure*, שְׂעוֹרָה *barley*, and the following names of animals דְּבוֹרָה *a bee* and יוֹנָה *a dove*; also, for בֵּיצִים fem. *eggs*, a singular בֵּיצָה is to be assumed. אֲלֻמָּה *sheaf* and שָׁנָה *year* (see above, *n*) take both ים_ and וֹת; cf. finally שִׁבֹּלֶת *an ear of corn*, plur. שִׁבֳּלִים, and without the fem. termination in the singular פִּילֶגֶשׁ *concubine*, plur. פִּילַגְשִׁים.

r 5. A strict distinction in gender between the two plural endings is found, in fact, only in adjectives and participles, e.g. טוֹבִים *boni*, טוֹבוֹת *bonae*, קְטָלִים masc., קְטָלוֹת fem. So also in substantives of the same stem, where there is an express distinction of sex, as בָּנִים *filii*, בָּנוֹת *filiae*; מְלָכִים *reges*, מְלָכוֹת *reginae*.

s Rem. 1. In some few words there is added to the plural ending וֹת a second (masculine) plural termination (in the form of the *constr. st.* י_, cf. § 89 *c*), or a dual ending ַיִם_, e.g. בָּמָה *a high p'ace*, plur. בָּמוֹת, *constr. st.* בְּמוֹתֵי (also בְּמֹתֵי *bāmºthê*, Is 14^{14}, Jb 9^{8}, &c., sometimes as *Qºrê* to the Kᵉthibh במותי; see § 95 *o*); מֵרַאשֹׁתַי שָׁאוּל *from Saul's head*, 1 S 26^{12}; חוֹמָה *wall*, plur. חוֹמוֹת *moenia*, whence dual חוֹמֹתַיִם *double walls*. This double indication of the plural appears also in the connexion of suffixes with the plural ending וֹת (§ 91 *m*).

t 2. Some nouns are only used in the singular (e.g. אָדָם *man*, and collectively *men*); a number of other nouns only in the plural, e.g. מְתִים *men* (the old *sing.* מָתוּ is only preserved in proper names, see § 90 *o*; in Eth. the *sing.* is *mĕt*, man); some of these have, moreover, a singular meaning (§ 124 *a*), as פָּנִים *face*. In such cases, however, the same form can also express plurality, e.g. פָּנִים means also *faces*, Gn 40^{7}, Ez 1^{6}; cf. אֱלֹהִים *God*, and also *gods* (the *sing.* אֱלֹהַּ, a later formation from it, occurs only ten times, except in Job forty-one and in Daniel four times).

§ 88. *Of the Dual.*

Cf. the literature on the Semitic dual in Grünert, *Die Begriffs-Präponderanz und die Duale a potiori im Altarab.* (Wien, 1886), p. 21; Brockelmann, *Grundriss*, p. 455 ff.

a 1. The *dual* is a further indication of number, which originated in early times. In Hebrew, however, it is almost exclusively used to denote those objects which naturally occur in pairs (see *e*). The dual termination is never found in adjectives, verbs, or pronouns. In the noun it is indicated in both genders by the termination ַיִם_

appended to the ground-form,[1] e.g. יָדַיִם *both hands*, יוֹמַיִם *two days*. In the feminine the dual termination is always added to the old ending *ath* (instead of ה־), but necessarily with *ā* (since it is in an open syllable before the tone), thus תַּיִם־, e.g. שְׂפָתַיִם *lip*, שְׂפָתַיִם *both lips*. From a feminine with the ending תּ־, e.g. נְחֹשֶׁת (from *nᵉḥušt*) the dual is formed like נְחֻשְׁתַּיִם *double fetters*.

b With nouns which in the singular have not a feminine ending, the dual termination is likewise really added to the ground-form; but the latter generally undergoes certain changes in consequence of the shifting of the tone, e.g. כָּנָף *wing* (ground-form *kănāph*), dual כְּנָפַיִם, the first *ă* becoming *Šᵉwâ*, since it no longer stands before the tone, and the second *ă* being lengthened before the new tone-syllable. In 1 K 16[24], 2 K 5[23*b*] the form כִּכְּרַיִם (which should be כִּכָּרַיִם) evidently merely points to the *constr. st.* כִּכְּרֵי, which would be expected before כֶּסֶף; cf. כִּכָּרִים in 2 K 5[23*a*], and on the syntax see § 131 *d*. In the segholate forms (§ 84[a] *a*) the dual ending is mostly added to the ground-form, e.g. רֶגֶל *foot* (ground-form *răgl*), dual רַגְלַיִם; cf., however, קְרָנַיִם (only in the book of Daniel), as well as קַרְנַיִם from קֶרֶן *horn*, and לְחָיַיִם from לְחִי *cheek* (as if from the plurals קַרְנוֹת, לְחָיִים).—A feminine dual of an adjective used substantivally occurs in עֲצַלְתַּיִם *a sluggish pair* (of hands) Ec 10[18] from the sing. עָצֵל.

c Rem. 1. Certain place-names were formerly reckoned as dual-forms (so in earlier editions of this Grammar, and still in König's *Lehrgebäude*, ii. 437), viz.—(*a*) those in ־ַיִן and ־ַן, e.g. דֹּתָיִן Gn 37[17*a*] (locative דֹּתָיְנָה, but in [17*b*] דֹּתָן), and דֹּתָן 2 K 6[13]; קַרְתָּן Jos 21[32], identical with קִרְיָתַיִם in 1 Ch 6[61] (cf. also the Moabite names of towns in the Mēša' inscription, line 10 קריתן = Hebrew קִרְיָתַיִם; line 30 בת דבלתן = בֵּית דִּבְלָתַיִם Jer 48[22]; lines 31, 32 חורנן = חֹרֹנַיִם Is 15[5], &c.); (*b*) in ־ָם, Jos 15[34] הָעֵינָם (= עֵינַיִם Gn 38[21]). The view that ־ָן and ־ָם arise from a contraction of the dual terminations ־ַיִן (as in Western Aramaic, cf. also nom. *âni*, accus. *aini*, of the dual in Arabic) and ־ַיִם seemed to be supported by the Mēša' inscription, where we find (line 20) מאתן *two hundred* = מָאתַיִן, Hebrew מָאתַיִם. But in many of these supposed duals either a dual sense cannot be detected at all, or it does not agree at any rate with the nature of the Semitic dual, as found elsewhere. Hence it can hardly be doubted that ־ַיִן and ־ַיִם in these place-names only arise from a subsequent expansion of the terminations ־ָן and ־ָם: so Wellhausen, *Jahrbücher für Deutsche Theologie*, xxi. 433; Philippi, *ZDMG.* xxxii. 65 f.; Barth, *Nominalbildung*, p. 319, note 5; Strack, *Kommentar zur Genesis*, p. 135. The strongest argument in favour of this opinion is that we have a clear case of such an expansion in the *Qᵉrê perpetuum* (§ 17 *c*) יְרוּשָׁלַיִם for יְרוּשָׁלֶם (so, according to Strack, even in old MSS. of the Mišna; cf. *Urusalim* in the Tel-el-Amarna tablets, and the Aramaic form יְרוּשְׁלֶם): similarly in

[1] On dual endings appended to the plural see § 87 *s* and § 95 *o* at the beginning.

the Aramaic שֹׁמְרַיִן = שֹׁמְרוֹן for the Hebrew שֹׁמְרוֹן *Samaria*.—We may add to this list אֲפִרַיִם, נַהֲרַיִם *the river country* (in the Tel-el-Amarna letters *nârima*, *na'rima*), מִצְרַיִם *Egypt*, Phoenician מצרם; also the words denoting time, צָהֳרַיִם *midday* (Mēša' inscription, line 15 צהרם), and perhaps עַרְבַּיִם *in the evening*, if the regular expression בֵּין־הָעַרְבַּיִם Ex 12⁶, 16¹², &c., is only due to mistaking עַרְבַּיִם for a dual: LXX *πρὸς ἑσπέραν*, *τὸ δειλινόν*, *ὀψέ*, and only in Lv 23⁵ *ἀνὰ μέσον τῶν ἑσπερινῶν*. The Arabs also say *el 'išâ'án*, *the two evenings*, cf. Kuhn's *Literaturblatt*, iii. 48.

Instead of the supposed dual יָדַי Ez 13¹⁸ read יָדַיִם. On חַלּוֹנַי (generally taken to be *a double window*) Jer 22¹⁴, see above, § 87 *g*.

d 2. Only apparently dual-forms (but really plural) are the words מַיִם *water* and שָׁמַיִם *heaven*. According to P. Haupt in *SBOT*. (critical notes on Isaiah, p. 157, line 18 ff.), they are to be derived from the old plural forms (found in Assyrian) *mâmi*, *šamâmi*, whence the Hebr. מים, שמים arose by inversion of the *i*, *mâmi*, *mâimi*, *maim*. It is simpler, however, to suppose that the primitive singulars *may* and *šamay*, when they took the plural of extension (§ 124 *b*), kept the tone on the *ay*, thus causing the *im* (which otherwise always has the tone, § 87 *a*) to be shortened to *im*. Cf. the analogous formations, Arab. *tarḍaina*, *2nd fem. sing. imperf.* of a verb ל״י, for *tarḍay+ína*, corresponding to *taqtulina* in the strong verb; also bibl.-Aram. בָּנַיִן the *abs. st. plur.* of the *ptcp. Qal* of בָּנָה (ל״י), which otherwise always ends in *in* with the tone, e.g. in the *p'cp. Qal* of the strong verb, דָּבְחִין *sacrificing*.

e **2.** The use of the dual in Hebrew is confined, except in the numerals 2, 12, 200, &c. (see § 97), practically to those objects which are by nature or art always found in *pairs*, especially to the double members of the body (but not necessarily so, cf. זְרֹעַיִם and זְרוֹעוֹת *arms*, never in the dual), e.g. יָדַיִם *both hands*, אָזְנַיִם *both ears*, שִׁנַּיִם *teeth* (of both rows), also נַעֲלַיִם *a pair of sandals*, מֹאזְנַיִם *a pair of scales*, Lat. *bilanx*, &c.; or things which are at least thought of as forming a pair, e.g. יוֹמַיִם *two* (successive) *days*, Lat. *biduum*; שְׁבֻעַיִם *two weeks*; שְׁנָתַיִם *two years* (in succession), Lat. *biennium*; אַמָּתַיִם *two cubits*.[1]

f In the former case the dual may be used for a plural, either indefinite or defined by a numeral, where it is thought of in a double arrangement, e.g. אַרְבַּע רַגְלַיִם *four feet*, Lv 11²³; שֵׁשׁ כְּנָפַיִם *six wings* (i.e. three pairs), Is 6², Ez 1⁶; even שִׁבְעָה עֵינַיִם *seven eyes*, Zc 3⁹, כָּל־בִּרְכַּיִם *all knees*, Ez 7¹⁷; כָּל־יָדַיִם *all hands*, Ez 21¹²; מְצִלְתַּיִם *cymbals*, Ezr 3¹⁰; שְׁפַתַּיִם *double-hooks*, Ez 40⁴³.—To express a certain emphasis the numeral *two* is used with the dual, as in Ju 16²⁸, Am 3¹².—See some other remarks on the use of the dual in § 87 *o* and *s*.

g It is not impossible that Hebrew at an earlier period made a more extensive and freer use of the dual, and that the restrictions and limitations of its use, mentioned above, belong to a relatively later phase of development. The

[1] But for דְּרָכַיִם Pr 28¹⁰·¹⁸ (which the Masora takes as two roads leading from the cross-ways) דְּרָכִים is to be read.

Arabic literary language forms the dual in the noun, pronoun, and verb, almost as extensively as the Sanskrit or Greek; but in modern Arabic it has almost entirely disappeared in the verb, pronoun, and adjective. The Syriac has preserved it only in a few stereotyped forms, with which such duals as the Latin *duo, ambo, octo* may be compared. In the same way, the dual of the Sanskrit is lost in the modern Indian languages, and its full use in Old Slavonic has been restricted later, e.g. in Bohemian, just as in Hebrew, to *pairs*, such as hands, feet, eyes, ears. On the Germanic dual, see Grimm's *Gramm.*, 2nd ed., i. p. 814.

§ 89. *The Genitive and the Construct State.*

Philippi, *Wesen und Ursprung des Stat. Constr. im Hebr.* . . ., Weimar, 1871, p. 98 ff: on which cf. Nöldeke in the *Gött. Gel. Anzeigen*, 1871, p. 23.— Brockelmann, *Grundriss*, p. 459 ff.

a 1. The Hebrew language no longer makes a living use of *case-endings*,[1] but either has no external indication of case (this is so for the *nominative*, generally also for the *accusative*) or expresses the relation by means of prepositions (§ 119), while the *genitive* is mostly indicated by a close connexion (or interdependence) of the *Nomen regens* and the *Nomen rectum*. That is to say, the noun which as genitive serves to define more particularly an immediately preceding *Nomen regens*, remains entirely unchanged in its form. The close combination, however, of the governing with the governed noun causes the tone first of all to be forced on to the latter,[2] and the consequently weakened tone of the former word then usually involves further changes in it. These changes to some extent affect the consonants, but more especially the vocalization, since vowels which had been lengthened by their position *in* or *before* the tone-syllable necessarily become shortened, or are reduced to *Šᵉwâ* (cf. § 9 *a*, *c*, *k*; § 27 *e–m*); e.g. דָּבָר *word*, דְּבַר אֱלֹהִים *word of God* (a sort of compound, as with us in inverted order, *God's-word*, *house-top*, *landlord*); יָד *hand*, יַד הַמֶּלֶךְ *the hand of the king*; דְּבָרִים *words*, דִּבְרֵי הָעָם *the words of the people*. Thus in Hebrew only the noun which stands *before a genitive* suffers a change, and in grammatical language is said to be dependent, or in the *construct state*, while a noun which has not a genitive after it is said to be in the *absolute state*. It is sufficiently evident from the above that the *construct state* is not strictly to be regarded as a *syntactical* and *logical* phenomenon, but rather as simply *phonetic* and *rhythmical*, depending on the circumstances of the tone.

---

[1] On some remains of obsolete case-endings see § 90.

[2] The same phenomenon of the tone may also be easily seen in other languages, when two words are closely connected in a similar way. Observe, for example, in German the natural stress on the last word in '*der Thron des Königs*'; though here the other order of the words (inadmissible in Hebrew) '*des Königs Thron*' exhibits the same peculiarity.

b Very frequently such interdependent words are also united by *Maqqeph* (§ 16 *a*); this, however, is not necessary, but depends on the accentuation in the particular case. On the wider uses of the *constr. st.* see the Syntax, § 130.

c **2.** The *vowel* changes which are occasioned in many nouns by the *construct state* are more fully described in §§ 92–5. But besides these, the *terminations* of the noun in the construct state sometimes assume a special form. Thus:

(*a*) In the *construct state*, plural and dual, the termination is יְ—, e. g. סוּסִים *horses*, סוּסֵי פַרְעֹה *the horses of Pharaoh*; עֵינַיִם *eyes*, עֵינֵי הַמֶּלֶךְ *the eyes of the king*.

d Rem. The יְ— of the dual has evidently arisen from יַ— (cf. יָדַיִם), but the origin of the termination יְ— in the *constr. st.* plur. is disputed. The Syriac *constr. st.* in *ay* and the form of the plural noun before suffixes (סוּסַי, סוּסַיִךְ, &c., § 91 *h*) would point to a contraction of an original יַ—, as in the dual. But whether this *ay* was only transferred from the dual to the plural (so Olshausen, and Nöldeke, *Beitr. zur sem. Sprachwiss.*, Strassb. 1904, p. 48 ff.), or is to be regarded as the *abstract, collective* termination, as in אִשָּׁה (see *f*) and חוֹרִי (so Philippi, *ThLZ.* 1890, col. 419; Barth, *ZDMG.* 1904, p. 431 ff.), must be left undecided.

e (*b*) The original תַ— is regularly retained as the feminine termination in the *construct state* sing. of those nouns which in the *absolute* state end in הָ—, e. g. מַלְכָּה *queen*, מַלְכַּת שְׁבָא *the queen of Sheba*. But the feminine endings תֶ—, תֵ—, and also the plural וֹת—, remain unchanged in the *construct state*.

f (*c*) Nouns in הֶ— (cf. § 75 *e*) from verbs ל״ה (§ 93, Paradigm III *c*) form their *constr. st.* in הֵ—, e. g. רֹאֶה *seer*, constr. רֹאֵה. If this הֵ— is due to contraction of the original יֵ—, with ה added as a vowel letter, we may compare דַּי, constr. דֵּי *sufficiency*; חַי, constr. חֵי *life*; גַּיְא (גַּי), constr. גֵּיא (גֵּי) *valley*.

On the terminations וֹ and יְ— in the *constr. st.* see § 90.

§ 90. *Real and Supposed Remains of Early Case-endings.* הָ— *local,* וֹ *in compound proper names,* יְ— *and* וֹ *in the Construct State.*

K. U. Nylander, *Om Kasusändelserna i Hebräiskan*, Upsala, 1882; J. Barth, 'Die Casusreste im Hebr.,' *ZDMG.* liii. 593 ff.

a **1.** As the Assyrian and old Arabic distinguish three cases by special endings, so also in the Hebrew noun there are three endings which, in the main, correspond to those of the Arabic. It is, however, a question whether they are all to be regarded as real remnants of former case-endings, or are in some instances to be explained other-

wise. It can hardly be doubted (but cf. *h*, Rem.) that the (locative) termination ה_ֶ is a survival of the old accusative termination *a*, and that ִי in certain compound proper names is the old sign of the nominative. The explanation of the *î* as an old genitive sign, which, as being no longer understood in Hebrew, was used for quite different purposes, and the view that ִי is a form of the nominative termination ִי, are open to grave doubts.

b In Assyrian the rule is that *u* marks the nominative, *i* the genitive, and *a* the accusative,[1] 'in spite of the many and various exceptions to this rule which occur' (Delitzsch, *Assyrische Gramm.*, § 66). Similarly, the Arabic case-endings in the fully declined nouns (*Triptotes*) are: *-u* for the nominative, *-i* for the genitive, and *-a* for the accusative; in the *Diptotes* the ending *-a* represents the genitive also. In modern Arabic these endings have almost entirely disappeared, and if they are now and then used, as among the Beduin, it is done without regularity, and one is interchanged with another (Wallin, in *ZDMG.* v, p. 9, xii, p. 874; Wetzstein, *ibid.*, xxii, p. 113 f., and especially Spitta, *Gramm. des arab. Vulgärdialekts von Ägypten*, Lpz. 1880, p. 147 ff.). Even as early as the Sinaitic inscriptions, their regular use is not maintained (Beer, *Studia Asiatica*, iii. 1840, p. xviii; Tuch, *ZDMG.* iii. 139 f.). Ethiopic has preserved only the *-a* (in proper names *-hâ*), which is, however, still used for the whole range of the accusative, and also (the distinction of case being lost) as a termination of the *constr. st.* to connect it with a following genitive.

2. As remarked above, under *a*, the *accusative* form is preserved *c* in Hebrew most certainly and clearly in the (usually toneless) ending ה_ַ, originally *ă*, as in the old Arabic accusative. This is appended to the substantive:

(*a*) Most commonly to express *direction towards* an object, or *motion to a place*,[2] e. g. יָמָּה *seaward, westward*, קָדְמָה *eastward*, צָפוֹנָה *northward*, אַשּׁוּרָה *to Assyria*, בָּבֶלָה *to Babylon*, הָרָה (from הַר) *to the mountain*, Gn 14[10], אַרְצָה *to the earth*, בַּיְתָה *to the house*, תִּרְצָתָה *to Tirzah* (תִּרְצָה) 1 K 14[17], &c., עַזָּתָה *to Gaza* (עַזָּה) Ju 16[1]; with the article הָהָרָה *to the mountain*, הַבַּיְתָה *into the house*, הַחַדְרָה *into the chamber*, 1 K 1[15]; הָאֹהֱלָה[3] *into the tent*, Gn 18[6], &c.; similarly with adverbs, as שָׁמָּה *thither*, אָנָה *whither?*; even with the *constr. st.* before a genitive בֵּיתָה יוֹסֵף *into Joseph's house*, Gn 43[17.24]; אַרְצָה הַנֶּגֶב *toward the land of the south*, Gn 20[1]; אַרְצָה מִצְרַיִם *to the land of Egypt*, Ex 4[20]; מִדְבַּרָה דַּמֶּשֶׂק *to the wilderness of Damascus*, 1 K 19[15]; מִזְרָחָה שֶׁמֶשׁ *toward the sun-rising*, Dt 4[41]; and even with the plural בַּשְׂדִּימָה *into Chaldea*, Ez 11[24]; הַשָּׁמַיְמָה *towards the heavens*.

---

[1] This rule is almost always observed in the Tell-el-Amarna letters (see § 2*f*); cf. the instances cited by Barth, l. c., p. 595, from Winckler's edition.

[2] On this meaning of the accusative see the Syntax, § 118 *d*, and cf. the Latin accusative of motion to a place, as in *Romam profectus est, domum reverti, rus ire*.

[3] הָאֹהֱלָה in Baer's text, Gn 18[6], is an error, according to his preface to Isaiah, p. v.

Rem. The above examples are mostly rendered definite by the article, or by a following genitive of definition, or are proper names. But cases like יָמָּה, הָרָה, בַּיְתָה show that the locative form *of itself* possessed a defining power.

d (*b*) In a somewhat weakened sense, indicating the place *where* something is or happens (cf. § 118 *d*), e.g. מַחֲנַיְמָה *in Maḥanaim*, 1 K 4^{14}; שָׁמָּה *there* (usually *thither*, see *c*), Jer 18^{2}, cf. 2 K 23^{8}, and the expression *to offer a sacrifice* הַמְזַבֵּחָה, properly *towards the altar* for *on the altar*. On the other hand, בָּבֶלָה Jer 29^{15}, and וְכֻלָּה Hb 3^{11}, are to be regarded as ordinary accusatives of direction, *to Babylon*, *into the habitation*; also expressions like פְּאַת צָפוֹנָה *the quarter towards the north*, Jos 15^{5} (at the beginning of the verse, גְּבוּל יָרְמָה *the border toward the east*), cf. $18^{15.20}$, Ex 26^{18}, Jer 23^{8}.

e (*c*) The original force of the ending ה_ָ is also disregarded when it is added to a substantive with a preposition prefixed (cf. also עַד־אָנָה *how long?*), and this not only after לְ, אֶל־ or עַד־ (which are easily explained), e.g. לְמַעְלָה *upwards*, לְמַטָּה *downwards*, לִשְׁאוֹלָה *to Sheol*, ψ 9^{18}; עַד־אֲפֵקָה *unto Aphek*, Jos 13^{4}, אֶל־הַצָּפוֹנָה *toward the north*, Ez 8^{14}, cf. Ju 20^{16}; but also after בְּ, and even after מִן, e.g. בַּנֶּגְבָּה *in the south*, Jos 15^{21}, cf. Ju 14^{2}, 1 S $23^{15.19}$, 31^{13}, 2 S 20^{15}, Jer 52^{10}; מִבָּבֶלָה *from Babylon*, Jer 27^{16}; cf. 1^{13}, Jos 10^{36}, 15^{10}, Ju 21^{19}, Is 45^{6}.

f Rem. Old locative forms (or original accusatives) are, according to the Masora, still to be found in

(*a*) לַיְלָה, in *pause* לָיְלָה, the usual word in prose for *night*, which is always construed as masculine. The nominative of this supposed old accusative[1] appeared to be preserved in the form לַיִל, only used in poetry, Is 16^{3}, *constr. st.* לֵיל (even used for the *absol. st.* in pause Is 21^{11}). Most probably, however, לַיְלָה is to be referred, with Nöldeke and others, to a reduplicated form לילי; cf. especially the western Aramaic לֵילְיָא, Syr. *lilya*, &c.—Another instance is מְאוּמָה *something*, probably from מָאוּם, מוּם *spot*, *point*, generally with a negative = *nothing*. Similarly אַרְצָה Is 8^{23} and (in pause) Jb 34^{13}, סוּפָתָה Ho 8^{7}, and the place-name יַהְצָה 1 Ch 6^{63}, might be explained as accusatives. Elsewhere, however, the toneless ה_ָ can be regarded only as a meaningless appendage, or at the most as expressing poetic emphasis; thus אָרְצָה (in *pause*) Jb 37^{12}; הַמָּוְתָה *death*, ψ 116^{15}; נַחְלָה *stream*, ψ 124^{4}; הַחַשְׁמַלָה *amber*, Ez 8^{2} [in 1^{4} הַחַשְׁמַל, cf. § 80 *k*], &c. In Jos 15^{12} הַיָּמָּה is probably only a scribal error (dittography). In Ju 14^{18} instead of the quite unsuitable poetic word הַחַרְסָה (towards the sun??) read as in 15^{1} הַחֲדָרָה *to the bride-chamber*.

---

[1] Brockelmann, *Sem. Sprachwiss.*, p. 113, also takes it as such, *laylā* being properly *at night*, then *night* simply. Barth, however (*Sprachwiss. Abhandlungen*, p. 16, note 1), refers it to an original לַיְלֵה, like אָנָה from אָנָּה.

(*b*) In the termination תָה־ often used in poetry with feminines, viz. *g*
אֵימָתָה *terror* (=אֵימָה), Ex 15[16]; עֶזְרָתָה *help* (=עֶזְרָה), ψ 44[27], 63[8], 94[17]; יְשׁוּעָתָה *salvation* (=יְשׁוּעָה), ψ 3[3], 80[3], Jon 2[10]; עַוְלָתָה *unrighteousness* (=עַוְלָה), Ez 28[15], Ho 10[13], ψ 125[3]; עָלְתָה ψ 92[16] *Keth.* Jb 5[16]; צָרְתָה ψ 120[1]; עִיפָתָה *darkness*, Jb 10[22]; הַמְזִמָּתָה Jer 11[15] is corrupt, see the LXX and Commentaries. These cases are not to be taken as double feminine endings, since the loss of the tone on the final syllable could then hardly be explained, but they are further instances of an old accusative of direction or intention. In examples like עֶזְרָתָה *for help* (ψ 44[27]) this is still quite apparent, but elsewhere it has become meaningless and is used merely for the sake of poetical emphasis.[1]

This termination ה־ usually has reference to *place* (hence called *h* ה־ *locale*[2]); sometimes, however, its use is extended to time, as in מִימָה יָמִים *from year to year*. Its use in חָלִילָה, properly *ad profanum!=absit!* is peculiar.

As the termination ה־ is almost always toneless (except in מְעָרָתָה *constr. st.* *i*
Dt 4[41]; נְתָתָה and עָתָה Jos 19[13]) it generally, as the above examples show, exercises no influence whatever upon the vowels of the word; in the *constr. st.* מְדָבַּרָה Jos 18[12], 1 K 19[15], and in the proper names גַּתָּה 1 K 2[40], דַּנָה 2 S 24[6] (so Baer; ed. Mant. and Ginsb. דָּנָה), צְפַתָּה 2 Ch 14[9], צְרַפַּתָה 1 K 17[9], צְרֵרָתַנָה 1 K 4[12], an *ă* is retained even in an open tone-syllable (cf., however, הָרָה Gn 14[10], פְּדָנָה Gn 28[2] from פַּדַּן, with modification of the *a* to *è*; also כַּרְמֶלָה 1 S 25[5] from כַּרְמֶל). In segholate forms, as a general rule, the ה־ *local* is joined to the already developed form of the *absol. st.*, except that the helping-vowel before ה־ naturally becomes *Šewâ*, e.g. בַּיְתָה, הָאֹהֱלָה Gn 18[6], &c.; הַיַּעְרָה Jos 17[15], הַיַּשְׁעָרָה[3] Ju 20[16], &c., but also נַחְלָה Nu 34[5] (*constr. st.*; likewise to be read in the *absolute* in Ez 47[19], 48[28]) and יְשִׁעָרָה Is 28[6] (with *Silluq*); cf. נֶגְבָּה Ez 47[19] and נִגְרָנָה (Baer, incorrectly, נִגְרָנָה) Mi 4[12] (both in *pause*).—In the case of feminines ending in ה־ the ה־ *local* is added to the original feminine ending ת־ (§ 80 *b*), the *ă* of which (since it then stands in an open tone-syllable) is lengthened to *ā*, e.g. תִּרְצָתָה.—Moreover the termination ה־ is even weakened to ה־ in נֹבָה *to Nob*, 1 S 21[2], 22[9]; אָנָּה *whither*, 1 K 2[36.42] and דְּדָנָה *to Dedan*, Ez 25[13].

3. Of the three other terminations ֗ may still be regarded as a *k*
survival of the old nominative ending. It occurs only in the middle

[1 The form elings also to a few place-names, as גֶּרְגְּרָה Dt 10[7]; שְׁלִשָׁה 1 S 9[4], 2 K 4[42]; הֶהָלְתָה Nu 33[22 f.]; יָטְבָּתָה verse 33 f.; תִּמְנָתָה Jos 19[43], &c.; אֶפְרָתָה Mi 5[1], &c.]

[2] Cf. Sarauw, 'Der hebr. Lokativ,' *ZA.* 1907, p. 183 ff. He derives the ה־ from the adverbs שָׁמָּה, אָנָה and holds that it has nothing whatever to do with the old accusative.

[3] So Qimḥi, and the Mant. ed. (Baer הַשַּׁעֲרָה), i.e. locative from שַׁעַר (Is 7[20]). The reading הַשִּׁעֲרָה (Opit., Ginsb.) implies a feminine in ה־.

of a few (often undoubtedly very old) proper names,[1] viz. אֲחִימִי (if compounded of אחו and מי), חֲמוּטַל (for which in Jer 52[1] *Keth.* חֲמִיטַל), מְתוּשָׁאֵל and מְתוּשֶׁלַח (otherwise in Hebrew only in the plur. מְתִים *men*; to מָתוּ corresponds most probably בְּתוּ in בְּתוּאֵל), פְּנוּאֵל Gn 32[31] (but in ver. 32 פְּנִיאֵל) *face of God* (otherwise only in the plur. פָּנִים *constr. st.* פְּנֵי).[2]—נַּשְׁמוּ Neh 6[6] (elsewhere גֶּשֶׁם), is the name of an Arab, cf. 6[1]. On the other hand the terminations ־ִי and ־וּ are most probably to be regarded (with Barth, l. c., p. 597) as having originated on Hebrew soil in order to emphasize the *constr. st.*, on the analogy of the *constr. st.* of terms expressing relationship.

In view of the analogies in other languages (see *b*) there is nothing impossible in the view formerly taken here that the *litterae compaginis* ־ִי and ־וּ are obsolete (and hence no longer understood) case-endings, *î* being the old genitive and *ô* for the nominative sign *u*. Barth objects that the *î* and *ô* almost invariably have the tone, whereas the accusative ־ָה is toneless, and that they are long, where the Arab. *ĭ* and *ŭ* are short. Both these objections, however, lose their force if we consider the special laws of the tone and syllable in Hebrew. The language does not admit a final *ĭ* or *ŭ*, and the necessarily lengthened vowel might easily attract the tone to itself. On the other hand a strong argument for Barth's theory is the fact that these *litterae compaginis* are almost exclusively used to emphasize the close connexion of one noun with another, hence especially in the *constr. st.* Consequently it seems in the highest degree probable that all these uses are based upon forms in which the *constr. st.* is expressly emphasized by a special termination, i. e. the *constr. st.* of terms of relationship, אֲבִי, אֲחִי, חֲמִי from אָב *father*, אָח *brother*, חָם *father-in-law* (cf. § 96). The instances given under *l* and *m* followed this analogy.

Like *î*, ־וּ is also used only to emphasize the *constr. st.* (see *o*), and must therefore have a similar origin, but its exact explanation is difficult. According to Barth, this ־וּ corresponds to a primitive Semitic *â* (cf. § 9 *q*) and is traceable to *'abâ*, *'aḫâ*, the accusatives of terms of relationship in the *constr. st.*, which have *â* only before a genitive. Against this explanation it may be objected that there is no trace of the supposed Hebrew accusatives אֲבוֹ, אֲחוֹ, חֲמוֹ, and only of the analogous בְּנוֹ. It is also remarkable that so archaic a form should have been preserved (except in בְּנוֹ) only in two words and those in quite late passages. However we have no better explanation to offer in place of Barth's.

Finally we cannot deny the possibility, in some cases, of Barth's explanation of the ־וּ in compound proper names like בְּתוּאֵל, &c. (see above), as due to the analogy of terms of relationship with nominative in ־וּ. But this in no way militates against the view expressed above, that in some very old names, like פְּנוּאֵל, בְּתוּאֵל, &c., the original common nominative sign has simply been preserved.

---

[1] Cf. the list in L. Kaila, *Zur Syntax des in verbaler Abhängigkeit stehenden Nomens im alttest. Hebr.*, Helsingfors, 1906, p. 54.

[2] The name שְׁמוּאֵל formerly regarded as a compound of שֵׁם = שְׁמוּ *name* and אֵל, is better explained with Prätorius, *ZDMG.* 1903, p. 777, as a name of affection, for שְׁמוּעֵ אֵל = יִשְׁמָעֵאל [but see Driver on 1 S 1[20]]; similarly, according to Prätorius, פְּתוּחַ אֵל = פְּתוּאֵל and many others.

The instances found are:

l (*a*) Of the ending ־ִי: בְּנִי אֲתֹנוֹ *his ass's colt*, Gn 49[11]; עֹזְבִי הַצֹּאן *that leaveth the flock*, Zc 11[17] (cf. the preceding רֹעִי הָאֱלִיל); שֹׁכְנִי סְנֶה *the dweller in the bush*, Dt 33[16] (on שָׁכְנִי cf. below Jer 49[16a], Ob[3]); appended to the feminine גְּנֻבְתִי יוֹם וְגְנֻבְתִי לָיְלָה *whether stolen by day or stolen by night*, Gn 31[39] (in prose, but in very emphatic speech); מְלֵאתִי מִשְׁפָּט *plena iustitiae*, Is 1[21]; רַבָּתִי עָם *full of people*, La 1[1] (on the retraction of the tone before a following tone-syllable, cf. § 29 *e*; in the same verse the second רבתי and שָׂרָתִי, see below, follow the example of רַבָּתִי, although no tone-syllable follows; cf. also Ho 10[11] below); עַל־דִּבְרָתִי מַלְכִּי־צֶדֶק *after the order of Melchizedek*, ψ 110[4]; cf. also ψ 113[9], Jer 49[16b]. To the same category belong the rather numerous cases, in which a preposition is inserted between the *construct state* and its genitive (cf. § 130 *a*), without actually abolishing the dependent relation, e. g. רַבָּתִי בַגּוֹיִם *she that was great among the nations*, שָׂרָתִי בַּמְּדִינוֹת *princess among the provinces*, La 1[1]; אֹהַבְתִּי לָדוּשׁ *that loveth to tread*, Ho 10[11]; cf. also Jer 49[16a], Ob[3].—In Ex 15[6] נֶאְדָּרִי can only be so explained if it is a vocative referring to יהוה, but perhaps we should read נֶאְדָּרָה as predicate to יְמִינֶךָ.

Further, the *Hireq compaginis* is found with certain particles which are really also nouns in the *constr. st.*, as זוּלָתִי (=זוּלָת) *except*, מִנִּי (poetical for מִן) *from*, בִּלְתִּי *not*, אַפְסִי *not* (thrice in the formula אֲנִי וְאַפְסִי עוֹד *I am, and there is none else beside me*; but many take the ־ִי as a suffix here), Is 47[8.10], Zp 2[15]. [The above are all the cases in which this ־ִי is attached to independent words in the O.T.; it occurs, however, besides] in compound proper names (again attached to the *constr. st.*), as מַלְכִּי־צֶדֶק (*king of righteousness*), נַבְרִיאֵל (*man of God*), חַנִּיאֵל (*favour of God*), and others (cf. also the Punic name *Hannibal*, i. e. חַנִּיבַּעַל *favour of Ba'al*).

m Otherwise than in the *constr. st.* the *Hireq compaginis* is only found in participial forms, evidently with the object of giving them more dignity, just as in the case of the construct forms in *î*. We must distinguish, however, between passages in which the participle nevertheless does stand in close connexion, as Gn 49[11], Is 22[16] (חֹצְבִי and חֹקְקִי, also in impassioned speech), Mi 7[14] (probably influenced by Dt 33[16]), ψ 101[5], 113[7]; and passages in which the *î* added to the participle with the article merely serves as an ornamental device of poetic style, e. g. in the late Psalms, 113[5.6.7.9] (on verse 8 see *n*), 114[8], 123[1].

n In *K^ethibh* the termination *i* also occurs four times in יושבתי, i. e. יוֹשַׁבְתִּי, Jer 10[17], 22[23] (before בְּ), Ez 27[3] (before עַל־), La 4[21] (before בְּ). The *Q^ere* always

requires for it יוֹשַׁבְתָּ (or יֹשֵׁ֫בֶת), except in Jer 22[23] יֹשַׁבְתִּי; cf. ibid. מקננתי *Keth.*, מְקֻנַּנְתְּ *Qere*, and finally Jer 51[13] שׁבנתי *Keth.*, שֹׁכַנְתְּ *Qere*. Perhaps יֹשַׁבְתִּי and שֹׁכַנְתִּי are *formae mixtae*, combining the readings יֹשֶׁ֫בֶת, &c. and יָשַׁבְתְּ (*2nd fem. perf.*), &c., but מְקֻנַּנְתִּי may be merely assimilated to יֹשַׁבְתִּי which immediately precedes it.

The following are simply textual errors: 2 K 4[23] ההלכתי *Keth.*, due to the preceding אתי, and to be read הַהֹלֶכֶת as in the *Qere*; ψ 30[8] (read הָרַרְתָּ), 113[8] (read לְהוֹשִׁיבִי), 116[1] (read קוֹל תחִ, as in five other places). On בְּרִיתִי, thrice, in Lv 26[42], cf. § 128 *d*.

o (*b*) Of the ending î[1] (always with the tone): in prose only in the Pentateuch, but in elevated style, Gn 1[24] חַיְתוֹ־אֶרֶץ *the beast of the earth* (=חַיַּת הָאָרֶץ ver. 25); similarly in ψ 50[10], 79[2], 104[11.20], Is 56[9] (twice), Zp 2[14]; otherwise only in בְּנוֹ צִפֹּר *son of Zippor*, Nu 23[18]; בְּנוֹ בְעֹר *son of Beor*, Nu 24[3.15]; and מַעְיְנוֹ מַיִם *a fountain of waters*, ψ 114[8].

§ 91. *The Noun with Pronominal Suffixes.*

W. Diehl, *Das Pronomen pers. suffixum 2 u. 3 pers. plur. des Hebr.*, Giessen, 1895; A. Ungnad, 'Das Nomen mit Suffixen im Semit.,' *Vienna Oriental Journal*, xx, p. 167 ff.

a With regard to the connexion of the noun with pronominal suffixes, which then stand in a genitive relation (§ 33 *c*) and are, therefore, necessarily appended to the *construct state* of the noun, we shall first consider, as in the verb (§ 57 ff.), the forms of the suffixes themselves, and then the various changes in the form of the noun to which they are attached. The nouns are also tabulated in the Paradigms of the flexion of the noun in § 92 ff. Cf. also Paradigm A in the Appendix. We are here primarily concerned with the different forms of the suffixes when added to the singular, plural, and dual.

b **1.** The Suffixes of the singular are—

With nouns ending in a—

		Vowel.	*Consonant.*	
Sing.	1. *c.*	ִי	־ִי	*my.*
	2. *m.*	ָךְ	־ְךָ (*pause* ־ָךְ)	*thy.*
	2. *f.*	ִךְ	־ֵךְ	
	3. *m.*	הוּ, וֹ	־ֵהוּ (ה), ־וֹ	*his.*
	3. *f.*	הָ	־ָהּ, ־ֶהָ	*her.*

[1] Cf. Kaila, l.c., p. 59 ff.

		Vowel.	*Consonant.*	
Plur.	1.	*c.* נוּ	נוּ־	*our.*
	2.	*m.* כֶם	כֶם־	*your.*
		f. כֶן	כֶן־	
	3.	*m.* הֶם	ם־	*eorum.*
		מוֹ	(poet. מוֹ־)	
		f. הֶן (הֵן)	ן־	*earum.*

Rem. 1. There is less variety of forms in these than in the verbal suffixes; *c* the particular forms are used as follows:—

(*a*) Those without a connecting vowel (on the derivation of these 'connecting vowels' from original stem-vowels, see note on § 58*f*) are generally joined to nouns of a peculiar form (see § 96*f*, the *constr. st.* of which ends in a vowel, as אָבִיךָ, אָבִיהוּ and אָבִיו, אָבִיהָ, אֲבִינוּ, אֲבִיכֶם, אֲבִיכֶן, אֲבִיהֶם, אֲבִיהֶן, sometimes also to segholate forms ending in *î* from ל״ה stems (see § 93 *x*, *y*), e. g. פְּרִיהֶם *the fruit of them*, Am 9[14] (also פְּרִים Is 37[30], &c.), פְּרִיהֶן Jer 29[28] (also פְּרִי verse 5); cf., moreover, חֶלְבֵּהֶן Lv 8[16.25] and similar examples with הֶן (Is 3[17] הֵן) Gn 21[28], Ez 13[17], 16[53]. Also in Gn 1[21], 4[4], Ez 10[12], Nah 2[8], &c., the *K^eth.* perhaps intends the singular, לְמִינֵהוּ, &c., but the Masora requires the plural with defective *ê*.

(*b*) The forms with connecting vowels (§ 58*f*) are joined to nouns ending *d* in a consonant. The connecting vowel is regularly *a* in the *3rd sing. fem.* ה־ (for *aha*) and *3rd plur.* ם־, מוֹ־, ן־, also in the *3rd sing. masc.* וֹ (ה), since the *ô* is contracted from *a*[*h*]*û*, and in the pausal form of the *2nd masc.* ךָ (a modification of original ךַ־).

The forms with *ē* in the above-mentioned persons are common only with nouns in ה־ (from stems ל״ה), *constr. st.* ה־ (cf. § 89*f*), e. g. שָׂדֵהוּ (from *sadaihû*) *his field*; עָלֶהָ *its leaf*, Is 1[30]; מַרְאֵהָ *the appearance thereof*, Lv 13[4] (from *mar'aihā*; on the *S^eghôl* see *k*); but שָׂדָהּ *her field*. The orthographic retention of the י, e. g. מַעֲשָׂיו, מַעֲשָׂיִךְ, gives to many forms the appearance of plurals; see the instances in § 93 *ss*.

Apart from these ל״ה forms the connecting vowel *ē* in the 3rd pers. occurs only in isolated cases; אוֹרֵהוּ *his light*, Jb 25[3]; לְמִינֵהוּ *after its kind*, Gn 1[12.25] [+ 12 times]; Na 1[13]; in Ju 19[24] read פִּילַגְשׁוֹ as in vv. 2, 25. On the other hand ךָ־ in the *2nd sing. fem.* and נוּ־ in the *1st plur.* are by far the more common forms, while ךָ־, נוּ־ are of rare occurrence; see *c*.—Instead of ךָ־ (כָה־ in Gn 10[19], Ex 13[16], Jer 29[25], &c., cf. לְכָה, בְּכָה § 103*g*), כֶם־, כֶן־ (with *Še'wâ mobile*), if the last consonant of the noun is a guttural, the forms are ךָ־, כֶם־, כֶן־, e. g. רוּחֲךָ *thy spirit*, בּוֹרְאֲךָ *thy creator*, Is 43[1], רֵיעֲכֶם *your friend*, Jb 6[27] (on such cases as בְּחוֹכְכֶם Hag 2[5], see § 10*g*).—With *Nun energicum* (cf. § 58*i*, and on עוֹנֶךָ Jb 5[1], &c., cf. § 61*h*) דֶּיךָ occurs in Pr 25[16], in principal pause.

2. Rare or incorrect forms are—

Sing. 1st pers. נִי־ in בְּשׁוּבֵנִי Ez 47[7] (certainly only a scribal error, caused *e* by וַיְשִׁבֵנִי in verse 6).

---

[1] Also in Jer 15[10] read (according to § 61*h*, end) בְּלֹהֵם קִלְלֻנִי; in Ho 7[6] probably אַפֵּהֶם for אֹפֵהֶם.

2nd pers. *m.* in pause ־ָךְ, e.g. כַּפֶּךָ (*thy hand*), ψ 139⁵, cf. Pr 24¹⁰; once חֹנֶךָ ψ 53⁶ (cf. the analogous cases in the verbal suffix § 75 *ll*); *fem.* ־ִיךְ Ez 5¹² (in 16⁵³ also for שְׁבִיתַיִךְ probably שְׁבִיתַיִךְ is intended), ־ֵכִי Jer 11¹⁵, ψ 103³, 116¹⁹, 135⁹ (corresponding to the Aramaic suffix of the *2nd fem. sing.*; on the wholly abnormal ־ֵכֶה Na 2¹⁴, cf. *l*), לֵבִי *K^eth.* 2 K 4², Ct 2¹³. Also ־ֶךָ Is 22¹, Ez 23²⁸, 25⁴.

3rd pers. ־הּ (cf. § 7 *c*), e.g. אֱהָלֹה Gn 9²¹, 12⁸, 13³, 35²¹ (always with *Q^erê* אֲהָלוֹ); נֶהֱה Nu 10³⁶; לֶהֱה Dt 34⁷; בֶּלֹה Jer 20⁷, Na 2¹ *Q^erê*; קְצֹה 2 K 19²³ *K^eth.*, for which קָצוֹ is read in Is 37²⁴; עִירֹה and סוּתֹה Gn 49¹¹, cf. Ex 22²⁶ (*Q^erê* עִירוֹ, סוּתוֹ); סִבֹּה ψ 10⁹, 27⁵ *K^eth.*; הֲמוֹנֹה Ez 31¹⁸, &c., *K^eth.*; תְּבוּאָתֹה Ez 48¹⁸ [altogether fourteen times in the Pentateuch, and some forty times in other books: see Driver, *Samuel*, p. xxxv, and on 2 S 2⁹, 21¹].

3rd fem. ־ָהּ for ־ַהּ (with the softening of the *Mappiq*, cf. § 23 *k*, and the analogous cases in § 58 *g*) occurs repeatedly before *B^eghadhk^ephath* and other soft consonants, Ex 9¹⁸ (before וְ, if the text is right), Lv 13⁴ (before לְ), Nu 15²⁸.³¹, 1 S 1⁹ (unless אָבְלָה, the infin. with fem. termination, is intended; שָׁתָה follows), Ez 16⁴⁴, 24⁶ (before בְּ), 1 S 20²⁰, 2 K 8⁶, Pr 12²⁸ (before אַ), Na 3⁹ (before וּ), ψ 48¹⁴ (before פְּ), Ez 47¹⁰, Jb 31²² twice (before תְּ), Is 21², Jer 20¹⁷ (before הַ), Nu 32⁴², Am 1¹¹ (before נַ), Lv 6² (before עַ); even in *pause*, Lv 12⁴ *a* and ⁵ *b*; Is 23¹⁷, Pr 21²², also with Zaqeph, Is 45⁶, Jer 6⁶ (probably), 44¹⁹; on הַשַּׁמָּה Lv 26³⁴, &c., see § 67 *y*. Cf. also ־ָא Ez 36⁵.—Sometimes the Masora appears (but this is very doubtful) to regard the ־ָהּ with feminines as a shortening of ־ָתָהּ, e.g. נִצָּהּ Gn 4*c*¹⁰ for נִצָּתָהּ, פְּנֵהּ Pr 7⁸ for פִּנַּתָהּ; also ־ָם for ־ָחֶם in כְּתֻבוּנָם Ho 13², and עֲרֻמָם Jb 5¹³. The examples, however, are for the most part uncertain, e.g. in Is 28⁴ the reading is simply to be emended to בִּכּוּרָה, and in Zc 4² to גֻּלָּה, Jb 11⁹ to מִדָּה, Neh 5¹⁴ to פֶּחָה. [See also, after prepositions, § 103 *g*.]

f *Plur.* 1st pers. ־ָנוּ, in *pause* קִיְּמָנוּ Jb 22²⁰ (where, however, קָמֵנוּ is certainly to be read); cf. Ru 3² [Is 47¹⁰, cf. § 61 *c*, *h*], and so always בָּלָנוּ *all of us*, Gn 42¹¹, &c [cf. בָּנוּ, לָנוּ, אִתָּנוּ, עִמָּנוּ].

2nd pers. *fem.* בָּנָה Ez 23⁴⁸.⁴⁹.

3rd pers. *masc.* ־ָמוֹ ψ 17¹⁰ (on מוֹ in פִּימוֹ in the same verse, and in ψ 58⁷ see *l*); ־ָהֶם 2 S 23⁶, according to Sievers probably to call attention to the reading בלהם. *Fem.* ־ָהֶנָּה 1 K 7³⁷, Ez 16⁵³ (in *pause*); ־ָנָה Gn 41²¹; ־ֶנָּה Gn 30⁴¹; ־ָנָה Ru 1¹⁹; elsewhere generally in *pause* (Gn 21²⁹, 42³⁶, Jer 8⁷, Pr 31²⁹, Jb 39²); finally ־ֶהָן as suffix to a noun, only in Is 3¹⁷.

For examples of singulars with plural suffixes see *l*.

g **2.** In the *plural masc.* and in the *dual* the suffixes are to be regarded primarily as affixed to the original ending of the *construct state* (־ֵי, cf. § 89 *d*). This ending, however, has been preserved unchanged only in the *2nd fem.* In most cases it is contracted to ־ֶי, as in the *constr. st.* without suffixes (so throughout the plur. and in the poetical suffix ־ֵיהוּ of the *3rd sing. masc.*); in the *2nd masc.* and *3rd fem. sing.* it is ־ִי (cf. *k*). On the *1st pers.* and *3rd masc. sing.* see *i*.—Thus there arise the following

Suffixes of Plural Nouns. *h*

Singular.		*Plural.*	
1. *c.* ◌ִי—, *pause* ◌ִי֫	*my.*	1. *c.* ◌ֵינוּ	*our.*
2. *m.* ◌ֶיךָ	*thy.*	2. *m.* ◌ֵיכֶם	*your.*
f. ◌ֵיךְ, *pause* ◌ֶי֫ךְ		*f.* ◌ֵיכֶן	
3. *m.* ◌ָיו, poet. ◌ֶיהוּ	*his.*	3. *m.* ◌ֵיהֶם, poet. ◌ֵימוֹ	*their.*
f. ◌ֶיהָ	*her.*	*f.* ◌ֵיהֶן	

Thus the original ◌ִי— is (*a*) contracted in the *3rd sing. masc.* *i* ◌ֶיהוּ and throughout the *plural*, as סוּסֵינוּ, סוּסֵיהֶם, &c.; (*b*) retained unchanged in the *1st sing.* סוּסִי, the real suffix-ending ◌ִי (see *b*) being united with the final *Yôdh* of the ending ◌ִי—; and in the *2nd fem. sing.* סוּסַיִךְ, with a *helping-Ḥireq* after the *Yôdh*. On the other hand (*c*) the *Yôdh* of ◌ִי— is lost in pronunciation and the *ă* lengthened to *ā* in the *3rd masc. sing.* סוּסָיו, i. e. *sûsāw* (pronounced *susā-u*).[1] The *2nd masc. sing.* סוּסָיִךְ and the *3rd fem. sing.* סוּסֶיהָ were formerly also explained here as having really lost the ◌ִי, and modified the *a* of *sûsakā*, *sûsahā* to *Seghôl*; but cf. the view now given in *g* and *k*.

Rem. 1. As סוּסֵינוּ represents *sûsai-nû*, so סוּסַיִךְ and סוּסֶיהָ represent *sûsai-kā*, *k*
sûsai-hā, and the use of *Seghôl* instead of the more regular *Ṣere* is to be explained from the character of the following syllable,—so P. Haupt who points to יִקְטְלֶהוּ as compared with יִקְטְלָהּ. In support of the view formerly adopted by us that the ◌ִי is only orthographically retained, too much stress must not be laid on the fact that it is sometimes omitted,[2] thereby causing confusion in an unpointed text with the singular noun. A number of the examples which follow may be due to an erroneous assumption that the noun is a plural, where in reality it is a singular, and others may be incorrect readings. Cf. דְּרָכָיִךְ *thy ways* (probably דַּרְכֵּךְ is intended), Ex 33^{13}, Jos 1^{8}, ψ 119^{37}; for other examples, see Jos 21^{11} ff. (מִגְרְשֶׁיהָ; but in 1 Ch 6^{40} ff. always ◌ֶי֫הָ), Ju 19^{9}, 1 K 8^{29}, Is 58^{13}, ψ $119^{41.43.98}$ (probably, however, in all these cases the *sing.* is intended); אֶסְרֶיהָ Nu 30^{8} (cf. v. 5); מַכּוֹתֶיהָ Jer 19^{8}, 49^{17}; מְבִיאֶיהָ Dn 11^{6}. For the orthographic omission of ◌ִי before suffixes cf. רֵעֵיהוּ for *his friends* 1 S 30^{26}, Pr 29^{18}; Jb 42^{10} (but it is possible to explain it here as a *collective* singular); עֲוֹנֵנוּ *our iniquities*, Is $64^{5.6}$, Jer 14^{7}; Ex 10^{9}, Neh 10^{1} (לְיֹמֵנוּ from לְיוֹם which is always written defectively); נִסְכֵּכֶם Nu 29^{33}; רֵעֵכֶם Jer 44^{9}; יְדֵכֶם ψ 134^{2}; לְמִינֵהֶם *after their kinds*, Gn 1^{21} (but see *c*), cf. 4^{4} and Na 2^{8}. The

[1] In the papyrus of the decalogue from the Fayyûm, line 16, ויקרשין occurs for ויקרשהו Ex 20^{11}. Gall, *ZAW.* 1903, p. 349, takes this as an indication that the traditional forms of the noun-suffix ◌ָיו or ◌ֹו represent *aiŭ* or *eŭ*. P. Haupt aptly compares the Greek use of the *iota subscript* (ᾳ̃).

[2] So in the Mêša' inscription, l. 22 מגדלתה *its towers* (along with שעריה *its gates*). Can it have been the rule to omit ◌ִי after the termination *ôth*? Cf. below, *n*.

defective writing is especially frequent in the *3rd masc. sing.* ו֫ـ, which in *Qᵉrê* is almost always changed to יו֫ـ, e.g. חָצָו *his arrows*, ψ 58⁸, *Qᵉrê* חִצָּיו. On יַחְדָּו, only three times יַחְדָּיו, cf. § 135 *r*.

l 2. Unusual forms (but for the most part probably only scribal errors) are—*Sing.* 2nd pers. *fem* יךָ֫ـ (after אַשְׁרֵי *happy!* Ec 10¹⁷, which has become stereotyped as an interjection, and is therefore unchangeable; cf. Delitzsch on the passage); יְכִי֫ـ (cf. Syr. ـܝ) 2 K 4³, and ⁷ in *Kᵉth.*, ψ 103³⁻⁵, 116⁷ (יְכִי֫ـ in *pause*).—In Ez 16³¹ יְךָ֫ـ (so יכֶם֫ـ in 6⁸) occurs with an *infin.* ending in וֹת, the וֹת being therefore treated as a plural ending; similarly, the plural suffix is sometimes found with the feminine ending וֹת (Nu 14³³, Is 54⁴, Jer 3⁸, Ez 16¹⁵, 23⁷, as well as in 16²⁰ *Qᵉrê*, and Zp 3²⁰), with the ending *îth* (Lv 5²⁴, reading חֲמִשִׁתּוֹ), and even with the ordinary feminine ending *ath*; Is 47¹³, Ez 35¹¹, ψ 9¹⁵, Ezr 9¹⁵.—Wholly abnormal is מַלְאָכֶכָה *thy messengers*, Na 2¹⁴, evidently a case of dittography of the following ה: read מַלְאָכַיִךְ.

3rd masc. יהוּ֫ـ Hb 3¹⁰, Jb 24²³; הוּ֫ـ 1 S 30²⁶, Ez 43¹⁷, Na 2⁴; וֹהִי (a purely Aramaic form) ψ 116¹².—*3rd fem.* יהִא֫ـ Ez 41¹⁵.

Plur. The strange *2nd pers. masc.* תְּפוֹצוֹתִיכֶם (with *i*, so Qimḥi; cf. Norzi) Jer 25³⁴, is probably a mixed form combining תְּפֻצוּ and הֲפִיצוֹתִיכֶם; *fem.* יכֶנָּה֫ـ Ez 13²⁰.

3rd masc. יהָמָה֫ـ Ez 40¹⁶; *fem.* יהָנָה֫ـ Ez 1¹¹.

3. The termination מוֹ֫ـ (also with the *dual*, e.g. ψ 58⁷, 59¹³), like מוֹ and מוֹ֫ـ, occurs with the noun (as with the verb, § 58 *g*) almost exclusively in the later poets [viz. with a substantive in the singular, ψ 21¹¹, 17¹⁰.¹⁰, 58⁷, 59¹³, 89¹⁸; with a dual or plural, Dt 32²⁷.³².³⁷.³⁸, 33²⁹, ψ 2³.³, 11⁷, 35¹⁶, 49¹², 58⁷, 59¹⁴, 73⁵.⁷, 83¹².¹², 140⁴.¹⁰, Jb 27²³; after prepositions, see § 103 *f*, *o*, notes], and cannot, therefore, by itself be taken as an indication of archaic language. On the other hand there can be no doubt that these are revivals of really old forms. That they are consciously and artificially used is shown by the evidently intentional accumulation of them, e. g. in Ex 15⁵.⁷.⁹, ψ 2³.⁵, and 140⁴.¹⁰, and also by the fact observed by Diehl (see the heading of this section) that in Ex 15 they occur *only* as verbal suffixes, in Dt 32 *only* as noun suffixes.

m **3.** It is clear and beyond doubt that the *Yôdh* in these suffixes with the plural noun belongs, in reality, to the ending of the *construct state* of the masculine plural. Yet the consciousness of this fact became so completely lost as to admit of the striking peculiarity (or rather inaccuracy) of appending those *suffix*-forms which include the plural ending י֫ـ, even to the feminine plural in וֹת (סוּסוֹתַ֫ינוּ, סוּסוֹתֶ֫יךָ, &c.), so that in reality the result is a double indication of the plural.[1]

n Such is the rule: the singular suffix, however (see *b*), also occurs with the ending וֹת (probably through the influence of Aramaic), e.g. עֶדְוֹתִי ψ 132¹² (unless it be *sing.* for עֶדְוָתִי, as, according to Qimḥi in his Lexicon, תְּחִנֹּתִי 2 K 6⁸ is for תְּחִנְוֹתִי); מַכֹּתְךָ Dt 28⁵⁹ (treated on the analogy of an *infin.* לה״ל);

[1] See an analogous case in § 87 *s*. Cf. also the double feminine ending in the *3rd sing. perf.* of verbs לה״ל, § 75 *i*.

אֲחִיוֹתֵךְ Ez 16[52]. On the other hand מְצוֹתֶךָ (so Baer, Ginsb.; but Opit. יְ_) ψ 119[98], Dn 9[5] is merely written defectively, like נַרְגְּרֹתֶךָ according to Baer (not Ginsb.) in Pr 1[9], &c. In the *3rd plur.* the use of the singular suffix is even the rule in the earlier Books (see the instances in Diehl, l. c., p. 8), e.g. אֲבוֹתָם (*their fathers*) oftener than אֲבֹתֵיהֶם (this only in 1 K 14[15], and in Jer, Ezr, Neh, and Ch [in 1 K, Jer, Ezr, however, אֲבוֹתָם is more common]); so always שְׁמוֹתָם, שְׁמוֹתָן *their names*, דּוֹרוֹתָם *their generations*. From parallel passages like 2 S 22[46] compared with ψ 18[46], Is 2[4] with Mi 4[3], it appears that in many cases the longer form in יהֶם__ can only subsequently have taken the place of ם__.

4. The following Paradigm of a masculine and feminine noun *o* with suffixes is based upon a monosyllabic noun with one unchangeable vowel. With regard to the ending ת__ in the *constr. st.* of the fem. it should be further remarked that the short *ă* of this ending is only retained before the *grave* suffixes כֶם and כֶן; before all the others (the *light* suffixes) it is lengthened to *ā*.

Singular. *p*

		Masculine.	*Feminine.*
		סוּס *a horse.*	סוּסָה *a mare.*

§ 92. *Vowel Changes in the Noun.*

a **1.** Vowel changes in the noun may be caused (*a*) by dependence on a following genitive; (*b*) by connexion with pronominal suffixes, (*c*) by the plural and dual terminations, whether in the form of the absolute state or of the construct (before a following genitive of a noun or suffix).

b **2.** In all these cases, the tone of the noun is moved forward either one or two syllables, while the tone of the *construct state* may even be thrown upon the following word. In this way the following changes may arise :—

(*a*) *When the tone is moved forward only one place,* as is the case when the plural and dual endings ־ִים, ־וֹת and ־ַיִם are affixed, as well as with all monosyllabic or paroxytone suffixes, then in dissyllabic nouns the originally short vowel of the first syllable (which was lengthened as being in an open syllable before the tone) becomes *Šᵉwâ*, since it no longer stands before the tone. On the other hand, the originally short, but tone-lengthened vowel, of the second syllable is retained as being now the pretonic vowel ; e. g. דָּבָר *word* (ground-form *dābăr*), plur. דְּבָרִים; with a light suffix beginning with a vowel, דְּבָרֵנוּ, דְּבָרֶיךָ, דְּבָרַי, &c.; כָּנָף *wing*, dual כְּנָפַיִם. With an unchangeable vowel in the second syllable : פָּקִיד *overseer*, plur. פְּקִידִים; with the *suffix* of the sing. פְּקִידֵנוּ, פְּקִידֶיךָ, &c.; with the *suff.* of the plur. פְּקִידַי, פְּקִידֶיךָ, &c. With an unchangeable vowel in the first syllable : עוֹלָם *eternity*, plur. עוֹלָמִים, with *suff.* עוֹלָמִי, &c.[1]

c But in participles of the form לוֹטֵל, with tone-lengthened *ē* (originally *ĭ*) in the second syllable, the *ē* regularly becomes *Šᵉwâ mobile* before a tone-bearing affix, e. g. אוֹיֵב *enemy*, plur. אוֹיְבִים, with *suff.* אוֹיְבַי, &c. Likewise in words of the form קָטֵל, קָטֵל, &c. (with *ē* in the second syllable; § 84ᵇ *d*, *l*, *p*; § 85 *i* and *k*), e. g. אִלֵּם *dumb*, plur. אִלְּמִים.

d (*b*) When the tone of the *construct state*, plural or dual, is carried over to the following word, or, in consequence of the addition of the *grave suffixes* to the *constr. st.* plur. or dual, *is moved forward two places* within the word itself, in such cases the originally short vowel of the second syllable becomes *Šᵉwâ*, while the vowel of the first syllable reverts to its original shortness, e. g. דִּבְרֵי הָעָם *the words of the people*, דִּבְרֵיכֶם *your words*, דִּבְרֵיהֶם *their words* (in all which instances the *ĭ* of the first syllable is attenuated from an original *ă*).

---

[1] The participles *Niph'al* נֶהֱחָךְ Dt 30⁴, נֶדַח 2 S 14¹³, and some plurals of the participle Niph. of verbs ל״א form an exception ; cf. § 93 *oo*.

In the segholate forms in the singular and mostly in the dual the suffix is appended to the ground-form (מַלְכִּי *my king*, מַלְכֵּנוּ, &c.); on the other hand, before the endings ־ִים, ־וֹת (sometimes also before ־ַיִם) a *Qames* regularly occurs,[1] before which the vowel of the first syllable then becomes vocal *Šᵉwâ* (מְלָכִים, מְלָכוֹת). This *Qameṣ* (on which cf. § 84ᵃ *a*) remains even before the light suffixes, when attached to the plur. masc. (מְלָכַי, מְלָכֶיךָ, &c.). On the other hand, the *constr. st.* plur. and dual, regularly, according to *d*, has the form מַלְכֵי, with grave suffix מַלְכֵיהֶם, &c., דַּלְתֵי from דְּלָתַיִם *folding-doors*. *e*

(*c*) Before the *Šᵉwâ mobile* which precedes the suffix ךָ when following a consonant, the *a*-sound, as a rule, is the only tone-lengthened vowel which remains in the final syllable (being now in an open syllable *before* the tone), e.g. דִּמְךָ, דִּבְרְךָ, &c. (on the forms with *ē* in the second syllable, see § 93 *qq*); but before the grave suffixes ־ְכֶם and ־ְכֶן in the same position it reverts to its original shortness, as דִּבַּרְכֶם (*dᵉbhărkhèm*), &c. In the same way the tone-lengthened *ā* or *ē* of the second syllable in the *constr. st.* sing. also becomes short again, since the *constr. st.* resigns the principal tone to the following word, e.g. דְּבַר אֱלֹהִים; חֲצַר הַבַּיִת (from חָצֵר). *f*

Rem. The Masora (cf. *Diqduqe ha-ṭᵉamim*, p. 37) reckons thirteen words which retain *Qameṣ* in the *constr. st.*, some of which had originally *â* and therefore need not be considered. On the other hand, אוּלָם or אֻלָם 1 K 7⁶, Ez 40⁴⁸, &c. (in spite of the *constr. st.* plur. אֲלָמֵי); מִבְטָח ψ 65⁶, Pr 25¹⁹; מַצָּב 1 S 13²³ (so Baer, but ed. Mant., Ginsburg, &c. מַצָּב); מִשְׁקָל Ezr 8³⁰ and מַתָּן Pr 18¹⁶ are very peculiar. *g*

3. The vowel changes in the inflexion of *feminine nouns* (§ 95) are not so considerable, since generally in the formation of the feminine either the original vowels have been retained, or they have already become *Šᵉwâ*. *h*

Besides the vowel changes discussed above in *a–g*, which take place according to the general formative laws (§§ 25–28), certain further phenomena must also be considered in the inflexion of nouns, an accurate knowledge of which requires in each case an investigation of the original form of the words in question (see §§ 84–86). Such are, e.g., the rejection of the ה of ל״ה stems before all formative additions (cf. § 91 *d*), the sharpening of the final consonant of ע״ע stems in such cases as חֹק, חֻקִּי, &c. *i*

A striking difference between the vowel changes in the verb and noun is that in a verb when terminations are added it is mostly the second of two changeable vowels which becomes *Šᵉwâ* (קָטַל, קָטְלָה, קָטְלוּ), but in a noun, the first (דָּבָר, דְּבָרִי, דְּבָרִים), cf. § 27. 3. *k*

---

[1] For the rare exceptions see § 93 *l* and § 97 *f*, note 2.

§ 93. *Paradigms of Masculine Nouns.*[1]

a Masculine nouns from the simple stem may, as regards their form and the vowel changes connected with it, be divided into *four* classes. A synopsis of them is given on pp. 264, 265, and they are further explained below. Two general remarks may be premised:

(*a*) That all feminines without a distinctive termination (§ 122 *h*) are treated like these masculine nouns, e. g. חֶרֶב *f. sword*, like מֶלֶךְ *m. king*, except that in the *plural* they usually take the termination ־וֹת; thus חַרְבוֹת, *constr.* חַרְבוֹת (and so always before *suffixes*, see § 95).

b (*b*) That in the plural of the first three classes a changeable vowel is always retained even before the light suffixes as a lengthened pretonic vowel, whenever it also stands before the plural ending ־ִים. All suffixes, except כֶם, כֶן, הֶם, הֶן (־ֵיכֶם, ־ֵיכֶן, ־ֵיהֶם, ־ֵיהֶן), are called *light*. Cf. § 92 *e*.

Explanations of the Paradigms (see pp. 264, 265).

c **1.** Paradigm I comprises the large class of *segholate* nouns (§ 84[a] *a–e*). In the first three examples, from a strong stem, the ground-forms, *mălk, sĭphr, qŭdš* have been developed by the adoption of a helping *Seghôl* to מֶלֶךְ (with *ă* modified to *è*), סֵפֶר (*ĭ* lengthened to *ē*), קֹדֶשׁ (*ŭ* lengthened to *ō*).[2] The next three examples, instead of the helping *Seghôl*, have a helping *Pathaḥ*, on account of the middle (*d, f*) or final guttural (*e*). In all these cases the *constr. st. sing.* coincides exactly with the *absolute*. The singular suffixes are added to the ground-form; but in *c* and *f* an *ŏ* takes the place of the original *ŭ*, and in *d* and *f* the guttural requires a repetition of the *ă* and *ŏ* in the form of a *Ḥaṭeph* (נַעֲרִי, פָּעֳלִי); before a following *Šewâ* this *Ḥaṭeph* passes into a simple helping vowel (*ă, ŏ*), according to § 28 *c*; hence נַעֲרָךְ, &c.

d In the plural an *a*-sound almost always appears before the tone-bearing affix ־ִים (on the analogy of forms with original *a* in the

---

[1] A sort of detailed commentary on the following scheme of Hebrew declensions is supplied by E. König in his *Hist.-krit. Lehrgeb. der hebr. Spr.*, ii. 1, p. 1 ff.

[2] According to P. Haupt 'The book of Nahum' in the *Journ. of bibl. Lit.*, 1907, p. 29, the *e* in סֵפֶר and the *o* in קֹדֶשׁ are not long but accented, and hence to be pronounced *séfr, ŏẓn* (אֹזֶן), a theory unknown at any rate to the Jewish grammarians.

second syllable; cf. § 84ª *a*), in the form of a pretonic *Qameṣ*, whilst the short vowel of the first syllable becomes vocal *Šᵉwâ*. The original *a* of the 2nd syllable is elided in the *construct state*, so that the short vowel under the first radical then stands in a closed syllable. The omission of *Dageš* in a following *Begadkephath* (מַלְכֵי, not מַלְכֵּי, &c.) is due to the loss of a vowel between ל and כ. On the other hand, the pretonic *Qames* of the *absolute state* is retained before the light plural suffixes, whilst the grave suffixes are added to the form of the *construct state*.—The ending of the *absolute state* of the dual is added, as a rule, to the ground-form (so in *a–d* and *h*, but cf. *k*). The *construct state* of the dual is generally the same as that of the plural, except, of course, in cases like *m*.

Paradigms *g* and *h* exhibit forms with middle *u* and *i* (§ 84ª *c*, γ and δ); the ground forms *maut* and *zait* are always contracted to *môth*, *zêth*, except in the *absol. sing.*, where *u* and *i* are changed into the corresponding consonants ו and י. *e*

Paradigm *i* exhibits one of the numerous forms in which the contraction of a middle *u* or *i* has already taken place in the *absol. sing.* (ground-form *šauṭ*).

Paradigm *k* is a formation from a stem ל״ה (§ 84ª *c*, ε).

Paradigms *l*, *m*, *n* are forms from stems ע״ע, and hence (see § 67 *a*) originally biliteral, *yam*, *'im*, *ḥuq*, with the regular lengthening to יָם, אִם, חֹק. Before formative additions a sharpening, as in the inflexion of verbs ע״ע, takes place in the second radical, e.g. אִמִּי, יַמִּים, &c. (see § 84ª *c*, β). *f*

Remarks.

1. A. On I. *a* and *d* (ground-form *qaṭl*). In *pause* the full lengthening to *ā* generally takes place, thus כֶּרֶם *vineyard*, זֶרַע *seed* (from זָרַע), and so always (except ψ 48¹¹), in אֶרֶץ *earth* with the article, הָאָרֶץ, according to § 35 *o* (cf. also in the LXX the forms 'Αβέλ, 'Ιαφέθ for הֶבֶל, יֶפֶת). However, the form with *è* is also sometimes found in pause, along with that in *ā*, e.g. חֶסֶד together with חָסֶד; and very frequently only the form with *Sᵉghôl*, e.g. מֶלֶךְ, דֶּשֶׁא *grass*, נֵצַח *perpetuity*, פֶּלֶא *a wonder*, צֶדֶק *righteousness*, קֶדֶם *the East*, יֶשַׁע *help*, &c.—With two *Sᵉghôls*, although with a middle guttural, we find לֶחֶם *bread* (in *pause* לָחֶם) and רֶחֶם *womb* (in *pause* רָחֶם), besides רַחַם Ju 5³⁰ (in *pause* רָחַם). A helping *Sᵉghôl* always stands before a final א, as בֶּטֶן, דֶּשֶׁא (with *suff.* בִּטְנְךָ), פֶּלֶא, פֶּרֶא (also written פֶּרֶה), except in גָיְא, see *v*. *g*

B. The *constr. st.* is almost always the same as the *absolute*. Sometimes, however, under the influence of a final guttural or ר, Pathaḥ appears in the second syllable as the principal vowel (see below, *s*), e.g. גִּבְעָה ψ 18²⁶; זֶרַע *h*

(*two weeks*)		

(only in Nu 11[7], before Maqqeph), חֲדַר Ju 3[24] (but Ct 3[4] חֶדֶר), נְטַע, סְחַר as well as זָרַע, &c. ; cf., moreover, קְחַת 2 K 12[9] (for לָקַחַת, *infin. constr.* from לָקַח).

i C. The ה֫ *locale* is, according to § 90 *i*, regularly added to the already developed form, e.g. נֶגְדָּה ψ 116[14.18]: הַפֶּתְחָה Gn 19[6], *to the door* ; but also with a firmly closed syllable נֶגְבָּה Ex 4c[24] ; under the influence of a guttural or ר, חַרְרָה, אַרְצָה, in *pause* אֶרֶץ (cf. גְּוָרָה 1 Ch 14[16], from גֵּוֶר).

k D. The suffixes of the singular are likewise added to the ground-form, but forms with middle guttural take *Ḥaṭeph-Pathaḥ* instead of the *Šᵉwâ quiescens* ; נַעֲרִי, &c. (but also לַחְמִי, וַעֲטִי, &c.). In a rather large number of *qāṭl*-forms, however, before suffixes in the sing., as well as in the *constr. st.* plur. and dual, the *ă* of the first syllable is attenuated to *ĭ*,[1] thus בִּטְנִי *my womb*, יִתְרוֹ ; so in בֶּגֶד, בֶּצַע, גֶּבַע, גֶּבַח, גֶּבֶר, גֶּדֶר, פֶּתַח, פֶּשַׁע, טֶבַח, זֶבַח, זֶרַע, קֶבֶר, קֶרֶב, רֶשַׁע, שֶׁמֶשׁ, and many others. In some cases of this kind besides the form with *ă* there most probably existed another with original *ĭ* in the first syllable ; thus certainly with יֵשַׁע beside יֶשַׁע, נֵצַח beside נֶצַח, &c. (According to the *Diqduqe ha-ṭᵉamim*, § 36, the *absolute st.* in such cases takes *è*, the *constr. ē* ; cf. נֵדֶר Nu 30[4] (*absol.*) and נֶדֶר 30[10] (*constr.*) ; שֵׁכֶב Lv 24[20] (*absol.*) and שֶׁכֶב Am 6[6] (*constr.*). According to this theory[2] פֵּלֶא (so the best authorities) Is 9[5] would be the *constr. st.*, although the accentuation requires an *absol. st.*)—A weakening of the firmly closed syllable occurs in בִּנְדִי, &c. from בֶּגֶד and יִקְבָּךְ Dt 15[14], 16[13], in both cases evidently owing to the influence of the palatal in the middle of the stem. With *Sᵉghôl* for *ĭ* : נֶגְדִּי, יֶשְׁעֲךָ, הֶבְלִי, &c.

l E. In the plural the termination וֹת is found as well as ־ִים, e.g. נְפָשׁוֹת, עֲצָמוֹת together with נְפָשִׁים (Ez 13[20] [but read חֲפָשִׁים ; see comm.]), &c., *constr. st.* נַפְשׁוֹת. Other nouns have only the ending וֹת, e.g. אַרְצוֹת, *constr.* אַרְצוֹת from אֶרֶץ. Without *Qameṣ* before the ending ־ִים we find רַחֲמִים (*bowels*) *mercy*. On the numerals עֶשְׂרִים *twenty*, &c., cf. § 97 *f*, note 2. Moreover *a* is not inserted before plural suffixes with the tone on the penultima in אַשְׁרֶיךָ, &c., properly *thy happiness!* (a word which is only used in the *constr. st. pl.* and at an early period became stereotyped as a kind of interjection).

m F. In the *constr. st. plural* a firmly closed syllable is sometimes found, contrary to the rule, e.g. כַּסְפֵּיהֶם Gn 42[25.35] ; רִשְׁפֵּי Ct 8[6] (רִשְׁפֵי ψ 76[4]) ; טַרְפֵּי Ez 17[9] ; צַמְּדֵי Is 5[10], and so always in נִסְכֵּיכֶם Nu 29[39], נִסְכֵּיהֶם ψ 16[4], &c. (on the other hand, according to the best authorities *not* in חַסְדֵי Is 55[3], &c., though in ψ 107[43] Ginsburg reads חַסְדֵּי) ; cf. § 46 *d*. Even with a middle guttural בַּעֲלֵיהֶן Est 1[17.20].—The attenuation of *ă* to *ĭ* also occurs sometimes in this form (see above, *k*), e.g. זִבְחֵי, &c., even יִלְדֵי Is 57[4] beside יַלְדֵי Ho 1[2], &c.

n G. In the *dual absol.* beside forms like רַגְלַיִם *feet*, with suff. רַגְלֶיךָ, רַגְלָיו, &c. אַלְפַּיִם *two thousand*, נַעֲלַיִם *sandals*, בִּרְכַּיִם *knees* (*ă* attenuated to *ĭ*, *constr. st.* בִּרְכֵּי with a firmly closed syllable), with suffixes בִּרְכַּי, &c. (cf., however, בִּרְכֵיהֶם Ju 7[6]), forms with pretonic *Qameṣ* are also found (in consequence of the

---

[1] According to M. Lambert, *REJ.* 1896, p. 21, *a* tends to remain with labials ; so in 14 cases out of 22 masculines, and in 3 out of 6 feminines.

[2] Probably only a theory of one particular school and not generally accepted, or at any rate not consistently carried out ; cf. König, *Lehrgeb.*, ii. 22.

tendency to assimilate the dual to the plural in form: so König, *Lehrgeb.*, ii. 17), as קְרַנַּיִם *horns*, with suff. קַרְנָיו (Dn 8^{3} ff.; elsewhere always קַרְנַיִם, קַרְנָיו, &c.), and so always דִּלְתַּיִם, *constr. st.* דַּלְתֵי *folding-doors*, דִּרְכַּיִם (?) *double way*.

o 2. On Paradigms *b* and *e*. With a final א rejected (but retained orthographically) we find חֵטְא *sin*. An initial guttural before suffixes generally receives *Seghôl* instead of the original *ĭ*, e.g. חֶלְקִי, עֶזְרִי, &c., so in the *constr. st. plur.* עֶגְלֵי, &c.; חֵטְא forms חֲטָאֵי 2 K 10^{29}, &c., retaining the *Qameṣ* of חֲטָאִים before the weak א.—The pausal forms סָתָר and שָׁבֶט (out of pause always סֵתֶר, שֵׁבֶט) go back to by-forms סֶתֶר, שִׁבֶּט.—On עִשְׁבוֹת (*constr. st.* plur. of עֵשֶׂב) Pr 27^{25}, cf. § 20 *h*; שִׁקְמִים *sycamores*, without *Qameṣ* before the termination ־ִים (see above, *l*), is probably from the sing. שִׁקְמָה found in the Mišna.

p 3. On Paradigms *c* and *f*. קִשְׁטָ occurs in Pr 22^{21} without a helping vowel; with a middle guttural גַּעַל, &c., but with ה also גַּהֶה, אַהֶל; with a final guttural גַּבַּהּ, רַבַּע, &c., but with א, גַּמָּא; with a firmly closed syllable אַסְפִּי Mi 7^{1}.

q Before suffixes the original *ŭ* sometimes reappears in the sing., e.g. גָּדְלוֹ (ψ 150^{2}) beside גָּדְלוֹ, from גֹּדֶל *greatness*; סִבְּלוֹ (with *Dageš forte dirimens*, and the *ŭ* repeated in the form of a *Ḥaṭeph-Qameṣ*, cf. § 10 *h*) Is 9^{3}, &c.; נִשְׁמָה Ez 22^{24}.—Corresponding to the form פְּעָלְכֶם *pō'ŏl'khēm* we find קְטָרְךָ Ho 13^{14}, even without a middle guttural; similarly קְטָנִי (so Jablonski and Opitius) 1 K 12^{10}, 2 Ch 10^{10}, from קָטָן *little finger*; but the better reading is, no doubt, קְטָנִי (so ed. Mant., 'the ק proleptically assuming the vowel of the following syllable'; König, *Lehrgeb.*, ii. 69), and the form is to be derived, with König, from קָטֹן, not *qŭtŭn*, as Brockelmann quotes him, in *Grundriss*, p. 103. The reading קְטַנִּי (Baer and Ginsburg) is probably not due to a confusion of the above two readings, but ־ַ is merely intended to mark the vowel expressly as *ŏ*. In the forms פְּעָלוֹ Is 1^{31} (for פְּעָלֹו) and תְּאָרוֹ Is 52^{14} (for תָּאְרוֹ 1 S 28^{14}), the lengthening of the original *ŭ* to *ō* has been retained even before the suffix; cf. § 63 *p* and § 74 *h* (בְּמִצְאָכֶם Gn 32^{20}).—In the same way *ō* remains before ־ָה *locale*, e.g. הָאֹהֱלָה, נְוֵרָה Gn 18^{6}, 24^{67}, &c. Dissimilation of the vowel (or a by-form נֶגַח?) seems to occur in נְכֹחוֹ Ex 14^{2}, Ez 46^{9}, for נָגְחוֹ.

r In the *absol. st. plur.* the original *ŭ* generally becomes *Šewâ* before the *Qameṣ*, e.g. בְּקָרִים from בֹּקֶר *morning*, פְּעָלִים *works*, רְמָחִים *lances*, שְׁעָלִים *handfuls* (*constr. st.* שַׁעֲלֵי Ez 13^{19}); on the other hand, with an initial guttural the *ŭ*-sound reappears as *Ḥaṭeph Qameṣ*, e.g. חֳדָשִׁים *months*, עֳפָרִים *gazelles*, אֳרָחוֹת *ways*; and so even without an initial guttural, הֲגָרְנוֹת *the threshing-floors*, 1 S 23^{1}, Jo 2^{24}; קָדָשִׁים *sanctuaries*, and שָׁרָשִׁים *roots* (*qŭdhāšîm*, &c., with *ŏ* for ־ָ); also קָדְשֵׁי [but קָדָשֵׁי, קָדָשָׁיו, once קָ], where, however, the reading frequently fluctuates between קָ and קָ; with the article הַקָּ, בַּקָּ, לַקָּ, according to Baer and Ginsburg. On these forms cf. especially § 9 *v*. From אֹהֶל *tent*, both בְּאָהֳלִים and אֳהָלִים (cf. § 23 *h* and בְּעָלוֹ above) are found; with light suffixes אָהֳלַי, &c.; so from אֹרַח *way*, אָרְחֹתָיו (also אָרְחֹתַי)—hence only with initial א, 'on account of its weak articulation' (König, *Lehrgeb.*, ii. 45). It seems that by these different ways of writing a distinction was intended between the

plural of אֹרְחָה *caravan*, and of אֹרַח *way*; however, אֳרָחוֹת is also found in the former sense (in *constr. st.* Jb 6[19]) and אֳרָחוֹת in the latter (e.g. Jb 13[27] according to the reading of Ben Naphtali and Qimḥi); cf. also אוֹנִיּוֹת 2 Ch 8[18] *K^eth.* (אֳנִי *Q^erê*).—The *constr. st.* plural of בֹּהֶן *thumb* is בְּהֹנוֹת Ju 1[6 f.], as if from a sing. בְּהֹן: of נֹגַהּ *brightness*, Is 59[9] נְגֹהוֹת (on these *q^eṭōl*-forms, cf. *t*).—If אֶפְנָיו Pr 25[11] is not dual but plural (see the Lexicon) it is then analogous to the examples, given in *l* and *o*, of plurals without a pretonic *Qameṣ*; cf. בָּטְנִים *pistachio nuts*, probably from a sing. בָּטְנָה. According to Barth, *ZDMG.* xlii, 345 f. אֶפְנָיו is a sing. (אֶפְנַי, the ground-form of אֶפְנֶה, with suffix).

In the *constr. st. plur.* the only example with original *ă* is רִכְבֵי ψ 31[21]; otherwise like קָדְשֵׁי, אָהֳלֵי, &c.

s 4. Besides the forms treated hitherto we have to consider also a series of formations, which have their characteristic vowel under the *second* radical, as is ordinarily the case in Aramaic (on the origin of these forms see further, § 84[a] *e*). Thus (*a*) of the form קִטַל; דְּבַשׁ *honey*, מְעַט *little*; in *pause*, דְּבָשׁ, מְעָט; גְּבַר *man* (as *constr. st.*, see above, *h*), ψ 18[26] (elsewhere always גֶּבֶר), and *infinitives* like שְׁכַב (§ 45 *c*; on קְחַת, see above, *h*); שִׁכְמ *shoulder*, *ă* being modified to *è* (but in *pause* שֶׁכֶם); locative שְׁכֶמָה, also שְׁכָמָה Ho 6[9]. With suffixes in the usual manner שִׁכְמִי, שִׁכְמָהּ Gn 19[33.35] (an infin. with suffix, therefore not שִׁכְבָהּ). On the other hand, the *ă* is retained in the *plur. absol.* by sharpening the final consonant: אֲגַמִּים (*constr.* אַגְמֵי) *marshes*, הֲדַסִּים *myrtles*, מְעַטִּים *few*.

t (*b*) Of the form קִטַל: בְּאֵר *a well*, זְאֵב *wolf*, &c.[1]; *locative* בְּאֵרָה, with *suff.* בְּאֵרִי, *plur.* זְאֵבִים, זְאֵבֵי; but בְּאֵרוֹת, *constr.* בְּאֵרוֹת; on the *infin. constr.* שְׁאֵת, cf. § 76 *b*.

(*c*) of the form קִטֹל: בְּאֹשׁ *stench* (with *suff.* בְּאֹשָׁיו, just as סִבְּכוֹ occurs in Jer 4[7] along with the *constr. st.* סִבְכְּךָ ψ 74[5]; cf. for the Dageš, § 20 *h*), perhaps also לְאֹם *nation*, pl. לְאֻמִּים.

u 5. Paradigms *g-i* comprise the segholate forms with middle ו or י: (*a*) of the form *qăṭl* with *Wāw* as a strong consonant, in which cases the original *ă* is almost always lengthened to *ā* (Paradigm *g*), thus מָוֶת, אָוֶן *vanity*, עָוֶל *iniquity*, תָּוֶךְ *midst*; with final א, שָׁוְא *falsehood*; cf. however, also רֶוַח *space*. In the *constr. st.* contraction always occurs, מוֹת, &c. (from original *maut*), and likewise before suffixes מוֹתוֹ, &c. Exception, עָוֶל as *constr. st.* Ez 28[18] (according to Qimḥi) and with suff. עַוְלוֹ. The contraction remains also in all cases in the plural (but see below, *w*).

v (*b*) Of the form *qāṭl* with consonantal *Yôdh* (Paradigm *h*). With final א, בָּיְא (also בָּי), in Is 40[4] בְּיָא, in the *constr. st.* (also *absol.* Zc 14[4]) בְּיָא (also בְּי); plur. 2 K 2[16] and Ez 6[3] *K^eth.* according to Baer נאות, i.e. doubtless גְּאוֹת (cf. בְּיָאוֹתֶיךָ Ez 35[8]; according to another reading [and so Ginsburg] גיאות,

[1] The proposal of Haupt (*SBOT.* 'Proverbs', p. 34, l. 44 ff.) to read בֵּאר, זֵאב, &c., does not seem to be warranted. The case here is quite different from that in Pr 1[22] where the Masora requires תְּאֵהֲבוּ, no doubt on the analogy of בְּאֵר, &c., for תֵּאָהֲבוּ, which was probably intended, see § 63 *m*.

i. e. doubtless גְּאָיוֹת), but in *Qᵉrê*, and all other passages, גְּאָוֹת. The uncontracted form (in the *absol. st.* with helping *Hireq*) remains also before ה— *locale*, e. g. בַּיְתָה (but in the *constr. st.* e. g. בֵּיתָה יוֹסֵף).—עִירָה (from עִיר) Gn 49¹¹ is peculiar, so also שִׁיתוֹ Is 10¹⁷ (from שִׁית).—In the *plural absol.* uncontracted forms occur, like חֲיָלִים *hosts*, עֲיָנוֹת *springs*, עֲיָרִים *young asses*, תְּיָשִׁים *he-goats*, &c.; as *constr. st.* Pr 8²⁸ עִינוֹת for עֲיָנוֹת.

(*c*) With the contraction of the ו and י even in the *absol. st.* sing. (Paradigm *i*). In this way there arise formations which are unchangeable throughout; thus from the ground-form *qāṭl*: יוֹם (cf., however, § 96), סוֹף, שׁוֹר, &c.; with middle *Yôdh*, חַיִל 1 Ch 9¹³ (elsewhere חֵיל), לֵיל Is 21¹¹ (elsewhere לָיְלָה, in prose, see above, § 90 *f*); from the ground-form *qīṭl*, דִּין, עִיר, שִׁיר (see, however, § 96); from the ground-form *qŭṭl*, גּוֹר, רוּחַ, &c. The plurals דְּוָרִים *pots*, שְׁוָקִים *streets*, שְׁוָרִים *oxen*, have a strong formation (but for חֲוָחִים 1 S 13⁶ read חוֹרִים as in 14¹¹). Finally, forms with a quiescent middle א also belong to this class, such as רֹאשׁ *head* (obscured from רָאשׁ = *ra'š*, see § 96) and צֹאן *sheep*. ש

6. On Paradigm *k*: segholate forms from ל״ה stems. Besides the formations mentioned in § 84ᵃ *c*, *e*, like גַּבָּה, &c., and שַׂחוּ Ez 47⁵, with the original ו resolved, according to § 24 *d* (cf. the *constr. plur.* חַגְוֵי *clefts*, Ob 3, &c., and קַצְוֵי *ends*, ψ 48¹¹, &c., where the ו becomes again a strong consonant,[1] from חָגֻו and קָצֻו or חָגוּ and קָצוּ), there occur also (*a*) commonly, of the ground-form *qaṭl*, forms like פְּרִי, בֶּכִי, לֶחִי, גְּדִי, בְּכִי, צְבִי, אֲרִי, &c.; in *pause* פֶּרִי, בֶּכִי, לֶחִי, עֶבִי, אֲרִי Ju 14¹⁸; with suffixes פִּרְיוֹ (attenuated from *păryô*), בִּכְיִי ψ 6⁹, but also פִּרְיָךְ, לֶחְיוֹ, &c.; before a grave suffix פִּרְיָהֶם, but also פִּרְיָכֶם. Plur. גְּדָיִים (constr. גְּדָיֵי, see above, *o*, חֲטָאִי), אֲרָיִים and אֲרָיוֹת; with softening of the י to א (as elsewhere in בְּלוֹאֵי Jer 38¹² for which there is בְּלוֹי in verse 11, according to § 8 *k*; עַרְבִיאִים 2 Ch 17¹¹, cf. 26⁷ *Kᵉth.*; probably in לְלָאוֹת, דּוּדָאִים from דּוּדַי and לוּלַי; also חלבאים ψ 10¹⁰ *Kᵉth.*, divided into two words by the Masora, is to be referred to a sing. חֶלְבַּי *hapless*): חֲלָאִים *jewels*, Ct 7² (from חֲלִי), טְלָאִים *lambs*, Is 40¹¹ (from טְלִי); but instead of פִּתָּאִים and צְבָאִים (from פֶּתִי and צְבִי) the Masora requires פְּתָאִים and צְבָאִים; dual: לְחָיַיִם, *constr. st.* לְחָיֵי, with *suff.* לְחָיַי, &c. On דַּל *door*, cf. § 95 *f*, and on such formations generally, see Barth on biliteral nouns in *ZDMG.* 1887, p. 603 ff., and *Nominalbildung* (isolated nouns), p. 1 ff. ת

(*b*) From the ground-form *qīṭl*, חֵצִי *half*, in *pause* חֲצִי, with suff. חֶצְיוֹ, &c.— From stems with middle *Wāw* arise such forms as אִי (from *'iwy*), צִי, עִי *ship*, plur. אִיִּים, צִיִּים, &c.; instead of the extraordinary plur. צִים Nu 24²⁴ read with the Samaritan יְוָצְאִים, and for בַּצִּים Ez 30⁹ read probably with Cornill אֳצִים. ע

(*c*) From the ground-form *qŭṭl* sometimes forms like בֹּהוּ, תֹּהוּ (from *tŭhw*, *bŭhw*), sometimes like חָלְמִי, עָנְיִי, and even without an initial guttural יָפְיִי, דָּמְיִי, ≈

[1] Nöldeke, *Beiträge*, p. 58: the direct or indirect retention of this ו is hardly a feature of early Hebrew. The true Hebrew forms from קָצֶה would be קְצֵה, קְצוֹת, קָצוֹת, the aramaizing forms קְצָה, קָצָת, קְצָוֹת.

צָרִי (also דִּמִי ,יָפִי ,צָרִי), רָאִי, &c ; in *pause* חָלְיִ, &c., with suff. חָלְיִו, plur. חֲלָיִים. From עֳפִי *branch*, there occurs in ψ 104[12] the plur. עֳפָאִים (analogous to פִּתָאִים, &c., see above, *x*) ; the *Kᵉthîb.* evidently intends עֲפָאִים (so Opitius and others). Dual, with *suff.* דְּלָיו Nu 24[7], *bucket* (from דְּלִי, for דַּלְיִ), more correctly, with the Masora, דְּלָיו with Munaḥ for Metheg. This unusual Metheg is to be treated as following the analogy of the cases mentioned in § 9 *v*.

aaa 7. On Paradigms *l-n* : segholate forms from stems ע״ע (see § 84[a] *c*, *β*).

(*a*) In the *qaṭl*-form the *ă* of the contracted formation is sometimes lengthened in the *absol. st.*, sing. as in יָם (so also in the *constr. st.*, except in the combination יַם־סוּף *the Red sea*; and even before *Maqqeph*, יָם־הַמֶּלַח *the salt sea*), sometimes it remains short, e. g. פַּת *morsel*, עַם *people*, but even these formations generally have *Qameṣ* in pause, as well as after the article (e. g. הָעָם). Adjectives under the influence of a guttural either have forms like לַחִים, צַחִים or, with *compensatory lengthening*, רָעֵי, רָעֵים. In the *constr. st.* חַי *living* (in the plural חַיִים also a substantive, *life*), and דַּי *sufficiency*, are contracted to חֵי[1] and דֵּי. As a locative form notice הָרָה *to the mountain*, Gn 14[10] (see § 27 *q*) beside הַהָרָה. The stem is expanded to a triliteral form in הָרְרִי (unless it is simply derived from a by-form הָרִי on the analogy of *qāṭūl*-forms) Jer 17[3] (but in ψ 30[8] for הָרְרִי read הָרַרְתָּ) and הָרְרָם Gn 14[6] ; plur. *constr.* הָרְרֵי Nu 23[7], &c. (but only in poetical passages), with suffix, הָרְרֶיהָ Dt 8[9] ; עָמְמִים Ju 5[14] (where, however, read probably בְּעַמֶּךָ), Neh 9[22] ; עַמְמֵי Neh 9[24] : elsewhere עַמִּים, עַמֵּי.—Before *suffixes* and in the plur. *ă* is sometimes attenuated to *ĭ*, e. g. פִּתִּי, פִּתִּים, from פַּת ; סְפִים and סְפִוֹת (also סַפּוֹת 2 S 17[28]) from סַף. Before ח *ă* is retained in a virtually sharpened syllable, e. g. פַּחִים *traps*.

bb (*b*) *Qiṭl*-forms: אֵם, אֵשׁ *fire* (with suff. אִשִּׁי, but cf. also אִשֶּׁכֶם Is 50[11]), חֵן *favour*, &c. ; of a triliteral form, the plur. חֲצֵצֵיךְ ψ 77[18].

(*c*) *Qŭṭl*-forms : חֹק, כֹּל *totality*, before *Maqqeph* חָק־, כָּל־, with suff. חֻקִּי, &c., with omission of *Dageš forte* (according to § 20 *m*) always חָקְכֶם, but from עוֹ, עִוִּי, עִוֶּךָ, עִוֶּכֶם, for which עָוִי and עָוֶךָ are also found. חֻקְקִי, expanded to a triliteral form, Ju 5[15] and Is 10[1], generally explained as a secondary form of חֻקִּי with abnormal weakening of the *ŭ* to *ĭ*, is more probably to be referred to a *qiṭl*-form = Arabic *ḥiqq*.

cc The forms with assimilated middle *Nûn* likewise follow the analogy of Paradigms *l-n*, e. g. אַף *nose, anger* (אַפִּי, dual אַפַּיִם, also *face*) for *'anp* ; חֵךְ *palate* for *ḥink*, זִקִּים *fetters*, עֵז *goat*, plur. עִזִּים, for *'inz*, probably also אֵב *green herb*, for *'inb*.

dd 2. Paradigm II comprises all formations with original short vowels, whether in the first or second syllable ; cf. § 84[a] *f–i*, and the general laws of formation, § 92 *b–g*.

---

[1] חֵי only in Dn 12[7] as *constr. st.*, since in the asseverative formulae (cf. § 149) חֵי נַפְשֶׁךָ, חֵי פַּרְעֹה (otherwise only in 2 S 15[21], after חֵי יהוה, and Amos 8[14]), חַי is a contracted form of the *absol. st.* (prop. *living is Pharaoh !* &c.). It is evidently only a rabbinical refinement which makes the pronunciation חַי distinctive of an oath by God (or of God by himself), as in the regular formulae חַי אָנִי (חַי אָנֹכִי Dt 32[40]) and חַי יְהוָה (=חַי אֲדֹנָי).

Rem. 1. On Paradigms *a* and *b*: ground-form *qăṭăl*. The lengthening of the second *ă* to *ā* is maintained in the *constr. st. sing.* only in ל״א-forms, e.g. צָבָא *army*, צְבָא. For the construct forms חֶלֶב *milk*, לֶבֶן *white*, Gn 49[12], instead of the ordinary *absolutes* חָלָב, לָבָן, a secondary form חֶלֶב, לֶבֶן must be assumed; from עָשָׁן *smoke*, the *constr. st.* עָשָׁן occurs once, Ex 19[18], beside עֲשַׁן, from הָדָר *ornament* the *constr. st.* הֲדַר Dn 11[20], beside the common form הֲדַר.—The plur. פָּרָשִׁים *horses*, Is 21[7] (instead of פְּרָשִׁים, ground-form *părăš*) is no doubt due to a confusion with the *qaṭṭāl*-form פָּרָשׁ *horseman*.

A. Sometimes a sharpening of the third radical takes place, in order to *cc* keep the preceding vowel short, e.g. גְּמַלִּים *camels*, קְטַנִּים *small ones*, פְּלַגּוֹת *brooks* (see § 20 *a*).—The attenuation of the *ă* of the first syllable to *ĕ* does not take place in the *constr. st. plur.* as a rule after an initial guttural, as חַכְמֵי, עֲנֵי, but חֲזָקֵי, and never before a middle guttural, e.g. נַעֲרֵי; nor (according to König, owing to the influence of the nasal) in the non-guttural forms זַנְבוֹת *tails*, כַּנְפוֹת, and (in the dual) כַּנְפֵי *wings*, from כָּנָף.—The dual נַהֲרַיִם from נָהָר *river*, shows an abnormal omission of the lengthening of the *ă* before a tone-bearing termination, but cf. § 88 *c*.

B. From ע״ע stems, forms like חָלָל, עָנָן, &c., belong to this class. *ff*

C. The few nouns of the ground-form *qĭṭăl* follow the same analogy, such as *gg* לֵבָב *heart*, שֵׁכָר *strong drink*, עֵנָב *grape*, &c. From שְׂעָר *hair*, in the *constr. st.* besides שַׂעַר the form שַׁעַר is also found (perhaps a survival of a secondary form like those in Paradigm I, *d*); so from צֵלָע *rib*, צַלַע and even צֶלַע 2 S 16[13] (so ed. Mant., Ginsb.; but Baer צֶלַע), both, probably, old secondary forms (also used for the *absol. st.*) of צֵלָע; cf. also צִלְעִי and צַלְעוֹ, as well as the *constr. st. plur.* צַלְעוֹת; also from נֵכָר *strangeness*, the *constr. st.* נֵכַר is found, Dt 31[16].

2. On Paradigms *c–e*: ground-form *qăṭĭl*, developed to *qāṭēl*; with a final *hh* guttural, e.g. שָׂבֵעַ *satisfied*. In the *constr. st.* the original *ĭ* of the second syllable, probably on the analogy of the forms discussed in § 69 *c*, becomes *ă*, e.g. זָקֵן, חֶסֶד, חֲסַד, &c., but not before suffixes, כְּתִפִי, &c., nor in forms from ל״א stems, e.g. מָלֵא *full*, מְלֵא; cf., moreover, עָקֵב Gn 25[26] from עָקֵב *heel*, and אָבֵל ψ 35[14], *mourning*. Paradigm *d* represents forms which in the *constr. st.* instead of the ordinary כְּתַף, &c., have a segholate form, as אֶרֶךְ, גֶּדֶר, גֶּוֶל, עֶרֶל, (Ez 44[9]), *constr. st.* of אֹרֶךְ *long*, גֹּדֶר *wall*, יֶרֶךְ *thigh*, גָּזֶל *robbery*, עָרֵל *uncircumcised*. In Is 11[14] בְּכָתֵף would be altogether without precedent as a *constr. st.* (for בִּכְתֵף); most probably the *absol. st.* is intended by the Masora (according to Nöldeke, *Gött. Gel. Anzeigen*, 1871, No. 23 [p. 896] for בכ׳ אֶחָד *with one shoulder*, i.e. *shoulder to shoulder*); [cf. Driver, *Tenses*, § 190, *Obs.*].

In the *plur. constr.* the *ē* lengthened from *ĭ* is frequently retained in verbal *ii* adjectives of this formation, e.g. חֲפֵצֵי, יֹשְׁבֵי, שֹׁכְחֵי, אֹבְלֵי; cf. also יְתֵדֹתָיו (with *ē* under the protection of the secondary tone) from יָתֵד *tent-peg*. On the other hand from יָרֵא *fearing*, always יִרְאֵי; cf. also רִגְעֵי ψ 35[20] from רָגַע.—With *ă* retained in the initial syllable cf. אַחֵר *alius* (with a virtual sharpening of the ח).—From ע״ו stems come forms like מֵת *dead person*, גֵּר *resident stranger*, עֵד *witness*, with unchangeable *Ṣērē*; hence מֵתֵי, מֵתִים, &c.

Kindred in character are the formations from the ground-form *qāṭūl*. This *kk*

ground-form is regularly lengthened to *qāṭōl*, e.g. עָגֹל *round*, עָמֹק *deep*, אָדֹם *red*; but before formative additions the short *ŏ* returns, protected by the sharpening of the following consonant (see *ee* above), as עֲגֻלִּים, &c. (but in stems with a third guttural or ר, גְּבֹהָה, שְׁחֹרִים). The form עָגוֹל, 1 K 10[19], is abnormal; likewise עָמוּקָה Pr 23[27], Jablonski (ed. Mant. עֲמֻקָּה, Baer and Ginsburg עֲמֻקָּה).

ll 3. On Paradigm *f*: ground-form *qāṭăl* from ל״ה stems. As in verbs ל״ה § 75 *h*, the general rule is that before the terminations of the plur. and dual and before suffixes beginning with a vowel, the third radical is usually elided altogether. But besides שָׂדֶה the form שָׂדַי, with the final *Yôdh* retained, is also found in poetry (cf. also the singulars with suffixes, like מִשְׁפָּתֵיהֶם, in *ss*); in the same way final ו is retained in the singulars with suffixes, like עֲנָוִי. The plur. of שָׂדֶה is שָׂדוֹת, *constr.* שְׂדוֹת (also שְׂדֵי, unless this is a *sing.*, contracted from שְׂדָי; so Barth, *ZDMG.* xlii, p. 351). The *qĭṭāl*-form (see § 84[a] *i*) רֵעָה 2 S 15[37], 16[16], 1 K 4[5] is remarkable as a *constr. st.* (the reading רֵעֶה of Opitius and others is opposed to the express statement of the Masora). To the category of these forms also belongs without doubt פָּנִים *face* (only in *plur.*), פָּנַי, פָּנֶיךָ, פָּנֶיהָ, &c.

mm In a few formations of this kind the vowel of the second syllable appears to have been already lost in the *absol. st. sing.*; so according to the ordinary view, in יָד *hand*, *constr.* יַד, with *suff.* יָדוֹ, but יֶדְכֶם; plur. יָדוֹת, *constr.* יְדוֹת, dual יָדַיִם, יְדֵי, with *suff.* יָדַי, יָדֶיךָ, יָדֶיהָ, &c., and in דָּם *blood*, *constr.* דַּם, with *suff.* דָּמִי, but דְּמֵיכֶם (*ă* attenuated to *ĕ*), plur. דָּמִים, דְּמֵי. But perhaps both these nouns are to be regarded as primitive (§ 81), and as original monosyllabic formations.

nn 3. Paradigm III comprises forms with an unchangeable vowel in the first syllable, whilst the vowel of the second syllable has been lengthened from an original short vowel, and is therefore changeable. The special cases are to be distinguished in which the original short vowel is lengthened both *in* and *before* the tone, but in an open syllable becomes *Šᵉwâ* (Paradigm *a*, but cf. also examples like אוֹפַנִּים *wheels*, for אוֹפָנִים, and אֶלְמִים *porches*), secondly, the cases in which the vowel becomes *Šᵉwâ* even *before* the tone (Paradigm *b*), and finally, those in which the termination of ל״ה formations is entirely lost (Paradigm *c*).

oo Rem. 1. On the model of עוֹלָם (which, moreover, is obscured from *'ālăm*), the following forms also are inflected: מִקְטָל (§ 85 *h*), in some cases with virtual sharpening of the third radical (see § 20 *a*), as מִבְטַחוֹ Jer 17[7], ψ 40[5], Jb 8[14], &c.; ל״א nouns of this form maintain the *Qameṣ* in the *constr. st. plur.*, e.g. מִקְרָאֵי from מִקְרָא[1]; on the other hand, in the plur. of the *participles Niph.* (§ 85 *n*) of verbs ל״א (which likewise belong to this class), are found not only regular forms like נִקְרָאִים but also נֶחְבָּאִים Jos 10[17], נִטְמָאִים Ez 20[30 f.],

[1] מְקַדְּשֵׁיהֶם Ez 7[24] for מְקֻדָּשׁ (from מְקַדֵּשׁ) is wholly irregular; perhaps, however, the *part. Pi'ēl* is intended, without *Dageš* in the ד (according to § 20 *m*).

and so always נִבְּאִים (except Ez 13[2] הַנִּבְּאִים) and נִמְצְאִים 1 S 13[15], 2 K 14[14], &c. (except Ezr 8[25] הַנִּמְצָאִים in pause).[1]

pp Moreover, the other participles in *ā* also follow the analogy of עוֹלָם as regards the final syllable (מְקַטֵּל, מָקְטֶל; cf., however, הַמּוּשָׁב Gn 43[12] in close connexion; see the analogous cases in § 65 *d*); also שֻׁלְחָן *table* (§ 85 *u*; plur. שֻׁלְחָנוֹת, *constr.* שֻׁלְחֲנוֹת), קֶרְבָּן, *constr.* קָרְבַּן, hence in plur. *constr.* with *suff.* קָרְבְּנֵיהֶם Lv 7[38]; עָקֵב (§ 85 *w*), plur. עֲקֵבִים (with sharpening of the final consonant for עֲקֻבִים, cf. also עִירֹם *naked*, plur. עֵירֻמִּים Gn 3[7] [but in 2[25] עֲרוּמִּים, according to § 9*o* an orthographic licence for עֲרֻמִּים from עָרֹם], מְעֻרְמִים *nakedness*, 2 Ch 28[15]; קָרְדֹּם, קַרְדֻּמּוֹ; מַעֲמַקֵּי Is 51[10]; נִכְבַּדֵּי Is 23[8 f.]; מְשֻׁנַּאֲבִי ψ 18[3]; even with attenuation of the *ă* to *ĭ*, מְזוֹרְנִים *threshing instruments*, 2 S 24[22], 1 Ch 21[23], from מוֹרֵג), מַתָּן (§ 85 *g*), מָגֵן (§ 85 *i*), מָעוֹז (§ 85 *k*), inasmuch as they retain the *ā* of the first syllable, contrary to rule, even when not pretonic. e.g. מְנֻגָּנִי, מָעֻזִּי; מוֹשָׁב (§ 85 *g*); תּוֹשָׁב (§ 85 *p*), *constr. st. plur.* תּוֹשְׁבֵי 1 K 17[1]; also isolated forms according to § 84[a] *t*, and § 84[b] *b*, *c*, *k*, *m*, *n*, *o*. Cf. finally, צַוָּאר *neck* (from *ṣăw'ăr*), *constr. st.* צַוַּאר Jer 28[10 ff.], *constr. st. plur.* צַוְּארֵי Gn 45[14], &c.

qq 2. (Paradigm *b*; cf. § 84[a] *s*.) Instead of the original *ĭ* in such forms as אֹיְבֶיךָ (cf. 2 K 22[29]), the second syllable more frequently has *ĕ*, e.g. יְצָרְךָ *thy creator*; with a closing guttural (according to § 91 *d*; but cf. also אֹבַד Dt 32[28]) forms are found sometimes like שֹׁלְחֲךָ, sometimes like בֹּרְאֲךָ; *constr. st.* without *suff.* נֹטַע ψ 94[9] (according to § 65 *d*); with a middle guttural נֹאֲלֵךְ Is 48[17]; cf. 43[14].—The same analogy also is followed in the flexion of the other participles which have *ē* in the final syllable (מְתַקְּטֵל, מָקְטֵל, &c.), see further, in § 84[b] *d*, נִבֵּן, &c. (but with exceptions, as שִׁשִּׁים, רִבֵּעִים), and ibid. *l*, *p*; § 85 *i*, *k* (מִזְבֵּחַ *altar*, *constr. st.* מִזְבַּח, plur. מִזְבְּחוֹת), and ibid. *q*, but here also there are exceptions like מַקְהֵלִים ψ 26[12].

rr 3. (Paradigm *c*: *part. Qal* of verbs ל״ה, differing from Paradigm II, *f* in the unchangeableness of the vowel of the first syllable.) In Ez 17[15] *ē* in the *absol. st.* is abnormal, and *Sᵉghōl* in the *constr. st.* in 2 S 24[11] (so Opitius, Ginsburg; but Baer חֹזֵה), Ec 2[15] (according to Baer, but not the Mantua ed.; מְקֹרֶה Ec 3[19] is in the *absol. st.*). To this class belong, as regards their formation, the ל״ה-forms mentioned in § 84[a] *r*, § 85 *g* (with *suff.*, e.g. הַמַּעֲלֶךָ Dt 20[1], *which brought thee up*), and *h*.

ss In a few instances, before a suffix beginning with a consonant, the original *āy* of the termination has been contracted to *ī*, and thus there arise forms which have apparently *plural suffixes*; as מְשִׁסֵּיהֶם Is 5[12], Dn 1[10.16]; מַרְאֵיהֶם *their appearance*, Dn 1[15], Gn 41[21], cf. Na 2[5]; נוֹטֵיהֶם *who stretched them forth*, Is 42[5]; *defectively* אֹפֵהֶם Ho 7[5] (cf. נָוֵהֶם Ez 34[14]); on the other hand, the examples in Is 14[11], Gn 47[17], which were formerly classed with the above, are really plurals. But מְחַנֶּיךָ *thy camp*, Dt 23[15] (מַחֲנֶךָ occurs just before),

[1] Brockelmann, *Grundriss*, p. 659, observes that except in 2 Ch 5[11], 35[17] הַנִּמְצְאִים is always followed by a preposition governing a word, so that the punctuators perhaps intended to indicate a sort of *constr. st.*

מִקְנֶיךָ *thy cattle*, Is 30[23] (probably also שְׂדֶיךָ 1 K 2[26]), מַרְאַיִךְ Ct 2[14], and מַרְאָיו *the sight of him*, Jb 41[1] (with the ' here retained orthographically), כַּעֲלָיו Ez 40[31], &c., are still to be explained as singulars.—On a few other examples which may perhaps be thus explained, see § 124 *k*. Before the plural ending the original termination *ay* reappears in מְמִחָיִם Is 25[6] (*part. Pu.* from מָחָה).

tt **4.** Paradigm IV comprises the forms with a changeable vowel (*a*, *b*), or a vowel which has already become *Šᵉwâ* (*c*), in the first syllable, and an unchangeable vowel in the second. With Paradigm *c* (which, however, for the most part consists merely of forms based on analogy, without biblical parallels) are also connected all the forms which have unchangeable vowels in both syllables, and therefore (like כָּתָב) cannot undergo any vowel changes.

uu Rem. 1. Analogous to פָּקִיד (ground-form *pāqîd*) are § 84[a] *k*, גָּדוֹל, &c. (with *ô*, not changeable *ō* for *ŭ*); in substantives like שָׁלוֹם, this *ô* is demonstrably obscured from *â* (Arab. *sālâm*); ibid. *l*, *m*, אָסוֹר, אָסִיר, &c.; § 85 *u*, זָכְרוֹן, *constr.* זִכְרוֹן; חָזְיוֹן, *constr.* חִזְיוֹן; כְּלְיוֹן, *constr.* כִּלְיוֹן (cf., however, the forms in the *constr. st.* עֲצְבוֹן, קִנְאַת, and with the plural suffix עִזְּבוֹנַיִךְ Ez 27[12 ff.]); § 85 *w*, חַלְמִישׁ, *constr.* חַלְמִישׁ; § 85 *l*, מָקוֹם, &c.

vv 2. עָנִי (ground-form *'ăniy*, stem עָנָה) represents forms in which a final *Yôdh* has been resolved into *î*; before formative additions the original *Yôdh* under the protection of a *Dageš forte* again becomes audible as a firm consonant, whilst the (originally short) vowel of the first syllable becomes *Šᵉwâ*; cf. § 84[a] *l*, נָקִי, plur. נְקִיִּים, and § 87 *a*.

ww 3. כְּתָב with unchangeable *â* in the second syllable, whilst the *Šᵉwâ* is weakened from a short vowel (Arab. *kĭtâb*); *constr. st.* כִּתְבֵי Est 4[8] (readings like כִּתְבֵי 2 Ch 35[4] are incorrect, although יְקַר Est 1[4] and כִּתְבֵי 4[8] are supported by fairly good authority; however, these *qᵉṭâl*-forms in Hebrew are probably all loan-words from the Aramaic). The only plural form found in the O. T. is עֲבֵדֵיהֶם *their deeds*, Ec 9[1]. In a narrower sense the forms enumerated in § 84[a] *n-p* belong to this class; in a wider sense all those which have unchangeable vowels throughout, thus § 84[a] *u*, § 84[b] *e* (קָטָל, cf., however, the anomalous forms mentioned there), ibid. *f-i*, *m* (No. 34 f.), *n* (No. 39), *p* (No. 44), also partly § 85 *b-w* (especially *l* and *r*).

xx In opposition to the anomalous shortening of the form קָטָל (see above), cases are also found where pretonic vowels are retained even in the antepenultima (with the secondary tone); cf. above, *ii* and *pp*, also of the form קָטִיל (properly *qāṭîl*) the examples סָרִיסִים, פָּרִיצִים, שָׁלִישִׁים, whilst the *constr. st. sing.* according to the rule, changes the *ā* into *Šᵉwâ* (סְרִיס, פְּרִיץ). (These are not to be confounded with forms like עָרִיץ *tyrant*, which is for עַרְיִץ, and consequently has an unchangeable *Qameṣ*.) Of the form קָטוּל (*qāṭûl*) in this class are שָׁבוּעַ *week*, plur. שָׁבוּעִים and שְׁבֻעוֹת, *constr.* שְׁבֻעוֹת, but with *Metheg* of the secondary tone in the fifth syllable from the end, שִׁבְעֻתֵיכֶם.—On מָעוֹן, מְעוֹנִי, &c., cf. § 85 *k*.

§ 94. *Formation of Feminine Nouns.*

1. The feminine ending ה־, when appended to the masculine forms treated in § 93, effects in almost all cases the same changes as are produced in the masculine forms by the addition of a light suffix, since in both cases the tone is moved one place farther forward (see § 92 *b*). The following scheme is based on the same division into four classes, with their subdivisions, as in § 93; a few special forms will be treated in § 95 in connexion with the paradigms of feminine nouns. *a*

Paradigm I: segholate forms, with the feminine ending always added to the ground-form, (*a*) מַלְכָּה *queen*, כַּבְשָׂה, and with attenuation of *ă* to *ĭ* כִּבְשָׂה *lamb*, רִצְפָּה *hot stone*, Is 6[6] (from another root רָצַף; see Baer on Ez 40[17]), חֲזָקָה *strength* (unless belonging to Paradigm *b*); (*b*) סְתָרָה *covering* (masc. סֵתֶר); עֲרָנָה *pleasure* (עֲרֻגָה), not to be confounded with the unchangeable forms with a prefixed מ, derived from ל״ה stems, as מִצְוָה *command*, plur. מִצְוֹת; (*c*) חֻלְדָּה, proper name (חֹלֶד *mole*), אָכְלָה *food* (אֹכֶל); (*d*) נַעֲרָה *girl* (נַעַר); (*f*) בָּאְשָׁה *weed*, טָהֳרָה *purity* (טֹהַר); (*g*) עַוְלָה *wrong* (also עוֹלָה, Paradigm *i*); (*i*) צֵידָה *victuals* (masc. צַיִד, cf. Paradigm *h*); from *qiṭl* and *quṭl*-forms, בִּינָה *understanding*, סוּפָה *tempest*; (*k*) אַלְיָה *fat tail* (as if from אַלִי), שִׁבְיָה (*ă* attenuated to *ĭ*) *captivity* (שִׁבְיִ), לְוְיָה *wreath* (probably an original *qiṭl*-form); (*l*) חַיָּה *life*, מִדָּה *measure* (attenuated from מַדָּה). Adjectives derived from ע״ע stems also belong in flexion to this class, as רַבָּה *multa*, with middle guttural רָעָה *mala*; (*m*) זִמָּה *plan*; (*n*) חֻקָּה *statute* (חֹק).

Paradigm II: ground-form *qăṭălăt*, &c., (*a*) נְקָמָה *vengeance* (נָקָם); (*b*) אַדְמָה *earth*; (*c*) נִבְלָה *corpse*; (*d*) עֲיָפָה *languida*; (*f*) יָפָה *beautiful*, קָצֶה *end* (from יָפֶה, קָצֶה). From stems ע״ו arise such forms as עָרָה (masc. עֵר, properly *part. Qal* from עוּר) *female witness*. From the ground-form *qăṭŭl*, עֲמֻקָּה *profunda* (masc. עָמֹק), עֲבֻדָּה *servitude*, &c. *c*

Paradigm III: unchangeable vowel in the first, changeable in the second syllable, (*a*) יֹלֶדֶת *a woman with child* (cf. the examples in § 84[a] *s*, and the retention of the *ē* in the *part. Pi'ēl*, Ex 22[17], 23[26]; in the *Hithpa'ēl* 1 K 14[5f.]), but also with the change of the *ē* (originally *ĭ*) into *Še'wâ*, יְשֻׁבָה *dwelling*, Na 3[8]. However, in these participial forms the feminine is mostly indicated by ת־ (see below, *h*); (*c*) גּוֹלָה *those of the captivity* (masc. גּוֹלֶה), but also with a return of the final *Yôdh*, הֹמְיָה *clamorous*, Pr 7[11], and the examples in § 75 *v*. On the *â* of the participles of verbs ע״ו, which also belong to this class, such as זָרָה *peregrina*, cf. § 72 *g*. *d*

e Paradigm IV: originally changeable vowel in the first syllable, unchangeable in the second, (*a*) גְּדֹלָה *magna*, חֲסִידָה *stork*, properly *pia*; בְּתוּלָה *virgin*, properly *seiuncta*; (*b*) עֲנִיָּה *misera*.

f **2.** A simple ת is added as feminine ending in forms like בְּכִית *weeping* (masc. בְּכִי, § 93 *x*, *a*), בְּרִית *covenant*; but *feminine participles* of verbs ל״א, as יֹצֵאת, מֹצֵאת, may be due to contraction from *yôṣe'et*, &c. (hardly to lengthening of the *ĕ* in the ground-form *môṣi*), whilst forms like מָוֹצֵאת, נְשֹׂאֵת (see § 74 *i*) are to be explained on the analogy of the forms treated in § 93 *t*. Apart from the ל״ה formations, we find the simple ת in the participle מְשָׁרֶת 1 K 1[15], contracted from מְשָׁרַתְתִּ. But וַיֹּלֶדְתִּ Gn 16[11], Ju 13[5.7] is the ground-form of the ptcp. וְיֹלֶדֶת (as in the same connexion in Gn 17[19], Is 7[14]), cf. § 80 *d* and the *Qᵉre* שְׁבָתִּ, &c., discussed in § 90 *n*.

g The forms which arise by appending the ת feminine to masculine nouns with a changeable vowel in a closed final syllable are, as a rule, developed exactly in the same way as masculine segholate forms. Thus there arise in Paradigm I (*a*) from גְּבַרְתִּ (for original *gᵉbirt*; § 69 *c*), the form גְּבֶרֶת *mistress* (but only in *construct st.*; in Is 47[7] also גְּבֶרֶת עַד are to be taken together; the *absolute st.* is גְּבִירָה); from מְלַכְתִּ, מְלֶכֶת *queen* (in Paradigm II, *a*); פְּחַתְתִּ (פַּחַת = פְּחַת *pit*) Lv 13[55]; (*c*) גְּדֶר *wall*, גְּדֶרֶת (from גְּדַרְתִּ = *gᵉdirt*; cf. זְקַן as *construct st.* of זָקֵן); on the other hand, חֲמֶשֶׁת is *construct st.* of חֲמִשָּׁה *five*, with lengthening of the original *ĕ* of חֲמִשְׁתִּ.

h Formations with a changeable *ō* in the second syllable belonging to this class are נְחֹשֶׁת *bronze* (from נְחֹשְׁתִּ), כְּתֹנֶת the *constr. st.* of כֻּתֹּנֶת *coat*, perhaps also כְּתֹבֶת *writing* (unless it be obscured from כָּתָב, § 93, Paradigm IV, *c*).—Paradigm III, (*a*) חֹתֶמֶת (from חֹתַמְתִּ), masc. חוֹתָם *seal*; (*b*) יוֹנֶקֶת (properly *sucking*) *sprout* (in *pause*, e. g. הֹבֶרֶת Ex 26[4], &c.), and so most feminines of participles קֹטֵל. On this transition of the ground-form *qôṭilt* to קֹטַלְתִּ (regularly before suffixes in יְוֹנְקָתוֹ, יְלֹדָתוֹ, &c.), cf. § 69 *c*; *qôṭalt* serves as the ground-form under the influence of a guttural as well as before suffixes, e. g. יֹדַעַת, feminine of יֹדֵעַ *knowing*; in a wider sense, גֻּלְגֹּלֶת *skull* may also be included here, see § 95, Paradigm IV, *c*.

On the endings וֹת and יֹת—, see § 86 *k*, *l*, § 95 at the end.

§ 95. *Paradigms of Feminine Nouns.*

a In accordance with the general formative laws, stated in § 92 *b–k*, the following cases have chiefly to be considered in the flexion of

feminines also: (1) a tone-lengthened vowel on the removal of the tone reverts to its original shortness (thus the *ā* of the termination ה־ becomes again *ă* in the *construct st.* ת־); On the other hand, even an originally short vowel is retained as (a long) pretonic vowel *before* the endings ה־ and וֹת in the *abs. st.*, e. g. צְדָקָה; (2) without the tone or foretone an originally short vowel almost always becomes *Šᵉwâ*; on the other hand, *before* a vowel which had thus become *Šᵉwâ* the *ă* in the first syllable which had hitherto also been reduced to *Šᵉwâ* returns, although usually attenuated to *ĭ*, e. g. צִדְקַת from *ṣădhăqăth*; (3) in the plural of the feminines of segholate forms before the termination of וֹת or ־ִים, and in formations of the latter kind also before the light suffixes, a *pretonic Qameṣ* reappears, while the short vowel of the first syllable becomes *Šᵉwâ*. This short vowel, however, returns in the *construct st. plur.*, whether ending in וֹת or ־ֵי; in formations of the latter kind also before the grave suffixes.

The following Paradigms (with the exception of I, *d*) deal only with such of the forms treated in § 94 as incur some vowel changes or other. All forms with unchangeable vowels follow the analogy of Paradigm I, *d*.

I. *b*

	a.	*b.*		*c.*	*d.*	*e.*
Sing. absolute	מַלְכָּה (*queen*)	[כִּלְיָה] (*kidney*)	חֶרְפָּה (*reproach*)	חָרְבָּה (*waste*)	חֻקָּה (*statute*)	[גְּבִירָה] (*mistress*)
,, *construct*	מַלְכַּת		חֶרְפַּת	חָרְבַּת	חֻקַּת	גְּבֶרֶת
,, *with light suff.*	מַלְכָּתִי		חֶרְפָּתִי	חָרְבָּתִי	חֻקָּתִי	גְּבִרְתִּי

Dual absolute	[נְחֹשְׁתַּיִם] (*fetters of brass*)		שְׂפָתַיִם (*lips*)		
,, *construct*			שִׂפְתֵי		

c

Remarks.

d 1. Paradigm I: feminines of segholate forms. (*a*) The locative of this class has the form גִּבְעָתָה *towards Gibeah* (masc. גִּבְעַ). In some cases, especially with an initial guttural, there is no means of deciding whether the form in question is to be referred to a *qăṭl* or a *qĭṭl* base, e. g. חֶזְקָה *strength* (cf. חָרְפָּה under *b*). A *dual* of this form occurs in שִׁבְעָתַיִם *seven times* (cf. שֶׁבַע *seven*, fem.). Analogous to masculine forms like דֶּבֶשׁ (§ 93 *s*) is הֲדַסָּה *myrtle*.—From masculines of the form פְּרִי (ל״ה, cf. § 93 I, *k*) arise feminines sometimes like נַאֲוָה, שַׁלְוָה, אַלְיָה (see above, § 94 *b*), sometimes like בְּכִירָה (§ 94 *f*); occasionally the final ת is retained before the plural ending, as if it belonged to the stem (cf. § 87 *k*), e. g. חֲנִיתוֹת *spears*. Forms like גְּדִיָּה (cf. אֲנָיָה, a *qŭṭl* form) are derived directly from the masculine forms גְּדִי *kid*, אֳנִי *a fleet*.—(*b*) From a stem חָטָה, ע״ן *wheat* (for חִנְטָה), *plur.* חִטִּים.—(*c*) From עָרְלָה *foreskin*, the *plur. absol.* is עֲרָלוֹת (cf. פְּעָלִים, § 93, Paradigm I, *f*), *constr.* עָרְלוֹת.—(*d*) Example of a feminine segholate form from a stem ע״ע (ground-form *qŭṭl*, like חַיָּה of the form *qăṭl*, זְמָה of the form *qĭṭl*), with ŏ for *ŭ*, חָמָּא *terror*, Is 19[17] (Aramaic orthography for חֲמָה).

e (*e*) To the list of segholate forms with ת fem. belong also the infinitives of verbs פ״ו and פ״ן, which have rejected the weak consonant at the beginning, as שֶׁבֶת (from יָשַׁב), דַּעַת (from יָדַע), נֶגֶשׁ (from נָגַשׁ), as well as כַּחַת (from לָקַח); cf. § 69 *m* and § 66 *b* and *g*. The infinitives of verbs פ״ו are, however, also found in the form הֵעָה, לֵדָה, צֵאָה, and of the same origin also are עֵדָה *congregation* (from יָעַד), עֵצָה *counsel* (from יָעַץ), שֵׁנָה *sleep* (from יָשֵׁן), *constr.* עֲדַת, שְׁנַת, while in the *constr.* forms וְעַת *sweat*, Gn 3[19] (from יָזַע *to flow*), and צֵאַת *excrement*, Ez 4[12], the Ṣere has remained firm.

f From a stem בוש ע״ו (cf. בּוֹשׁ *to be ashamed*) is בֹּשֶׁת *shame*, with *suffix* בָּשְׁתִּי.

---

[1] On שָׁנוֹת as a less frequent (poetic) form for שָׁנִים see § 87 *n*.

From a stem ל״ה (דָּלָה, cf., however, Barth, *ZDMG.* 1887, p. 607, who assumes a stem ידל) the masculine דַּל appears to have been formed after the rejection of the final *Yôdh*, and afterwards the feminine דֶּלֶת *door*; but in the *plural* דְּלָתוֹת, *constr.* דַּלְתוֹת, the ת of the termination is retained (see above, *d*, חֲנִיתוֹת). In a similar way רְפָתִים *stalls*, Hb 3[17], has arisen, if it is from the stem רפה, and שִׁקֻּת *trough* (from שָׁקָה), of which the masc. must have been שִׁקּ = שִׁקְקִי; on the other hand, the *plur. constr.* שִׁקֻּתוֹת Gn 30[38] (again retaining the feminine ת as an apparent radical) can only be an abnormal formation from the *singular* שִׁקֻּת, not from a kindred form שִׁקֶּת or שִׁקֶּת.

g 2. Paradigm II: ground-form *qăṭălăt*, &c., cf. § 94 *c*, Paradigm II, *a* and *b*. Analogous to the masculine forms like קָטָן, plur. קְטַנִּים, we find קְטַנָּה *parva*, &c.—The *constr.* forms, like צִדְקַת (*ṣidhᵉqăth*), are distinguished by the vocal *Šᵉwâ* (§ 10 *d*) from the segholate forms, like כִּבְשַׂת (*kibh-säth*). Consequently the *constr. st.* בִּרְכַּת Gn 28[4], &c. (from בְּרָכָה *blessing*), and חֶרְדַּת 1 S 14[15], &c. (from חֲרָדָה *a trembling*), are abnormal.—Under the influence of a guttural (see Paradigm *b*) the original *ă* is retained in the first syllable in the *constr. st.* (cf. also אַדְמַת *earth*, אֲדָמָה); in other cases it is modified to *Sᵉghôl*, e.g. עֶגְלָה *wagon*, עֶגְלָתוֹ. Frequently from an *absol. st.* in ה_ the *constr.* is formed with the termination ת, e.g. עֲטָרָה *crown*, constr. עֲטֶרֶת (from עֲטָרְתּ); along with עֲצָרָה *assembly*, עֲצֶרֶת is found usually, even in the *absol. st.*; יְבֶמֶת (from יָבָם *levir*) before suffixes is pointed as in יְבִמְתִּי, and thus entirely agrees with גְּבֶרֶת (Paradigm I *e*). From a stem ל״ן (אָמַן) is formed אֱמֶת *truth* (from *'ămant*, and this no doubt for an original *'ămint*, § 69 *c*) before suffixes אֲמִתִּי, &c.

h From the masc. form קָטֶל (*qāṭĕl*) are formed, according to rule, גְּדֵרָה *wall*, נִבְלָה *corpse*, constr. נִבְלַת; בְּהֵמָה *cattle*, constr. בְּהֶמַת (for בְּהֵמַת), with suffix בְּהֶמְתְּךָ Lv 19[19]. More frequently, however, the *ē* of the second syllable is retained before the termination *ath* of the *constr. st.*; thus from נִבְלָה once נִבְלָתִי Is 26[19], and always בְּרֵכַת *pool*, גְּוֵלַת *prey*, טְמֵאַת *unclean*, מְלֵאָתִי *full*, Is 1[21] (with *Ḥireq compaginis*, see § 90 *l*), מְרֵרָתִי Jb 16[13]; שְׁאֵלָתִי 1 S 1[27], &c. (with elision of the א, שְׁלָחֵךְ 1 S 1[17]), also שְׁאֵלָתִי Jb 6[8]. Cf. the analogous forms of the *constr. st.* מַגֵּפַת *plague*, תַּרְדֵּמַת *deep sleep*, from מַגֵּפָה, תַּרְדֵּמָה.

i As dual we find יַרְכָתַיִם *sides* (cf. יַרְכָתוֹ Gn 49[13], from the obsolete יֵרֶכָה, feminine of יָרֵךְ); the *constr. st.* יַרְכְתֵי is perhaps to be referred to a segholate form (יַרְכָה, cf. יֶרֶךְ as *constr. st.* of יָרֵךְ), unless the closed syllable be due to the analogy of בִּרְכַּת and חֶרְדַּת (see *g*).

k In the forms with simple ת feminine the ground-form *qăṭĭlt* is developed (§ 69 *c*) to *qᵉṭalt*, and this again regularly to קְטֹלֶת. Thus the feminine of חָבֵר *companion* is חֲבֶרֶת (with suffix חֲבֶרְתָּהּ Mal 2[14], cf. שִׁבְנָתָהּ Ex 3[22]), of גְּדֵר fem. גְּדֶרֶת besides גְּדֵרָה.—Of ע״ו stems the segholate forms נַחַת *rest* and שַׁחַת *pit* (from נוּחַ, שׁוּחַ) belong to this class; Böttcher (*Gram.* i. 411) rightly distinguished the latter from שַׁחַת *corruption* (stem שָׁחַת); in the same way also נַחַת *rest* is distinct from נַחַת *a lighting down* (stem נָחַת).

l The feminines of the form *qăṭīl* from stems ע״ו, as מֵתָה *mortua*, עֵרָה fem.

witness (from מוּת, עוּד), have likewise an unchangeable vowel in the first syllable. Cf., on the other hand, the forms from פ״י stems mentioned above, under *e*, such as שֵׁנָה *sleep*, constr. st. שְׁנַת; moreover, חֵמָה *anger*, constr. st. חֲמַת (but חֵמָת *a leathern bottle*, in *pause* חֵמָת [so Baer, Ginsb., but Kittel חֵ] Gn 21[15], *constr. st.* חֲמַת מַיִם Gn 21[14], perhaps from a stem חמת).

m The feminines of the form *qāṭūl*, like עֲמֻקָּה (masc. עָמֹק), maintain the original *ŭ* by sharpening the following consonant (cf. § 93 *kk*); on the other hand, by appending the fem. ת, segholate forms arise like נַחְשֶׁת, before suff. נְחָשְׁתָּם, &c. Dual נְחֹשְׁתַּיִם (see Paradigm II, *a*); but cf. נְחָשְׁתִּי La 3[7].

n A few (aramaising) feminines from ל״ה stems (Paradigm II, *c*) are found with the ending *âth*, due to the rejection of the final *Wāw* or *Yôdh* and contraction of the preceding *ă* with the *ă* of the termination *ăth*; thus מָנָת *portion* (for *mănăyăth* or *mănăwăth*), קְצָת end (also קָצֶה and קָצָה), plur. מְנָיוֹת (*constr. st.* Neh 12[47], 13[10]) and מְנָאוֹת (Neh 12[44]); קְצוֹת Ex 38[5]; cf. 37[8] and 39[4] *Keth.*; on גְּאָיוֹת *valleys*, see § 93 *v*.—אוֹת *sign* (stem אוה) is obscured from אָת, and this is contracted from *'áyăth*=*'ăwăyăth*; plur. אוֹתוֹת, with the double feminine ending; cf. above, *f*, and § 87 *k*.—The retention of the *ā* in the first syllable in אֲלָתִי, &c., Gn 24[41], &c., is abnormal.

o 3. Paradigm III, cf. the various forms in § 94 *d* and *f–h*. The *dual* חוֹמֹתַיִם *two walls*, Is 22[11], &c., taken directly from the plur. חוֹמוֹת, for חֹמָתַיִם, is abnormal (cf. § 87 *s*, and the proper name גְּדֵרֹתַיִם Jos 15[36]).—Among the forms resembling participles *Qal* of verbs ע״ו, such as זָרָה (masc. זָר from *zâr*, hence with unchangeable *â*), must be reckoned also בָּמָה *high place* (from בוּם), which has for its *constr. st. plur.* the pleonastic form בָּמוֹתֵי, or written defectively בָּמֹתֵי (see § 87 *s*); for this the Masora everywhere requires בָּמֹתֵי, which is to be read *bāmºthê* (not *bŏmºthê*), with an anomalous shortening of the *ô* to ֵ; but with suffixes בָּמוֹתַי, &c.

p In a wider sense the feminines of the form קָטָל (§ 84[b] *e*) belong to this class, in so far as they shorten the *â* of the second syllable before the termination ת, e.g. דַּלֶּקֶת *inflammation* (from *dallăqt*), with suff. צָרְבֶּתְךָ Ez 16[52]; טַבַּעַת *signet*; also fem. of the forms קִטֵּל and קִטֵּל (§ 84[b] *c* and *d*), as אִוֶּלֶת *folly* (for *'iwwălt*), and of all the forms which have a changeable vowel in the second syllable, and are formed with the prefix מ (§ 85 *g–k*), e.g. מַמְלָכָה *kingdom*, *constr.* always מַמְלֶכֶת; מַזְמֵרָה (not used in the sing.) *pruning-hook*, plur. מַזְמֵרוֹת; מַשְׂכֶּרֶת *reward*, with suff. מַשְׂכֻּרְתִּי; cf. also the examples given in § 85 *g* and *p*, like מוֹלֶדֶת *birth* (but from ל״א, מוֹצָאָה *outgoing*), תּוֹלֶדֶת *generation*, תּוֹעֵבָה *abomination*, constr. תּוֹעֲבַת, &c.

q Sometimes the plural of these forms is to be traced to a secondary form, e.g. אִגֶּרֶת *a letter*, plur. אִגְּרוֹת (as if from אִגְּרָה); also יוֹנְקוֹת, which is merely formed on the analogy of the other plur. fem. of participles *Qal*, is to be referred to a sing. יוֹנֶקָה. Cf., moreover, מַחֲרֵשֶׁת *ploughshare*, plur. מַחֲרֵשׁוֹת (as if from מַחֲרֵשָׁה)[1]; on the other hand, כְּתָרוֹת *capitals* (of columns), and תּוֹכָחוֹת *reproofs*, are the regular plurals of כֹּתֶרֶת and תּוֹכַחַת.

[1] עַשְׁתֹּרֶת *Astarte* (plur. עַשְׁתָּרוֹת), which was formerly included among these examples, is most probably due to an intentional alteration of the

In בְּתֹנֶת *coat* the original *ŭ* of the first syllable is maintained by the *r* sharpening of the following consonant (cf. Arab. *qŭṭŭn*), with suff. בְּתָנְתִּי, the *constr. st.*, however, is כְּתֹנֶת (as also in the *absol. st.* in Ex 28^{39}); plur. כֻּתָּנוֹת, *constr.* כְּתָנוֹת.—The form גְּלֹגֶלֶת given in Paradigm III, *b* is a *Pŭlpŭl*-form of the stem גָּלַל, cf. קָרְקַר, § 84^{b} *p*.

4. To the fourth class, for which no Paradigm is required, belong all the *s* numerous forms which in classical Hebrew have unchangeable vowels throughout, the originally short vowel of the first syllable having become *Šᵉwâ*, owing to the tone being thrown forward. Of the forms mentioned in §§ 84 and 85 those from ע״ע stems especially belong to this class, as מְגִלָּה *scroll*, תְּהִלָּה *praise*, תְּפִלָּה *prayer* (§ 85 *i* and *q*), as well as the feminine of the participle *Hiph'il* of verbs ע״ע, e.g. מְאִירָה *enlightening* (from מֵאִיר), and generally the feminines of ע״ו stems which are compounded with the *preformative* מ, as מְנוּחָה *rest* (from מָנוֹחַ), see § 85 *l*; from ל״ה stems perhaps also תְּעָלָה *conduit* (*constr. st.* תְּעָלַת Is 7^{3}, &c.) and תְּלָאָה *travail*. Thus all these forms coincide externally with those which already, in the masculine form, have unchangeable vowels throughout (see the list of them in § 93 *ww*).

5. The feminine ending יֹת__ (apart from ל״ה-forms like בְּכִיָּת, § 94 *f*) arises *t* from the addition of the feminine ת to the ending יָ__, which is employed to form adjectives, &c., see § 86 *d*, *h*, and *k*. The ending וּת, mentioned there, is attached, in segholate forms, sometimes to the ground-form, as עַשְׁתּוּת Jb 12^{5} (v. l. עַשְׁתּוֹת), sometimes to forms with a loosely-closed syllable, as מַלְכוּת *kingdom*; from ל״ה stems we find forms sometimes like שִׁבְיוּת *captivity* (according to others from the stem שׁוּב, like לִוּוּת *perverseness* from לָוָה), sometimes like בְּכוּת *weeping*, גָּלוּת *exile*, חָזוּת *vision*; the latter retain the *ā* of the first syllable even in the *constr. st.* and before *suffixes*. From a *qăṭṭūl*-form is formed כְּבֵדוּת *heaviness*; from a *qāṭūl*-form פְּקֻדוּת, &c.

In the plural of these forms different methods of treatment may be distin- *u* guished. In some cases the whole ending וֹת is retained, as if belonging to the stem (cf. above, *f*), e.g. אַלְמְנוֹתַיִךְ from אַלְמָנוּת, in others this ending is resolved, as in מַלְכֵיוֹת Dn 8^{22} (no doubt for *mălᵉkhuwwôth*), and עֵדוֹת *ʿēdhᵉwôth*, from עֵדוּת *testimony*, but only with suffixes, עֵדֹתֶיךָ ψ 119^{14}, &c.; עֵדְוֹתָיו 1 K 2^{3}, &c.

§ 96. *Nouns of Peculiar Formation.*

In the following Paradigms,[1] pp. 282 to 284, a number of frequently used nouns are arranged, whose flexion presents more or less striking peculiarities. These peculiarities, however, are almost always subordinate to the usual phonetic laws, and the usual designation of the nouns as *irregular* is, therefore, not justified, when once the ground-forms are properly recognized on which the present forms are based.

---

original עַשְׁתֹּרֶת, like מֹלֶךְ Lv 18^{21}, &c. (for מָלֶךְ), with the vowels of בֹּשֶׁת *shame*, the latter word being substituted in reading for the name of the goddess.

[1] The only omissions from these Paradigms are אֶחָד, חָם, and חֲמוֹת (on which see the remarks), and all forms which are not found in the O. T.

Remarks.

אָב *father*; the *constr.* אֲבִי, like אֲחִי and בְּנִי (which occurs once), belongs to the connective forms discussed in § 90 *k*, which serve as the model for the *Ḥireq compaginis*. However, אַב also occurs in compound proper names, e.g. אַבְשָׁלוֹם, beside אֲבִישָׁלוֹם, &c.; also Gn 17[4 f.] אַב־הֲמוֹן for the purpose of explaining the name אב[ר]הם. On the plur. אָבוֹת see § 87 *p*.

אָח *brother*. The plur. *absol.* אַחִים has *Dageš forte implicitum* (§ 22 *c*); אָחָיו stands for אַחָיו according to the phonetic law stated in § 27 *q*, and so also אֶחָי in *pause* for אַחָי. The sharpening of the ח merely serves to keep the preceding *Pathaḥ* short, as in גַּמָּלִים, &c. (§ 93 *cc*).

אֶחָד *one* (for אַחַד, likewise with *Dageš forte implicitum*, § 22 *c*, cf. § 27 *q*), *constr.* and otherwise in close connexion, אַחַד, Gn 48[22], 2 S 17[22], Is 27[12],

Zc 11[7]; and especially before מִן (מֵ) Gn 3[22], Ex 3c[14], Nu 16[15], Ju 17[5], 1 S 9[8], Ez 18[10]; fem. אַחַת *una* (for אַחַדְתְּ, according to § 19 *d*), in *pause* אֶחָת. Once חַד masc. (by aphaeresis, § 19 *h*), Ez 33[30], as in Aramaic; plur. אֲחָדִים *some*, but also *iidem*.

אָחוֹת *sister*, from *'ăḥăwăt* or *'ăḥăyăt*, with elision of the ו or י, and with the *â*, which has arisen from *ăă*, obscured to *ô*.[1] In Nu 6[7] אֲחֹתוֹ stands for אֲחֹתָו (with virtual sharpening of the ח). The plur. *absol.* (אֲחָיוֹת) does not happen

[1] This explanation of אָחוֹת (and חָמוֹת q. v.) still seems to us more probable than the assumption that the fem. ending *ăth* is lengthened to compensate for the loss of the 3rd radical (so Wellhausen, *Skizzen*, vi. 258), or that the form is derived from *'aḥâ*, the old-semitic *constr. st.* of the accusative, with ת feminine (so Barth, *ZDMG.* 1899, p. 598).

to occur. In Ez 16[52] אַחְיוֹתֵךְ occurs (for אַחְיֹתַיִךְ). In the forms אֲחוֹתִי Jos 2[13] *Kᵉth.*, אֲחוֹתַיִךְ Ez 16[51.55.61] (to be read also in verse 45 for אֲחוֹתֵךְ, which has been erroneously assimilated to the singular occurring in vv. 48, 49, 56), and אֲחוֹתֵיכֶם Ho 2[3] (for which, however, read אֲחוֹתְכֶם), the third radical has been entirely lost.

אִישׁ *man*, according to the common opinion either incorrectly lengthened for אֶנֶשׁ (from *'iš*, with assimilation of the *Nūn* of the ground-form *'inš*, which again has been attenuated from *'anš* from the stem אָנַשׁ), or softened directly from *'inš*. It is, however, probable that a separate stem (אִישׁ *to be strong*?) is to be assumed for the singular[1]; consequently the stem אָנַשׁ *to be sociable*,

[1] So already Gesenius in his *Thes. linguae Hebr.*, i. 83 f., and recently again Friedr. Delitzsch, *Prolegg.*, p. 160 ff., Praetorius in Kuhn's *Orient. L.-B.*, 1884, p. 196; König, *Lehrgeb.*, ii. 38; while Nöldeke (*ZDMG.* 1886, p. 739 f.), against Delitzsch, would connect both אִישׁ and נָשִׁים with the stem אנשׁ.

would be connected only with the plur. אֲנָשִׁים (אִישִׁים is found only in Is 53[3], ψ 141[4], Pr 8[4]).

אָמָה *slave, handmaid*; with the plur. אֲמָהוֹת, with consonantal ה, cf. in Aram. אֲבָהָן *fathers*, and similarly in Phoen. דלהת from דלת, also Arab. *'abahât* (fathers), *'ummahât* (mothers), with an artificial expansion into a triliteral stem.

אִשָּׁה *woman*, probably for אִנְשָׁה; from אָנַשׁ i.e. not (as Aram. אִתְּתָא shows) אָנַשׁ *to be sociable* (see above, on אִישׁ) but אָנַשׁ *to be weak* (Arab. *'ânŭtâ*). So De Lagarde, *Uebersicht*, p. 68; König, *Lehrgeb.*, ii. 159 f. The form אֵשֶׁת (for *'išt*, with ת fem., from *'iš*, after rejection of the doubling and lengthening of the *i* to *ē*) occurs in Dt 21[11], 1 S 28[7], ψ 58[9], even in *absol. st.* [cf., however, below, § 130. 4, 5].—In ψ 128[3] אֶשְׁתְּךָ is found for אִשְׁתְּךָ. Instead of the plur. נָשִׁים, we find in Ez 23[44] אִשּׁוֹת.[1]

בַּיִת *house*, locative בַּיְתָה, הַבַּיְתָה, in *pause* בָּיְתָה, הַבָּיְתָה, *constr.* בֵּיתָה, plur. בָּתִּים (but in Dt 6[11], 1 Ch 28[11] בָּתִים without *Metheg*), pronounced *bâttim*. The explanation of the Dageš in the ת is still a matter of dispute. The Syriac *bâttîn*, however, shows that the *Dageš* is original, and belongs to the character of the form.[2] According to Wright, *Comparative Grammar*, p. 88, בָּתִּים is simply contracted from *bai-tîm* (as אַיִן from אַיְנָם, עֵינָם from עֵינַיִם, &c.), and the Dageš, therefore, is *lene*; König, *Lehrgeb.*, ii. 56, proposes the namo *Dageš forte orthoconsonanticum*; on the other hand Rahlfs, *ThLZ.* 1896, col. 587, suggests that the י is assimilated to the ת, while Philippi, *ZDMG.* xlix, p. 206, assumes for the plural a stem distinct from that of the singular. A definite solution is at present impossible. The incorrectness of the formerly common pronunciation *bottim* is sufficiently shown by the Babylonian punctuation (see § 8 *g*, note 3), which leaves no doubt as to the *â*.

בֵּן *son* (Gn 30[19] בֶּן־שִׁשִּׁי) *constr.* usually בֶּן־ (also with a conjunctive accent as an equivalent for *Maqqeph*, Gn 17[17], Is 8[2], &c., 1 Ch 9[21]; even with smaller disjunctives, especially in the combination מִבֶּן, Ex 30[14], Lv 27[3], &c. [מִבֶּן־ only after וְאִם and before חֹדֶשׁ, also in Is 51[12]; see Strack on Ex 30[14]]), rarely בְּנֵי־ (Dt 25[2], Jon 4[10] twice, Pr 30[1], and so always in the combination בְּנֵי־נוּן, and in the proper names בְּנֵי־יָמִין [but בֶּן־יְמִינִי *Benjamite*] and בְּנֵי־יַעֲקָה Pr 30[1]), once בְּנִי (cf. § 90 *l*) Gn 49[11], and בְּנוֹ (§ 90 *o*) Nu 23[18], 24[3.15].—In Gn 49[22] בֵּן, for which בֶּן־ ought to be read, is intended by the Masora for the *absol. st.*, not the *constr.*

---

[1] Friedr. Delitzsch (in his Babylonian glosses to Baer's text of Ezekiel, p. xi) on Ez 23[44] remarks that in Assyro-Babylonian the plur. of *aššatu* (woman) is *aššâti*, corresponding, therefore, to אִשּׁוֹת, not to the ordinary plur. נָשִׁים. The *a* of נָשִׁים (instead of *i* as in Arab. or *e* as in Syr.) is to be explained with Barth (*Orient. Studien zu Ehren Th. Nöldekes*, Giessen, 1906, p. 792) from the natural connexion of the ideas '*men*' and '*women*', נָשִׁים and אֲנָשִׁים.

[2] This disposes of the traditional view that the *Dageš* (after a firm Metheg, see § 16 *fζ*) only serves to distinguish it from בָּתִּים *passing the night*, ptcp. Qal of בּוּת, a stem which never occurs in the O. T. According to P. Haupt the stem is בא *to go in*, ת therefore being the feminine termination, as in *bint daughter*, and the original form *ba'tu*, *bâtu* (*entrance*) is preserved in the plural *bâttim* where the *tt* is to be explained as due to the analogy of trisyllabic stems. In the singular *bât* passed into *bêt* (?), and this was resolved into *bait*, as *Y[e]rûšâlêm* into *Y[e]rûšâlayim*.

בַּת *daughter* (from *bant*, and this again, according to the law stated in § 69 *c*, for *bint*, fem. of בֵּן), with suff. בִּתִּי for בִּנְתִּי. Plur. בָּנוֹת, from the sing. בָּנָה, comp. בָּנִים *sons*.

חָם *husband's father*, only with suff. חָמִיהָ, חָמִיךָ; and חָמוֹת *husband's mother*, only with suff. חֲמוֹתָהּ, חֲמוֹתֵךְ. Cf. אָב, אָח, and especially אֲחוֹת.

יוֹם *day* (Arab. *yaum*),[1] dual יוֹמַיִם; the plur. יָמִים is probably from a different sing. (יָם *yām*), *constr.* יְמֵי and (poetically) יְמוֹת, Dt 32[7], ψ 90[15].

כְּלִי *vessel*, in *pause* כֶּלִי (with suff. כֶּלְיֵךְ Dt 23[25]) from כָּלָה *to contain*, plur. כֵּלִים (as if from כֵּל, כֶּלָה; according to König, ii. 63, shortened from *kilyim*).

מַיִם *water*; on the plur. cf. § 88 *d*.

עִיר *city*. The plur. עָרִים is scarcely syncopated from עֲיָרִים, as it is pointed in Ju 10[4] (no doubt erroneously, in imitation of the preceding עֲיָרִים *ass colts*), but from a kindred sing. עָר, which still occurs in proper names.

פֶּה *mouth*, *constr. st.* פִּי (for original פִּי = פֶּה?). Its origin is still disputed. According to Gesenius and König (ii. 103), פֶּה stands for פֵּאָה (ground-form *pi'ay*) from פָּאָה *to breathe, to blow*; according to Olshausen, for פַּי, from a stem פָּיָה or פָּוָה. But parallel with the Hebrew פֶּה are Assyr. *pû*, Arab. *fû*, *fam*, *famm*, *fumm*, bibl. Aram. פֻּם, פֻּמָּא, Syr. *pûm*, *pûmā*, so that Barth, *ZDMG.* xli, p. 634, assumes two forms of development from the same stem (פמו), viz. *fm* and *fw*. פִּי *my mouth*, from *pi-y*; for פִּיהֶם we find in ψ 17[10], 58[7], 59[13] פִּימוֹ. The supposed plur. פִּים 1 S 13[21] is generally explained as a contraction from פְּעִים, but the text is altogether corrupt. The plur. פִּיּוֹת, for the *edges* of a sword, occurs in Pr 5[4]; reduplicated פִּפִיּוֹת Is 41[15], ψ 149[6].

רֹאשׁ *head* (obscured from רָאשׁ = *rā'š*); plur. רָאשִׁים (for רְאָשִׁים, § 23 *c*); רֹאשָׁיו only in Is 15[2].

שֶׂה *a head of small cattle* (*sheep* or *goat*), *constr. st.* שֵׂה, with suff. שֵׂיוֹ 1 S 14[34] and שֵׂיו Dt 22[1], according to König, ii. 131, from a ground-form *si'ay*, but according to De Lagarde, *Uebersicht*, 81 f., from a stem ושי (שֶׂה = *say* = *wīsay*).

שֵׁם *name*, *constr.* generally שֵׁם (only six times שֶׁם־); cf. בֵּן.

שָׁמַיִם *heaven* (§ 88 *d*).

§ 97. *Numerals.* (*a*) *Cardinal Numbers.*

Brockelmann, *Sem. Sprachwiss.*, p. 116 ff.; *Grundriss*, i. 484 ff.

a **1.** The formation of the cardinal numbers from 3 to 10 (on 1 and 2 see below) has this peculiarity, that numerals connected with a mascu-

[1] Cf. Nöldeke, *Beiträge*, p. 58, *yaum*, probably an extension of a biliteral word which has survived in יְמִי, יְמֵי. Barth, however, *Orient. Studien*, p. 791 (see above on אִשָּׁה), sees in יְמֵי, יְמִים, יְמוֹת new formations in Hebrew, caused by the naturally close connexion and association of these plurals with שְׁנֵי, שְׁנַיִם, שָׁנוֹת *years*, to which they became assimilated in form. The view that יוֹם is merely an incorrect obscuring of יָם, and therefore distinct from the Arab. *yaum*, is contradicted by the invariable spelling יוֹם, &c., notwithstanding the spelling וביֹם (= וּבְיֹם?) in the Siloam inscription, line 3 (cf. § 7 *f*), and מִיֹּמִים Ho 6[2]. Cf. also the note on § 100 *g*.

line substantive take the feminine form, and those with a feminine substantive take the masculine form. The common explanation of this strange phenomenon used to be that the primary form of the numeral was an abstract noun in the feminine (cf. § 122 *p*). This was originally attached in the *constr. st.* to the word qualified, then came to be also used in apposition to it, and finally was placed after it like an adjective. The consequence of the appositional, and finally adjectival, construction was, that for numerals connected with feminine nouns a special shorter form came to be used, whilst the original forms, with the abstract feminine ending, were used in connexion with masculine nouns, after as well as before them.

On this view the historical process would have been that originally the abstract numerals (like Latin *trias, decas*, Greek *πεντάς, δεκάς*, &c.) were placed in the *constr. st.* before masculines and feminines alike, e. g. שְׁלֹשֶׁת בָּנִים *trias filiorum*, עֲשֶׂרֶת נָשִׁים *decas mulierum*. A trace of this earlier usage was seen in the examples mentioned under *c*, like שְׁלֹשֶׁת נָשִׁים.—Further, it was possible to say בָּנִים שְׁלֹשָׁה *trias*, sc. *filii*, as well as שְׁלֹשָׁה בָּנִים *filii, trias*. From this second appositional construction it was only a step to the treatment of the abstract numeral as an adjective, *filii tres*. Similarly the subsequently shortened forms of the abstract numeral, which were used in connexion with feminines, might stand either in the *constr. st.* before, or in apposition before or after the word numbered, thus שְׁלֹשׁ בָּנוֹת *trias filiarum*, or שָׁלֹשׁ בָּנוֹת *trias*, sc. *filiae*, or בָּנוֹת שָׁלֹשׁ *filiae, trias*, or adjectivally *filiae tres*.

A different and much more intelligible explanation of the striking disagreement between the gender of the numeral and that of the word numbered has recently been given by Reckendorf, *Die syntaktischen Verhältnisse des Arabischen*, pt. ii, Leiden, 1898, p. 265 ff. He also considers that the earliest forms were abstract numerals which were placed in the *constr. st.* before the noun numbered, the latter depending on them in the genitive. The original form, however, of the abstract numerals from 3 to 9 is not the feminine, but the masculine, used for both genders, as it still is in the tens, 20, 30, &c. The feminine abstract numeral was first distinguished by a special form in the numbers from 13 to 19 (see further, below) when connected with masculines, and this distinction was afterwards extended to the numbers from 3 to 10. This explanation does not affect the view stated above that the appositional and adjectival use of the abstract numerals was only adopted later in addition to their use in the genitive construction.

The differentiation of the numerals (originally of common gender) into masculine and feminine forms in the second decade, was occasioned, according to Reckendorf, by the use of the abstract feminine עֶשְׂרֵה in compounds.

So long as it was felt that שְׁלֹשׁ עֶשְׂרֵה simply meant *the three of the decade*, the gender of the noun numbered made no difference. When, however, the consciousness of this meaning became weakened and the combination of units and tens came to be felt as a copulative rather than a genitive relation, it seemed suitable to connect only feminine nouns with the feminine form עֶשְׂרֵה. New forms were therefore invented, both of the units and the tens, for use with masculine nouns. The former, however, no longer had the form of the *constr.* but of the absolute state, clearly showing that the consciousness of the original syntactical relation in שְׁלֹשׁ עֶשְׂרֵה, &c., was lost. On the other hand, after the extension of these new formations to the first decade, the new feminine forms readily came to be used also in the genitive construction (and therefore in the *constr. st.*) on the analogy of the earlier masculine forms.

Of the first two numerals, אֶחָד *one*, with its fem. אַחַת (see § 96), may be recognized, from its form and use, as an adjective, although even so it admits of such combinations as אַחַד הֶהָרִים *unus e montibus*. The numeral two, as would be expected, appears as an abstract in the *dual*, but, like the other numerals, can also stand in apposition to the noun numbered. In form it always agrees with the gender of its noun. Accordingly, the numerals from 1 to 10 are as follows:

b

	With the Masculine.		*With the Feminine.*	
	Absol.	*Constr.*	*Absol.*	*Constr.*
1.	אֶחָד	אַחַד	אַחַת	אַחַת
2.	שְׁנַיִם	שְׁנֵי	שְׁתַּיִם [1]	שְׁתֵּי
3.	שְׁלֹשָׁה	שְׁלֹשֶׁת	שָׁלֹשׁ	שְׁלֹשׁ
4.	אַרְבָּעָה	אַרְבַּעַת	אַרְבַּע	אַרְבַּע
5.	חֲמִשָּׁה [2]	חֲמֵשֶׁת	חָמֵשׁ	חֲמֵשׁ
6	שִׁשָּׁה	שֵׁשֶׁת	שֵׁשׁ	שֵׁשׁ
7.	שִׁבְעָה	שִׁבְעַת	שֶׁבַע	[שִׁבְעַ] [3]
8.	שְׁמֹנָה	שְׁמֹנַת	שְׁמֹנֶה	שְׁמֹנֶה
9.	תִּשְׁעָה	תִּשְׁעַת	תֵּשַׁע	[תִּשְׁעַ] [3]
10.	עֲשָׂרָה	עֲשֶׂרֶת	עֶשֶׂר	עֶשֶׂר

[1] Shortened from שְׁנָתַיִם, which would be the regular feminine form of שְׁנַיִם. Nevertheless, the *Dageš* in שְׁתַּיִם, &c. (even after מִן; מִשְׁתֵּי Jon 4^{11}; cf., however, מִשְׁתֵּי Ju 16^{28}), can by no means be regarded as a *Dageš forte* arising from assimilation of the *Nûn*, for in that case the word could only be שְׁתַּיִם (cf. Arab. *ṯintāni*). This form does occur in the Codex Babylonicus of A.D. 916, but it is only a later correction for שְׁתַּיִם, while in the Berlin MS. or. qu. 680 described by Kahle (Lpz. 1902) there is no trace of the Dageš. It is rather to be read *štáyim*, *štê* (with *Dageš lene*), cf. אִשְׁתַּיִם, representing the later Palestinian pronunciation (Philippi, *ZDMG.* xlix, p. 206), and Arab. *'iṯnătāni* (with a kind of prosthetic א; cf. § 19 *m*), as a further feminine form of

On the connective forms שִׁבְעַ, תִּשַׁע, cf. the analogous forms in § 93 *h*.

The other Semitic languages also exhibit the same peculiarity in the external differentiation of the numerals from 3 to 10 as regards gender. The fem. form of the numeral abstracts is only rarely found in connexion with feminine nouns,[4] e. g. שְׁלֹשֶׁת נָשִׁים Gn 7^{13}, 1 S 10^{3}, Jb 1^{4}, Ez 7^{2} *Keth.*; probably also Jos 17^{11}, where we should read with Dillmann שְׁ֯ הַנָּפוֹת. In apposition, Zc 3^{9}, 4^{2}, cf. Jer 36^{23}. From what was said above, under *a*, it follows that these cases are not a return to original usage, but only an intrusion of the form used before masculines into the sphere of the feminine. Conversely in Gn 38^{24} שְׁלֹשׁ חֳדָשִׁים (but in the Samaritan שְׁלֹשֶׁת).—For שִׁבְעָה *seven*, there occurs in Jb 42^{13} the strange form שִׁבְעָנָה, according to Ewald [*Ausführl. Lehrb.*[8], § 269 *b*] an old feminine substantive (German *ein Siebend, a set of seven*), but more probably a scribal error.

c **2.** The numerals from 11 to 19 are formed by placing the units, *d* without the *copula*, before the number ten (in the form עֶשְׂרֵה masc., עֶשְׂרֵה fem.), but without the two words being joined into one. As was said above, under *a*, and as is proved by the use of אַחַת, אַחַד in the numeral 11, the feminine numerals from 13 to 19 are to be regarded as *construct* forms in a genitive connexion. The connective forms of the masculine abstracts, like שְׁלֹשֶׁת, &c., are not admitted in combination with עֶשְׂרֵה, since they are merely in apposition, and not in a genitive relation (see the rare exceptions at the end of *e*). On the other hand שְׁנֵי and שְׁתֵּי in the numeral 12 are undoubtedly true *constructs*, like אַחַד and the fem. numerals 13–19. But instead of שְׁנֵי (Ex 28^{21}, Jos 3^{12} and four other places) and שְׁתֵּי (Jos 4^{8} and three times in Ezek.), we generally find שְׁנַיִם and שְׁתַּיִם. Two explanations have been given of these forms: (1) that the *Kethîbh* really intends שְׁנַיִם, שְׁתַּיִם, in the *absol. st.*, which was first introduced in the case of שְׁנַיִם, on the analogy of עֶשְׂרֵה, &c., and then extended to שְׁתַּיִם; the Masora, however, required שְׁנֵי, שְׁתֵּי (but see below), and therefore pointed שְׁנַיִם, שְׁתַּיִם as a *Qerê perpetuum* (see § 17).—(2) that the *absolute* forms שְׁנַיִם, שְׁתַּיִם (introduced on the analogy of שְׁלֹשָׁה, &c.) were contracted to שְׁנֵים, שְׁתֵּים to facilitate the pronunciation of the duals when closely

---

'iṯnāni, duo. According to Barth (*Orient. Studien ... Th. Nöldeke*, ii. 792 f.) the irregularity of שְׁתַּיִם (he takes the Dageš as *Dageš forte*) is due to the complete assimilation of its vowels to those of the masc. שְׁנַיִם where the *Šᵉwâ mobile* is normal.

[2] With Dageš probably on the analogy of שִׁשָּׁה, as שֵׁשֶׁת on the analogy of חֲמֶשֶׁת. Cf. also J. K. Blake on חֲמִשָּׁה, חֲמִשִּׁים in *JAOS.* 1905, p. 117 ff.

[3] שִׁבַּע and תִּשַׁע appear only as connective forms before עֶשְׂרֵה and מֵאוֹת.

[4] In the vulgar dialects of Arabic, and in Ethiopic, the feminine form of the numeral is by far the more common. This form appears also in Hebrew, when the number is regarded in the abstract, as in the multiplicatives (see § 97 *h*).

connected with עָשָׂר and עֶשְׂרֵה, and that the contraction is founded on an early and correct tradition. The second explanation is supported by the large number of examples of שנים (66) and שתים (34). It would be strange if the Masora required the alteration of the far commoner forms on account of isolated instances of שְׁנֵי and שְׁתֵּי. As a matter of fact even in regard to the latter forms the tradition often varies between שְׁנֵי and שְׁנַיִם, &c., cf. e. g. Ginsburg on Jos 3^{12}. We cannot therefore assume a *Qᵉrê perpetuum*.

e Accordingly the numbers from 11 upwards are—

	Masculine.	*Feminine.*
11.	אַחַד עָשָׂר	אַחַת עֶשְׂרֵה
	עַשְׁתֵּי[1] עָשָׂר	עַשְׁתֵּי עֶשְׂרֵה
12.	שְׁנֵים עָשָׂר	שְׁתֵּים עֶשְׂרֵה
	שְׁנֵי עָשָׂר	שְׁתֵּי עֶשְׂרֵה
13.	שְׁלֹשָׁה עָשָׂר	שְׁלֹשׁ עֶשְׂרֵה

&c., on the analogy of the last. These numerals regularly have only the above form. In regard to their syntax, cf. § 134 *f*.

Very rarely the units appear in the *masc.* in the *constr. st.*, as חֲמֵשֶׁת עָשָׂר *fifteen*, Ju 8^{10}, 2 S 19^{18}; שְׁמֹנַת עָשָׂר *eighteen*, Ju 20^{25}.—Connected by וְ we find עֶשְׂרָה וַחֲמִשָּׁה in Ex 45^{12}.

f 3. The tens from 30 to 90 are expressed by the plural forms of the units (so that the plural here always stands for *ten times* the unit), thus, שְׁלֹשִׁים 30, אַרְבָּעִים 40, חֲמִשִּׁים 50, שִׁשִּׁים 60, שִׁבְעִים 70, שְׁמֹנִים 80, תִּשְׁעִים 90. But *twenty* is expressed by עֶשְׂרִים, plur. of עֶשֶׂר *ten*.[2] These numerals are all of common gender, and do not admit of the *construct state*.—In compound numerals, like 22, 23, 44, &c., the units

---

[1] עַשְׁתֵּי, which remained for a long time unexplained, was recognized (first by J. Oppert) in the Assyro-Babylonian inscriptions in the form *ištin* or *ištên*; cf. Friedr. Delitzsch, *Assyrische Grammatik*, p. 203, and P. Haupt, in the *American Journal of Philology*, viii. 279. Accordingly, עַשְׁתֵּי עָשָׂר is a compound, like the Sansk. *êkâdaçan*, ἕνδεκα, *undecim* (analogous to the combination of units and tens in the numerals from 12 to 19), and is used at the same time in the composition of the feminine numeral eleven. On the gradual substitution of עַשְׁתֵּי ע׳ for אַחַת ע׳ and אַחַד ע׳ see Giesebrecht in *ZAW.* 1881, p. 226; עַשְׁתֵּי ע׳ occurs only in Jer., Ez., in the prologue to Deuteronomy (1^3), in the Priestly Code, and in passages undoubtedly post-exilic, so that it may very well be a loan-word from the Babylonian.

[2] For עֶשְׂרִים, שִׁבְעִים, תִּשְׁעִים (from the *segholates* עֶשֶׂר, שֶׁבַע, תֵּשַׁע), we should expect *ʿᵃsārîm*, *šᵉbhāʿîm*, *tᵉšāʿîm*. Is this very unusual deviation from the common formation (see above, § 93 *l*, *o*, *r*) connected with the special meaning of these plurals, or are these survivals of an older form of the plural of segholates?

may precede (*two and twenty*, as in Arabic and English), e.g. Nu 3^{39}, 26^{14}. Very frequently, however, the reverse order is found (*twenty and two*, as in Syriac, cf. French and English *twenty-two*), e.g. 1 Ch 12^{28}, 18^{5}.[1] In all cases the units and tens are connected by the *copula*, ordinarily וְ, but וָ before numerals with the tone on the penultima, וֵ before ־, וְ before *Šᵉwâ*; see § 104 *d*, *e*, *g*.

The remaining numerals are the substantives— *g*

100 מֵאָה fem., *constr.* מְאַת.

200 מָאתַיִם dual (contracted from מְאָתַיִם; cf. § 23 *c*).

300 שְׁלֹשׁ מֵאוֹת plur. (but in 2 K $11^{4.9.10.15}$, *Kᵉth.* הַמְּאָיוֹת).

1000 אֶלֶף masc.

2000 אַלְפַּיִם dual.

3000 שְׁלֹשֶׁת אֲלָפִים plur., and so on (except עֲשָׂרָה אֲלָפִים in 2 S 18^{3}, 2 K 24^{14} *Kᵉth.*; elsewhere always עֲשֶׂרֶת אֲלָפִים).

10000 רְבָבָה, in the later books the aramaising[2] forms רִבּוֹ, רִבּוֹא, רִבּוֹת (properly *multitude*, cf. *μυριάς*).

20000 רִבְּתַיִם dual (see below, *h*); but שְׁתֵּי רִבּוֹת Neh 7^{70} (also שְׁתֵּי רִבּוֹא Neh 7^{71}).

40000 אַרְבַּע רִבּוֹא Neh 7^{66}.

60000 שִׁשׁ־רִבְאוֹת Ezr 2^{69} (Baer and Ginsburg רִבְאוֹת, as in Dn 11^{12}). אַלְפֵי רְבָבָה *thousands of myriads*, Gn 24^{60}.

Rem. 1. The dual form which occurs in some of the units has the meaning *h* of our ending *-fold*, e.g. אַרְבָּעְתַּיִם *fourfold*, 2 S 12^{6}; שִׁבְעָתַיִם *sevenfold*, Gn $4^{15.24}$, Is 30^{26}, ψ 12^{7}, 79^{12} (cf. § 134 *r*). The dual רִבְּתַיִם ψ 68^{18} (explained by אַלְפֵי שְׁנָאן *thousands of duplication*) is not meant to be taken in the sense of *two myriads* or *twice the number of myriads*, but in a multiplicative sense.[3]—Besides the plural which denotes the tens, there are also the plurals אֲחָדִים *some*, also *iidem*, and עֶשְׂרוֹת *decades* (not *decem*) Ex $18^{21.25}$.

2. The *suffixes* to numerals are, as with other nouns, properly genitives, *i* although they are translated in English as nominatives, e.g. שְׁלִשְׁתָּם *your triad*, i.e. *you three*, Nu 12^{4}; חֲמִשָּׁיו *his fifty* (i.e. the 50 belonging to him) 2 K 1^{9-13}, and חֲמִשִּׁיךְ 2 K $1^{10.12}$.

---

[1] According to the conclusions of König (*De Criticae Sacrae Argumento*, p. 61, and *Lehrgeb.*, ii. p. 215 ff.), the smaller number more commonly precedes in Ezek. and the Priestly Code, but the larger always elsewhere. S. Herner (*Syntax der Zahlwörter im A. T.*, Lund, 1893, p. 71 ff.) arrives at the same conclusion by a full examination of the statistics; cf. also his remarks on König in *ZAW.* 1896, p. 123, and König's reply, *ibid.*, p. 328 f.

[2] Cf. Kautzsch, *Die Aramaismen im A.T.* (Halle, 1902), p. 79 f.

[3] Cf. D. H. Müller, 'Die numeralia multiplicativa in den Amarnatafeln u. im Hebr.,' *Semitica*, i, Wien, 1906, p. 13 ff.

§ 98. *Numerals.* (*b*) *Ordinal Numbers.*

a The ordinal numbers from 2 to 10 are formed from the corresponding cardinals by adding the termination ־ִי (§ 86 *h*), before which another ־ִי also is generally inserted between the second and third radicals. They are as follows: שֵׁנִי *second*, שְׁלִישִׁי, רְבִיעִי (like אַרְבַּע, רֹבַע, רִבְּעִים, without the prosthetic א, which appears in אַרְבַּע, &c.), חֲמִישִׁי or חֻמְשִׁי (which, according to Strack, is always to be read for חֲמִשִׁי), שִׁשִּׁי, שְׁבִיעִי, שְׁמִינִי, תְּשִׁיעִי, עֲשִׂירִי. The ordinal *first* is expressed by רִאשׁוֹן (cf. § 27 *w*), from רֹאשׁ *head, beginning*, with the termination וֹן (§ 86 *f*). On the use of אֶחָד as an ordinal in numbering the days of the month, cf. § 134 *p*; in such cases as Gn 1^5, 2^{11}, the meaning of *first* is derived solely from the context.

b The feminine forms have the termination ־ִית, more rarely (and only in the case of 3 and 10) ־ִיָּה. They are employed also to express fractions, e. g. חֲמִשִׁית *fifth* or *fifth part*, עֲשִׂירִית and עֲשִׂירִיָּה *tenth part*. Side by side with these, in the same sense, there are also forms like רֹבַע and רֶבַע *a quarter*, חֹמֶשׁ *a fifth part*, and with the afformative וֹן, עִשָּׂרוֹן (plur. עֶשְׂרוֹנִים) *a tenth part*; these are to be regarded as abstracts, and are denominatives from the cardinal numbers. Cf. finally שָׁבוּעַ ἑβδομάς, *a week*; עֲשׂוֹר *a decade* (of days), and also the *tenth day*.

On the expression of the other relations of number, for which the Hebrew has no special forms, see the Syntax, § 134 *q* and *r*.

CHAPTER IV

THE PARTICLES

§ 99. *General View.*

Brockelmann, *Grundriss*, i. 492 f.

a **1.** The particles, which in general express the secondary modifications of thought in speech, the closer relation of words to one another, and the mutual connexion of sentences, are for the most part either borrowed or derived from noun-forms, sometimes also from pronouns and verbs (§ 30 *s*). *Primitive* particles (apart from a few demonstrative forms, see § 100 *i*) can only be so called in the sense defined in § 81 f.

b **2.** So far as the origin of the particles can be discovered with certainty, they are either (1) *borrowed* from other parts of speech; i. e. certain forms of the noun, pronoun, or verb, with more or less loss of their original meaning, have come to be employed as particles; cf. in the Indo-Germanic languages, e. g. the Latin *certo, falso, partim, verum, causa*, the German *statt, anstatt, wegen, weg*, and the English *instead, away*; or (2) *derived* from other parts of speech, either (*a*) by the *addition* of formative syllables, as יוֹמָם *by day*, from יוֹם (cf., however, § 100 *g*); or most commonly (*b*) by *abbreviations* effected in various ways, the extent of their mutilation being in proportion to the frequency of their use, so that in some cases (see below) the original stem has become wholly unrecognizable.

Cf. in German *gen*, from *gegen*, *Gegend*; *seit*, from *Seite*; *weil* (originally a particle of time, like our *while*), from *Weile*.

Still more violent abbreviations occur in Greek, Latin, and the Romance languages, e. g. *ἀπό, ab, a*; *ἐξ, ex, e*; *ad*, Fr. *à*; *aut*, Fr. *ou*, Ital. *o*; *super*, Ital. *su*.[1]

c The greatest shortening occurs in those particles which have entirely lost the character of an independent word, by being reduced to a single consonant with its vowel (generally short) or *Še-wâ*. According to the laws of syllable formation in Hebrew (§ 26 *m*),

[1] Even short phrases are contracted into one word: Lat. *forsitan*, from *fors sit an*, δηλονότι, δηλαδή, Fr. *peut-être*, Eng. *pritheè* from *I pray thee*. — In Chinese most of the particles are verbs or nouns; e. g. *iù* (to give), also the sign of the dative; *ì* (to make use of), *to, for*; *nëi* (the interior), *in*.

such particles cannot stand by themselves, but are united, as prefixes, with the following word (§ 102), very much like the preformatives of the imperfect (§ 47 *a–d*).

d The view that this shortening of whole words to single letters has actually taken place in the gradual course of linguistic development is rendered highly probable by the fact that similar abbreviations in later Hebrew and in Aramaic, i.e. as the development of the original Semitic speech progresses, become more and more striking and frequent. Thus the Biblical Aramaic דִּי becomes at a later period דְ; in modern Arabic, e.g. *hallaq* (now) is from *halwaqt*; *lēš* (why?) from *li-ayyi-šaiʾn*, &c. Cf. also the analogous cases mentioned above from the Western languages. Nevertheless, the use of the simplest particles is found already in the earliest periods of the Hebrew language, or, at any rate, in the earliest documents which have come down to us.

e 3. Less frequently particles are formed by *composition*; as מַדּוּעַ *wherefore?* for מַה־יָּדוּעַ *quid edoctus?* (*τί μαθών;*) or *quid cognitum?*; בִּלְעֲדֵי (from בַּל and עֲדֵי) *besides*; מִלְמַעְלָה (from מִן, לְ, מַעְלָה) *from above, above.*

More frequent is the combination of two words into one without contraction, e.g. אַחֲרֵי־כֵן, אַף־כִּי, כִּי־אִם, כִּי־עַל־כֵּן; cf. also the compounds of אֵי with demonstrative pronouns, as אֵי־מִזֶּה *from what?*; אֵי לָזֹאת *wherefore?* [R.V. *how*]. See the lexicon under אֵי.

§ 100. *Adverbs.*

On demonstrative adverbs cf. Brockelmann, *Grundriss*, i. 323; on interrogative adverbs, *ibid.*, i. 328; on adverbs in general, i. 492 ff.

a 1. The negative לֹא *not*, and a few particles of place and time, as שָׁם *there*, are of obscure origin.

b 2. Forms of other parts of speech, which are used adverbially without further change, are—

(*a*) Substantives with prepositions, e.g. בִּמְאֹד (with might) *very*; לְבַד *alone* (prop. *in separation*, Fr. *à part*), with suffix לְבַדִּי *I alone*; מִבַּיִת *from within, within*; cf. also בְּאֶחָד (as one) *together*, לְעֻמַּת and מִלְּעֻמַּת (originally *in connexion with*) *near to, corresponding to, like*, &c., cf. § 161 *b*.

c (*b*) Substantives in the accusative (the adverbial case of the Semites, § 118 *m*), cf. *τὴν ἀρχήν*, *δωρεάν*, e.g. מְאֹד (might) *very*, אֶפֶס (cessation) *no more*, הַיּוֹם (the day) *to-day* (cf. § 126 *b*), מָחָר[1] *to-morrow*, יַחַד (union) *together*. Several of these continued to be used, though rarely, as substantives, e.g. סָבִיב, plur. סְבִיבִים and סְבִיבוֹת, *circuit*, as adverb

[1] Generally derived from the *ptcp. Pu'al* מְאֻחָר *mᵉʾŏḥār* (=*mᵉʿŏḥār*) and hence to be read *mŏḥār* (cf. מְחָרַת *morning*); but according to P. Haupt (notes to Esther, p. 159) from יוֹם אַחַר.

circum, around; others have quite ceased to be so used, e.g. קֶבֶר (length) *long ago* [Aram.: only in Ec.]; עוֹד (repetition, duration) *again* or *further*.

d (*c*) Adjectives, especially in the feminine (corresponding to the Indo-Germanic neuter), e.g. רִאשׁוֹנָה *primum, formerly* (more frequently לָרִאשׁוֹנָה, בָּרִאשׁוֹנָה, also רִאשׁוֹנָה); רַבָּה and רַבַּת [both rare] *multum, much, enough*; נִפְלָאוֹת *wonderfully* (properly *mirabilibus*, sc. *modis*), יְהוּדִית *Jewish*, i. e. in the Jewish language.

e (*d*) Verbs in the infinitive absolute, especially in *Hiph'il*, which are likewise to be regarded as accusatives (§ 113 *h*), e. g. הַרְבֵּה (prop. *a multiplying*) *much* [frequent], לְהַרְבֵּה [rare and late] *in multitude*; הַשְׁכֵּם (*mane faciendo*) *early*; הַעֲרֵב (*vespere faciendo*) *in the evening*.

f (*e*) Pronouns and numerals, e. g. זֶה (prop. *there=at this place*) *here*, הֲנָה *here, hither* (also of time, עַד־הֲנָה *till now*, cf. the late and rare עֲדֶן and עַד־הֵן=עֲדֶנָה); אַחַת, שְׁתַּיִם, שֶׁבַע, מֵאָה *once, twice, seven times, a hundred times*; שֵׁנִית *for the second time*.

g 3. Some adverbs are formed by the addition of formative syllables (most frequently ם_̣) to substantives or adjectives, e. g. אֱמֶת and אֱמֶתְם *truly* (from אֹמֶן *truth*); חִנָּם (by favour) *gratis* (from חֵן *gratia*); רֵיקָם *in vain, frustra*, but also *empty* (from רִיק *empty, emptiness, vanum*), Ru 1[21], parallel with the *fem.* מְלֵאָה *full*; יוֹמָם *by day* (from יוֹם)[1]; with *ô* in the last syllable, פִּתְאֹם, for פִּתְעֹם, *in a twinkling, suddenly* (from פֶּתַע *a twinkling*, the *ô* being probably obscured from an original *â*).[2]—Moreover, cf. אֲחֹרַנִּית *backward*, and קְדֹרַנִּית *darkly attired*, Mal 3[14]. In both these cases, the formative syllable *an* has been first attached to the stem, and then the feminine ending *îth*, which is elsewhere used to form adverbs, has been added to it.

h The termination ם_̣ occurs also in the formation of substantives, e.g. אוּלָם *porch*, and hence the above adverbs may equally well be regarded as nouns used adverbially, so that ם_̣, ם_ֹ_, would correspond to ן_̣, וֹן (§ 85, Nos. 53, 54), cf. בְּפִתְאֹם (with prep.) *suddenly*, 2 Ch 29[36]. According to others, this *am* is an obsolete accusative ending, to be compared with the indeterminate accusative sing. in *ăn* in Arabic.

---

[1] Is this ם_̣ an instance of the locative or temporal termination (cf. especially צָהֳרַיִם) mentioned in § 88 *c*? Nöldeke, *ZDMG.* xl. p. 721, considers יוֹמָם a secondary substantival form (used adverbially like לַיְלָה *noctu*), corresponding to the Phoenician and Aramaic יממ, Syr. *'imāmā*; cf. on the other hand, König, ii. 255, who follows Olshausen in maintaining that the *ām* is an adverbial termination.

[2] דּוֹמָם *silent* (an adjective in Is 47[5], La 3[26]; a substantive in Hb 2[19]), which was formerly included under this head, is better taken, with Barth (*Nominalbildung*, p. 352, Rem. 2), as a participle formed like שׁוֹבָב, עוֹלָל, so that דּוֹמָם (perhaps assimilated to דּוֹמָה) stands for original דּוֹמֵם.

i 4. A number of forms standing in very close relation to the demonstrative pronoun may be regarded as primitive adverbs, since they arise directly from a combination of demonstrative sounds. Some of these have subsequently suffered great mutilation, the extent of which, however, can now very rarely be ascertained with certainty. Such are e.g. אָז *then*, הֵנָּה *here* (according to Barth, *Sprachwiss. Abhandlungen*, p. 16, formed from the two demonstrative elements *hin* and *na*), כֹּה, כָּכָה *thus* (cf. אֵיכָה, אֵיכָכָה *how?*), אַךְ *only*, אָכֵן *truly* (on all these adverbs, see the Lexicon), and especially the interrogative הַ (*Hē interrogativum*), e.g. הֲלֹא (Dt 3^{11} הֲלָה) *nonne?*, הֲגַם *num etiam?* This *Hē interrogativum* is perhaps shortened from הַל, which is still used in Arabic, and, according to the view of a certain school of Masoretes, occurs also in Hebrew in Dt 32^{6}.[1]

k The ה interrogative takes—(1) *Ḥaṭeph-Pathaḥ* generally before non-gutturals (even before ר), with a firm vowel, e.g. הֲשַׂמְתָּ *hast thou set?* see the interrogative clause, § 150 *c* (הֲיִיטַב Lv 10^{19} is an exception).

l (2) Before a consonant with *Šᵉwâ*, usually *Pathaḥ* without a following *Dageš forte*, e.g. הֲבֵרַכְתָּ Gn 27^{38}, cf. 18^{17}, 29^{5}, 30^{15}, 34^{31}; less frequently (in about ten passages), *Pathaḥ* with a following *Dageš forte*, e.g. הַבְּרֶרֶךְ *num in via*, Ez 20^{30}, הַלְּבָנוֹן Gn 17^{17}, 18^{21}, 37^{32}, Nu 13^{19}, Jb 23^{6}; even in ר, 1 S 10^{24}, 17^{25}, 2 K 6^{32}.

m (3) Before gutturals, not pointed with either *Qameṣ* or *Ḥaṭeph-Qameṣ*, it takes *Pathaḥ*, e.g. הַאֵלֵךְ *shall I go?*, הַאַתָּה *num tu?*, הַאִם *num si*; הַאֲרָצָה Mal 1^{13}; also in Ju 6^{31} read הַאַתֶּם (not הָאַ׳), likewise הַ in Ju 12^{5}, Jer 8^{19}, Neh 6^{11}.—In הָאִישׁ Nu 16^{22}, the Masora intends the article; read הַאִישׁ, and cf. Dt 20^{19}; in Ec 3^{21} read הַעֹלָה and הַיֹּרֶדֶת; the article is a correction due to doctrinal considerations.

n (4) The ה takes *Sᵉghôl* before gutturals pointed with *Qameṣ* or (as in Ju $9^{9\,ff.}$) *Ḥaṭeph-Qameṣ*, e.g. הֶאֱמוּר Mi 2^{7}; הֶהֱיִתָה Jb 21^{4}; הֶהָיִתָה Jo 1^{2}; הֲהָשֵׁב Gn 24^{5} (cf. the analogous instances in § 22 *c*, § 35 *k*, § 63 *k*). The place of this interrogative particle is always at the beginning of the clause [but see Jb 34^{31}, Neh 13^{27}, Jer 22^{15}, where one or more words are prefixed for emphasis].

o 5. Some adverbs occur also in connexion with suffixes, thus יָשְׁךָ *thou art there*, 3rd sing. masc. יְשָׁנוֹ[2] (but see note below), 2nd plur. masc. יְשֻׁבֶם; אֵינֶנִּי *I am not*, 2nd sing. אֵינְךָ, fem. אֵינֵךְ, 3rd sing. אֵינֶנּוּ, fem. אֵינֶנָּה, 2nd plur. אֵינְכֶם, 3rd plur. masc. אֵינָם.—Also עוֹדֶנִּי *I am yet* (עוֹדִי only in בְּעוֹדִי and מֵעוֹדִי), עוֹדְךָ, עוֹדֵךְ, עוֹדֵינוּ (La 4^{17} *Qᵉrê*; עוֹדֶיהָ

[1] The separation of the ה at the beginning of Dt 32^{6}, expressly noticed by Qimḥi (ed. Rittenb., p. 40 b) as an unique instance, is perhaps a protest against admitting a particle הַל.

[2] This form, which occurs in Dt 29^{14}, 1 S 14^{39}, 23^{23}, Est 3^{8}, is textually very doubtful, and cannot be supported by the equally doubtful קָבְנוֹ (for קָבֶּנּוּ) Nu 23^{13}. Most probably, with Stade, *Gramm.*, § 370 b, and P. Haupt, *SBOT* Numbers, p. 57, line 37, we should read יְשֻׁבֵנוּ.

K^eth.; the oriental school [see above, p. 38, note 2] recognize only the reading עוֹדֶינּוּ), עוֹדָם.—אַיֶּכָּה *where art thou?*, אַיּוֹ *where is he?*, אַיָּם *where are they?* The same applies to הֵן (הֵ֫ן) and הִנֵּה *behold!* (prop. *here, here is*; see § 105 *b*), only in Gn 19[2] הִנֵּה־נָ֫א; with suffixes, הִנֵּנִי, once הִנֶּ֫נִּי (Gn 22[7] with *Munaḥ*), in *pause* הִנֶּ֫נִּי *behold me* (*here am I*), הִנְּךָ (*pause* הִנֶּ֫ךָּ ψ 139[8]), הִנְּךְ, הִנּוֹ, and הִנֵּ֫הוּ [both very rare], הִנָּנוּ (*behold us*). and הִנֶּ֫נּוּ (in *pause* הִנֶּ֫נּוּ), הִנְּכֶם, הִנָּם; [see more fully in the Lexikon, p. 243].

The usual explanation of these suffixes (especially of the forms with *Nûn energicum*) as verbal suffixes, which ascribes some power of verbal government even to forms originally substantival (e.g. יֶשְׁנוֹ *there is, he is*), is at least inadmissible for forms (like אַיּוֹ, בְּעוֹדִי) which are evidently connected with noun-suffixes; even for the other forms it is questionable. Brockelmann suggests that the נ in connexion with these particles is a survival from הנה corresponding to the Arab. *'ánna* which introduces dependent clauses. *p*

101. *Prepositions.*

Brockelmann, *Grundriss*, i. 494 ff.

1. All words, which by usage serve as prepositions, were originally substantives, viz.: *a*

(*a*) Substantives in the accusative and in the construct state, so that the noun governed by them is to be considered as in the genitive, and in Arabic actually has the genitive ending, cf. in German *statt dessen, kraft dessen*, in Greek *τούτου χάριν*, in Latin *huius rei causa*, or *gratia, montis instar*.[1] Cf. אַחַר (hinder part*) *behind, after* (*Mil'êl* in אַ֫חַר בֵּן Lv 14[36], Dt 21[13], 1 S 10[5]; אַ֫חַר זֶה 2 Ch 32[9]); אֶצֶל (side) *close by*; בֵּין (intermediate space*) *between*; בְּעַד, בַּעַד (distance*) *behind, around*; זוּלָתִי, or with *Ḥireq compaginis* זוּלָתִי (removal, want) *except*; יַ֫עַן (purpose) *on account of*; מוּל (מוֹל only in Dt 1[1]) *before, over against*; מִן (separation; cf. § 119 *v*) *from, out of*; נֶ֫גֶד (coming in front, that which is over against) *before, over against*; עַד־ (progress, duration*) *during, until*; עַל (height, upper part*) *upon, over*; עִם־ (connexion?) *with*; it is doubtful whether this is to be derived from the same stem as עֻמַּת, לְעֻמַּת *near, beside, like*; תַּחַת (under part*) *under, instead of.*

(*b*) Substantives in the construct state, but to be regarded as in the genitive, since they depend on prepositions (especially the inseparable), e.g. לִפְנֵי (in the face of*) *before*; כְּפִי, לְפִי (according to the mouth, *b*

[1] In the examples which follow, the meaning of the noun is added in parentheses, and, when it is actually in use [though it is mostly in such cases very rare], is marked with an asterisk.—On a similar use in other languages, see W. von Humboldt, *Über die Kawisprache*, iii, p. 621.

[2] So also J. Hoch de Long, *Die hebr. Präpos.* בְּעַד, Lpz. 1905.

i. e. the command of*) *according to*; בְּגִלַּל (in the concern of) *on account of*; לְמַעַן (for the purpose of) *on account of*.

c **2.** Substantives used adverbially very frequently become prepositions in this way, e.g. בְּלִי, בְּבְלִי, מִבְּלִי, בְּלֹתִי, בְּאֵין, בְּאַפְסָם (with cessation) *without*, בְּעוֹד (in the duration of) *during*; כְּדֵי, בְּדֵי (according to the requirement of) *for, according to*.

§ 102. *Prefixed Prepositions.*

a **1.** Of the words mentioned in § 101, מִן *from, out of*, frequently occurs as a prefix (§ 99 *c*), with its *Nûn* assimilated to the following consonant (by means of *Dageš forte*), e. g. מִיַּעַר *out of a forest*.

b Rem. The separate מִן (always with a following *Maqqeph*) is usual (but not necessary, cf. Ju 20[14] with verse 15, Ez 43[6], &c.) only before the article, e. g. מִן־הָאָרֶץ, and sometimes occurs before the softer consonants, e. g. מִן־אָז Jer 44[18], מִן־בְּנֵי Jo 1[12], 1 Ch 5[18]; cf. Ex 18[14], Lv 1[14], 14[30], Ju 7[23], 10[11], 19[16], ψ 104[7] (2 K 23[36] before ר; also before ק in ψ 18[49]), and elsewhere in the later books (as in Aramaic) [1]; there is besides a poetic by-form מִנֵּי (cf. § 90 *m*) and מִנֵּי Is 30[11]. Its form is most commonly מִ֫ *with a following Dageš*, which may, however, be omitted in letters which have *Šᵉwâ* (cf. § 20 *m*). With a following י the מִ is, as a rule, contracted to מִי, e. g. מִיָּדִי = מִיְּדִי or מִיָּדִי (but cf. מִיְּשֶׁנִּי Dn 12[2]; מִירֻשָּׁתָךְ 2 Ch 20[11]); before gutturals it becomes מֶ (according to § 22 *c*), e. g. מֵעָם, מֵאָדָם; before ח the מִ occurs with the guttural virtually sharpened in מֵחוּץ *on the outside*, and in מֵחוּם Gn 14[23]; before ה in מֵהֱיוֹת (cf. § 28 *b* and § 63 *q*. The closed syllable here is inconsistent with the required virtual sharpening of the ה; probably מֵהֱיוֹת is merely due to the analogy of לִהְיוֹת); similarly Is 14[3] before ר; but in 1 S 23[28], 2 S 18[16] מֵהִרדֹף is to be read, according to § 22 *s*.

c **2.** There are also three other particles, the most commonly used prepositions and the particle of comparison, which have been reduced by abbreviation (§ 99 *c*) to a single prefixed consonant with *Šᵉwâ* (but see below, and § 103 *e*), viz.:

בְּ [poet. בְּמוֹ] *in, at, with*.

לְ [poet. לְמוֹ] *towards*, (belonging) *to, for*, Lat. *ad*.

כְּ [poet. כְּמוֹ] *like, as, according to* (no doubt the remnant of a substantive with the meaning of *matter, kind, instar*).

d With regard to the pointing it is to be observed that—

(*a*) The *Šᵉwâ mobile*, with which the above prefixes are usually pronounced, has resulted from the weakening of a short vowel (an original *ă*, according to *f*) [2]; the short vowel is regularly retained before *Šᵉwâ*: before *Šᵉwâ simplex*

[1] König, *Einleitung ins A. T.*, p. 393 (cf. also the almost exhaustive statistics in his *Lehrgebäude*, ii. 292 ff.), enumerates eight instances of מִן before a word without the article in 2 Samuel and Kings, and forty-five in Chronicles.

[2] Jerome (see Siegfried, *ZAW.* iv. 79) almost always represents בְּ by *ba*.

in the form of an ĭ, attenuated from ă: before a *Ḥaṭeph* the prefix takes the vowel of the *Ḥaṭeph*, e. g. לִפְרִי *for fruit*, כַּאֲרִי *as a lion*, בְּעָנְיִ *bᵉʿoni, in affliction* (sometimes with the syllable subsequently closed, cf. § 28 *b*, and the infinitives with לְ § 63 *i*): before weak consonants it follows the rule given in § 24 *c*, e. g. לִיהוּדָה for לִיְ. When the prefixes בְּ, כְּ, וְ, לְ precede אֱלֹהִים *God*, the *Šᵉwâ* and *Ḥaṭeph Sᵉghôl* regularly coalesce in *Ṣērê*, e. g. בֶּאֱלֹהִים, &c., for בְּאֱלֹ; so with suffixes וֵאלֹהָיו, &c. (once also in the sing. לֵאלֹהוֹ Hb 1¹¹); also regularly לֵאמֹר *to say*, for לֶאֱמֹר, see § 23 *d*.

(*b*) When the prefixes precede the article, the ה is almost always dropped, *c* and they take its vowel. See further in § 35 *n*.

(*c*) Immediately before the tone-syllable, i. e. before monosyllables and dissyllables with the tone on the penultima (in the fore-tone), they take *Qameṣ* *f* (undoubtedly a lengthening of an original ă, cf. § 26 *e*, § 28 *a*), but only in the following cases:

(*aa*) לָ before infinitives of the above-mentioned forms, as לָתֵת *to give*, לָדִין *to judge*, לָבֹז *to plunder*, לָגֹז *to shear*, לָהֹג *to keep a festival*, לָלֶדֶת *to bring forth*, לָלֶכֶת *to go*, לָקַחַת *to take*, except when the infinitive (as a *nomen regens*) is closely connected with another word (especially its subject, § 115 *e*), and consequently, as being in a sort of *constr. state*, loses the principal tone, e. g. לְצֵאת Ex 19¹, לְשָׁכְבָת Gn 16³, and so always לְבֹא חֶמֶת Nu 13²¹, &c. (in such cases as לָתֵת־חֶרֶב Ex 5²¹ the ā is protected by the secondary tone; before infinitives of verbs ע״ו, the לָ is retained even in close connexion; cf. Ez 21²⁰·²⁵, 22³);

(*bb*) before many pronominal forms, e. g. בָּזֶה (so also in 1 S 21¹⁰; not בְּזֶה), *g* לָזֹאת, בָּזֹה, לָזֶה (in close connexion, however, לְזֹאת Gn 2²³; בְּזֹאת Gn 45²³); כָּאֵלֶּה *as these*; and especially בָּכֶם, לָכֶם, כָּכֶם (כָּכֵם) and בָּהֶם, לָהֶם, כָּהֶם (כָּהֵם), see § 103 *e*;

(*cc*) לָ before monosyllables or fore-toned nouns in such combinations as *h* פֶּה לְפֶה *mouth to mouth*, 2 K 10²¹, בֵּין מַיִם לָמָיִם *between waters and waters*, Gn 1⁶; לָטֹרַח *for a trouble*, Is 1¹⁴, but always before the principal pause. The instructive example in Dt 17⁸ also shows that the punctuation לָ is only possible with at least the lesser pause after it; in Is 28¹⁰·¹³ the לָ is twice repeated, even before the small and smallest disjunctives;

(*dd*) in certain standing expressions, which have become stereotyped almost *i* as adverbs, e. g. לָעַד *to eternity*, לָרֹב *in multitude*, לָבֶטַח *in security*, לָנֶצַח *to eternity*, but לָנֶצַח נְצָחִים *to all eternity*, Is 34¹⁰. Cf. also לָנֶפֶשׁ *for the dead*, Lv 19²⁸, Nu 5², 9¹⁰.

(*d*) With the interrogative מָה they are pointed as in בַּמֶּה; in *pause* and *k* before א as in בַּמָּה *by what?* (before a following relative clause, as in Ec 3²², בְּמֶה; cf. Delitzsch, *Jesaia*, 4th ed., on Is 2²²); בַּמָּה *how much?* but also בַּמֶּה 1 K 22¹⁶, in close connexion, and at a greater distance from the *pause*. The *Sᵉghôl* in these forms arises from a modification of the original ă, while the מ is sharpened in order to maintain the original ă of the prefixes.

When לְ (prop. *la*) is united to מָה, it takes, according to § 49 *f*, *g*, the form *l* לָמָּה (Jb 7²⁰ לָמָּה, 1 S 1⁸ לָמֶּה, all *Mil'él*, and hence the ă in the tone is lengthened to ā) *for what? why?* Before the gutturals א, ה, ע, לָמָּה is used for euphonic reasons (exceptions 1 S 28¹⁵, 2 S 14³¹, Jer 15¹⁸, before ה; 2 S 2²²,

ψ 49^{6}, before א); לָמָּה, however, remains before ח. Before letters which are not gutturals, לָמָּה is found in ψ 42^{10}, 43^{2} (immediately after a tone-syllable).

m Rem. The divine name יְהוָה, which has not its original vowels (יַהְוֶה) but those of אֲדֹנָי (see § 17 *c*), except that the י has simple not compound *Šᵉwâ*, takes the prefixes also, after the manner of אֲדֹנָי, thus בַּיהוָה, לַיהוָה, וַיהוָה, בַּאדֹנָי, לַאדֹנָי, וַאדֹנָי, מֵאֲדֹנָי (since they are to be read מֵיְהוָה); for the א of אֲדֹנָי, as of אֲדֹנִים, &c. (see below), *quiesces* after the prefixes בַּ, כַּ, לַ, וַ, but is *audible* after מִ (for מִן), שֶׁ (no instance in the O. T.), and הָ (in הָאֲדֹנִים Dt 10^{17}, ψ 136^{3}, the article, not הַ interrog., is intended; the only example with הַ interrog., Jer 8^{19}, is to be pointed הַיהוָה, i.e. הַאדֹנָי, not הַיְהוָה). Hence the rule, מֹשֶׁה מוֹצִיא *Moses brought out* (i. e. מ, שׁ, ה make the א audible), וְכָלֵב מַכְנִיס *and Caleb brought in* (i. e. ו, כ, ל, ב allow it to quiesce).[1]—As regards the other plural forms of אָדוֹן, elision of the א always takes place after בַּ, וַ, כַּ, לַ, except in the form אֲדֹנָיו, thus לַאדֹנָיו, לַאדֹנֶיךָ, &c.; but לַאֲדֹנֵיהֶם, &c., לַאֲדֹנֵינוּ, &c., לַאֲדֹנֶיהָ, &c.

§ 103. *Prepositions with Pronominal Suffixes and in the Plural Form.*

a **1.** As all prepositions were originally nouns (§ 101) in the accusative, they may be united with the noun-suffixes (§ 91 *b*–*l*), e. g. אֶצְלִי (prop. at my side) *by me*, אִתִּי (in my proximity) *with me*, תַּחְתָּם (in their place) *instead of them*, like the Latin *mea causa*, *for my sake*.

b Rem. 1. The preposition אֵת (usually אֶת־) *near*, *with*, is distinguished from אֵת (see below, and § 117 *a*, note 4), the sign of the definite accusative (§ 117 *a*), in its connexion with suffixes, by a difference of pointing, the former making אִתִּי, אִתְּךָ, in *pause* אִתָּךְ, 2nd fem. אִתָּךְ (Is 54^{10} אִתֵּךְ), אִתּוֹ, אִתָּהּ, אִתָּנוּ, אִתְּכֶם, אִתָּם (also in the later books, especially in Kings, and always in Jer. and Ezek., incorrectly אוֹתִי *with me*; מֵאוֹתְךָ *from thee*, 1 K 20^{25}; מֵאוֹתוֹ *from him*, 1 K 22^{7}; אוֹתָם *with them*), while the latter retains its *ô* (obscured from *â*) before the light suffixes, but before grave suffixes is pointed with *Sᵉghôl*. This Sᵉghôl is to be explained, with Praetorius, *ZDMG.* lv. 369 f., as the modification of an *ă* which again was shortened from original *â* (in *'ăthi*, *'âthô*, &c.) in a closed syllable (*'ăth-hem*, &c.). The same shortening and modification of the original *â* takes place before words in close connexion, hence אֶת־כֹּל, &c. When not in close connexion, the toneless אֵת becomes tone-long אֵת, e. g. אֵת הַשָּׁמַיִם Gn 1[1]. Hence the following forms arise:—

	Sing.	Plur.
1.	אִתִּי *me.*	אִתָּנוּ *us.*
2.	*m.* אִתְּךָ, *pause* אִתָּךְ; *f.* אִתָּךְ . . . . . *thee.*	אִתְּכֶם *you.*
		. . . . .
3.	*m.* אִתּוֹ *him.*	אִתָּם, rarely אִתָּהֶם
	f. אִתָּהּ *her.*	אִתָּן, rarely אִתָּהֵן *them.*

[1] Another *vox memor.* is כָּל־בּוֹ נֶעְלָם *all is hidden in him.*

Less common are the *plene* forms אוֹתִי, אוֹתְךָ (Nu 22^{33} אֹתָךְ before ה), אוֹתָךְ (Ex 29^{35} אֹתָכָה), אוֹתוֹ, אוֹתָהּ, אוֹתָנוּ, אוֹתָם. Moreover, for אֶתְכֶם we find אוֹתְכֶם Jos 23^{16}; for אֹתָם, five times אֶתְהֶם (Gn 32^{1}, Ex 18^{20}, &c.), and in Ez 23^{45} אוֹתְהֶם; for אֹתָן (Gn 19^{8}, &c. [13 times]), אֶתְהֶן (only found in Ez 16^{54}; Ex 35^{26} אֹתָנָה; Ez 34^{21} (אוֹתָנָה), and אוֹתְהֶן Ez 23^{47}.—No instance of the 2nd fem. plur. אֶתְכֶן occurs in the O. T.; in Cant 2^{7}, &c., אֶתְכֶם is used instead.

c 2. The preposition עִם *with* (with suffixes on the model of stems ע״ע, עִמִּי, עִמְּךָ [1 S 1^{26} עִמָּכָה], in *pause* עִמָּךְ; 2nd fem. עִמָּךְ; עִמּוֹ, עִמָּהּ) is united with the suffixes נוּ, כֶם, and הֶם by a (pretonic) *Qameṣ*, which causes the sharpening of the *Mêm* to be distinctly audible: עִמָּנוּ, עִמָּכֶם, עִמָּהֶם (so in Nu 22^{12}, Dt 29^{16}, both in principal pause, and often in very late passages, otherwise עִמָּם is generally used). In the first person, besides עִמִּי, we also find עִמָּדִי (probably from original עִנְדִי; cf. Arab. *'inda*, beside, with).

d 3. It is but seldom that prepositions occur with verbal suffixes, as תַּחְתֵּנִי 2 S $22^{37.40.43}$ (for which ψ $18^{37.40.48}$ תַּחְתַּי), תַּחְתֶּנָּה Gn 2^{21} and בַּעֲדֵנִי ψ 139^{11} (here probably for the sake of the rhyme with יְשׁוּפֵנִי).[1]

e **2.** When pronominal suffixes are added to the prefixes (§ 102), there appears occasionally, especially in the case of the shorter suffixes, an endeavour to lengthen the preposition, so as to give it more strength and body. Hence to בְּ is appended the syllable מוֹ (see below, *k*), and בְּ and לְ take at least a full vowel, בָּ and לָ (§ 102 *d*, *f*).—The following deviations from the analogy of the noun with suffixes are to be noticed (*a*) in the pausal forms בָּךְ, לָךְ, בָּהּ, לָהּ, אִתָּךְ, אִתָּהּ, עִמָּךְ, עִמָּהּ (not *bèkhā*, &c.); (*b*) in the similar forms with the suffix of the 2nd sing. fem. (not *bēkh*, &c.) and in בָּנוּ, לָנוּ, עִמָּנוּ, &c. (not *bēnû*, &c.).

f (*a*) לְ *with Pronominal Suffixes.*

	Sing.	Plur.
1.	לִי *to me.*	לָנוּ *to us.*
2.	*m.* לְךָ (לָכָה), in *pause* לָךְ; *f.* לָךְ . . . . . *to thee.*	לָכֶם; לָכֶן [2] *to you.*
3.	*m.* לוֹ *to him.*; *f.* לָהּ *to her.*	לָהֶם, לָהֶמָּה, poet. לָמוֹ [53 times][3]; לָהֵנָּה [4], לָהֶן *to them.*

[1] *Fini* and *bini* (in me), in vulgar Arabic for *fiyya* and *bi*, are compared by Socin. Brockelmann, *ZA.* xiv. 347, note 1, suggests that תחתני, תחתנה, בעדני are later formations on the model of מִמֶּנִּי when its origin from the reduplication of the preposition had become obscured, but see below, *m*.

[2] לָכֶן does not occur in the O. T., by a mere accident, no doubt; Ez 13^{18} לָכֶנָּה.

[For notes 3 and 4 see next page.]

g בְּ takes suffixes in the same manner: בִּי, בְּךָ (Ex 7[29], 2 S 22[30], ψ 141[8] בָּהּ, as in Gn 27[37], 2 S 18[22], Is 3[6] לָךְ [for 2nd fem. לָךְ the *Kethîbh* לכי occurs in 2 K 4[2], Ct 2[13], cf. § 91 *e*]), בּוֹ, &c.; except that for the 3rd plur., besides בָּהֶם (especially in the later books) and בָּהֵמָּה (only in Ex 30[4], 36[1], Hb 1[16]; לָהֵמָּה only in Jer 14[16]), the form בָּם is also used; and for the feminine, besides בָּהֵנָּה (three times), בָּהֵן is found fifteen times, and בָּהֶן only in 1 S 31[7], Is 38[16], Ez 42[14].—According to the Masora, לֹא is found fifteen times for לוֹ (as conversely in 1 S 2[16], 20[2] לוֹ for לֹא), e. g. Ex 21[8], 1 S 2[3], Is 9[2], ψ 100[3] (and, as has been conjectured, also Jb 41[4]); cf. Delitzsch on ψ 100[3].—In Nu 32[42], Zc 5[11], Ru 2[14], the Masora requires לָהּ instead of לָהּ (in all three places before a following tone-syllable; cf. § 23 *k*, and the analogous cases of the loss of *Mappîq* in § 58 *g*, § 91 *e*).

h (*b*) בְּ *with Pronominal Suffixes.*

	Sing.		Plur.	
1.	בָּמֹונִי[5]	*as I.*	בָּמֹונוּ	*as we.*
2.	*m.* בָּמֹוךָ[5]	*as thou.*	בָּכֶם, בָּכֶן, rarely בְּמוֹכֶם	*as ye.*
	f. . . .		. . . . .	
3.	*m.* בָּמֹוהוּ	*as he.*	בָּהֶם, [בָּהֵמָּה], בְּמוֹהֶם	*as they.*
	f. בָּמֹוהָ	*as she.*	[בָּהֵנָּה], בָּהֶן	

[3] The question whether לָמוֹ can also stand for the sing. לוֹ, which Rödiger and recently W. Diehl (*Das Pronomen pers. suff. . . . des Hebr.*, p. 20 f.) and P. Haupt (*SBOT.* on Pr 23[20], a contraction of *la-humâ*) have altogether denied, must be answered in the affirmative unless we conclude with Diehl and Haupt that *all* the instances concerned are due to corruptions of the text. It is true that in such places as Gn 9[26.27], Dt 33[2], Is 30[5], ψ 73[10] (all *in* or immediately before the principal pause; in Dt 33[2] with *Zaqeph qaṭon* at least) לָמוֹ can be better explained as plural (in reference to collective nouns); and in Is 53[8] for נֻגַּע לָמוֹ we should read with the LXX נֶגַע לַמֵּוֶת. On the other hand, in Is 44[15] its explanation as plural would be extremely forced. Even then there would remain—presuming the traditional text to be correct—פָּגְרֵימוֹ ψ 11[7] and בַּפֵּימוֹ Jb 27[23], as well as עָלֵימוֹ, three times, Jb 20[23], 27[23] (beside עָלָיו), and especially Jb 22[2]. In all these places the most extreme exegetical artifices can only be avoided by simply admitting a singular suffix (=פָּגְרָיו, בַּפָּיו, עָלָיו).—On the question of the antiquity of the suffixes in כְמוֹ see § 91 *l*.

[4] The form לָהֵן in Ru 1[13] is Aramaic (=*therefore*).

[5] The use of נִי here for יִ_ (cf. above, *d*) might be due to euphonic reasons.—בָּמֹונִי (defectively) only in the Pentateuch, בָּמֹוךָ Ex 15[11].

(*c*) מִן *with Pronominal Suffixes.* *i*

	Sing.	Plur.
1.	מִמֶּנִּי, poet. מִנִּי [4 times], in *pause* also מִנִּי [6 times] *from me.*	מִמֶּנּוּ *from us.*
2.	*m.* מִמְּךָ, in *pause* מִמֶּךָּ / *f.* מִמֵּךְ *from thee.*	מִכֶּם / מִכֶּן *from you.*
3.	*m.* מִמֶּנּוּ, Jb 4[12] in *pause* מִמֶּנְהוּ, [מִנֶּהוּ or מִמֶּנָּהוּ: see below] *from him.* / *f.* מִמֶּנָּה *from her.*	מֵהֶם, מֵהֵמָּה [twice]. Jb 11[20] מִמֵּהֶם / מֵהֵן, מֵהֵנָּה [7 times] *from them.*

The syllable מוֹ (in Arabic *mâ* מָא = Heb. מָה *what*) in כָּמוֹנִי (probably from כָּמָה אֲנִי, prop. *according to what I*, for *as I*) is, in poetry, appended to the three simple prefixes בְּ, כְּ, לְ, even without suffixes, so that בָּמוֹ, כָּמוֹ, לָמוֹ appear as independent words, equivalent in meaning to בְּ, כְּ, לְ. Poetry is here distinguished from prose by the use of longer forms; in the case of מִן, on the other hand, it prefers the shorter, which resemble the Syriac and Arabic. *k*

The form בָּהֶם, enclosed in brackets above, occurs only in 2 K 17[15] (in *pause*), בָּהֶמָּה only in Jer 36[32] (in *pause*); בָּהֵן (Baer following Qimḥi כֶּהֵן) only in Ez 18[14]. Cf. Frensdorff, *Massora Magna*, p. 234 ff.—For כָּכֶם *as ye*, Qimḥi requires כָּכֵם (invariably or only in Jb 16[4]?); in Jos 1[15], Ju 8[2], Ezr 4[2] Baer gives כָּכֵם. *l*

With regard to מִן with suffixes, מִמֶּנִּי *from me* is usually explained as arising, *m* by a reduplication of מִן, from an original מנמני, just as מִמֶּנּוּ *from him*, from מנמנ-הו, identical in form with מִמֶּנּוּ[1] *from us*, from מנמנ-נו, while מִמֶּנָּה *from her*, goes back to מנמנה. Far simpler, however, is Mayer Lambert's explanation (*REJ.* xxiii. 302 ff.), that מִמֶּנִּי, &c., have arisen from מִמֵּנִּי, &c., and that the forms of the suffixes are to be explained on the analogy of אֵיֶּלְנִי, עוֹרֶנּוּ, תַּחְתֶּנָּה, § 100 *o*.—The bracketed form מִנֶּהוּ, for which Baer, following Qimḥi and others, writes מִמֶּנְהוּ, occurs only in ψ 68[24], and is there regarded by Delitzsch, Hupfeld, and others (following Simonis) as a substantive (מֶן = *portion*). The expression מִן־הוּא (for מִמֶּנּוּ?) Is 18[2.7] is very strange.—מֵהֵמָּה occurs only in Jer 10[2], Ec 12[12] (Jb 11[20] מִמֵּהֶם); מֵהֵן (so Baer and Ginsburg, following the best authorities, instead of the ordinary reading מֵהֶן) only in Ez 16[47.52].

---

[1] The Babylonian Masora writes מִמֶּנּוּ (to distinguish it from the 3rd sing.), which is justly blamed by Ibn Ezra.

n **3.** Several prepositions, especially those which express relations of space and time, are (like the German *wegen*) properly plural nouns (for the reason, see § 124 *a*), and are, therefore, joined with the pronominal suffixes in the form of the plural *construct state*, just like other plural nouns (§ 91 *g*). On the other hand, the apparent connexion of אֶל־, עַד־, עַל־ with plural suffixes is explained from the ground-forms of those prepositions (from stems לה) אֶלַי (אֲלַי), עֲדַי, עָלַי (contracted to אֵלַי, אֲלֵי, &c.).[1]

o Without suffixes these prepositions are—

אַחַר, more frequently אַחֲרֵי (prop. *hinder parts*) *behind, after.*

אֶל־,[2] poet. [4 times in Job] also אֱלֵי (*region, direction*), *towards, to, according to.*

בֵּין (*interval*) *between*; the suffixes indicating the singular are added to the singular בֵּין, thus בֵּינִי, בֵּינְךָ, &c. (Gn 16[5] בֵּינֶיךָ, the second *Yôdh* is, however, marked with a point as critically doubtful; בֵּינָיו, which occurs three times, is only the Masoretic *Qᵉrê* for בֵּינוֹ, which is found e.g. in Gn 30[36]). On the other hand, the suffixes indicating a plural are attached to the plural forms בֵּינֵי or בֵּינוֹת.

סָבִיב (*circuit*) *around*, as a preposition, always has the plural form, sometimes masc. סְבִיבֶיךָ, &c. [10 times], but much more frequently in the fem. סְבִיבוֹת (*surroundings*). In Ez 43[17] סָבִיב אוֹתָהּ is a corruption of סְבִיבֹתֶיהָ; [in 1 K 6[5] סָבִיב אֶת also is so contrary to usage, that it must be due to some textual error].

עַד־ (*continuation, duration*, from עָדָה) *as far as, unto*, poet. עֲדֵי [12 times]. In Jb 32[12] עֲדֵיכֶם, with the *ā* retained in the secondary tone, is abnormal. Also in 2 K 9[18] for עַד־הֵם read עֲדֵיהֶם.

עַל־ *upon, over* (cf. the rare subst. עָל *height* [see Lexicon], from עָלָה *to ascend*), poet. עֲלֵי [40 times, and 2 *Qᵉrê*].

תַּחַת *under* (prop. *what is beneath*). On תַּחְתַּנִי, &c.; cf. above, *d*.

---

[1] The reference of these forms to original plurals has been again expressly supported by De Lagarde, *Symmicta*, ii. 101 ff.; *Nachrichten der G. g. G.*, 1881, p. 376, cf. *Mittheilungen*, 1884, p. 63; also *GGA.* 1884, p. 280 f. According to Barth, *ZDMG.* xlii. p. 348 ff., and *Nominalbildung*, p. 375 ff., תַּחְתֶּיךָ, &c., was only formed on the analogy of עָלֶיךָ, &c., and אַחֲרֶיךָ, &c., only on the analogy of לְפָנַי, &c., since the real plural forms ought to be תְּחָתֶיךָ, אֲחָרֶיךָ, &c.; cf., however, König, *Lehrgebäude*, ii. 305 f.

[2] On the use of this particle see § 119 *g*.

With Suffixes.

Sing.	אַחֲרֵי (*after me*)	בֵּינֵי (*between me*)	סְבִיבוֹתַי (*around me*)	תַּחְתַּי (*beneath me*)	אֵלַי (*to me*)	עַדַי (*unto me*)	עָלַי (*on me*)
S. m.	אַחֲרֶיךָ	בֵּינְךָ	סְבִיבוֹתֶיךָ & סְבִיבֶיךָ	תַּחְתֶּיךָ	אֵלֶיךָ	עָדֶיךָ	עָלֶיךָ
S. f.	אַחֲרַיִךְ		סְבִיבוֹתַיִךְ & סְבִיבַיִךְ		אֵלַיִךְ		עָלַיִךְ
S. m.	אַחֲרָיו	בֵּינוֹ	סְבִיבוֹתָיו & סְבִיבָיו	תַּחְתָּיו	אֵלָיו	עָדָיו	עָלָיו

§ 104. *Conjunctions.*

1. The conjunctions serve to connect sentences, and to express their relations one to another. They may be either— *a*

(*a*) Original pronouns, e.g. the demonstrative כִּי *that, because, for.*

(*b*) Original substantives, which afterwards were reduced to the rank of pronouns, adverbs, or conjunctions; so perhaps אֲשֶׁר (see § 36), which is sometimes used to express the general idea of relation, sometimes as a relative pronoun (properly a demonstrative), but in many cases stands simply for כִּי; also אַל־ (*nothing*), *that not*; פֶּן־ *that not* (the Greek μή of *prohibition*), &c. To these may be added the adverbial combination of substantives with prepositions, e.g. בַּבֹּקֶר

[1] As Mayer Lambert observes, usage (cf. esp. Gn 26[28]) distinguishes between the two forms: בינותינו means *between us and you*, whereas בינינו (Jos 22[25.27.28] before וביניכם) means *between us on the one side.*

[2] The poetical form אֵלֵימוֹ only in ψ 2[5]; עָלֵימוֹ, on which see note 3 on *f*, 12 times [viz. Dt 32[23], ψ 5[12], 55[16], 64[9], Jb 6[16], 20[23], 21[17.22], 27[23], 29[22], 30[2.3]].

(*in the not yet*) *earlier, before*, for which מִטֶּרֶם is also used. On the combination of two particles to express complex ideas (e.g. אַף־כִּי *added to this, that=much more*), see the Syntax, § 163 f.

b (*c*) Prepositions, which with the addition of the conjunction אֲשֶׁר or כִּי together form one single conjunction, e.g. יַעַן אֲשֶׁר *because*, prop. *on account of the fact that*; אַחַר אֲשֶׁר, and more frequently אַחֲרֵי אֲשֶׁר, *after that*; בַּאֲשֶׁר *according as* (with בְּ); עֵקֶב כִּי and עֵקֶב אֲשֶׁר *in consequence of the fact that, for the reason that, because.* Sometimes, however, the conjunction in such cases is omitted, and the preposition itself used as a conjunction, e.g. עַל (for עַל־אֲשֶׁר) *although*, Jb 16[17].

So, at any rate, according to our linguistic principles. It would, however, be more correct to say, that instead of the intermediary אֲשֶׁר the whole of the succeeding sentence is regarded as *one* substantival idea, under the immediate government of the preposition. In the same way, all prepositions governing the gerund in English may be paraphrased by conjunctions with the finite verb, see §§ 114 and 115, *passim*.

c **2.** Besides those already mentioned, there are certain other small words now used as conjunctions, of which the derivation or original meaning is altogether obscure, thus אוֹ *or*, אִם־ *if* (also *or* before the second member of a double question), אַף *also*, וְ *and*, and others.

d Rem. The pointing of the וְ (originally וַ, as still before *Ḥateph Pathaḥ* and—with a following *Dageš forte*—in *wāw consecutive* of the imperfect; cf. § 49 *f*) is in many respects analogous to that of the prefixes בְּ, כְּ, לְ (§ 102 *d-i*), but as being a weak consonant, the *wāw copulative* has some further peculiarities:

(*a*) Usually it takes simple *Šᵉwâ* (וְ).

(*b*) Before words which begin with a guttural having a *compound Šᵉwâ*, it takes the vowel with which the *Šᵉwâ* is compounded (according to § 28 *b*), e.g. וַחֲכַם *and be thou wise*, וַעֲבָדִים *and servants*, וְעָזּוּז *and strength*, וְאָכַל *and eat thou*, וְחָלְיִ *and sickness*. On וֵאלֹהִים, וְאֱלֹהֵי, &c., see § 102 *d*; on וַאדֹנַי, &c., see § 102 *m*; on such cases as וְעֵצֶר Jb 4[2], cf. § 28 *b*.

c (*c*) Before words with simple *Šᵉwâ* under the first consonant (except in the cases under *f*), the *Wāw* becomes the vowel *û* (cf. § 26 *a*), e.g. וּלְכֹל *and to all*, so also (except in the case under *g*) before the cognate labials ב, מ, פ, hence וּמַלְאָךְ. On the cases in which *simple Šᵉwâ* has become a *Ḥateph* after ו *copulative* (e.g. וַזָּהָב Gn 2[12]), cf. § 10 *g*.

f (*d*) With a following יְ the וְ coalesces to form וִי according to § 24 *b*, as וִיהִי *and let him be*. On the peculiar punctuation of the *wāw copulative* before forms with initial *Šᵉwâ* from הָיָה *to be* and חָיָה *to live* (e.g. וְהִיִיתֶם Jos 8[4], וְחִיָה Gn 20[7]), cf. § 63 *q*.

g (*e*) Immediately before the tone-syllable it frequently takes *Qameṣ*, like בְּ, כְּ, לְ (see § 102 *f*), but in most cases only at the end of a sentence or clause (but cf. also וָבֹא 2 K 22[30]), e.g. וָמֵת Ex 21[12] (on the other hand, in verse 20

וּמֵת is in closer logical connexion with what follows); 2 K 7⁴ וְנָמַתְנוּ שָׁם, and וְנָמוּתָה; Ru 3⁸ וַתִּכָּפֵת; ψ 10¹⁵ וְרַע; 1 S 9⁴ וְאַיִן; 2 S 13²⁶ וְלֹא; Ez 47⁹ וְחָי; cf. also (with *Tiphḥa*) Gn 33¹³, 2 S 15¹². The very frequent connexion of nouns expressing kindred ideas, by means of וְ, is due simply to considerations of rhythm, for even in such cases the *Wāw* must immediately precede the tone-syllable, which must be marked by a disjunctive accent, e. g. הֹחוּ וָבֹהוּ Gn 1², יוֹם וָלַיְלָה Gn 8²² (see also the previous examples); Gn 13¹⁴ (thrice); Ex 25³ זָהָב וָכֶסֶף; ψ 96⁷ כָּבוֹד וָעֹז; וְרֶכֶב וָסוּס Gn 7¹³; נֹחַ וְשֵׁם־וְחָם וְיֶפֶת; 1 K 21¹⁰ כֹּה וְכֹה *thus and thus*; Est 1⁸ אִישׁ־וְאִישׁ at the end of the verse, but in ψ 87⁵ אִישׁ וְאִישׁ in spite of the *D'ḥi* with the second אִישׁ, because it is closely connected with the following predicate. Also with three words פַּחַד וָפַחַת וָפָח Is 24¹⁷. On the other hand, the rapid pronunciation וְ occurs before a conjunctive accent (and, when farther removed from the principal pause, even with the smaller disjunctives, in spite of a following tone-syllable), e. g. צֹאן וָעֶבֶד Gn 32⁶; cf. Gn 31⁴⁰, Lv 7²³, Dt 2²¹, and among the examples given above, Gn 7¹³ and ψ 76⁷. (Exceptions: וְקַדְמָה Gn 13¹⁴, where evidently the וְ is intended to ensure the slow and solemn recitation of the promise, but also וְזִיף Jos 15⁵⁵, וְעִתֶּר 19⁷, וְבֶטֶן 19²⁵, all immediately before the pause.) For the same rhythmical reason וְ (not וָ) is used regularly with certain monosyllables which, by their nature, lean more closely upon the following word, thus וְוֵה, וְאֵת, וְגַם, וְלֹא (to be distinguished from וָלֹא *if not*, with *Zaqeph gadol*, 2 K 5¹⁷), and others.

§ 105. *Interjections.*

a 1. Among the interjections some (as in all languages) are simply natural sounds, or, as it were, vocal gestures, called forth involuntarily by certain impressions or sensations, e. g. אֲהָהּ (Ez 30² הָהּ), אָח *ah!* הֶאָח *aha!* (cf. this אָח also in אַחְלַי and אֲחָלַי *utinam!*), אֱנָא Ex 32³¹, &c. (Gn 50¹⁷ אָנָּא) *ah!* (from אָהּ and נָא), otherwise written אָנָּה 2 K 20³, Jn 1¹⁴, ψ 116⁴; also הַס (in pause הָס, even in the plural הַסּוּ *hold your peace!* Neh 8¹¹) *hush!* הוֹי (Am 5¹⁶ הוֹ־הוֹ) *ha! woe!* אוֹי, אוֹיָה (ψ 120⁵), אִי (in אִילוֹ Ec 4¹⁰; אִי־לָךְ 10¹⁶) *woe!*

b 2. Others, however, originally expressed independent ideas, and become interjections only by rapid pronunciation and by usage, e. g. הֵן (הֵא) or הִנֵּה *behold!* (prop. *here*); רְאֵה *behold!* (prop. imperative); הָבָה, plur. הָבוּ (prop. *give*, imperative of יָהַב; as to the tone, cf. § 69 *o*), *come*, the Latin *age, agite!* לְכָה (also לֵךְ), לְכוּ (prop. *go*, imperative of הָלַךְ) with the same meaning[1]; חָלִילָה *far be it!* (prop. *ad profanum!*)

[1] רְאֵה (Dt 1⁸), הָבָה and לְכָה are also used in connexion with the feminine and the plural, which proves that they have become quite stereotyped as interjections.

בִּי (see the Lexicon) *I beseech, hear me!* נָא *pray!*[1] used to emphasize a demand, warning, or entreaty, and always placed after the expression to which it belongs.[2]

---

[1] נָא serves to express the most various shades of expression, which are discussed in the various parts of the syntax. It is used especially (*a*) after the *imperative*, either in commands or entreaty, see § 110*d*; (*b*) with the *imperfect*, either in the cohortative (§ 108*b*) or jussive (§ 109*b*); (*c*) once with *perfect*, Gn 40[14]; (*d*) after various particles: הִנֵּה־נָא *behold now*; particularly after the conjunctions אִם and אַל: אִם־נָא *ne quaeso* and אִם־נָא *if now*, εἴπερ, εἴποτε, *if*, in a deprecatory sense, expressive of politeness or modesty. In Nu 12[13] נָא stands after a noun; but we ought certainly to read אֵל־נָא.— In polite language this particle is used constantly in all these ways, Gn 18[3.4], 19[7.8.19], and 50[17].

[2] Against the usual view which regards נָא as a hortatory particle (= *up! come!* analogous to the original imperatives הָבָה and לְכָה and the Ethiopic *nă'â*, properly *hither*, also *come!*), P. Haupt, in the *Johns Hopkins University Circulars*, xiii, no. 114, p. 109, justly observes that we should then expect the particle to be *prefixed* to the imperative, &c. He proposes to describe נָא as an emphatic particle. Haupt's suggested identification of this נָא with the Assyrian, Arabic, and Ethiopic particle *mā* (which is also an enclitic of emphasis), and ultimately with the interrogative *mā*, we shall not discuss here.

THIRD PART

SYNTAX[1]

CHAPTER I

THE PARTS OF SPEECH

I. Syntax of the Verb.

A. Use of the Tenses and Moods.[2]

§ 106. *Use of the Perfect.*

The perfect serves to express actions, events, or states, which the *a* speaker wishes to represent from the point of view of completion, whether they belong to a determinate past time, or extend into the present, or. while still future, are pictured as in their completed state.

The definition formerly given here ('the perfect serves to express *completed* actions') applies, strictly speaking, only to some of the varieties of the perfect discussed under *b-p*: hence the above modification based on the arguments of Knudtzon (for the title see note 2, and cf. further § 107 *a*).

More particularly the uses of the perfect may be distinguished as follows:—

1. To represent actions, events, or states, which, after a shorter *b*

[1] Recent works on Hebrew syntax are: A. B. Davidson, *Introductory Heb. Gram.*, vol. ii, *Heb. Syntax*, Edinburgh, 1894; Ed. König. *Hist.-compar. Syntax der hebr. Sprache*, Lpz. 1897 (see above, § 3 *f*). Important contributions to Hebrew syntax are also contained in H. Reckendorf's work *Die syntakt. Verhältnisse des Arab.*, 2 pts., Leiden, 1895, 1898, of which we have already made use in § 97 *a*. Cf. also the same author's very instructive discussions *Ueber syntakt. Forschung*, Munich, 1899.

[2] Cf. the sketch of the tenses and moods used in Hebrew in § 40; and on the general characteristics of the perfect and imperfect see the note on § 47 *a*; also Driver, *A Treatise on the Use of the Tenses in Hebrew* (Oxford, 1874; 3rd ed. 1892); Bennett, 'Notes on the Use of the Hebrew Tenses' (*Hebraica*, 1886, vols. ii, iii). A partial modification of the accepted definition of the Semitic perfect and imperfect was proposed by J. A. Knudtzon, *Om det saakaldte Perfektum og Imperfektum i Hebraisk*, Kristiania, 1890; of which a summary entitled 'Vom sogenannten Perf. und Imperf. im Hebr.' appeared in the *Transactions of the Oriental Congress at Stockholm*, section sémitique *b*, p. 73 ff. (Leiden, 1893). Cf. also Knudtzon's articles, 'Zur assyrischen und allgemein semitischen Grammatik' in the *Zeitschrift für Assyriologie*, especially vi. 422 ff. and vii. 33 ff.

or longer duration, were terminated in the past, and hence are finally concluded, viz.:

(*a*) Corresponding to the perfect proper in Latin and the English perfect definite, in assertions, negations, confirmations, interrogations, &c., e.g. Gn 18^{15} *then Sarah denied, saying, I laughed not* (לֹא צָחַקְתִּי) . . . . . ; *and he said, Nay, but thou didst laugh* (צָחָקְתְּ); Gn 3^{11} מִי הִגִּיד לְךָ *who told thee . . . . ?* Cf. $3^{13.14.17.22}$. Also pointing to some undefined time in the past, e.g. Is 66^{8} מִי־שָׁמַע כָּזֹאת *who hath (ever yet) heard such a thing ?*

c Rem. In opposition to this express use of the perfect to emphasize the completion of an event, the imperfect is not infrequently used to emphasize that which is still future, e.g. Jos 1^{5} *as I was* (הָיִיתִי) *with Moses, so will I be* (אֶהְיֶה) *with thee;* Jos 1^{17}, Ex 10^{14}, Dt 32^{21}, 1 K 2^{38}, Is $46^{4.11}$, Jo 2^{2}, Ec 1^{9}.

d (*b*) As a simple *tempus historicum* (corresponding to the Greek *aorist*) in narrating past events, e.g. Gn 4^{4} *and Abel, he also brought* (הֵבִיא), &c.; Gn 7^{19} *the waters did prevail* (גָּבְרוּ), &c.; Jb 1^{1} *there was a man* (אִישׁ הָיָה) *in the land of Uz*, &c.; even in relating repeated actions, 1 S 18^{30}.

e Rem. As the above examples indicate, the perfect of *narration* occurs especially at the head of an entire narrative (Jb 1^{1}; cf. Dn 2^{1}) or an independent sentence (e.g. Gn $7^{11.13}$), but in co-ordinate sentences, as a rule, only when the verb is separated from the copulative ו by one or more words (cf. above Gn 4^{4} and 7^{19}). In other cases, the narrative is continued in the imperfect consecutive, according to § 111 *a*. The direct connexion of the narrative perfect with ו copulative (not to be confounded with the perfect consecutive proper, § 112) agrees rather with Aramaic syntax (cf. Kautzsch, *Gramm. des Biblisch-Aram.*, § 71, 1 *b*). On the examples (which are in many respects doubtful) in the earlier texts, see § 112 *pp-uu*.

f (*c*) To represent actions, &c., which were already completed in the past, at the time when other actions or conditions took place (pluperfect),[1] e.g. 1 S 28^{3} *now Samuel was (long since) dead*[2] *. . . and Saul had put away* (הֵסִיר) *those that had familiar spirits . . . out of the land.* Both these statements, being as it were in parentheses, merely assign a reason for the narrative beginning at verse 6. Cf. 1 S 9^{15}, 25^{21}, 2 S 18^{18}.—Gn 20^{18} (*for the Lord had fast closed up*, &c.); 27^{30}, $31^{19.34}$, Dt 2^{10}; and in a negative statement, Gn 2^{5} *for the Lord God had not* (up to that time) *caused it to rain*, &c. This is especially frequent, from the nature of the case, in relative, causal, and temporal clauses, when the main clause contains a tense referring to the past, e.g. Gn 2^{2} *and he rested . . . from all his work which he had made* (עָשָׂה); Gn 7^{9},

[1] Cf. P. Haupt in the *Notes on Esther*, 9^{2}.

[2] Incorrectly, e.g. in the Vulgate, *Samuel autem mortuus est . . . et Saul abstulit magos*, &c.

19^{27}, &c.; 29^{10} *now when Jacob had seen Rachel* (כַּאֲשֶׁר רָאָה) . . . , *Jacob went near*, &c.; so also in clauses which express the completion or incompleteness of one action, &c., on the occurrence of another, as in Gn 24^{15}, 27^{30}, &c.; cf. § 164 *b*, with the note, and *c*.

g 2. To represent actions, events, or states, which, although completed in the past, nevertheless extend their influence into the present (in English generally rendered by the present):

(*a*) Expressing facts which were accomplished long before, or conditions and attributes which were acquired long before, but of which the effects still remain in the present (present perfect), e. g. ψ 10^{11} הִסְתִּיר פָּנָיו *he hath hidden his face* (*and still keeps it hidden*); ψ 143^{6} פָּרַשְׂתִּי *I have spread forth my hands* (*and still keep them spread forth*). This applies particularly to a large number of perfects (almost exclusively of intransitive[1] verbs, denoting affections or states of the mind) which in English can be rendered only by the present, or, in the case mentioned above under *f*, by the imperfect.[2] Thus, יָדַעְתִּי *I know* (prop. *I have perceived, have experienced*) Jb 9^{2}, 10^{13}, לֹא יָדַעְתִּי *I know not* Gn 4^{9}, &c.; on the other hand, e. g. in Gn 28^{16}, Nu 22^{34}, the context requires *I knew not*; זָכַרְנוּ *we remember* Nu 11^{5}; מֵאֲנָה *she refuseth* Jb 6^{7}; עָלַץ *it exulteth*; שָׂמַחְתִּי *I rejoice* 1 S 2^{1}; בִּקֵּשׁ *he requireth* Is 1^{12}; קִוִּיתִי *I wait* Gn 49^{18}, ψ 130^{5} (parallel with הוֹחַלְתִּי); חָפַצְתִּי *I delight* ψ 40^{9} (mostly negative, Is 1^{11}, &c.); אָהַבְתִּי *I love* Gn 27^{4}; שָׂנֵאתִי *I hate* ψ 31^{7}; מָאַסְתִּי *I despise* Am 5^{21}; תִּעֲבֻנִי *they abhor me* Jb 30^{10}; בָּטַחְתִּי *I trust* ψ 25^{2}; חָסִיתִי *I put my trust* ψ 31^{2}; צָדַקְתִּי *I am righteous* Jb 34^{5}; פָּקַדְתִּי *I have decided to requite* 1 S 15^{2}.—We may further include a number of verbs which express bodily characteristics or states, such as גָּדַלְתָּ *thou art great* ψ 104^{1}; קָטֹנְתִּי *I am little* Gn 32^{11}; גְּבֹהוּ *they are high* Is 55^{9}; רָחֲקוּ *they stand aloof* Jb 30^{10}; טֹבוּ *they are goodly* Nu 24^{5}; נָאוּוּ *they are beautiful* Is 52^{7}; זָקַנְתִּי *I am old* Gn 18^{13}; יָגַעְתִּי *I am weary* ψ 6^{7}; שָׂבַעְתִּי *I am full* Is 1^{11}, &c.

h Rem. To the same category probably belong also the perfects after עַד־מָתַי Ex 10^{3} *how long hast thou* already *been refusing* (and refusest still . . . ? which really amounts to *how long wilt thou refuse* ?), ψ 80^{5}, Pr 1^{22} (co-ordinate with the imperf.), and after עַד־אָנָה Ex 16^{28}, Hb 1^{2}.

i (*b*) In direct narration to express actions which, although really only in process of accomplishment, are nevertheless meant to be repre-

[1] With regard to the great but very natural preponderance of intransitive verbs (expressing an existing state), cf. the lists in Knudtzon (see above, p. 309, note 2), pp. 117 and 122 in the Danish text.

[2] Cf. *novi, odi, memini*; *οἶδα, μέμνημαι, ἔοικα, δέδορκα, κέκραγα*; in the New Testament, *ἥλπικα, ἠγάπηκα*.

sented as already accomplished in the conception of the speaker, e. g. הֲרִמֹתִי *I lift up* (my hand in ratifying an oath) Gn 14[22]; נִשְׁבַּעְתִּי *I swear* Jer 22[5]; הֵעַדְתִּי *I testify* Dt 8[19]; יָעַצְתִּי *I counsel* 2 S 17[11] (but in a different context in ver. 15, *I have counselled*); אָמַרְתִּי (prop. *I say*) *I decide* (*I consider as hereby settled*) 2 S 19[30]; *I declare* Jb 9[22], 32[10].

k (*c*) To express facts which have formerly taken place, and are still of constant recurrence, and hence are matters of common experience (the Greek *gnomic aorist*), e. g. ψ 9[11] *for thou, Lord, hast not forsaken* (לֹא־עָזַבְתָּ) *them that seek thee.* Cf. ver. 13, also ψ 10[3], 119[40] and Gn 49[11] (כִּבֵּס).

l Rem. In almost all the cases discussed in No. 2 (included under the English present) the imperfect can be used instead of the perfect, wherever the action or state in question is regarded, not as already completed, but as still continuing or just taking place (see § 107 *a*). Thus, לֹא יָכֹלְתִּי *I am not able* ψ 40[13] and לֹא אוּכַל Gn 31[35] have practically the same meaning. Hence also it very frequently happens that the imperfect corresponds to such perfects in poetic or prophetic parallelism, e. g. Is 5[12], ψ 2[1 f.], Pr 1[22], Jb 3[17].

m 3. To express *future* actions, when the speaker intends by an express assurance to represent them as finished, or as equivalent to accomplished facts:

(*a*) In contracts or other express stipulations (again corresponding to the English present, and therefore closely related to the instances noted under *i*), e. g. Gn 23[11] *the field I give* (נָתַתִּי) *thee*; cf. ver. 13 and 48[22], 2 S 14[21], 24[23], Jer 40[4]; in a threat, 1 S 2[16], 2 S 5[6] (unless, with Wellhausen, יָסִיר is to be read).—Especially in promises made by God, Gn 1[29], 15[18], 17[20], Ju 1[2].

n (*b*) To express facts which are undoubtedly imminent, and, therefore, in the imagination of the speaker, already accomplished (*perfectum confidentiae*), e. g. Nu 17[27] הֵן גָּוַעְנוּ אָבַדְנוּ כֻּלָּנוּ אָבָדְנוּ *behold, we perish, we are undone, we are all undone.* Gn 30[13], Is 6[5] (נִדְמֵיתִי *I am undone*[1]), Pr 4[2]. Even in interrogative sentences, Gn 18[12], Nu 17[28], 23[10], Ju 9[9.11], Zc 4[10] (?), Pr 22[20].[2] This use of the perfect occurs most frequently in prophetic language (*perfectum propheticum*). The prophet so trans-

[1] Cf. the similar use of ὄλωλα (*διέφθορας*, *Il.* 15. 128) and *perii!* On the kindred use of the perfect in conditional sentences, cf. below, *p*.

[2] In Gn 40[14] *a perf. confidentiae* (after כִּי אִם; but cf. § 163 *d*) appears to be used in the expression of an earnest desire that something may happen (*but have me in thy remembrance*, &c.). Neither this passage, however, nor the use of the perfect in Arabic to express a wish or imprecation, justifies us in assuming the existence of a *precative* perfect in Hebrew. In Jb 21[16], 22[18], also, translate *the counsel of the wicked is far from me.* Cf. Driver, *Tenses*[3], p. 25 f. In Is 43[9] either נִקָּבְצוּ is *imperative* (see § 51 *o*) or we must read יִקָּבְצוּ, corresponding to יֵאָסְפוּ which follows.

ports himself in imagination into the future that he describes the future event as if it had been already seen or heard by him, e.g. Is 5^{13} *therefore my people are gone into captivity* (גָּלָה); $9^{1\,ff.}$, 10^{28}, 11^{9} (after כִּי, as frequently elsewhere); 19^{7}, Jb 5^{20}, 2 Ch 20^{37}. Not infrequently the imperfect interchanges with such perfects either in the parallel member or further on in the narrative.

(*c*) To express actions or facts, which are meant to be indicated as existing in the future in a completed state (*futurum exactum*), e.g. Is 4^{4} אִם רָחַץ *when he has washed away* = *when he shall have washed away* (an *imperfect* follows in the co-ordinate sentence; cf. the conditional sentences in § 107 *x*); Is 6^{11} (after עַד אֲשֶׁר אִם, as in Gn 28^{15}, Nu 32^{17}; also 2 S 17^{13} after עַד אֲשֶׁר, Gn 24^{19} after עַד אִם and elsewhere frequently after temporal conjunctions); Mi 5^{2} (יָלְדָה); Gn 43^{14} וַאֲנִי כַּאֲשֶׁר שָׁכֹלְתִּי שָׁכָלְתִּי *and I—if I am bereaved* (*orbus fuero*), *I am bereaved*, an expression of despairing resignation. Cf. Pr 23^{15}, Est 4^{16}. *o*

4. To express actions and facts, whose accomplishment in the past is to be represented, not as actual, but only as possible (generally corresponding to the Latin imperfect or pluperfect subjunctive), e.g. Gn 31^{42} *except the God of my father . . . had been with me, surely now hadst thou sent me away empty* (שִׁלַּחְתָּנִי); Gn 43^{10}, Ex 9^{15} (שָׁלַחְתִּי *I had* almost *put forth*, &c.); Nu 22^{33}, Ju 13^{23}, 14^{18}, 1 S 13^{13} (הֵכִין); 2 K 13^{19}; so frequently after כִּמְעַט *easily, almost*, Gn 26^{10}, Is 1^{9} (where כִּמְעַט is probably to be connected with the word after it), ψ 73^{2}, 94^{17}, 119^{87}, Pr 5^{14}. Cf. also Jb 3^{13}, 23^{10} (בְּחָנַנִי), Ru 1^{12} (*if I should think*, &c.; cf. 2 K 7^{4}); in the apodosis of a conditional sentence, 1 S 25^{34}.—So also to express an unfulfilled desire, Nu 14^{2} לוּ מַתְנוּ *would that we had died . . . !* (לוּ with the imperfect would mean *would that we might die!* 1 S 14^{30}). Finally, also in a question indicating astonishment, Gn 21^{7} מִי מִלֵּל *who would have said . . . ? quis dixerit ?* ψ 73^{11}. *p*

§ 107. *Use of the Imperfect.*[1]

The imperfect, as opposed to the perfect, represents actions, events, or states which are regarded by the speaker at any moment as still continuing, or in process of accomplishment, or even as just taking place. In the last case, its occurrence may be represented as certainly imminent, or merely as conceived in the mind of the speaker, or simply as desired, and therefore only contingent (the modal use of the imperfect). *a*

[1] Cf. the literature cited above, p. 309, note 2.

Knudtzon (see above, Rem. on § 106 *a*), comparing the Ass.-Bab. usage, would prefer the term *present* rather than imperfect, on the ground that the tense expresses what is either actually or mentally present. In any case, the essential difference between the perfect and imperfect consists, he argues, in this, that the perfect simply indicates what is actually complete, while the imperfect places the action, &c., in a more direct relation to the judgement or feeling of the speaker.

More precisely the imperfect serves—

1. In the sphere of *past time*:

b (*a*) To express actions, &c., which *continued* throughout a longer or shorter period,[1] e. g. Gn 2^{6} *a mist went up* continually (יַעֲלֶה), 2^{25}, 37^{7}, 48^{10}, Ex 1^{12}, 8^{20}, 13^{22}, $15^{6.12.14.15}$, Nu $9^{15\,f.\ 20\,f.}$, 23^{7}, Ju 2^{1}, 5^{8}, 1 S 3^{2}, $13^{17\,f.}$, 2 S 2^{28}, 23^{10}, 1 K 3^{4}, 7^{8}, 21^{6}, Is 1^{21}, 6^{4} (יִפְלֶא), $17^{10\,f.}$, 51^{12}, Jer 13^{7}, 36^{18}, ψ $18^{7.14.17\,ff.38\,ff.}$, 24^{2}, $32^{4.5}$ (אוֹרִיעֲךָ), 47^{5}, $68^{10.12}$, $104^{6\,ff.}$, 106^{19}, $107^{18.29}$, 139^{13}, Jb 3^{11}, $4^{12.15\,f.}$, $10^{10\,f.}$, $15^{7\,f.}$—very frequently alternating with a perfect (especially with a frequentative perfect; cf. Nu 9^{15-23} and § 112 *e*), or when the narration is continued by means of an imperfect consecutive.[2]

c Rem. 1. The imperfect is frequently used in this way after the particles אָז *then*, טֶרֶם *not yet*, בְּטֶרֶם *before*, עַד־ *until*, e. g. Ex 15^{1} אָז יָשִׁיר־מֹשֶׁה *then sang Moses*, &c.; Nu 21^{17}, Dt 4^{41}, Jos 10^{12}, 1 K 3^{16}, 8^{1}, ψ 126^{2}, Jb 38^{21}. (The *perfect* is used after אָז when stress is to be laid on the fact that the action has really taken place, and not upon its gradual accomplishment or duration in the past, e. g. Gn 4^{26} אָז הוּחַל *then began*, &c.; Gn 49^{4}, Ex 15^{15}, Jos 22^{31}, Ju 5^{11}, ψ 89^{20}.)[3] After טֶרֶם e. g. Gn 19^{4} טֶרֶם יִשְׁכָּבוּ *before they lay down*; Gn 2^{5}, 24^{45}, 1 S $3^{3.7}$, always in the sense of our *pluperfect*. (In Gn 24^{15} instead of the perf. בָּלָה, the imperf. should be read, as in verse 45; so also in 1 S 3^{7} [יִגָּלֶה] an imperf. is co-ordinated with ידע). After בְּטֶרֶם (sometimes also simply טֶרֶם Ex 12^{34}, Jos 3^{1}), e.g. Jer 1^{5} בְּטֶרֶם תֵּצֵא *before thou camest forth*; Gn 27^{33}, 37^{18}, 41^{50}, Ru 3^{14} (perhaps also in ψ 90^{2} an imperf. was intended instead of יֻלָּדוּ; cf. Wellhausen on 2 S 3^{2}; but note also Pr 8^{25}, in a similar context, *before the mountains were settled*, הָטְבָּעוּ, the predicate being separated from בְּטֶרֶם הָרִים by ,, as in ψ 90^{2}). After עַד־ Jos 10^{13}, ψ 73^{17} (*until I went*), 2 Ch 29^{34}; on the other

[1] Cf. the Mêša' inscription, l. 5, כי יאנף כמש בארצה *for Chemosh was angry with his land*. As Driver, *Tenses*, 3rd ed., § 27, 1 α, remarks, this vivid realization of the accomplishment of the action is especially frequent in poetic and prophetic style.

[2] According to the Masora such imperfects occur in Is 10^{13} *bis* (where, however, וְאָסִיר might also mean *I am wont to remove*, &c.), Is 48^{3}, 57^{17}, ψ 18^{38a}, also (according to § 49 *c*) in 2 S 1^{10} and Ez 16^{10}. In some other cases וְ is no doubt a dogmatic emendation for וַ (*imperf. consec.*) in order to represent historical statements as promises; cf. Is 42^{6}, 43^{28} [contrasted with 42^{25}], 51^{2} *bis*, $63^{3\,ff.}$ and the note on § 53 *p*.

[3] After אָז *then* (to announce future events) the imperf. is naturally used in the sense of a future, Gn 24^{41}, Ex 12^{43}, Mi 3^{4}, Zp 3^{9}, ψ 51^{21}.

hand, with the perf., e.g. Jos 2^{22}. As after אִם, so also after בְּטֶרֶם, טֶרֶם, and עַד־ the imperf. may be used, according to the context, in the sense of our *future*, e.g. 2 K 2^{9}, Is 65^{24}, Jb 10^{21}; after עַד־ e.g. Is 22^{14}. The imperf. is used in the sense of our *present* after טֶרֶם in Ex 9^{30}, 10^{7}.

d 2. Driver (*Tenses*[3], p. 35 f.) rightly lays stress upon the inherent distinction between the *participle* as expressing *mere* duration, and the *imperfect* as expressing *progressive* duration (in the present, past, or future). Thus the words וְנָהָר יֹצֵא Gn 2^{10} represent the river of Paradise as going out of Eden in a continuous, uninterrupted stream, but יִפָּרֵד, which immediately follows, describes how the parting of its waters is always taking place afresh. In the same way יַעֲלֶה Gn 2^{6} represents new mists as constantly arising, and יִמָּלֵא Is 6^{4} new clouds of smoke. Also those actions, &c., which might be regarded in themselves as single or even momentary, are, as it were, broken up by the imperfect into their component parts, and so pictured as gradually completing themselves. Hence תִּבְלָעֵמוֹ Ex 15^{12} (after a *perf.* as in verse 14) represents the Egyptians, in a vivid, poetic description, as being swallowed up one after another, and יְנַחֵנִי Nu 23^{7} the leading on by stages, &c.

e (*b*) To express actions, &c., which were *repeated* in the past, either at fixed intervals or occasionally (the *modus rei repetitae*), e.g. Jb 1^{5} *thus did* (יַעֲשֶׂה) *Job continually* (after each occasion of his sons' festivities); $4^{3f.}$, $22^{6f.}$, 23^{11}, $29^{7.9.12f.}$, Gn 6^{4}, 29^{2}, 30^{38}, $42^{31.39}$ (*I used to bear* the loss of it), Ex 1^{12}, 19^{19}, $33^{7ff.}$ (יִקַּח *used to take* every time), $40^{36ff.}$, Nu $9^{17f.\ 20ff.}$, $11^{5.9}$, Ju 6^{4}, 14^{10}, 21^{25}, 1 S 1^{7}, 2^{22}, 9^{9}, 13^{19}, 18^{5}, 27^{9}, 2 S 1^{22}, 12^{3}, 13^{18}, 1 K 5^{25} (of tribute repeated year by year), 10^{5}, 13^{33}, 14^{28}, 2 K 4^{8}, 8^{29}, 13^{20}, 25^{14}, Jer 36^{23}, ψ 42^{5}, 44^{3}, $78^{15.40}$, 103^{7}, Est 2^{14}; even in a negative dependent clause, 1 K 18^{10}.

f **2.** In the sphere of *present time*, again

(*a*) To express actions, events, or states, which are *continued* for a shorter or longer time,[1] e.g. Gn 37^{15} מַה־תְּבַקֵּשׁ *what seekest thou?* 19^{19} לֹא־אוּכַל *I cannot*; 24^{50}, 31^{35}, Is 1^{13}. Other examples are Gn 2^{10}, 24^{31}, 1 S 1^{8}, 11^{5}, 1 K 3^{7}, ψ 2^{2}, and in the prophetic formula יֹאמַר יְהוָה *saith the Lord*, Is $1^{11.18}$, &c., cf. 40^{1}. So especially to express facts known by experience, which occur at all times, and consequently hold good at any moment, e.g. Pr 15^{20} *a wise son maketh a glad father*; hence especially frequent in Job and Proverbs. In an interrogative sentence, e.g. Jb 4^{17} *is mortal man just before God?* In a negative sentence, Jb 4^{18}, &c.

g (*b*) To express actions, &c., which may be *repeated* at any time, including therefore the present, or are *customarily* repeated on a given occasion (cf. above, *e*), e.g. Dt 1^{44} *as bees do* (are accustomed to

[1] It is not always possible to carry out with certainty the distinction between *continued* and *repeated* actions. Some of the examples given under *f* might equally be referred to *g*.

do); Gn 6^{21}, 32^{33}, 43^{32}, Ju 11^{40}, 1 S 2^{8}, 5^{5}, 20^{2}, 2 S 15^{32}, Is 1^{23}, 3^{16}, ψ 1^{3}. So again (see *f*) especially to express facts known by experience which may at any time come into effect again, e. g. Ex 23^{8} *a gift blindeth* (יְעַוֵּר), &c.; Gn 2^{24}, 22^{14}, Is 32^{6}, Am 3^{7}, Mal 1^{6}, Jb 2^{4}, &c. Of the same kind also is the imperfect in such relative clauses (see § 155), as Gn 49^{27} *Benjamin is* זְאֵב יִטְרָף *a wolf that ravineth* (properly, is accustomed to ravin). Finally, compare also the formulae יֵאָמֵר *it is* (wont to be) *said* (to introduce proverbial expressions) Gn 10^{9}, 22^{14}, &c.; לֹא־יֵעָשֶׂה כֵן *it is not* (wont to be) *so done* (and hence *may not, shall not be,* see *u*), Gn 29^{26}, 20^{9}, 34^{7}, 2 S 13^{12}.

h (*c*) To express actions, &c., which although, strictly speaking, they are already finished, are regarded as still lasting on into the present time, or continuing to operate in it, e. g. Gn 32^{30} *wherefore is it that thou dost ask* (תִּשְׁאַל) *after my name?* 24^{31}, 44^{7}, Ex 5^{15}, 2 S 16^{9}. In such cases, naturally, the perfect is also admissible, and is sometimes found in the same formula as the imperfect, e. g. Jb 1^{7} (2^{2}) מֵאַיִן תָּבֹא *whence comest thou* (just now)? but Gn 16^{8} (cf. 42^{7}) אֵי־מִזֶּה בָּאתָ *whence camest thou?* The imperfect represents the coming as still in its last stage, whereas the perfect represents it as an accomplished fact.

i **3.** In the sphere of *future time.* To express actions, &c., which are to be represented as about to take place, and as continuing a shorter or longer time in the future, or as being repeated; thus:

(*a*) From the standpoint of the speaker's present time, e. g. Ex 4^{1} *they will not believe* (יַאֲמִינוּ־) *me, nor hearken* (יִשְׁמְעוּ) *unto my voice: for they will say* (יֹאמְרוּ), &c., 6^{1}, 9^{5}, &c.

k (*b*) In dependent clauses to represent actions, &c., which from some point of time in the past are to be represented as future, e. g. Gn 43^{7} could we in any wise know *that he would say* (יֹאמַר)? 2^{19}, 43^{25}, Ex 2^{4}, 2 K 3^{27} אֲשֶׁר־יִמְלֹךְ *qui regnaturus erat*; 13^{14}, Jon 4^{5}, Jb 3^{3}, Ec 2^{3}, ψ 78^{6} *that the generation to come might know,* בָּנִים יִוָּלֵדוּ *the children which should be born* (*qui nascituri essent*; the imperfect here with the collateral idea of the occurrence being repeated in the future).

l (*c*) To represent a *futurum exactum*; cf. Is 4^{4}, 6^{11} (co-ordinated with a perfect used in the same sense, see § 106 *o*); so also sometimes after the temporal particles עַד, ψ 132^{5}, and עַד אֲשֶׁר *until,* Gn 29^{8}, Nu 20^{17}, &c.

m **4.** Finally to the sphere of future time belong also those cases in which the (modal) imperfect serves to express actions, events, or states, the occurrence of which is to be represented as willed (or not

willed), or as in some way conditional, and consequently only contingent. More particularly such imperfects serve—

n (*a*) As an expression of will, whether it be a definite intention and arrangement, or a simple desire, viz.:

(1) Sometimes in positive sentences in place of the cohortative (cf. e.g. ψ 59[17] with verse 18; 2 S 22[50] with ψ 18[50]; Ju 19[11], &c.), of the imperative (Is 18[3]), or of the jussive (which, however, in most cases, does not differ from the ordinary form of the imperfect), e.g. תֵּרָאֶה *let it appear* Gn 1[9], 41[34], Lv 19[2,3], 2 S 10[12] (and so frequently in verbs ל״ה; cf. § 109 *a*, note 2); Zc 9[5] (תָּחֵיל); ψ 61[7] (תְּוַסְּיֵהוּ); Pr 22[17] (תָּשִׁית); 23[1], Jb 6[23] (co-ordinated with the imperative), 10[20] *K^e th.*; so probably also יָדִין *let him judge!* ψ 72[2].—So also in the 1st pers., to express a wish which is asserted subsequently with reference to a fixed point of time in the past, e.g. Jb 10[18] אֱהִי *I ought to* [not *should* as A.V., R.V.] *have*, (then, immediately after being born) *given up the ghost*; cf. verse 19 אֱהִיֶה and אוּבָל Lv 10[18], Nu 35[28]. Even to express an obligation or necessity according to the judgement of another person, e.g. Jb 9[29] אֶרְשָׁע *I am to be guilty*, 12[4]. Cp. Jb 9[15], 19[16]; in a question, ψ 42[10], 43[2].

o (2) To express the definite expectation that something will not happen. The imperfect with לֹא represents a more emphatic form of prohibition than the jussive[1] with אַל־ (cf. § 109 *c*), and corresponds to our *thou shalt not do it!* with the strongest expectation of obedience, while אַל־ with the jussive is rather a simple warning, *do not that!* Thus לֹא with the imperfect is especially used in enforcing the divine commands, e.g. לֹא תִגְנֹב *thou shalt not steal* Ex 20[15]; cf. verses 3, 4, 5, 7, 10 ff. So לֹא with the 3rd pers. perhaps in Pr 16[10].

p Rem. The *jussive*, which is to be expected after אַל־, does not, as a rule (according to *n*, and § 109 *a*, note 2), differ in form from the simple imperfect. That many supposed jussives are intended as simple imperfects is possible from the occurrence after אַל־ of what are undoubtedly imperfect forms, not only from verbs ל״ה (cf. § 109 *a*, note 2), but also from verbs ע״ו, to express a prohibition or negative wish, אַל־תָּסוּר Gn 19[17], אַל־תָּבִיא Jos 1[7], אַל־נָא יָשִׁים 1 S 25[25]. Even with the 1st pers. plur. (after an imperative) וְאַל־נָמוּת *that we die not*, 1 S 12[19]. Also to express the conviction that something cannot happen, אַל־יָנוּם *he will not slumber*,[2] ψ 121[3]; cf. Jer 46[6], 2 Ch 14[10].

---

[1] As stated in § 46 *a*, a prohibition cannot be expressed by אַל־ and the imperative.

[2] To regard this as an optative (so Hupfeld) is from the context impossible. It is more probably a strong pregnant construction, or fusion of two sentences (such as, *do not think he will slumber!*). Verse 4 contains the objective confirmation, by means of לֹא with the imperf., of that which was previously only a subjective conviction.

q (3) In dependent clauses after final conjunctions (§ 165 *b*), as אֲשֶׁר, Gn 11[7] (אֲשֶׁר לֹא יִשְׁמְעוּ *that they may not understand*); בַּעֲבוּר Gn 21[30], 27[4.19], Ex 9[14], &c.; לְמַעַן אֲשֶׁר Nu 17[5]; לְמַעַן Dt 4[1], ψ 51[6], 78[6], and יַעַן אֲשֶׁר[1] Ez 12[12], *in order that*[2]; לְבִלְתִּי *that . . . not*, Ex 20[20], 2 S 14[14]; also after פֶּן *that not, lest*, Gn 3[22], 11[4], 19[15], &c.[3]; cf. also the instances introduced by וְלֹא in § 109 *g*.—In Lv 9[6] such an imperfect (or jussive? see the examples in § 109 *f*) is added to the expression of the command by an asyndeton, and in La 1[19] to the principal clause simply by וְ: *while they sought them food* וְיָשִׁיבוּ אֶת־נַפְשָׁם *to refresh their souls* (cf. also La 3[26], *it is good and let him hope*, i. e. *that he should hope*); so after an interrogative clause, Ex 2[7]. Finally also in a relative clause, ψ 32[8] בְּדֶרֶךְ־זוּ תֵלֵךְ *in the way which thou shouldst go*.

r (*b*) To express actions, &c., which are to be represented as possibly taking place or not taking place (sometimes corresponding to the *potential* of the classical languages, as also to our periphrases with *can, may, should*[4]). More particularly such imperfects are used—

s (1) In a permissive sense, e. g. Gn 2[16] *of every tree of the garden* (אָכֹל תֹּאכֵל) *thou mayest freely eat* (the opposite in verse 17); 3[2], 42[37], Lv 21[3.22], Jb 21[3]. In the 1st pers. ψ 5[8], 22[18] (*I may*, or *can, tell*); in a negative sentence, e. g. ψ 5[5].

t (2) In interrogative sentences, e. g. Pr 20[9] מִי־יֹאמַר *quis dixerit?* Cf. Gn 17[17], 18[14], 31[43], 1 S 11[12], 2 K 5[12] הֲלֹא־אֶרְחַץ בָּהֶם *may I not wash in them?* Is 33[14], ψ 15[1], 24[3], Ec 5[5]. So especially in a question expressing surprise after אֵיךְ, e. g. Gn 39[9] *how then can I . . .?* 44[34], Is 19[11], ψ 137[4], and even with regard to some point of time in the past, looking forward from which an event might have been expected to take place, e. g. Gn 43[7] הֲיָדוֹעַ נֵדַע *could we in any wise know . . .?* Cf. 2 S 3[33] (יָמוּת *was Abner to die as a fool*, i. e. *was he destined to die . . .?*), and so probably also Gn 34[31] (*should he deal . . .?*). Very closely connected with this is the use of the imperfect—

u (3) In a consecutive clause depending on an interrogative clause, e. g. Ex 3[11], *who am I* (כִּי אֵלֵךְ) *that I should* (*ought, could*) *go?* 16[7], Nu 11[12], Ju 9[28], 1 S 18[18], 2 K 8[13], Is 29[16], Jb 6[11], 21[15], similarly after אֲשֶׁר Gn 38[18], Ex 5[2].

---

[1] But יַעַן אֲשֶׁר in a causal sense (*because, since*), e. g. Ju 2[20] (as אֲשֶׁר Gn 34[27]) is followed by the perfect. On Jos 4[24] see above, § 74 *g*.

[2] R.V. *because he shall not see.*]

[3] In 2 K 2[16] פֶּן occurs with the perf. in a vivid presentment of the time when the fear is realized and the remedy comes too late. (In 2 S 20[6], since a *perfect consec.* follows, read with Driver יִמְצָא.)

[4] By this, of course, is not meant that these finer distinctions were consciously present to the Hebrew mind. They are rather mere expedients for making intelligible to ourselves the full significance of the Semitic imperfect.

Rem. In passages like 1 S 11^6, ψ 8^5, 114^5, the context shows that the *v* imperfect corresponds rather to our present. In such sentences the perfect also is naturally used in referring to completed actions, e.g. Gn 20^{10}, Ju 18^{28}, 2 S 7^{18}, Is 22^1.

(4) In *negative sentences* to express actions, &c., which cannot or *w* should not happen, e.g. Gn 32^{13} אֲשֶׁר לֹא־יִסָּפֵר מֵרֹב *which cannot be numbered for multitude*; 20^9 *deeds* (אֲשֶׁר לֹא־יֵעָשׂוּ) *that ought not to be done* (cf. above, *g*); ψ 5^5.

(5) In *conditional clauses* (the *modus conditionalis* corresponding *x* to the Latin present or imperfect conjunctive) both in the protasis and apodosis, or only in the latter, ψ 23^4 גַּם כִּי־אֵלֵךְ . . . לֹא־אִירָא רָע *yea, though I walk* (or *had to walk*) . . . *I fear* (or *I would fear*) *no evil*; Jb 9^{20} *though I be righteous, mine own mouth shall condemn me.* After a perfect in the protasis, e.g. Jb 23^{10}. Very frequently also in an apodosis, the protasis to which must be supplied from the context, e.g. Jb 5^8 *but as for me, I would seek unto God* (were I in thy place); $3^{13.16}$, $14^{14f.}$, ψ 55^{13}, Ru 1^{12}. However, some of the imperfects in these examples are probably intended as jussive forms. Cf. § 109 *h*.

§ 108. *Use of the Cohortative.*

The cohortative, i.e. according to § 48 *c*, the 1st pers.[1] sing. or *a* plur. of the imperfect lengthened by the ending ָה־,[2] represents in general an endeavour directed expressly towards a definite object. While the corresponding forms of the indicative rather express the mere announcement that an action will be undertaken, the cohortative lays stress on the determination underlying the action, and the personal interest in it.

Its uses may be divided into—

1. The cohortative standing alone, or co-ordinated with another *b* cohortative, and frequently strengthened by the addition of the particle נָא:

(*a*) To express self-encouragement, e.g. Ex 3^3 וגו׳ אָסֻרָה־נָּא *I will turn aside now, and see . . .!* So especially as the result of inward deliberation (in soliloquies), e.g. Gn 18^{21}, 32^{21} (rarely so used after אַל־, Gn 21^{16} *let me not look . . .!* Jer 18^{18}), and also as a more or less emphatic statement of a fixed determination, e.g. Is 5^1 *I will sing*[3] . . .! 5^6, 31^8. Cf. also Gn 46^{30} *now let me die* (*I am willing to die*),

[1] For the few examples of cohortatives in the 3rd sing., see § 48 *d*.

[2] But verbs ל״ה, according to § 75 *l*, even in the cohortative, almost always have the ending ֶה־; cf. e.g. in Dt 32^{20} אֶרְאֶה after אַסְתִּירָה.

[3] R.V. *let me sing*.]

since I have seen thy face; and ψ 31[8]. In the 1st pers. plur. the cohortative includes a summons to others to help in doing something, e. g. ψ 2[3] נְנַתְּקָה *come! let us break asunder!* &c., and Gn 11[3].

c (*b*) To express a wish, or a request for permission, that one should be allowed to do something, e. g. Dt 2[27] אֶעְבְּרָה *may I be allowed to pass through* (*let me pass through*)! Nu 20[17] נַעְבְּרָה־נָּא *may we be allowed to pass through!* Jer 40[15] *let me go, I pray thee!* &c.; 2 S 16[9]; so after לֹא 2 S 18[14]; after אַל 2 S 24[14], Jer 17[18], ψ 25[2] (אַל־אֵבוֹשָׁה *let me not be ashamed*; cf. ψ 31[2.18], 71[1]); 69[15]. After אַל־נָא Jon 1[14].

d **2.** The cohortative in dependence on other moods, as well as in conditional sentences: (*a*) In dependence (with *wāw copulative*; ψ 9[15] after לְמַעַן) on an imperative or jussive to express an intention or intended consequence, e. g. Gn 27[4] *bring it to me,* וְאֹכְלָה *that I may eat,* prop. *then will I eat*; Gn 19[5], 23[4], 24[56], 27[25], 29[21], 30[25 f.], 42[34], 49[1], Dt 32[1], Ho 6[1], ψ 2[8], 39[14], Jb 10[20] *Qᵉrê*; Is 5[19] *and let the counsel of the Holy One of Israel draw nigh and come,* וְנֵדָעָה *that we may know* (*it*)! Gn 26[28], 1 S 27[5]. Also after negative sentences, Gn 18[30.32], Ju 6[39], and after interrogative sentences, 1 K 22[7], Is 40[25], 41[26], Am 8[5].

e (*b*) In conditional sentences (with or without אִם) to express a contingent intention, e. g. Jb 16[6] אִם־אֲדַבְּרָה *should I determine to speak, my grief is not assuaged,* וְאַחְדְּלָה *and should I forbear, what am I eased?* without אִם Jb 19[18], 30[26] (where, however, וְאֵיחָלָה is probably intended); ψ 73[16] (unless וְאֶחְשְׁבָה should be read), 139[8 f.]. After the 3rd person, Jb 11[17] *though it be dark,* &c. So perhaps also 2 S 22[38] אֶרְדְּפָה *if I determined to pursue, then . . .*, but cf. ψ 18[38].

f (*c*) Likewise in the apodosis of conditional sentences, e. g. Jb 31[7 f.] *if my step hath turned out of the way . . .,* אֶזְרָעָה *then let me sow*; cf. 16[4 f.] *I also could speak as ye do, if . . . .!* So even when the condition must be supplied from the context, e. g. ψ 40[6] *else would I declare and speak of them*; 51[18] *else would I* (*gladly*) *give it,* i. e. if thou didst require it (cf. the precisely similar וְאֶשָּׂא ψ 55[13]); Jb 6[10]. In the 1st plur. Jer 20[10]. To the same category belong the cohortatives after the formula expressing a wish מִי־יִתֵּן, מִי־יִתְּנֵנִי, e. g. Jer 9[1] *oh, that I had . . .,* וְאַעֲזְבָה *then* (i. e. if I had) *should I* (or *would I*) *leave my people,* &c.; Ju 9[29]; without *Wāw* Is 27[4], ψ 55[7], Jb 23[4] (cf. also verse 7).

g Rem. 1. The question, whether a resolution formed under compulsion (a *necessity*) is also expressed by the cohortative (so, according to the prevailing opinion, in Is 38[10] אֶלְכָה; Jer 3[25], 4[19.21], 6[10], ψ 55[3.18] (?); 57[5], where, however, with Hupfeld, שְׁכָבָה should be read; 77[7], 88[16], and in the 1st plur. Is 59[10]), is to be answered in the sense that in these examples the cohortative *form* is used after its meaning has become entirely lost, merely for the sake of its fuller sound, instead of the ordinary imperfect. This view is strongly

supported by the rather numerous examples of cohortative forms after *wāw consec.* of the imperfect (cf. § 49 *e*, as also ψ 66[6] שָׂם נִשְׂמְחָה *there did we rejoice*[1]; ψ 119[163] וְאֶתְעֻבָה; Pr 7[7]), which can likewise only be explained as forms chosen merely for euphony, and therefore due to considerations of rhythm.

h 2. The cohortative is strange after עַד־ ψ 73[17] *until I went . . .* אָבִינָה *I considered their latter end*; possibly a pregnant construction for 'until I made up my mind, saying, I will consider', &c. (but אָבִינָה Pr 7[7] is still dependent on the preceding וְ); עַד־אַרְגִּיעָה Pr 12[19] is at any rate to be explained in the same way (in Jer 49[19], 50[44] we have כִּי־אֹ with a similar meaning), *as long as I* (intentionally) *wink with the eyelashes* (shall wink). On the other hand, in Ex 32[30] אֲכַפְּרָה is to be read, with the Samaritan, instead of אֲכַפֵּרָה after אוּלַי.

§ 109. *Use of the Jussive.*

a As the *cohortative* is used in the 1st pers., so the *jussive* is especially found in the 2nd and 3rd pers. sing. and plur. to express a more or less definite desire that something should or should not happen (cf. for its form, which frequently coincides with that of the ordinary *imperfect*,[2] § 48 *f*, *g*). More particularly its uses may be distinguished as follows:

1. The *jussive* standing alone, or co-ordinated with another jussive:

b (*a*) In affirmative sentences to express a command, a wish (or a blessing), advice, or a request; in the last case (the optative or precative) it is frequently strengthened by the addition of נָא. Examples: Gn 1[3] יְהִי אוֹר *let there be light!* Gn 1[6.9.11], &c. (the creative commands); Nu 6[26] *the Lord lift up his countenance upon thee, and give thee peace!* cf. verse 25. After particles expressing a wish, Gn 30[34] לוּ יְהִי *I would it might be;* ψ 81[9] אִם־תִּשְׁמַע־לִי *if thou wouldest hearken unto me!* As a humble request, Gn 44[33] . . . וְהַנַּעַר יַעַל . . . יֵשֶׁב־נָא עַבְדְּךָ *let thy servant, I pray thee, abide*, &c., *and let the lad go up*, &c., Gn 47[4].

c (*b*) In negative sentences to express prohibition or dissuasion, warning, a negative wish (or imprecation), and a request. The prohibitive particle used before the jussive (according to § 107 *o*) is almost always אַל־ (in negative desires and requests frequently

[1] Analogous to this cohortative (as equivalent to the imperfect) after שָׁם is the use of the historic imperf. after אָז, § 107 *c*.

[2] With regard to verbs ל״ה, it is true that the full form of the imperfect is frequently used with the meaning of the jussive (as also for the cohortative, see § 108 *a*, note 2), e.g. אַל־יִרְאֶה Jb 3[9] (but previously יִקְווּ *let it look for!*): especially *in* (Neh 2[3]) and immediately *before* the principal pause, Gn 1[9] תֵּרָאֶה; Ju 6[39] יִהְיֶה, but previously יְהִי־נָא; Is 47[3] תֵּרָאֶה, previously תִּגָּל; ψ 109[7]. On the attempt to distinguish such jussives from the imperfect by means of a special meaning ה__, see § 75 *hh*.

(אַל־נָא); e. g. Ex 34[3] אִישׁ אַל־יֵרָא *neither let any man be seen!* Pr 3[7] *be not* (אַל־תְּהִי) *wise in thine own eyes!* Jb 15[31] אַל־יַאֲמֵן *ne confidat.* In the form of a request (prayer), Dt 9[26] אַל־תַּשְׁחֵת *destroy not!* 1 K 2[20], ψ 27[9], 69[18].

d Rem. 1. The few examples of לֹא with the jussive could at most have arisen from the attempt to moderate subsequently by means of the jussive (voluntative) form what was at first intended to be a strict command (לֹא with imperf. indic.); probably, however, they are either cases in which the defective writing has been misunderstood (as in 1 K 2[6], Ez 48[14]), or (as in Gn 24[8]) instances of the purely rhythmical jussive form treated below, under *k*. Moreover, cf. לֹא יוֹסֵף Jo 2[2] and from the same verb Gn 4[12] (unless it is to be referred to *h*) and Dt 13[1]. The same form, however, appears also to stand three times for the cohortative (see below), and in Nu 22[19] for the ordinary imperfect (but see below, *i*). Thus it is doubtful whether an imaginary by-form of the ordinary imperf. is not intended by the Masora in all these cases, and whether consequently יוֹסֵף, &c., should not be restored.—On לֹא־תָחוֹס עֵינְךָ, &c., Dt 7[16], 13[9], &c., Ez 5[11], &c., cf. § 72 *r*, according to which תָּחוֹס should probably be read in every case.—The jussive appears in the place of the cohortative after לֹא 1 S 14[36] (וְלֹא־נַשְׁאֵר co-ordinated with two cohortatives), 2 S 17[12]; cf. Is 41[23] *K[e]th.* (ונרא, i. e. וְנֵרָא, after another cohortative); also (see above) לֹא אֶסֵף Dt 18[16], Ho 9[15], and even without לֹא Ez 5[16].

e 2. אַל־ with the jussive (or imperf., cf. § 107 *p*) is used sometimes to express the conviction that something cannot or should not happen; cf. Is 2[9] (where, however, the text is very doubtful) וְאַל־תִּשָּׂא לָהֶם *and thou canst not possibly forgive them* [R.V. *therefore forgive them not*]; ψ 34[6], 41[3], 50[3], 121[3] (אַל־יִתֵּן); Pr 3[25], Jb 5[22] אַל־תִּירָא *neither needest thou be afraid*; 20[17], 40[32].

f **2.** The jussive depending on other moods, or in conditional sentences:

(*a*) Depending[1] (with *Wāw*) on an imperative or cohortative to express an intention or an assurance of a contingent occurrence, e. g. Gn 24[51] *take her and go, and let her be* (וּתְהִי prop. *and she will be*)...; 30[3], 31[37], 38[24], Ex 8[4], 9[13], 10[17], 14[2], Jos 4[16], Ju 6[30], 1 S 5[11], 7[3], 1 K 21[10], ψ 144[5], Pr 20[22], Jb 14[6]. Also after interrogative sentences, which include a demand, Est 7[2] (say) *what is thy desire...*, וְתֵעָשׂ *and it shall* (i. e. in order that it may) *be granted!* 1 K 22[20], Is 19[12], Jb 38[34f.] Depending on a cohortative, e. g. Gn 19[20] אִמָּלְטָה נָּא שָׁמָּה *oh, let me escape thither...* וּתְחִי נַפְשִׁי *that my soul may live;* even after a simple imperf. (cf. below, *g*), 1 K 13[33] *whosoever would, he consecrated him...* וְיִהְיֶה *that he might be a priest* (read כֹּהֵן) *of the high places,* but probably the LXX reading וְיִהְיוּ is to be preferred.

---

[1] This does not include the cases in which the jussive is not logically dependent on a preceding imperat., but is merely co-ordinated, e. g. Gn 20[7], ψ 27[14], &c.

Rem. In 2 Ch 35[21] a negative final clause with וְאַל־ is dependent on an imperative, *forbear from* (meddling with) *God . . . that he destroy thee not.* As a rule, however, negative final clauses are attached to the principal sentence by means of וְלֹא and a following imperfect; so after an imperative, Gn 42[2], 1 K 14[2], 18[44]; after a jussive, Ex 30[20], Neh 6[9]; after a perfect consec., Ex 28[35.43], 30[12], Nu 18[5]; after לֹא with an imperfect, Lv 10[6], Nu 18[3], Dt 17[17] *neither shall he multiply wives unto himself* (וְלֹא יָסוּר לְבָבוֹ) *that his heart turn not away*; 1 S 20[14], 2 S 21[17], Jer 11[21]; after אַל־ with jussive, Lv 10[9], 11[43], 16[2], 2 S 13[25], Jer 25[6], 37[20], 38[24 f.]; after the asseverative אִם with the impft., Gn 14[23]; even after a simple imperfect, Jer 10[4] *with nails . . . they fasten it* (וְלֹא יָפִיק) *that it move not*; after a participle, Jb 9[7]. *g*

(*b*) Frequently in conditional sentences (as in Arabic), either in the protasis or in the apodosis, cf. ψ 45[12] יִתְאַו *should he desire . . . then . . .*; 104[20] וַיְהִי . . . תָּשֶׁת *if thou makest darkness, then it is night*; so also in the protasis, Ex 22[4], Lv 15[24], Is 41[28], Ez 14[7] (וְיַעַל), Jb 34[29]; in the apodosis, Ex 7[9] *then will it* (not, *then shall it*) *become a serpent*; Pr 9[9] after an imperat. in the protasis; Jb 10[16], 13[5], 22[28]. In a negative apodosis, Gn 4[12] (לֹא־תֹסֵף, but see above, *d*). In 2 K 6[27] אַל־יוֹשִׁיעֲךָ (*if the Lord do not help thee*, &c.) is to be explained as a jussive in a negative protasis. *h*

Rem. Undoubtedly this use of the jussive (in conditional sentences) is based on its original *voluntative* meaning; let something be so and so, then this or that must happen as a consequence. Certain other examples of the *jussive*, however, show that in the consciousness of the language the *voluntative* has in such cases become weakened almost to a *potential* mood, and hence the *jussive* serves to express facts which may happen *contingently*, or may be expected, e. g. Nu 22[19] (מַה־יֹּסֶף, but cf. above, *d*); Jb 9[33] *there is no daysman betwixt us, that might lay* (יָשֶׁת, hence plainly a *subjunctive* = *qui ponat*; also in Nu 23[19] וְיכַזֵּב *that he should lie* is probably intended as a jussive); Ec 5[14]; so after interrogative sentences, Jer 9[11] *who is the wise man,* וְיָבֵן *qui intelligat hoc?*; Ho 14[10]. *i*

Moreover, in not a few cases, the jussive is used, without any collateral sense, for the ordinary imperfect form. and this occurs not alone in forms, which may arise from a misunderstanding of the defective writing, as Dt 28[21.36], 32[8], 1 K 8[1], Is 12[1], Mi 3[4], 5[8], ψ 11[6], 18[12], 21[2] *Qerê* (מַה־נָּגַל, *Keth.* יְגַיל), 25[9], 47[4], 90[3], 91[14], 107[29], Pr 15[25], Jb 13[27], 15[33], 18[9], 20[2], 27[22], 33[11], 36[14], 38[24], Ec 12[6] (verse 7 יָשֹׁב, but immediately afterwards תָּשׁוּב), Dn 8[12],—but also in shortened forms, such as יְהִי Gn 49[17] (Sam. יִהְיֶה), Dt 28[8], 1 S 10[5], 2 S 5[24], Ho 6[1], 11[4], Am 5[14], Mi 1[2], Zp 2[13], Zc 9[5], ψ 72[16 f.] (after other jussives), 104[31], Jb 18[12], 20[23.26.28], 27[8], 33[21], 34[37], Ru 3[4]. This use of the jussive can hardly be due merely to poetic licence, but is rather to be explained on rhythmical grounds. In all the above-cited examples, in fact, the jussive stands at the beginning of the sentence (and hence removed as far as possible from the principal tone), in others it is immediately before the principal pause (Is 42[6], 50[2], ψ 68[15], Pr 23[25], Jb 24[14], 29[3], 40[19]), or actually *in* pause (Dt 32[18], Jb 23[9.11], La 3[50]), and is then a simply rhythmical shortening due to the strong influence of the tone. Moreover, since the jussive in numerous cases is not distinguished in form from the imperfect (§ 48 *g*), it is frequently doubtful which of the two the writer intended. This especially applies to those cases, in which a *subjunctive* is to be expressed by one or other of the forms (cf. § 107 *k* and *m–x*). *k*

§ 110. *The Imperative.*

Mayer Lambert, 'Sur la syntaxe de l'impératif en hébreu,' in *REJ.* 1897, p. 106 ff.

a 1. The imperative,[1] which, according to § 46, is restricted to the 2nd pers. sing. and plur., and to *positive* commands, &c., may stand either alone, or in simple co-ordination (as in 1 K 18^{44}, Is 56^{1}, 65^{18}) with other imperatives:

(*a*) To express real commands, e.g. Gn 12^{1} *get thee out of thy country*; or (like the jussive) mere admonitions (Ho 10^{12}) and requests, 2 K 5^{22}, Is 5^{3}; on the addition of נָא see below, Rem. 1. The imperative is used in the sense of an ironical challenge (often including a threat) in 1 K 2^{22} *ask for him the kingdom also*; 22^{15}, Jn 10^{14}, Is 47^{12} (with נָא), Jer 7^{21}, Ez 20^{39}, Am 4^{4}, Jb $38^{3f.}$, $40^{10ff.}$, La 4^{21}. The imperative has a concessive sense in Na 3^{15} (though thou *make thyself many*, &c.), and in the cases discussed under *f*, e.g. Is $8^{9f.}$, 29^{9}.

b (*b*) To express permission, e.g. 2 S 18^{23} after previous dissuasion, (then) *run* (as far as I am concerned)! Is 21^{12}, 45^{11}.

c (*c*) To express a distinct assurance (like our expression, *thou shalt have it*)[2] or promise, e.g. Is 65^{18} *but be ye glad*, &c. (i.e. ye will have continually occasion to be glad); and Is 37^{30}, ψ 110^{2}; in a threat, Jer 2^{19}. So especially in commands, the fulfilment of which is altogether out of the power of the person addressed, e.g. Is 54^{14} *be far from anxiety* (meaning, thou needst not fear any more); Gn 1^{28}, &c. (for other examples, such as 1 K 22^{12}, 2 K 5^{13}, see below, *f*). Most clearly in the case of the *imperative Niph'al* with a passive meaning, e.g. Gn 42^{16} וְאַתֶּם הֵאָסְרוּ *and ye shall be bound*; Dt 32^{50}, Is 49^{9} (Is 45^{22}, see below, *f*).

d Rem. 1. The particle נָא *age!* (§ 105) is frequently added to the imperative, as to the jussive, sometimes to soften down a command, or to make a request in a more courteous form (see above, *a*), Gn 12^{13}, 24^{2}, sometimes to strengthen an exhortation uttered as a rebuke or threat (Nu 16^{26}, 20^{10}) or in ridicule (Is 47^{12}).

e 2. The imperative after the desiderative particle לוּ Gn 23^{13} (at the end of verses 5 and 14 also read לוּ for לוֹ and join it to the following imperative) is due to an anacoluthon. Instead of the imperfect which would be expected here after לוּ, the more forcible imperative is used in a new sentence.

f 2. The imperative in logical dependence upon a preceding imperative, jussive (or cohortative), or an interrogative sentence, serves to

---

[1] On the close relation between the imperative and jussive (both in meaning and form), cf. § 46 and § 48 *i*.

[2] Like the threatening formulae in the Latin comic writers, e.g. *vapula*, Ter. Phorm. v. 6, 10 = *vapulare te iubeo*, Plaut. Curc. vi. 4, 12.

express the distinct assurance or promise that an action or state will ensue as the certain consequence of a previous action. So especially:

(*a*) The imperative when depending (with *wāw copulative*) upon another imperative. In this case the first imperative contains, as a rule, a condition, while the second declares the consequence which the fulfilment of the condition will involve. The imperative is used for this declaration, since the consequence is, as a matter of fact, intended or desired by the speaker (cf. *divide et impera*), e. g. Gn 42^{18} זֹאת עֲשׂוּ וִחְיוּ *this do, and live*, i. e. thus shall ye continue to live. Gn 17^{1}, 1 K 22^{12}, 2 K 5^{13}, Is 36^{16}, 45^{22} (וְהִוָּשְׁעוּ), Jer 6^{16}, Am $5^{4.6}$, ψ 37^{27}, Pr $3^{3f.}$, 4^{4}, 7^{2}, 13^{20} *Keth.*, Jb 2^{9}, 2 Ch 20^{20}; in Jer 25^{5}, Jb 22^{21} נָא is added to the first imperative. In other cases, the first imperative contains a mocking concession, the second an irrevocable denunciation, e. g. Is 8^{9} רֵעוּ עַמִּים וְחֹתּוּ (continue to) *make an uproar, O ye peoples, and ye shall be broken in pieces*; cf. verse 9 *b*.

Rem. 1. If a promise or threat dependent on an imperative be expressed in the 3rd pers. then the jussive is naturally used instead of the 2nd imperative Is 8^{10}, 55^{2}. *g*

2. In Pr 20^{13} the second imperative (containing a promise) is attached by asyndeton; elsewhere two imperatives occur side by side without the copula, where the second might be expected to be subordinated to the first, e. g. Dt 2^{24} הָחֵל רֵשׁ (where רֵשׁ is virtually, as it were, an object to הָחֵל) *begin, take in possession* for *to take in possession* (cf., however, Ju 19^{6} הוֹאֶל־נָא וְלִין *be content, I pray thee, and tarry all night*, and on this kind of co-ordination in general, cf. § 120 *d*). But such imperatives as לֵךְ (לְכוּ), קוֹם (קוּמוּ), when immediately preceding a second imperative, are for the most part only equivalent to interjections, *come! up!* *h*

(*b*) The imperative, when depending (with *wāw copulative*) upon a jussive (cohortative), or an interrogative sentence, frequently expresses also a consequence which is to be expected with certainty, and often a consequence which is intended, or in fact an intention; cf. Gn 20^{7} *and he shall pray for thee*, וְחָיֶה *and thou shalt live*; cf. Ex 14^{16}, 2 K 5^{10}, Jb 11^{6}, ψ 128^{5} *the Lord bless thee . . . so that* (or *in order that*) *thou seest*, &c.; Ru 1^{9}, 4^{11}; after a cohortative, Gn 12^{2}, 45^{18}, Ex 3^{10} וְהוֹצֵא *that thou mayest bring forth*; Ex 18^{22}, 1 S 12^{17}, 1 K 1^{12}; Jer 35^{15} (after imperative and jussive); after an interrogative sentence, 2 S 21^{3} *wherewith shall I make atonement*, וּבָרְכוּ *that ye may bless*, &c.—In Nu 5^{19} the imperative without וְ (in 32^{23} with וְ) is used after a conditional clause in the sense of a definite promise. *i*

Rem. The *2nd sing. masc.* occurs in addressing feminine persons in Ju 4^{20} (עֲמֹד, according to Qimḥi an infinitive, in which case, however, the infinitive absolute עָמֹד should be read; but probably we should simply read עִמְדִי with Moore), Mi 1^{13} and Zc 13^{7} (after עוּרִי); and in Is 23^{1}, the *2nd plur. masc.* (On *k*

the four forms of the *2nd fem. plur. imperative* in Is 32^{11}, erroneously explained here in former editions, see now § 48 *i*). In Na 3^{15} the interchange of masc. and fem. serves to express totality (the nation in all its aspects). Cf., moreover, § 145 *p* on other noticeable attempts to substitute the corresponding masculine forms for the feminine.

§ 111. *The Imperfect with Wāw Consecutive.*

a **1.** The *imperfect* with *wāw consecutive* (§ 49 *a–g*) serves to express actions, events, or states, which are to be regarded as the temporal or logical sequel of actions, events, or states mentioned immediately[1] before. The *imperfect consecutive* is used in this way most frequently as the *narrative tense*, corresponding to the Greek *aorist* or the Latin *historic perfect*. As a rule the narrative is introduced by a perfect, and then continued by means of imperfects with *wāw consecutive* (on this interchange of tenses cf. § 49 *a*, and especially § 112 *a*), e. g. Gn 3^{1} *now the serpent was* (הָיָה) *more subtil . . . and he said* (וַיֹּאמֶר) *unto the woman*; 4^{1}, $6^{9\text{ff.}}$, $10^{9\text{f.}}$, 15^{19}, $11^{12\text{ff.}\ 27\text{ff.}}$, $14^{5\text{f.}}$, $15^{1\text{f.}}$, $16^{1\text{f.}}$, $21^{1\text{ff.}}$, $24^{1\text{f.}}$, $25^{19\text{ff.}}$, $36^{2\text{ff.}}$, 37^{2}.

b Rem. 1. To this class belong some of the numerous *imperfects consec.* after various expressions of time, whenever such expressions are equivalent in meaning to a perfect[2] (viz. הָיָה *it came to pass*), e. g. Is 6^{1} *in the year that king Uzziah died, I saw* (וָאֶרְאֶה), &c.; Gn 22^{4}, 27^{34}, Ju 11^{16}, 1 S 4^{19}, 17^{57}, 21^{6}, Ho 11^{1}: on the use of וַיְהִי to connect expressions of time, see below, *g*.—It is only in late books or passages that we find the simple *perfect* in a clause following an expression of time, as 1 S 17^{55} (cf. Driver on the passage), 2 Ch 12^{7}, 15^{8}, &c., Dn 10^{11}, 15^{19}; the *Perfect* after וְ and the subject, 2 Ch 7^{1}.

c 2. The continuation of the narrative by means of the imperfect consec. may result in a series of any number of such imperfects, e. g. there are forty-nine in Gn. 1. As soon, however, as the connecting *Wāw* becomes separated from the verb to which it belongs, by the insertion of any word, the perfect necessarily takes the place of the imperfect, e. g. Gn 1^{5} *and God called* (וַיִּקְרָא) *the light Day, and the darkness he called* (וְלַחֹשֶׁךְ קָרָא) *Night*; verse 10, 2^{20}, 11^{3} and frequently.

d 3. Of two co-ordinate *imperfects consecutive* the former (as equivalent to a temporal clause) is most frequently subordinate in sense to the latter, e. g. Gn $28^{8\text{f.}}$ וַיַּרְא עֵשָׂו . . . וַיֵּלֶךְ *when Esau saw that . . . , he went*, &c.; so also, frequently וַיִּשְׁמַע, &c., Gn 37^{21}, &c. On the other hand, a second *imperfect consecutive* is seldom used in an explanatory sense, e. g. Ex 2^{10} (וַתֹּאמֶר *for she said*); cf. 1 S 7^{12}. Other examples of the imperfect consecutive, which apparently represent a progress in the narrative, in reality only refer to the same time, or explain what precedes, see Gn 2^{25} (וַיִּהְיוּ *they were*; but Jos 4^{9}, 1 K 8^{8} *they are*); Gn 36^{14} (וַתֹּלֶד), 36^{32} (וַיִּמְלֹךְ), 1 K 1^{44}.

---

[1] On an apparent exception (the *imperf. consec.* at the beginning of whole books) see § 49 *b* note.

[2] Cf. Is 45^{4}, where the *imperf. consec.* is joined to an abrupt statement of the cause, and Jb 36^{7}, where it is joined to an abrupt statement of the place.

4. The imperfect consecutive sometimes has such a merely *external* connexion with an immediately preceding perfect, that in reality it represents an antithesis to it, e.g. Gn 32^{31} *and (yet) my life is preserved*; 2 S 3^{8} *and yet thou chargest me*; Jb 10^{8}, 32^{8}; similarly in dependence on noun-clauses, Pr 30^{25} ff. *e*

2. The introduction of independent narratives, or of a new section of the narrative, by means of an *imperfect consecutive*, likewise aims at a connexion, though again loose and external, with that which has been narrated previously. Such a connexion is especially often established by means of וַיְהִי (καὶ ἐγένετο) *and it came to pass*, after which there then follows either (most commonly) an *imperfect consecutive* (Gn $4^{3.8}$, 8^{6}, 11^{2}, Ex 12^{29}, 13^{17}, &c.), or *Wāw* with the perfect (separated from it), Gn 7^{10}, 15^{12}, 22^{1}, 27^{30}, or even a perfect without *Wāw* (Gn 8^{13}, $14^{1f.}$, 40^{1}, Ex 12^{41}, 16^{22}, Nu 10^{11}, Dt 1^{3}, 1 S 18^{30}, 2 K 8^{21}, &c.), or finally a noun-clause introduced by *Wāw*, Gn 41^{1}. *f*

Rem. 1. This loose connexion by means of ויהי[1] is especially common, when the narrative or a new section of it begins with any expression of time, see above, *b*; cf., in addition to the above-mentioned examples (e.g. Gn 22^{1} *and it came to pass after these things, that God did prove Abraham*), the similar cases in Gn 19^{34}, 21^{22}, 1 S 11^{11}, Ru 1^{1}. Elsewhere the statement of time is expressed by בְּ or כְּ with an infinitive (Gn 12^{14}, $19^{17.29}$ 39^{13}, $15^{18f.}$, Ju 16^{25}) or by an independent sentence with the perfect (equivalent to a pluperfect, cf. § 106*f*), e.g. Gn 15^{17}, 24^{15}, 27^{30}, or by a temporal clause introduced by כִּי *when*, Gn 26^{8}, 27^{1}, Ju 16^{16}, בַּאֲשֶׁר *when*, Gn 12^{11}, 20^{13}, מֵאָז *from the time that*, Gn 39^{5}; or, finally, by a noun-clause (cf. § 116*u*), e.g. 2 K 13^{21} וַיְהִי הֵם קֹבְרִים אִישׁ *and it came to pass, as they were* (just) *burying a man* (prop. they burying), *that* . . .; Gn 42^{35}, 2 K 2^{11} (the apodosis in both these cases being introduced by וְהִנֵּה); 1 S 7^{10}, 2 S 13^{30}, 2 K $6^{5.26}$, 19^{37} (= Is 37^{38}).—In 1 S 10^{11}, 11^{11}, 2 S 2^{23}, 15^{2} a noun standing absolutely follows וַיְהִי (as the equivalent of a complete sentence; see below, *h*), and then an *imperfect consecutive* follows. *g*

2. Closely related to the cases noticed in *g* are those in which the *imperfect consecutive*, even without a preceding ויהי, introduces the apodosis either—(*a*) to whole sentences, or (*b*) to what are equivalent to whole sentences, especially to nouns standing absolutely. As in certain cases of the *perfect consecutive* (see § 112*x*), so the *imperfect consecutive* has here acquired a sort of independent force. Cf. for (*a*) 1 S 15^{23} *because thou hast rejected the word of the Lord*, וַיִּמְאָסֶךָ *he hath rejected thee* (cf. Nu 14^{16}, Is 48^{4}, where the causal clause precedes in the form of an infinitive with preposition), Ex 9^{21}; for (*b*) Gn 22^{24} וּפִילַגְשׁוֹ *and* (as to) *his concubine* . . ., וַתֵּלֶד *she bare*, &c.; Ex 38^{24}, Nu $14^{36f.}$, 1 S 14^{19}, 17^{24}, 2 S 4^{10}, 19^{41} *Kᵉth.*, 21^{16}, 1 K $9^{20f.}$, 12^{17}, 2 K 25^{22}, Jer 6^{19}, 28^{8}, 33^{24}, 44^{25}.[2]—In 1 K 15^{13}, 2 K 16^{14} the preceding noun, used absolutely, is even regarded as the object of the following imperfect consecutive, and is therefore introduced by אֶת־. *h*

---

[1] Exhaustive statistics of the use of ויהי in its many and various connexions are given by König in *ZAW.* 1899, p. 260 ff.

[2] Cf. the Mēša' inscription, l. 5 (*Omri*) *the king of Israel*, וַיְעַנֵּנִי *he oppressed Moab*, &c.—The peculiar imperfect consecutive in Gn 30^{27b} (in the earlier editions explained as equivalent to an object-clause) arises rather from a pregnant brevity of expression: *I have observed and* have come to the conclusion, *the Lord hath blessed me*, &c.—In Gn 27^{34} read, with LXX, וַיְהִי before כְּשָׁמְעַ.

i **3.** The *imperfect consecutive* serves, in the cases treated under *a–h*, to represent either expressly, or at least to a great extent, a *chronological* succession of actions or events; elsewhere it expresses those actions, &c., which represent the logical consequence of what preceded, or a result arising from it by an inherent necessity. Thus the *imperfect consecutive* is used—

k (*a*) As a final summing up of the preceding narrative, e.g. Gn 2^{1}, 23^{20} וַיָּקָם הַשָּׂדֶה וגו׳ *so* (in this way) *the field became* (legally) *the property of Abraham*, &c.; 1 S 17^{50}, 31^{6}.

l (*b*) To express a logical or necessary consequence of that which immediately precedes, e.g. Gn 39^{2}, Jb 2^{3} *and he still holdeth fast his integrity*, וַתְּסִיתֵנִי וגו׳ *so that thou thus* (as it now appears) *groundlessly movedst me against him*; ψ 65^{9} *so that they are afraid . . .*; even a consequence which happens conditionally, Jer 20^{17} וַתְּהִי *so that my mother should have been . . .* Another instance of the kind perhaps (if the text be correct) is Jer 38^{9} וָיָמֹת *so that he dies* (must die).

m Rem. Such consecutive clauses frequently occur after interrogative sentences, e.g. Is 51^{12} *who art thou* (i.e. art thou *so helpless*), וַתִּירְאִי *that thou art* (*must needs be*) *afraid?* ψ 144^{3} (cf. ψ 8^{5}, where in a very similar context כִּי *that* is used with the imperfect); Gn 12^{19} (וָאֶקָּחֶהָ); 31^{27} וָאֲשַׁלְּחֲךָ *so that I might have sent thee away.*

4. As regards the range of time it is to be carefully noticed—

n (*a*) That the *imperfect consecutive* may represent all varieties in the relations of tense and mood, which, according to § 107 *a*, follow from the idea of the imperfect;

o (*b*) That the more precise determination of the range of time to which an *imperfect consecutive* relates must be inferred in each case from the character of the preceding tense (or tense-equivalent), to which it is attached, in a more or less close relation, as temporal or logical sequence. Thus the *imperfect consecutive* serves—

p (1) To represent actions, events, or states, which are *past* (or were repeated in past time), when it is united with tenses, or their equivalents, which refer to an actual past.

q Cf. the examples given above, under *a* and *f*, of the imperfect consecutive as an historic tense. The imperfect consecutive also frequently occurs as the continuation of a perfect (*preterite*) in a subordinate clause; e.g. Gn 27^{1}, Nu 11^{20}, Dt 4^{37}, 1 S 8^{8}, 1 K 2^{5}, 11^{33}, 18^{13}, &c.; also in Is 49^{7} וַיִּבְחָרֶךָּ is the continuation of a preterite, contained, according to the sense, in the preceding אֲשֶׁר נֶאֱמָן.—In Jb $31^{26.34}$ the imperfect consecutive is joined to an imperfect denoting the past in a conditional sentence. An imperfect consecutive occurs in dependence on a perfect which has the sense of a pluperfect (§ 106*f*), e.g. in Gn 26^{18}, $28^{6\,f.}$, $31^{19.34}$ (*now Rachel had taken the teraphim*, וַתִּשְׁתֵּם *and had*

put them, &c.); Nu 14^{36}, 1 S 28^{3}, 2 S 2^{28}, Is 39^{1}. Finally there are the cases in which an infinitival or participial construction representing past time, according to § 113 *r*, § 116 *x*, is taken up and continued by an imperfect consecutive.

(2) To represent *present* actions, &c., in connexion with tenses, or *r* their equivalents, which describe actions and states as being either present or lasting on into the present (continuing in their effect); so especially,

(*a*) In connexion with the present perfects, described in § 106 *g*, e.g. ψ 16^{9} *therefore my heart is glad* (שָׂמַח) *and my glory rejoiceth* (וַיָּגֶל); Is 3^{16} (parallel with a simple imperfect). Cf. also such examples as ψ 29^{10} וַיֵּשֶׁב (prop. he sat down, *and has been enthroned* ever since), ψ 41^{13}.

(*β*) In connexion with those perfects which represent experiences *s* frequently confirmed (see § 106 *k*), e.g. Jb 14^{2} *he cometh up* (יָצָא) *like a flower, and is cut down* (וַיִּמָּל); *he fleeth* (וַיִּבְרַח) *also as a shadow,* וְלֹא יַעֲמוֹד *and continueth not*; Jb 20^{15}, $24^{2,11}$, Is 40^{24}, Pr 11^{2}.

(γ) In connexion with imperfects which, in one of the ways *t* described in § 107. 2, are used in the sense of the present; e.g. Jb 14^{10} *but man dieth* (יָמוּת) *and becometh powerless* (וַיֶּחֱלָשׁ), &c., i.e. remains powerless; Jb 4^{5}, Ho 8^{13}, Hb $1^{9f.}$, ψ 55^{18}, 90^{3}, Jb 5^{15}, 7^{18}, 11^{3} (*when thou mockest*), 12^{25}, 34^{24}, 37^{8} (parallel with a simple imperfect); 39^{15}. In the apodosis of a conditional sentence, ψ 59^{16}, so also after an interrogative imperfect, 1 S 2^{29}, ψ 42^{6} (וַתֶּהֱמִי for which in verse 12 and in 43^{5} we have וּמַה־תֶּהֱמִי *and why art thou disquieted?*).

(δ) In dependence on participles, which represent what at present *u* continues or is being repeated, e.g. Nu 22^{11}, 1 S 2^{6}, 2 S 19^{2} *behold the king weepeth* (בֹּכֶה) *and mourneth* (וַיִּתְאַבֵּל) *for Absalom*; Am 5^{8}, $9^{5f.}$, Na 1^{4}, ψ 34^{8}, Pr 20^{26}, Jb $12^{22ff.}$, but cf. e.g. Jb 12^{4} קֹרֵא לֶאֱלוֹהַּ *who called upon God,* וַיַּעֲנֵהוּ *and he answered him.*

(ε) In dependence on other equivalents of the present, as in Is 51^{12}, *v* ψ 144^{3} (see above, *m*); Jb 10^{22}. So especially as the continuation of an infinitive, which is governed by a preposition (cf. § 114 *r*), Is 30^{12}, Jer 10^{13}, ψ 92^{8}, &c.

(3) To represent *future* actions, &c., in dependence on—(*a*) an *w* imperfect which refers to the future, ψ 49^{15}, $94^{22f.}$;—(*β*) a perfect consecutive, or those perfects which, according to § 106 *n*, are intended to represent future events as undoubtedly certain, and therefore as though already accomplished (*perf. propheticum*); cf. Is 5^{15} (parallel with a simple imperfect separated from וְ); 5^{16} (cf. $2^{11,17}$, where the same threat is expressed by the perfect consecutive); 5^{25}, $9^{5,10f.}$,

$13^{15.17\,ff.}$, $22^{7\,ff.}$, Jo 2^{23}, Mi 2^{13}, Ez $33^{4.6}$, ψ 7^{13}, $64^{8\,ff.}$;—(γ) a future participle, Jer 4^{16}. [1]

x Rem. An imperfect consecutive in dependence on a perfect or imperfect, which represents an action occurring only conditionally, is likewise used only in a hypothetical sense, e.g. Jb 9^{16} אִם־קָרָ֣אתִי וַיַּעֲנֵ֑נִי *if I had called, and he had answered me, yet . . .*; ψ 139^{11} וָאֹמַ֣ר *if I should say* (previously, in verse 8 f., hypothetical imperfects are used).—In Is $48^{18\,f.}$ an imperfect consecutive occurs in dependence on a sentence expressing a wish introduced by לוּא *utinam* (וַיְהִי *and it*, or *so that it were*, equivalent to *then should it be*). Cf. also the examples mentioned above, under *l* (Jer 20^{17}) and *m* (Gn 31^{27}), where the imperfect consecutive expresses facts occurring *contingently*.

§ 112. *The Perfect with Wāw Consecutive.*

G. R. Berry, 'Waw consecutive with the perfect in Hebrew,' in *Bibl. Lit.*, xxii. (1903), pp. 60-69.

a **1.** The perfect, like the imperfect (§ 111), is used with *wāw consecutive* (cf. § 49 *a*; on the external differentiation of the perfect consecutive by a change in the position of the tone, see § 49 *h*) to express actions, events, or states, which are to be attached to what precedes, in a more or less close relation, as its *temporal* or *logical* consequence. And as, according to § 111 *a*, the narrative which begins with a perfect, or its equivalent, is continued in the imperfect consecutive, so, vice versa, the perfect consecutive forms the regular continuation to a preceding imperfect, or its equivalent.

b Rem. 1. This alternation of perfect and imperfect or their equivalents is a striking peculiarity of the *consecutio temporum* in Hebrew. It not only affords a certain compensation for the lack of forms for tenses and moods, but also gives to Hebrew style the charm of an expressive variety, an action conceived as being still in progress (*imperfect*, &c.), reaching afterwards in the *perfect* a calm and settled conclusion, in order to be again exhibited in movement in the imperfect, and vice versa.[2] The strict regularity of this

---

[1] Also in Jer 51^{29} the imperfects consecutive are attached to the threat virtually contained in the preceding imperatives. On the other hand וַיַּחֲלֹ֫ף Ho 8^{10} would be very remarkable as expressing a future; the text is, however, certainly corrupt, and hence the Cod. Babyl. and the Erfurt MS. 3 endeavour to remedy it by וְיַחְלֹ֫ף, and Ewald reads וְיַחֲלֹ֫ף.—In Ez 28^{16} (cf. Jer $15^{6\,f.}$) וָאַחֲלֶ֫ךָ appears to announce an action irrevocably determined upon, and therefore represented as already accomplished; cf. the prophetic perfects in verse 17 ff.

[2] It is difficult to give a proper explanation of this phenomenon (according to § 49 *a*, note, to be found only in the Canaanitish group of languages), when we have given up the theory of a special *wāw conversivum* in the unscientific sense mentioned in § 49 *b*, note, at the end, and if we accept the fact that the *perfect* and *imperfect consecutive* cannot possibly be used in a way which contradicts their fundamental character as described in §§ 106 and 107. In other words, even the *perfect consecutive* originally represents a finally completed action, &c., just as the *imperfect consecutive* represents an action which

alternation belongs indeed rather to the higher style, and even then it depends upon the view and intention of the speaker, whether he wishes the action, &c., to be regarded as the logical consequence of what has preceded, or as simply co-ordinate with it, and so in the same tense.

c 2. A succession of any number of other *perfects consecutive* may be co-ordinated with a *perfect consecutive* (cf. e. g. Ez 14^{18}, Am 5^{19}, Ru 3^{3}, four perfects in each case, Is 8^{7} five, Ex $6^{6f.}$ eight). It is true, however, of the perfect (as conversely of the *imperfect*, § 111 *c*), that as soon as the *Wāw* is separated by any intervening word from the verb to which it belongs, an *imperfect* necessarily takes the place of the *perfect*, e.g. Gn 12^{12} *when the Egyptians shall see thee, they shall say* (וְאָמְרוּ), *This is his wife: and they will kill me* (וְהָרְגוּ אֹתִי) *but thee they will save alive* (וְאֹתָךְ יְחַיּוּ).

d **2.** The perfect consecutive, like the imperfect consecutive, always belongs to the period of time expressed by the preceding tense, or its equivalent, with which it is connected as the temporal or logical consequence. The particular cases may be classed under three heads: (*a*) the perfect consecutive in *immediate* dependence (see *e*), (*b*) in loose connexion (see *x*) with the preceding, and (*c*) the perfect consecutive at the beginning of the apodosis to other sentences, or their equivalents (see *ff*).

e **3.** The perfect consecutive in immediate dependence on the preceding tense, or its equivalent, serves

(*a*) As a frequentative tense to express *past* actions, &c., i.e. actions repeatedly brought to a conclusion in the past, and follows tenses, or their equivalents, representing actions which have *continued* or been *repeated in the past*:

(*a*) After a simple imperfect, e. g. Gn 2^{6} אֵד יַעֲלֶה *there went up a mist* (again and again) *from the earth,* וְהִשְׁקָה *and watered* (as it were, *and ever watered afresh*), &c. This frequentative use of the perfect consecutive is equally evident after frequentative imperfects, Gn 2^{10} (וְהָיָה *and it became* again every time; וַיְהִי would mean, and it became so once for all); $29^{2f.}$ (four perfects consecutive referring to actions repeated daily); Ex 33^{7-11} יִקַּח *he used to take* at each new encampment *the tent,* וְנָטָה *and to pitch it* again every time *without the camp;* notice, amongst the numerous frequent. perff. consec., the imperf. in vv. 7, 8, 9, 11, always in a frequentative sense; $34^{34f.}$, Nu $9^{19.21}$ (among several simple imperfects), 10^{17}, Ju 2^{19}, 1 S 2^{19} תַּעֲשֶׂה

---

is only beginning, becoming or still continuing, and hence in any case incomplete. The simplest view is to suppose, that the use of the *perfect consecutive* originated from those cases, in which it had to express the conclusion (or final consequence) of an action which was continued (or repeated) *in past time* (see the examples above), and that this use was afterwards extended to other cases, in which it had to represent the temporal or logical consequence of actions, &c., still in progress, and thus in the end a regular interchange of the two tenses became recognized.

she used to make . . . וְהֶעֱלָתָה *and brought it to him from year to year*; 27[9] (וְלָקַח), 1 K 14[28], 2 K 3[25], 12[15] (in verses 16[f.] imperfects occur again). So also in dependent sentences, Gn 6[4] (וַיִּלְדוּ as a continuation of יָבֹאוּ), Jb 31[29]. [1]

f (*β*) After an imperfect consecutive, e. g. Ex 39[3] (Samaritan וקצצו), 1 S 5[7] (? see § 112 *rr*), 7[16], 2 S 15[2.5], 16[13] *and he threw stones at him,* וְעַפֵּר *and cast dust* continually; 12[16.31], 2 K 6[10], 12[11 ff. 15], Jer 37[15], Jb 1[5].

g Rem. The frequentative perfect consecutive is sometimes joined even with imperfects consecutive which simply express one *single* action or occurrence in the past; thus Ex 18[26], 4[c31 f.], 1 S 1[4], 2 S 15[1 f.], 1 K 14[27] (cf. verse 28); 1 K 18[4], 2 K 12[10]. For other examples of a loosely connected frequentative perfect consecutive, see below, *dd*.

h (*γ*) After a perfect, Gn 37[3] (וְעָשָׂה לוֹ, i. e. as often as he needed a new garment)[2]; Gn 31[7], Nu 11[8], 1 S 16[14], 2 K 3[4], ψ 22[6]; [3] in interrogative sentences, 1 S 26[9] *who has ever,* &c.; ψ 80[13], Jb 1[1.4], Ru 4[7].

i (*δ*) After an infinitive, Am 1[11] עַל־רָדְפוֹ *because he did pursue his brother,* וְשִׁחֵת *and* (on each occasion) *did cast off all pity* (then an imperfect consecutive); after an infinitive absolute, Jos 6[13], 2 S 13[19], Jer 23[14].

k (*ε*) After a participle, Is 6[3] (וְקָרָא), &c., frequentative, as a continuation of עֹמְדִים, verse 2); 1 S 2[22], 2 S 17[17]. [4]

l (*ζ*) After other equivalents of tenses, e. g. Gn 47[22] *the priests had a portion from Pharaoh,* וְאָכְלוּ *and did eat* (year by year), &c.; 1 K 4[7].

m (*b*) To express *present* actions, &c., as the temporal or logical consequence of actions or events which continue or are repeated in the present, especially such as have, according to experience, been at all times frequently repeated, and may be repeated at any time:

(*α*) After a simple imperfect, e. g. Gn 2[24] *therefore a man leaves* (יַעֲזֹב *is accustomed to leave*) . . . וְדָבַק *and cleaves,* &c., here, as frequently elsewhere, clearly with the secondary idea of purpose, i. e. in order to cleave; Is 5[11] (if וְהָיָה is to be taken as a continuation

---

[1] Also in Ez 44[12] (where Stade, *ZAW.* v. 293, would read שָׁרְתוּ and וַיִּהְיוּ) the unusual tenses may have been intentionally chosen: *because they continually ministered and so always became afresh . . .*

[2] Driver, on this passage, rightly refers to 1 S 2[19].

[3] Am 4[7] would also come under this head, if וְהִמְטַרְתִּי is really intended, and the statement refers to the past; מָנַעְתִּי might, however, also be a perfect expressing positive assurance (§ 106 *m*), and the passage would then come under *s*.

[4] That וְהָלְכָה, &c., are frequentatives (*the maidservant used to go repeatedly and tell them*) may be seen from יָלְכוּ (necessarily an imperfect, since it is separated from וְ by הֵם) and יֹאכְלוּ; on the other hand in verse 18 וַיֵּרָא and וַיֵּלְכוּ of actions which happened only once.

of יַרְלִיקֵם); Is 28^{28}, Jer 12^{3}, Ho 4^{3}, 7^{7}, ψ 90^{6}, Jb 14^{9}; also in dependent clauses, Lv 20^{18}, Is $29^{8.11\,f.}$, Am 5^{19}.

(β) After a participle, as the equivalent of a sentence representing *n* a contingent action, &c., e. g. Ex 21^{12} מַכֵּה אִישׁ וָמֵת (instead of מַכֵּה there is in verse 20, &c. וְכִי יַכֶּה אִישׁ) *if one smite a man and* (so that) *he die*, &c., Ex 21^{16}, Is 29^{15}, Am 6^{1}, Hb 2^{12}.

(γ) After an infinitive absolute, Jer $7^{9\,f.}$ *will ye steal, murder, and* o *commit adultery* (simple infinitives absolute; cf. § 113 *ee*), וּבָאתֶם *and then come and stand before me . . . and say*, &c.; cf. below, *u*.

(*c*) To express *future* actions, &c., as the temporal or logical con- *p*
sequence of tenses, or their equivalents, which announce or require such future actions or events. Thus—

(α) After imperfects in the sense of a simple future, e. g. Am $9^{3\,f.}$ מִשָּׁם אֲחַפֵּשׂ וְלָקָחְתִּים *I will search and take them out thence*, &c.; Gn 4^{14}, 40^{13}, Ex 7^{3}, 1 S 17^{32}, 2 K 5^{11}, Jb $8^{6\,f.}$ (also with a change of subject, Gn 27^{12}, Ju 6^{16}, &c.); and in interrogative sentences, Gn 39^{9}, Ex 2^{7}, 2 S 12^{18}, 2 K 14^{10}, Am 8^{8}, ψ 41^{6}; cf. also Ru 1^{11}; in sentences expressing a wish, 2 S 15^{4}; as well as in almost all kinds of dependent clauses. Also in conditional clauses after אִם Gn 32^{9}, Ex 19^{5}, 1 S 1^{11}, or כִּי Gn 37^{26}, or הֵן Jer 3^{1}; in final clauses after לְמַעַן Gn 12^{13}, Nu 15^{40}, Is 28^{13}; after אֲשֶׁר Dt 2^{25}, or פֶּן Gn 3^{22}, 19^{19}, 32^{12}, Is 6^{10}, Am 5^{6}; in temporal clauses, Is 32^{15}, Jer 13^{16}; and in relative clauses, Gn 24^{14}, Ju 1^{12}, 1 S 17^{26}.

(β) After the jussive (or an imperfect in the sense of a jussive or *q*
optative) or cohortative, with the same or a different subject, e. g. Gn $1^{14\,f.}$ יְהִי מְאֹרֹת . . . וְהָיוּ *let there be lights . . . and let them be*, &c.; Gn 24^{4}, 28^{3}, 31^{44}, 1 K 1^{2}, 22^{13}, Ru 2^{7}, 1 Ch 22^{11}; after a jussive expressing an imprecation, ψ 109^{10}.

(γ) After an imperative, also with the same or a different subject, *r*
e. g. 2 S 7^{5} לֵךְ וְאָמַרְתָּ *go and tell* (that thou mayst tell), &c., and often, *perf. consec.* after לֵךְ (as also the *perf. consec.* of אֱמַר and דַּבֵּר very frequently follows other imperatives);. Gn 6^{14}, 8^{17}, $27^{43\,f.}$, 1 S $15^{3.18}$, 1 K 2^{36}, Jer 48^{26}.

(δ) After perfects which express a definite expectation or assurance *s*
(cf. § 106 *m* and *n*), e. g. Gn 17^{20} הִנֵּה בֵּרַכְתִּי אֹתוֹ וְהִפְרֵתִי אֹתוֹ *behold, I have blessed him, and will make him fruitful*, &c.; Is 2^{11}, 5^{14}; on Am 4^{7} see above, note 3 on *h*; in an interrogative sentence, Ju 9^{9}, 11^{13}.

(ε) After a participle, e. g. Gn 7^{4} *for yet seven days,* אָנֹכִי מַמְטִיר *t*
and I will cause it to rain . . . וּמָחִיתִי *and I will* (i. e. in order to) *destroy*, &c.; Jer 21^{9}; also with a different subject, Gn $24^{43\,f.}$ *the*

maiden which cometh forth (הַיֹּצֵאת) . . ., וְאָמַרְתִּי אֵלֶיהָ *to whom I shall say* . . ., וְאָמְרָה *and she* (then) *shall say*, &c. This use of the perfect consecutive is especially frequent after a participle introduced by הִנֵּה, e. g. Gn 6^{17} ; with a different subject 1 K 20^{36}, Am 6^{14} ; after a complete noun-clause introduced by הִנֵּה (cf. § 140), Ex 3^{13} *behold, I come* (i.e. if I shall come) . . . וְאָמַרְתִּי לָהֶם *and shall say unto them* . . ., וְאָמְרוּ *and they* (then) *shall say*, &c.; 1 S 14^{8}ff., Is 7^{14}, 8^{7} f., 39^{6}.

u (ζ) After an infinitive absolute, whether the infinitive absolute serves to strengthen the finite verb (see § 113 *t*), e. g. Is 31^{5}, or is used as an emphatic substitute for a cohortative or imperfect (§ 113 *dd* and *ee*), e. g. Lv 2^{6}, Dt 1^{16}, Is 5^{5}, Ez 23^{46} f.

v (η) After an infinitive construct governed by a preposition (for this change from the infinitive construction to the finite verb, cf. § 114 *r*), e. g. 1 S 10^{8} עַד־בּוֹאִי אֵלֶיךָ וְהוֹדַעְתִּי לָךְ *till I come unto thee* (prop. until my coming) *and show thee*, &c.; Gn 18^{25}, 27^{45}, Ju 6^{18}, Ez 39^{27}; cf. 1 K $2^{37.42}$.

w Rem. To the same class belong 1 S 14^{24}, where the idea of time precedes, *until it be evening and* until *I be avenged*, &c., and Is 5^{8}, where the idea of place precedes, in both cases governed by עַד־.

x **4.** The very frequent use of the perfect consecutive in direct dependence upon other tenses (see above, *d–v*) explains how it finally obtained a kind of independent force—especially for the purpose of announcing future events—and might depend loosely on sentences to which it stood only in a wider sense in the relation of a temporal or logical consequence. Thus the perfect consecutive is used—

(*a*) To announce *future* events, &c., in loose connexion with a further announcement, e. g. Gn 41^{30} וְקָמוּ and two co-ordinate perfects consecutive, equivalent to *but then shall arise*, &c.; frequently so after הִנֵּה with a following substantive (1 S 9^{5}), or a participial clause (cf. the analogous instances above, under *t*), e. g. 1 S 2^{31} *behold, the days come*, וְגָדַעְתִּי *that I will cut off*, &c.; Is 39^{6}, Am 4^{2}, 8^{11}, 9^{13}, and very often in Jeremiah; after an expression of time, Ex 17^{4}, Is 10^{25}, 29^{17}, Jer 51^{33}, Ho 1^{4}. Further, when joined to a statement concerning present or past facts, especially when these contain the reason for the action, &c., expressed in the perfect consecutive; cf. Is 6^{7} *lo, this hath touched thy lips,* וְסָר *therefore thine iniquity shall be taken away*, &c. (not copulative *and it is taken away*, since it is parallel with a simple imperfect), Gn 20^{11}, 26^{22}, Ju 13^{3} (here in an adversative sense); Ho 8^{14}. In loose connexion with a noun-clause, a long succession of perfects consecutive occurs in Ex 6^{6}ff. Also in Amos 5^{26} וּנְשָׂאתֶם may be an announcement *yea, ye shall take up*; but cf. below, *rr*.

Rem. 1. Very frequently the announcement of a future event is attached by means of וְהָיָה[1] *and it shall come to pass* (cf. the analogous continuation in the past by means of וַיְהִי, § 111, 2), after which the event announced (sometimes after a long parenthesis) follows in one or more (co-ordinate) perfects consecutive, Gn 9^{14}, 12^{12} (וְהָיָה כִי = *if*, as in 46^{33}, Ex 1^{10}, 22^{26} and frequently), 1 K 18^{12}, Is $14^{3\,f.}$, Am 8^{9}; or in the imperfect, Gn 4^{14}, Is 2^{2}, 3^{24}, 4^{3}, $7^{18.21\,ff.}$ (cf. 29^{8}); or in the jussive, Lv 14^{9}. It very rarely happens that the verb which is thus loosely added, agrees in gender and number with the following subject, as in Nu 5^{27}, Jer 42^{16} וְהִיְתָה (before הַחֶרֶב), and in Jer 42^{17} וְיִהְיוּ (before כָּל־הָאֲנָשִׁים). *y*

2. The jussive form וַיְהִי occurs (in the sense described in *y*) instead of וְהָיָה in 1 S 10^{5}, 2 S 5^{24} (1 Ch 14^{15}), 1 K 14^{5}, Ru 3^{4}, although in the first three places a jussive is wholly inadmissible in the context, and even in Ru 3^{4} (where an admonition follows) וְהָיָה would be expected (see below, *bb*). In 1 K 14^{5} the form is a textual error, and the pointing should simply be וַיְהִי. In the other passages ויהי (always before an infinitive with a preposition) stands at the beginning of the sentence at an unusually long distance from the principal tone, and hence is certainly to be explained according to § 109 *k*, except that in 1 S 10^{5}, &c., the simply rhythmical jussive form takes the place, not of the full imperfect form, but (exceptionally) of the perfect consecutive. *z*

(*b*) To introduce a command or wish: Dt 10^{19} *love ye therefore the stranger*; 1 S 6^{5}, 24^{16}, 1 K 2^{6} (in Gn 40^{14} the precative perfect consecutive, as elsewhere the cohortative, jussive, and imperative, is strengthened by means of נָא). So, also, in loose connexion with participial and other noun-clauses (see above, *x*), Gn $45^{12\,f.}$, 1 K $2^{2\,f.}$, Ru $3^{3\,f.}$, 3^{9}.—In Gn 17^{11} the perfect consecutive (וְנִמַלְתֶּם *and ye shall be circumcised*, &c.) is used to explain a preceding command. *aa*

Rem. As in the cases mentioned above under *y*, the connexion may be made by means of וְהָיָה. Thus with a following perfect consecutive, e.g. Gn 46^{33}, 47^{24}, Ju 4^{20}. Cf. also Gn 24^{14}, where the real wish, at least as regards the sense, is contained in the next sentence. *bb*

(*c*) To introduce a question, whether in loose connexion with another interrogative sentence (see above, *p*), e.g. Gn 29^{15} *art thou my brother* (equivalent to, *Surely thou art*), וַעֲבַדְתַּנִי *and shouldest thou then serve me for naught?* or with a positive statement, e.g. Ex 5^{5} (וְהִשְׁבַּתֶּם *will ye then make them rest?*); Nu 16^{10}, 1 S 25^{11}, and (if it is *Milʿra'*) ψ 50^{21} (וְהוֹכַחְתִּי). *cc*

(*d*) To introduce actions frequently repeated (hence analogous to the numerous examples of a frequentative perfect consecutive, above, under *e*), e.g. 1 S 1^{3} (וְעָלָה of annual festival journeys); 13^{21} (where, however, the text appears radically corrupt); 27^{9} (וְהִכָּה, i.e. every time, therefore continued by means of וְלֹא יְחַיֶּה); 1 K 5^{7} (וְכִלְכְּלוּ, *dd*

[1] On the various combinations with וְהָיָה see Königs statistics in *ZAW.* xix. 272 ff.

parallel with a simple imperfect); 9^{25}, Jer 25^{4}, Ho 12^{11}, Dn 8^{4}.—In Jb $1^{4\,f.}$ a series of frequentative perfects consecutive is interrupted by an imperfect consecutive, while a simple imperfect (as the *modus rei repetitae*) forms the conclusion. In Jer 6^{17} a similar perfect is expressly marked, by placing the tone on the final syllable (according to § 49 *h*), as parallel with the real perfects consecutive.

ee Rem. The loose connexion of *tempora frequentativa* by וְהָיָה (cf. the Rem. on *y* and *bb*) is also very common in this sense; thus with a following perfect consecutive, Gn $30^{41\,f.}$ (but in verse 42^{a}, where the verb is separated from the *Wāw* by an insertion, we find לֹא יָשִׂים *he used not to put them in*, according to § 107 *e*); Gn 38^{9}, Ex 17^{11}, $33^{7\,ff.}$ (see above, *e*), Nu 21^{9}, Ju 6^{3}, 19^{30}, 1 S 16^{23} (followed by five perfects consecutive); 2 S 15^{5}; with a following imperfect (as the *modus rei repetitae*), Ju 2^{19}, 2 S 14^{26}.—In Ju $12^{5\,f.}$ וְהִיה, contrary to what would be expected, is continued by means of the imperfect consecutive, and in 1 S 13^{22} by וְלֹא with the perfect (instead of the imperfect).

ff **5.** Further, the perfect consecutive is very frequently employed with a certain emphasis to introduce the apodosis after sentences (or their equivalents) which contain a condition, a reason, or a statement of time. Such an apodosis, as in the cases already treated, may represent either future events, or commands and wishes, or even events which have been often repeated in the past. Thus—

(*a*) The perfect consecutive occurs in the apodosis to conditional sentences[1] (§ 159 *g*, *o*, *s*):

(*α*) After אִם with the imperfect, e. g. 2 K $7^{4\,b}$ אִם־יְמִיתֻנוּ וָמַתְנוּ *if they kill us*, (well then) *we shall but die*; here the perfect consecutive is used obviously with greater emphasis than the imperfect (נָחְיֶה) which immediately precedes; Gn 18^{26}, $24^{8.41}$, 32^{9}, Nu 30^{15}, Ju 4^{20}, 1 S 1^{11}, 20^{6}, 1 K 3^{14}, Na 3^{12}, Ec 4^{11}.

gg (*β*) After אִם with the perfect (in the sense of a *futurum exactum*), Nu 5^{27}, 2 K 5^{20}, 7^{4a}, Is $4^{4\,f.}$; as precative apodosis after אִם־נָא with the *perf. preteritum*, Gn 33^{10}; as a frequentative perfect consecutive, to represent past events in the apodosis after אִם with a perfect, Gn 38^{9}, Nu 21^{9}, Ju 6^{3}, Jb 7^{4}; after אִם with imperfect, Gn 31^{8}.

hh (*γ*) After כִּי (*in case, suppose that*) with the imperfect, Gn 12^{12}, Ex 18^{16}, Ju 13^{17}, Is 58^{7}, Ez 14^{13}.[2] Frequentative with reference to the past, after כִּי with frequentative perfect, Ju 2^{18}, Jb $7^{13\,f.}$

---

[1] In a number of the examples of this kind the protasis is already loosely connected by means of וְהִיה, and hence some of them had to be already mentioned above, under *y*, *bb*, *ee*.

[2] In 1 S 24^{19} a question appears to be expressed by the perfect consecutive, *for if a man find his enemy, will he let him go well away?* Probably, however, with Klostermann, וְכִי should be read for וְכִי.

(δ) After אֲשֶׁר with the imperfect, Gn 44[9] וָמֵת . . . אֲשֶׁר יִמָּצֵא אִתּוֹ *ii*
with whomsoever . . . it be found, let him die; with the perfect, Ex 21[13] *and if a man lie not in wait*, &c.; Ju 1[12].

(ε) Very frequently after a perfect consecutive (one or more) containing the condition, e. g. Gn 44[29] וְלָקַחְתֶּם גַּם־אֶת־זֶה . . . וְהוֹרַדְתֶּם *kk*
and if ye take (or *shall have taken*) *this one also . . . ye shall bring down*, &c.; cf. Gn 33[13], 42[38], 44[4,22], 47[30], Nu 30[12], Ru 2[9], and probably also Ez 39[23].—Also frequentative in reference to the past, e. g. 1 S 17[34f.] . . . וּבָא הָאֲרִי
וְיָצָאתִי *and when there came* (as sometimes happened) *a lion . . . I went out*, &c.; Ex 33[10], Nu 10[17 ff.], 1 K 18[10], Jer 20[9] (the perfects consecutive being regularly continued in the apodosis by וְלֹא with an imperfect[1]).

Rem. The perfect consecutive may be used also in the protasis to express a condition when the employment of the perfect consecutive in the apodosis has become impossible, owing to an emphatic word having to stand before it; thus in Ez 14[14] on account of הֵמָּה; 33[4] on account of דָּמוֹ.—In 1 S 14[52] the imperfect consecutive, contrary to what might be expected, stands in the apodosis, *and when Saul saw any . . . valiant man, he took him unto him*, where וַיַּאַסְפֵּהוּ suggests the special case, rather than a repeated occurrence; cf. 2 S 15[2]. Conversely, in 1 S 2[16] (וַיֹּאמֶר perhaps a mere mistake for וְאָמַר), 17[35 b] an imperfect consecutive stands in the protasis. *ll*

(ζ) After various equivalents of sentences, which contain a condition; thus, after a substantive standing absolutely, or a participle (a *casus pendens*), Gn 17[14] וְעָרֵל זָכָר . . . וְנִכְרְתָה וגו׳ *and the uncircumcised male* (in case such an one be found), *he shall be cut off*, &c.; cf. Gn 30[32], Ex 12[15], 2 S 14[10], Is 6[13], and (after an infinitive with a preposition) 2 S 7[14]; in a wider sense also Ex 4[21], 9[19], 12[44], Is 9[4], 56[5]. *mm*

(*b*) The perfect consecutive serves as the apodosis to causal clauses; thus e. g. after יַעַן כִּי with the perfect, Is 3[16f.]; after יַעַן אֲשֶׁר with perfect, 1 K 20[28]; after עֵקֶב with perfect, Nu 14[24]; also after what are equivalent to causal clauses, e. g. ψ 25[11] (לְמַעַן שִׁמְךָ . . . וְסָלַחְתָּ *for thy name's sake . . . pardon . . .*); Is 37[29] after יַעַן with an infinitive. *nn*

(*c*) The perfect consecutive occurs as the apodosis to temporal clauses or their equivalents, e. g. 1 S 2[15] בְּטֶרֶם יַקְטִרוּן אֶת־הַחֵלֶב . . . וּבָא
נַעַר הַכֹּהֵן *before they burnt the fat, the priest's servant came* (used to come), &c., hence a frequentative perfect consecutive relating to the past, as in Ex 1[19]; also after participial clauses (§ 116 *w*), e. g. 1 S 2[13f.] כָּל־אִישׁ זֹבֵחַ זָבַח . . . וּבָא *when*(ever) *any man offered sacrifice, then came*, *oo*

[1] In all these examples (not only in the frequentative perfects consecutive) the original idea of the perfect, which also underlies the perfect consecutive, comes out very distinctly. Gn 44[29] (see above) implies in the mind of the speaker, If it ever shall have come to this, that ye *have taken* this one also, then *ye have* thereby brought me down to Sheol.

&c. (so Ju 19^{30}, 2 S 20^{12}), with a frequentative perfect consecutive. The perfect consecutive is very frequently used to announce future actions or events after simple expressions of time of any kind; thus Gn 3^5, Ex 32^{34} (after בְּיוֹם with the infinitive), cf. also such examples as Gn 44^{31}, Ju 16^2, Jos 6^{10}, 1 S 1^{22}, 16^{23} (numerous frequentative perfects consecutive after the infinitive with a preposition; so 2 S 15^5, see above, *ee*); 1 S 20^{18}, 2 S 14^{26}, 15^{10}, Is 18^5; moreover, Ex 17^4, Is 10^{25}, 29^{17}, 37^{26}; even after single disconnected words, e. g. Ex 16^6 עֶרֶב וִידַעְתֶּם *at even* (when it becomes evening) *then ye shall know*; cf. verse 7, Lv 7^{16}, 1 K 13^{31}, Pr 24^{27}.

pp 6. Finally there still remains a number of passages which cannot be classed with any of those hitherto mentioned. Of these, some are due to the influence of Aramaic modes of expression, while in others the text is evidently corrupt.[1] In a few instances we can do no more than merely call attention to the incorrectness of the expression. (We are not of course concerned here with the cases—usually occurring in dependent clauses—in which a 2nd pers. *perf.* with Wāw copulative is simply co-ordinate with what precedes, as in Gn 28^6, and probably Nu 21^{15}, Dt 33^2.)

(*a*) The influence of the Aramaic construction of the perfect with וְ as the narrative tense, instead of the Hebrew imperfect consecutive (cf. Kautzsch, *Gramm. des Bibl.-Aram.*, § 71 *b*), is certainly to be traced in *Qoheleth*, and sporadically in other very late books,[2] perhaps also in a few passages in the books of Kings, which are open to the suspicion of being due to later interpolation; so probably 1 K 12^{32} וְהֶעֱמִיד; 2 K 11^1 *Keth.* וראתה; 14^{14} וְלָקַח (in the parallel passage, 2 Ch 25^{24}, the word is wanting); 2 K 23^4 וַיְנַשֵּׂא, &c.; verse 10 וַיְטַמֵּא, &c.; verse 12 וַיְנַתֵּץ, &c.; verse 15 וַיִּשְׂרֹף, &c.[3] Cf. also Ez $37^{2.7.10}$.

qq (*b*) The text is certainly corrupt in Is 40^6 (read with the LXX and Vulgate

---

[1] Mayer Lambert, *REJ.* xxvi. 55, is probably right in pointing some of these forms as *infin. abs.* instead of *perfects*.

[2] In the whole of *Qoheleth* the imperfect consecutive occurs only in 1^{17} and $4^{1.7}$. Several of the perfects with וְ can no doubt be explained as frequentatives, e. g. 1^{13}, $2^{5.9.11.13.15}$, 5^{18}, compared with 6^2; but this is impossible in such passages as $9^{14\,ff.}$ In Ezra, Driver reckons only six examples of the historical perfect with וְ, in Nehemiah only six, and in Esther six or seven.

[3] Stade in *ZAW.* v. 291 ff. and in *Ausgewählte akad. Reden*, Giessen, 1899, p. 194 ff. and appendix p. 199, discusses, in connexion with 2 K 12^{12}, a number of critically questionable perfects with וְ. He considers that the whole section, 2 K 23^4 from וַיְנַשֵּׂא to verse 5 inclusive, is to be regarded as a gloss, since the continuation of an imperfect consecutive by means of a perfect with וְ never occurs in pre-exilic documents, except in places where it is due to corruption of the original text. The theory of frequentative perfects consecutive (even immediately after imperfects consecutive), which has been supported above, under *f* and *g*, by a large number of examples, is quite inconsistent with the character of the action in 2 K 23^5 וְהִשְׁבִּית, verse 8 וְנָתַץ, and verse 14 וְשִׁבַּר.

וְאָמַר); Jer 38^{28}, where the narrative breaks off in the middle of the sentence; 40^{3} (וַיהוָה, &c., wanting in the LXX); also in Ju 7^{13} וְנָפַל הָאֹהֶל is altogether redundant; in 1 S 3^{13} read, with Klostermann, the *2nd sing. masc.* instead of והגדתי; in 1 K 21^{12} וְהוֹשִׁיבוּ is, no doubt, incorrectly repeated from verse 9, where it is an imperative.

Of other questionable instances, (α) the following, at any rate, may also be *rr* explained as frequentatives, Gn 21^{25}, 49^{23}. Ex 36^{38}, 38^{28}, 39^{3}, 1 S 5^{7}, 17^{20}, 24^{11} (but even so וְאָמְרוּ would be expected); 2 K 23^{12}, Is 28^{26} (parallel with an imperfect); Am 5^{26} (unless it is rather, *yea, ye shall take up*; see above, *x*); ψ 26^{3}, Ez 8^{36}.

(β) A longer or constant continuance in a past state is perhaps represented *ss* by the perfect with וְ (as a variety of the frequentative perfect with וְ), in Gn 15^{6}, 34^{5}, Nu 21^{20}, Jos 9^{12}, 22^{3b}, Is 22^{14}, Jer 3^{9}. But the unusual *perfects consec.* in Jos 15^{3-11}, 16^{2-8} (ultimately parallel with an imperf. as in 17^{9}, 18^{20}), 18^{12-21}, $19^{11-14.22.26-29.34}$, are without doubt rightly explained by Bennett (*SBOT.*, Joshua, p. 23) as originally containing the directions either of God to Joshua or of Joshua to the people; cf. the evident trace of this in 15^{4b}. A redactor transformed the directions into a description but left the *perfects consec.*, which are to be explained as in *aa*. In the same way וְהָיוּ Ex 36^{29} is most simply explained as repeated from 26^{25}.

(γ) The following are due to errors in the text, or to incorrect modes of *tt* expression: Ex $36^{29\,f.}$, Ju 3^{23}, [1] 16^{18} (read וַיַּעֲלוּ), 1 S 4^{19}, 17^{38}, 2 S 16^{5}, $19^{18\,f.}$ (read צָלְחוּ and וַיַּעַבְרוּ), 1 K 3^{11} (where וישאלת is, no doubt intentionally, assimilated to the four other perfects); 13^{3}, 20^{21}; 2 K 14^{7} (where, with Stade, וְאֶת־הַסֶּלַע תָּפַשׂ should be read); 14^{14}, 18^{4} (where, at any rate, וְשָׁבַר might be taken as a frequentative, but not וברת, &c.; evidently the perfects are co-ordinated only in form with הוּא הֵסִיר); 18^{36}, 21^{15}, 24^{14}, Jer 37^{15} (where וְהִכּוּ, but not וְנָתְנוּ, might be frequentative); Ez 9^{7} (omit וְיָצְאוּ with Stade, and read וְהַכּוּ); 20^{22} (והשבתי *Mil'el* before an imperfect consecutive); Am 7^{4} (וְאָכְלָה after an imperfect consecutive); Jb 16^{12}.

Finally, in 1 S 1^{12}, 10^{9}, 17^{48}, 25^{20}, 2 S 6^{16}, 2 K 3^{15}, Jer 37^{11}, Am 7^{2} וַיְהִי is to be *uu* read throughout instead of וְהָיָה, but in Gn 38^{5} וְהִיא with the LXX.

B. The Infinitive and Participle.

§ 113. *The Infinitive Absolute.*

Cf. the dissertation of J. Kahan, and, especially, the thorough investigation by E. Sellin, both entitled, *Ueber die verbal-nominale Doppelnatur der hebräischen Participien und Infinitive*, &c., Lpz. 1889; F. Prätorius, 'Ueber die sogen. Infin. absol. des Hebr.' in *ZDMG.* 1902, pp. 546 ff.

1. The infinitive absolute is employed according to § 45 to emphasize *a* the idea of the verb *in the abstract*, i.e. it speaks of an action (or state) without any regard to the agent or to the circumstances of time and mood under which it takes place. As the *name* of an action the infinitive absolute, like other nouns in the stricter sense,

[1] Or does ונעל, as a frequentative, imply fastening with several bolts? It is, at all events, to be noticed, that in 2 S 13^{18} also ונעל follows an imperfect consecutive.

may form part of certain combinations (as a subject, predicate, or object, or even as a genitive,[1] see below); but such a use of the infinitive absolute (instead of the infinitive construct with or without a preposition) is, on the whole, rare, and, moreover, open to question on critical grounds. On the other hand, the infinitive absolute frequently exhibits its character as an expression of the *verbal idea* by taking an object, either in the accusative or even with a preposition.

b Examples of the use of the infinitive absolute:—

(*a*) As subject, Pr 25^{27} אָכֹל דְּבַשׁ הַרְבּוֹת לֹא טוֹב *it is not good to eat much honey*; Jer 10^{5}, Jb 6^{25}, Ec 4^{17}; epexegetically, after a demonstrative pronoun, Is $58^{5\,f.}$, Zc 14^{12}.

c (*b*) As predicate, Is 32^{17} *and the effect of righteousness* (is) הַשְׁקֵט וָבֶטַח *quietness* (prop. *to find rest*) *and confidence*.

d (*c*) As object, Is 1^{17} לִמְדוּ הֵיטֵב *learn to do well*; Is 7^{15}, Pr 15^{12}, Jb 9^{18}; according to the sense also Jer 9^{23} 23^{14}, as well as Is 5^{5} (הָסֵר and פָּרֹץ virtually depend on the idea of the wish contained in עֲשֵׂה); Is 22^{13}, where a long series of infinitives absolute is governed by הִנֵּה, and 59^{13} (six infinitives governed by יְדַבֵּר in verse 12); Dt 28^{56} is strange since the object precedes the infinitive absolute which governs it,[2] also Is 42^{24}, where the statement of place precedes the infinitive absolute.—In Jer 9^{4}, Jb 13^{3} the infinitive absolute as the object of the verb is placed before it for the sake of emphasis (with the verb negatived by לֹא in Is 57^{20}, Jer 49^{23}), so also in La 3^{45} where it is the remoter object and co-ordinated with a substantive.

e (*d*) As genitive, Is 14^{23} בְּמַטְאֲטֵא הַשְׁמֵד *with the besom of destruction*; so perhaps also 4^{4} בְּרוּחַ בָּעֵר; cf. further, Pr 1^{3}, 21^{16}. The infinitive absolute is never used in immediate connexion with prepositions[3] (which as being originally substantives govern the genitive), but always the infinitive construct; but if a second infinitive is co-ordinated by וְ with such an infinitive construct, it has the form of the infinitive absolute (since it is released from the immediate government of the preposition), e.g. 1 S 22^{13} . . . בְּתִתְּךָ לוֹ לֶחֶם וְשָׁאוֹל לוֹ בֵּאלֹהִים *in that thou hast given him bread . . . and hast enquired of God for him*; Ez 36^{3}; 1 S $25^{26.33}$ (after מָנַע); after לְ Ex 32^{6}, Jer 7^{18}, 44^{17}.

f (*e*) Governing an accusative of the object, e.g. Is 22^{13} הָרֹג בָּקָר וְשָׁחֹט צֹאן *slaying oxen and killing sheep*; cf. Ex 20^{8}, 23^{30}, Dt 5^{12}, Is 37^{19}, Ez 23^{30}, and of the examples in *a–d*, Dt 28^{56}, Is 5^{5}, $58^{6\,f.}$, Pr 25^{27}, &c.; followed by a preposition, e.g. Is 7^{15} מָאוֹס בָּרָע וּבְחוֹר בַּטּוֹב *to refuse the evil and choose the good*; Pr 15^{12} (הוֹכֵחַ לוֹ).

g If the object be a personal pronoun, then, since the infinitive absolute can never be united with a suffix (see the note on *a*), it is affixed by means of the accusative-sign אֵת (אֹת), e.g. Jer 9^{23} וְיָדוֹעַ אֹתִי *and knoweth me*; Ez 36^{3}.

---

[1] The infinitive absolute can never be joined with a genitive or a pronominal suffix.

[2] Perhaps הַצֵּנֵ according to § 53 *k* should be explained as an infinitive construct, or should be written הַצֵּנֶ.

[3] ואחרי שָׁתָה 1 S 1^{9} is impossible Hebrew, and as the LXX shows, a late addition.

2. Analogous to the use of the infinitive absolute as the accusative *h* of the object, mentioned in *d*, is its employment as a *casus adverbialis*[1] in connexion with some form of the finite verb, to describe more particularly the manner or attendant circumstances (especially those of time and place) under which an action or state has taken place, or is taking place, or will take place; e. g. Jer 22^{19} *he shall be buried with the burial of an ass,* סְחוֹב וְהַשְׁלֵךְ *a drawing and casting forth,* i. e. being drawn and cast forth, &c.; Gn 21^{16} (הַרְחֵק *a removing,* i. e. distant; cf. Ex 33^{7}, Jos 3^{16}); Gn 30^{32}, Ex 30^{36}, Nu $6^{5.23}$, 15^{35} (where a subject is added subsequently; see below, *gg*); Jos 3^{17}, 1 S 3^{12} (הָחֵל וְכַלֵּה *a beginning and ending,* i. e. from beginning to end); 2 S 8^{2}, Is 7^{11} (הַעֲמֵק and הַגְבֵּהַ, prop. *a making deep* . . ., and *a making high,* i. e. whether thy request extend to the world below or to the height above); 57^{17} (הַסְתֵּר *in hiding,* sc. my face); Jer 3^{15} (דֵּעָה וְהַשְׂכִּיל *with knowledge and understanding*); Hb 3^{13} (עָרוֹת, for the form cf. § 75 *aa*); Zc 7^{3}, ψ 35^{16} (חָרֹק, to define more precisely יָקְרְעוּ verse 15); Jb 15^{3}.[2]

Rem. 1. To an adverbial infinitive absolute of this kind, there may further *i* be added a *casus adverbialis* (the accusative of state or circumstance), or even a circumstantial clause, to define more exactly the manner in which the action is performed, e. g. Is 20^{2} *and he did so* הָלֹךְ עָרוֹם וְיָחֵף *walking naked and barefoot,* prop. in the condition of one naked, &c.; Is 30^{14} *a breaking in pieces* (acc. to the reading כָּתוֹת; the Masora requires כְּתוֹת) *without sparing.*

2. A few infinitives of this kind, all of which are in Hiph'il, have, through *k* frequent use, come to be treated by the language as simple adverbs; so especially הַרְבֵּה (cf. § 75 *ff*) *multum faciendo,* i. e. *multum,* very frequently strengthened by מְאֹד *very* and even used without connexion with a finite verb (see the Lexicon); also הֵיטֵב *bene faciendo,* i. e. *bene,* used especially to express the careful and thorough performance of an action (e. g. Dt 13^{15}); in Dt 9^{21}, 27^{8} it is added epexegetically to another adverbial infinitive absolute, in Jon 4^{9} it twice precedes the verb for the sake of emphasis. Finally, הַשְׁכֵּם *mane faciendo,* i. e. *early in the morning,* then in general *early* with the additional idea of earnestness; in 1 S 17^{16} joined with the infinitive absolute וְהַעֲרֵב a denominative from עֶרֶב *evening* (*morning and evening,* i. e. *early and late*), elsewhere (with the exception of Pr 27^{14}) always joined with the infinitive absolute of the governing verb, e. g. Jer 11^{7} *for I earnestly protested* (הַעֲלֹתִי) *unto your fathers* . . . הַשְׁכֵּם וְהָעֵד *rising early and protesting,* i. e. with earnest protestation; Jer 25^{3}, 26^{5} (where ו should be omitted before ה'); Jer 29^{19}, 32^{33}, 2 Ch 16^{15}.

---

[1] That this *casus adverbialis* also was originally regarded as an accusative, may be seen from classical Arabic, where an infinitive of this kind expressly retains the accusative ending. In Latin the ablative of the gerund corresponds in many ways to this use of the infinitive absolute.

[2] Also in 2 K 21^{13} for מָחֹה וְהָפַךְ read with Stade and Klostermann מָחֹה וְהָפֵךְ; similarly, with Stade, וְקָשֹׁה in Ju 4^{24}; וְחָזוֹק in Jer 23^{14}, and on Is 31^{5} cf. *t*.

l **3.** The infinitive absolute occurs most frequently in immediate connexion with the finite verb of the same stem, in order in various ways *to define more accurately* or *to strengthen the idea of the verb.*[1]

m These infinitives absolute joined immediately to the finite verb belong in a sense to the *schema etymologicum* treated in § 117 *p*, i.e. they are objects of the finite verb in question, except that the infinitive absolute (as a *nomen abstractum*) lays stress rather on the actual occurrence or the energy of the action (see the examples below), while the noun proper emphasizes the result or extent of the action; cf. e.g. Ex 22^{22} אִם־צָעֹק יִצְעַק אֵלַי *if* it actually happens that *he cries to me*, with Gn 27^{34} (as it were, *he cried*, so that *a great cry* was heard).

We must further distinguish—

n (*a*) The infinitive absolute used *before* the verb to *strengthen* the verbal idea, i.e. to emphasize in this way either the certainty (especially in the case of threats) or the forcibleness and completeness of an occurrence. In English, such an infinitive is mostly expressed by a corresponding adverb, but sometimes merely by putting greater stress on the verb; e.g. Gn 2^{17} מוֹת תָּמוּת *thou shalt surely die*, cf. $18^{10.18}$, 22^{17}, 28^{22}, 1 S 9^{6} (*cometh surely to pass*); 24^{21}, Am 5^{5}, 7^{17}, Hb 2^{3}, Zc 11^{17}; with the infinitive strengthened by אַךְ Gn 44^{28} (but 27^{30} *and Jacob was yet scarce gone out*, &c.); Gn 43^{3} הָעֵד הֵעִד בָּנוּ *he did solemnly protest unto us*; 1 S 20^{6} נִשְׁאֹל נִשְׁאַל *David earnestly asked leave of me*; Jos 17^{13}, Ju 1^{28} וְהוֹרֵישׁ לֹא הוֹרִישׁוֹ *and did not utterly drive them out*; especially typical instances are Am 9^{8} *I will destroy it from off the face of the earth* אֶפֶס כִּי לֹא הַשְׁמֵיד אַשְׁמִיד וגו׳ *saving that I will not utterly destroy*, &c.; Jer 30^{11} *and will in no wise leave thee unpunished*; cf. further Gn 20^{18}, 1 K 3^{26}, Jo 1^{7}, Jb 13^{5}.

o The infinitive absolute is used before the verb with less emphasis:

(1) Frequently at the beginning of the statement; cf. Driver on 1 S 20^{6}. However, in these cases a special emphasis on the following verb is sometimes intended; cf. above, *n*, on Gn 43^{3}, 1 S 20^{6}; also Gn 3^{16}, 26^{28}, 32^{17}, 1 S 14^{28}, 20^{3}. Elsewhere the infinitive absolute is evidently used only as possessing a certain fullness of sound (hence for rhythmical reasons, like some uses of the separate pronoun, § 135 *a*), as in Gn 15^{13}, $43^{7.20}$, Ju 9^{8}, 1 S 10^{16}, 23^{10}, 2 S 1^{6}, 20^{18}.

(2) Very frequently in conditional sentences after אִם, &c. The infinitive absolute in this case emphasizes the importance of the con-

[1] Cf. A. Rieder, *Die Verbindung des Inf. abs. mit dem Verb. fin . . . im Hebr.*, Lpz., 1872; also his *Quae ad syntaxin Hebraicam . . . planiorem faciendam ex lingua Graeca et Latina afferantur*, Gumbinnen (Programm des Gymnasiums), 1884. G. R. Hauschild, *Die Verbindung finiter und infiniter Verbalformen desselben Stammes in einigen Bibelsprachen*, Frankfurt a. M., 1893, discussing especially the rendering of such constructions in the Greek and Latin versions.

dition on which some consequence depends, e. g. Ex 15^{26} *if thou wilt diligently hearken*, &c., Ex 19^{5}, 21^{5}, $22^{3.11 f. 16.22}$ (see above, *m*); 23^{22}, Nu 21^{2}, Ju 16^{11}, 1 S 1^{11}, 12^{25}; after לוּ 1 S 14^{30}.

p The infinitive absolute is used to give emphasis to an antithesis, e. g. 2 S 24^{24} *nay; but I will verily buy* (קָנוֹ אֶקְנֶה) *it of thee*, &c. (not receive it as a gift); Ju 15^{13} *no; but we will bind thee fast . . . but surely we will not kill thee*; cf. further Gn 31^{30} (thou art indeed gone=) *though thou wouldst needs be gone* (Vulg. *esto*), *because thou sore longedst*, &c.; ψ $118^{13.18}$, 126^{6} (the second infinitive absolute as a supplement to the first—see below, *r*—comes *after* the verb).—Hence also, as permissive, Gn $2^{16 f.}$ אָכֹל תֹּאכֵל *thou mayest freely eat, but*, &c. (so that verse 16 is in antithesis to verse 17); or concessive, 1 S 2^{30} *I said indeed . . .*, 14^{43}.

q The infinitive absolute is used to strengthen a question, and especially in impassioned or indignant questions, e. g. Gn 37^{8} הֲמָלֹךְ תִּמְלֹךְ עָלֵינוּ *shalt thou indeed reign over us?* Gn 37^{10}, 43^{7}, Ju 11^{25}, 1 S 2^{27}, 2 S 19^{43}, Jer 3^{1}, 13^{12}, Ez 28^{9}, Am 3^{5}, Zc 7^{5}; but cf. also Gn 24^{5} *must I needs bring again?*

r (*b*) The infinitive absolute *after the verb*, sometimes (as in *n*) to intensify[1] the idea of the verb (especially after imperatives and participles, since the infinitive absolute can never precede either, e. g. Nu 11^{15}, Jb 13^{17}, 21^{2}, 37^{2} שִׁמְעוּ שָׁמוֹעַ *hearken ye attentively*; Jer 22^{10}; after participles, e. g. Is 22^{17}, also elsewhere, e. g. Nu 23^{11}, 24^{10} *thou hast altogether blessed them*; Jos 24^{10}, 2 K 5^{11}, Dn 11^{10}, and with the infinitive absolute strengthened by means of גַּם Gn 31^{15}, 46^{4}, Nu 16^{13}); sometimes to express the long *continuance* of an action; here again after an imperative, Is 6^{9} שִׁמְעוּ שָׁמוֹעַ *hear ye continually*; after a perfect, Jer 6^{29}; after a participle, Jer 23^{17}; after an imperfect consecutive, Gn 19^{9}, Nu 11^{32}.

s To this class belong especially those cases in which a second infinitive absolute is co-ordinated with the first; the latter then expresses either an accompanying or antithetical action or the aim to which the principal action is directed; e. g. 1 S 6^{12} הָלְכוּ הָלוֹךְ וְגָעוֹ *lowing as they went* (lowing continually; so after a participle, Jos 6^{13b} *Qᵉrê*); Gn 8^{7} *it went forth to and fro*[2]; Is 19^{22} *smiting and* (i. e. but also) *healing again*; Jo 2^{26} (see above, *m*).

t Rem. 1. Instead of a second infinitive absolute (see above) there is sometimes found a perfect consecutive (Jos. 6^{13a} and 2 S 13^{19} [but Stade's וְזָעוֹק is

[1] In Arabic also, the intensifying infinitive regularly stands *after* the verb, but in Syriac *before* the verb.

[2] Also in Ez 1^{14} for the distorted form רָצוֹא reads simply יָצוֹא וָשׁוֹב.

is preferable], in both places as perfect frequentative; Is 31^5 referring to the future, unless with Stade, *ZAW.* vi. 189, we read וְהַצִּיל and וְהִמְלִיט), or an imperfect consecutive (1 S 19^{23}, 2 S 16^{11}) or participle (2 S 16^5); cf. also *u*.

u 2. The idea of long *continuance* is very frequently expressed by the verb הָלַךְ *to go*, along with its infinitive absolute, or even by the latter alone, and this occurs not only when it can be taken in its literal sense (*to go, to walk*, as in the examples given above, Jos $6^{9.13}$, 1 S 6^{12}, 2 S 3^{16}, 13^{19}; cf. also, Is 3^{16}, where both infinitives stand *before* the verb, and ψ 126^6, where הָלוֹךְ precedes), but also in cases where הָלַךְ in the sense of *to go on, to continue*, merely performs the function of an adverb. The action itself is added in a second infinitive absolute, or sometimes (see above, *t*) in a participle or verbal adjective. Examples, Gn 8^3 וַיָּשֻׁבוּ הַמַּיִם . . . הָלוֹךְ וָשׁוֹב *and the waters returned . . . continually*; Gn 8^5, 12^9, Ju 14^9, 2 K 2^{11}; with a participle following, Jer 41^6 (unless we read וַיִּבְכֶּה, as in 2 S 3^{16}); with an adjective following, Gen 26^{13}, Ju 4^{24}, 1 S 14^{19}, 2 S 5^{10} (1 Ch 11^9), 2 S 18^{25}.[1]

On the other hand, in 1 S 17^{41} the participle הֹלֵךְ is used instead of the infinitive absolute. Of a different kind are the instances in which the participle הֹלֵךְ is used as predicate along with the co-ordinate adjective (Ex 19^{19}, 1 S 2^{26}, 2 S 3^1, 15^{12}, Est 9^4, 2 Ch 17^{12}) or participle (1 S 17^{15}, Jon 1^{11}, Pr 4^{18}, Ec 1^6).

v 3. The regular place of the negative is between the intensifying infinitive absolute and the finite verb,[2] e.g. Ex 5^{23} וְהַצֵּל לֹא־הִצַּלְתָּ *neither hast thou delivered at all*, Ju 15^{13}, Jer 13^{12}, 30^{11}; cf. Mi 1^{10} (אַל). Exceptions are Gn 3^4 (where the negation of the threat pronounced in 2^{17} is expressed in the same form of words); Am 9^8, ψ 49^8.

w 4. With a finite verb of one of the derived conjugations, not only the infinitive absolute of the *same* conjugation may be connected (Gn 28^{22} Pi'ēl; 17^{13}, Ex 22^3, Ez 14^3 Niph'al; Gn 40^{15} Pu'al; Ho 4^{18} Hiph'īl; Ez 16^4 Hoph'al), but also (especially with Niph'al, rarely with Pi'ēl and Hiph'īl; see Driver on 2 S 20^{18}) that of *Qal* as the simplest and most general representative of the verbal idea, 2 S 20^{18} (with Pi'ēl; but in Gn 37^{33}, 44^{28} טֹרַף is a passive of Qal, § 52 *e*); 46^4 (with Hiph'īl); Ex 19^{13}, 21^{20}, 2 S 23^7, Is 40^{30}, Jer 10^5, Jb 6^2 (with Niph'al); Is 24^{19} (with Hithpo'ēl; רֹעָה in the same verse must also, according to the Masora, certainly be the infinitive absolute Qal; see § 67 *o*), and so always מוֹת יוּמַת *he shall surely be put to death*. Elsewhere the infinitive absolute of a conjugation with kindred meaning is found, Lv 19^{20}, 2 K 3^{23} Hoph'al for Niph'al (but most probably we should read, with Driver, the *infin. Niph.* in both places, הֻפְדָּה and וְהֻחֳרַב); 1 S 2^{16} (Pi'ēl for Hiph'īl, unless יִקְטְרוּן is to be read); Ez 16^4 (Hoph'al for Pu'al).[3] Finally, the infinitive absolute may

[1] Cf. in French, *Le mal va toujours croissant, la maladie va toujours en augmentant et en empirant, 'continually increases and becomes worse and worse.'*

[2] Cf. Rieder, *Quo loco ponantur negationes* לֹא *et* אַל . . . (*Zeitschrift für Gymn.-Wesen*, 1879, p. 395 ff.).

[3] In three passages even the infinitive absolute of another stem of like sound occurs; but in Is 28^{28} אָדוֹשׁ is no doubt a mere textual error for דּוֹשׁ, and in Jer 8^{13}, according to § 72 *aa*, we should read אָסֹפְם, and in Zp 1^2 אָסֹף. Barth, *Nom.-bildung*, § 49 *b*, sees in אָדוֹשׁ and אָסוֹף infinitives *Hiph'il*, exactly corresponding in form to '*aqâm*[*ā*] the Aram. infin. 'Aph'ēl of קוּם; but there is no more evidence for a *Hiph.* of דּוּשׁ in Hebrew than for a stem אָדַשׁ.

equally well be represented by a *substantive* of kindred stem.[1] In Is 29[14] the substantive intensifying the verb is found *along with* the infinitive absolute.

x 5. Instead of the infinitive absolute immediately connected with the finite verb, an infinitive construct form appears (cf. § 73 *d*), in Nu 23[25] (גַּם קֹב; cf. Ru 2[16] גַּם שֹׁל); Jer 50[34] (רִיב יָרִיב); Pr 23[1] (בִּין תָּבִין). In the last instances the infinitive is probably assimilated to the imperfect, like the infinitive Niph'al in the forms noticed in § 51 *k* and note.—Cf. also 2 K 3[24] וַיָּבֹאוּ בֹּא וְהַכּוֹת (read so with the LXX) before א, hence, no doubt due to the dislike of a hiatus; so in ψ 50[21], Neh 1[7] (חָבֹל), all in rapid style; *after* the verb, Jos 7[7], unless הַעֲבִיר is intended.

y 4. Finally the infinitive absolute sometimes appears as *a substitute for the finite verb*, either when it is sufficient simply to mention the verbal idea (see *z*), or when the hurried or otherwise excited style intentionally contents itself with this infinitive, in order to bring out the verbal idea in a clearer and more expressive manner (see *aa*).

z (*a*) The infinitive absolute as the continuation of a preceding finite verb. In the later books especially it often happens that in a succession of several acts only the first (or sometimes more) of the verbs is inflected, while the second (or third, &c.) is added simply in the infinitive absolute. Thus after several perfects, Dn 9[5] (cf. verse 11) *we have sinned ... and have transgressed thy law,* וְסוֹר *and have turned aside* (prop. *a turning aside* took place); so after a *perfect* Ex 36[7] (?), 1 S 2[28], Is 37[19], Jer 14[5], 19[13], Hag 1[6] (four infinitives), Zc 3[4] (but read with Wellhausen, after the LXX, וְהַלְבֵּשׁוֹ אֹתוֹ), 7[5], Ec 8[9], 9[11], Est 3[13], 9[6.16.18], 12[6ff.], Neh 9[8.13], 1 Ch 5[20], 2 Ch 28[19];[2] after the *perfect consecutive*, Zc 12[10]; after the *perfect frequentative* 1 K 9[25] (unless וְהַקְטִיר be intended); after the simple *imperfect*, Lv 25[14], Nu 30[3], Jer 32[44] (three infinitives), 36[23], 1 Ch 21[24]; after a *cohortative*, Jos 9[20]; after the *imperfect consecutive*, Gn 41[43] (as a continuation of וַיַּרְכֵּב); Ex 8[11], Ju 7[19], Jer 37[21], Neh 8[8], 1 Ch 16[36], 2 Ch 7[3]; with אוֹ *or* after the *jussive*, Dt 14[21], Est 2[3], 6[9]; after the *imperative*, Is 37[30*b*], Am 4[4f.]; after the *participle*, Hb 2[15] (strengthened by אַף, and regarded, like the participle itself, as an adverbial accusative); Est 8[8].

aa (*b*) At the beginning of the narrative, or at least of a new section of it. The special form of the finite verb which the infinitive absolute represents must be determined from the context. The infinitive

---

[1] On these substantives (and on the use of the infinitive absolute generally as absolute object, see above, *m*), cf. the *schema etymologicum* treated in connexion with the government of the verb in § 117 *p*, *q*.

[2] In Ez 7[14] a perfect appears to be continued by means of an infinitive construct; but the text is quite corrupt; Cornill reads תִּקְעוּ תָּקוֹעַ הָכִינוּ הָכֵן.

absolute is most frequently used in this way, corresponding to the infinitive of command in Greek, &c.[1]:—

bb (*α*) For an emphatic imperative,[2] e. g. שָׁמוֹר (thou shalt, ye shall), *observe* Dt 5^{12}; זָכוֹר (thou shalt) *remember*, Ex 13^{3}, 20^{8} (the full form occurs in Dt 6^{17} תִּשְׁמְרוֹן שָׁמוֹר ; 7^{18} זָכֹר תִּזְכֹּר); Lv 2^{6}, Nu 4^{2}, 25^{17}, Dt 1^{16}, 2 K 5^{10}, Is 38^{5}, Jer 2^{2}, followed by a *perfect consecutive*; Jos 1^{13}, 2 K 3^{16}, Is 7^{4}, 14^{31} (parallel with an *imperative*; in Na 2^{2} three imperatives follow). But הַבֵּיט ψ 142^{5} may be only an incorrect spelling of הַבֵּט imperative.[3]

cc (*β*) For the jussive, Lv 6^{7}, Nu 6^{5}, 2 K 11^{15}, Ez 23^{46}; cf. also Pr 17^{12} (*let it* rather *meet*).

dd (*γ*) For the cohortative, Is 22^{13b} אָכוֹל וְשָׁתוֹ (the exclamation of the mocker); Ez 21^{31}, $23^{30.46}$; perhaps also Jer 31^{2} (הָלוֹךְ).[4]

ee (*δ*) For the imperfect in emphatic promises, e. g. 2 K 4^{43} ye shall *eat and leave thereof*; 19^{29} (Is 37^{30}), 2 Ch 31^{10}; also in indignant questions, Jb 40^{2} *shall he that cavilleth contend with the Almighty?*[5] (on the addition of the subject cf. the Rem. below); Jer 3^{1} *and thinkest thou to return again to me?* Jer $7^{9ff.}$ (six infinitives, continued by means of the *perfect consecutive*; cf. § 112 *o*).

ff (*ε*) For any historical tense (like the Latin *historic* infinitive) in lively narration (or enumeration) and description, even of what is still taking place in present time, e. g. Hos 4^{2} *swearing and breaking faith, and killing, and stealing, and committing adultery* (in these they are busied); 10^{4} (after a *perfect*); Is 21^{5}, 59^{4}, Jer 8^{15}, 14^{19}, Jb 15^{35}; cf. further Jer 32^{33}, Ec 4^{2}.—In Ez 23^{30}, Pr 12^{7}, 15^{22}, and 25^{4}, the infinitive absolute is best rendered by the passive.

---

[1] Cf. also such infinitives in French as *voir* (page so and so, &c.), *s'adresser . . .*, *se méfier des voleurs!*

[2] Prätorius, *op. cit.*, p. 547: the extraordinarily common use of the infinitive form *qāṭōl* in the sense of an imperative, jussive, or cohortative has long since caused it to be compared with the Arab. *fa'āli*. It thus appears that the infin. *qāṭōl* in Hebrew could be used from early times as a kind of fixed, invariable word of command.

[3] In Ez 21^{31}, for the infinitives construct הָסֵר, הָרֵם, הַשְׁפֵּיל (beside הַגְבֵּהַּ) read with Cornill the infinitives absolute הָסֵר, &c. The K^{e}thibh probably intends הָסֵיר, &c.

[4] In 2 S 3^{18} the infinitive construct appears to be used instead of the cohortative, but אוֹשִׁיעַ should certainly be read for הוֹשִׁיעַ. Also in 1 K 22^{30} (2 Ch 18^{29}), which was formerly included under this head (I will *disguise myself and go into the battle*), read אֶתְחַפֵּשׂ וְאָבֹא.

[5] In Jb 34^{18} in a similar question instead of the infinitive constr. we should rather expect the infinitive absolute (הָאָמֹר), unless with the LXX and Vulg. the participle with the article (הָאֹמֵר) is to be read.

Rem. The subject is sometimes added to the infinitive absolute when it takes the place of the finite verb, e. g. Lv 6^{7}, Nu 15^{35}, Dt 15^{2}, ψ 17^{5}, Pr 17^{12}, Jb 40^{2}, Ec 4^{2}, Est 9^{1}. So, probably, also in Gn 17^{10}, Ex 12^{48}, although here כָּל־זָכָר according to § 121 *a* might also be taken as *an object* with a passive verb; cf. Est 3^{13}. In 1 S $25^{26.33}$ the subject follows an infinitive absolute which is co-ordinated with an infinitive construct, see above, *e*. *gg*

§ 114. *The Infinitive Construct.*

1. The infinitive construct, like the infinitive absolute, may also represent a *nomen verbale* (§ 45 *a*), but of a much more flexible character than the infinitive absolute (cf. § 113 *a*). Its close relation with nouns properly so called is especially seen in the readiness with which the infinitive construct may be used for any case whatever; thus, *a*

(*a*) As the nominative of the subject, e. g. Gn 2^{18} לֹא־טוֹב הֱיוֹת הָאָדָם לְבַדּוֹ, literally, *not good is the being of man in his separation*; Gn 30^{15}, 1 S 23^{20}, Is 7^{13}, Pr 17^{26}, $25^{7.24}$ (but cf. 21^{9} טוֹב לָשֶׁבֶת in the same statement); ψ 32^{9} prop. *there is not a coming near unto thee*, but the text is probably corrupt. With a *feminine* predicate, 1 S 18^{23}, Jer 2^{17}.

(*b*) As genitive, e. g. Ec 3^{4} עֵת סְפוֹד וְעֵת רָקוֹד *a time of mourning and a time of dancing*; Gn 2^{17}, 29^{7}, Neh 12^{46}, 2 Ch 24^{14}. This equally includes, according to § 101 *a*, all those cases in which the infinitive construct depends on a preposition (see below, *d*) [and Driver, *Tenses*, § 206]. *b*

(*c*) As accusative of the object, e. g. 1 K 3^{7} לֹא אֵדַע צֵאת וָבֹא *I know not the going out or the coming in* (*I know not* how *to go out and come in*); Gn 21^{6}, 31^{28}, Nu 20^{21}, Is 1^{14}, 37^{28} (even with אֶת), Jer 6^{15}, Jb 15^{22} (cf. for the use of the infinitive absolute as object, § 113 *f*); as accusative with a verb expressing fullness, Is 11^{9}. *c*

2. The construction of the infinitive with prepositions (as in Greek, ἐν τῷ εἶναι, διὰ τὸ εἶναι, &c.) may usually be resolved in English into the finite verb with a conjunction, e. g. Nu 35^{19} בְּפִגְעוֹ־בוֹ *in his meeting him*, i. e. if (as soon as) he meets him; Gn 27^{45} (עַד־שׁוּב); Is 30^{12} יַעַן כִּי־אֲסַכֶּם *because ye despise*; Jer 2^{35} עַל־אָמְרֵךְ *because thou sayest*; Gn 27^{1} *and his eyes were dim* מֵרְאֹת *from seeing*, i. e. so that he could not see. *d*

This use of the infinitive construct is especially frequent in connexion with בְּ or כְּ to express time-determinations (in English resolved into a temporal clause, as above the combination of the infinitive with יַעַן or עַל־ is resolved into a causal clause), especially after וַיְהִי (see the *e*

examples, § 111 *g*), e. g. 1 S 2[27] בִּהְיוֹתָם בְּמִצְרַיִם *when they were in Egypt*; Gn 24[30] וַיְהִי כִּרְאֹת אֶת־הַנֶּזֶם . . . וּכְשָׁמְעוֹ וגו׳ *and it came to pass, when he saw* (prop. in the seeing) *the ring . . ., and when he heard* (prop. in his hearing), &c.

f But by far the most frequent is the connexion of the infinitive construct with לְ.[1] Starting from the fundamental meaning of לְ, i. e. *direction towards something*, infinitives with לְ serve to express the most varied ideas of purpose or aim, and very commonly also (with a weakening or a complete disregard of the original meaning of the לְ) to introduce the object of an action, or finally even (like the infinitive absolute used adverbially, § 113 *h*, and the Latin gerund in *-ndo*) to state motives or attendant circumstances. See the instances in the Remarks.

g Rem. 1. The original meaning of the לְ is most plainly seen in those infinitives with לְ which expressly state a purpose (hence as the equivalent of a final clause), e. g. Gn 11[5] *and the Lord came down*, לִרְאֹת אֶת־הָעִיר *to see the city*; also with a change of subject, e. g. 2 S 12[10] *and thou hast taken the wife of Uriah the Hittite* לִהְיוֹת לְךָ לְאִשָּׁה *to be* (i. e. that she may be) *thy wife*; cf. Gn 28[4], Jer 38[26] (לָמוּת).—If there is a special emphasis on the infinitive with לְ, it is placed, with its complement, before the governing verb, e. g. Gn 42[9], 47[4], Nu 22[20], Jos 2[3], 1 S 16[2] with בּוֹא; Ju 15[10], 1 S 17[25] with עֲלָה.

h 2. Just as clearly the idea of aiming at a definite purpose or turning towards an object may be seen in the combination of the verb הָיָה *to be*, with לְ and an infinitive. In fact הָיָה לַעֲשׂוֹת may mean, either (*a*) *he was in the act of, he was about to* (as it were, he set himself), *he was ready, to do* something, or (*b*) *he* or it *was appointed* or *compelled*, &c., to do the action in question. In the latter case הָיָה לַעֲשׂוֹת corresponds to the Latin *faciendum erat*, cf. also the English *I am to go*. In both cases הָיָה (as elsewhere when copula) is often omitted.

i Examples of (*a*) Gn 15[12] וַיְהִי הַשֶּׁמֶשׁ לָבוֹא *and when the sun was going down* (just about to set); 2 Ch 26[5] וַיְהִי לִדְרֹשׁ אֱלֹהִים *and he set himself to seek God* (here with the secondary idea of a continuous action); with the omission of הָיָה Is 38[20], יְהוָה לְהוֹשִׁיעֵנִי *the Lord* is ready *to save me*; 1 S 14[21] (?), Jer 51[49], ψ 25[14] (*et foedus suum manifestaturus est eis*); Pr 18[24] (?), 19[8] (לְמֹצְאֵ *consecuturus*

---

[1] Cf. § 45 *g*, according to which the close union of the לְ with the first consonant of the infinitive (לִכְתֹּב with a firmly closed syllable, as opposed to בִּכְתֹּב, בְּכָתְבִ, &c.) seems to point to the formation of a special new verbal form. Quite distinct are the few examples where the infinitive with לְ serves to express time, as Gn 24[63] לְפְנוֹת עֶרֶב *at the eventide* (prop. at the time of the return of evening); cf. Dt 23[12], Ex 14[27], Ju 19[26]; 2 S 18[29] *when Joab sent the king's servant.*

est, unless we simply read יִמְצָא with the LXX)[1]; 20[25], Ec 3[15] אֲשֶׁר לִהְיוֹת *quod futurum est*; 2 Ch 11[22], 12[12] (in a negative statement); in a question, Est 7[8] (*will he even . . .?*). Cf. also 1 S 4[19].

k Of (*b*) Jos 2[5] וַיְהִי הַשַּׁעַר לְסָגוֹר *and the gate was to be shut* (had to be shut); Is 37[26], ψ 109[18].[2] Mostly with the omission of הָיָה, e.g. 2 K 4[13] מֶה לַעֲשׂוֹת *what is to be done for thee?* (הֲיֵשׁ לְדַבֶּר־לָךְ) *wouldest thou be* (lit. is it to be) *spoken for to the king*, &c.? 2 K 13[19] לְהַכּוֹת *it was to smite* equivalent to *thou shouldest have smitten*; Is 5[4], ψ 32[9], 68[19] (?), Jb 30[6] (*habitandum est iis*), 1 Ch 9[25], 10[13], 22[5], 2 Ch 8[13] (?), 11[22], 19[2], 36[19] (?), Ho 9[13], Hb 1[17]. In a question 2 Ch 19[2]; after לֹא 1 Ch 5[1], 15[2]; after אֵין 1 Ch 23[26], 2 Ch 5[11] and frequently.

l Of the same kind also are the cases, in which the infinitive with לְ depends on the idea of an obligation or permission (or prohibition); especially in such forms of expression as 2 S 18[11] עָלַי לָתֵת לְךָ וגו׳ it was *upon me*, i. e. it would have been *my duty to give thee*, &c.[3]; cf. Mi 3[1] (2 Ch 13[5]) *it is not for you to* (i. e. are ye not bound to)?[4] with a negative, 2 Ch 26[18] לֹא לְךָ וגו׳ *it pertaineth not unto thee, Uzziah, to burn incense unto the Lord, but* only *to the priests*; also אֵין לְ with an infinitive expresses *it is not permitted* (nefas est), *may not*, e.g. Est 4[2] כִּי אֵין לָבוֹא *for none might enter*; 8[8], 1 Ch 15[2];[5] אֵין לְ with an infinitive is used in a somewhat different sense, equivalent to *it is not feasible, not possible*, e.g. in ψ 40[6], Ec 3[14], 2 Ch 5[11].[6]—With either meaning לֹא can be used instead of אֵין, e.g. Am 6[10] לֹא לְהַזְכִּיר *nefas est, to make mention* of the name of the Lord: but Ju 1[19] *for it was not possible to drive out*, &c., perhaps, however, the text originally stood as in Jos 17[12] לֹא יָכְלוּ לָהּ׳; 1 Ch 15[2].

---

[1] P. Haupt (*SBOT.*, Proverbs, p. 52, lines 10 ff.; *Critical Notes on Esther*, p. 170, on 7[8]) considers it possible that here and in Pr 2[8], 6[24], 7[5], 16[30], 30[14], as well as in 14[35], 17[21] before a noun, the לְ is a survival of the emphatic לְ with an *imperf.*, which is especially common in Arabic. In that case לִמְצֹא must be read לְמָצְא, i. e. לְ + יִמְצָא. But all the above instances can be taken as infinitives with לְ without difficulty.

[2] Somewhat different are the cases where לְ הָיָה with the infinitive (which is then used exactly as a substantive) implies *to become something*, i. e. to meet with a particular fate, as Nu 24[22] (cf. Is 5[5], 6[13]) לְבָעֵר *for wasting*, for which elsewhere frequently לְשַׁמָּה and the like; probably also לְבַלּוֹת ψ 49[15] is to be explained in this way, the הָיָה being omitted.

[3] 2 S 4[10] (*cui dandum erat mihi*) appears to be similar; it may, however, be better, with Wellhausen, to omit the אֲשֶׁר.

[4] But in 1 S 23[20] after וְלָנוּ *and our part shall be* the infinitive without לְ stands as the subject of the sentence.

[5] Quite different of course are such cases as Is 37[3] וְכֹחַ אַיִן לְלֵדָה *and there is not strength to bring forth*; cf. Nu 20[5], Ru 4[4].

[6] In 2 S 14[19] אִשׁ (= יֵשׁ *it is, there is*) is used in a similar sense after אִם, the negative particle of asseveration, *of a truth it is not* possible *to turn to the right hand or to the left.*

m 3. A further class comprises the very numerous cases, in which the infinitive with לְ is used as the object[1] of a governing verb, hence, again, for *the direction* which an action takes. The verbs (or conjugations) which occur most frequently in this combination with לְ and an infinitive are: הֵחֵל (with an infinitive without לְ, e.g. Dt $2^{25.31}$, Jos 3^{7}), הוֹאִיל *to begin*, הוֹסִיף, יָסַף (prop. *to add*) *to continue*, very frequently, even in prose, with an infinitive without לְ, as Gn 4^{12}, $8^{10.12}$, 37^{5}, 1 S 3^{8}, Jb 27^{1}, &c.; חָדַל *to cease from, to desist*; כָּלָה *to complete, to make an end of*; תָּמַם *to be finished*; הִקְרִיב *to come near to*, Gn 12^{11}; מִהַר *to hasten* (with an infinitive without לְ Ex 2^{18}); אָבָה *to be willing* (with an infinitive without לְ Is 28^{12}, 30^{9}, Jb 39^{9}); חָפֵץ *to will, to desire*; מֵאֵן *to refuse* (*to be unwilling*); בִּקֵּשׁ *to seek*; יָכֹל *to be able* (with an infinitive without לְ, e.g. Gn 24^{50}, 37^{4}, Ex 2^{3}, 18^{23}, Nu 22^{38}, Jb 4^{2}); נָתַן with an accusative of the person in the sense of *to give up to some one, to cause*, or *permit* him to do something, e.g. Gn 20^{6}, ψ 16^{11} (with an infinitive abs. Jb 9^{18}, see § 113 *d*), יָדַע *to understand* how to do something (in Jb 3^{8} עֹרֵר לִוְיָתָן is analogous); לָמַד *to learn*; קִוָּה *to wait, expect* (with a change of subject, e.g. Is 5^{2} *and he waited for it to bring forth grapes*).

n We must further mention here a number of verbs in Hiph'îl (partly denominatives), which express an action in some definite direction (cf. § 53 *f*), as הִגְדִּיל *to do greatly*, הִשְׁפִּיל *to make* (it) *low*, הִגְבִּיהַּ *to make* (it) *high*, הֶעֱמִיק *to make* (it) *deep*, הִרְחִיק *to make* (it) *far, distant*, הֵיטִיב *to make* (it) *good* (with an infinitive without לְ ψ 33^{3}, but 1 S 16^{17}, in the same combination, with לְ); הִשְׁכִּים *to do* anything *early* (ψ 127^{2}, along with its opposite אִחֵר *to do* something *late*, with an infinitive without לְ); הִרְבָּה *to make* (it) *much*, הִפְלָא *to make* (it) *wonderful* (even with a passive infinitive 2 Ch 26^{15}),[2] &c.

---

[1] This view is based upon the fact, that in numerous expressions of this kind (see the examples above) the לְ may be omitted, and the infinitive consequently stand as an actual accusative of the object (see above, *c*). However, the connexion of the verb with the object is in the latter case closer and more emphatic (hence especially adapted to poetic or prophetic diction), than the looser addition of the infinitive with לְ; thus לֹא אָבוּ שְׁמוֹעַ Is 28^{12} is equivalent to *they desired not obeying* (לֹא אָבוּ also with the infin. abs. in Is 42^{24}; cf. § 113 *d*); but לֹא אָבוּ לִשְׁמֹעַ Ez 20^{8} rather expresses *they could not make up their mind as to hearkening*. When connected with לְ, the governing verb has a more independent sense than when it directly governs the accusative of the object.

[2] In almost all these examples the principal idea is properly contained in the infinitive, whilst the governing verb strictly speaking contains only a subordinate adverbial statement, and is therefore best rendered in English by an adverb; e. g. Gn 27^{20} *how is it that thou hast found it so quickly?* (prop. how thou hast hastened to find!), Gn 31^{27} *wherefore didst thou flee secretly?* So frequently with הִרְבָּה (=*often, abundantly*), Ex 36^{5}, 1 S 1^{12}, 2 K 21^{6}, Is 55^{7}, Am 4^{4}, ψ 78^{38}, &c.; with שׁוּב (=*again*), Dt 30^{9}, 1 K 13^{17}, Ho 11^{9}, Ezr 9^{14}; cf. also 2 S 19^{4}, Jer 1^{12}, Jn 4^{2}, and the analogous instances in § 120 *g*; also 2 K 2^{1} *thou hast asked a hard thing*.

4. Finally, the infinitive with לְ is very frequently used in a much looser *o* connexion to state motives, attendant circumstances, or otherwise to define more exactly. In English, such infinitive constructions (like the Latin gerund in *-do*; cf. *f*) must frequently be turned by *that* or a gerund; e.g. 1 S 12[17] לִשְׁאֹל לָכֶם מֶלֶךְ *in asking you a king*; 14[33], 19[5], 20[36], Gn 3[22], 18[19], 34[7.15], Ex 23[2], Lv 5[4.22.26], 8[15], Nu 14[36], 2 S 3[10], 1 K 2[3 f.], 14[8], Jer 44[7 f.], ψ 63[3], 78[18], 101[8], 103[20], 104[14 f.], 111[6], Pr 2[8], 8[34], 18[5], Neh 13[18]. Sometimes the infinitive with לְ is used in this way simply by itself, e.g. 1 Ch 12[8] *as the roes upon the mountains* לְמַהֵר (as regards hasting) *in swiftness*; Gn 2[3], 2 S 14[25] (לְהַלֵּל); Is 21[1] (לַחֲלוֹף); Jo 2[26], Pr 2[2], 26[2] and so very frequently the infinitive לֵאמֹר *dicendo* which has become stereotyped as an adverb to introduce direct narration (in the sense of *thus, as follows*).[1]

5. In a number of instances—especially in the later books—the infin. *p* constr. with לְ appears to be attached by *Wāw* (like the infinitive absolute, § 113 *z*), as the continuation of a previous finite verb. In most examples of this kind it is, however, evident that the infinitive with לְ virtually depends on an idea of intention, effort, or being in the act of, which, according to the sense, is contained in what has preceded, whilst the copula, as sometimes also elsewhere, is used in an emphatic sense (*and that too*); thus e.g. Ex 32[29] (if the text be right) *fill your hand to-day* (sc. with an offering) *for the Lord . . . and that to bring a blessing upon you*, i.e. that ye may be blessed; cf. 1 S 25[31] (otherwise in verses 26 and 33 where the infinitive absolute is used, see § 113 *e*); ψ 104[21],[2] Jb 34[8], Ec 9[1], Neh 8[13], 2 Ch 7[17].—In Lv 10[10 f.] וּלְהַבְדִּיל might be regarded as an explanatory addition to the command contained in verse 9 *b* (=this prohibition of wine before the service shall ye observe, and that in order to put a difference, &c.); but probably the text has been disturbed by a redactor.—In 2 Ch 30[9] וְלָשׁוּב depends on the idea of receiving a favour which lies in לְרַחֲמִים. On the other hand, in 1 S 8[12] it is sufficient to explain *and in order to appoint them unto him for captains of thousands* (sc. he will take them). In Is 44[28] translate *and he* (Cyrus) *shall perform all my pleasure, and that in saying of Jerusalem*, &c.

3. The period of time to which an action or occurrence represented *q* by the infinitive construct belongs, must sometimes be inferred from the context, or from the character of the principal tenses; cf. e.g. Gn 2[4] *these are the generations of the heaven and of the earth,* בְּהִבָּרְאָם *when they were created* (prop. in their being created); Ju 6[18] וגו עַד־בֹּאִי *until*

---

[1] לֵאמֹר is very often so used after וַיְדַבֵּר in the Priestly document (Gn 8[15], 17[3], &c., and numberless times in the legal parts of Exod., Lev., and Num.)—a pleonasm which is not surprising considering the admittedly prolix and formal style of the document.

[2] When Delitzsch on ψ 104[21], referring to Hb 1[17], explains the infinitive with לְ as an elliptical mode of expressing the *coniugatio periphrastica* (equivalent to *flagitaturi sunt a deo cibum suum*), this is, in point of fact, certainly applicable to this and a few other places mentioned above; but all these passages, in which the infinitive with וְלְ follows, are to be distinguished from the cases treated above under *h*, where the infinitive with לְ *without Wāw* corresponds to a Latin gerundive, or is actually used to express the *coniugatio periphrastica*.

I come unto thee, and bring forth, &c. Cf. 1 S 18[19] (=*when she should have been given*); 2 K 2[1], Ho 7[1].

r Rem. 1. The constructions of the infinitive with a preposition, described above under *d*, are almost always continued in the further course of the narrative by means of the *finite verb*, i. e. by an independent sentence, not by a co-ordinate infinitive. Such a finite verb *we* regard as governed by a conjunction, which corresponds to the preposition standing before the infinitive. Thus the infinitival construction (frequently even with a change of subject) is continued by a perfect (with לֹא), Jer 9[12] *because they have forsaken* (עַל־עָזְבָם) *my law* . . . וְלֹא שָׁמְעוּ *and have not obeyed my voice*; Gn 39[10], 1 S 24[12], Am 1[9]; without לֹא Jb 28[25] (perf. after לְ and infin.); by a perfect with וְ (cf. § 112 *i* and *v*) Am 1[11] ג׳ וְעַל־רָדְפוֹ עַל־רָדְפוֹ *because he did pursue his brother with the sword*, וְשִׁחֵת *and did cast off* continually *all pity* (a frequentative perfect; for examples of the perfect consecutive proper see Gn 27[45], Ju 6[18], 1 S 10[8], 2 K 18[32] [Is 36[17]], always after עַד־בֹּאִי *until I come*); by a simple imperfect, e.g. Pr 1[27] (after בְּ); Is 30[26] (after בְּיוֹם *in the day*, a temporal phrase which has here become equivalent to a preposition); Is 5[24] (after כְּ), 10[2], 13[9], 14[25], 45[1], 49[5], 1 S 2[8], Pr 2[8], 5[2], 8[21] (always after לְ)[1]; by an imperfect consecutive, e. g. Gn 39[18] *and it came to pass*, בַּהֲרִימִי קוֹלִי וָאֶקְרָא *as I lifted up my voice and cried, that* . . .; 1 K 10[9], Jb 38[13] (after לְ); 1 K 18[18], Is 33[9], Jb 38[7.9 ff.] (after בְּ); Is 30[12], Jer 7[13], Ez 34[8] (after יַעַן).

s 2. The negation of an infinitive construct, on account of the predominance of the noun-element in its character, is effected not by the verbal negative לֹא (except in the compound בִּלְתִּי, which has come to be used as a preposition, *without*, Nu 35[23], Pr 19[2]), but by בִּלְתִּי, originally a substantive (see the Lexicon), with לְ prefixed (but also Nu 14[16] מִבִּלְתִּי), e. g. Gn 3[11] לְבִלְתִּי אֲכָל־מִמֶּנּוּ *not to eat of it*; in a final sense, 4[15] *lest any finding him should smite him*; only in 2 K 23[10] is לְ repeated before the infinitive. In ψ 32[9] (if the text be right) בַּל negatives, not the infinitive, but the predicate which is understood.

§ 115. *Construction of the Infinitive Construct with Subject and Object.*

a 1. Like the infinitive absolute (see § 113 *a*), the character of the infinitive construct as a *verbal* noun is shown by its power of taking the case proper to its verb, and hence in transitive verbs[2] *the accusative of the object*, e.g. Nu 9[15] בְּיוֹם הָקִים אֶת־הַמִּשְׁכָּן *on the day the*

[1] The great frequency of examples of this kind, especially in the poetical books, is due to a striving after what is called *chiasmus* in the arrangement of the parallel members in the two halves of the verse, i. e. in the instances given, the finite verb *at the end* of the second (co-ordinate) clause is parallel with the infinitive *at the beginning* of the first. In this way the verbal form necessarily became separated from the וְ, and consequently the imperfect had to be used instead of the perfect consecutive. Such a parallelism of the *external* and *internal* members of a verse is frequent also in other cases, and was evidently felt to be an elegance of elevated—poetic or prophetic—style.

[2] For examples of the accus. of the object with a pass. infin., see § 121 *c*.

tabernacle was reared up; 1 S 19[1] לְהָמִית אֶת־דָּוִד *that they should slay David*; Gn 14[17], 19[29], Ex 38[27], 1 K 12[15], 15[4]; with a negative, e.g. Lv 26[15] לְבִלְתִּי עֲשׂוֹת אֶת־כָּל־מִצְוֹתָי *so that ye will not do all my commandments*; with the accusative of the personal pronoun, e.g. Dt 29[12] לְמַעַן הָקִים־אֹתְךָ *that he may establish thee*; Gn 25[26], Jer 24[7]; with a verbal suffix, e.g. Ex 2[14] לַהֲרָגֵנִי *to kill me*; Jer 38[26] לְבִלְתִּי הֲשִׁיבֵנִי *that he would not cause me to return* (on the suffix, cf. *c*). In Is 49[6] the object even precedes the infinitive with לְ; on this order cf. the note on § 114 *r*.— If the verb governs a double accusative, the infinitive may also take the same, e.g. Gn 41[39] אַחֲרֵי הוֹדִיעַ אֱלֹהִים אוֹתְךָ אֶת־כָּל־זֹאת *forasmuch as God hath showed thee all this*; Dt 21[16].

b Rem. 1. The object after the infinitive construct must also always be regarded as in the accusative, even when it is not expressly introduced (as in all the above examples) by the *nota accusativi* אֵת־, and when therefore the substantive in question might easily be taken as the *genitive of the object* governed by the infinitive (the usual construction in Arabic), e.g. Pr 21[15] עֲשׂוֹת מִשְׁפָּט *to do judgement*. Against regarding it as a genitive, which is in itself possible (*the doing, the executing of judgement*), is the fact (*a*) that elsewhere the *nota accusativi* is so frequently added; (*b*) that in such a case the secondary forms of the infinitive, such as רְאֹה for (פָּנֶיךָ) רְאֹת Gn 48[11] (cf. ψ 101[3], Pr 16[16]), would be unintelligible; (*c*) that certain infinitive forms, if they were to be regarded as in the construct state, could hardly retain the pretonic Qames without exception, whereas, when connected with suffixes (i. e. with real genitives; cf. § 33 *c*), this Qames necessarily becomes *Šᵉwâ*; e.g. Gn 18[25] לְהָמִית צַדִּיק *to slay the righteous* (never as לַהֲמִית; cf., on the other hand, above, הֲשִׁיבֵנִי); 2 K 21[8], Ez 44[30]. Similarly in such cases as Is 3[13] (ψ 50[4]) instead of לָרִין עַמִּים we should rather expect לָרִין, if the infinitive were regarded as in the construct state, and עַמִּים as the genitive. Hence also in cases like Is 58[9] (שְׁלַח for שִׁלַּח) we must assume, with Sellin, op. cit., p. 78, a merely 'external phonetic connexion' and not the genitive construction.

c 2. The verbal suffixes added to the infinitive are (with the exception of לְהוֹצִיאֵהוּ Jer 39[14]) only the suffix of the 1st pers. sing. (besides the above examples cf. also 1 S 5[10], 27[1], 28[9], Ru 2[10], 1 Ch 12[17], &c.) and plural; e.g. לְהַשְׁמִידֵנוּ *to destroy us*, Dt 1[27] (immediately after לָתֵת אֹתָנוּ, so that נוּ is doubtless a *verbal* not a *noun*-suffix, although in form it might be either); לַהֲמִיתֵנוּ Nu 16[13], Ju 13[23] (after חָפֵץ). Elsewhere the pronominal object is appended either by means of the accusative sign (e.g. Gn 25[26] בְּלֶדֶת אֹתָם prop. *in the bearing them*; לָדַעַת אֹתִי *to know me*, Jer 24[7]) or in the form of a noun-suffix (as genitive of the object). The latter occurs almost always, whenever the context excludes the possibility of a misunderstanding; e.g. 1 S 20[33] לְהַכֹּתוֹ (prop. for his smiting) *to smite him*, not, as the form might also mean, *in order that he might smite*; cf. 1 K 20[35]; with the suffix of the 3rd sing. fem. Nu 22[25]; of the 3rd plur. Jos 10[20], 2 S 21[2], &c. Hence also the suffixes of the 2nd sing. with the infinitive, as לְהַכֹּתְךָ Jer 40[14], cf. Mi 6[13], and even גַּדְּלְךָ *to magnify thee*, Jos 3[7], must certainly be regarded as *nominal* not *verbal* suffixes. The connexion of the noun-suffix, as genitive of the object, with the infinitive,

was so fully established, that it could be used not only in such strange cases, as Gn 37[4] לֹא יָכְלוּ דַבְּרוֹ לְשָׁלֹם *they could not speak to him peaceably*, cf. Zc 3[1] לְשִׂטְנוֹ *to be an adversary to him*, but ultimately even in the 1st sing., as in Nu 22[13] לָתֵתִי *to give me leave* [Dt 25[7] לֹא אָבָה יַבְּמִי *he will not perform the duty of a husband's brother unto me*; 1 Ch 4[10] לְבִלְתִּי עָצְבִּי *that it may not grieve me!*]

d 3. The power of governing like a verb is also retained in those verbal nouns which, although originally secondary forms of the infinitive, have fully acquired the value of nouns, e. g. Is 11[9] דֵּעָה אֶת־יְהוָה (prop. to know the Lord) *the knowledge of the Lord*; לְיִרְאָה אֹתִי *to fear me*, Dt 4[10], 5[26], 10[12]; an accusative follows לְאַהֲבָה Dt 10[12.15], Is 56[6] (cf. also 1 K 10[9], Ho 3[1]); לְהָנָפָה Is 30[28]; בְּשִׂנְאַת יְהוָה אֹתָנוּ Dt 1[27]; after verbal nouns formed with the prefix מ (cf. § 45 *e*), Nu 10[2], Is 13[19], Am 4[11], Ez 17[9]. The accusative of the object likewise remains after infinitives (or their secondary forms) which have the article, e. g. Gn 2[9], Jer 22[16], or a suffix, e. g. Gn 5[4], &c., 28[4.6], 29[19 f.], 30[15], 38[5], 2 S 3[11], Is 29[13].

e **2.** The subject of the action represented by the infinitive is mostly placed immediately[1] after it, either in the *genitive* or *nominative*. The subject is in the genitive (§ 33 *c*) whenever it has the form of a noun-suffix, and also when the infinitive has the termination of the constr. st. fem. sing. (see *f*); probably also in many other cases, where the infinitive in form and meaning is used more like a substantive, and accordingly governs like a noun. On the other hand, the subject of the infinitive is certainly to be regarded as a nominative, when it is separated from the infinitive by any insertion, and according to certain indications (see *g*) very probably in many other instances.

f Rem. 1. Examples of genitives of the subject after infinitives in the connective form are Dt 1[27] בְּשִׂנְאַת יְהוָה אֹתָנוּ prop. *in the Lord's hating us*; cf. 7[8], Gn 19[16], 1 K 10[9], Is 13[19], 47[9], Ho 3[1], Am 4[11]. The subject of the infinitive is probably also to be regarded as genitive in such cases as Ex 17[1] *and there was no water* לִשְׁתּוֹת הָעָם *for the people to drink* (prop. for the drinking of the people), and in cases like Gn 16[16] (בְּלֶדֶת הָגָר); Gn 16[3], Ex 19[1], Nu 20[3.4], 33[38], 1 K 6[1], ψ 133[1], 2 Ch 7[3], &c.

g 2. Examples in which the subject is separated from the infinitive by an insertion, and hence must certainly be regarded as a nominative, are Jb 34[22] לְהִסָּתֵר שָׁם פֹּעֲלֵי אָוֶן *that the workers of iniquity may hide themselves there* (prop. for the hiding themselves there the workers of iniquity); cf. Gn 34[15], Nu 35[6], Dt 19[3], Ju 9[2], 2 S 24[13], ψ 76[10], and below, *i*. The subject is likewise to be regarded as a *nominative*, whenever the *Lamedh* is prefixed to the infinitive by means of a pretonic Qameṣ (cf. *b* above), e. g. 2 S 19[20] לָשׁוּם הַמֶּלֶךְ אֶל־לִבּוֹ,

[1] In Gn 24[30] the subject of כְּרֹאת is wanting (but כְּשָׁמְעוֹ follows); the original reading was undoubtedly כִּרְאֹתוֹ, and the text is now in a state of confusion; verse 30*a* should come before verse 29*b*. In Gn 19[29], 25[26], Ex 9[16], 13[21], 1 S 18[19], Jer 41[6], ψ 42[4] the subject, although not indicated, is easily supplied from the context. The infinitive in such cases is best rendered in English by a passive.

since, if the infinitive were used as a *nomen regens*, we should rather expect לְשׁוּם according to § 102 *f*. That the subject of the infinitive is regarded elsewhere also as nominative is again (see above, *b*) probable, since in such forms as הָנִיחַ Dt 25[19], Is 14[3], הָמִיר ψ 46[3], &c., the pretonic Qameṣ is retained without exception, whereas on the analogy of הֲנִיחִי Ez 24[13], הֲקִימוֹ Jer 23[20], &c., we should expect הָנִיחַ, הָמִיר, &c., if the infinitive were regarded as a *nomen regens*. Or was the retention of the Qameṣ (assuming the thorough correctness of the Masoretic punctuation) rendered possible even before a following genitive, because that vowel was characteristic of the form? It is at all events certain that owing to the lack of case-endings,[1] a distinction between the genitival and nominatival constructions could not have been consciously made in the case of most infinitives, e. g. in unchangeable forms like קָטֹל, קוּם, &c.

h **3.** When both a *subject* and an *object* are connected with the infinitive, the rule is, that the subject should immediately follow the infinitive, and then the object. The latter, in such a case, is necessarily in the accusative, but the subject (as in *e*) may be either in the genitive or in the nominative. The noun-suffixes again are, of course, to be regarded as genitives, e. g. Gn 39[18] בְּהָרִימִי קוֹלִי *as I lifted up my voice* (cf. 1 K 13[21], and the examples, Gn 5[4], &c., enumerated above, under *d*), and so also substantives which follow a connective form, Dt 1[27], &c.; see above, *d* and *f*.

i On the other hand, the subject appears necessarily to be in the nominative in such cases as Is 10[15] כְּהָנִיף שֵׁבֶט אֶת־מְרִימָיו *as if a rod should shake them that lift it up* (for the plur. מרימיו cf. § 124 *k*), not כְּהָנִיף, as would be expected (see *g* above), if שֵׁבֶט were in the genitive; cf. 2 S 14[13], Jb 33[17]. And so probably also in other cases, as Gn 5[1], 13[10], Jos 14[7], 1 K 13[4], 2 K 23[10], Is 32[7]. The subject is separated from the infinitive by an insertion (and consequently must necessarily be in the nominative; see *g* above), e. g. in Jer 21[1].

k Rem. Less frequently the object is placed immediately after the infinitive, and then the nominative of the subject, as a subsequent complement, e. g. Is 20[1] בְּשָׁלְחַ אֹתוֹ סַרְגֹּן *when Sargon sent him*; Gn 4[15], Jos 14[11], 2 S 18[29], Is 5[24], ψ 56[1], Pr 25[8]. In Nu 24[23] the subject follows an infinitive which has a noun-suffix in place of the object.

§ 116. *The Participles.*

Cf. Sellin (see above at the head of § 113), p. 6 ff., and Kahan, p. 11 ff.

a **1.** Like the two infinitives, the participles also occupy a middle place between the noun and the verb. In form they are simple nouns,

[1] In Arabic, where the case-endings leave no doubt as to the construction, it is equally possible to say either *qatlu Zaidin* (gen. of subj.) *'Amran* (acc.), literally *Zaid's killing 'Amr*, or *qatlu 'Amrin* (gen. of obj.) *Zaidun* (nom. of subj.), or even *el-qatlu* (with article) *Zaidun* (nom. of subj.) *'Amran* (acc. of obj.).

and most nearly related to the adjective; consequently they cannot in themselves be employed to represent definite relations of tense or mood. On the other hand, their verbal character is shown by their not representing, like the adjectives, a fixed and permanent quality (or state), but one which is in some way connected with an *action* or *activity*. The *participle active* indicates a person or thing conceived as being in the continual uninterrupted *exercise* of an activity. The *participle passive*, on the other hand, indicates the person or thing in a state which has been brought about by external *actions*.

b Rem. That the language was fully conscious of the difference between a state implying action (or effected by external action) and mere passivity, is seen from the fact, that participles proper cannot be formed from the purely stative Qal, but only verbal adjectives of the form *qāṭēl* (מָלֵא, כָּבֵד, &c.) or *qāṭōl* (גָּבֹהַּ, &c.), whereas the *transitive* Qal שָׂנֵא *to hate*, although it coincides in form with the intransitive Qal (as a verb middle *e*), nevertheless forms a participle active שֹׂנֵא, and participle passive שָׂנוּא (cf. the feminine שְׂנוּאָה).— In cases where the participle proper and the verbal adjective both occur, they are by no means synonymous. When the Assyrians are called in Is 28^{11} לַעֲנֵי שָׂפָה *men of stammering lips*, a character is ascribed to them which is inseparably connected with their personality. On the other hand כְּלֹה לְעַנּוֹת לִי Jer 20^{7}, describes those about the prophet as continually engaged in casting ridicule upon him. Cf. also ψ 9^{18} (שְׁכֵחֵי) with 50^{22} (שֹׁכְחֵי).

c On the difference between the participle as expressing *simple* duration and the imperfect as expressing *progressive* duration, cf. what has been stated above in § 107 *d*. Nevertheless the participle is sometimes used—especially in the later books, cf. e.g. Neh 6^{17}, 2 Ch 17^{11}—where we should expect the action to be divided up into its several parts, and consequently should expect the finite verb. But the substitution of the participle for the *tempus historicum*, which becomes customary in Aramaic (cf. Kautzsch, *Gramm. des Bibl.-Aram.*, § 76. 2, *d* and *e*), is nevertheless quite foreign to Hebrew.

d **2.** The period of time indicated by (*a*) a participle active, either as an attribute or predicate, must be inferred from the particular context. Thus מֵת may mean either *moriens* (Zc 11^{9}), or *mortuus* (so commonly; with the article הַמֵּת regularly=*the dead man*), or *moriturus* (Dt 4^{22}); בָּא *coming, come* Gn 18^{11}, &c., *venturus* 1 S 2^{31}, &c.; נֹפֵל *falling*, but also *fallen*, Ju 3^{25}, 1 S 5^{3}, and *ready to fall* (threatening ruin, Is 30^{13}, Am 9^{11}). For other examples of perfect participles see Gn 27^{33}, 43^{18} (הַשָּׁב *that was returned*; cf. Ezr 6^{21}, &c., הַשָּׁבִים *which were come again* from the captivity); Gn 35^{3}, Ex 11^{5}, Zc 12^{1}, ψ 137^{7}, Pr 8^{9}, Jb 12^{4} (קֹרֵא), and see *m* below. For future participles see Gn 41^{25}, 1 K 18^{9}, Is 5^{5}, Jon 1^{3}, &c., probably also לְקֹחִי Gn 19^{14}. On the *futurum instans* (esp. after הִנֵּה) see *p* below.

e (*b*) Of the passive participles, that of *Qal* (e.g. כָּתוּב *scriptus*) always corresponds to a Latin or Greek perfect participle passive, those of the other conjugations, especially *Niph'al*, sometimes to

a Latin gerundive (or to an adjective in *-bilis*), e. g. נוֹרָא *metuendus, to be feared,* ψ 76[8], &c.; נֶחְמָד *desiderandus* (*desiderabilis*) Gn 3[6], ψ 19[11], &c.; נִבְרָא *creandus* ψ 102[19]; נוֹלָד, usually *natus*, but also (like הַיּוּלָּד Ju 13[8]) *procreandus, nasciturus* 1 K 13[2], ψ 22[32]; נַעֲרָץ *terribilis* ψ 89[8]; נִתְעָב *abominable* Jb 15[16]; נֶחְשָׁב *aestimandus* Is 2[22]; הַנֶּאֱכָלֶת *that may be eaten* (an animal) Lv 11[47]. In *Pu'al* מְהֻלָּל *laudandus, worthy to be praised* ψ 18[4]. In *Hoph'al*, 2 S 20[21] מֻשְׁלָךְ; 2 K 11[2] הַמּוּמָתִים; Is 12[5] *Qerê* מוּדַעַת.[1]

f 3. The participles active, in virtue of their partly verbal character, possess the power of governing like verbs, and consequently, when used in the absolute state, may take after them an object either in the accusative, or with the preposition with which the verb in question is elsewhere usually construed, e. g. 1 S 18[29] אֹיֵב אֶת־דָּוִד *hating David*; Gn 42[29]; with the suffix of the accusative, e. g. עֹשֵׂנִי *that made me* Jb 31[15]; מִי רֹאֵנוּ *who seeth us?* Is 29[15] (in Is 47[10] רֹאֵנִי is abnormal); רֹדֵם *ruling them* ψ 68[28], sometimes also with the article, e. g. ψ 18[33] הַמְאַזְּרֵנִי *that girdeth me* (LXX ὁ κραταιῶν με); Dt 8[14–16], 13[6.11], 20[1], 2 S 1[24], Is 9[12] (where, however, Cheyne omits the article), 63[11], ψ 81[11], 103[4], Dn 11[6]; followed by a preposition, e. g. 1 K 9[23] הָרֹדִים בָּעָם *which bare rule over the people*; 2 K 20[5] הִנְנִי רֹפֵא לָךְ *behold, I will heal thee.*[2]

By an exhaustive examination of the statistics, Sellin (see the title at the head of § 113), p. 40 ff., shows that the participle when construed as a *verb* expresses a single and comparatively transitory act, or relates to particular cases, historical facts, and the like, while the participle construed as a *noun* (see *g*) indicates repeated, enduring, or commonly occurring acts, occupations, and thoughts.

So also the verbal adjectives of the form *qāṭēl* may take an accusative of the person or thing, if the finite verb from which they are derived governs an accusative, e. g. Dt 34[9] מָלֵא רוּחַ חָכְמָה *full of the spirit of wisdom*; ψ 5[5] חָפֵץ רֶשַׁע *that hath pleasure in wickedness.*

g As a sort of noun the participle may, however, also exercise the same government as a noun, being in the construct state, and followed by the object of the action in the genitive (see § 89 *a*; and cf. § 128 *x*), e. g. ψ 5[12] אֹהֲבֵי שְׁמֶךָ *that love thy name*; cf. ψ 19[8f.]; also when a verbal adjective, e. g. Gn 22[12] and often יְרֵא אֱלֹהִים *one fearing*

[1] Such examples as נוֹרָא, נֶחְמָד, מְהֻלָּל show plainly the origin of this gerundive use of the participle passive. A person or thing *feared, desired,* or *praised* at all times is shown thereby to be *terrible, desirable,* or *praiseworthy*, and therefore also *to be feared*, &c.

[2] On the other hand, in Is. 11[9] *as the waters* לַיָּם מְכַסִּים *covering the sea*, the ל serves only to introduce the object preceding the participle [cf. the Arabic parallels cited by Driver, *Tenses*, § 135, 7 *Obs.*]. Cf. Hab. 2[14].

God; Hb 2^{15}; with an infinitive, ψ 127^{2}; with a noun-suffix (which, according to § 33 *c*, also represents a genitive), e. g. Gn 4^{14} כָּל־מֹצְאִי *whosoever findeth me* (prop. my finder; cf. עֹשִׂי *my maker*); 12^{3} מְבָרֲכֶיךָ *that bless thee*, מְקַלְלְךָ *that curseth thee* (but read either מְקַלָּלֶיךָ, or מְבָרֵכְךָ in the preceding clause); 27^{29}, 1 S 2^{30}, Is 63^{13}, ψ 18^{49}. In Jer 33^{22} read מְשָׁרְתַי אֹתִי.[1]

h Rem. To the class of objective genitives belong also specifications of place after the participles בָּא *iniens* and יֹצֵא *egrediens*, since the verbs בּוֹא and יָצָא, in the sense of *ingredi, egredi*, can be directly connected with an accusative; e. g. Gn $23^{10.18}$ בָּאֵי שַׁעַר עִירוֹ *that went in at the gate of his city*; La 1^{4}; after יֹצְאֵי Gn 9^{10}, 34^{24}, 46^{26}, &c.—In poetic language the participle in the construct state may be connected not only with a genitive of the object, but also with any other specifications (especially of space) which otherwise can only be made to depend on the verb in question by means of a preposition; cf. Is 38^{18}, and frequently, יוֹרְדֵי־בוֹר *they that go down into the pit* (the grave); ψ 88^{6} שְׁכְבֵי קֶבֶר *that lie in the grave*; Dt 32^{24} (Mi 7^{17}); 1 K 2^{7}, 2 K $11^{5.7.9}$ *those that came in* (or *went out*) *on the sabbath*, Pr 2^{7}, 1 Ch 5^{18}, &c.; instead of the construction with מִן־, e. g. Is 59^{20} (*those who turn from transgression*), Mi 2^{8} (cf. § 72 *p*).

i These genitives of nearer definition appear also in the form of a noun-suffix, e. g. ψ $18^{40.49}$ קָמַי (for קָמִים עָלַי) *that rise up against me*; cf. Ex 15^{7}, Dt 33^{11}, ψ 44^{6}, Ex 32^{25}, Is 1^{27} שָׁבֶיהָ *her converts*; ψ 53^{6} (חֹנָךְ); Pr 2^{19} כָּל־בָּאֶיהָ *all that go unto her*; the construction is especially bold in Is 29^{7} כָּל־צֹבֶיהָ וּמְצֻדָתָהּ *all that fight against her and her stronghold* (for כָּל־הַצ�ֹּבְאִים עָלֶיהָ וְעַל־מְ); ψ 102^{9} even with a participle Po'al, מְהוֹלָלַי *they that are mad against me* (?), but read perhaps with Olshausen מְחוֹלְלַי *who pierce me*.—In Is 1^{30} *as a terebinth* נֹבֶלֶת עָלֶה *fading as regards its leaf*, it remains doubtful whether נֹבֶלֶת is in the absolute state, and consequently עָלֶה in the accusative, or whether it is to be regarded as construct state, and עָלֶה as the genitive. In the latter case it would be analogous to Pr 14^{2} (see *k*).

k **4.** The passive participles also may either be in the absolute state, and take the determining word in the accusative,[2] or may be connected

---

[1] When, as in Jb 40^{19}, the participle with the noun-suffix הָעֹשֵׂהוּ *he that made him*, also has the article (cf. § 127 *i*), the anomaly is difficult to understand, since a word determined by a genitive does not admit of being determined by the article.—No less remarkable is the use of the constr. st. of the participle before the accusative in Jer 33^{22} מְשָׁרְתֵי אֹתִי *that minister unto me* (for which there is מְשָׁרְתַי in verse 21). In Am 4^{13} an accusative of the product follows the genitive of the object, עֹשֵׂה שַׁחַר עֵיפָה *maker of the morning into darkness*. In Jer 2^{17} בְּעֵת יוֹלֵכֵךְ is supposed to mean *at the time when he led thee*; perhaps the perfect (הוֹלִיךְ) should be read as in 6^{15}. In Ez 27^{34}, the ancient versions read עַתָּה(ּ) נִשְׁבַּרְתְּ *now thou art broken*, instead of the difficult עֵת נִשְׁבֶּרֶת. In 1 K 20^{40} read עֹשֶׂה before הֵנָּה וְהֵנָּה.

[2] On the proper force of this accusative when retained in the passive con-

with it in the construct state, e.g. Ju 18[11], 1 S 2[18], Ez 9[2] לָבוּשׁ בַּדִּים *clothed in linen*, cf. verse 3 הַלָּבֻשׁ הַבַּדִּים; (even with a suffix קָרוּעַ כָּתְנָתוֹ *rent as regards his coat* 2 S 15[32]; with the participle following Ju 1[7]); but Ez 9[11] לְבוּשׁ הַבַּדִּים *the one clothed with linen*; 2 S 13[31] קְרֵעֵי בְגָדִים *rent in respect of clothes*, equivalent to *with their clothes rent* (cf. Jer 41[5]); Nu 24[4], Dt 25[10], Is 3[3], 33[24], Jo 1[8], ψ 32[1] (נְשׂוּי־פֶשַׁע *forgiven in respect of transgression*, כְּסוּי חֲטָאָה *covered in respect of sin*); with a suffix to the noun, Pr 14[2] נִלְוֹז דְּרָכָיו *he that is perverse in his ways*. *l*

Rem. The passive participle occurs in the construct state before a genitive of the *cause*, e.g. in Is 1[7] שְׂרֻפוֹת אֵשׁ *burnt with fire*; cf. Gn 41[6], Ex 28[11], Dt 32[24]; before a genitive denoting the *author*, e.g. Gn 24[31] בְּרוּךְ יְהוָה *blessed of the Lord* (but ψ 115[15] בְּרוּכִים לַיהוָה, see § 121 *f*); cf. Is 53[4], ψ 22[7], Jb 14[1] (15[14], 25[4]); hence also with noun-suffixes (which are accordingly genitive) Pr 9[18] קְרֻאֶיהָ *her invited ones*, i.e. those invited by her; of. 7[26], ψ 37[22].

5. The use of the participle as predicate is very frequent in noun-clauses (which, according to § 140 *e*, describe established facts and states), in which the period of time intended by the description must again (see above, *d*) be inferred from the context. Thus: *m*

(*a*) As *present*, in speaking of truths which hold good at all times, e.g. Ec 1[4] דּוֹר הֹלֵךְ וְדוֹר בָּא *one generation goeth, and another generation cometh; and the earth abideth* (עֹמֶדֶת) *for ever*; cf. verse 7; also to represent incidental (continuous) occurrences which are just happening, Gn 3[5], 16[8] (*I am fleeing*); 32[12], Ex 9[17], 1 S 16[15], 23[1], 2 K 7[9], Is 1[7]; when the subject is introduced by the emphatic demonstrative הִנֵּה *behold!* (§ 100 *o* and § 105 *b*), e.g. Gn 16[11] הִנָּךְ הָרָה *behold, thou art with child*, &c.; 27[42]; frequently also in circumstantial clauses (connected by *Wāw*), cf. § 141 *e*, e.g. Gn 15[2], &c. *n*

(*b*) To represent *past* actions or states, sometimes in independent noun-clauses, e.g. Ex 20[18] וְכָל־הָעָם רֹאִים אֶת־הַקּוֹלֹת *and all the people saw the thunderings*, &c.; 1 K 1[5]; in negative statements, e.g. Gn 39[23*a*]; sometimes in relative clauses, e.g. Gn 39[23*b*], Dt 3[2] (cf. also the frequent combination of the participle with the article as the equivalent of a relative clause, e.g. Gn 32[10] הָאֹמֵר *which saidst*; 12[7], 16[13], 35[1.3], 36[35], 48[16], 2 S 15[31], &c.); sometimes again (see *n*) in *circumstantial* clauses, especially those representing actions or states which occurred simultaneously with other past actions, &c., e.g. Gn 19[1] *and the two angels came to Sodom* וְלוֹט יֹשֵׁב *and* (i.e. *while*) *Lot sat*, &c.; 18[1.8.16.22], 25[26], Ju 13[9], 2 Ch 22[9]; also with the subject introduced by הִנֵּה 37[7], 41[17]. (On הֹלֵךְ with a following adjective or participle to express an action constantly or occasionally recurring, cf. § 113 *u*.) *o*

(*c*) To announce *future* actions or events, e.g. 1 K 2[2], 2 K 4[16] *at this season when the time cometh round*, אַתְּ חֹבֶקֶת בֵּן *thou shalt embrace a son*; so after a specification of time, Gn 7[4], 15[14], 17[19], 19[13], Hag 2[6] (but in Is 23[15], where, after וְהָיָה we should rather expect a perfect consecutive, it is better to explain *p*

struction cf. below, § 117 *cc*, &c., and § 121 *c*, *d*. So also Neh 4[12] is to be understood, *and the builders* were אִישׁ חֲרְבּוֹ אֲסוּרִים עַל־מָתְנָיו *girded every one with his sword on his side, and building*.

וְנִשְׁבַּחַת, with Qimḥi, as the 3rd sing. fem. of the perfect; on the form, cf. § 44 *f*); or in relative clauses, Gn 41[25], Is 5[5] *what I am doing*, i.e. am in the act of doing; in a deliberative question, Gn 37[30]; but especially often when the subject is introduced by הִנֵּה (especially also if the subject be attached as a suffix to הִנֵּה as הִנְנִי, הִנְּךָ, &c.), if it is intended to announce the event as imminent, or at least near at hand (and sure to happen), when it is called *futurum instans*, e.g. Gn 6[17], 15[3], 20[3], 24[13 f.], 48[21], 50[5], Ex 3[13], 8[25], 9[3], 34[10], Jos 2[18], Ju 7[17], 9[33], 1 S 3[11], 2 K 7[2], Is 3[1], 7[14], 17[1], Jer 30[10], Zc 2[13], 3[8]; with a participle passive, 2 S 20[21]: cf. also § 112 *t*.

q Rem. 1. As the above examples show, a noun-clause with a participle as predicate may have for its subject either a substantive or a personal pronoun; in both cases the participle, especially if there be a certain emphasis upon it, may precede the subject. Also in noun-clauses introduced by הִנֵּה the subject may be either a substantive, or (e.g. Gn 37[7]) a separate personal pronoun, or a suffix attached to הִנֵּה. In the same way, the subject may also be introduced by יֵשׁ (*est*, see the Lexicon) with a suffix, and in negative sentences by אֵין (*non est*) with a suffix, e.g. Ju 6[36] אִם־יֶשְׁךָ מוֹשִׁיעַ *if thou wilt save*; Gn 43[5] אִם־אֵינְךָ מְשַׁלֵּחַ *if thou wilt not send*; 1 S 19[11].—In such cases as Is 14[27] יָדוֹ הַנְּטוּיָה *the stretched out hand is his*, הַנְּטוּיָה is not, like נְטוּיָה in 9[11.16], &c., the predicate (in which case the participle could not take the article), but the subject; cf. Gn 2[11], 45[12], Is 66[9], Ez 20[29], Zc 7[6] (cf. § 126 *k*), where the participle with the article likewise refers to the present, also Nu 7[2], Dt 3[21], 4[3], &c., 1 S 4[16], where it refers to the past. In 1 K 12[8] and 21[11] even in relative clauses after אֲשֶׁר.

r 2. To give express emphasis to an action continuing in the *past*, the perfect הָיָה in the corresponding person is sometimes added to the participle, and similarly the imperfect יִהְיֶה (or the jussive יְהִי, or the imperfect consecutive) is used to emphasize an action continuing in the *future*, e.g. Jb 1[14] הַבָּקָר הָיוּ חֹרְשׁוֹת *the oxen* (cows) *were plowing*; Gn 37[2], 39[22], Ex 3[1], Dt 9[24], Ju 1[7], 1 S 2[11], 2 S 3[6]; the same occurs with a passive participle, e.g. Jos 5[5], Zc 3[3]; יִהְיֶה with a participle is found e.g. in Is 2[2]; the jussive in Gn 1[6], ψ 109[12];[1] and וַיְהִי with a participle in Ju 16[21], Neh 1[4].

s 3. The *personal pronoun* which would be expected as the subject of a participial clause is frequently omitted, or at least (as elsewhere in noun-clauses, cf. Is 26[3], ψ 16[8], Jb 9[32]) the pronoun of the 3rd pers. הוּא, e.g. Gn 24[30], 37[15], 38[24], 41[1], 1 S 10[11], 15[12], Is 29[8] (the participle always after הִנֵּה); cf., moreover, Gn 32[7], Dt 33[3], 1 S 17[25], 20[1], Is 33[5], 40[19], ψ 22[29], 33[5], 55[20], Jb 12[17.19 ff.], 25[2], 26[7].—הִיא is omitted in Lv 18[28]; הֵמָּה in Is 32[12], Ez 8[12], Neh 9[3]; in a relative clause, Gn 39[22], Is 24[2].—The personal pronoun of the 2nd pers. masc. (אַתָּה) is omitted in Hb 2[10]; the 2nd fem. (אַתְּ) in Gn 20[16] (where, however, for the participle וְנֹכַחַת the 2nd fem. perf. וְנֹכַחְתְּ is to be read); the pronoun of the 1st sing. in Hb 1[5] (?), Zc 9[12], Mal 2[16]; the 2nd plur. (אַתֶּם) 1 S 2[24] (if the text be right), 6[3], Ez 13[7] (?). But these passages are all more or less doubtful.

t Of a different kind are the cases in which some undefined subject is to be supplied with the participle; e.g. Is 21[11] אֵלַי קֹרֵא *there is one calling unto me* (= one calleth; § 144 *d*); cf. Is 30[24], 33[4].—So with participles in the plur., e.g. Ex 5[16] (אֹמְרִים sc. the taskmasters); Jer 38[28] (in 33[5] the text is corrupt), Ez 13[7] (?), 36[13], 37[11] (equivalent to *sunt qui dicant*).

---

[1] A jussive is practically to be supplied also in the formulae of blessing and cursing, בָּרוּךְ *blessed be* . . . Gn 9[26], &c.; אָרוּר *cursed art thou* . . . 3[14], &c.

4. We must mention as a special class those noun-clauses which occur at *u* the beginning of a period, and are intended to lay stress upon the fact that the first action still continues on the occurrence of the second (always introduced by וְ) ; e. g. Jb $1^{16\,f.}$ עוֹד זֶה מְדַבֵּר וְזֶה בָּא *he was yet speaking, and* (=*when*) *another came*, &c.[1] ; cf. Gn 29^{9}, 1 S $9^{11.27}$, $2c^{36}$, 1 K 14^{17} *she was entering the threshold of the house, when the child died* ; 2 K 2^{23}, 4^{5}, Dn $9^{20\,f.}$; also in Ju 19^{22}, 1 S 9^{14}, 17^{23}, 1 K 1^{42}, Jb $1^{18\,f.}$, in all which passages the apodosis is introduced by וְהִנֵּה.—On the other hand, in 1 K 1^{14} the noun-clause itself is introduced by הִנֵּה (as in verse 22 by וְהִנֵּה), and denotes an action only just impending.[2] Finally, when the whole sentence is introduced by means of וַיְהִי (cf. § 111 *g*), and the apodosis by וְהִנֵּה, Gn 42^{35}, 2 K 2^{11}, 13^{21} ; without הִנֵּה in the apodosis, 1 S 7^{10}, 2 K 19^{37} (Is 37^{38}).

Participles active, which are used in the sense of the perfect participle, and *v* also *participles passive*, in accordance with their meaning, express in such noun-clauses a state still continuing on the occurrence of the principal action, e. g. Gn 38^{25} הִוא מוּצֵאת וְהִיא שָׁלְחָה *she was being brought forth, when she sent*, &c. ; cf. Gn 50^{24}. [See further in Driver, *Tenses*, §§ 166–169.]

5. Different from the examples treated in *u* and *v* are the instances in *w* which a participle (either alone or as the attribute of a noun) stands at the beginning of the sentence as a *casus pendens* (or as the subject of a *compound noun-clause*, see § 143 *c*) to indicate a condition, the contingent occurrence of which involves a further consequence ; e. g. Gn 9^{6} שֹׁפֵךְ דַּם הָאָדָם בְּאָדָם דָּמוֹ יִשָּׁפֵךְ *shedding man's blood*, i. e. if any one sheddeth man's blood, *by man shall his blood be shed* ; Ex 21^{12}, ψ 75^{4}, Pr 17^{14}, Jb 41^{18} ; so especially if כָּל־ *every* precedes the participle, Gn 4^{15}, 1 S 3^{11} (2 K 21^{12}), 2 S 5^{8} (*whosoever smiteth*), 1 Ch 11^{6}. The apodosis is very often introduced by וְ (*wāw apodosis*), e. g. Ex 12^{15} (with a following perfect consecutive), Nu 35^{30} ; 1 S 2^{13} כָּל־אִישׁ זֹבֵחַ זֶבַח וּבָא נַעַר הַכֹּהֵן *when any man offered sacrifice, the priest's servant came*, &c. ; 2 S 14^{10} (participle with article) ; 22^{41} (where, however, the text is to be emended in accordance with ψ 18^{41}) ; 2 S $23^{3\,f.}$, Pr 23^{24} *Keth.* ; 29^{9}.—As in the instances discussed under *u*, such sentences are sometimes preceded by וַיְהִי, cf. 1 S 10^{11}, 11^{11}, 2 S 2^{23} וַיְהִי כָּל־הַבָּא *and it came to pass, that as many as came*, &c. [or by וְהָיָה, frequentative, Ju 19^{30}].—On the other hand, וְהַנִּשְׁבֶּרֶת Dn 8^{22} is a mere catchword (equivalent to *and as for that which was broken*) to call to mind the contents of verse 8.

6. On the use of the participle after the infinitive absolute הָלוֹךְ cf. § 113 *u*.

7. Almost as a rule the participial construction beginning a sentence (like *x* the infinitival constructions according to § 114 *r*) is continued by means of a finite verb with or without וְ, before which the English construction requires us to supply the relative pronoun implied in the participle ; thus,

---

[1] The independent noun-clause here lays stress upon the simultaneous occurrence (and consequently the overlapping) of the events far more forcibly than could be done by a subordinate expression of time (as e. g. וַיְהִי בְדַבְּרוֹ). In English it may be represented by *scarcely had he finished speaking when. . . .* As the above examples show, the apodosis also frequently consists of a noun-clause.

[2] At the same time the preceding עוֹד *still* shows that what is announced is not merely a future event, but a future event *contemporaneous* with something else ; the case thus entirely differs from the examples given in § 112 *t*, where הִנֵּה refers to the following participle, while here it belongs properly to the apodosis, before which it is therefore generally placed ; see the examples.

continued by means of a perfect, Is 14^{17} שָׂם תֵּבֵל כַּמִּדְבָּר וְעָרָיו הָרָס *that made the world as a wilderness, and overthrew the cities thereof*[1]; 43^{7}, Ez 22^{3}, ψ $136^{13\,ff.}$, Pr 2^{17}; by a perfect without *Wāw*, Gn 49^{11}; by a simple imperfect (as the *modus rei repetitae* in the present), Is 5^{23}, 46^{6}, Pr 7^{8}, Jb $12^{17.19\,ff.}$, 24^{21}; by an imperfect without *Wāw*, e. g. 1 S 2^{8}, Is 5^{8}, Pr 2^{14}, 19^{26}; by an imperfect consecutive, Gn 27^{33}, 35^{3}, 1 S 2^{6}, Jer 13^{10} (after several participles), ψ 18^{33}, $136^{10f.}$

C. The Government of the Verb.

§ 117. *The Direct Subordination of the Noun to the Verb as Accusative of the Object. The Double Accusative.*

L. Kaila, *Zur Syntax des in verbaler Abhängigkeit stehenden Nomens im alttest. Hebr.*, Helsingfors, 1906.

a **1.** The simplest way in which a noun is subordinated to a verbal form is by the addition of an accusative of the object to a transitive verb.[2] In the absence of case-endings,[3] this accusative can now be recognized only from the context, or by the particle אֵת־ (אֵת, before suffixes also אֹת, אוֹת)[4] prefixed to it. The use of this *nota accusativi*

---

[1] On the parallelism between the *external* and *internal* members, which appears here and in many other examples of this kind, see the note on § 114 *r*.

[2] The verb in question may either have been originally transitive, or only have become transitive by a modification of its original meaning. Thus the vocalization shows that חָפֵץ (*to have pleasure*, usually with בְּ) *to desire*, מָלֵא (*to be full* of something, also transitive) *to fill*, were originally intransitive. Cf. also such cases as בָּכָה *to weep* (generally with עַל־, אֶל־ or לְ), but also *to bewail* with an accusative; יָשַׁב *to dwell* (usually with בְּ), but also *to inhabit* with an accusative (cf. further, under *u*).—The examples are different in which verbs of motion such as בּוֹא *intrare*, also *aggredi*, יָצָא *egredi* (cf. § 116 *h* above), שׁוּב *redire*, Is 52^{8}, take an accusative of the aim of the motion, while בּוֹא according to the Old Semitic usage, even takes an accusative of the person (at least in poetry, equivalent to בּוֹא אֶל־ in prose).

[3] On traces of these endings, especially the remains of a former accusative ending in *a*, cf. § 90 *c*.

[4] אֶת־ (toneless owing to the following Maqqeph), and אֵת (with a tone-long *ē*, אֶת־ only in Jb 41^{26}, אֹת or אוֹת before the light suffixes (on all these forms cf. § 103 *b*: the underlying form *āth* was obscured in Hebrew to *ôth*, shortened to *ăth* before suffixes beginning with a consonant and then modified to אֶת־, whence finally the secondary form אֵת with the tone), Phoenician אית i. e. probably *iyyāth* (for the Phoenician form, cf. G. Hoffmann, *Einige phönik. Inschriften*, Göttingen, 1889, p. 39 f.), Punic *yth* or (according to Euting) pronounced even as a mere prefixed *t*, Arabic, before suffixes, *'iyyā*, Aram. אִיתַ, יָתַ. It was no doubt originally a substantive, meaning *essence, substance, self* (like the Syriac *yāth*; on the other hand, any connexion with the Hebrew אוֹת, Syriac *'ātā*, Arabic *'āyat, a sign*, must, with Nöldeke, *ZDMG.* xl. 738, be rejected), but now united in the construct state with a following noun or suffix stands for the pronoun *ipse*, αὐτός. In common use, however (cf. Wilson, 'The particle אֵת in Hebrew,' *Hebraica*, vi. 2, 3, and the precise statistics of the use

is, however, somewhat rare in poetry, and even in prose it is not invariably necessary but is restricted to those cases in which the accusative of the object is more closely determined by being a proper name, or by having the article, or by a following determinate genitive (hence also by the suffixes), or in some other way (see below, *c*), e. g. Gn 4^{1} *and she bare* אֶת־קַיִן *Cain* ; 6^{10}, 1^{1} *God created* אֵת הַשָּׁמַיִם וְאֵת הָאָרֶץ *the heaven and the earth* (but 2^{4} בְּהִבָּרְאָם בְּיוֹם עֲשׂוֹת יְהוָה אֱלֹהִים אֶרֶץ וְשָׁמָיִם); 1^{25} *and God made* אֶת־חַיַּת הָאָרֶץ *the beast of the earth* ; 2^{24}.

b Rem. 1. The rare occurrence of the *nota accusativi* in poetic style (e. g. it never occurs in Ex 15^{2-18}, Dt 32, Jn 5, 1 S 2, &c., though it is frequent in the late Psalms) may be explained from the fact that in this as in other respects (cf. § 2 *q*) poetry represents a somewhat more archaic stage of the language than prose. The need of some external means of indicating the accusative could only have been felt after the case-endings had become wholly extinct. Even then the אֵת would probably have been used at first to indicate only an object placed *before* the verb (when it followed, it was already sufficiently characterized by its position as depending on the verb), or proper names.[1] Finally, however, the *nota accusativi* became so customary everywhere in prose, that even the pronominal object was expressed rather by אֵת with suffixes than by verbal suffixes, even when none of the reasons mentioned under *e* can be assigned for it; cf. Giesebrecht in *ZAW.* 1881, p. 258 ff., and the statistics of H. Petri, cited above at the head of § 58. Such examples as כְּכֹל אֲשֶׁר־צִוָּהוּ יְהוָה אֹתוֹ אֱלֹהִים Gn 6^{22} in the *Priestly Code*, beside כְּכֹל אֲשֶׁר־צִוָּה יְהוָה 7^{5} in the *Jahvist*, are especially instructive.

c 2. As accusatives determined in other ways, we have in the first place to consider the collectives introduced by כֹּל *entirety*, without a following article or determinate genitive, inasmuch as the meaning of כֹּל includes a determinative sense, cf. e. g. Gn $1^{21.30}$, 8^{21}, Dt 2^{34}, 2 K 25^{9}. אֶת־כֹּל is used absolutely in Gn 9^{3}, cf. 39^{23}; similarly, מִי is determinate of itself, since it always denotes a person, hence אֶת־מִי *quem?* e. g. Is 6^{8}, 37^{23}, &c., but never אֶת־מָה *quid?* So also the relative אֲשֶׁר in the sense of *eum qui* or *quem*, &c.. e. g. 1 S 10^{3}, or *id quod*, Gn 9^{24}, &c. Cf. also such examples as Jos 2^{10}, 1 S 24^{19}, where אֵת אֲשֶׁר is equivalent to *the circumstance, that*, &c.—Elsewhere אֵת stands before nouns which are determinate in sense, although the article is omitted, which according to § 126 *h* is very frequently the case in poetic or otherwise elevated style; thus Lv 26^{5}, Jos $24^{14.15}$, Is 41^{7} (to distinguish the object from the subject); $5c^{4}$ (with the first of two accusatives, also for the sake of clearness); Ez 13^{20}, 43^{10}, Pr 13^{21} (where the צַדִּיקִים are to be regarded as a distinct class); Jb 13^{25}

---

of אֵת on p. 140 ff.), it has so little force (like the oblique cases *αὐτοῦ, αὐτῷ, αὐτόν*, sometimes also *ipsius, ipsum*, and the Germ. *desselben*, &c.) that it merely serves to introduce a determinate object; אֵת הַשָּׁמַיִם prop. *αὐτὸν τὸν οὐρανόν* (cf. *αὐτὴν Χρυσηΐδα*, Iliad i. 143) is no stronger than the simple הַשָּׁמַיִם *τὸν οὐρανόν*. Cf., further, P. Haupt on Pr 18^{24} in his Rainbow Bible, and also in the *Notes on Esther*, p. 191.

[1] Thus, in Dt 33, אֵת occurs only in verse 9 (twice, with an object preceding the verb), in Gn 49 in the blessing of Jacob only in verse 15 with a co-ordinate second object (consequently farther removed from the verb). Of the thirteen instances of אֵת in the Mēša' inscription, seven stand directly and four indirectly before proper names.

(unless, with Beer and others, we read וְאִם for וְאֶת־); also Ec 7^7 may be a quotation of an ancient maxim.

d On the other hand אֵת occurs very seldom in prose before a noun actually or apparently undetermined. In 1 S 24^6 כָּנָף is more closely defined by means of the following relative clause; in 2 S 4^{11} אִישׁ צַדִּיק refers to Ishbosheth (as if it were *him, who was an innocent man*); in 1 K 6^{16} עֶשְׂרִים אַמָּה refers to the particular twenty cubits. In Ex 21^{28} (otherwise in verse 29) perhaps the אֶת־ is used in order to avoid the combination שׁוֹר אִישׁ (as in Nu 21^9 to avoid the cacophony נָשַׁךְ הַנָּחָשׁ אִישׁ ?); in Lv 7^8 and 20^{10} the accusatives are at any rate defined by the context.—In Nu 16^{15} אֶת־אַחַד מֵהֶם probably means *even a single one* (and then *ipso facto* a definite one) *of them*, as also in 1 S 9^3 אֶת־אַחַד מֵהַנְּעָרִים may refer to some definite one of the men-servants. In Gn 21^{30} we should read אֶת־שֶׁבַע הַכְּבָשֹׂת with the Samaritan, since the seven lambs have been already mentioned; in Ex 2^1 translate with Meyer, *Die Israeliten*, p. 79, אֶת־בַּת־לֵוִי *the daughter of Levi*; in Ex 28^9 read הַשֹּׁהַם with the Samaritan; in Lv 20^{14} אֶת־אִשָּׁה is probably a scribal error due to וְאֶת־אִמָּהּ; in 1 S 26^{20} read נַפְשִׁי with the LXX for פַּרְעֹשׁ אֶחָד; in 2 S 5^{24} read הַצְּעָדָה as in 1 Ch 14^{15}; in 2 S 15^{16} the אֶת־ is incorrectly inserted from 20^3, where it refers to the women already mentioned; in 2 S 18^{18} read הַמַּצֵּבָת, or omit both אֶת־ and אֲשֶׁר with the LXX and Lucian; in 1 K 12^{31} omit אֶת־; in 2 K 23^{20} probably אֶת־עַצְמוֹתָם is to be read; in 2 K 25^9 the text is corrupt. In Ez 16^{32} אֶת־זָרִים might refer to *the strangers in question*; but see Smend on the passage.

e 3. The pronominal object *must* be represented by את with a suffix (instead of a verbal suffix), when (*a*) it precedes the verb, e.g. Nu 22^{33} אֹתְכָה הָרַגְתִּי וְאוֹתָהּ הֶחֱיִיתִי *I had slain thée and saved her alive*; Gn 7^1, Lv 22^{28}, 1 S 8^7, Is 43^{22}, 57^{11}, Jer $4^{17.22}$, 7^{19}; (*b*) when a suffix is already attached to the verb, and as a rule when a second accusative with וְ follows, e.g. 2 S 15^{25} וְהֶרְאַנִי אֹתוֹ *and he will show me it*; Ex 17^3 לְהָמִית אֹתִי וְאֶת־בָּנַי *to kill us and our children*; Nu 16^{32}, 1 S 3^{11}, 2 S 14^{16} (but cf. also Dt 11^6, 15^{16}, &c., and Driver on 1 S 5^{10}); (*c*) after an infinitive absolute, see above § 113 *a* note; (*d*) after an infinitive construct, when it is immediately followed by the subject, e.g. Gn 41^{39}, or when the combination of a suffix with the infinitive might lead to a misunderstanding, e.g. Gn 4^{15} לְבִלְתִּי הַכּוֹת־אֹתוֹ *lest one should smite him*, &c., where לְבִלְתִּי הַכּוֹתוֹ might also mean *lest he should smite*.

f 4. The pronominal object is very frequently omitted, when it can be easily supplied from the context; so especially the neuter accusative referring to something previously mentioned (the English *it*) after *verba sentiendi* (שָׁמַע) and *dicendi*, e.g. Gn 9^{22}, &c., וַיַּגֶּד *and he told* (it); also after נָתַן *to give*, Gn 18^7, 24^{41}, &c., לָקַח *to take*, הֵבִיא *to bring*, שִׂים *to lay*, Gn 9^{23}, &c., מָצָא *to find*, Gn 31^{33}, &c. A personal object is omitted, e.g. in Gn 12^{19}, 24^{51} (after לָקַח.—The omission of the plural object is remarkable, because it leaves an opportunity for a misunderstanding, in Gn 37^{17} שָׁמַעְתִּי אֹמְרִים[1] *I heard* them *saying*; perhaps, however, we should read שָׁמַעְתִּים with the Samaritan.

g 5. In common formulae the substantival object is also sometimes omitted

[1] According to the ordinary rules of syntax (cf. § 116 *t*) we should translate, *I heard men who said*, &c.

(an elliptical expression); thus e.g. כָּרַת 1 S 20[16], &c. (see the Lexicon) stands for כָּרַת בְּרִית like the English *to close* (sc. a bargain) with any one; נָטַר *to keep* (sc. אַף *anger*) equivalent to *to be resentful*, ψ 103[9], &c.; so also שָׁמַר Jer 3[5] (beside נָטַר); נָשָׂא for נָשָׂא קוֹל *to lift up the voice*, Is 3[7]; נָשָׂא לְ for נָשָׂא עָוֹן לְ *to take away any one's sin* (to forgive), Gn 18[24.26], Is 2[9]; שָׁלַח *to put forth* (sc. יָד *the hand*) equivalent to *to reach after something*, 2 S 6[6], ψ 18[17].

h 6. *Verba sentiendi* may take a second object, generally in the form of a participle or adjective and necessarily indeterminate, to define more exactly the action or state in which the object is perceived, e.g. Nu 11[10] וַיִּשְׁמַע מֹשֶׁה אֶת־הָעָם בֹּכֶה *and Moses heard the people weeping*; Gn 7[1] אֹתְךָ רָאִיתִי צַדִּיק *thee have I seen righteous*. Frequently, however, the second object is expressed by a separate clause. This is especially frequent with רָאָה *to see*, e.g. Gn 1[4] *and God saw the light, that it was good*; Gn 6[2], 12[14], 13[10], 49[15], Ex 2[2], ψ 25[19], Pr 23[31], Jb 22[12], Ec 2[24], 8[17]; so with יָדַע *to know*, Ex 32[22], 2 S 3[25], 17[8] (with two objects); 1 K 5[17].

i 7. In certain instances אֵת serves apparently to introduce or to emphasize a nominative. This cannot be regarded as a reappearance of the original substantival meaning of the אֵת, since all unquestionable examples of the kind belong to the later Books of the Old Testament. They are rather (apart from textual errors or other explanations) cases of virtual dependence on an implied *verbum regens* understood. The constant use of אֵת to indicate a clause governed by the verb, necessarily led at length to the use of אֵת generally as a defining particle irrespective of a governing verb. So in the Hebrew of the Mishna[1] (see above, § 3 *a*) אֹתוֹ and אֹתָהּ are prefixed even to a nominative without any special emphasis.

k Naturally the above does not apply to any of the places in which אֵת is not the *nota accusativi*, but a preposition (on אֵת *with*, cf. § 103 *b*), e.g. Is 57[15], 1 S 17[34] (וְאֶת־הַדֹּוב *and that, with a bear*; אֶת־ here, however, has probably been interpolated from verse 36, where it is wanting); nor the places in which the accusative is subordinate to a passive (according to § 121 *c*) or to a verb of wanting as in Jos 22[17] and Neh 9[32], see below, *z*. In Ez 43[17] סָבִיב *about* governs like a verb, being followed by אוֹתָהּ.

l Other cases are clearly due to attraction to a following relative pronoun in the accusative (Ez 14[22], Zc 8[17]; but Hag 2[5*a*], to ממצרים, must be omitted, with the LXX, as a later addition), or the accusative depends on a verbal idea, virtually contained in what has gone before, and consequently present to the speaker's mind as governing the accusative. Thus Nu 3[26] (the verbal idea contained in ומשמרת verse 25 is *they had to take charge of*); in Jos 17[11] ויהי לְ implies *it was given up* or *they gave him*; 1 S 26[16] *see where* is equivalent to *search now for*; in 2 S 11[25] אל־ירע בעיניך is used in the sense of *noli aegre ferre*[2]; Jer 36[33] *and* he had *the brazier before him*; in Ec 4[3] a verb like *I esteem* is mentally supplied before אֵת אֲשֶׁר. On Jos 22[17], Neh 9[32], see below, *aa*.—Aposiopesis occurs in Dt 11[2] *for not your children* (do I mean); still more boldly in Zc 7[7], where either שְׁמַעְתֶּם or (תֵּעָשׂוּ) תִּשְׁמְעוּ is to be supplied.

m Setting aside a few undoubtedly corrupt passages[3] there still remain the

---

[1] Cf. Weiss, משפט לשון המשנה (Vienna, 1867), p. 112.

[2] So also in 1 S 20[13] the Qal (יֵיטַב) is, with Wellhausen, to be read instead of the Hiph'il.

[3] Thus 1 S 26[16], where וְאֵי is to be read for וְאֵת; 1 K 11[25], where at present the predicate of the relative clause is wanting; in 2 K 6[5] the אֵת is probably

following examples, in which אֶת־ in the later Hebrew manner (almost in the sense of the Latin *quod attinet ad*) introduces a noun with more or less emphasis, Nu 3^{46}, 5^{10}, 35^{6}, Ju $20^{44.46}$, Ez 17^{21}, 20^{16}, 35^{10}, 44^{3}, Neh $9^{19.34}$, Dn 9^{13}, 2 Ch 31^{17}.—In Ez 47^{17-19} (cf. also 43^{7}) it is simplest to emend וְאֵת for אֶת־, according to verse 20. However, even the LXX, who have *raûra* only in verse 18, can hardly have known any other reading than אֵת; consequently in all these passages אֵת must be regarded as virtually dependent on some governing word, such as *ecce* (LXX 43^{7} ἐώρακας), and $47^{17 ff.}$ as equivalent to *thou shalt have* as a border, &c.

n 8. Another solecism of the later period is finally the introduction of the object by the preposition לְ (prop. *in relation to, in the direction of*), as sometimes in Ethiopic[1] and very commonly in Aramaic.[2] Less remarkable is this looser connexion of the object with a participle, as with אָבַל La 4^{5}, אֹפֵף Nu 10^{25}, זָקֵף ψ 145^{14} (but cf. 146^{8}), צָרַר Nu 25^{18}, הִשְׁנִיא and שָׂטַן Jb 12^{23}; *before* the participle Is 11^{9}.—To introduce an object *preceding* the finite verb לְ is employed in Jb 5^{2} (cf. also Dn 11^{31}); also *after* אָהַב Lv $19^{18.34}$; הֶאֱרִיךְ ψ 129^{3}; הֵבִיל Ezr 8^{24}, 2 Ch 25^{10}; הֵבִין Jb 9^{11}; בֵּרַךְ 1 Ch 29^{20} (immediately before with an accusative); הִגְלָה 1 Ch 5^{26}; דָּרַשׁ Ezr 6^{21}, 1 Ch 22^{19}, 2 Ch 17^{13}; הָהִיָה Gn 45^{7}, where, however, read פְּלֵיטָה with the LXX for לִפְלֵיטָה and take לָכֶם as a *dativus commodi*; הָלַל 1 Ch 16^{36}, 2 Ch 5^{13}; הָרַג 2 S 3^{30}, ψ 135^{11} (verse 10 with accusative), $136^{19 f.}$; חָבַשׁ (*to bind up*) Is 61^{1} (Ez 34^{4} *before* the verb); יָרַע ψ 69^{6}; כָּבַד ψ 86^{9}; לָקַח Jer 40^{2}, 2 Ch 23^{1}; הִמְלִיךְ and מָשַׁח 1 Ch 29^{22}; נָהַל 2 Ch 28^{15}; סָמַךְ ψ 145^{14}; עָזַב 1 Ch 16^{37}; הֶעֱלָה Ez 26^{3}; פִּתֵּחַ ψ 116^{16}; רָדַף Jb 19^{28}; הִצְדִּיק Is 53^{11}; שָׁבַר 2 Ch 24^{12} (previously accusatives); שִׂים 1 S 22^{7} (but probably וְכִלְכֶּם is to be read); הֵשִׁיב (in the connexion הֵשִׁיב דָּבָר לְ) 2 Ch 10^{6} (but verse 9 and 1 K 12^{9} with an accusative); שִׁחֵת Nu 32^{15}, 1 S 23^{10}; שִׁית ψ 73^{18}; שָׁלַח Ezr 8^{16}, 2 Ch 2^{12}, 17^{7}; שָׁמַר 1 Ch 29^{18}, 2 Ch 5^{11}.

o 9. Sometimes the verb, on which an accusative of the object really depends, is contained only in sense in the verb which apparently governs, e.g. Is 14^{17} אֲסִירָיו לֹא־פָתַח בֵּיתָה *his prisoners he let not loose* nor sent them back *to their home*. On this *constructio praegnans* in general, see § 119*ff*.

p **2.** With the proper accusatives of the object may also be classed what is called the *internal* or *absolute object* (also named *schema etymologicum* or *figura etymologica*), i.e. the addition of an object in the form

---

derived from a text which read the Hiph'il instead of נָפַל. In Jer 23^{33} instead of the artificial explanation *what a burden* (is, do ye ask?) we should read with the LXX and Vulg. אַתֶּם הַמַּשָּׂא *ye are the burden*. In Ez 10^{22} מַרְאֵיהֶם וְאוֹתָם is unintelligible; in 37^{19} read with Hitzig אֶל־ for אֵת; in Hag 2^{17} for אתכם read with the LXX שִׁבְכֶם [or אֵינְכֶם; for the אֶל cf. 2 K 6^{11}, Jer 15^{1}, Ez 36^{9}].

[1] Dillmann, *Grammatik der äthiopischen Sprache*, p. 349.

[2] With regard to Biblical Aramaic, see Kautzsch's *Grammatik des Bibl.-Aram.*, p. 151 f. In other ways, also, a tendency may be observed in later Hebrew to make use of the looser connexion by means of prepositions instead of the closer subordination of the noun in the accusative.

of a noun derived from the same stem,[1] e.g. ψ 14[5] פָּחַד פָּחֲדוּ *they feared a fear* (i.e. they were in great fear), Pr 15[27]; also with the object preceding, e.g. La 1[8] חֵטְא חָטְאָה יְרוּשָׁלַם *Jerusalem hath sinned a sin*; with a double accusative (see below, *cc*), e.g. 1 K 1[12] אִיעָצְךָ נָא עֵצָה *let me, I pray thee, give thee counsel*; 1 K 1[12].[2]

q Rem. (*a*) Strictly speaking the only cases of this kind are those in which the verbal idea is supplemented by means of an *indeterminate* substantive (see the examples above). Such a substantive, except in the case of the addition of the internal object to denominative verbs (see below), is, like the infinitive absolute, never altogether without force, but rather serves like it to strengthen the verbal idea. This strengthening is implied in the indeterminateness of the internal object, analogous to such exclamations as, *this was a man!*[3] Hence it is intelligible that some intensifying attribute is very frequently (as in Greek usually) added to the internal object, e.g. Gn 27[34] וַיִּצְעַק צְעָקָה גְּדֹלָה וּמָרָה עַד־מְאֹד *he cried* (with) *an exceeding great and bitter cry*; cf. the Greek *νοσεῖν νόσον κακήν, ἐχάρησαν χαρὰν μεγάλην* (Matt. 2[10]); *magnam pugnare pugnam, tutiorem vitam vivere*, &c.

Examples of an internal object *after* the verb, and without further addition, are Ex 22[5], 2 S 12[16], Is 24[22], 35[2], 42[17], Ez 25[15], 26[15], 27[35], Mic 4[9], Zc 1[2], Pr 21[26]; with an intensifying attribute, Gn 27[33], Ex 32[31], Ju 15[8], 2 S 13[36], 1 K 1[40] (cf. Jon 4[6], 1 Ch 29[9]); Is 21[7], 45[17], Jon 1[10], Zc 1[14], 8[2*a*], Dn 11[3]; along with an object proper the internal object occurs with an attribute in Gn 12[17], 2 S 13[15]; cf. also Is 14[6], Jon 4[1].—An internal object without an attribute *before* the verb: Is 24[16], Jer 46[5], Hb 3[9], Jb 27[12]; with an attribute *before* the verb: Jer 14[17], Zc 1[15] (cf. also Gn 30[8], Jer 22[19], 30[14], ψ 139[22]). Instead of the substantive which would naturally be expected, another of kindred meaning is used in Zc 8[2].

r (*b*) Only in a wider sense can the *schema etymologicum* be made to include cases in which the denominative verb is used in connexion with the noun from which it is derived, e.g. Gn 1[11], 9[14], 11[3], 37[7], Ez 18[2], ψ 144[6], probably also Mi 2[4], or where this substantive, made determinate in some way, follows its verb, e.g. Gn 30[37], Nu 25[11], 2 K 4[13], 13[14], Is 45[17], La 3[58],[4] and, determinate at least in sense, Jer 22[16]; or precedes it, as in 2 K 2[16], Is 8[12], 62[5], Zc 3[7]; cf. also Ex 3[9]. In both cases the substantive is used, without any special emphasis, merely for clearness or as a more convenient way of connecting the verb with other members of the sentence.

s **3.** Verbs which denote *speaking* (*crying out, weeping*), or any external act, frequently take a direct accusative of the organ or means by which the action is performed. In this case, however, the accusative must be more closely determined by an attributive adjective or a noun in the genitive. This fact shows the close relation between these accusatives and the *internal objects* treated under *p*, which also,

---

[1] On a kindred use of the infinitive absolute as an *internal object*, see above, § 113 *w*.

[2] Cf. *βουλὰς βουλεύειν*, Iliad x. 147.

[3] The Arab grammarians assign to the indeterminate cases generally an intensive sense in many instances; hence the commentators on the Qorân usually explain such cases by adding *and what . . .!* see § 125 *b*.

[4] Also in ψ 13[4] *lest I sleep the* sleep of *death*, הַמָּוֶת is only used pregnantly for שְׁנַת הַמָּוֶת (cf. Jer 51[39]), as צְדָקוֹת Is 33[15] for דֶּרֶךְ צְדָקוֹת. On the similar use of הֹלֵךְ תָּמִים in ψ 15[2], see § 118 *n*.

according to *q*, mostly take an intensifying attribute. On the other hand, they must not be regarded as adverbial (instrumental) accusatives, nor are they to be classed with the second (neuter) subjects treated below in § 144 *l*.

t Examples of the accusative following the verb are וְאֶזְעַק קוֹל־נָדוֹל *and I cried a loud voice*, i. e. with a loud voice, Ez 11[13], 2 S 15[23] (after the proper object, Dt 5[19], 1 K 8[55]); ψ 109[2] *they have spoken unto me* לְשׁוֹן שֶׁקֶר *a tongue of deceit*, i. e. with a lying tongue; Pr 10[4] *he becometh poor* עֹשֶׂה כַף־רְמִיָּה *dealing a slack hand*, i. e. who dealeth with a slack hand; cf. the German *eine schöne Stimme singen*, to sing a fine voice, *eine tüchtige Klinge schlagen*, to smite a trusty sword, *Schlittschuhe laufen*, to run skates (i. e. to skate), and our *to write a good hand*, *to play ball*, &c.—Examples of the accusative preceding are שִׂפְתֵי רְנָנוֹת יְהַלֶּל־פִּי *my mouth shall praise* with *joyful lips*, ψ 63[6]; cf. ψ 12[3], where a *casus instrumenti* with בְּ follows the accusative.

u **4.** Many verbs originally intransitive (sometimes even in form; see *a*, note 2) may be used also as transitives, in consequence of a certain modification of their original meaning, which has gradually become established by usage; cf. e. g. רִיב *to strive*, but also with an accusative *causam alicuius agere* (so even in Is 1[17], &c.; elsewhere with לְ of the person for whom one strives); יָכֹל absolutely *to be able*, with an accusative *to prevail over* any one; חָפֵץ *to be inclined* and רָצָה *to have pleasure* (usually with בְּ), with an accusative *to wish for some one* or *something*; שָׁבַב *cubare*, then in the sense of *concumbere*, originally joined with עִם *cum*, but quite early also with the accusative, equivalent to *comprimere* (*feminam*), &c. So in 2 S 13[14], &c., unless in all or some of the passages the preposition אֵת is intended, e. g. אִתָּהּ for אִתָּהּ; in the earlier passages עִם is the more usual.

v Rem. 1. It is certainly difficult to decide whether some verbs, which were afterwards used absolutely or joined with prepositions, were not nevertheless originally *transitive*, and consequently it is only the supposed original meaning, usually assigned to them in English, which causes them to appear *intransitive*.[1] In that case there is of course no syntactical peculiarity to be considered, and a list of such verbs would at the most be requisite only for practical purposes. Moreover, it is also possible that certain verbs were originally in use at the same time both as transitive and intransitive, e. g. perhaps לָבֵשׁ *to be clothed* along with לָבַשׁ *to put on* (a garment). Finally the analogy of certain transitives in constant use may have led to intransitives of kindred meaning being also united directly with the accusative, so that, in other words, whole classes of verbs came to be regarded in a particular aspect as transitives. See below, *y*.

---

[1] Thus e.g. עָנָה *to reply to* (ἀμείβεσθαί τινα), *to answer any one*; צִוָּה *to command* (iubere aliquem); זָכַר *to remember*; קִוָּה (also with לְ) *to wait for any one* (to expect any one); בִּשֵּׂר *to bring glad tidings to any one* (see the Lexicon); נָאַף and נִאֵף *to commit adultery* (adulterare matronam); עָבַד *to serve* (colere); עָרַב *to become surety for* . . ., and many others.

w 2. The modification of the original meaning becomes especially evident when even reflexive conjugations (*Niph'al, Hithpa'ēl*, &c.) take an accusative (cf. § 57, note 2); e.g. נִבָּא *to prophesy*, Jer 25[13]; נָסַב (prop. *to put oneself round*) *to surround*, Ju 19[22]; נִלְחַם *to fight*, ψ 109[3] (where, however, the *Qal* וַיִּלָּחֲמוּנִי should be read; cf. ψ 35[1]); also הִתְגַּלַּח *to shave* (something) *for oneself*, Num 6[19]; הִתְנַחֵל *to take* some one *for oneself as a possession*, Is 14[2]; הִתְנַכֵּל *to make* some one *an object of craft*, Gn 37[18]; הִתְנַצֵּל *to strip* a thing *off oneself*, Ex 33[6]; הִתְעַבֵּר *to bring on oneself the anger* of any one, *to anger* him; הִתְבּוֹנֵן *to considcr* something, Jb 37[14]; הִתְפָּרֵק *to break* something *off from oneself*, Ex 32[3]. In Gn 34[9] after הִתְחַתְּנוּ *make ye marriages*, read אִתָּנוּ instead of אֹתָנוּ. Cf. § 54*f*.

x 3. So also it is only owing to a modification of the original meaning of a verb (except where the expression is incorrect, and perhaps derived from the popular language), when sometimes the remoter object (otherwise introduced by לְ) is directly subordinated in the form of an accusative suffix, e.g. Zc 7[5] הֲצוֹם צַמְתֶּנִי אָנִי *did ye fast at all unto me, even to me?* as though to say, have ye *be-fasted* me? have ye reached me with your fasting? Still more strange is Jb 31[18] גְּדָלַנִי כְּאָב *he* (the orphan) *grew up to me as to a father*; cf. Is 27[4], 65[5], Jer 31[3], and in Aramaic Dn 5[6]; but אֶרֶץ הַנֶּגֶב נְתָתָנִי Jos 15[19] is to be regarded as a double accusative after a verb of *giving*, see *ff*. In 1 S 2[25] read וּפִלָּלוֹ for וּפִלְלוֹ; in Is 44[21], instead of the Niph'al, read תִּנָּשֵׁנִי; in Ez 29[3] either עָשִׂיתִי is to be read with Olshausen or עֲשִׂיתִים (and previously יְאֹרִי) with Smend; in ψ 42[5] אֶדַּדֵּהּ or אֲדַדֵּם; in ψ 55[23] (where König takes יְהָבְךָ as *he has given it to thee*) we must certainly assume a substantive יְהָב (= *fate*?).

y 4. Whole classes of verbs, which, according to *v* above, are regarded as *transitive*, either on account of their original meaning or (for the sake of analogy) by a modification of that meaning, are—

(*a*) Verba *induendi* and *exuendi*, as לָבַשׁ *to put on*, פָּשַׁט *to put off* a garment, עָדָה *to put on* ornaments, *to adorn oneself with* (cf. also מְשֻׁבָּצִים זָהָב *enclosed in gold*, Ex 28[20]). Also in poetic expressions such as ψ 65[14] לָבְשׁוּ כָרִים הַצֹּאן *the pastures are clothed with flocks*, cf. ψ 109[29]; 104[2] (עָטָה); 65[14*b*] (עָטַף), &c.[1]

z (*b*) Verba *copiae* and *inopiae* (also called verba *abundandi* and *deficiendi*), as מָלֵא, *to be full of* something, Ex 8[17]; here, and also frequently elsewhere, construed with אֶת־, and hence evidently with an accusative; Gn 6[13]; with a personal object, Ex 15[9] *my lust shall be satisfied upon them*; with an accusative *preceding* the verb for the sake of emphasis, e.g. Is 1[15] *your hands* דָּמִים מָלְאוּ *are full of blood*, cf. Is 22[2]; so also the *Niph.* נִמְלָא *to fill oneself with* something, e.g. Gn 6[11], Ex 1[7] (where the object is connected by אֵת); Is 2[7*f*], 6[4], Pr 3[10]; נִזְרַע *to be fructified with*, Nu 5[28]; שָׁרַץ *to swarm with*, Gn 1[20.21] Ex 7[28]; שָׂבַע (שָׂבֵעַ) *to be full of*, Is 1[11], Jo 2[19], Pr 12[11]; גָּבַר *to become strong, to wax mighty in* something, Jb 21[7]; פָּרַץ *to overflow with* something, Pr 3[10] (with the object preceding); יָרַד prop. *to descend*, poetically also *to pour down, to overflow with* something (cf. in Greek προρρεῖν ὕδωρ, δάκρυα στάζειν), e.g. La 3[48] פַּלְגֵי מַיִם תֵּרַד עֵינִי *mine eye runneth*

[1] From the idea of *covering oneself with* something, we might also, if necessary, explain Ex 30[20] יִרְחֲצוּ מַיִם *they shall wash themselves with water*; but the reading is simply to be emended to the ordinary בַּמַּיִם.

down (with) rivers of water; 1[16], Jer 9[17], 13[17], ψ 119[136]; so also הָלַךְ *to run over with, to flow with*, Jo 4[18]; נָזַל *to gush out with*, Jer 9[17]; נָטַף *to drop, to overflow with*, Ju 5[4], Jo 4[18a]; פָּרַח *to break forth*, Ex 9[9]; שָׁטַף *to overflow*, but also (transitively) *to overflow with*, probably in Is 10[22]; נוּב *to bud with*, Pr 10[31]; so perhaps also עָבַר *to pass over, to overflow with*, Jer 5[28]; יָצָא *to go forth* with, Am 5[3].—Especially bold, but still on the analogy of the above examples, is Is 5[6], where it is said of a vineyard וְעָלָה שָׁמִיר וְשַׁיִת *but it shall come up* (it shall be overgrown) *with briers and thorns*; cf. Pr 24[31], and still more boldly, Is 34[13].

aa With the opposite idea, חָסֵר *to be in want of, to lack*, Gn 18[28]; שָׁכֹל *to be bereaved of* (as though it were *to lose*), Gn 27[45].—In Jos 22[17] even הַמְעַט־לָנוּ (prop. *was there too little for us of . . .?*) as being equivalent to a verbum inopiae (= *had we too little of . . .?*) is construed with an accusative; cf. Neh 9[32].

bb (*c*) Several verbs of *dwelling*; the accusative in this case expresses either the place or the thing *at* which or *with* which any one tarries; thus Gn 4[20], ψ 22[4] after יָשַׁב, cf. § 118 *g*; Ju 5[17], Is 33[14] after גּוּר; ψ 57[5] after שָׁכַב; ψ 68[7]. Pr 8[12], Is 33[16] with שָׁכַן; or even the person (the people) with whom any one dwells or is a guest, as ψ 5[5], 120[5] after גּוּר, Gn 30[20] after זָבַל, ψ 68[19] with שָׁכַן.

cc **5.** *Two accusatives* (usually one of the person and one of the thing) are governed by—

(*a*) The causative conjugations (*Pi'ēl, Hiph'il*, sometimes also *Pilpel*, e. g. כִּלְכֵּל Gn 47[12], &c.) of verbs which are simply transitive in *Qal*, and hence also of *verba induendi* and *exuendi*, &c. (cf. above *a* and *u*, and also *y*, *z*), e.g. Ex 33[18] הַרְאֵנִי נָא אֶת־כְּבֹדֶךָ *show me, I pray thee, thy glory*. Thus very frequently הוֹדִיעַ *to cause* some one *to know* something; לִמֵּד *docere aliquem aliquid*, &c.; cf. further, Gn 41[42] וַיַּלְבֵּשׁ אֹתוֹ בִּגְדֵי־שֵׁשׁ *and he caused him to put on vestures of fine linen* (*he arrayed him in vestures*, &c.); cf. in the opposite sense, Gn 37[23] (both accusatives after הִפְשִׁיט introduced by אֶת); so with מִלֵּא *to fill, to fill up* with something, Gn 21[19], 26[15], Ex 28[3]; אָזַר *to gird* some one with something, ψ 18[33]; עִטֵּר *to crown*, ψ 8[6], &c.; חִסֵּר *to cause* some one *to lack* something, ψ 8[6]; הֶאֱכִיל *to feed* some one with something, Ex 16[32]; הִשְׁקָה *to make* some one *drink* something, Gn 19[32ff.].

dd (*b*) Many verbs (even in *Qal*) which express an influence upon the object through some external means. The latter, in this case, is attached as a second object. They are especially—

ee (*α*) Verbs which express *covering, clothing, overlaying*, חָנַר Ex 29[9], צָפָה Ex 26[29], &c., טוּחַ Ez 13[10ff.], עָטַר ψ 5[13]; cf. also רָצַם אֶבֶן Jos 7[25], &c.; hence also verbs which express *sowing* (זָרַע Jud 9[45], Is 17[10], 30[23]), *planting* (Is 5[2]), *anointing* (ψ 45[8]) *with* anything.

ff (*β*) Expressions of *giving*, thus נָתַן Jos 15[19] where the accusative of the thing precedes; *endowing*, זָבַד Gn 30[20]; and its opposite *taking away*, as קָבַע Pr 22[23]; בָּרַךְ *to bless some one with something*, Gn 49[25], Dt 15[14]; *to give graciously*, חָנַן Gn 33[5]; *to sustain* (i.e. to support, to maintain, to furnish) *with* anything,

e.g. Gn 27[37], ψ 51[14] (סָמַךְ); Ju 19[5] (סָעַד); *to do something to one,* גָּמַל Gn 50[15.17], 1 S 24[18]; cf. also קִדֵּם *to come to meet any one with* something, ψ 21[4], שִׁלַּם *to repay some one* with something (with two accusatives, ψ 35[12], Pr 13[21]), and for the accusative of the person cf. εὖ, κακῶς πράττειν τινά. In a wider sense we may also include such phrases as *they hunt every man his brother with a net,* Mi 7[2]; *to shoot at one with arrows,* ψ 64[8] (though this is against the accents); Pr 13[24] *seeks him early* (with) *discipline,* i.e. *chastises him betimes,* &c.

(γ) Expressions of *asking* some one *for* something, *desiring* something *from* some one (שָׁאַל Dt 14[26], ψ 137[3]); *answering* any one anything (עָנָה Mi 6[5], &c.; cf. in the other conjugations הֵשִׁיב דָּבָר prop. *verbum reddere,* with an accusative of the person, 1 K 12[6], &c., also in the sense of *announcing*; sometimes also הִגִּיד *to declare* something *to* some one, Jb 26[4], &c., for הִגִּיד לְ); צִוָּה *to enjoin a person* something, Ex 34[32], Dt 1[18], 3[2.46], Jer 7[23]. *gg*

(δ) Expressions which mean *to make, to form, to build something out of* something; in such cases, besides the accusative of the object proper, another accusative is used for the material of which the thing is made, e.g. Gn 2[7] וַיִּיצֶר יְהוָה אֱלֹהִים אֶת־הָאָדָם עָפָר מִן־הָאֲדָמָה *and the Lord formed man of the dust of the ground*; so with יָצַר also in 1 K 7[15]; further Ex 38[3] כָּל־כֵּלָיו עָשָׂה נְחֹשֶׁת *all the vessels thereof made he of brass* (for another explanation of the accusative נְחֹשֶׁת [*into brass*], linguistically possible but excluded by the context, see below, *ii* with *kk*); cf. Ex 25[18.28], 26[1.14 f.29], 27[1], 36[8], 1 K 7[27]; with a preceding accusative of the material, Ex 25[29], 29[2], Dt 27[6] אֲבָנִים שְׁלֵמוֹת תִּבְנֶה אֶת־מִזְבַּח יְהוָה *of unhewn stones shalt thou build the altar of the Lord.* *hh*

(ε) Verbs which express *making, preparing, forming into* anything, along with the object proper, take a second accusative of the product, e.g. Gn 27[9] אֶעֱשֶׂה אֹתָם מַטְעַמִּים *I will make them* (the kids) into *savoury meat*; cf. Gn 6[14.16], Ex 26[1b], 30[25], 32[4], Is 44[15], Ho 8[4], 1 K 18[32] וַיִּבֶן אֶת־הָאֲבָנִים מִזְבֵּחַ *and he built the stones* (into) *an altar*; cf. 10[12]. So also אָפָה, with two accusatives, *to bake* something *into* something, Ex 12[39], Lv 24[5]; שִׂים (prop. *to set up for* something, cf. Gn 27[37], 28[18], ψ 39[9], and similarly הֵרִים Gn 31[45]) *to change into* something, Jos 8[28], Is 50[2], 51[10], Mi 1[7], 4[13]; with two accusatives of the person (*to appoint, promote* any one to the position of a . . .), Is 3[7]; נָתַן is also used in the same sense with two accusatives, Gn 17[5], and שִׁית 1 K 11[34]; as a rule, however, the description of the office, and also frequently of the product, is introduced by לְ *to*, § 119 *t*; also שִׁית *to make a thing so and so* (Is 5[6], 26[1]; with a personal object, ψ 21[7], [1] 91[9]); הֵחְשִׁיךְ *to make dark,* Am 5[8]. Of the same class also are instances like Jb 28[2] וּמֵאֶבֶן יָצוּק נְחוּשָׁה זְרוֹעוֹתָיו *a stone they smelt into brass*; 1 K 11[30] וַיְקָרַע שְׁנֵים עָשָׂר קְרָעִים *and rent it* (the garment) *into twelve pieces*; cf. Is 37[26], accusative of the product before the object proper, after לְהַשְׁאוֹת *to lay waste.* *ii*

[1] Cf. a very pregnant expression of this kind in ψ 21[13] כִּי תְשִׁיתֵמוֹ שֶׁכֶם *for thou shalt make them* (as) *a neck,* i.e. *thou shalt cause them to turn their necks* (backs) *to me*; similarly ψ 18[41] (2 S 22[41], Ex 23[27]) אֹיְבַי נָתַתָּה לִי עֹרֶף *thou hast given mine enemies unto me as a back*; cf. Jer 18[17].

On a second object with *verba sentiendi* (as יָדַע *to know* something *to be* something, Ec 7^{25}; רָאָה *to see, find to be*, Gn 1^{1}; חָשַׁב *to esteem* one *to be* something, Is 53^{4}, elsewhere always construed with לְ or בְּ), cf. *h*.

kk Rem. At first sight some of the examples given above appear to be identical in character with those treated under *hh*; thus it is possible, e. g. in 1 K 18^{32}, by a translation which equally suits the sense, *he built from the stones an altar*, to explain מִזְבֵּחַ as the nearer object and אֶת־הָאֲבָנִים as an accusative of the material, and the construction would then be exactly the same as in Dt 27^{6}. In reality, however, the fundamental idea is by no means the same. Not that in the living language an accusative of the material in the one case, and in the other an accusative of the product were consciously distinguished. As Driver (*Tenses*, § 195) rightly observes, the remoter accusative in both cases is, strictly speaking, in apposition to the nearer. This is especially evident in such examples as Ex 20^{25} *thou shalt not build them* (the stones of the altar) גָּזִית as *hewn stones*, cf. also Gn 1^{27}. The main point is, which of the two accusatives, as being primarily affected (or aimed at) by the action, is to be made the more prominent; and on this point neither the position of the words (the nearer object, mostly determinate, as a rule follows immediately after the verb), nor even the context admits of much doubt. Thus in 1 K 18^{32} the treatment of the stones is the primary object in view, the erection of the altar for which they were intended is the secondary; in Dt 27^{6} the case is reversed.

ll (*d*) Finally, the second accusative sometimes more closely determines the nearer object by indicating the part or member specially affected by the action,[1] e. g. ψ 3^{8} *for thou hast smitten all mine enemies* לֶחִי (as to) *the cheek bone*, equivalent to *upon the cheek bone*; cf. Gn 37^{21} *let us not smite him* נֶפֶשׁ in *the life*, i. e. let us not kill him; Dt 22^{26}, 2 S 3^{27}; also with שׂוּם Gn 3^{15}; with רָעָה Jer 2^{16}; in poetry the object specially concerned is, by a bold construction, even placed first, Dt 33^{11} (with מָחַץ).

§ 118. *The Looser Subordination of the Accusative to the Verb.*

a 1. The various forms of the looser subordination of a noun to the verb are distinguished from the different kinds of the accusative of the object (§ 117) by their specifying not the persons or things directly affected by the action, but some *more immediate circumstance* under which an action or an event takes place. Of such circumstances the most common are those of *place*, *time*, *measure*, *cause*, and finally the *manner* of performing the action. These nearer definitions are, as a rule, placed *after* the verb; they may, however, also precede it.

b Rem. That the cases thus loosely subordinated to the verb are to be regarded as *accusatives* is seen first from the fact that in certain instances the *nota accusativi* (אֵת) is prefixed; secondly from the fact that in one form of

[1] Analogous to this is the σχῆμα καθ' ὅλον καὶ κατὰ μέρος in Greek epic poetry, e. g. ποῖόν σε ἔπος φύγε ἕρκος ὀδόντων.

the *casus loci* a termination (ה_ֶ) is employed, in which (according to § 90 *c*) the old accusatival ending is preserved; and finally from the consistency with which classical Arabic puts these nearer definitions in the accusative (which may be recognized by its form) even under circumstances in which one would be rather inclined to expect a nominative in apposition.

c The relation subsisting between the circumstantial accusative and the accusative of the object is especially apparent when the former (as e.g. in a statement of the goal after a verb of motion) is immediately connected with its verb. But even the more loosely connected circumstantial definitions are certainly to be regarded as originally objects of a governing word habitually omitted, only that the consciousness of this closer government was at length lost, and the accusative more and more acquired an independent value as a *casus adverbialis*.

d **2.** The accusative serves to define more precisely the *place* (*accus. loci*), either (*a*) in answer to the question *whither?* after verbs of motion,[1] or (*b*) in answer to the question *where?* after verbs of *being, dwelling, resting*, &c. (but also after transitive verbs, see the examples), or finally (*c*) to define more precisely the *extent* in space, in answer to the question *how far? how high? how much?*, &c.

e Instead of the simple accusative, the locative (see above, § 90 *c*)[2] is frequently found in the cases mentioned under *f* (sometimes also in those under *g*) or the preposition אֶל־,[3] especially before persons as the aim of the movement, or בְּ, usually, to express being *at* a place.

f Examples of (*a*): נֵצֵא הַשָּׂדֶה *let us go out into the field*, 1 S 20[11]; cf. Gn 27[3], 31[4], Jb 29[7]; לָלֶכֶת תַּרְשִׁישׁ *to go to Tarshish*, 2 Ch 20[36]; cf. Gn 10[11], 13[9], 24[27], 26[23], 31[21], Ex 4[9], 17[10], Ju 1[26], 2 K 11[19], Na 1[8] (?), ψ 134[2]; with לָקַח Nu 23[14]; with נָתַן Jos 6[24]; with the *accus. loci* emphatically preceding (cf. Driver on 1 S 5[8]), 1 K 2[26], Is 23[12], Jer 2[10], 20[6], 32[5]; with בּוֹא (in the sense of *aggredi*, equivalent to בּוֹא עַל־, cf. § 117 *a*, note 2) the *personal* aim also is poetically added in the accusative, Ez 32[11], 38[11], Pr 10[24], 28[22], Jb 15[21], 20[22]; but in the last passage it is better taken as an accusative of the object (cf. the German *einen ankommen, überkommen*). See also Nu 10[36] (where שׁוּב can hardly be transitive); Ju 11[29], 1 S 13[20] (where, however, אֶל־ has probably fallen out after ישׂראל; so Strack).—Finally, cf. also the use of שָׁמָּה for אֲשֶׁר . . . אֲשֶׁר *whither*, Nu 13[27].—The *accus. loci* occurs after a passive, e.g. Gn 12[15].

g Examples of (*b*): Gn 38[11] *remain a widow* בֵּית אָבִיךְ *in thy father's house*; cf. Gn 24[23], 1 S 17[15], 2 S 2[32], Is 3[6], Hos 12[5], Mi 6[10], 2 Ch 33[20]; פֶּתַח הָאֹהֶל *in the tent door*, Gn 18[1.10], 19[11], and frequently. As observed by Driver on 1 S 2[29], accusatives of this kind are almost without exception (but cf. 1 K 8[32], Is 16[4], 28[7], 2 Ch 33[20]) connected with a noun in the genitive. In all the above examples, however, the accusative may have been preferred to the natural construction with בְּ (which is not rare even with בַּיִת and פֶּתַח) for euphonic reasons, in order to avoid the combination of such sounds as בְּבַ֫ and בְּפַ֫; cf., moreover, Gn 2[14], 4[16], Ex 18[5], Lv 6[8] (הַמּוּבָּחָה instead of the usual הַמִּזְבֵּחַ

---

[1] So commonly in Sanskrit; in Greek only poetically, e.g. Iliad i. 317 *κνίσῃ δ' οὐρανὸν ἷκεν*: in Latin, e.g. *rus ire, Romam proficisci*.

[2] Hence e.g. in 1 S 9[26] the Masora requires הַגָּגָה instead of the *K^eth.* הַגָּג.

[3] So in Ju 19[18] for יְ אֶת־בֵּית the better reading is יְ אֶל־בֵּ.

Ex 29^{13}, &c.); Dt $1^{2.19}$, [1] 2 S 17^{26}, 1 K 7^{8}, Pr 8^{3}, 9^{14}. On Is 1^{30} see § 116 *i*; on יָשַׁב, with the *accus. loci*, see § 117 *bb*. On the other hand, in Dt 6^{3}, according to the LXX, a verb of *giving* has dropped out before אֶרֶץ.

h Examples of (*c*): Gn 7^{20} *fifteen cubits upward did the waters prevail*; Gn 31^{23}, 41^{40} רַק הַכִּסֵּא אֶגְדַּל מִמֶּךָּ *only in the throne will I be greater than thou*; Dt 1^{19} *we went* (through) *all that great and terrible wilderness*; cf. Jb 29^{3}. Of the same kind also are such cases as Ex 16^{16} (*according to the number of your persons*, for which elsewhere לְמִסְפַּר is used); 1 S 6^{4} (with the accus. preceding); 6^{18}, 2 S 21^{20}, Jb 1^{5}.—A statement of weight is put in the accusative in 2 S 14^{26}.

i **3.** The accusative is employed to determine more precisely the *time* (*accus. temporis*), (*a*) in answer to the question *when?* e. g. הַיּוֹם *the day*, i. e. *on the day* (in question), *at that time*, but also *on this day*, i. e. *to-day*, or finally *by day*, equivalent to יוֹמָם, like עֶרֶב *at evening*, לַיְלָה *noctu*, בֹּקֶר *in the morning, early*, ψ 5^{4}, &c., צָהֳרַיִם *at noonday*, ψ 91^{6}; יוֹם אֶחָד *on one and the same day*, Gn 27^{45}; שֵׁנָא *in sleep*, ψ 127^{2}; תְּחִלַּת קְצִיר שְׂעֹרִים (*Qerê* בְּתְּ) *at the beginning of barley harvest*, 2 S 21^{9}; in stating a date, Gn 11^{10}, 14^{4} *in the thirteenth year*.

k (*b*) In answer to the question *how long?* e. g. Gn 3^{14}, &c., כָּל־יְמֵי חַיֶּיךָ *all the days of thy life*; 7^{4} *forty days and forty nights*; 7^{24}, 14^{4}, 15^{13}, 21^{34}, 29^{18}, Ex 20^{9} (*for six days*); 23^{15}, 31^{17}; עוֹלָמִים *for ever*, 1 K 8^{13}; also with the accusative made determinate, Ex 13^{7} אֶת שִׁבְעַת הַיָּמִים *throughout the seven days* in question, mentioned immediately before; cf. Ju 14^{17}, Dt 9^{25}.

l **4.** The accusative is sometimes used of abstract ideas to state the reason (*accus. causae*), e. g. Is 7^{25} *thou shalt not come thither* יִרְאַת שָׁמִיר *for fear of briers*.

m **5.** Finally the accusative is used very variously (as an *accus. adverbialis* in the narrower sense), in order to describe more precisely the *manner* in which an action or state takes place. In English such accusatives are mostly rendered by *in, with, as, in the form* or *manner of . . ., according to, in relation to, with regard to*. For more convenient classification we may distinguish them as—

n (*a*) Adjectives expressing *state*, placed *after* the verb to describe more accurately some bodily or other external condition, e. g. Is 20^{2} *walking* עָרוֹם וְיָחֵף *naked and barefoot*; cf. verse 3, 8^{21}, Gn 15^{2}, 33^{18} (שָׁלֵם), Ju 8^{4}, Mi 1^{8}, ψ 107^{5} (but in 15^{2} תָּמִים is rather a substantive directly dependent on הוֹלֵךְ = *he that walketh* in *uprightness*; cf. § 117 *r*, note); Jb 30^{28}. After an accusative, e. g. Dt 15^{18}; to specify some mental state, e. g. Gn 37^{35} (אָבֵל).—*Before* the verb (and then with a certain emphasis), Am 2^{16}, Jb 1^{21}, Ec 5^{14}; Lv 20^{20}, Jb 19^{25}, 27^{19}, 31^{26}

[1] In ψ 2^{12} דֶּרֶךְ is not to be taken as an *accus. loci* (*on the way*), but as an *accus. of respect* (*with regard to the way*); see below, *m*.

(unless יָקָר be a substantive); Ru 1[21] (מְלֵאָה parallel with the adverb רֵיקָם). In Mi 2[7] the text is clearly corrupt.

o Those examples are especially instructive in which the adjective expressing a state, although referring to several, is nevertheless used in the singular, e.g. Jb 24[10] עָרוֹם הֹלְכוּ *naked*, i.e. in the condition of one naked, *they go about*; cf. verse 7 and 12[17]. In Is 20[4] the singular occurs *after* a plural object, and in Is 47[5] the *masc.* after the 2nd sing. *fem.* imperative, which clearly proves that the term expressing the state is not conceived as being in apposition, but as an indeclinable adverb.

p (*b*) Participles, again either *after* the verb, Nu 16[27], Jer 2[27], 43[2], ψ 7[3], Jb 24[5], Ct 2[8], or *before* it, Gn 49[11], Is 57[19], Ez 36[35], ψ 56[2], 92[14], Pr 20[14]; cf. also the substantival use of the participles Niph'al נוֹרָאוֹת *in a fearful manner* (ψ 139[14]) and נִפְלָאוֹת *in a wonderful manner*, Jb 37[5], Dn 8[24].—Also participles in connexion with genitives, as מְתַהֲלֵךְ Gn 3[8] (cf. also בָּאָה 1 K 14[6]), are to be regarded as expressing a state and not as being in apposition, since in the latter case they would have to take the article.—In 2 S 13[20], 1 K 7[7] and Hb 2[10] the *explicative Wāw* (equivalent to *and that too*) is also prefixed to the participle. In ψ 69[4] for מְיַחֵל read מִיַּחֵל.—On 1 K 11[8], 2 K 10[6], 19[2], Hag 1[4], cf. the note on § 131 *h*.

q (*c*) Substantives[1] in the most varied relations: thus, as describing an external state, e.g. Mi 2[3] וְלֹא תֵלְכוּ רוֹמָה *neither shall ye walk haughtily* (as opposed to שְׁחוֹחַ Is 60[14]); Lv 6[9] (accus. before the verb = as *unleavened cakes*), Dt 2[9], 4[11], Ju 5[21], Is 57[2], Pr 7[10], Jb 31[26], La 1[9]; as stating the position of a disease, 1 K 15[23] *he was diseased* אֶת־רַגְלָיו in *his feet* (2 Ch 16[12] בְּרַגְלָיו), analogous to the cases discussed in § 117 *ll* and § 121 *d* (*d*); as describing a spiritual, mental, or moral state, e.g. Nu 32[14], Jos 9[2] (פֶּה אֶחָד *with one accord*, 1 K 22[13]; cf. Ex 24[3], Zp 3[9]), 1 S 15[32], 2 S 23[3], Is 41[3] (unless שָׁלוֹם is adjectival, and the passage is to be explained as in *n*); Jer 31[7], Ho 12[15], 14[5], ψ 56[3], 58[2], 75[3], Pr 31[9], Jb 16[9], La 1[9]; Lv 19[16], &c., in the expression הָלַךְ רָכִיל *to go up and down* as *a tale-bearer*; also בַּטָּח *unawares*, Gn 34[25], Ez 30[9]; מְיֻשָּׁרִים *uprightly*, ψ 58[2], 75[3] (in both places *before* the verb); as stating the age, e.g. 1 S 2[33] (if the text be right) יָמוּתוּ אֲנָשִׁים *they shall die* as *men*, i.e. *in the prime of life*; cf. 1 S 2[18] (נַעַר), Is 65[20], and Gn 15[16]; as specifying a number more accurately, Dt 4[27], 1 S 13[17], 2 K 5[2], Jer 31[8] [in Jer 13[19] שְׁלוֹמִים *wholly* (?) is corrupt; read גְּלוּת שְׁלֵמָה with LXX for שׁ'הָגְלָת]; as stating the consequence of the action, Lv 15[18], &c.

r The description of the external or internal state may follow, in poetry, in the form of a comparison with some well-known class, e.g. Is 21[8] וַיִּקְרָא אַרְיֵה *and he cried* as *a lion*; cf. ψ 22[14], Is 22[18] (כַּדּוּר *like a ball*); Is 24[22], Ze 2[8], ψ 11[1] (unless צִפּוֹר be vocative); 58[9b] (unless the force of the preceding כְּ is carried on, as in ψ 90[4]); ψ 144[12], Jb 24[5] (פְּרָאִים, before the verb); 41[7] *shut up together* as with *a close seal*.[2]

s **6.** To the expressions describing a state belong finally those nouns which are introduced by the comparative particle כְּ,[3] since the כְּ is to

[1] Cf. above, § 100 *c*, on certain substantives which have completely become adverbs; and § 113 *h* and *k* on the adverbial use of the infinitive absolute.

[2] It is, as a matter of fact, permissible to speak of the above examples as *comparatio decurtata*, but it must not be assumed that the comparative particle כְּ, which is otherwise regularly prefixed (see *s*), has actually dropped out.

[3] On the use of כְּ as a prefix, cf. § 102 *c*.

be regarded as originally a substantive[1] in the sense of *amount, kind* (*instar*), standing in the accusative (so that בְּ is equivalent to *as a kind of, after the manner of, according to*), while the following noun represents a genitive governed by the בְּ. From this, which is the proper meaning of the בְּ, may be explained its power of representing a great many pregnant relations, which in English can only be rendered by the help of prepositions.[2] Thus the comparison may refer to—

t (*a*) The *place*, e.g. Is 5^{17} כִּדְבָרָם *after the manner of*, i.e. *as in their pasture*; 23^{15} as (it is said) *in the song of the harlot*; 28^{21}, 29^{7} כְּחֲלוֹם *as in a dream*.

u (*b*) The *time*, especially in the combination כְּיוֹם *after the manner of the day*, equivalent to *as in the day*, Is 9^{3}, Ho 2^{5}; כִּימֵי *as in the days of . . .*, Is 51^{9}, Ho 2^{17}, 9^{9}, 12^{10}, Am 9^{11}; cf. moreover, Lv 22^{13}, Ju 20^{39}, Is 17^{6}, Jb 5^{14}, 29^{2}, and the expressions כְּיוֹם בְּיוֹם *as day by day = as in the former days*, 1 S 18^{10}; כְּפַעַם בְּפַעַם *as at other times*, 1 S 3^{10}, &c.; כְּשָׁנָה בְשָׁנָה *as in former years*, 2 K 17^{4}; cf. § 123 *c*. Of a different character is the use of בְּ as a simple particle of time, e.g. Gn 18^{10} כָּעֵת חַיָּה *at this time* (not *about the time*), when it lives again, i.e. at the end of a year; כָּעֵת מָחָר *to-morrow at this time*; cf. Is 23^{5}, and the frequent connexion of בְּ with the infinitive construct to express a definite time (in the sense of a pluperfect), Gn 12^{14}, 27^{34}, Ex 9^{29}, &c.

v (*c*) The *person*, e.g. Gn 34^{31} *should he deal with our sister as* with *a harlot?*

w (*d*) The *thing*, e.g. Is 10^{14}, ψ 33^{7}, Jb 28^{5} כְּמוֹ־אֵשׁ *as a fire*, i.e. *as it were by fire* (cf. Is 1^{25} כַּבֹּר *as* with *lye*); Jb 29^{23} כַּמַּטָּר *as* for *the rain* (they waited for me); Jb 38^{14} (*as* in *a garment*); 38^{30} כָּאֶבֶן *as* to *stone* (the waters are solidified in freezing).

x Rem. According to the earlier grammarians, בְּ is sometimes used pleonastically, i.e. not to indicate a similarity (as in Lv 14^{35} *as it were*, i.e. *something like*), but simply to introduce the predicate (*Kaph veritatis*), e.g. Neh 7^{2} *for he was* כְּאִישׁ אֱמֶת *a faithful man*; cf. 1 S 20^{3} כְּפֶשַׁע, La 1^{20} כַּמָּוֶת. Such a pleonasm is of course out of the question. At the most a *Kaph veritatis* can only be admitted in the sense that the comparison is sometimes introduced by בְּ with a certain emphasis (equivalent to *in every respect like*); thus כְּאִישׁ אֱמֶת in Neh 7^{2} means simply *of the nature of a faithful man*, i.e. as only a faithful man can be; cf. Nu 11^{1}, Is 1^{7}, 13^{6}, Ho 4^{4}, 5^{10}, Ob ^{11}, Jb 24^{14}, 27^{7}, La 1^{20}, 2^{4}; also כִּמְעַט in such passages as ψ 105^{12} *yea, very few*; but e.g. in Is 1^{9} *only just, a very small* . . .

---

[1] Schwabe (בְּ *nach seinem Wesen und Gebrauch im alttestam. Kanon gewürdigt*, Halle, 1883) contests this explanation (which is defended especially by Fleischer and is certainly indisputable). He, with Gesenius and Ewald, places בְּ as a preposition on the same footing as בְּ and לְ, and believes it to be probably connected with the stem כון as well as with כִּי and כֵּן. The above view of בְּ as a substantive of course does not imply that the language as we have it is still in every case conscious of the substantival meaning.—On בְּ in numerical statements, in the sense of *about, nearly*, see the Lexicon.

[2] It would be altogether unsuitable here also (see above, note 2 on *r*) to assume a loss of the preposition. Such examples as Is 1^{26} (כְּבָרִאשֹׁנָה and כְּבַתְּחִלָּה), Lv 26^{37} (כְּמִפְּנֵי) are to be explained from the fact that here the

§ 119. *The Subordination of Nouns to the Verb by means of Prepositions.*

1. In general. As is the case with regard to the looser subordination of nouns to the verbal idea (§ 118), so also their subordination by means of prepositions is used to represent the more immediate circumstances (of place, time, cause, purpose, measure, association, or separation) under which an action or event is accomplished. In the case of most prepositions some idea of a relation of *space* underlies the construction, which then, in a wider sense, is extended to the ideas of time, motive, or other relations conceived by the mind. *a*

On the origin of the prepositions and the original case-relation in which they stand to the nouns governed by them, cf. § 101, where a list of the prepositions is given with their original meanings. Cf. also § 102 on the prefixes, and § 103 on the union of prepositions with suffixes.

2. A not unimportant part is played in Hebrew by the *compounding* of prepositions to represent more accurately the relations of place, which either precede or follow the action. In the former case מִן־, and in the latter (which is not so frequent) אֶל־ occurs before other prepositions of place; cf. e.g. Am 7[15] *the Lord took me* מֵאַחֲרֵי הַצֹּאן *from behind the flock*; 2 K 9[18] *turn thee* אֶל־אֲחֹרַי *to behind me*, i.e. *turn thee behind me*; מֵעִם־, מֵאֵת *from being with . . .*, as in French *de chez, d'après quelqu'un*.[1] For further examples, see *c*. *b*

Rem. 1. We must *not* regard as combined prepositions in the above sense either those *substantives* which have become prepositions only by their union with prefixes, as לִפְנֵי *before*, מִפְּנֵי, לְמַעַן *on account of* (but e.g. מִלִּפְנֵי *from before*, Gn 4[16], &c., is such a compound); nor *adverbs*, which are also formed by combining words which were originally substantives (also used as prepositions) with prepositions, as מִחוּץ *without*, מִתַּחַת in the sense of *below*,[2] מֵעַל *c*

preposition and substantive had already become simply *one* word before the בְּ was prefixed. We find also בְּעַל Is 59[18], 63[7], ψ 119[14], and 2 Ch 32[19]; cf. Driver on 1 S 14[14] (כְּבַחֲצִי), where the text is wholly corrupt.

[1] In other cases French, as well as English and German, can only emphasize *one* of the two combined ideas; thus, such expressions as *il prend le chapeau sur la table*, German and English *er nimmt den Hut vom Tisch, he takes his hat from the table*, all regard the action from one point of view only; the Hebrew here brings out both aspects of it by means of מֵעַל־ *from upon*, cf. e.g. Is 6[6].

[2] Hence not to be confounded with מִתַּחַת *from under*, in such examples as Pr 22[27], which is a real compound preposition. In the above-mentioned adverbs also the מִן־ was *originally* by no means pleonastic; מִתַּחַת denotes properly the locality, regarded primarily as a place *from beneath* which something proceeds, and so on. This original sense of the מִן־, however, has become so much obscured by its regular combination with words of place to form independent adverbs, that it is even prefixed (evidently only on the analogy of such common adverbs as מֵעַל־, מִתַּחַת) in cases where it is really inadmissible, owing to the meaning of the adverb, e.g. in מִלְּבַד, מִבַּלְעֲדֵי

above (so also in Gn 27^{39}, 49^{25}, not *from above*). These adverbs of place, however, may become prepositions by the addition of לְ, e.g. מִחוּץ לְ *outside as regards . . .*, i.e. *outside of something*, in 1 K 21^{13} even after a transitive verb of motion; מִתַּחַת לְ *below as regards . . .*, i.e. *under something* (cf. עַד־מִתַּחַת לְ *until they came under . . .*, 1 S 7^{11}), מֵעַל לְ *over something*, &c.; לְבַד prop. *in separation*; לְבַד מִן־ *in separation from*, i.e. *apart from, besides*. Only rarely in such a case is the לְ omitted for the sake of brevity, e.g. Jb 26^{5} מִתַּחַת מַיִם *beneath* the *waters*; Neh 3^{28} (מֵעַל־).

d 2. Real combinations of prepositions (each retaining its full force) occur—(*a*) With מִן־, in מֵאַחֲרֵי, מֵאֵת (see above) *from behind* something; מֵאֵת and מֵעִם *from with* (see above); מִבֵּין or מִבֵּינוֹת *from between* something (with motion in either direction, see e.g. Gn 49^{10}); מִלִּפְנֵי *from before* (see above); sometimes also מִמּוּל Lv 5^{8}, &c.; מֵעַל־ *from upon*, i.e. *off from*; מִתַּחַת *away from under* (see footnote 2 on p. 377).

e (*b*) With אֶל־, in אֶל־אַחֲרֵי *to behind*, אֶל־בֵּינוֹת *to between*; אֶל־מִבֵּית לְ *forth between* 2 K 11^{15}; אֶל־מִחוּץ לְ *forth without*, i.e. *out in front of*, Nu 5^{3}; אֶל־תַּחַת *down under*.[1]—In Jb 5^{5} the two prepositions of motion are combined in a peculiarly pregnant construction, אֶל־מִצִּנִּים (he goes thither and takes it) *out of the thorns*, i.e. he taketh it *even out of the thorns*, but the text is hardly correct.

f 3. A general view of the union of certain verbs, or whole classes of verbs, with particular prepositions, especially in explanation of certain idioms and pregnant expressions.[2]

g (*a*) אֶל־ (אֵלַי)[3] *towards*, properly an expression of *motion* or at least *direction* towards something (either in the sense of *up to* = עַד, or *into* = אֶל־תּוֹךְ), is used after verbs not only in answer to the question *whither?* but by a specially pregnant construction, in answer to the question *where?* e.g. Jer 41^{12} *they*

---

without, cf. also such examples as מִפּוּל, מִבַּלְעָדַי, מִנֶּגֶד, מִשָּׁם (*there*), &c. Since a מִן־ is not usually repeated after מִלְּבַד, it appears as if מִלְּבַד by a transposition of the מִן־ stood for the usual לְבַד מִן־. In reality, however, the preposition which forms the adverb into a preposition is omitted here, as in מֵעַל, מִתַּחַת, without a following לְ (see above). Properly מִלְּבַד has a purely adverbial meaning = *taken by itself*, like מִלְּמַעְלָה מִמַּעַל (Syriac *men le'ēl*) *above* (adv.), as distinguished from מֵעַל לְ or מִמַּעַל לְ (Syriac *le'ēl men*), *over, upon something*.—Also לְמִן־ *from . . . onward* is not for מִן־לְ, but the לְ serves merely (just like the Latin *usque* in *usque a, usque ad, usque ex*) to indicate expressly the starting-point, as an exact *terminus a quo* (of place or time).

[1] Also in 1 S 21^{5} אֶל־תַּחַת by a pregnant construction is virtually dependent on the idea of *coming into*, contained in the preceding אֵין־.

[2] A summary of *all* the relations and senses in which a preposition may be used, belongs not to the Grammar but to the Lexicon.

[3] Cf. Mitchell, 'The preposition *el*,' in the *Journal of the Society of Biblical Literature and Exegesis*, 1888, p. 143 ff., and especially A. Noordtzij, *Het hebreeuwsche voorzetsel* אל, Leiden, 1896, a thorough examination of its uses, and especially of the relation between אֶל־ and עַל־.

found him אֶל־כַּיִם רַבִּים *by the great waters*; cf. Dt 16^6, 1 K 13^{20}, and a still more remarkable instance in 8^{30} אֶל־מְקוֹם שְׁבִתְּךָ אֶל־הַשָּׁמָיִם. This combination of *two* different ideas, of motion *to* a place and being or acting *in* the place (very plainly seen in Dt 16^6 *but to the place which the Lord thy God shall choose*... shalt thou bring thine offering and *there shalt thou sacrifice*, &c.), is the same as the Greek use of εἰς, ἐς for ἐν, the Latin *in potestatem, in amicitiam ditionemque esse, manere* (Cic. Verr. 5, 38; Div. 2, 14, &c.); cf. also the common German expressions *zu* Hause, *zu* Leipzig sein, *zu* Bette liegen, &c.

h (*b*) בְּ.[1] Underlying the very various uses of this preposition is either the idea of being or moving within some definite region, or some sphere of space or time (with the infinitive, a simultaneous action, &c.), or else the idea of *fastening on* something, *close connexion with* something (also in a metaphorical sense, following some kind of pattern, e.g. the advice or command of some one בְּצַלְמֵנוּ כִּדְמוּתֵנוּ *in our image, after our likeness*; cf. 1^{27}, $5^{1.3}$), or finally the idea of *relying* or *depending* upon . . ., or even of merely *striking* or *touching* something.

i Thus the use of בְּ is explained—

(1) In the sense of *among* (in the domain of), e.g. Mi 7^2 יָשָׁר בָּאָדָם אָיִן *there is none upright among men*; in the sense of *consisting of*, in specifying the constituents of a collective idea, e.g. Gn 7^{21} *and all flesh died* . . . *in* (=consisting of) *fowl*, &c. 8^{17}, 9^{10}, Ho 4^3. Also after ideas of *appearing, manifesting oneself, representing, being*, in the sense of *as, in the capacity of* (prop. in the sphere, after the manner of, see above), *consisting of*..., *tanquam*, the בְּ *essentiae* of the earlier grammarians, corresponding to the Greek ἐν, the Latin *in*,[2] and the French *en*, e.g. Ex 6^3 *I appeared unto Abraham* . . . בְּאֵל שַׁדָּי *as El Shaddai*; Jb 23^{13} וְהוּא בְאֶחָד *but he is* (manifests himself as) *one*, i.e. he remains always the same; Dt 26^5, 28^{62} בִּמְתֵי מְעָט *in the condition of being few*, cf. 10^{22} *to the number of seventy*; Is 40^{10}, ψ 39^7.—Cf. also such examples as Ex 18^4 (ψ 35^2, 146^5) בְּעֶזְרִי *as my help*; Dt 26^{14} *being unclean*; Is 28^{16} *in Sion* (i.e. *I make Sion a foundation*); Ez 20^{41} *as a sweet savour*; Pr 3^{26}, perhaps also Ex 3^2 *in* (i.e. *as*) *a flame of fire*; Is 66^{15} *with* (i.e. *like*) *fire*; ψ 31^{22}, 37^{20} (102^4). For the origin of all these forms of expression ψ 54^6 is especially instructive, since אֲדֹנָי בְּסֹמְכֵי נַפְשִׁי is not meant to refer to the Lord as *belonging to* the סֹמְכִים, but only to ascribe to him a similar character, i.e. *the Lord is one who upholds my soul*; so also ψ 99^6, 118^7, Ju 11^{35} [the plur. as in § 124 *g-i*].[3]—Cf. Gesenius, *Thes. Linguae Hebr.*, i. 174 f., and Delitzsch on ψ 35^2.

k (2) To introduce the object after transitive verbs, which denote *touching, striking, reaching to* (thus to some extent a fastening on, see above) something, in English sometimes rendered by *at, on*, &c., and in German generally by compounds with *an*, e.g. *anfassen* = אָחַז בְּ, *anrühren* = נָגַע בְּ, &c. To the same category belongs also the construction of verbs denoting *authority* (מָשַׁל, מָלַךְ, רָדָה, נָגַשׂ, the last prop. *to tread on* . . .) with בְּ, inasmuch as the exercise of the authority is regarded as a laying hold of the person ruled; so also, the introduction of the object by בְּ after certain *verba dicendi*, or when the mental action is to be represented as extending *to* some one or something: e.g.

---

[1] Cf. Wandel, *De particulae Hebr.* בְּ *indole, vi, usu*, Jena, 1875.

[2] e.g. *res in praeda captae*, i.e. things taken as spoil; see Nägelsbach, *Lat. Stilistik*, § 123^4. On the Hebrew בְּ *essentiae*, see Hauschild in the *Festschrift zur Einweihung des Goethegymn.* Frankf. a. M. 1897, p. 163.

[3] Other instances formerly cited here (Is 26^4, ψ 55^{19}, where בְּ is used before the subject) as well as ψ 68^5 בְּיָהּ שְׁמוֹ *Jah is his name*, are textually very uncertain. Cf. Cheyne, *SBOT.* Isaiah, p. 173, on Is 26^4.

קָרָא בְּ to call *on* some one, נִשְׁבַּע בְּ *iurare per aliquem*, שָׁאַל בְּ *to enquire of* some one. Again; רָאָה בְּ *to look upon*, שָׁמַע בְּ *to hearken to* (but cf. also *m*), generally with the secondary idea of participation, or of the pleasure with which one sees or hears anything, especially pleasure at the misfortunes of others, hence רָאָה בְּ *to see his desire on any one* or *anything*; cf. however, Gn 21[16] *let me not look upon the death of the child*; 1 S 6[19] *because they had looked* [irreverently] *at the ark of the Lord*.

Closely related to this is the use of בְּ:

l (3) To introduce the person or thing, which is the object of a *mental* act, e. g. הֶאֱמִין בְּ *to trust in* (to cleave trustingly *to*) somebody or something; בָּטַח בְּ *to have confidence in* ...; שָׂמַח בְּ *to rejoice in* or *at* something, &c.; דִּבֶּר בְּ *to speak of* (*about*) some one or something, Dt 6[7], 1 S 19[3 f.], &c.

m (4) The idea of an action as extending *to* something, with at the same time the secondary idea of participation *in* something, underlies finally the *partitive* use of בְּ, e. g. אָכַל בְּ *to share in eating* something, Ex 12[43 ff.], Lv 22[11]; also simply *to eat, to taste of* something, Ju 13[16], Jb 21[25]; so also לָחַם בְּ *to eat of*, and שָׁתָה בְּ[1] *to drink of* something, Pr 9[5]; שָׁמַע בְּ *to hear* a whisper *of something*, Jb 26[14]; מָצָא בְּ *they found* remaining *of her* only ..., 2 K 9[35]; נָשָׂא בְּ *to bear a share of* something, Nu 11[17], Ez 18[20], Jb 7[18]. Cf. also חָלַק בְּ *to give a share of* something, Jb 39[17]; בָּנָה בְּ *to do building to*, Neh 4[4].

n (5) With the idea of *touching, striking against anything* is naturally connected that of proximity and vicinity *near*, and further that of association *with* something; cf. Gn 9[4] בְּנַפְשׁוֹ *with the life thereof*; 15[14], 32[11] בְּמַקְלִי *with my staff*. Sometimes בְּ combined with a verb of motion (*to come with* something), expresses the idea of *bringing*, e. g. Ju 15[1] *Samson visited his wife with a kid*, i. e. he brought her a kid; Dt 23[5], ψ 66[13], 1 Ch 15[19 ff.], 16[6].

o (6) From the idea of connexion with something, being accompanied by something (see *n*), is developed, finally, the *instrumental* use of בְּ, which represents the means or instrument (or even the personal agent), as something *with which* one has associated himself in order to perform an action; cf. Mi 4[14] בַּשֵּׁבֶט *they smite with the rod*; Is 10[24]; ψ 18[30] בְּךָ *by thee* (so also 44[6], parallel with בִּשְׁמְךָ); Is 10[34], Ho 1[7], 12[14]; cf. also עָבַד בְּ *to labour by means of* some one, i. e. to cause him to labour at it, Ex 1[14], &c. On בְּ with the passive to introduce the means or the author, see § 121 *f*.

p A variety of the בְּ *instrumenti* is בְּ *pretii* (the price being considered as the *means* of acquiring a thing), cf. Gn 23[9], 29[18] (בְּרָחֵל); 30[16], 33[19], 34[15] (בְּזֹאת *on this* condition); 37[28]; also, in a wider sense, Gn 18[28] בְּ *for the sake of*; 1 S 3[13].

q Rem. The use of בְּ *instrumenti* to introduce the object is peculiar in such expressions as ψ 44[20] *and thou coveredst over us* בְּצַלְמָוֶת *with the shadow of death*; Jb 16[10] פָּעֲרוּ עָלַי בְּפִיהֶם *they have opened wide their mouth against me* (prop. *have made an opening with their mouth*); cp. ψ 22[8], Ex 7[20] *he lifted up* בַּמַּטֶּה *the rod*; Lv 16[4] חָגַר and צָנַף followed by בְּ; Jos 8[18], La 1[17]. Analogous to some English expressions we find both *to gnash the teeth*, ψ 35[16], and *to gnash with the teeth*, Jb 16[9]; *to wink the eye*, Pr 10[10], and *to wink with the eye*, Pr 6[13]; *shake the head*, ψ 22[8], and *to shake with the head*, Jer 18[16], Jb 16[4].—In all these instances

---

[1] To be distinguished from שָׁתָה בְּ = *to drink from* (a cup, &c., Gn 44[5], Am 6[6]), as in Arabic and Aramaic (Dn 5[2]). Cf. also ἐν ποτηρίοις (Xen. Anab. vi. 1, 4), ἐν χρυσώμασι πίνειν (3 Ezr 3[6]), *venenum in auro bibitur*, Seneca, Thyestes 453, and the French *boire dans une tasse*.

the verb (intransitive) construed with בְּ has a greater independence, and consequently more emphasis than the verb construed with a direct accusative; the latter conveys a sort of necessary specification of the action, while the noun introduced by בְּ is used rather as a merely adverbial complement. An instructive example of this is נָתַן קוֹל *vocem emittere, to utter a voice*, also *to thunder*, while in נָתַן בְּקוֹלוֹ ψ 46[7] (68[34], Jer 12[8]), נָתַן has an independent sense = *he thundered with his voice* (i. e. mightily).

r (*c*) לְ[1] *to*, a very general expression of *direction towards* anything, is used to represent the most varied *relations* of an action or state with regard to a person or thing. On the use of לְ as a periphrasis for the *genetivus possessoris* or *auctoris* (the idea of belonging to), see § 129; on לְ with the passive, to introduce the author or the cause, see § 121 *f*; on לְ in a purely local sense (e. g. לִימִינְךָ *at thy right hand*, prop. *towards thy right hand*), or temporal (e. g. לָעֶרֶב *at evening*, &c.) or distributive, see the Lexicon.

The following uses of לְ properly belong to the government of the verb:

s (1) As a *nota dativi*[2] to introduce the remoter object; also

(2) To introduce the *dativus commodi*. This *dativus commodi* (or *incommodi*, e. g. Ez 37[11]) is used—especially in colloquial language and in later style—in the form of a pronoun with לְ, as an apparently pleonastic *dativus ethicus*, with many verbs, in order to give emphasis to the significance of the occurrence in question *for* a particular subject. In this construction the person of the pronoun must always agree with that of the verbal form.[3] By far the most frequent use of this לְ is with the pronoun of the 2nd person after imperatives, e. g. לְךָ־לְךָ *go, get thee away*, Gn 12[1], 22[2], Dt 2[13] (also in the feminine, Ct 2[10.13]); וְטֵה לְךָ *turn thee aside*, 2 S 2[21]; סְעוּ לָכֶם *take your journey*, Dt 1[7]; עִבְרוּ לָכֶם *pass ye over*; בְּרַח־לְךָ *flee* (to save thyself), Gn 27[43]; עֲלִי־לָךְ *get thee up*, Is 40[9]; פְּנוּ לָכֶם *turn you*, Dt 1[40]; שׁוּבוּ לָכֶם *return ye*, Dt 5[27]; קוּמִי לָךְ *rise up*, Ct 2[10]; שְׁבוּ לָכֶם *abide ye*, Gn 22[5]; חֲדַל לְךָ *forbear thee*, 2 Ch 35[21] (in the plural, Is 2[22]); הָבוּ לָכֶם *take you*, Dt 1[13], Jos 18[4], Ju 20[7], 2 S 16[20], and so almost regularly הִשָּׁמֶר לְךָ (see above, § 51 *n*) *care tibi!* and הִשָּׁמְרוּ לָכֶם *take heed to yourselves*; דְּמֵה לְךָ *be thou like*, Ct 2[17] (cf. verse 9), 8[14], is remarkable; after a perfect consecutive, 1 K 1[3], 1 S 22[5]; after an imperfect consecutive, e. g. Is 36[9] וְתִבְטַח לְךָ *and puttest thy trust*.—In the 3rd person, e. g. וַתֵּשֶׁב לָהּ *and sat her down*, Gn 21[16], cf. 22[5], Ex 18[27], ψ 120[6], 123[4], Jb 6[19]; even after a participle, Ho 8[9].—In the 1st person plural, Ez 37[11].

t (3) To introduce the result after verbs of making, forming, changing, appointing *to* something, esteeming *as* something; in short, in all those cases in which, according to § 117 *ii*, a second *accusative* may also be used.

u (4) In loose connexion with some verbal idea in the sense of *in reference to, with regard to* . . . (§ 143 *e*); so after a *verbum dicendi*, Gn 20[13]; 1 K 10[23], cf.

---

[1] Cf. Giesebrecht, *Die hebr. Präpos. Lamed*, Halle, 1876.

[2] Just as in the Romance languages the Latin preposition *ad* (Italian *a*, before vowels *ad*, French *à*, Spanish *á*) and in English *to* are used as a periphrasis for the dative.—On the introduction of the nearer object by לְ, cf. § 117 *n*.

[3] Such expressions as the analogous English *he plucked me ope his doublet, but me no buts*, and the like, are accordingly inadmissible in Hebrew.

Is 36^{9}; even before the verb, Jer 9^{2}.—To the same class belongs also the *Lamedh inscriptionis* (untranslatable in English, and hardly more than a mere quotation-mark) which introduces the exact wording of an inscription or title; thus Is 8^{1} *write upon it* . . . (the words) מַהֵר שָׁלָל וגו׳ (cf. verse 3, where the לְ naturally is not used); Ez 37^{16}.

v (*d*) מִן, originally (according to § 101 *a*) *separation*,[1] represents both the idea of *distance, separation* or *remoteness from* something, and that of *motion away from* something, hence also *descent, origin from* a place, Am 1^{1}.

w (1) From the idea of *separation* is naturally derived on the one hand the sense of (*taken*) *from among* . . ., *e numero*, e. g. Gn 3^{1} *subtil as none other of the beasts*, &c.; cf. 3^{14}, Dt 33^{24}, 1 S 15^{33}, Ju 5^{24} (so especially after the idea of choosing *out of*[2] a larger class, 1 S 2^{28}; cf. Ex 19^{5}, &c.), and on the other hand, the sense of *without* (separated, free from . . .), e. g. Is 22^{3} מִקֶּשֶׁת אֻסָּרוּ *without the bow* (i. e. without one needing to bend a bow against them) *they were made prisoners*; cf. Jer 48^{45} מִכֹּחַ *without strength*; Ho 6^{6}, as the first half-verse shows, not *more than burnt offerings* (as R. V.), but *and not burnt offerings*; Mi 3^{6}, ψ 52^{5}, Jb 11^{15}, 19^{26}, 21^{9}, also such examples as Nu 15^{24} *far from the eyes*, i. e. unobserved by the congregation; Pr 20^{3}.

x Here also belongs the use of מִן after the ideas of *restraining, withholding from, refusing to* any one, frequently in pregnant expressions, which we can render only by complete final or consecutive clauses, e. g. 1 S 15^{23} *he hath rejected thee* מִמְּלֹךְ *away from* (being) *king*, instead of מִהְיוֹת מ׳ (as in verse 26), *that thou be no longer king*; cf. 1 K 15^{13}, Is 17^{1} מֵעִיר *so that it is no longer a city*; Jer 17^{16}, Jb 28^{11} *he bindeth the streams* מִבְּכִי *that they trickle not*; Gn 16^{2}, 23^{6} מִקְּבֹר *that thou shouldst not bury thy dead*; Is 24^{10}.

y The מִן has a still more pregnant force in those examples in which the idea of precluding from anything is only indirectly contained in the preceding verb, e. g. Gn 27^{1} *his eyes were dim* מֵרְאֹת *away from seeing*, i. e. *so that he could not see*; Is 7^{8} *Ephraim shall be broken in pieces* מֵעָם *that it be not a people* (just as in Is 23^{1}, Jer $48^{2.42}$, ψ 83^{5}); Lv 26^{13}, Is 5^{6}, 49^{15}, 54^{9}, Ezr 2^{62} (for other pregnant constructions with מִן see below, *ff*)[3]; on מִבְּלִי and מֵאֵין *without*, cf. § 152 *y*.

---

[1] Cf. O. Molin, *Om prepositionen* min *i Bibelhebreisken*, Upsala, 1893, and especially N. Zerweck, *Die hebr. Praep.* min, Leipzig, 1893, who, instead of the partitive meaning (formerly accepted by us also), more correctly takes 'separation' as the starting-point of its various uses.

[2] All the *partitive* uses of מִן also come most naturally under this idea of separation *out of* a larger class. Thus מִן is used in the sense of *some, something*, and even *one*, in such expressions as *and he slew* . . . *also* מִשָּׂרֵי יִשְׂרָאֵל (*divers*) *of the princes of Israel*, 2 Ch 21^{4}; מִכָּל־ Lv 4^{2}; 1 K 18^{5}; מִדַּם הַפָּר *some of the blood of the bullock*, Ex 29^{12}, &c.; Jb 27^{6} *my heart doth not reproach me* מִיָּמַי *for any*, i. e. for one, *of my days*; 38^{12} מִיָּמֶיךָ *one of thy days*, i. e. *ever in thy life* (this explanation is confirmed by 1 K 1^{6}; cf. also 1 S 14^{45}, 25^{28}). In this way also, the frequently misunderstood Hebrew (and Arabic) idiom is to be explained, by which מִן before אֶחָד, אַחַת is equivalent to *ullus*; e. g. Lv 4^{2} *and shall do* מֵאַחַת מֵהֵנָּה *any one of these things*; 5^{13}, Dt 15^{7}, Ez 18^{10}; so before a *nomen unitatis* (see § 122 *t*), 1 S 14^{45} (2 S 14^{11}, 1 K 1^{52}) מִשַּׂעֲרַת רֹאשׁוֹ *not one hair of his head*.—מִן is used in the sense of the Arabic *min el-beyān* or explicative *min* (often to be simply translated by *namely*), e. g. in Gn 7^{22} *of all that was*, i. e. *so far as it was*, probably also Gn 6^{2} (= *whomsoever they chose*).

[3] On the use of מִן to express the comparative, which likewise depends on the idea of *distance from* . . ., cf. below, § 133 *a*; on מִן as expressing the

(*z*) On the sense of *motion away from* anything depends the use of מִן after ≈ such ideas as *to take away from, to beware, to be afraid of, to flee, to escape, to hide oneself from* (cf. καλύπτω ἀπό, *custodire ab*), sometimes again in pregnant expressions, e. g. Is 33[15]. On the idea of *starting from* anything depends finally the very frequent *causative* use of מִן *on account of, in consequence of* (cf. our *that comes from . . .*), *prae*, e. g. מֵרֹב *for multitude*, 1 K 8[5].

(*aa*) (*e*) עַל־.[1] The two original local meanings of this preposition are *upon* (ἐπί)[2] and *over* (ὑπέρ, *super*).

(1) From the original meaning *upon* is explained the use of עַל־ after ideas of *commanding, commissioning* (פָּקַד עַל־), &c., inasmuch as the command, obligation, &c., is *laid upon* the object. The construction is self-evident in the case of *to lie, rest, lean, rely, press upon* something; cf. also, for the last, such examples as Is 1[14], Jb 7[20], 23[2], and especially 2 S 18[11] וְעָלַי prop. *upon me* would it have been, it would have been incumbent *upon me*, &c.

(*bb*) (2) From the original meaning *over* is explained the use of עַל־ after ideas of *covering, protecting, guarding* גָּנַן עַל־, כָּסָה עַל־; also the combinations רִחַם עַל־ *to have compassion upon . . .*, חוּס עַל־, חָמַל עַל־ *to spare* some one, arise from the idea of a compassionate or protective *bending over* something. Cf. also נִלְחַם עַל־ Ju 9[17] = *to fight for* some one, i. e. in his defence.

(*cc*) (3) Moreover עַל־ is used after verbs of *standing* and *going*, to express a towering *over* some one or something, sometimes in phrases, in which the original local idea has altogether fallen into the background, and which are therefore to be rendered in English by means of other prepositions (*by, with, before, near*), e. g. Gn 41[1], &c., *Pharaoh . . . stood* עַל־הַיְאֹר *by the Nile* (above the water level; cf. ψ 1[3]), and so especially עָמַד עַל־ in the pregnant sense *to stand serving before* some one (prop. *over* one who sits or reclines at table) Zc 4[14] (cf. Is 6[2], where מְמַּעַל לְ is used for עַל־); הִתְיַצֵּב עַל־ *to present oneself* by command *before* some one, Jb 1[6], &c. Cf. also עַל־יַד, עַל־יְדֵי (Jb 1[14]) *near, at* (*on*) *the side* of some one or something.

(*dd*) (4) From the original meaning *above* (not, as formerly explained, *on to* something, *at* something) there arise finally all the various constructions with עַל־ in the sense of *towards, against*. The original idea (which in many of these constructions has become wholly unrecognizable) starts from the view that the assailant endeavours to take up his position *over* the person attacked, so as to reach him from above, or to *over*power him; cf. especially קוּם עַל־ to rise up *over*, i. e. *against* some one, then with a transference of

---

distance of time from a fixed limit, in the sense of *after*, e. g. ψ 73[20] מֵהָקִיץ *after awaking* (cf. ἐξ ἀρίστου, *ab itinere*), or *after the lapse of . . .*, e. g. Gn 3[8.24], Ho 6[2], and very frequently מִקֵּץ *from the end of*, i. e. *after the lapse of . . .*, see the Lexicon; also for the use of מִן to represent *resting beside* anything, like the Latin *prope abesse ab . . .*

[1] Cf. Budie, *Die hebr. Präpos. 'Al* (עַל), Halle, 1882.

[2] Since the placing *upon* anything is an addition to it, עַל־ also implies *in addition to* something, cf. Gn 28[9] (31[50]); 30[40], 32[12] (probably a proverbial saying = *mother and children*); Dt 22[6]. Also עַל *notwithstanding* is no doubt properly *in addition to*, e. g. Jb 10[7] *although thou knowest*, prop. *in addition to thy knowing*.—From the original meaning *upon* is also derived that of *on account of* (prop. *upon the ground of*) and *in agreement with, according to*, since the pattern is regarded as the foundation *upon* which a thing stands or rests.

thought applied to any kind of hostile approach, נִלְחַם עַל־ *to fight against* . . . , חָנָה עַל־ *to encamp against* . . . , נֶאֱסַף עַל־ *to be gathered together, to assemble against* (Mi 4[11]; cf. ψ 2[2]), &c.; even after verbs which express a mental action, e.g. חָשַׁב רָעָה עַל־ *to imagine evil against* any one, &c.

ee **4.** Sometimes a preposition appears to be under the immediate government of a verb, which, by its meaning, excludes such a union. In reality the preposition is dependent on a verb (generally a verb of motion), which, for the sake of brevity, is not expressed, but in sense is contained in what is apparently the governing verb.

ff Various examples of this *constructio praegnans* have been already noticed above in *x* and *y* under מִן־; for מִן־ cf. also ψ 22[22] וּמֵרְמֵי רֵמִים עֲנִיתָנִי *and thou hast answered* and saved *me from the horns of the wild oxen* (in Is 38[17], which Delitzsch translates by *thou hast loved* and delivered *my soul from the pit*, read חָשַׁכְתָּ with the LXX); Gn 25[23], 2 S 18[19], Jb 28[12]; cf. also זָנָה מִן־ ψ 73[27] *to go a whoring from* any one i.e. *to be unfaithful to him*; רָשַׁע מִן־ ψ 18[22] = *to depart wickedly from God*; חָרַשׁ מִן־ ψ 28[1] *to be silent from* one (to turn away in silence); cf. Jb 13[13] [; so with מֵעַל Jb 30[17.30]].

gg Pregnant constructions with אַחֲרֵי: Nu 14[24] equivalent to וַיְמַלֵּא לָלֶכֶת אַחֲרַי *and he made full to walk* i.e. walked fully *after me*; in 1 S 13[7] read with the LXX חָרְדוּ מֵאֲחָרָיו *they trembled*, i.e. *went trembling away from him*; with דָּרַשׁ אֶל־ Gn 43[33] תָּמַהּ אֶל־ *to turn in astonishment to* some one (cf. Is 13[8]); Is 11[10], &c., *to turn inquiringly to* some one; הֶחֱרִישׁ אֶל־ Is 41[1] *to turn in silence to* some one; חָרַד אֶל־ Gn 42[28] *to turn trembling to* some one (cf. חָרַד לִקְרַאת *to come trembling to meet*, 1 S 21[2] [also with שָׁאַג, הרין, שמח and other verbs, Ju 14[5], 15[14], 19[3]; see Lexicon]); cf. further Jer 41[7], ψ 7[7], 2 Ch 32[1]; with בְּ ψ 55[19] *he hath redeemed* and hath put *my soul in peace*, exactly like ψ 118[5]; with לְ ψ 74[7] *they have profaned* and cast . . . *even to the ground*; cf. 89[40].

hh **5.** In poetic parallelism the governing power of a preposition is sometimes extended to the corresponding substantive of the second member;[1] e.g. בְּ Is 40[19], 48[14] *he shall perform his pleasure* בְּבָבֶל *on Babylon, and his arm* shall be בַּכַּשְׂדִּים (for בְּכַשְׂדִּים) *on the Chaldaeans*; Jb 15[3]; לְ Is 28[6], 42[22] (but probably לְ has fallen out after another ל), Ez 39[4], Jb 34[10] (perhaps also Gn 45[8]; מֹשֵׁל may, however, be taken here as a second accusative according to § 117 *ii*); לְמַעַן Is 48[9]; מִן־ Is 58[13], ψ 141[9] (unless וּמִמְּקֹשׁוֹת is to be read); עַד־ Is 15[8]; תַּחַת Is 61[7].

ii **6.** Adverbs which have acquired a substantival value are sometimes governed by prepositions, e.g. אֶל־חִנָּם *in vain*, Ez 6[10]; אַחֲרֵי־כֵן *after this*; בְּכֵן (Ec 8[10], Est 4[16]) *then, on this condition*; לָכֵן and עַל־כֵּן *therefore*; עַד־כֵּן *hitherto*.

---

[1] Similarly the force of a negative is sometimes extended to the parallel member; see § 152 *z*.

§ 120. *Verbal Ideas under the Government of a Verb. Co-ordination of Complementary Verbal Ideas.*

1. When a *relative* verb (incomplete in itself) receives its necessary complement in the form of a verbal idea, the latter is, as a rule, subordinated in the infinitive construct (with or without לְ), less frequently in the infinitive absolute, in a few instances in the form of a participle (or verbal adjective), or finally in the imperfect without the copula. In these combinations the principal idea is very frequently represented by the subordinate member of the sentence, whilst the governing verb rather contains a mere definition of the manner of the action; cf. *d* and *g* below, and § 114 *n*, note 2. *a*

(*a*) On the subordination of an infinitive construct as an accusative of the object, and as the complement of relative verbal ideas, see above, § 114 *c*, and the numerous examples given in § 114 *m*; on the infinitive absolute as object, see § 113 *d*.—The complement in the form of a participle (as in Greek, and also frequently in Syriac) occurs in Is 33[1] בְּהַחֲמְךָ שׁוֹדֵד (cf. for the form, § 67 *v*) *when thou hast ceased as a spoiler*, i. e. to spoil; Jer 22[30] . . . יֹשֵׁב לֹא יִצְלָח *he shall never prosper, sitting*, i. e. so as to sit, &c.; Jon 1[6] *what meanest thou, sleeping?* i. e. that thou sleepest;[1] by a verbal adjective, 1 S 3[2] *now his eyes* הֵחֵלּוּ כֵהוֹת *had begun being dim*, i. e. to wax dim (unless we read כְּהוֹת = לִכְהוֹת, cf. § 114 *m*); by a substantive, Gn 9[20] *and Noah began* to be *an husbandman* (omitting the article before אֲדָמָה). *b*

(*b*) Examples of the subordination of the complementary verbal idea in the imperfect[2] (in English usually rendered by *to*, *in order to* or *that*) are—(1) with both verbs in the same person: after the perfect, Is 42[21] יְהוָה חָפֵץ . . . יַגְדִּיל *it pleased the Lord . . . to magnify*, &c.; Jb 30[28], 32[22] לֹא יָדַעְתִּי אֲכַנֶּה *I know not to give flattering titles*; after a perfect consecutive, 1 S 20[19] (where for תֵּרֵד we should read with the LXX (תִּפָּקֵד); after an imperfect, ψ 88[11], 102[14], Jb 19[3], 24[14]; after an imperf. consec., Jb 16[8]; after a participle, Is 5[11*a*].—(2) with a difference in the persons: after a perfect, Lv 9[6] *this is the thing* אֲשֶׁר־צִוָּה יְהוָה תַּעֲשׂוּ *which the Lord commanded* (that) *ye should do*; a negative imperfect follows צִוָּה in La 1[10]; after the imperfect, Is 47[1] (5) כִּי לֹא תוֹסִיפִי עוֹד יִקְרְאוּ־לָךְ *for thou shalt no more continue* (that) *they call thee*, i. e. thou shalt no longer be called, &c.; Ho 1[6] לֹא אוֹסִיף עוֹד אֲרַחֵם *I will no longer continue* (and) *have mercy*, i. e. *I will no more have mercy*; Is 52[1], Pr 23[35].—Nu 22[6] *peradventure I shall prevail* (that) *we may smite them, and* (that) *I may drive them out of the land* (אוּכַל may, however, be a scribal error for נוּכַל, due to the preceding אוּלַי, and in that case the example would belong to No. 1); after a participle, *c*

---

[1] In יֹדֵעַ מְנַגֵּן 1 S 16[16], which appears to be a case of this kind, two different readings are combined, יֹדֵעַ לְנַגֵּן and the simple מְנַגֵּן.

[2] This kind of subordination is frequent in Arabic and in Syriac (cf. e. g. the Peshiṭṭâ, Luke 18[13]); as a rule, however, a conjunction (corresponding to our *that*) is inserted. Cf. moreover, the Latin *quid vis faciam?* Terence; *volo hoc oratori contingat*, Cicero, Brut. 84; and our *I would it were*; *I thought he would go.*

2 S 21[4].—A perfect is possibly subordinated in La 1[10]; but the explanation of בָּאוּ as a relative clause is preferable.

d 2. Instead of subordination (as in the cases mentioned in *a–c*), the *co-ordination* of the complementary verbal idea in the finite verb (cf. above, *c*) frequently occurs, either—

(*a*) With the second verb co-ordinated in a form exactly corresponding to the first (but see below, *e*) by means of וְ (וֹ, וָ).[1] As a rule, here also (see above, *a*) the principal idea is introduced only by the second verb, while the first (especially שׁוּב, יָסַף,[2] הוֹסִיף) contains the definition of the manner of the action, e. g. Gn 26[18] וַיָּשָׁב וַיִּחְפֹּר *and he returned and digged*, i. e. he digged again; 2 K 1[11.13]; in the perfect consecutive, Is 6[13]; with הוֹסִיף, e. g. Gn 25[1] *and Abraham added and took a wife*, i. e. again took a wife; Gn 38[5] and frequently; with הוֹאִיל in the jussive, Jb 6[9]; in the imperative (cf. § 110 *h*), Ju 1 [6] הוֹאֶל־נָא וְלִין *be content, I pray thee, and tarry all night* (cf. the English *he was persuaded and remained*, for *to remain*); 2 S 7[29]; with מָהַר Gn 24[18.20], &c.; with חָמַד Ct 2[3].

e Rem. 1. Instead of an exact agreement between co-ordinate verbal forms, other combinations sometimes occur, viz. imperfect and perfect consecutive (cf. § 112 *d*), e. g. Dt 31[12] *that they* יִלְמְדוּ וְיָרְאוּ אֶת־יְהוָה *may learn, and fear the Lord*, i. e. *to fear the Lord*; Is 1[19], Ho 2[11], Est 8[6], Dn 9[25 *b*]; perfect and imperfect, Jb 23[3] (*O that I knew how I might find him*); perfect and imperfect consecutive, Jos 7[7], Ec 4[1.7]; jussive and imperative, Jb 17[10]; cf., finally, Gn 47[6] וְאִם־יָדַעְתָּ וְיֶשׁ־בָּם *and if thou knowest and there are among them*, &c., i. e. that there are among them.

f 2. Special mention must be made of the instances in which the natural complement of the first verb is suppressed, or is added immediately after in the form of an historical statement, e. g. Gn 42[25] *then Joseph commanded and they filled*[3] (prop. that they should fill, and they filled . . .; cf. the full form of expression in Gn 50[2]); a further command is then added by means of לְ and the infinitive; Ex 36[6]; another instance of the same kind is Gn 30[27] *I have divined and the Lord hath blessed me*, &c., i. e. that the Lord hath blessed me for thy sake.

g (*b*) With the second verb (which, according to the above, represents the principal idea) attached *without the copula*[4] in the same mood, &c. In this construction (cf. § 110 *h*) the imperatives קוּם (לְכוּמָה, לְכוּמִי,

---

[1] Cf. the English colloquial expression *I will try and do it.*

[2] Of a different kind are the cases in which יָסַף with a negative is co-ordinated with a verb to emphasize the non-recurrence of the action; cf. Nu 11[25] *they prophesied and added not*, sc. *to prophesy*, i. e. *but they did so no more*; Dt 5[19], Jb 27[19] (reading וְלֹא יֹאסִיף).

[3] Cf. the analogous examples in Kautzsch's *Gramm. des Bibl. Aram.*, § 102.

[4] To be distinguished, of course, from the cases in which two equally important and independent verbs are used together without the copula in vigorous poetic imagery, e. g. Ex 15[9], Jb 29[8], &c.

&c.) and לֵךְ (לְכִי, לְכָה, &c.) are exceedingly common with the sense of interjections, before verbs which express a movement or other action, e.g. קוּם הִתְהַלֵּךְ *arise, walk*, Gn 13[17], 19[15], 27[43]; in the plural, Gn 19[14]; Ex 19[24] לֵךְ־רֵד *go, get thee down*; 1 S 3[9]; with a following cohortative, 1 S 9[10] לְכָה נֵלְכָה *come, let us go*; Gn 31[44] and frequently.—Also with שׁוּב (a periphrasis for *again*) in the perfect, Zc 8[15]; in the imperfect, Mi 7[19], ψ 7[13], 59[7], 71[20]; in the jussive, Jb 10[16]; in the cohortative, Gn 30[31]; in the imperative, Jos 5[2], 1 S 3[5] *lie down again*; הוֹאִיל (sometimes to express the idea of *willingly* or *gladly*) in the perfect, Dt 1[5], Ho 5[11]; in the imperative, Jb 6[28]; הַרְבֵּה=*much*, 1 S 2[3] אַל־תַּרְבּוּ תְדַבְּרוּ גְּבֹהָה *do not multiply* and *talk*, i.e. talk not so much *arrogancy*; in the imperative, ψ 51[4]; הֵחֵל, Dt 2[24] הָחֵל רֵשׁ *begin, possess*; יָכֹל, La 4[14] בְּלֹא יוּכְלוּ יִגְּעוּ *without men's being able to touch*, &c.; מְהֵר=*quickly*, in the perfect, ψ 106[13]; in the imperative, Gn 19[22], Ju 9[48], Est 6[10].—Other examples are: Ho 9[9] הֶעְמִיק=*deeply, radically*; Zp 3[7] הַשְׁכִּים=*early* (even in the participle, Ho 6[4], 13[3]); Is 29[4] שָׁפֵל=*low*, cf. Jer 13[18]; Jos 3[16] תַּמּוּם=*wholly*; ψ 112[9] פִּזַּר=*plentifully*.

h Rem. This co-ordination without the copula belongs (as being more vigorous and bolder) rather to poetic or otherwise elevated style (cf. e.g. Is 52[1], Ho 1[6], 9[9] with Gn 25[1], &c.). Asyndeton, however, is not wanting even in prose; besides the above examples (especially the imperatives of קוּם and הָלַךְ Gn 30[31], Dt 1[5], 2[24], Jos 3[16], 1 S 3[5]) cf. also Neh 3[20], 1 Ch 13[2]. For special reasons the verb representing the principal idea may even come first; thus Is 53[11] יִרְאֶה יִשְׂבָּע *he shall see, he shall be satisfied* (sc. with the sight), for the satisfaction does not come until after the enjoyment of the sight; Jer 4[5] קִרְאוּ מַלְאוּ *cry, fill*, i.e. cry with a full (loud) voice.

§ 121. *Construction of Passive Verbs.*

Blake, 'The internal passive in Semitic,' *JAOS.* xxii.

a 1. Verbs which in the active take *one* accusative (either of the proper object, or of the *internal* object, or of some other nearer definition; cf. § 117 *a*, *p*, *u*) may in the passive, according to our mode of expression, be construed *personally*, the object of the active sentence now becoming the subject, e.g. Gn 35[19] וַתָּמָת רָחֵל וַתִּקָּבֶר *and Rachel died, and was buried*, &c. The passive, however, is also used *impersonally* (in the 3rd sing. masc.), either absolutely, as Dt 21[3f.], Is 16[10], Ez 16[34] (with a dative added, 2 S 17[16], Is 53[5], La 5[5]), or, more frequently, with the object of the active construction still subordinated in the accusative,[1] e.g. Gn 27[42] וַיֻּגַּד לְרִבְקָה אֶת־דִּבְרֵי עֵשָׂו *and there were told* (i.e. one told) *to Rebekah the words of Esau*; 2 S 21[11], 1 K 18[13].

[1] When this is not recognizable either by the *nota accusativi*, or by its disagreement with the passive form in gender, number, and person, it

b Other examples are: after Niph., Gn 4^{18} וַיִּוָּלֶד לַחֲנוֹךְ אֶת־עִירָד *and unto Enoch was born Irad* (cf. Nu 26^{60}, and after an infinitive, Gn 21^{5}); Gn 17^{5}, 21^{8} (after an infinitive); 29^{27} (unless וְנִתְּנָה is 1st plur. cohortative); Ex 21^{28}, 25^{28}, Lv 6^{13}, Nu 7^{10} (after an infinitive); 26^{55} (cf. verse 53); Dt 20^{8} (where, however, for יִמַּס the Hiph. יְמַסּ should be read, according to 1^{28}); Jos 7^{15}, Is 16^{10}; with the object preceding, Ex 13^{7}, Lv 2^{8}, 19^{20}, Nu 16^{29}, Dan 9^{24}.[1]—Also after Pu'al, Jer 50^{20}; *before* Pu'al, Is 14^{3} (אֲשֶׁר equivalent to the internal object עֲבֹדָה = *which they have caused to be served by thee*); Jb 22^{9}; according to the Masoretic text also Gn 46^{22}, where, however, the Samaritan and LXX read יִלְדָה for יֻלַּד; the Samaritan in Gn 35^{26} and 46^{27} also reads יֻלְדוּ, and this (or יֻלַּד) should certainly be read instead of יֻלְדוּ in 2 S 21^{22}.—After Hoph., Ex 10^{8}, 27^{7}, Lv 10^{18}, 16^{27}, Nu 32^{5}, 1 K 2^{21}, Pr 16^{33}, Jb 30^{15}; after the infinitive Hoph., Gn 40^{20}, Ez $16^{4f.}$, 27^{7}; *before* Hoph., Is 17^{1}, 21^{2}, Ho 10^{8}, Zc 13^{6}; after the infinitive Hothpa'el, Lv $13^{55f.}$

c **2.** Verbs which in the active take two accusatives (§ 117 *cc*) retain in the passive construction at least *one* accusative, namely that of the second or remoter object, whilst the nearer object now becomes the subject. Thus, corresponding to אֲשֶׁר אַרְאֶךָּ *which I will show thee* (Gn 12^{1}) the passive is אֲשֶׁר אַתָּה מְרֻאֶה (Ex 25^{40}) *which thou hast been shown*, i. e. which has been shown to thee; cf. Ex 26^{30} (but in Lv 13^{49} with an accusative of the person); Jb 7^{3}. In ψ 22^{16} מְדֻבָּק מַלְקוֹחָי depends on an assumed transitive הִדְבִּיק governing two accusatives (= *my tongue is made to cleave to my jaws*); also in Is 1^{20}, חֶרֶב תְּאֻכְּלוּ *ye shall be devoured with the sword*, חֶרֶב is not an *accus. instrumenti*, but most probably an accusative of the object retained from the active construction.[2]

d Rem. 1. Examples of the retention of the second accusative are—(*a*) with *verba induendi* and *exuendi* (§ 117 *cc*), ψ 80^{11}, כָּסּוּ הָרִים צִלָּהּ *the mountains were covered with the shadow of it* (the vine); Pr 19^{28}. So also some of the examples in § 116 *k* of passive participles of these verbs, Ju 18^{11}, 1 S 2^{18}, 17^{5}, 1 K 22^{10},

---

naturally cannot be determined whether the construction is really impersonal. The construction itself can only be explained by supposing that while using the passive form the speaker at the same time thinks of some author or authors of the action in question, just as on the theory of the Arab grammarians a *concealed agent* is included in every passive. This accounts for the possibility (cf. § 144 *g*) of using the active without a specified subject as a periphrasis for the passive.

[1] In 2 K 18^{30} יִנָּתֵן is to be read or אֶת־ is to be omitted, as in the parallel passage Is 36^{15}.

[2] In the active, the sentence would be *I will cause the sword to devour you*; by the rule stated above, under *c*, this would become in the passive, *the sword* (nom.) *shall be made to devour you* (acc.). Instead of this, the remoter object is here made the subject, and the nearer object is retained in the accusative. Otherwise, the only possible explanation would be, according to the Arabic idiom, *to cause one to devour the sword* (remoter object), i. e. to give him over to it. It would then be simplest to read תְּאַכְּלוּ.

Ez $9^{2.3}$;[1] with the accusative preceding, Neh 4^{12}.—(*b*) with *verba copiae* and *inopiae*, Ex 1^{7}, Is 38^{10} (equivalent to *I must forego the residue of my years*); Is 40^{20}.—(*c*) an accusative of the result (§ 117 *ii*) with the passive, Is 6^{11}, Zc 14^{4}, Jb 28^{2}; with the accusative preceding, Is 24^{12}, Mi 3^{12} (Jer 26^{18}), Jb 15^{7}, 22^{16}.[2] Also in Ez 40^{17} and 46^{23}, the accusative preceding עֲשׂוּי (in 41^{18} following it) can only be taken as the accusative of the result; some general idea, such as that of *place*, is to be understood as the subject of עֲשׂוּי.—(*d*) an accusative of the member or part specially affected by the action (§ 117 *ll*), Gn 17^{11}, 14^{24}, Ju 1^{7} (accusative *before* part. pass.); 2 S 15^{32} (accusative with suffix after the part. pass.).

2. Both accusatives are retained in an unusual manner after the passive of a *verbum implendi* in Nu 14^{21}; instead, however, of the *Niph.* וַיִּמָּלֵא the *Qal* (which is sometimes used transitively elsewhere) should simply be read with the LXX; similarly in ψ 72^{19}, although there the LXX also translate the passive. *c*

3. The efficient cause (or personal agent) is, as a rule, attached to the passive by לְ (thus corresponding to the Greek and Latin dative), e. g. Gn 25^{21} וַיֵּעָתֶר לוֹ יְהוָה *the Lord let himself be intreated by him*; cf. Lv 26^{23}, ψ 73^{10} and the blessing בָּרוּךְ הוּא לַיהוָה *blessed be he of the Lord* Ru 2^{20}; cf. Gn 14^{19}, Ju 17^{2b}, 1 S 15^{13}; also in the plural, 1 S 23^{21} (2 S 2^{5}, ψ 115^{15}).—*Before* the verb, Pr 14^{20} and frequently; less commonly by מִן (called מִן of origin = *coming from*), e. g. Gn 9^{11}; *before* the verb, ψ 37^{23}, Jb 24^{1}; by בְּ (*instrumenti*) [rarely, König § 106], Gn 9^{6} (בָּאָדָם *by man*); Nu 36^{2}, Is $14^{3\,b}$ [but ?=*wherewith it was worked* (§ 52 *e*) *with thee*; cf. Dt 21^{3}, König § 106; and see עָבַר בְּ in the Lexicon], Ho 14^{4}, always to introduce a personal agent.—On the connexion of the passive participle with a genitive of the agent, cf. § 116 *l*. *f*

II. Syntax of the Noun.

§ 122. *Indication of the Gender of the Noun.*

Cf. F. Schwabe, *Die Genusbestimmung des Nomens im bibl. Hebr.*, Jena, 1894, and especially the thorough investigation by K. Albrecht, 'Das Geschlecht der hebr. Hauptwörter,' in *ZAW.* 1895, p. 313 ff., and 1896, p. 61 ff. H. Rosenberg, 'Zum Geschlecht der hebr. Hauptwörter,' in *ZAW.* 1905, p. 325 ff. (supplementing Albrecht's work by a treatment of the gender of many nouns in the Mishna); and his 'Notizen aus der tannaitischen Literatur...' *ZAW.* 1908, p. 144 ff.

1. According to § 80 *a*, Hebrew, like the other Semitic languages, distinguishes only a *masculine* and *feminine* gender. To indicate the *a*

[1] Analogous to הַלָּבוּשׁ הַבַּדִּים *who was clothed in linen*, Ez 9^{3}, would be וְהַנּוֹתֵר אֶת־הֶהָמוֹן הַזֶּה 2 Ch 31^{10}; but we must certainly read there וְנוֹתֵר with the LXX.—Still less can ψ 87^{3} be so explained, נִכְבָּדוֹת being not an accusative, but the subject of a noun-clause. On the other hand, שָׁלוּחַ 1 K 14^{6} may be explained with Ewald in the sense of *being charged with* something, so that, like צָוָה, it may be construed with an accusative.

[2] In reality וַיִּרַם Ex $16^{20.26}$ (*it became putrid*) is equivalent to a passive (*it was changed*), to which תּוֹלָעִים is added as an accusative of the result.

latter a special feminine ending is generally used (§ 80 *b* and § 87 *i*) both in the singular and plural (see, however, § 87 *p*), its use being most consistent in adjectives and participles; cf. § 87 *r*. The employment of these special endings is most natural when by means of them the feminine names of persons or animals are distinguished from the masculine of the same stem and the same formation, e. g. אָח *brother*, אָחוֹת *sister*; עֶלֶם *a young man*, עַלְמָה *a young woman, maid*; פָּר *iuvencus*, פָּרָה *iuvenca*; עֵגֶל *vitulus*, עֶגְלָה *vitula*. On the other hand, the feminine plays an important part in denoting the gender of whole classes of ideas (see below, *p*, &c.), which the Hebrew regards as feminine. The language, however, is not obliged to use the feminine ending either for the purpose of distinguishing the *sex* of animate objects (see *b*), or as an indication of the (*figurative*) gender of inanimate things which are regarded as feminine (see *h*).

b **2.** The distinction of *sex* may be effected even without the feminine ending, (*a*) by the employment of words of different stems for the masculine and feminine; (*b*) by the different construction (either as masculine or feminine) of the same word (*communia*). But the distinction may also, (*c*) in the case of names of animals, be entirely neglected, all examples of a species being included under one particular gender, either masculine or feminine (*epicoena*).

c Examples of (*a*) are: אָב *father*, אֵם *mother*; אַיִל *ram*, רָחֵל *ewe*; תַּיִשׁ *he-goat*, עֵז *she-goat*; חֲמוֹר *he-ass*, אָתוֹן *she-ass*; אַרְיֵה *lion*, לָבִיא *lioness*. Sometimes with the feminine ending as well, e.g. עֶבֶד *male slave, man-servant*, אָמָה or שִׁפְחָה *female slave, maid*; חָתָן *bridegroom*, כַּלָּה *bride*.

d Of (*b*): גָּמָל *camel*. Plur. גְּמַלִּים construed as masculine, Gn 24^{63}; as feminine, Gn 32^{16}; בָּקָר collect. *oxen*, Ex 21^{37}, construed as masculine, but in Gn 33^{13}, Jb 1^{14} as feminine. In Jer 2^{24} the construction of פֶּרֶא *wild ass*, changes directly from the masculine (intended as epicene) to the feminine. Cf. the Greek ὁ, ἡ *παῖς*· ὁ, ἡ *βοῦς*.

e Of (*c*): analogous to the epicene nouns of other languages, many species of animals which are strong and courageous, are regarded in Hebrew as always masculine, while the weak and timid are feminine; cf. ὁ *λύκος*, ἡ *χελιδών*, and the German *der* Löwe, *der* Adler, &c., but *die* Katze, *die* Taube, &c. Similarly in Hebrew, e.g. אַלּוּף *ox* (ψ 144^{14} even referring to cows when pregnant), דֹּב *bear*, Ho 13^{8} דּוֹב שַׁכּוּל (*a bear that is bereaved of her whelps*; cf., however, 2 K 2^{24}, Is 11^{7}), זְאֵב *wolf*, כֶּלֶב *dog*, all masculine; but אַרְנֶבֶת *hare*, יוֹנָה *dove*, חֲסִידָה *stork*, דְּבוֹרָה *bee*, נְמָלָה *ant*, &c., feminine.

f Rem. 1. Masculine nouns which either have a separate feminine form or might easily form one, are but seldom used as epicene; such are, חֲמוֹר *ass*, 2 S 19^{27} for אָתוֹן; אַיָל *hart*, ψ 42^{2} for אַיָלָה. In Gn $23^{3\,ff.}$ מֵת *a dead body*, refers more especially to the body of a woman; אָמוֹן *a master workman*, in Pr 8^{30} refers to wisdom (חָכְמָה feminine, cf. Plin. 2, 1 *natura omnium artifex*; and our

use of *friend, teacher, servant, neighbour*, either as masculine or feminine; in German, *Gemahl*[1] spouse, also for fem. *Gemahlin*, &c.).

2. Of words denoting persons נַעַר *naïs*, according to the formerly common opinion, was in early times used as epicene (see, however, above, § 2 *n*). The use of the plural נְעָרִים in Jb 1[19] and Ru 2[21] in the sense of *young people* (of both genders) does not, however, prove this. In this and in similar cases (cf. e.g. אֹתָם Gn 1[27] and אֲהֶם 32[1]) the masculine as *prior gender* includes the feminine.[2] *g*

3. The following classes of ideas are usually regarded as feminine,[3] although the substantives which express them are mostly without the feminine ending:[4] *h*

(*a*) Names of *countries* and *towns*, since they are regarded as the mothers[5] and nurses of the inhabitants; e.g. אַשּׁוּר *Assyria*, אֱדוֹם *Idumaea*, צֹר *Tyre*; cf. also such expressions as בַּת בָּבֶל, בַּת צִיּוֹן *daughter of Babylon, daughter of Zion*, &c. On the other hand appellatives which are originally masculine, remain so when used as place-names, e.g. Am 5[5] בֵּית־אֵל, הַגִּלְגָּל, &c.

Rem. The same proper nouns, which as names of countries are regarded as feminine, are frequently used also as names of the people, and may then, like national names in other languages, be construed as masculine (the national name almost always being used also as the personal name of the supposed ancestor of the people); thus יְהוּדָה masc. Is 3[8], &c., *Judaei*; but *i*

---

[1] So in early Arabic, *baʿl* (lord) and *zauǵ* (conjux) are used both for *maritus* and *uxor*; *ʿarūs* for *bridegroom* and *bride*; the later language, however, distinguishes the feminine from the masculine in all these cases generally by the ending *a* (*at*). In early Arabic also the feminine ending is commonly omitted in such participles as *ḥāmil, bāṭin* (gravida), and the like, which from the nature of the case can only be used of females. Thus also אֹמֶן, at least in Nu 11[12] (Is 49[23]?), probably means *nurse* (for אֹמֶנֶת 2 S 4[4], &c.), not *nursing-father*.

[2] The Arab grammarians call this use of the masculine plural and dual (e.g. *el-abawāni*, the two fathers, i.e. *parentes*) *taghlib* or *the making* (the masculine) *prevail* (over the feminine).—Cf. M. Grünert, *Die Begriffs-Präponderanz und die Duale a potiori im Altarab.*, Vienna, 1886.

[3] The masculine gender is attributed 'by the Hebrews and the Semites generally to whatever is dangerous, savage, courageous, respected, great, strong, powerful . . .; the feminine to whatever is motherly, productive, sustaining, nourishing, gentle, weak, . . . subject, &c.' (Albrecht, *ZAW.* 1896, p. 120 f.).

[4] When, on the other hand, words *with* a feminine-ending, such as קֶשֶׁת *a bow* (stem קוש), עֵת *time* (see the Lexicon), are sometimes construed as masculine, this is owing probably in some cases to a misunderstanding of the formation of the word, the ת of the feminine being regarded as a radical.

[5] Cf. *a city and a mother* (אֵם) *in Israel*, 2 S 20[19]. In the same way אֵם (like *μήτηρ, mater*) on Phoenician coins stands for *mother-city*, *μητρόπολις*. The same figure is used in such expressions as *sons of Zion*, ψ 149[2]; *sons of Babylon*, Ez 23[15], &c., as also in speaking of the suburbs of a city as its *daughters*, e.g. Jos 15[45 ff.], &c.—The comparison of Jerusalem to a woman is especially frequent in allegorical descriptions, e.g. Ez 16[23], La 1[1], &c.

Is 7[6], fem., *Judaea*; אֱדֹם masc., *Idumaei*, Nu 20[20]; fem., *Idumaea*, Jer 49[17]. Nevertheless, it sometimes happens that by a very common transference of thought (just as we say *Turkey concludes peace*) these names are construed as feminine, even when they denote not the country but the inhabitants; so יְהוּדָה La 1[3]; cf. Gn 41[8], Ex 10[7], 12[33], 1 S 17[21], 2 S 8[2], 24[9], Is 7[2], 21[2], 42[11], Jer 50[10], Jb 1[15]. Hence the frequent personification of nations (as well as of countries and towns, see *h*, note 5) as female beings, e.g. Is 50[1], 54[1 ff.], and the use of the expressions בַּת בָּבֶל Is 47[1 ff.], בַּת צִיּוֹן &c. (see above) as collective poetical personifications of the people.

k (*b*) Appellative nouns, which denote a *circumscribed space*, such as אֶרֶץ *earth, land*, תֵּבֵל *world*, שְׁאוֹל *the abode of the dead*, כִּכָּר *circle* (of the Jordan valley), עִיר *a town*, בְּאֵר *a well*, צָפוֹן *the north*, תֵּימָן *the south*.

l In the majority of nouns denoting place the gender is variable, e.g. אֹרַח and דֶּרֶךְ *a way* (usually feminine; the masculine gender only begins to predominate with Ezekiel; cf. Albrecht, l. c., 1896, p. 55), גַּיְא (גַּי) *valley*, גַּן *garden* (fem. Gn 2[15], unless לְעָבְדָהּ, &c., is to be read), הֵיכָל *palace, temple*, חָצֵר *court*, כֶּרֶם *vineyard*, שַׁעַר *door*,[1] &c.; also מָקוֹם *place*, at least in Gn 18[24] (referring to Sodom), Jb 20[9], and 2 S 17[12] *K^ethibh*, is construed as feminine. The mountains and hills commanding the surrounding country are almost without exception masculine (see Albrecht, l. c., p. 60 f.).

m (*c*) The names of *instruments, utensils*, and (on the same analogy) *members* and *parts of the body* in man or beast, since these are all regarded as subservient and subordinate (consequently as feminine).

n Thus חֶרֶב *sword*, יָתֵד *tent-peg*, דַּד *bucket*, כּוֹס *cup*, נַעַל *shoe*, עֶרֶשׂ *bed*, &c.; in other cases, as אָרוֹן *chest, ark* (with the article הָאָרוֹן), תַּנּוּר *oven*, the gender is variable. ('Instruments for binding or holding, girdles and the like, as constraining and mastering, are masculine,' Albrecht, l. c., p. 89.)—Also אֹזֶן *ear* (and in general, members occurring in pairs, Albrecht, l. c., p. 73 f.), אֶצְבַּע *finger* (and so probably בֹּהֶן *thumb, great toe*), יָד and כַּף *hand*, יָמִין *right hand*, רֶגֶל *foot*, בֶּרֶךְ *knee*, יֶרֶךְ *thigh*, כָּתֵף *shoulder*, לְחִי *cheek*, בֶּטֶן *belly*, כָּנָף *wing*, קֶרֶן *horn*, שֵׁן *tooth*; as a rule also זְרוֹעַ *arm* (masc. Is 17[5], &c.), לָשׁוֹן *tongue* (masc. ψ 22[16], Pr 26[28], &c.), עַיִן *eye* (masc. Zc 3[9], &c.), שׁוֹק *thigh* (masc. Ex 29[27]).[2]

o (*d*) Certain names of natural forces or substances are feminine, being probably regarded as instruments, while in the names of the heavens, the heavenly bodies and natural phenomena, the masculine generally predominates (cf. Albrecht, l. c., p. 323 ff.); thus feminine are שֶׁמֶשׁ *sun* (but often also *masc.*, ψ 19[6], 104[19]); אֵשׁ (Ethiopic *'ĕsât*)

---

[1] מַחֲנֶה *camp* is feminine only when it is a collective, denoting the persons in a camp.

[2] אַף *nose*, גִּיד *sinew*, זָנָב *tail*, חֵךְ *palate*, כָּבֵד *liver*, לֵב, לֵבָב *heart*, מֵעִים, רַחֲמִים *bowels*, מֵצַח *forehead*, עוֹר *skin*, עֹרֶף *back of the neck*, פֶּה *mouth*, צַוָּאר *neck*, רֹאשׁ *head*, שֶׁכֶם *shoulder*, also רֶחֶם *womb*, except in Jer 20[17], are invariably construed as masculine.—עֶצֶם *bone* is common.

fire (rarely *masc.*); נֵגַהּ *brightness*, אֶבֶן *a stone*, as a rule also רוּחַ *wind, spirit*; נֶפֶשׁ *breath, soul*; also אוֹר *light* in Jer 13[16], Jb 36[32], and others.

4. The following classes of ideas, which are also regarded as feminine in Hebrew (see above, *h*), are usually indicated by the feminine *form*, notwithstanding their occasional transference to masculine persons (see *r* and *s*): *p*

(*a*) Abstracts[1] (sometimes along with masculine forms from the same stem, as נָקָם *vengeance*, as well as נְקָמָה, עֶזְרָה *help*, as well as עֵזֶר, e. g. אֱמוּנָה *firmness, faithfulness*, גְּבוּרָה *strength*, גְּדוּלָה *greatness*, מְלֵאָה *fullness*, מֶמְשָׁלָה *dominion*, &c. Similarly, the feminine (sing. and plur.) of adjectives and participles is used substantivally in the sense of the Latin and Greek *neuter*, e. g. נְכוֹנָה *stedfastness*, ψ 5[10], טוֹבָה *goodness*, רָעָה *evil*, Gn 50[20], נְקֵלָה *a light thing* (i. e. a trifling thing), Jer 6[14]; so especially in the plural, e. g. גְּדֹלוֹת *great things*, ψ 12[4]; הַנֶּהֱרָסוֹת *the ruined places*, Ez 36[36], along with הַנְּשַׁמָּה *that which was desolate*, טֹבוֹת *kindnesses*, 2 K 25[28], נְכֹחוֹת *uprightness, honesty*, Is 26[10], נְעִימוֹת *amoena*, ψ 16[11] (but in verse 6 in the same sense נְעִימִים), נִפְלָאוֹת *wonderful things*, Ex 34[10] and frequently, קָשׁוֹת *hard things, roughly*, Gn 42[7.30] (but cf. also רֵיקִים *vain things*, Pr 12[11], 28[19]). Cf. moreover, the very frequent use of זֹאת, הִיא (as well as זֶה and הוּא), Ju 14[4], ψ 118[23], &c., in the sense of *hoc, illud* (also הֵנָּה equivalent to *illa*, Is 51[19]): also the use of the feminine form of the verb in Is 7[7] לֹא תָקוּם וְלֹא תִהְיֶה *it shall not stand, neither shall it come to pass*; cf. Jer 10[7]; so too the suffixes Gn 15[6], Ex 10[11], Jb 38[18], referring back to a whole statement.[2] *q*

(*b*) Titles and designations of office, properly a subdivision of the abstract ideas treated above, under *q*, and specially noticed here only on account of their peculiar transference to concrete male persons. Thus we have קֹהֶלֶת Ec 1[1], &c. (as a title of Solomon), properly no doubt *that which takes part in* or *speaks in a religious assembly*, hence LXX ἐκκλησιαστής, i. e. *concionator, preacher*; the proper names סֹפֶרֶת Ezr 2[55], Neh 7[57], and פֹּכֶרֶת Ezr 2[57], Neh 7[59], and the foreign word פֶּחָה *viceroy*; in the plural כְּנָוֹת prop. *cognomina*, then *like-named, colleagues*; פְּרָעוֹת *princes* (if this be the true meaning).[3] All these words, in accordance with their meaning, are construed as masculine (in Ec 7[27] instead of קָ֭הֶלֶת אָמְרָה the words should rather be divided as אָמַר הַקּ֭וֹהֶלֶת; cf. 12[8]). *r*

---

[1] Cf. the list of masculine and feminine abstracts in Albrecht, l. c., 1896, p. 111 ff.

[2] While in all these instances it is simplest to speak of the *feminine* in Hebrew as being used *for the neuter* (which in Latin, Greek, and German is commonly employed for similar purposes), it must yet not be forgotten that since the language is wholly wanting in *neuters*, the Semitic mind regarded the above-mentioned forms primarily as actual feminines. Hence the Arab commentators are accustomed to explain the feminines of adjectives and participles (which would be neuter in Latin, &c.) by supplying a feminine substantive.

[3] This use of the feminine form is far more frequent in Arabic, Ethiopic, and Aramaic; cf. e. g. in Arabic *ḫalīfa* (fem. from *ḫalīf*, following after, taking the place of) in the sense of *the* successor or representative (of Muḥammad), and *'allāma (great wisdom)* as a title of learned men. Analogous to this is the Latin *magistratus, magistracy*, for *magistrate*, and our *his Majesty, Excellency, Highness*, &c.

s Abstract ideas include also—

(*c*) *Collectives* in the fem. form,[1] generally fem. participles used substantivally, especially as the comprehensive designation of a number of *persons*, e. g. אֹרְחָה (fem. of *travelling*), prop. *the travelling* (company), i. e. travelling persons (a caravan); גּוֹלָה (fem. of גֹּלֶה *one going into exile*) *the company of exiles* (also frequently used of those who had returned home again); יוֹשֶׁבֶת (that which inhabits) i. e. *the population*, Is 12[6], Mi 1[11 f.]; אֹיֶבֶת (prop. that which is hostile) *the enemy*, Mi 7[8.10] (cf. Mi 4[6 f.] *the halting, cast off, driven away*, i. e. *those who halt*, &c.); דַּלָּה (the abject) *the poorest sort*; of living beings which are not persons, cf. חַיָּה (that which lives) in the sense of *cattle, beasts*; דָּגָה *a shoal of fish*, Gn 1[26] (but in Jon 2[2] as a *nomen unitatis*, cf. *t*, for דָּג *a fish*, which in verses 1 and 11 is used as the *nomen unitatis*). Cf., moreover, נִבֵלָה *dead body*, Is 26[19], &c. (construed as masculine), for *a heap of dead bodies*.—On the collective poetic personification of a nation, by means of בַּת *daughter*, in בַּת עַמִּי, בַּת בָּבֶל (equivalent to בְּנֵי עַמִּי) *my countrymen*, see above, *i*.

t (*d*) Conversely the feminine form of substantives is sometimes used (as in Arabic) as a *nomen unitatis*, i. e. to indicate a *single* example of a class which is denoted by the masculine form; cf. אֳנִי *a fleet* (1 K 9[26]), אֳנִיָּה *a* single *ship* (Jon 1[3 ff.]); צַיִד *hunting, game*, צֵידָה Gn 27[3] *Keth.* (צַיִד *Qerê*) *a piece of venison*; שֵׂעָר *hair* (coll.), שַׂעֲרָה *a* single *hair* (Ju 20[16]; in the plural, ψ 40[13], 69[5]); שִׁיר *a poem*, frequently collective, שִׁירָה *a* single *song*; so probably also תְּאֵנָה *a fig* (the corresponding masculine *tin* is collective in Arabic); שׁוֹשַׁנָּה *a lily* (also שׁוֹשָׁן); לְבֵנָה *a brick* (Arab. *libina*, but *libin* collective), &c.

u (*e*) The feminine is also used for things *without life* (as being weaker or less important), which are named from their resemblance to *organic* things expressed by the corresponding masculine form; cf. יֶרֶךְ *side* (of the body), *thigh*, יְרֵכָה or יַרְכָה *back part, border* (of a country, house, &c.); מֵצַח *forehead*, מִצְחָה *greaves*. On a similar distinction between the masculine for natural, and the feminine for artificial objects, see § 87 *o*.

v Rem. The juxtaposition of the masculine and feminine from the same stem serves sometimes to express entirety; e. g. Is 3[1] מַשְׁעֵן וּמַשְׁעֶנָה *stay and staff*, i. e. every kind of support (unless we omit verse 1[b] as a gloss and take *staff* as = *staff-bearer, official*; the list of officials begins in verse 2); cf. Is 16[6], Pr 8[13]. For similar groupings in the case of persons, see Is 43[6], 49[22], 60[4] (*sons and daughters*); 49[23], Ec 2[8].

§ 123. *The Representation of Plural Ideas by Means of Collectives, and by the Repetition of Words.*

a Besides the plural endings treated in § 87 *a–i*, the language employs other means to express a plurality of living beings or things:

(*a*) Certain words employed exclusively in a collective sense, while the individual members of the class are denoted by special words (*nomina unitatis*, but not in the same sense as in § 122 *t*).

---

[1] Cf. in Greek ἡ ἵππος, *the cavalry* (as well as τὸ ἱππικόν), ἡ κάμηλος, Hdt. 1, 80, &c., *the camel corps*.

Thus בָּקָר *cattle, oxen*[1] (even joined with numerals, e.g. Ex 21[37] חֲמִשָּׁה בָקָר *five head of cattle*), but שׁוֹר *an ox*; צֹאן *small cattle*, i.e. sheep and goats (*μῆλα*), cf. Jb 1[3] שְׁבַעַת אַלְפֵי־צֹאן *seven thousand sheep*; but שֶׂה *a single head of small cattle* (a sheep or a goat). Other more or less common collectives are: זְיִז (prop. that which prowls or roams) *wild beasts*, טַף (perhaps prop. *tripping*) *a number of little children*; דֶּשֶׁא *fresh green herb*, i.e. young plants, יֶרֶק *green*, i.e. vegetation in general; עוֹף *birds, fowl*; רֶכֶב *chariots* or *cavalcade*, רֶמֶשׂ *worms*, שֶׁרֶץ *creeping things* (of small creatures), שֶׁרֶץ *swarming things*.

(*b*) The collective use of substantives which at the same time serve as *nomina unitatis*; thus, אָדָם (never in plur.) means both *man* (homo) and *men* (homines); אִישׁ *a man* (vir) and *men* (viri); אִשָּׁה *woman* and *women* (Ju 21[16], 1 S 21[6]); אַרְבֶּה *a locust*, but usually *a swarm of locusts*; נֶפֶשׁ *soul* and *souls* (persons); מַקֵּל *staff* and *staves* (Gn 30[37]); עַיִט *a bird of prey* and *birds of prey*; עָלֶה *a leaf* and *foliage*; עֵשֶׂב *a plant* and *plants, herbs*; עֵץ *a tree* and *trees* (as it were *foliage*); פְּרִי *fruit* and *fruits*; שִׂיחַ *a shrub* and *shrubs*; in isolated instances also nouns like עֶבֶד *man-servant*, שִׁפְחָה *maid-servant*, חֲמוֹר *ass*, שׁוֹר *ox* (cf. Gn 32[6]).—On the singular (especially of gentilic names) with the article (which may, however, be omitted in poetry, cf. e.g. ψ 12[2] חָסִיד, Pr 11[14] יוֹעֵץ) to include all individuals of the same species, cf. § 126 *l*. On the special meaning of the plurals formed from certain collectives, see § 124 *l*. *b*

(*c*) The feminine ending; see § 122 *s*.

(*d*) The repetition of single words, and even of whole groups of words, especially to express entirety, or in a distributive sense. The following cases are more particularly to be noticed: *c*

1. The repetition of one or more words to express the idea of *every, all*, as יוֹם יוֹם Gn 39[10], &c., *day* by *day, every day*; שָׁנָה שָׁנָה *year* by *year*, Dt 14[22]; אִישׁ אִישׁ *every* man, Ex 36[4]; with בְּ before each, as בַּבֹּקֶר בַּבֹּקֶר Ex 16[21] *every morning* (and similarly before a group of words, Lv 24[8]), for which the *distributive* לְ is also used, לַבֹּקֶר לַבֹּקֶר 1 Ch 9[27], and with *one* plural לַבְּקָרִים ψ 73[14], לְבָקָרִים Jb 7[18] parallel with לְרָגָעִים *every moment*. Somewhat different are the instances with בְּ before the second word only, e.g. יוֹם בְּיוֹם *day* by *day*, 1 Ch 12[22]; שָׁנָה בְּשָׁנָה *year by year*, Dt 15[20], 1 S 1[7] (but in verse 3 מִיָּמִים יָמִימָה), בְּפַעַם בְּפַעַם Nu 24[1], Ju 16[20], 20[30 *f.*], 1 S 3[10] *as at other times*. Also with the two words united by means of *wāw copulative*, אִישׁ וְאִישׁ ψ 87[5], or אִישׁ וְאִישׁ Est 1[8]; דּוֹר וָדוֹר *all generations*, Dt 32[7]; יוֹם וְיוֹם Est 3[4]; cf. Est 8[9],

[1] The plural form בְּקָרִים from בָּקָר is found only in very late Hebrew, Neh 10[37] (where according to the Mantua edition, Ginsburg, &c., even צֹאנֵינוּ *our sheep*, is also to be read; Baer, however, has צֹאנֵנוּ), and 2 Ch 4[3]. In Am 6[12] read, with Hitzig, בַּבָּקָר יָם.

Ezr 10^{14}, 1 Ch 26^{13} and often (cf. Cheyne, *Bampton Lectures*, 1889, p. 479, according to whom the use of the ו copulative with the second word is especially common in Ch and Est, and therefore belongs to the later language; Driver, *Introd.*[6], p. 538, No. 35); sometimes (but with the exception of ψ 45^{18} only in very late passages) with a pleonastic כָּל preceding, ψ 145^{13}, Est 2^{11}, 9^{28}, 2 Ch 11^{12}, &c.

d 2. Repetition of words in an expressly *distributive* sense[1] (which may to some extent be noticed in the examples under *c*) equivalent to *one each*, &c., e. g. Nu 14^{34} *forty days* יוֹם לַשָּׁנָה יוֹם *counting for every day a year*; cf. Ez 24^{6}, Ex 28^{34} (three words repeated); also with the addition of לְבַד *apart*, עֵדֶר עֵדֶר לְבַדּוֹ *every drove by itself*, Gn 32^{17}; cf. Zc 12^{12}. Most frequently with the addition of a numeral (for the simple repetition of numerals for the same purpose, cf. § 134 *q*), and with the words not only in groups of two (Lv 24^{8}. Nu 13^{2}, 31^{4}) or three (Nu 7^{11}, 17^{21}), but even of six (Ex 26^{3}) or seven (Ex 25^{33}, $26^{19.21.25}$); in Ex 25^{35} five words even three times repeated.[2]

e 3. Repetition to express an exceptional or at least superfine quality; e. g. 2 K 25^{15} *which were of gold, gold, of silver, silver*, i. e. made of pure gold and pure silver; Dt 2^{27} בַּדֶּרֶךְ בַּדֶּרֶךְ *only along by the* high *way*; cf. Nu 3^{8}, 8^{16} *they are given, given to him*, i. e. given exclusively for his service, for his very own. Also with a certain hyperbole in such examples as 2 K 3^{16} גֵּבִים גֵּבִים *nothing but trenches*; Gn 14^{10} בְּאֵרֹת בְּאֵרֹת חֵמָר *all asphalt-pits*.—Repetition serves to intensify the expression to the highest degree in Ju 5^{22} *by reason of the violent pransings of his strong ones*, Ex 8^{10} (*countless heaps*), and Jo 4^{14} (*countless multitudes*); cf. also מְעַט מְעַט Ex 23^{30} *by little and little, very gradually*; cf. § 133 *k*.

f 4. Repetition with the copula to express *of more than one kind*; thus Dt 25^{13} (Pr 20^{10}) אֶבֶן וְאֶבֶן *a weight and a weight*, i. e. two kinds of weight (hence the addition *great and small*); ψ 12^{3} בְּלֵב וָלֵב *with two kinds of heart*, i. e. *with a double-dealing heart*; cf. the opposite בְּלֹא לֵב וָלֵב 1 Ch 12^{33}.

§ 124. *The Various Uses of the Plural-form.*[3]

a 1. The plural is by no means used in Hebrew solely to express a number of individuals or separate objects, but may also denote them collectively. This use of the plural expresses either (*a*) a combination of various external constituent parts (plurals of *local extension*), or (*b*) a more or less intensive focusing of the characteristics inherent in the idea of the stem (*abstract plurals*, usually rendered in English by forms in *-hood, -ness, -ship*). A variety of the plurals described under (*b*), in which the secondary idea of *intensity* or of an *internal*

---

[1] Cf. in the New Testament St. Mark $6^{39\,f.}$ *συμπόσια συμπόσια, πρασιαὶ πρασιαί* (Weizsäcker, *tischweise, beetweise*).

[2] These repetitions of larger groups of words belong entirely to the *Priestly Code* in the Pentateuch, and are unquestionably indications of a late period of the language. Of quite a different kind are such examples as Ez 16^{6}, where the repetition of four words serves to give greater solemnity to the promise, unless here, as certainly in 1^{20}, it is a mere *dittography*; the LXX omit the repetition in both passages.

[3] Cf. Dietrich, 'Über Begriff und Form des hebr. Plurals,' in the *Abhandl. zur hebr. Grammatik*, Leipzig, 1846, p. 2 ff.

multiplication of the idea of the stem may be clearly seen, is (*c*) the *pluralis excellentiae* or *pluralis maiestatis.*

b Examples of (*a*): Plurals of *local extension* to denote localities in general, but especially level surfaces (the *surface*-plural), since in them the idea of a whole composed of innumerable separate parts or points is most evident, as שָׁמַיִם (§ 88 *d*) *heaven* (cf. also מְרוֹמִים *heights* of heaven, Is 33[16], Jb 16[19]; elsewhere מָרוֹם); מַיִם *water*; יַמִּים (the broad surface of the sea) poetically for יָם *sea*; פָּנִים (prop. the side *turned towards* any one, then) *surface* in general, usually *face*; אֲחוֹרִים *the back*, Ex 26[12], 33[23], &c., צַוָּארִים *neck, nape of the neck*[1]; also מְרֹאשׁוֹת *the place at the head*, מַרְגְּלוֹת *place at the feet*; עֲבָרִים *place on the other side* (of a river); מַעֲמַקִּים *depth*, מֶרְחַקִּים (also מֶרְחָק) *distance*, מִשְׁכָּבִים *bed*, Gn 49[4] (unless, with Dillmann, it is to be explained in the sense of *double bed*, i.e. *torus*), מִשְׁכָּנִים ψ 46[5], and מִשְׁכָּנוֹת 43[3], 84[2], 132[5], *dwelling* (perhaps also אָהֳלִים *encampment*, in passages like 1 S 4[10]). The last four belong, however, to poetic style, and are better reckoned amongst the *plurals of amplification* treated under *d-f*. So perhaps יְצָעִים *bed* (ψ 63[7], Jb 17[13]; but Gn 49[4], ψ 132[3], &c., in the singular); probably, however, יְצָעִים (prop. *strata*) refers to a number of coverings or pillows.

The plural of extension is used to denote a lengthened period of *time* in עוֹלָמִים *eternity* (everlasting ages).

c Rem. The plural of extension includes also a few examples which were formerly explained as simply poetic plurals, e.g. Jb 17[1] קְבָרִים לִי *graves are* (ready) *for me*, i.e. the place where there are many of them (as it were *the graveyard*) is my portion, Jb 21[32], 2 Ch 16[14]; cf. 2 K 22[20].

d Of (*b*): the tolerably numerous abstract plurals, mostly of a particular form (*qᵉṭūlim, qiṭṭūlim*, &c.), may be divided into two classes. They sum up either the *conditions* or *qualities* inherent in the idea of the stem, or else the various single *acts* of which an action is composed. Cf. for the first class, בְּחוּרִים and בְּחוּרוֹת *youth*, זְקֵנִים *old age*, נְעוּרִים *youth*; בְּתוּלִים *maidenhood*, בְּלוּלוֹת *bridal state*; מְגוּרִים *condition of a sojourner*, בְּשָׂרִים *fleshliness* (only in Pr 14[30]), חַיִּים *life* (the abstract idea of the qualities of a living being); שְׁכוּלִים *childlessness*, סַנְוֵרִים *blindness*, עִוְעִים *perverseness.*

e There are also a number of plurals, found almost exclusively in poetry (sometimes along with the singular), which are evidently intended to intensify[2] the idea of the stem (plural of amplification), as אוֹנִים *might*, Is 40[26]; אֱמוּנִים (as well as אֱמוּנָה) and אֱמוּנוֹת *faithfulness*; אֲשֻׁרֵי (according to § 93 *l*, only in the construct state plural or with suffixes = *the happiness of*), *happy*; כְּוֹשָׁרוֹת (complete) *prosperity*, ψ 68[7]; בִּינוֹת Is 27[11] and תְּבוּנוֹת Is 40[14], &c. (keen) *understanding*; עֲצוֹת (true) *counsel*, Dt 32[28]; דֵּעִים Jb 37[16] and דֵּעוֹת

---

[1] Cf. the same use of the plural in *τὰ στέρνα, τὰ νῶτα, τὰ τράχηλα, praecordia, cervices, fauces*; on plurals of extension in general, cf. the prepositions of place and time in the plur. form, § 103 *n.* סְפָרִים is not a case in point, in the sense of *letter* (properly a sheet folded into several pages; elsewhere also סֵפֶר) 1 K 21[8 ff.], 2 K 10[1], 19[14] (Is 37[14]; referred to afterwards by the *singular* suffix); Is 39[1], Jer 29[25], 32[14] (*after* being folded, previously סֵפֶר).

[2] Cf. A. Ember, 'The pluralis intensivus in Hebrew,' *AJSL.* 1905, p. 195 ff.

1 S 2^3 (thorough) *knowledge*; בַּטְּחוֹת Jb 12^6 and מִבְטָחִים Is 32^{18} (full) *confidence*; בְּרָכוֹת (abundant) *blessing*, ψ 21^7; גְּבוּרוֹת (exceptional) *strength*, Jb 41^4; הַוּוֹת ψ 5^{10} (very) *wickedness*; חֲמוּדוֹת Dn 9^{23} (greatly) *beloved*; חֵמוֹת ψ 76^{11}, &c. (fierce) *wrath*; חֶרְפּוֹת Dn 12^2 (utter) *contempt*; יְשׁוּעוֹת (real) *help*, Is 26^{18}, &c.; מַרְאֹת Gn 46^2 (an important) *vision*; מֵישָׁרִים *uprightness*; תַּהְפֻּכוֹת *perversity*; נְקָמוֹת (complete) *vengeance*, Ju 11^{36}, &c.; חֲשֵׁכִים and מַחֲשַׁכִּים (thick) *darkness*; מִסְתָּרִים *a* (close) *hiding-place*; נְגִידִים *nobility*; שְׁמָנִים Is 28^1 *fatness*; צַחֲצָחוֹת (complete) *aridity*; מַמְתַקִּים *sweetness*; מַחֲמַדִּים *preciousness*; שַׁעֲשָׁעִים *delight*; עֲדָנִים and תַּעֲנוּגִים *pleasure*; רַחֲמִים *compassion*; מְנוּחוֹת ψ 23^2 *rest, refreshment*; מְהוּמוֹת Am 3^9 *tumult*. Probably also יְדִידוֹת (heartfelt) *love*, ψ 45^1; מְרֹרוֹת (extreme) *bitterness*, Jb 13^{26}; מְרָמוֹת (base) *deceit*, ψ 38^{13}; צְדָקוֹת (true) *righteousness*, Is 33^{15}, &c.; שְׁמָחוֹת (the highest) *joy*, ψ 16^{11}. On the other hand, חָכְמוֹת *wisdom* (Pr 1^{20}, &c.) can hardly be a *plural* (=the essence of wisdom, or wisdom personified), but is a singular (see § 86 *l*).

A further extension of this plural of amplification occurs according to P. Haupt's very probable suggestion (*SBOT.* Proverbs, p. 40, line 50, &c.) in יְאֹרִים *the great river* (of the Nile, generally יְאֹר) Is 7^{18}, 19^6 (though with the predicate in the plural), Ez 30^{12}, ψ 78^{44}, but in Is 37^{25}, Ez 29^3 the usual explanation, *arms* or *channels of the Nile*, can hardly be avoided; also in נְהָרוֹת ψ 24^2 of the ocean, which encircles the earth, 137^1 of the *great river*, i.e. the Euphrates, but in Is 18^1 נַהֲרֵי כוּשׁ is evidently a numerical plural.—In Pr 16^{13} מְלָכִים (acc. to P. Haupt=the *great king*) is very doubtful. In נְשִׂיאֵי Ez 19^1 the second *yôdh* is evidently due to dittography, since יִשְׂרָאֵל follows.

f The summing up of the several parts of an action is expressed in חֲנָטִים *embalming*, כְּפָרִים *atonement*, מְלֵאִים (prop. *filling*, sc. of the hand) *ordination to the priesthood*, שִׁלֻּחִים *dismissal*, שִׁלֻּמִים *retribution*, פִּתּוּחִים *engraving* (of a seal, &c.); אֲהָבִים *fornication*, זְנוּנִים *whoredom*, נְאָפִים *adultery*; נִחוּמִים (prop. no doubt, warm compassion) *consolation*, תַּחֲנוּנִים *supplication*, נְדָדִים Jb 7^4 (restless) *tossing to and fro*, פְּלָאִים *wonder* La 1^9, עֳלָלוֹת *gleaning*; perhaps also נְגִינוֹת ψ 4^1, 6^1, &c., if it means *the playing on stringed instruments*, and שַׁלְמֹנִים Is 1^{23} *bribery*, unless it be a plural of number.[1]

g Of (*c*): the *pluralis excellentiae* or *maiestatis*, as has been remarked above, is properly a variety of the abstract plural, since it sums up the several characteristics[2] belonging to the idea, besides possessing the secondary sense of an *intensification* of the original idea. It is thus closely related to the plurals of amplification, treated under *e*, which are mostly found in poetry.

---

[1] Mayer Lambert in *REJ.* xxiv. 106 ff., enumerates no less than ninety-five words ending in *îm*, which in his opinion are to be regarded as *pluralia tantum*.

[2] The Jewish grammarians call such plurals רִבּוּי הַבְּחוֹת *plur. virium* or *virtutum*; later grammarians call them *plur. excellentiae, magnitudinis*, or *plur. maiestaticus*. This last name may have been suggested by the *we* used by kings when speaking of themselves (cf. already 1 Macc. 10^{19}, 11^{31}); and the plural used by God in Gn 1^{26}, 11^7, Is 6^8 has been incorrectly explained in this way. It is, however, either *communicative* (including the attendant angels; so at all events in Is 6^8, cf. also Gn 3^{22}), or according to others, an indication of *the fullness of power and might* implied in אֱלֹהִים (see Dillmann on Gn 1^{26}); but it is best explained as a plural of *self-deliberation*. The use of the plural as a form of respectful address is quite foreign to Hebrew.

So especially אֱלֹהִים *Godhead, God* (to be distinguished from the numerical plural *gods*, Ex 12[12], &c.). The supposition that אֱלֹהִים is to be regarded as merely a remnant of earlier polytheistic views (i.e. as originally only a numerical plural) is at least highly improbable, and, moreover, would not explain the analogous plurals (see below). That the language has entirely rejected the idea of numerical plurality in אֱלֹהִים (whenever it denotes *one* God), is proved especially by its being almost invariably joined with a singular attribute (cf. § 132 *h*), e.g. אֱלֹהִים צַדִּיק ψ 7[10], &c. Hence אֱלֹהִים may have been used originally not only as a numerical but also as an abstract plural (corresponding to the Latin *numen*, and our *Godhead*), and, like other abstracts of the same kind, have been transferred to a concrete single god (even of the heathen).

h To the same class (and probably formed on the analogy of אֱלֹהִים) belong the plurals קְדֹשִׁים *the Most Holy* (only of Yahweh), Ho 12[1], Pr 9[10], 30[3] (cf. אֱלֹהִים קְדֹשִׁים Jos 24[19], and the Aram. ע�illָיוֹנִין *the Most High*, Dn 7[18.22.25]); and probably תְּרָפִים (usually taken in the sense of *penates*) the image of a god, used especially for obtaining oracles. Certainly in 1 S 19[13.16] only *one* image is intended; in most other places a single image *may* be intended[1]; in Zc 10[2] alone is it most naturally taken as a numerical plural. In Ec 5[7] גְּבֹהִים *supremus* (of God) is doubtful; according to others it is a numerical plural, *superiores*.

i Further, אֲדֹנִים, as well as the singular אָדוֹן, (lordship) *lord*, e.g. אֲדֹנִים קָשֶׁה *a cruel lord*, Is 19[4]; אֲדֹנֵי הָאָרֶץ *the lord of the land*, Gn 42[30], cf. Gn 32[19]; so especially with the suffixes of the 2nd and 3rd persons אֲדֹנֶיךָ, אֲדֹנָיִךְ ψ 45[12], אֲדֹנָיו, &c., also אֲדֹנֵינוּ (except 1 S 16[16]); but in 1st sing. always אֲדֹנָי.[2] So also בְּעָלִים (with suffixes) *lord, master* (of slaves, cattle, or inanimate things; but in the sense of *maritus*, always in the singular), e.g. בְּעָלָיו Ex 21[29], Is 1[3], &c.[3]

k On the other hand, we must regard as doubtful a number of participles in the plural, which, being used as attributes of God, resemble *plurales excellentiae*; thus, עֹשָׂי *my Maker*, Jb 35[10]; עֹשַׂיִךְ Is 54[5]; עֹשָׂיו ψ 149[2]; עֹשֶׂיהָ Is 22[11]; נוֹטֵיהֶם *stretching them out*, Is 42[5]; for all these forms may also be explained as singular, according to § 93 *ss*.[4]—נֹגְשָׂיו Is 3[12] might also be regarded as another instance, unless it be a numerical plural, *their oppressors*; moreover, מְרִימָיו *him who lifteth it up*, Is 10[15] (but read probably מְרִימוֹ); שֹׁלְחָיו *him who sendeth him*, Pr 10[26], 22[21] (so Baer, but Ginsburg שֹׁלְחֲךָ), 25[13] (in parallelism with אֲדֹנָיו). These latter plurals, however (including מרימיו), may probably be more simply explained as indicating an indefinite individual, cf. *o* below.—For שֹׁמְרַיִךְ ψ 121[5] (textus receptus) and בֹּוְרֶאֶיךָ Ec 12[1] (textus receptus) the singular should be read, with Baer.

---

[1] Even in Gn 31[34], notwithstanding the plural suffix in וַתְּשִׂמֵם and עֲלֵיהֶם, since the construction of these abstracts as numerical plurals is one of the peculiarities of the E-document of the Hexateuch; cf. Gn 20[13], 35[7], and § 145 *i*.

[2] On אֲדֹנָי (for אֲדֹנָי) as a name of God, cf. § 135 *q*.

[3] Euting, *Reise in Arabien*, p. 61, mentions the interesting fact that the subjects of the Emir of Hâyel commonly speak of their ruler as *šiyûkh*, a plur. majestatis = *the great sheikh*.

[4] בַּעֲלַיִךְ, which in Is 54[5] is in parallelism with עֹשַׂיִךְ, must then be explained as merely formed on analogy.

l Rem. 1. (*a*) Coherent substances, &c., are mostly regarded as *single*, and are, accordingly, almost always represented by nouns in the singular, cf. אָבָק *fine dust*, אֵפֶר *ashes*, בַּד *linen*, בְּדִיל *lead*, זָהָב *gold*, כֶּסֶף *silver*, נְחֹשֶׁת *brass*, חָלָב *milk*, יַיִן *wine*, עָפָר *dust, the ground*, עֵץ *wood*. Plurals are, however, formed from some of these words expressing materials in order to denote separate portions taken from the whole in manufacture (*plurals of the result*) or parts otherwise detached from it; thus, בַּדִּים *linen garments*; כְּסָפִים *silver pieces*, Gn 42[25.35]; נְחֻשְׁתַּיִם (dual) *fetters of brass*; עֲצִים *ligna* (*timber* for building or *sticks* for burning); also in a wider sense, בְּדִילִים particles of *alloy* to be separated by smelting, Is 1[25]; עֲפָרוֹת *fragments of earth*, Pr 8[26], cf. Jb 28[6] עַפְרוֹת זָהָב *dust of gold*.

m (*b*) To the class of *plurals of the result* belong also a few names of natural products, when represented in an artificial condition; thus, חִטִּים *wheat* in grain (threshed wheat), as distinguished from חִטָּה *wheat* (used collectively) in the ear; cf. the same distinction between כִּסֻּמִים and כֻּסֶּמֶת *spelt*; עֲדָשִׁים and עֲדָשָׁה (the singular preserved only in the Mishna) *lentils*; שְׂעֹרִים and שְׂעֹרָה *barley*; also פִּשְׁתִּים *linen*, פִּשְׁתָּן (to be inferred from פִּשְׁתֵּי) *flax*.

n (*c*) Finally, the distinction between דָּם *blood* and דָּמִים requires to be specially noticed. The singular is always used when the blood is regarded as an organic unity, hence also of menstrual blood, and the blood of sacrifices (collected in the basin and then sprinkled), and in Nu 23[24] of the blood gushing from wounds. On the other hand, דָּמִים as a sort of plural of the result and at the same time of local extension, denotes *blood which is shed*, when it appears as blood-stains (Is 1[15]) or as blood-marks (so evidently in Is 9[4]). But since blood-stains or blood-marks, as a rule, suggest blood shed in murder (although דָּמִים also denotes the blood which flows at childbirth or in circumcision), דָּמִים acquired (even in very early passages) simply the sense of a *bloody deed*, and especially of *bloodguiltiness*, Ex 22[1f.], &c.

o In some few cases the plural is used to denote an indefinite singular; certainly so in Dt 17[5] אֶל־שְׁעָרֶיךָ *unto* one of *thy gates*; Zc 9[9] בֶּן־אֲתֹנוֹת (cf. Ct 2[9]); Ex 21[22] יְלָדֶיהָ (where evidently only *one* child is thought of, though certainly in connexion with a contingency which may be repeated); cf. also Ec 4[10] (*if one of them fall*).—So probably also Gn 8[4], 1 S 17[43], Dn 2[1], Neh 3[8], 6[2]; but *not* Gn 19[29], since the same document (Gn 13[12]) makes Lot dwell *in the cities* of the Jordan valley; in Gn 21[7] בָּנִים denotes the class with which the action is concerned. In Ju 12[7] instead of the unusual בְּעָרֵי גִלְעָד *in the cities of Gilead* (formerly explained here as *in one of the cities of Gilead*) we should most probably read, with Moore (*SBOT.* Judges, p. 52), בְּעִירוֹ בְּמִצְפֵּה גִלְעָד *in his city, in Mizpeh* (in) *Gilead*.

p **2.** When a substantive is followed by a genitive, and the compound idea thus formed is to be expressed in the plural, this is done—

(*a*) Most naturally by using the plural of the *nomen regens*, e. g. גִּבּוֹרֵי חַיִל *mighty men of valour* (prop. heroes of strength), 1 Ch 7[2.9]; so also in compounds, e. g. בְּנֵי יְמִינִי 1 S 22[7], as the plur. of בֶּן־יְמִינִי *Benjamite*; but also

q (*b*) By using the plural of *both* nouns,[1] e. g. גִּבּוֹרֵי חֲיָלִים 1 Ch 7[5];

[1] Cf. König, *Lehrgebäude*, ii. 438 f., according to whom the plural of the principal word exercises an influence on the determining genitive.

וּבְבָתֵּי כְלָאִים *and in prison houses*, Is 42[22]; cf. Ex 34[1], &c., שְׁנֵי־לֻחוֹת אֲבָנִים *two tables of stone* (but Ex 31[18] לֻחֹת אֶבֶן); Nu 13[32], Dt 1[28], Jos 5[2], 6[4], 2 K 14[14], 25[23], Is 51[9], Jer 41[16], Ezr 3[3], &c. עַמֵּי הָאֲרָצוֹת *the people of the country*; 2 Ch 26[14]; so perhaps בְּנֵי אֵלִים *sons of God*, ψ 29[1], 89[7] (according to others *sons of gods*); or finally even

(*c*) By using the plural of the *nomen rectum*;[1] e. g. בֵּית אָבוֹת Ex 6[14], *r* Nu 1[2.4 ff.], &c., as plur. of בֵּית אָב *father's house, family*; בֵּית הַבָּמוֹת *the houses of the high places*, 2 K 17[29] (also בָּתֵּי הַבָּמוֹת 23[19]); בֵּית עַצַּבֵּיהֶם *the houses of their idols*, 1 S 31[9], Ez 46[24]; cf. also Ju 7[25] *the head of Oreb and Zeeb*, i. e. the heads, &c.

Rem. When a substantive (in a distributive sense) with a suffix refers *s* back to a plural, the singular form of the substantive suffices, since the idea of plurality is already adequately expressed by the suffix, e. g. פִּימוֹ *os* (for *ora*) *eorum*, ψ 17[10]; יְמִינָם *their right hand*, ψ 144[8] [so in the English RV.], for *hands*.

§ 125. *Determination of Nouns in general. Determination of Proper Names.*

Brockelmann, *Grundriss*, i. 466 ff.

1. A noun may either be determinate in itself, as a proper name *a* or pronoun (see below, *d* and *i*), or be made so by its context. In the latter case, the determination may be effected either by prefixing the article (see § 126), or by the connexion of the noun (in the construct state) with a following determinate genitive, and consequently also (according to § 33 *c*) by its union with a pronominal suffix (§ 127 *a*). It is to be taken as a fundamental rule, that the determination can only be effected in *one* of the ways here mentioned; the article cannot be prefixed to a proper name, nor to a noun followed by the genitive, nor can a proper name be used in the construct state. Deviations from this rule are either only apparent or have arisen from a corruption of the text.

Rem. Only in a few passages is a noun made expressly *indeterminate* by the *b* addition of אֶחָד in the sense of our indefinite article; cf. Ex 16[33], Ju 9[53], 13[2], 1 S 1[1], 7[9.12], 1 K 13[11], 19[4], 20[13], 22[9], 2 K 4[1], 8[6], 12[10], Ez 8[8], Dn 8[3], 10[5] (in 8[13] אֶחָד קָדוֹשׁ i. e. *one*, viz. *a holy one*, is opposed to another).

It is further to be noticed, that in Hebrew the phenomenon sometimes *c* occurs, which the Arab grammarians call *indeterminateness for the sake of amplification*; e. g. Is 31[8] *and he shall flee* מִפְּנֵי־חֶרֶב *from a sword*, i. e. *from an irresistible sword* (God's sword); cf. Is 28[2] בְּיָד; 2 S 6[2] שֵׁם; Ho 3[1] אִשָּׁה *such a woman*, without doubt to be referred to the Gomer mentioned in cap. 1;

[1] Cf. Brockelmann, *Grundriss*, i. 482.

Am 6^{14} גּוֹי ; ψ 7^{16} בְּזֹרַע ; Pr 21^{12} צַדִּיק, if with Delitzsch it is to be referred to God ; Jb 8^{10} מִלִּים meaning *important words*, but in 15^{13} מִלִּין *reproachful words*. Cf. on this point, § 117 *q*, note 3, and Delitzsch, *Psalmen*, ed. 4, p. 79.

d **2.** Real *proper nouns*, as being the names of things (or persons) only *once* met with, are sufficiently determinate in themselves. Such names, therefore, as יהוה, דָּוִד, יַעֲקֹב, כְּנַעַן, סְדֹם, do not admit of the article,[1] nor can they be in the construct state. On the other hand, not only *gentilic* names (as denoting the *various* individuals belonging to the same class), but also all those proper names, of which the appellative sense is still sufficiently evident to the mind, or at least has been handed down from an earlier period of the language, frequently (often even as a rule) take the article (according to § 126 *e*), and may even be followed by a genitive.

e Examples. Like the above-mentioned proper names of individuals, countries, and cities, so also national names, which are identical in form with the name of the founder of the race (e.g. מוֹאָב, אֱדֹם, יִשְׂרָאֵל), are always determinate in themselves. Of gentilic names (e.g. הָעִבְרִי *the Hebrew*, הָעִבְרִים *the Hebrews*, Gn 40^{15} ; הַכְּנַעֲנִי *the Canaanite*) the plural פְּלִשְׁתִּים, even when meaning *the* Philistines, is generally used without the article (but in 1 S 4^{7}, &c., פְּלִשְׁתִּים) ; so always כַּפְתֹּרִים.—Evident appellatives (like such modern names as *the Hague*, *le Havre*) are הַגִּבְעָה *the hill*, in the construct state גִּבְעַת שָׁאוּל, i. e. *the Gibeah named after Saul* to distinguish it from others ; הָרָמָה *the height* ; הָעַי *the heap* ; הַלְּבָנוֹן (prop. *the white mountain*) *the Lebanon* ; הַיְאֹר (prop. *the river*) *the Nile*, cf. Am 8^{8} כִּיאוֹר מִצְרַיִם *like the river of Egypt* ; הַיַּרְדֵּן *the Jordan* (according to Seybold, *Mittheil. und Nachr. des DPV.*, 1896, p. 11, probably *the drinking-place* [ירד, Arab. *warada*, meaning orig. *to go down to drink*]).

f Rem. 1. In a few instances original appellatives have completely assumed the character of real proper names, and are therefore used without the article ; thus אֱלֹהִים *God*, to denote the one true God (as elsewhere יהוה) Gn 1^{1} and so generally in this document of the Pentateuch up to Ex 6, elsewhere sometimes ὁ θεός (cf. § 126 *e*) ; also the sing. אֱלוֹהַּ *God*, עֶלְיוֹן *the Most High*, and שַׁדַּי *the Almighty* never take the article.—Moreover, אָדָם *Adam* from Gn 5^{1} onwards (previously in 2^{7}, &c., הָאָדָם *the first man*) ; שָׂטָן *Satan*, 1 Ch 21^{1} (but Zc 3^{1}, Jb 1^{6}, &c., הַשָּׂטָן *the adversary*) ; cf. אֹהֶל מוֹעֵד *the tent of revelation* (i. e. the tabernacle), always without the article.

g To the class of nouns originally appellative, which the language regards

---

[1] Consequently, הַמְנַשֶּׁה Dt 3^{13}, Jos 1^{12}, &c. (in the Deuteronomist) in the combination שֵׁבֶט הַמְנַשֶּׁה (for which elsewhere שֵׁבֶט מְנַשֶּׁה) is to be regarded *not* as a proper name but as a gentilic name (= *the tribe of the Manassites*), for which in Dt 29^{7} שׁ֫ הַמְנַשִּׁי is used, as in 10^{8} שׁ֫ הַלֵּוִי *the tribe of the Levites*, and in Ju 18^{1} שׁ֫ הַדָּנִי *the tribe of the Danites*.—In Jos 13^{7} הַמְנַשֶּׁה (like gentilic names in י֫) is even used adjectivally.

as proper names, and which consequently never take the article, belong also certain archaic words mostly used only by poets, such as שְׁאוֹל *Hades*, תֵּבֵל *world*, תְּהוֹם *ocean*, of the body of water which encircles the earth, Gn 1[2], &c.: but Is 63[13], ψ 106[9] בַּתְּהֹמוֹת *through the depths*, viz. of the Red Sea.[1]

h 2. When nouns which the usage of the language always treats as proper names occasionally appear to be connected with a following genitive, this is really owing to an ellipse whereby the noun which really governs the genitive, i. e. the appellative idea contained in the proper name, is suppressed. So evidently in the case of יְהוָה צְבָאוֹת *Yahweh* (the God) *of hosts*; the fuller form יהוה אֱלֹהֵי הַצְּבָאוֹת 2 S 5[10], &c., or יהוה אֱלֹהֵי צְבָאוֹת Am 3[13], &c., is a secondary expansion of the original אֱלֹהִים צְבָאוֹת; יְהוָה צְבָאוֹת in ψ 59[6], 80[15.20], 84[9] is due to the mechanical substitution of אֱלֹהִים for יהוה affected in the 2nd and part of the 3rd book of the Psalms. So also in geographical names such as אוּר בַּשְׂדִּים *Ur* (the city) *of the Chaldees*, Gn 11[28]; אֲרַם נַהֲרַיִם *Aram* (the region) *of the two rivers*; בֵּית לֶחֶם יְהוּדָה *Bethlehem* (the city) *of Judah*; אָבֵל בֵּית מַעֲכָה 2 S 20[14], &c., to distinguish it from אָבֵל מַיִם *Abel by the water*, 2 Ch 16[4]; יַעְיְרֵי קִרְיָת 1 S 11[1], &c.; יַרְדֵּן יְרֵחוֹ Nu 22[1], 26[3.63], &c.; on Ju 8[32] cf. § 128 *c*; צִיּוֹן קְדוֹשׁ יִשְׂרָאֵל *the Zion of the Holy One of Israel*, Is 60[14]; but in 1 S 1[1] for צוֹפִים read צוּפִי *a Zuphite*. Some of these examples (cf. also Am 6[2]) come very near to the actual construct state (cf. above, גִּבְעַת שָׁאוּל), since e.g. the addition of the genitive serves to distinguish the place from four others called Aram (see the Lexicon), or from another Bethlehem. Aram, Bethlehem, &c., are accordingly no longer names found only in one special sense, and therefore also are no longer proper names in the strictest sense.

i **3.** Of the pronouns, the personal pronouns proper (the separate pronouns, § 32) are always determinate in themselves, since they can denote only definite individuals (the 3rd person, also definite things). For the same reason the demonstrative pronouns (§ 34) are also determinate in themselves, when they stand *alone* (as equivalent to substantives), either as subject (Gn 5[29]) or as predicate (e. g. זֶה הַיּוֹם *this is the day*, Ju 4[14]; אֵלֶּה הַדְּבָרִים *these are the words*, Dt 1[1]), or as object (e. g. אֶת־זֹאת 2 S 13[17]), or as genitive (מְחִיר זֶה 1 K 21[2]), or finally when joined to a preposition (לְזֹאת Gn 2[23]; בָּזֶה 1 S 16[8], see § 102 *g*).

k So also the personal pronouns הוּא, הִיא, הֵם, הֵמָּה, הֵנָּה when they are used as demonstratives (=*is, ea, id, ille*, &c.) are always determinate in themselves, e. g. הוּא הַדָּבָר *that is the thing*, Gn 41[28]. They

[1] That various other words, such as אֱנוֹשׁ *man*, צַלְמָוֶת *deep darkness*, רוֹזֵן *prince*, שָׂדַי *field*, תּוּשִׁיָּה *effectual working*, are always found without the article is not to be attributed to any special archaism, but is to be explained from the fact that they belong solely to poetic language, which avoids the article; in other cases, such as תַּרְדֵּמָה *deep sleep*, there is no occasion for the article in the passages we possess.

are made determinate by the article, when they are joined like adjectives (see § 126 *u*) with a determinate substantive, e. g. הָאִישׁ הַזֶּה *this man*; הָאֲנָשִׁים הָאֵלֶּה *these men*; בַּיָּמִים הָהֵמָּה וּבָעֵת הַהִיא *in those days, and in that time*, Jo 4[1]. The demonstrative, however, even in this case, is frequently used *without* the article, as being sufficiently determinate in itself (cf. § 126 *y*).

§ 126. *Determination by Means of the Article.*

a **1.** The article (הַ, הָ, הֶ, § 35) was originally, as in other languages (clearly in the Romance; cf. also ὁ, ἡ, τό in Homer), a demonstrative pronoun. The demonstrative force of the article, apart from its occasional use as a relative pronoun (see § 138 *i*), appears now, however, only (*a*) in a few standing phrases, and (*b*) in a certain class of statements or exclamations.

b (*a*) Cf. הַיּוֹם *this day, hodie* (§ 100 *c*); הַלַּיְלָה *this night*, Gn 19[34]; הַפַּעַם *this time*, Gn 2[23]; הַשָּׁנָה *this year* (= in this year) Is 37[30], Jer 28[16].

(*b*) includes those instances in which the article, mostly when prefixed to a participle, joins on a new statement concerning a preceding noun. Although such participles, &c., are no doubt primarily regarded always as in apposition to a preceding substantive, the article nevertheless has in some of these examples almost the force of הוּא (הָיָה, הֶיְתָה) as the subject of a noun-clause; e. g. ψ 19[10] *the judgements of the Lord are true . . .*, verse 11 הַנֶּחֱמָדִים וגו׳ prop. *the more to be desired than gold*, i. e. *they are more to be desired*, or *even they, that are more to be desired*,[1] &c.; cf. Gn 49[21], Is 40[22 f.], 44[27 f.], 46[6], Am 2[7], 5[7], ψ 33[15], 49[7] (הַבֹּטְחִים in the parallel half of the verse continued by a finite verb); ψ 104[3], Jb 6[16], 28[4], 30[8], 41[25] and frequently. When such a participle has another co-ordinate with it, the latter is used *without* the article, since according to the above it strictly speaking represents a second predicate, and as such, according to *i*, remains indeterminate; e. g. Jb 5[10] *who giveth* (הַנֹּתֵן) *rain*, &c., *and sendeth* (וְשֹׁלֵחַ), &c.

c The article is sometimes used with similar emphasis before a substantive, which serves as the subject of a compound sentence (§ 140 *d*); e. g. Dt 32[4] הַצּוּר תָּמִים פָּעֳלוֹ i. e. as a fresh statement (not in apposition to the preceding dative), really equivalent to *he is a rock, perfect in his work* (i. e. *whose work is perfect*); cf. ψ 18[31].

d **2.** The article is, generally speaking, employed to determine a substantive wherever it is required by Greek and English; thus:

(*a*) When a person or thing already spoken of is mentioned again, and is consequently more definite to the mind of the hearer or reader; e. g. Gn 1[3] *and God said, Let there be light*: verse 4 *and God saw the light* (אֶת־הָאוֹר); 1 K 3[24] *fetch me a sword: and they brought the sword*; Ec 9[15]. (In 2 S 12[2] therefore לָעָשִׁיר must be read.)

---

[1] On the analogous use of the article before participles which have a verbal suffix, as in ψ 18[33], &c., cf. above, § 116 *f*.

(*b*) With a title understood and recognized by every one, e. g. הַמֶּלֶךְ שְׁלֹמֹה ὁ βασιλεὺς Σαλωμών: Gn 35[8] *under the oak* (the well-known oak which was there).

(*c*) With appellatives to denote persons or natural objects which are unique, e. g. הַכֹּהֵן הַגָּדוֹל *the high priest*, הַשֶּׁמֶשׁ *the sun*, הָאָרֶץ *the earth*.

(*d*) When terms applying to whole classes are restricted (simply by usage) to particular individuals (like ὁ ποιητής, meaning Homer) or things, e. g. הַשָּׂטָן *adversary*, הַשָּׂטָן *the adversary, Satan*; בַּעַל *lord*, הַבַּעַל *Baal* as proper name of the god; הָאָדָם *the* (first) *man, Adam*; הָאֱלֹהִים[1] or הָאֵל ὁ θεός, *the one true God* (cf. also ὁ Χριστός in the New Testament); also הַנָּהָר *the river*, i. e. *Euphrates*; הַכִּכָּר *the circle*, sc. of the Jordan, *the Jordan plain* [Gn 19[17], &c.]. *c*

(*e*) Very often with the vocative, e. g. 2 S 14[4] הוֹשִׁיעָה הַמֶּלֶךְ *help, O king*; Zc 3[8] יְהוֹשֻׁעַ הַכֹּהֵן הַגָּדוֹל *O Joshua the high priest*; 1 S 17[58], 24[9], 2 K 9[5]; in the plural, Is 42[18], Jo 1[2.13]; but cf. also Jos 10[12], Is 1[2], 49[13] (שָׁמַיִם and אֶרֶץ); 23[16], Ho 13[14], Jo 1[5], ψ 34[12], Ec 10[17], 11[9], &c.[2] The vocative occurs *without* the article in Is 22[2], since it has been already defined by a preceding accusative.

Rem. Strictly speaking in all these cases the substantive with the article is really in apposition to the personal pronoun of the 2nd person, which is either expressly mentioned or virtually present (in the imperative), e. g. 1 S 17[58] *thou, the young man*. But such passages as Is 42[18], where the vocative precedes the imperative, prove that in such cases the substantive originally in apposition eventually acquired the value of a complete clause. *f*

(*f*) With words denoting classes (see particulars under *l*). *g*

(*g*) In a peculiar way, to specify persons or things, which are so far definite as to be naturally thought of in connexion with a given case, and must be assumed accordingly to be there (see *q–s*).

(*h*) With adjectives (also ordinal numbers and demonstrative pronouns used adjectivally) which are joined to substantives determined in some way (see *u*).

Rem. The article may be omitted in *poetry* in all the above-mentioned cases; in general it is used in poetry far less frequently than in prose. Its use or omission probably often rests on rhythmical grounds;[3] it is sometimes omitted also for rhetorical reasons. Cf. e. g. אֶרֶץ for הָאָרֶץ ψ 2[2]; מְלָכִים as vocative, verse 10; מֶלֶךְ for הַמֶּלֶךְ 21[2]; שִׁמְךָ גָּדוֹל וְנוֹרָא (contrary to *u*, *v*) 99[3]. In the instances in which the ה of the article is omitted after a prefix (§ 35 *n*), the vowel of the article is often retained after the prefix even in poetry, e. g. בַּשָּׁמַיִם ψ 2[4], &c. *h*

[1] On the subsequent change of שָׂטָן, אָדָם, אֱלֹהִים into real proper names by the omission of the article, cf. above, § 125 *f*.

[2] For further exceptions see Nestle, *ZAW.* 1904, p. 323 ff.

[3] Cf. the useful statistics of J. Ley in the *Neue Jahrbücher für Philologie und Pädagogik*, 2te Abteilung, 1891, Heft 7–9, and M. Lambert, 'L'article dans la poésie hébr.,' *REJ.* 37, 263 ff.

i (*i*) On the other hand, the article is always omitted when a person or thing is to be represented as indefinite (or indefinable) or as yet unknown; consequently also before the predicate, since this is from its nature always a general term, under which the subject is included, e.g. Gn 29^{7} עוֹד הַיּוֹם גָּדוֹל *as yet the day is great*, i.e. it is yet high day; 33^{13}, 40^{18}, 41^{26}, Is 66^{3}.

k Rem. 1. As exceptions to the above rule it is usual to regard those examples in which a determinate adjective or participle (equivalent to a relative clause) is used apparently as a predicate, e.g. Gn 2^{11} הוּא הַסֹּבֵב *it is the compassing*, i. e. *that is it which compasseth*; 4^{26}, 45^{12}, Ex 9^{27}, Dt 3^{21}, 8^{18}, 11^{7}, 1 S 4^{16}, Is 14^{27}, Mal 3^{2} (cf. in Greek, e. g. St. Mat. 10^{20}, where Winer, *Gram. des neutest. Sprachidioms*, § 58, 2, Rem., explains *οἱ λαλοῦντες* as a predicate with the article). In reality, however, these supposed predicates are rather subjects (acc. to § 116 *q*), and the only peculiarity of these cases is that the subject is not included under a general idea, but is equated with the predicate.

2. Sometimes the article is used with only one of two parallel words, as Na 1^{5} הָרִים and הַגְּבָעוֹת, 2 Ch 3^{17} יְמִין and הַשְּׂמֹאול.

l 3. The use of the article to determine the *class* is more extensive in Hebrew than in most other languages. In this case the article indicates universally known, closely circumscribed, and therefore well defined classes of persons or things. The special cases to be considered are—

m (*a*) The employment of general names as collectives in the singular, to denote the *sum total* of individuals belonging to the class (which may, however, be done just as well by the plural); e. g. *the righteous*, *the wicked man*, Ec 3^{17}; *the woman*, i.e. *the female sex*, 7^{26}; הָאֹיֵב *th. enemy*, i. e. *the enemies* (?) ψ 9^{7}; הָאֹרֵב *the lier in wait*, i.e. *the liers in wait*; הֶחָלוּץ *the armed man*, i.e. *soldiers*; הַמְאַסֵּף *the rearguard*; הַמַּשְׁחִית *the spoiler*, 1 S 13^{17};[1] so also (as in English) with names of animals, when something is asserted of them, which applies to the whole species, e. g. 2 S 17^{10} *as the courage of* הָאֲרִיֵה *the lion*. Especially also with gentilic names, e. g. *the Canaanite*, Gn 13^{7} (cf. 15$^{19\,f.}$); so in English *the Russian*, *the Turk*, &c., in Attic writers *ὁ Ἀθηναῖος*, *ὁ Συρακόσιος*, &c.

n (*b*) Names of materials known everywhere, the elements and other words denoting classes, even though only a part and not the whole of them is considered, in which case in other languages, as e. g. in English, the article is usually omitted (cf., however, our *to fall into the water*, *into the fire*, &c.), e. g. Gn 13^{2} *and Abram was very rich* בַּמִּקְנֶה בְּכֶסֶף וּבְזָהָב *in cattle, in silver and in gold*; Jos 11^{9} *and he burnt their chariots* בָּאֵשׁ *with fire*; cf. Gn 6^{14}, 41^{42} (unless this means, *the chain* necessarily belonging to the official dress); Ex 2^{3}, 31^{4} (35^{32}), Is 1^{22}, &c, and בַּשֶּׁמֶן *with oil*[2] very commonly in the sacrificial laws, Ex 29^{2},

---

[1] But in Ex 12^{23} המ׳ is either to be explained as *the destroyer* (now mentioned for the first time) according to *q*, or a particular angel is meant whose regular function it was to inflict punishments. Others again take המ׳ even in Ex 12^{23} impersonally = *destruction*.

[2] In nearly all the above examples the presence of the article is only indicated by the vowel of the prefix (בַּ, בַּ, לַ) and might therefore be merely

&c., and also Dt 33^{24}, 2 S 1^{21}, Is 1^{6}, ψ 23^{5}, &c. Similarly the article is used with terms of measurement, as הָאֵפָה Ex 16^{36}, &c.: הַחֹמֶר and הַבַּת Ez 45^{11}; הָעֹמֶר Ex 16^{22}; בַּהֲבֶל 2 S 8^{2}.

(*c*) The expression of abstract ideas of every kind, since they are likewise used to represent whole classes of attributes or states, physical or moral defects, &c.; e.g. Pr 25^{5} (בְּצֶדֶק); Gn 19^{11} *and they smote the men* . . . בַּסַּנְוֵרִים *with blindness*; Am 4^{9}, &c.; but in הַחֹשֶׁךְ Is 60^{2} the article is no doubt due to dittography of the ה, and the parallel וַעֲרָפֶל has no article.

(*d*) *Comparisons*, since the object compared is treated not (as usually in English) individually but as a general term, e. g. Is 1^{18} *white* כַּשֶּׁלֶג *as snow*, כַּצֶּמֶר *as wool*; *red* כַּתּוֹלָע *like crimson*; Is 34^{4} *and the heavens shall be rolled together* כַּסֵּפֶר *as a scroll*; cf. Nu 11^{12}, Ju 8^{18}, 16^{9} *as* פְּתִיל־הַנְּעֹרֶת *a string of tow is broken*; 1 S 26^{20}, 1 K 14^{15}, Is 10^{14}, 24^{20}, 27^{10}, 29^{8}, 53^{6}, Na 3^{15}, ψ 33^{7}, 49^{15}; cf. also such examples as Gn 19^{28}, Ju 14^{6}, where the object compared is determined by a determinate genitive which follows (according to § 127 *a*). *o*

Examples of indeterminate comparisons are rare, and perhaps due only to the Masora,—so at least in the case of singulars, while in such plurals as those in Gn 42^{30}, 1 K 10^{27}, Jo $2^{4.7}$, the omission of the article may be explained by the ordinary rules. On the other hand, the article is regularly omitted when the object compared is already defined by means of an attribute (or relative clause, Jer 23^{9}, ψ 17^{12}), e. g. Is 16^{2} כְּעוֹף נוֹדֵד קֵן מְשֻׁלָּח *as wandering birds*, (as) *a scattered nest* (but cf. 10^{14} כְּקֵן); 14^{19}, 29^{5} כְּמוֹ עָבָר (but ψ 1^{4} כַּמֹּץ); Jer 2^{30}, Pr 27^{8}, Jb 29^{25}, 30^{14}.—In comparisons with persons also the Masora seems to avoid the use of the article, as in בְּגִבּוֹר Jb 16^{14} and seven other places (כַּגִּבּוֹר only in Is 42^{13}), כְּאָב Jb 31^{18}, כְּגֶבֶר Jb 38^{3}, 40^{7}. *p*

4. Peculiar to Hebrew[1] is the employment of the article to denote a single person or thing (primarily one which is as yet unknown, and therefore not capable of being defined) as being present to the mind under given circumstances. In such cases in English the indefinite article is mostly used. *q*

Thus Am 5^{19} *as if a man did flee from a lion* (הָאַרְיֵה, i.e. the particular lion pursuing him at the time), *and a bear* (הַדֹּב) *met him*, &c., cf. 3^{12}, 1 K 20^{36} (John 10^{12}); also Gn $8^{7f.}$, 14^{13} (הַפָּלִיט, i. e. *one that had escaped*, the particular one who came just then; so also Ez 24^{26}, 33^{21}; cf. 2 S 15^{13}); Gn $15^{1\,11}$, 18^{7} *the servant*, who is regarded as being constantly at hand and awaiting his commands; cf. 2 S 17^{17} (but הַנַּעַר Nu 11^{27} is used like הַפָּלִיט above); Gn 19^{30}, unless בַּמְּעָרָה means in *the* well-known *cave*; בַּמָּקוֹם Gn 28^{11}, according to Dillmann, upon *the* place suitable for passing the night, or the right place, but it may possibly also refer to *the* sanctuary of Bethel afterwards so sacred and celebrated; Gn 42^{23}, 46^{2}, 50^{26}, Ex 2^{15}, 3^{2}, 4^{20}, 21^{20} (2 S 23^{21}), Lv 23^{42}, 24^{10} (Samaritan יִשְׂרְאֵלִי without the article); Nu 17^{11}, $21^{6.9}$, 25^{6}, Dt 19^{5}, Jos 2^{15}, Ju 4^{18}, 8^{25}, 13^{19}, 16^{19}, 19^{29}, 20^{16}, 1 S 17^{34}, 19^{13}, 21^{10}, 2 S 17^{17}, 1 K 6^{8}, 13^{14} (? most *r*

due to the masoretic punctuation. There is, however, no reason to doubt the correctness of the tradition. The same is true of the examples under *n* and *o*.

[1] Cf., however, analogous examples in biblical Aramaic in Kautzsch's *Gramm. des Bibl. Aram.*, § 79 *f*, e. g. Dn 2^{14}, 3^{2}, &c.

probably a particular tree is meant); 19[9], Is 7[14] (הָעַלְמָה, i.e. *the* particular *maiden*, through whom the prophet's announcement shall be fulfilled; we should say *a maiden* [cf. Driver on 1 S 1[4], 6[8], 19[13]]; Jb 9[31].

s So always *to write in the book* (or *on the scroll*, Nu 5[23], Jer 32[10]), i.e. not in *the* book already in use, but in the book which is to be devoted to that purpose, equivalent to *in a book, on a scroll*, Ex 17[14], 1 S 10[25], Jb 19[23]. Especially instructive for this use of the article is the phrase וַיְהִי הַיּוֹם, which does not simply refer back to the previous narrative in the sense of *the same day*, but is used exactly like our *one day* (properly meaning on the particular day when it happened, i.e. *on a certain day*), 1 S 1[4], 14[1], 2 K 4[8], 11[18], Jb 1[6.13]. In Gn 39[11] even כְּהַיּוֹם הַזֶּה.

t The article is sometimes used in this way before collectives in the singular, which are not meant to denote (like the examples given under *l*) a whole class, but only that part of it which applies to the given case; thus הָעֹרֵב, הַיּוֹנָה Gn 8[7], הַצְּרָעָה Ex 23[28].

u **5.** When a substantive is defined by the article, or by a suffix, or by a following genitive determinate in any way (see the examples below), the attribute belonging to it (whether adjective, participle, ordinal, or demonstrative pronoun) necessarily takes the article (see, however, the Rem.), e.g. Gn 10[12] הָעִיר הַגְּדֹלָה *the great city*; Dt 3[24] יָדְךָ הַחֲזָקָה *thy strong hand*. A genitive following the substantive may, according to § 127 *a*, be determined either by the article, e.g. 1 S 25[25] אִישׁ הַבְּלִיַּעַל הַזֶּה *this worthless man* (prop. *man of worthlessness*; cf. also such examples as 2 Ch 36[18], where the article is prefixed only to a second genitive following the noun); or as a proper name, e.g. Dt 11[7] מַעֲשֵׂה יְהוָה הַגָּדֹל *the great work of the Lord*; or by a suffix, e.g. Is 36[9] עַבְדֵי אֲדֹנִי הַקְּטַנִּים *the least of my master's servants*.

v When several attributes (whether connected by *Wāw* or not) follow a determinate substantive, each of them takes the article, e.g. Dt 10[17] הָאֵל הַגָּדֹל הַגִּבֹּר וְהַנּוֹרָא *the great God, the mighty, and the terrible*. Cf. also Ex 3[3], Dt 1[19], in both of which places a demonstrative with the article also follows the adjective.[1]

Rem. 1. The article is, however, not infrequently used also—

w (*a*) With the attribute alone, when it is added to an originally indefinite substantive as a subsequent limitation; so always with ordinal numbers after יוֹם,[2] e.g. Gn 1[31] (cf. 2[3], Ex 20[10], &c.) יוֹם הַשִּׁשִּׁי *the sixth day* (prop. *a day* namely

---

[1] The demonstrative used adjectivally is generally placed *after* the adjective proper; in such cases as עַמְּךָ הַזֶּה הַגָּדוֹל 2 Ch 1[10] the adjective forms a further (fresh) addition to עַמְּךָ הַזֶּה.

[2] Cf. Driver, *Tenses*, 3rd ed., § 209; M. Lambert, *REJ.* 31, 279 f.—The omission of the article from the substantive is not to be regarded in *this* instance as an indication of late style, and consequently cannot be put forward as a proof of the late origin of the 'Priestly Code' (cf. Dillmann on Gn 1[31], Holzinger, *Einl. in d. Hexateuch*, p. 465, and especially Driver in the *Journal of Philology*, xi. 229 f., against Giesebrecht in *ZAW.* 1881, p. 265 f.). On the other hand, the common omission of the article from the substantive before a determinate adjective (e.g. כְּנֶסֶת הַגְּדוֹלָה *the great synagogue*, in the Mishna; cf. Segal, *Mišnaic Hebrew*, p. 19 ff.) is certainly a later idiom.

the sixth; but יוֹם שֵׁנִי *a second day*, Gn 1[8]); Ex 12[15] מִיּוֹם הָרִאשׁוֹן *from the first day onward* (not before Dn 10[12] and Neh 8[18] is מִן־הַיּוֹם הָרִאשׁוֹן used instead of it). On the other hand, the article is *always* found after בְּ, hence בַּיּוֹם הַשִּׁשִּׁי, &c., although it is possible that the original reading in these cases was בְּיוֹם, and that the article is only due to the Masora. In Ju 6[25] the text is evidently corrupt (see verse 26).—Especially also in certain frequently recurring combinations as in particularizing the gates in Jer 38[14], Ez 9[2], &c., Zc 14[10], and courts in 1 K 7[8.12], &c., Ez 40[28]; and very often when the attribute consists of a participle, e.g. Dt 2[23], Ju 21[19], 1 S 25[10], Jer 27[3], 46[16] חֶרֶב הַיּוֹנָה *the sword which oppresses (?)*; Ez 14[22], Zc 11[2] *Keth.* (*the impenetrable forest?*) Pr 26[18], ψ 119[21].

Of the other examples, Gn 21[29] (where, however, the Samaritan reads הכבשות), 41[26] (but cf. verse 4), Nu 11[25], Ju 16[27], 1 S 17[17] may at any rate be explained on the ground that the preceding cardinal number is equivalent to a determinant; in Gn 1[21], 28[9.10], &c., the substantive is already determined by כָּל־, and in 1 S 14[29] (דְּבַשׁ) by מְעַט.—In 1 S 12[23], 2 S 12[4], Is 7[20] (where, however, הַשְּׂכִירָה might also be understood as a subsequent explanation of בְּתַעַר) and Neh 9[36], the omission of the article after the preposition is certainly due merely to the Masora. In 1 S 16[23] (unless רוּחַ אֱלֹהִים is to be read twice), Zc 4[7] (where however אַתְּ הָהָר is probably meant), ψ 104[18] (where a ה precedes הָרִים, hence probably a case of haplography), the omission of the article before א, ר (?) and ה may be due to a regard for euphony (see *z* below). On the other hand, in 1 S 6[18] (read הָאֶבֶן הַגְּ), 17[12] (הַזֶּה is a later addition), 19[22] (cf. the LXX), Jer 17[2], 32[14], 40[3] *Keth.*, Ez 2[3] (read גּוֹי or omit גּוֹיִם with Cornill), Mi 7[11], ψ 62[4], either the text is corrupt, or the expression incorrect. But in 2 K 20[13], Jer 6[20], Ct 7[10] acc. to D. H. Müller (*Anzeiger der Wiener Akad.*, phil-hist. Kl. 1902, no. x) הַטּוֹב is the genitive of a substantive, *aromatic oil, sweet cane* (in Jer 6[20] read וְקָנֶה), *like spiced wine*. In Is 39[2] read בְּשֶׂמֶן הַטּ֫ and in ψ 133[2] הַטּ֫.

x

(*b*) *No* article with the attribute, while the substantive is determined either by the article, or a suffix, or a following genitive. Thus the article is sometimes omitted with demonstratives, since they are already to a certain extent determined by their meaning (cf. also the Mēša' inscription, l. 3, הבמת זאת *this high place*); as with הוּא Gn 19[33] (evidently for euphony, and so probably often); 30[16], 32[23], 1 S 19[10]; with הִיא Gn 38[21]; with זוּ ψ 12[8] (according to the Masora זוּ is a relative pronoun here, as always elsewhere); with אֵלֶּה 1 S 2[23], according to the present corrupt text (the original reading יהוה כָּל־עַם became כָּל־עַם אֱלֹהִים, and אֱלֹהִים was then corrupted to אֵלֶּה); so, almost without exception, when the substantive is determined only by a suffix, e.g. Jos 2[20], Ju 6[14], 1 K 10[8], 2 K 1[2] and 8[8 f.], where חלי, as in Jer 10[19], has arisen by contraction from חֳלָיִי, or we should simply read חָלְיִי (in all these passages with וְהָ); Gn 24[8] (with זֹאת); Ex 10[1], 1 K 22[23], Jer 31[21] (with אֵלֶּה).

y

The article is sometimes omitted also with the attributes referring to proper names,[1] as צִידוֹן רַבָּה Jos 11[8], 19[28], חֲמַת רַבָּה Am 6[2]. Other examples are Jos 16[3.5], 18[13], 1 K 9[17] (but in 1 Ch 7[24], 2 Ch 8[5] with the article). In Gn 7[11], &c., תְּהוֹם רַבָּה is also a case of this kind, תְּהוֹם being used (almost always without the article) as a sort of proper name; cf. also אֵל עֶלְיוֹן *the most high*

[1] Cf. Nöldeke, *Beiträge zur semit. Sprachwiss.*, p. 48, n. 1.

God and אֱלֹהִים חַי *the living God*. In Ju 1[15] גִּלַּת עֶלְיִת and גּ׳ תַּחְתִּית are strange; Jos 15[19] has גּ׳ עִלְּיוֹת and גּ׳ תַּחְתִּיּוֹת.

z Of the remaining examples Is 11[9] explains itself; the direct connexion of the attribute with its substantive is broken by the insertion of לַיָּם. In Ez 34[12], Hag. 1[4] (as Wellhausen says, a good instance of a Hebrew adjective in the stative form = וְהֵם סְפוּגִים), ψ 143[10], Ct 6[12] (?) the substantive is also (see above) determined by a suffix, and consequently the attribute is less closely attached; the same applies to Gn 37[2], 42[19], 43[14], ψ 18[18], except that in these passages the omission of the article before ר, א, ע may at the same time be due to considerations of euphony (as also in Jos 16[1] before ע, Nu 14[37] before ר, 28[4], Ez 10[9] before א, 21[19] before ח).[1] In 1 S 13[17f.] (אֶחָד) and 2 K 25[16] (שְׁנַיִם after a determinate substantive), the attribute again, being a numeral, is determinate in itself (see above, *x*); in Is 65[2] the לֹא prevents the use of the article; finally, in 2 Ch 26[15] בְּחִצִּים and בְּאַבָנִים are to be read, as in Jer 2[21] גֶּפֶן for הַגֶּפֶן, in 22[26] אֶרֶץ for הָאָ; in 2 S 6[3] omit חֲדָשָׁה, and in Ez 39[27] omit רַבִּים. Without any apparent reason the article is omitted in Dn 8[13] and 11[31].

aa 2. When, as in Mi 7[12] (יוֹם הוּא *in that day*?), the article is omitted from both substantive and demonstrative, and in Ezr 3[12], the demonstrative even precedes (הַבַּיִת הַזֶּה = וְזֶה הַבַּיִת), this is obviously due in both cases to a radical corruption of the text (not only in the words quoted). In Jos 9[12] לַחְמֵנוּ זֶה is either in apposition to the independent demonstrative זֶה (= *this our bread*, &c.), as in verse 13 נְאוֹדוֹת is to אֵלֶּה, or they are complete sentences, *this is our bread*, &c. So also in Ex 32[1] מֹשֶׁה (= *that* [*iste*] *Moses*, &c.), and in ψ 48[15] אֱלֹהִים are to be taken in apposition to זֶה. On ψ 68[8] and Is 23[13] cf. § 136 *d*.

§ 127. *The Noun determined by a following Determinate Genitive.*

Brockelmann, *Grundriss*. i. 475.

a When a genitive, determined in any way, follows a *nomen regens*, it also determines the *nomen regens*, which, according to § 89 *a*, is always in the construct state. Moreover, every pronominal suffix attached to a substantive is, according to § 33 *c*, to be considered as a genitive determinate by nature. An independent genitive may be determinate—

(*a*) By its character as a *proper name* (according to § 125 *a*), e. g. דְּבַר יְהוָה *the word of the Lord*.

(*b*) By having the article, e. g. אִישׁ הַמִּלְחָמָה (prop. the man of the war) *the soldier* (but אִישׁ מִלְחָמָה Jos 17[1], *a soldier*); אַנְשֵׁי הַמִּלְחָמָה

[1] The same reason no doubt also favoured the omission of the article before הוּא and אֵלֶּה, see above, under *y*. Also in Is 23[7] (*is this your joyous*...?) the article is omitted before עַלִּיזָה probably only for euphony.

Nu 31[49], *the soldiers*; דְּבַר הַנָּבִיא *the word of the prophet*, Jer 28[9] (but e.g., on the other hand, מִצְוַת אֲנָשִׁים מְלֻמָּדָה *a commandment of men which hath been taught*, Is 29[13]; דִּבְרֵי־שֶׁקֶר *word of falsehood*, Pr 29[12]).

(*c*) By the addition of a pronominal suffix (see above), e.g. בֵּית־אָבִי *my father's house*.

(*d*) By construction with another genitive determined in some way, e.g. Gn 3[2] מִפְּרִי עֵץ־הַגָּן *of the fruit of the trees of the garden*. Thus in Is 10[12] four, and in 21[17] even five, members of a series are determined by a concluding determinate genitive.

b Rem. 1. The above explains also the various meanings of כֹּל (prop. a substantive in the sense of *aggregate, whole*), according as it is followed by a determinate or indeterminate genitive. In the former case כֹּל has the meaning of *the entirety*, i.e. *all, the whole* (like the French *tous les hommes, toute la ville*), e.g. כָּל־הָאָרֶץ *the whole* (prop. the entirety of the) *earth*, כָּל־הָאָדָם *all men*;[1] Ex 18[22], Nu 15[13], Jer 4[29], and cases like Nu 4[23.47], 21[8] where כָּל is followed by a singular participle with the article. On the other hand, before an indeterminate genitive כֹּל is used in the more indefinite (individualizing) sense of *of all kinds, any* (cf. *tout homme, à tout prix*), or distributively *each, every*, e.g. כָּל־עֵץ *every* (kind of) *tree*, Gn 2[9]; cf. 4[22], 24[10], 1 Ch 29[2]; כָּל־דָּבָר *any thing*, Ju 19[19]; בְּכָל־יוֹם *every day, every time*, ψ 7[12].

c It is, however, to be observed—

(*a*) That the article may in this case also (see § 126*h*) be omitted in poetic style, although the substantive is to be regarded as determinate, e.g. כָּל־שֻׁלְחָנוֹת *all* (the) *tables*, Is 28[8].

(*b*) That the meaning *every* is frequent even before singulars used collectively; afterwards the idea of *quisque* passes naturally into that of *totality*, e.g. כָּל־חַי *each living thing*, i.e. *every* (not *every kind of*) *living thing*; כָּל־בָּשָׂר *all flesh*, i.e. *all men* or *all living creatures* (with the article only in Gn 7[15] before a relative clause, and in Is 40[6]); sometimes also כָּל־עֵץ *all trees*, כָּל־עוֹף *all birds*; finally—

(*c*) That before the names of members of the human body, כָּל frequently (as being determinate in itself) denotes the entirety, e.g. Is 1[5] *the whole head, the whole heart* (the sense required by the context, not *every head*, &c., which the expression *in itself* might also mean); 9[11], 2 K 23[3], Ez 29[7] *all* (i.e. *the whole of*) *their shoulders . . . all* (*the whole of*) *their loins*; 36[5].—On כֹּל with a suffix when it follows a noun in apposition (e.g. Is 9[8] הָעָם כֻּלּוֹ *the people, all of it*, i.e. *the whole nation*, more emphatic than כָּל־הָעָם, cf. Driver on 2 S 2[9]), as well as when it follows absolutely in the genitive (= *all men, every one*, e.g. Gn 16[12]),[2] see the Lexicon, pp. 481[b], 482[b].

d 2. Gentilic names (or patronymics), derived from compound proper names (consisting of a nomen regens and genitive), are determined by inserting the article before the second part of the compound (since it contains the original

---

[1] הָאָדָם being a collective, cf. כָּל־הָאִישׁ 2 S 15[2], *all men*, כָּל־הַבֵּן Ex 1[22] *all sons*, כָּל־הַבַּת *all daughters*; in itself כָּל־הָאָדָם could also mean *the whole man*.

[2] In Ezr 10[17] instead of בַּכֹּל אֲנָשִׁים read simply בְּכָל־הָאֲנָשִׁים.

genitive), e.g. בֶּן־יְמִינִי (see § 86 *h*) *a Benjamite*; בֶּן־הַיְמִינִי Ju 3[15], &c., *the Benjamite*; בֵּית־הַלַּחְמִי *the Bethlehemite*, 1 S 16[1], &c. (cf., however, 1 Ch 27[12] *Qerê* (לַבֶּן יְמִינִי); בֵּית־הַשִּׁמְשִׁי *the Beth-shemite*, 1 S 6[14]; אֲבִי הָעֶזְרִי *the Abiezrite*, Ju 6[11], &c., cf. 1 K 16[34].

c 3. In a few instances the nomen regens appears to be used indefinitely notwithstanding a following determinate genitive; it is not so, however, in Gn 16[7], where the reference is to a well-known fountain; 21[28], where in the original context there must have been some reason for *the seven ewe lambs of the flock*; 2 S 12[30] *the spoil found in the city*; but it often is so before a proper name, as in Ex 10[9] חַג יְהוָה *a feast of the Lord* (unless it is *the* spring festival), Dt 7[25], and frequently תּוֹעֲבַת יְהוָה *an abomination unto the Lord*; cf. also Gn 46[34], Dt 22[19] *a virgin of Israel*; 1 S 4[12] *a man of Benjamin*; Pr 25[1], Ct 2[1], 3[9]; similarly before appellatives with the article (or before a genitive determined by a suffix, as in Lv 14[34]), 1 S 20[20] *three arrows*; 2 S 23[11] חֶלְקַת הַשָּׂדֶה *a plot of the ground* (but see Gn 33[19], Jos 24[32]); Ju 13[6], Jer 13[4], 41[16], Ct 1[11.13 f.], 5[13], 7[3], 8[2]. On the other hand, שִׁיר הַמַּעֲלוֹת in the titles of Psalms 120 to 134 (except 121[1], שִׁיר לַמַּעֲלוֹת) was most probably originally the title of a collection, in the sense of '*the pilgrimage-songs*' (according to § 124 *r*), and was subsequently added to these Psalms severally.—In Ex 20[24] בְּכָל־הַמָּקוֹם *in all the place*, sc. of the sanctuary, is a dogmatic correction of בְּכָל־מָקוֹם, *in every place*, to avoid the difficulty that several holy-places are here authorized, instead of the one central sanctuary. In Gn 20[13] also כָּל־הַמָּקוֹם (unless it means *in the whole place*) is remarkable, since elsewhere *every place* is always (8 times) כָּל־מָקוֹם.

f 4. The deviations mentioned under *e*, from a fundamental rule of syntax, are in some cases open to suspicion on textual grounds, but much more doubtful are the instances in which the article is found before a noun already determined in some other way, as—

(*a*) Before a noun which appears to be determined by a following independent determinate genitive. The least questionable are the instances in which the genitive is a *proper name*, since these may be elliptical forms of expression like the apparent construction of proper names with a genitive, noticed in § 125 *h*, e.g. Nu 21[14] הַנְּחָלִים אַרְנֹן *the valleys*, namely the valleys *of Arnon*; 2 K 23[17] הַמִּזְבֵּחַ בֵּית־אֵל *the altar*, namely the altar of *Bethel* (i.e. with the suppression of the real nomen regens, מִזְבַּח without the article; by the pointing הַמִּזְבֵּחַ the Masora evidently intends to allow the choice either of reading הַמִּזְבֵּחַ or correcting it to מִזְבַּח); הָאֵל בֵּית־אֵל *the God of Beth-el*[1] (equivalent to הָאֵל אֵל בּ׳), Gn 31[13] (the LXX read הָאֵל הַנִּרְאֶה אֵלֶיךָ בַּמָּקוֹם *the God who appeared to thee in the* holy *place*); הַמֶּלֶךְ אַשּׁוּר *the king of Assyria*, Is 36[16] (probably a scribal error due to verse 13; it does not occur in the parallel passage, 2 K 18[31]), cf. Jos 13[5], 2 K 25[11], Jer 38[6], Ez 47[15]; in the vocative, Jer 48[32], La 2[13]. On the other hand, שָׂרָה אִמּוֹ Gn 24[67] is no doubt

---

[1] According to Philippi (*St. Constr.*, p. 38) בית־אל is rather a case of 'subposition' in the accusative, as also הַדֶּרֶךְ חֶתְלֹן Ez 47[15] (for which, however, in 48[1] there is the correct reading דֶּרֶךְ חֶתְלֹן) *by the way to Hethlon*; and in fact, Ez 47[15] may without difficulty be explained in this way; so שֵׁשׁ Ex 39[27] as an accusative of the material.

only a subsequent insertion; so also יִשְׂרָאֵל Jos 8^{33b} (cf. LXX), 2 S 20^{23}, 2 K 7^{13}, הַמֶּלֶךְ 1 S 26^{22} after הַחֲנִית (simplified by the Masora to חֲנִית *Qerê*); עַלְיַת אָחָז 2 K 23^{12}, אַשּׁוּר Is 36^8 (cf. 2 K 18^{23}), הַקֹּדֶשׁ Ez 46^{19} (unless the article with לשכות is to be omitted), also הַתָּמִיד Dn 8^{13}, and עֹרֵד הַנָּבִיא 2 Ch 15^8. In Ex 9^{18} read with the Samaritan לְיֹמִם; in 2 S 19^{25} לֶכֶת might possibly be taken in apposition to לְיֹמָן הַיּוֹם; in 2 K 10^1 restore אֶת־בְּנֵי, with the LXX and Lucian, before אַחְאָב; in 2 K 25^{19} omit the article, as in Jer 52^{25}, before סֹפֵר.

A similar ellipse must also be assumed in 2 K 23^{17} *the sepulchre is* the sepulchre *of the man of God* (but most probably קֶבֶר has dropped out after הַקֶּבֶר) and ψ 123^4 (cf., however, the LXX, and observe that in the parallel member the genitive is paraphrased by לְ).—In Jos 3^{14} הַבְּרִית (verse 17 בְּרִית יהוה) has been added to the original הָאָרוֹן by a redactor; cf. similar syntactically impossible additions in verse 11 (also in 1 S 4^3, &c., where the LXX still had simply יהוה אֲרוֹן); in הַיָּתֵד Ju 16^{14} the Masora evidently combines two different readings הַיָּתֵד and יְתַד הָאֶרֶג; and similarly in Jer 25^{26} (where הָאָרֶץ was only subsequently introduced into the text), the two readings הַמַּמְלָכוֹת and מַמְלְכוֹת הָא׳ are combined.—In Jos 8^{11}, 1 K 14^{24}, Jer 31^{40}, Ez 45^{16} the article, being usual after כָּל־, has been mechanically added, and so also in 2 Ch 8^{16} after עַד־; in 2 K 9^4 the second הַנַּעַר (instead of נַעַר) is occasioned by the first; in Ez 7^7 מְהוּמָה belongs as a nominative to what follows; in Ez 8^{29} the meaning perhaps is *in the chambers, in the house of the Lord*, or the article is to be omitted; in 1 Ch 15^{27} the text is manifestly corrupt. *g*

Of another kind are the instances in which a determinate noun is followed by a definition of the material *in apposition* (hence, not in the genitive; cf. § 131), e.g. Zc 4^{10} הָאֶבֶן הַבְּדִיל *the weight, the lead*, i.e. *the leaden weight*; Ex 39^{17}, 2 K 16^{14} (הַנְּחֹשֶׁת, both here and in verse 17, is probably only a later addition, while המסגרות המכנות in verse 17 has arisen from a confusion of two readings, מסגרות המכנות and המסגרות מהמכנות). In Jer 32^{12} also הַמַּקְנָה (unless the article is simply to be omitted) is in apposition to הַסֵּפֶר. *h*

(*b*) Before a noun with a suffix (which likewise represents a determinate genitive; see above, at the beginning of this section). This does not apply to cases in which a *verbal* (i.e. *accusative*) suffix is affixed to a participle which has the article, e.g. הַמַּכֵּהוּ Is 9^{12}, *the one smiting him*; in Dt 8^{15}, 13^6 also ךָ is a verbal suffix, but hardly the וֹ in הָעֹשֵׂהוּ for הָעֹשֶׂה Job 40^{19}, nor the הּ— in הַיֹּלְדָהּ Dn 11^6; § 116*g*. For הָעֲרֵךְ Lev 27^{23}, read עֲרֵכְךָ as in verses 2, 3, 5, 7, 13, &c., twelve times (but cf. also the note on § 128*d*).—Of the remaining examples בַּגְּבֻרָתָהּ Is 24^2 (probably an intentional alliteration with the eleven other words beginning with בַּ), לַמְעַנֵּהוּ Pr 16^4, and בְּעֶרְיֵנוּ (so Baer, following the best authorities) Ezr 10^{14}, rest only on the authority of the Masoretes, not of the authors. So also in הָאֲהָלִי Jos 7^{21}, הַחֲצִיוֹ Jos 8^{33} (previously חֲצִיוֹ), הָהֲרוֹתֶיהָ 2 K 15^{16} (dittography of the ה), the article is simply to be omitted as syntactically impossible; the וֹ of הַדְּבָרוֹ Mi 2^{12} is the copula belonging to the next word. *i*

§ 128. *The Indication of the Genitive Relation by means of the Construct State.*

Cf. especially Philippi's work cited at the head of § 89.

a **1.** The genitive relation is regularly expressed (see § 89) by the close connexion of the *nomen regens* (in the construct state) with the *nomen rectum* (in the genitive). Since only *one* nomen regens can be immediately connected with a nomen rectum, it follows that the same genitive cannot depend on two or more *co-ordinate* nouns, but a second (sometimes even a third, &c.) regens must be added with a suffix referring to the nomen rectum, e. g. בְּנֵי דָוִד וּבְנֹתָיו *the sons of David and his daughters* (not וּבְנוֹת דָּוִד); cf. 1 K 8^{28}.[1] The language also prefers to avoid a series of several co-ordinate[2] genitives depending upon one and the same nomen regens (such as occur in Gn 14^{19}, Nu 20^{5}, 31^{54} [1 Ch 13^{1}], 1 S 23^{7}, 2 S 19^{6}, Is 22^{5}, ψ 5^{7}, 8^{3}),[3] and rather tends to repeat the nomen regens, e. g. Gn 24^{3} אֱלֹהֵי הַשָּׁמַיִם וֵאלֹהֵי הָאָרֶץ *the God of heaven and the God of the earth* (so in Jer 8^{1} the regens is five times repeated). A lengthened series of genitives may, however, be formed by a nomen rectum serving at the same time as *regens* to a genitive depending on it (cf. § 127 *a* [*d*]); e. g. Gn 47^{9} יְמֵי שְׁנֵי חַיֵּי אֲבֹתָי *the days of the years of the life of my fathers*; cf. Jb 12^{24}, where there are three genitives, Is 10^{12} four, and 21^{17} five (unless the last three are in apposition). As a rule, indeed, such an inconvenient accumulation of genitives is avoided by means of a circumlocution in the case of one of them (see § 129 *d*).

b Rem. As the fundamental rules stated above are the necessary consequence not merely of *logical* but more especially of *rhythmical* relations (see § 89 *a*), we must feel the more hesitation in admitting examples in which genitives are supposed to be loosely attached to forms other than the construct state. Some of these examples (the supposed genitives following a regens which is determined by the article) have been already discussed in § 127 *f–h*. Compare, moreover:

c (*a*) Genitives after the absolute state, e. g. Is 28^{1} גֵּיא־שְׁמָנִים חַלּוּמֵי יָיִן *the fat valley of them that are overcome with wine*. The usual explanation that גֵּיא־שְׁמָנִים forms *one* single idea (in German *Fettigkeitstal*), on which the

---

[1] Very rare, and only possible in very rapid utterance, are such exceptions as Ez 31^{16} (מִבְחַר וְטוֹב־לְבָנוֹן); Pr 16^{11}.—In Is 11^{2} *the spirit of knowledge and of the fear of the Lord*, דַּעַת may at any rate also be taken as an absolute genitive, so also סֵפֶר Dn 1^{4}.

[2] In ψ 114^{1} a second genitive is added even without the copula, but the parallelism of the members renders any misunderstanding impossible.

[3] In almost all these instances the two (or three) genitives form one closely connected whole, as *heaven* and *earth*, *sons* and *daughters*.

genitive הֲלוּמֵי יַיִן then depends, in reality explains nothing; the text is almost certainly corrupt. In Dt 15^{18} מִשְׁנֶה would be expected; in Jos 3^{11} הַבְּרִית is a later addition; in Is 32^{13} (מָשׂוֹשׂ), and ψ 68^{22} (שְׂעָר), the absolute for the construct state probably rests only on the authority of the Masoretes. In Ju $6^{25\,ff.}$ the text is obviously in confusion. In Ju 8^{32} (cf. 6^{24}) בְּעָפְרָה should come either after וַיִּקָּבֵר or at the end of the verse, unless, with Moore, we omit אֲבִי הָעֶזְרִי as a gloss (from 6^{24}); in Is 63^{11} משׁה is probably a gloss on יְמֵי־עוֹלָם which has crept into the text; in 2 S 4^{2} לְאִישׁ־בֹּשֶׁת, according to the LXX, has dropped out before בֶּן; in Ez 6^{11} רָעוֹת is to be omitted with the LXX; if originally in the text, it could only be genitive (= *all abominations of evils*), not an adjective; Pr 21^{6} the text is altogether uncertain (the LXX read מְבַקְּשֵׁי for מְוֹקְשֵׁי); in 1 Ch 9^{13} the preposition לְ (after a ל) has dropped out before מְלֶאכֶת (cf. 12^{25}).—Elsewhere (Dt 3^{5}, 1 K 4^{13}, 2 Ch 8^{5}) the supposed genitives are to be taken rather as words of nearer definition standing in apposition, i. e. *with high walls, gates, and bars*. In Jer 8^{5} ירושלים is either in apposition to העם הזה or is better (since not in the LXX) omitted as a gloss.

d (*b*) Genitives after a noun with a suffix (where the suffix prevents the direct government by the *nomen regens*). Thus in Lv $27^{3.5.6}$, where הַזָּכָר after עֶרְכְּךָ[1] might be taken, contrary to the accents, as subject of the following clause; in Lv $5^{15.25}$ the suffix may refer to Moses. In Lv 6^{3} מִדּוֹ בַד *his garment*, namely the garment *of linen*, unless simply in apposition, cf. § 131 *d* (or read מִדֵּי?); Lv 26^{42}, where בְּרִיתִי יַעֲקֹב וגו׳ could at most be explained as an ellipse for בְּרִיתִי בְּרִית יַעֲקֹב, cf. § 125 *h* (probably, however, it is a case of dittography of the י, which was repeated also before אברהם; so Valeton, *ZAW.* xii. 3); equally strange is בְּרִיתִי הַיּוֹם Jer 33^{20}, &c. On the other hand, אִם יִהְיֶה נְבִיאֲכֶם יְהוָה Nu 12^{6} could not possibly mean *if your prophet be a prophet of the Lord*; the text is manifestly corrupt (probably נְבִיאְךָ מִיהוָה is to be read, with Marti). In ψ 45^{7} כִּסְאֲךָ אֱלֹהִים (usually explained as *thy divine throne*), אלהים is most probably a later addition [another suggestion is to read כֵּאלֹהִים *like God('s throne)*: cf. § 141 *d*, note]. In Jer 52^{20} two readings are probably combined, לְנַחֲשֶׁת כָּל־הַכֵּלִים without any addition, and לְנַחֲשְׁתָּם כָּל־הַכֵּלִים. In Nu 25^{12} שָׁלוֹם is in apposition to בְּרִיתִי. On דַּרְכֵּךְ וְזִמָּה Ez 16^{27}, cf. § 131 *r*.

e (*c*) The interposition of a word is assumed between כָּל־ (*the whole*; cf. § 127 *b*) and the genitive governed by it in 2 S 1^{9}, Jb 27^{3} (עוֹד), and, if the text is correct, in Hos 14^{3} (תִּשָּׂא). In reality, however, in all three places the genitive relation is destroyed by the transposition of the words (instead of עוֹד כָּל־, &c.), and כָּל־ is rather to be taken adverbially (equivalent to *wholly*), e. g. 2 S 1^{9} *because my life is yet wholly in me*, i. e. my whole life; cf. Philippi, *Stat. Constr.*, p. 10.—On the instances in which the original construct state אֵין *non-existence* is used without a following genitive, see the negative sentences, § 152 *o*.

f **2.** The dependence of the nomen rectum on the nomen regens by no means represents merely what is, properly speaking, the genitive relation (see the examples under *g–i*). Very frequently the nomen

[1] Halévy, *J. A.* xiv. 548, removes the difficulty by pointing עֶרְכֹּךְ.

rectum only adds a nearer definition of the nomen regens, whether by giving the name, the genus or species, the measure, the material, or finally an attribute of it (*genit. epexegeticus* or *appositionis*,[1] see the examples under *k–q*).

Examples. The *nomen rectum* represents—

g (*a*) A *subjective genitive*, specifying the possessor, author, &c., e. g. בֵּית־הַמֶּלֶךְ *the king's house*; דְּבַר יְהוָה *the word of the Lord.*

h (*b*) An *objective genitive*, e. g. Ob[10] מֵחֲמַס אָחִיךָ *for the violence done to thy brother*[2] (but in Ez 12[19] מֵחֲמַס is followed by a subjective genitive); Pr 20[2] אֵימַת מֶלֶךְ *the terror of a king*; Gn 18[20] זַעֲקַת סְדֹם *the cry concerning Sodom*; Is 23[5] שֵׁמַע צֹר *the report of* (*about*) *Tyre*, cf. 2 S 4[4]; Am 8[10] יָחִיד אֵבֶל *the mourning for an only son*; Dt 20[14] שָׁלָל אֹיְבֶיךָ *praeda hostibus tuis erepta*; cf. Is 3[14]. In a wider sense this includes such examples as דֶּרֶךְ עֵץ הַחַיִּים *the way of* (i. e. *to*) *the tree of life*, Gn 3[24]; cf. Pr 7[27], Jb 38[20]; דֶּרֶךְ הַיָּם *the way of* (*by*) *the sea*, Is 8[23]; זִבְחֵי אֱלֹהִים *the sacrifices of* (i. e. *pleasing to*) *God*, ψ 51[19]; שְׁבֻעַת יְהוָה *the oath of* (i. e. *sworn before*) *the Lord*, 1 K 2[43]; דִּבְרֵי לְמוּאֵל *the words of* (i. e. *addressed to*) *L.*, Pr 31[1].

i (*c*) A *partitive genitive*; this includes especially the cases in which an adjective in the construct state is followed by a general term, e. g. חַכְמוֹת שָׂרוֹתֶיהָ *the wisest of her ladies*, Ju 5[29]; cf. for this way of expressing the superlative, § 133 *h*, and also *r* below.

k Merely formal genitives (*genit. explicativus* or *epexegeticus*, *genit. appositionis*) are those added to the construct state as nearer definitions—

(*d*) Of the *name*, e. g. נְהַר פְּרָת *the river Euphrates*; אֶרֶץ כְּנַעַן *the land of Canaan*; בְּתוּלַת יִשְׂרָאֵל *the virgin Israel* (not *of Israel*), Am 5[2].

l (*e*) Of the *genus*, e. g Pr 15[20] (21[20]) כְּסִיל אָדָם *a fool of a man* (= *a foolish man*); cf. Gn 16[12], Is 1[4], 29[19], Ho 13[2], Mi 5[4], &c.

m (*f*) Of the *species*, e. g. אֲחֻזַּת קֶבֶר *a possession of a burying-place*, i. e. *hereditary sepulchre*, Gn 23[4], &c.; תְּאֵנֵי הַבִּכּוּרוֹת *the early figs*, Jer 24[2]; אֹהֶל בֵּיתִי *the tabernacle of my house*, i. e. my dwelling-place, ψ 132[3].

n (*g*) Of the *measure, weight, extent, number*, e. g. מְתֵי מִסְפָּר *people of number*, i. e. *few in number*, Gn 34[30], Dt 26[5]; cf. also Ez 47[3–5] *waters of the ankles, waters of the loins, waters of swimming*, i. e. which reached up to the ankles, or loins, or necessitated swimming; but in verse 4 in apposition (?) מַיִם הִרְכַּיִם.

o (*h*) Of the *material*[3] of which something consists, e. g. כְּלִי חֶרֶשׂ *a vessel of earthenware*, Nu 5[17]; כְּלֵי כֶסֶף *vessels of silver* (cf. the French *des vases d'or*); אֲרוֹן עֵץ *an ark of wood*, שֵׁבֶט בַּרְזֶל *a rod of iron*, ψ 2[9]; cf. Gn 3[21], 6[14], Ju 7[13], &c.

---

[1] The latter term is preferred especially by König, *Theol. Stud. und Krit.*, 1898, p. 528 ff.

[2] Cf. in Latin a similar use of the genitive after *iniuria* (Caes. *B. G.* 1, 30), *metus* (*hostium, Pompeii*, &c.), *spes*, and other words. In Greek, cf. *ἔννοια τῶν φίλων*, *πίστις τοῦ θεοῦ*, *ὁ λόγος ὁ τοῦ σταυροῦ*, 1 Cor. 1[18].

[3] In the almost entire absence of corresponding adjectives (אָרֻז *made of cedar*, a denominative from אֶרֶז, and נְחוּשׁ *brazen* are the only examples), the language regularly has recourse to the above periphrasis. On the form *qāṭūl*, as expressing an inherent property, cf. § 50 *f*; cf. also the proper name, בַּרְזִלַּי *ferreus*.

(*i*) Of the *attribute* of a person or thing, e. g. Gn 17[8] אֲחֻזַּת עוֹלָם *an everlasting possession*; Pr 17[8] *a precious stone*; cf. Nu 28[6], Is 13[3], 28[4], ψ 23[2], 31[8], Pr 5[19], 14[5], Jb 41[19], and the examples of the genitive with a suffix given in § 135 *n*. Such a periphrasis for the expression of attributes frequently occurs, even when the corresponding adjectives are in use. Thus especially קֹדֶשׁ *holiness* very frequently serves as a periphrasis for the adjective קָדוֹשׁ (e. g. בִּגְדֵי הַקֹּדֶשׁ *the holy garments*, Ex 29[29]), since קָדוֹשׁ is used almost exclusively in reference to persons (hence also with עַם and גּוֹי *people*, and with שֵׁם the *name* of a person); the only exceptions are מָקוֹם קָדוֹשׁ *holy place*, Ex 29[31], &c.; מַיִם קְדֹשִׁים *holy water*, Nu 5[17]; קָדוֹשׁ as the predicate of יוֹם *day*, Neh 8[10 f.], and of מַחֲנֶה *camp*, Dt 23[15]. So also the use of צַדִּיק *righteous* is always confined to persons, except in Dt 4[8]; elsewhere the periphrasis with צֶדֶק or צְדָקָה is always used, e. g. מְאֹזְנֵי צֶדֶק *just balances*, Lv 19[36]. *p*

In a wider sense this use of the genitive also includes statements of the purpose for which something is intended, e. g. צֹאן טִבְחָה *sheep for the slaughter*, ψ 44[23]; מוּסַר שְׁלוֹמֵנוּ *the chastisement designed for our peace*, Is 53[5]; cf. 51[17] (*the cup which causes staggering*), ψ 116[13]; finally, also, the description of the material, with which something is laden or filled, e. g. 1 S 16[20] חֲמֹר לֶחֶם וְנֹאד יָיִן *an ass* laden *with bread and a bottle of wine* (but probably עֲשָׂרָה is to be read for חֲמֹר); cf. Gn 21[14], Pr 7[20], &c. *q*

Rem. 1. Certain substantives are used to convey an attributive idea in the construct state before a partitive genitive; thus מִבְחָר *choice, selection*, as in Gn 23[6] מִבְחַר קְבָרֵינוּ *the choice of our sepulchres*, i. e. our choicest sepulchres; Ex 15[4], Is 22[7], 37[24]; other examples are, Is 1[16] *the evil of your doings*, emphatically, for *your evil doings*; Is 17[4], 37[24] (= *the tall cedars thereof*), ψ 139[22], Jb 15[26].— This is the more common construction with the substantive כֹּל *entirety*, for *all, the whole, every*, see § 127 *b*; it is also frequent with מְעַט *a little*, for *few*, 1 S 17[28], &c. *r*

2. To the periphrases expressing attributive ideas (see *p* above) by means of a genitive construction may be added the very numerous combinations of the construct states אִישׁ *a man*, בַּעַל *master, possessor*, בֶּן *son*, and their feminines and plurals (including מְתֵי *men*, used only in the plural), with some appellative noun, in order to represent a person (poetically even a thing) as possessing some object or quality, or being in some condition. In English, such combinations are sometimes rendered by single substantives, sometimes by circumlocution. *s*

Examples :—

(*a*) Of אִישׁ, &c.: אִישׁ דְּבָרִים *an eloquent man*, Ex 4[10] (but אִישׁ שִׂפְתַיִם Jb 11[2] *a man of lips*, i. e. *a boaster*); אִישׁ לָשׁוֹן = *a slanderer*, ψ 140[12]; אִישׁ דַּעַת *a man of knowledge*, Pr 24[5]; אִישׁ חֵמָה *a wrathful man*, Pr 15[18]; אִישׁ דָּמִים *a man of blood*, 2 S 16[7], ψ 5[7]; cf. further, 1 S 16[18], 1 K 2[26], Is 53[3], Pr 19[6], 26[21], 29[1], Ezr 8[18]; also אֵשֶׁת מְדָנִים *a contentious woman*, Pr 27[15]; in the plural, e. g. Gn 6[4] אַנְשֵׁי הַשֵּׁם *the men of renown, famous*; cf. Gn 47[6], Is 41[11], Jb 34[8.10] (אַנְשֵׁי לֵבָב *men of understanding*); with מְתֵי, e. g. Is 5[13] (מְתֵי רָעָב *famished men*; but read probably מְוֵי רָעָב *weak with hunger*); ψ 26[4], Jb 11[11], 22[15]. *t*

(*b*) Of בַּעַל, &c.: בַּעַל שֵׂעָר *hairy*, 2 K 1[8]; בַּעַל הַחֲלמוֹת *the dreamer*, Gn 37[19]; cf. Na 1[2], Pr 1[17], 18[9] (*a destroyer*), 22[24], 23[2] (*disposed to eat, greedy*), 24[8]; feminine *u*

בַּעֲלַת־אוֹב *a woman that hath a soothsaying spirit*, 1 S 28[7]; cf. Na 3[4]; in the plural, e. g. בַּעֲלֵי חִצִּים *archers*, Gn 49[23], בַּעֲלֵי בְרִית *confederates*, Gn 14[13]; בַּעֲלֵי שְׁבוּעָה *sworn supporters*, Neh 6[18].

v (*c*) Of בֶּן־, &c.: בֶּן־חַיִל *a hero, warrior*, 1 K 1[52]; בֶּן־מֶשֶׁק *heir*, Gn 15[2]; בֶּן־שָׁנָה *yearling*, Ex 12[5], &c.; בֶּן־מְאַת שָׁנָה *centum annos natus*, Gn 21[5]; בֶּן־מָוֶת *worthy to die*, 1 S 20[31] (Luther, 2 S 12[5] *ein Kind des Todes*); cf. Dt 25[2] בֶּן־הַכּוֹת *worthy to be beaten*. Feminine, e. g. בַּת־בְּלִיַּעַל *a wicked woman*, 1 S 1[16]; frequently also אִישׁ בְּלִיַּעַל, בְּנֵי ב׳, אַנְשֵׁי ב׳, and even simply בְּלִיַּעַל, like the Latin *scelus* for *scelestissimus*, 2 S 23[6], Jb 34[18]. Plural masculine, e. g. בְּנֵי מְרִי *children of rebellion*, Nu 17[25]. בֶּן־ is used poetically of things without life, e. g. Is 5[1] בֶּן־שֶׁמֶן *a fat*, i. e. a fruitful (hill); Jon 4[10] בֶּן־לַיְלָה i. e. *grown in a night*; Jb 41[20] *son of the bow* (i. e. an arrow); so also בְּנֵי רֶשֶׁף = *sparks*, Jb 5[7]; La 3[13]; בְּנוֹת Ec 12[4] *the daughters of song*, probably meaning the individual notes.

There is another use of בֶּן־ or בְּנֵי to denote membership of a guild or society (or of a tribe, or any definite class). Thus בְּנֵי הָאֱלֹהִים or בְּנֵי אֱלֹהִים Gn 6[2.4], Jb 1[6], 2[1], 38[7] (cf. also בְּנֵי אֵלִים ψ 29[1], 89[7]) properly means not *sons of god(s)*, but beings of the class of אֱלֹהִים or אֵלִים; בְּנֵי־הַנְּבִיאִים 1 K 20[35] (singular in Am 7[14]) persons *belonging to the guild of prophets*; בֶּן־הָרֻקָּחִים Neh 3[8] *one of the guild of apothecaries*, cf. 3[31] where בֶּן־הַצֹּרְפִים is to be read. Similarly בְּנֵי שְׁלִשִׁים Gn 50[23] are most probably not *great-grandsons* but *grandsons*, i. e. those belonging to the third generation. Cf. also בְּנֵי הַגֵּרְשֻׁנִּי Nu 4[27 f.] *Gershonites*, בְּנֵי הַקְּהָתִים 2 Ch 20[19], &c., *Kohathites*; בְּנֵי קֶדֶם *dwellers in the East*.

w 3. Special mention must be made of the not infrequent idiom by which adjectives (sometimes also ordinals, see § 134 *o*) are added in the genitive, like substantives, rather than as attributes in the same state, gender, and number as the noun which they qualify; thus, Is 28[4] צִיצַת נֹבֶל *the flower of that which fades*, for which verse 1 has צִיץ נֹבֵל *the fading flower*; cf. further, Is 22[24], Jer 22[17] (?), 52[13], ψ 73[10], 74[15] (but אֵיתָן may be a substantive), 78[49]; also the use of רַע as a substantive, e. g. in Pr 2[14 *b*], 6[24] (אֵשֶׁת רַע), &c., analogous to the New Testament phrase *ὁ οἰκονόμος τῆς ἀδικίας*, Luke 16[8], and the French *un homme de bien*.[1]—Finally, an adverb (treated as a substantive) may likewise be used as an epexegetical genitive; cf. דְּמֵי חִנָּם *blood shed without cause*, 1 K 2[31]; Pr 24[28], 26[2]; Ez 30[16] (יוֹמָם).

x 3. The epexegetical genitives include finally the numerous nearer definitions which follow the construct state of adjectives (and of active and passive participles, or verbal adjectives, cf. § 116 *f–l*). For, while the word of nearer definition is added to the verb in the accusative (e. g. חָלָה אֶת־רַגְלָיו *he was diseased in his feet*, 1 K 15[23]), it may, with participles and verbal adjectives, be either in the accusative

[1] On the other hand, in such passages as Is 36[2] (2 K 18[17]), Ze 14[4], Ec 8[10], &c., there is no apparent reason why the Masora requires the construct state instead of the absolute; hence חֵיל Is 36[2] and גֵּיא Ze 14[4] must be intended as forms of the absolute state, shortened in consequence of their close connexion.

(§ 116 *f* and *k*) or in the genitive, the case of a word depending on a noun. Such a genitive relation is usually termed an *improper annexion*. The nearer definition contains a statement either of the *material*, e. g. Ex 3[8], &c., אֶרֶץ זָבַת חָלָב וּדְבָשׁ *a land flowing with milk and honey*; or of the *means*, e. g. חַלְלֵי־חָרֶב *slain with the sword*, Is 22[2]; or the *cause*, Ct 2[5] *sick of love*; or of the *scope* of the attribute,[1] e. g. Gn 39[6] יְפֵה־תֹאַר *fair of form*; cf. Gn 41[2.4], Ex 34[6], Is 1[4], Jer 32[19], Na 1[3], ψ 119[1], Jb 37[16]; or of the *manner*, e. g. ψ 59[6] בֹּגְדֵי אָוֶן *faithless ones of wickedness* (wickedly faithless).

Especially frequent is the use of this genitive to name the part of *γ* the body described as being affected by some physical or mental condition, e. g. ψ 24[4] נְקִי כַפַּיִם *clean as regards hands*, &c.; 2 S 9[3], Is 6[5], Jb 17[9]; Is 19[10] אַנְמֵי־נָפֶשׁ *grieved in soul*; 1 S 1[10], Jb 3[20]. Also such examples as Am 2[16], Pr 19[1], where a suffix is attached to the substantive, must be regarded as instances of the genitive construction, on the analogy of Pr 14[2], see § 116 *k*.

§ 129. *Expression of the Genitive by Circumlocution.*

Besides the construction of a nomen rectum dependent upon a nomen *α* regens in the construct state (§§ 89 and 128), the connexion of two nouns may also be effected otherwise, either by simply attaching the dependent noun by means of the preposition לְ, which, according to § 119 *r*, expresses, besides other ideas, like that of *belonging to*,[2] or by the addition of a relative clause (אֲשֶׁר לְ, see *h* below).

1. The introduction of a genitive by לְ sometimes occurs even when the *β* construction with the construct state would be equally possible, e. g. 1 S 14[16] הַצֹּפִים לְשָׁאוּל *the watchmen of Saul*; ψ 37[16], 2 Ch 28[18] (where indeed the circumlocution makes the sense much plainer); as a rule, however, this use is restricted to the following cases:—

(*a*) To prevent a nomen regens being determined by a following determinate *γ* genitive, e. g. 1 S 16[18] בֶּן לִישַׁי *a son of Jesse* (בֶּן־יִשַׁי would be, according to § 127 *a*, *the son of Jesse*); cf Gn 14[18], 36[12], 41[12], Nu 16[22] (27[16]), 1 S 17[8], 2 S 19[21], ψ 122[5]. Hence, regularly מִזְמוֹר לְדָוִד (ψ 3[1], &c.) *a psalm of David* (properly belonging to David as the author), for which לְדָוִד *of David* is used alone elliptically in ψ 11[1], 14[1], &c. Such a case as לְדָוִד מִזְמוֹר (ψ 24[1], &c.) is not to

[1] Cf. the Latin *integer vitae scelerisque purus*; *tristes animi*, &c.

[2] Cf. the *σχῆμα* Κολοφώνιον in Greek, e. g. *ἡ κεφαλὴ τῷ ἀνθρώπῳ* for *τοῦ ἀνθρώπου* (Bernhardy's *Syntax*, p. 88). The Arab grammarians distinguish a twofold genitive, one of which may be resolved by לְ, and the other by מִן [see Wright's *Arabic Grammar*, vol. ii, § 75 ff.]. The *de* of the Romance languages is a development of the latter idea; the Gascon, however, says e. g. *la fille à Mr. N.*, laying stress upon the idea of *belonging to* and not that of *origin*, as in *la fille de* . . . of the literary language.

be regarded as a transposition, but מִזְמוֹר is used epexegetically for the general term omitted before לְדָוִד (as it were, a poem *of David, a psalm*). Moreover, the introduction of the author, poet, &c., by this *Lamed auctoris* is the customary idiom also in the other Semitic dialects, especially in Arabic.

d (*b*) When a genitive is to be made dependent on a nomen regens, which is itself composed of a nomen regens and rectum, and represents, as a compound, one united idea, e. g. Ru 2[3] חֶלְקַת הַשָּׂדֶה לְבֹעַז *the portion of field belonging to Boaz* (חֶ׳ שְׂדֵה בֹעַז would be *the portion of the field of Boaz*); 2 K 5[9] *at the house-door of Elisha*. This especially applies to the cases in which the compound regens represents a term in very common use, the fixed form of which cannot be altered, e. g. 1 K 14[19] עַל־סֵפֶר דִּבְרֵי הַיָּמִים לְמַלְכֵי יִשְׂרָאֵל *in the book of the chronicles of the kings of Israel*; 15[23], &c.; cf. also Jos 19[51].

e (*c*) When for any other reason the construction with the nomen regens in the construct state is inadmissible; cf. e. g. Lv 18[20], where שִׁכְבָתְךָ, on account of the suffix, cannot be used in the construct state; but Lv 15[16 ff.], &c., שִׁכְבַת־זָרַע; Ju 3[28] *the Jordan fords of Moab* (יַרְדֵּן as a *proper name* cannot be used in the construct state); Ex 20[5] *upon the third and upon the fourth generation of them that hate me*; וְעַל־רִבֵּעִים must be kept in the absolute state for the sake of conformity with עַל־שִׁלֵּשִׁים, and for the same reason also לְאֹהֲבַי לַאֲלָפִים.

f (*d*) After statements of number in such cases as Gn 8[14] בְּשִׁבְעָה וְעֶשְׂרִים יוֹם לַחֹדֶשׁ *on the seven and twentieth day of the month*; cf. 7[11], 16[3] and frequently, or as in Hag 1[1] בִּשְׁנַת שְׁתַּיִם לְדָרְיָוֶשׁ *in the second year of Darius*; the numeral here is always one compound idea with the substantive numbered, and consequently (as in the examples under *b*) does not admit of being in the constr. st. with a genitive. The same naturally applies also to such examples as 1 K 3[18] בַּיּוֹם הַשְּׁלִשִׁי לְלִדְתִּי *on the third day of my giving birth* (i. e. after my giving birth). Cf. also the standing phrase בְּאֶחָד לַחֹדֶשׁ *on the first* (day) *of the month*, Gn 8[5] and frequently.

g Rem. In cases like 2 S 3[3] וּבְכֹרוֹ אַמְנוֹן לַאֲחִינֹעַם *and his firstborn was Amnon of Ahinoam*, the genitive expressed by circumlocution with לְ is in reality dependent on a regens which is omitted (בֶּן לַאֲחִינֹעַם *a son of Ahinoam*); cf. 2 S 3[3.5], 1 K 14[13], Am 5[3] (unless לְבֵית יִשְׂרָאֵל originally depended on *thus spake the Lord*), and the remarks on לְדָוִד מִזְמוֹר under *c* above.

h 2. The periphrastic expression of the genitive by means of אֲשֶׁר לְ is used principally to state the *possessor*, e. g. Gn 29[9] הַצֹּאן אֲשֶׁר לְאָבִיהָ *her father's sheep* (prop. *the sheep which* belonged *to her father*); Gn 47[4] and frequently. So also (according to § 128 *a*) when a genitive depends on more than one substantive, e. g. Gn 40[5] *the butler and the baker who* (belonged) *to the king of Egypt* (וְאֹפֵה מֶלֶךְ מִצְרַיִם would indicate only the baker as belonging to the king); or when a genitive (as in the examples under *d* above) is added to a compound, which expresses one united idea (Ru 4[3]); or when, as a fixed term (e. g. a title), it appears always in the same form, e. g. Ct 1[1] שִׁיר הַשִּׁירִים אֲשֶׁר לִשְׁלֹמֹה *the Song of songs, of Solomon*; 1 S 21[8], 2 S 2[8], 1 Ch 11[10]; cf. also Gn 41[43].[1]

---

[1] In New Hebrew שֶׁל (derived from שֶׁלְּ = לְ אֲשֶׁר, see § 36, and cf. Ct 1[6], 3[7], שֶׁלִּי, שֶׁלִּשְׁלֹמֹה) is used like the simple relative דִּי, דְּ in Aramaic, as an independent sign of the genitive.

§ 130. *Wider Use of the Construct State.*

The construct state, which, according to § 89 *a*, primarily represents *a* only the immediate government by one substantive of the following word (or combination of words), is frequently employed in rapid narrative as a connecting form, even apart from the genitive relation; so especially—

(1) Before prepositions,[1] particularly in elevated (prophetic or poetic) style, especially when the nomen regens is a participle. Thus before בְּ, שִׂמְחַת בַּקָּצִיר *the joy in the harvest*, Is 9^2, 2 S 1^{21}, ψ $136^{8f.}$; in participles, Is 5^{11}, 9^1, 19^8, ψ 84^7, and especially often when בְּ with a suffix follows the participle, e. g. ψ 2^{12} כָּל־חוֹסֵי בוֹ; cf. Na 1^7, Jer 8^{16} (ψ 24^1); ψ 64^9 (unless רֹאֶה should be read); $98^{7.\,2}$—Before לְ, Ho 9^6 (but read probably מִחֲמַדֵּי כַסְפָּם); ψ 58^5 (before לָמוֹ); Pr 24^9, Jb 18^2, La 2^{18} (before לָךְ); 1 Ch 6^{55}, 23^{28}; in participles, Ez 38^{11}, Jb 24^5; before לְ with an infinitive, Is 56^{10}, and again before לְ with a suffix, Gn 24^{21}, Is 30^{18}, 64^3;[3]—before אֶל־, Is 14^{19}, Ez 21^{17};—before אֵת־ (*with*), Is 8^6;—before מִן, Gn 3^{22}, Is 28^9 (a participle); Jer 23^{23}, Ez 13^2, Ho 7^5;—before עַל־, Ju 5^{10};—before בִּלְתִּי, Is 14^6;—before the *nota accus.* אֵת, Jer 33^{22};—before a locative (which in such cases also serves as a genitive), Ex 27^{13}, Jer 1^{15}.

(2) Before *wāw copulative*, e. g. Ez 26^{10}; but חָכְמַת Is 33^6, גְּוִילַת 35^2, *b* and שְׁכֶבֶת 51^{21} may be cases of an intentional reversion to the old feminine ending *ath*, in order to avoid the hiatus (וָ) ה ֶ.

(3) When it governs the (originally demonstrative) pronoun אֲשֶׁר; *c* so especially in the combination מְקוֹם אֲשֶׁר, Gn 39^{20}, 40^3, *the place where* (prop. *of that in which*) *Joseph was bound*; cf. § 138 *g*; or בִּמְקוֹם אֲשֶׁר Lv $4^{24.33}$, 2 S 15^{21}, 1 K 21^{19}, Jer 22^{12}, Ez 21^{35}, Ho 2^1. We should expect הַמָּקוֹם אֲשֶׁר, בַּמָּקוֹם אֲשֶׁר, as in Gn 35^{13}, &c., *at the place which . . .*, cf. § 138; but אֲשֶׁר is treated as a nomen rectum instead of as an attribute.

---

[1] Cf. König, 'Die Ueberwucherung des St.-constr.-Gebrauchs im Semit.,' *ZDMG.* 53, 521 ff.

[2] In Ju 8^{11} the article is even used before a construct state followed by בְּ, in order to determine the whole combination שְׁכוּנֵי בָּאֳהָלִים *tent-dwellers*, taken as one word; cf., however, the remarks in § 127 *f–i* on similar grammatical solecisms.

[3] These are to be distinguished from the cases where לְ follows a construct state, which in conjunction with מִן (and the following לְ) has become a sort of preposition or adverb of place; thus, we have מִבֵּית־לְ Ex 26^{33} (for which in Ez 1^{27} merely בֵּית לְ) meaning simply *within*; מִימִין לְ (2 K 23^{13}, Ez 10^3) *on the right hand* (i.e. south) *of*; מִצָּפוֹן לְ (Jos $8^{11.13}$, &c., Ju 2^9) *on the north of*; cf. also Jos 15^{21} and לִפְנֵי מִן Neh 13^4.

Cf. also מִיּוֹם אֲ followed by a *perfect* in 1 S 29[8], and מִימֵי אֲ Lv 13[46], Nu 9[18].[1]

d (4) When it governs independent sentences (cf. § 155), which virtually stand to the construct state (as nomen regens) in a sort of genitive relation, e. g. Ex 4[13] בְּיַד־תִּשְׁלָח prop. *by the hand of* him whom *thou wilt send*; Nu 23[3] דְּבַר מַה־יַּרְאֵנִי *the matter of* that *which he shall show me*, i. e. whatever he shall; Is 29[1] קִרְיַת חָנָה דָוִד *the city where David encamped*; Jer 48[36], ψ 16[3] (if the text be right), 65[5] (Pr 8[32]), ψ 81[6], Jb 18[21] *the place of him that knoweth not God*; Jb 29[16], La 1[14] (if the text be right) *into the hands* of those against whom *I cannot stand*.[2] In Gn 39[4] (כָּל־יֶשׁ־לוֹ) the כָּל־ takes after it a noun-clause, and in Ex 9[4], still more boldly, a subst. with לְ.—Very often a *time-determination* governs the following sentence in this way; thus אַחֲרֵי followed by a perfect, Lv 25[48], 1 S 5[9]; בְּיוֹם ψ 102[3] (before a noun-clause), Ex 6[28], Nu 3[1], Dt 4[15], 2 S 22[1], ψ 18[1], 59[17], 138[3] (in every case before a following perfect), ψ 56[10] (before an imperfect); מִיּוֹם followed by the perfect, Jer 36[2]; כָּל־יְמֵי Lv 14[46], 1 S 25[15], Jb 29[2] (בִּימֵי *as in the days when . . .*[3]; cf. כִּימוֹת and שְׁנוֹת before a perfect, ψ 90[15]); בְּעֵת before a perfect, Jer 6[15] (cf. 49[8], 50[31]); before an imperfect, Jb 6[17]; תְּחִלַּת before a perfect, Ho 1[2].

e (5) Connected with a following word in apposition; certainly so in such cases as בְּתוּלַת בַּת־צִיּוֹן *the virgin, the daughter of Zion*, Is 37[22]; cf. 23[12], Jer 14[17]; also 1 S 28[7] אֵשֶׁת בַּעֲלַת־אוֹב *a woman, possessor of a soothsaying spirit*; cf. Dt 21[11].—Gn 14[10], Ju 19[22] (but read probably אֲנָשִׁים with Moore, as in Dt 13[14], Ju 20[13], 1 K 21[10]); 2 K 10[6], 17[13] *Qᵉrê*; Jer 46[9], ψ 35[16] (?), 78[9], Jb 20[17 b] (unless נַהֲרֵי or נַחֲלֵי be a gloss).

f Rem. Some of the above passages may also be explained by supposing that there exists a real genitive relation towards the preceding construct state, which has been, as it were, provisionally left *in suspenso*, in consequence of the insertion of some interrupting word, e. g. Is 37[22], &c.; Jb 20[17 a]. Elsewhere (Dt 33[19], ψ 68[34]) the *nomen regens* probably governs the following construct state directly.[4]

---

[1] In Dt 23[5] the construct state governs a sentence introduced by the *conjunction* עַל־דְּבַר אֲשֶׁר (עַל־דְּבַר אֲשֶׁר *by reason of the fact that*, i. e. *because*); so also in 1 S 3[13].

[2] Probably Gn 22[14] is also to be so explained (contrary to the accents), and certainly (contrary to the very unnatural division of the verses) 2 Ch 30[18], which should read on thus: יְהוָה הַטּוֹב יְכַפֵּר בְּעַד כָּל־לְבָבוֹ הֵכִין *the good Lord pardon every one that setteth his heart to seek God.* [See Wickes' *Accentuation of the Twenty-one Prose Books of the Old Testament*, p. 140.]

[3] Cf. Na 2[9] מִימֵי הִיא, usually explained to mean *from the days* that *she* hath been, but the text is evidently very corrupt.

[4] So also Is 28[16] *a corner stone of the preciousness* (יְקַרַת is a *substantive* not an *adjective*) *of a fixed foundation*, i. e. a precious corner stone of surest foundation.—In 2 S 20[19] the text is wholly corrupt; in ψ 119[128] read כָּל־פִּקּוּדֶיךָ.

(6) The numeral אַחַד *one* for אֶחָד in close connexion, and even with *g* small disjunctives, e. g. Gn 3^{22}, 48^{22}, 1 S 9^{3}, 2 S 17^{22}, Is 27^{12}, Zc 11^{7}.

The character of these passages shows that the numeral here cannot be in the construct state, but is merely a rhythmical shortening of the usual (tone-lengthened) form.

§ 131. *Apposition.*

1. Apposition in the stricter sense is the collocation of two sub- *a* stantives in the same case in order to define more exactly (or to complete) the one by the other, and, as a rule (see, however, below, under *g*), the former by the latter. Apposition in Hebrew (as in the other Semitic languages[1]) is by no means confined to those cases in which it is used in English or in the classical languages. It is not infrequently found when either the *subordination* of one substantive to the other or some more circumstantial kind of epexegetical addition would be expected.

2. The principal kinds of apposition in Hebrew are:—

(*a*) The collocation of *genus* and *species*, e. g. אִשָּׁה אַלְמָנָה *a woman* *b* (who was) *a widow*, 1 K 7^{14}; נַעֲרָה בְתוּלָה *a damsel* (that is) *a virgin*, Dt $22^{23.28}$, Ju 4^{4}, 19^{1}, 21^{12}, 1 S 30^{17}, 1 K 1^{2}; cf. Gn 13^{8}, 21^{29} (where, however, קְשָׁת is probably an explanatory gloss); Ex 24^{5} (1 S 11^{15}), 2 S 15^{16}, 1 K 3^{16}, 5^{29} (but probably סֵבֶל should be read instead of סַבָּל); Is 3^{24} (unless מַעֲשֶׂה is to be read), Jer 20^{1}. Perhaps also כֹּהֵן הָרֹאשׁ *the priest* (who is) *the chief man*, 2 K 25^{18}, &c.; others take כֹּהֵן as constr. st.—In 2 S 10^{7} read כָּל־צְבָא הַגִּבֹּרִים with the LXX, as in the parallel passage 1 Ch 19^{9} for כָּל־צְבָא הַגִּ׳, which is evidently meant to refer to the reading in 2 S.

(*b*) Collocation of the *person* or *thing* and the *attribute*, e. g. Jb 20^{29} *c* (27^{13}) זֶה חֵלֶק־אָדָם רָשָׁע *this is the portion of a man*, (who is) *a wicked man* (but רָשָׁע might also be an adject.); cf. Pr 6^{12}.—Lv 6^{13}, 16^{4} (where, however, קֹדֶשׁ is probably a gloss); Pr 22^{21} אֲמָרִים אֱמֶת *words* (which are) *truth*; (immediately after אִמְרֵי אֱמֶת) cf. 1 S 2^{13}, Mi 1^{11} (where, however, בֹּשֶׁת is most probably a gloss on עֶרְיָה); Zc 1^{13} (=*comfortable words*); ψ 45^{5} (?), 68^{17} (cf. verse 16). In a wider sense this includes also such cases as ψ 60^{5} יַיִן תַּרְעֵלָה *wine* which is *staggering* (intoxicating drink), which causes staggering[2]; 1 K 22^{27}, 2 Ch 18^{26} לַחַיִם (in

[1] On certain uses of apposition peculiar to the Semitic languages, cf. the exhaustive discussion by Fleischer, 'Ueber einige Arten der Nominalapposition im Arab.' (*Kleine Schriften*, ii. 16); [and see also Driver, *Tenses*, Appendix IV.]

[2] Unless it is to be translated *thou gavest us intoxication to drink as wine* (and so in 1 K 22^{27} *give him affliction to eat as bread*, &c.); cf. ψ 80^{6} and the analogous examples of apposition in the form of a second accusative in § 117 *kk*. More-

Is 30[20] parallel with צַר לָחֶם) *water* which is *affliction*, drunk in trouble (imprisonment). Still more boldly, 1 K 5[3] בְּקַר רְעִי *oxen* which were taken out of the *pastures*, and 1 K 6[7] *undressed stones* which come from the *quarry*, probably a corruption of מְמַסָּע. A person and a condition are in apposition in Ez 18[6] (unless בְּנִדָּתָהּ is to be read).—In 1 S 4[1] read אֶבֶן הָעֵ֫זֶר, as in 5[1], 7[12].

d (*c*) Collocation of the *person* (Dt 28[36]) or *thing* (form) and *material*,[1] or of the *place* or *measure* and its *contents*, e. g. 1 Ch 15[19] בִּמְצִלְתַּיִם נְחֹשֶׁת *with cymbals* which were *brass*, i. e. of brass; cf. Ex 26[25], Dn 11[8], 1 Ch 28[15.18] (?); Ex 28[17] *four rows*, namely *stones* (for which 39[10] has טוּרֵי אֶבֶן); cf. 2 Ch 4[13], Lv 6[3] (see, however, § 128 *d*); 2 K 7[1] סְאָה סֹלֶת *a seah* of *fine flour*; cf. 2 K 7[16.18], Gn 18[6], Ex 16[33], Lv 5[11], Ru 2[17], 1 K 16[24], 2 K 5[23] כִּכָּרַיִם כֶּסֶף *two talents* of *silver*;[2] cf. 5[17], Ex 39[17], Ez 22[18] (if the text be right). With the *material* placed before the *measure*, Ex 30[23f.].—A *period of time* and its contents are placed in apposition חֹדֶשׁ יָמִים *a month* of *days*, i. e. a month's time=for a whole month, Gn 29[14], Nu 11[20.21], cf. Dt 21[13], 2 K 15[13], and שְׁנָתַיִם יָמִים *two years' time*, i. e. two full years, Gn 41[1], 2 S 13[23], 14[28], Jer 28[3.11], Dn 10[2f.].

Finally, under this head may be included all the cases in which a numeral (regarded as a substantive) is followed by the object numbered in apposition, e. g. שְׁלֹשָׁה בָנִים *trias* sc. *filii*, § 97 *a* and § 134 *b*.

e (*d*) Collocation of the *thing* and the *measure* or *extent*, *number*, &c., e. g. Nu 9[20] יָמִים מִסְפָּר *days*, (a small) *number*, i. e. only a few days; כֶּסֶף מִשְׁנֶה *money*, *repetition*, i. e. twice as much money, Gn 43[12] (unless כֶּסֶף be constr. st.); מַיִם בִּרְכַּיִם *water* which was of the measure of the *knees*, which reached to the knees, Ez 47[4] (also מֵי מָתְנַיִם *water that was to the loins*, in the same verse). This likewise includes the cases in which a noun is followed in apposition by a numeral (see § 134 *c*) or an adverb, originally conceived as a substantive, e. g. Neh 2[12] אֲנָשִׁים מְעַט *men, a few*, i. e. some few men; 1 K 5[9] תְּבוּנָה הַרְבֵּה *understanding, much-making*, i. e. much understanding, unless הַרְבֵּה is to be taken as an adverb with וַיִּתֵּן, as in 2 S 8[8] with לָקַח.

---

over, having regard to יֵ֫ין הָרֹקַח *spiced wine*, Ct 8[2], and עַיִר פֶּ֫רֶא *a wild ass's colt*, Jb 11[12] (in which passages יֵ֫ין and עַיִר must certainly be in the construct state) we cannot but ask whether the Masora does not intend the יֵ֫ין in ψ 60[5] to be taken as construct state (for which elsewhere יַיִן).

[1] Cf. also the examples treated above in § 127 *h*.

[2] On the anomalous form כִּכָּרַיִם (instead of כִּכְּרַיִם; cf. כִּכָּרִים immediately before), see § 88 *b*.

(*e*) Collocation of the *thing* and its *name*, e. g. בְּהָרְרָם שֵׂעִיר *in their mountainous district, Seir* (perhaps only a later gloss), Gn 14⁶; הָאָרֶץ כְּנָעַן *the land Canaan* (כנען probably only a later gloss), Nu 34²; cf. Ezr 9¹, 1 Ch 5⁹ (see under *g* below).—For examples of nouns in the construct state before a noun in apposition, see § 130 *e*. *f*

Rem. 1. Only in certain combinations does the noun of nearer definition come first, e. g. הַמֶּלֶךְ שְׁלֹמֹה, הַמֶּלֶךְ דָּוִד *king David, king Solomon* (less frequently דָּוִד הַמֶּלֶךְ as in 2 S 13³⁹, 1 K 2¹⁷, 12², 2 K 8²⁹, 9¹⁵, and in late Hebrew, Hag 1¹.¹⁵ [cf. the Aramaic order דריוש מלכא], and often in Chron.).—A chiasmus occurs in Is 45⁴, the name standing after the defining noun in the first part of the verse, and before it in the parallel clause. *g*

2. When the *nota accusativi* (אֵת, אֶת־) or a preposition precedes the first substantive, it *may* be repeated before the noun in apposition, e. g. Gn 4², 22², 24⁴, 47²⁹, Is 66²¹; this usually occurs when the nearer definition precedes a *proper name*. As a rule, however, the repetition does not take place (Dt 18¹, Jer 33¹⁸, 1 S 2¹⁴). A noun in apposition is made determinate, even after a noun with a prefix, in the ordinary way, e. g. 2 Ch 12¹³ בִּירוּשָׁלַ͏ִם הָעִיר *in Jerusalem, the city which*, &c.[1] *h*

3. Sometimes a second adjective is used in apposition to a preceding adjective, in order to modify in some way the meaning of the first, e. g. Lv 13¹⁹ בַּהֶרֶת לְבָנָה אֲדַמְדֶּמֶת *a white-reddish* (light red) *bright spot*. *i*

4. *Permutation* is to be regarded as a variety of apposition. It is not complementary like apposition proper (see *a* above), but rather *defines* the preceding substantive (or pronoun, see below), in order to prevent any possible misunderstanding. This includes cases like Gn 9⁴ *with the life thereof* (which is) *the blood thereof*; Ex 22³⁰, Dt 2²⁶, 1 S 7⁹, 2 K 3⁴ *an hundred thousand rams, the wool*, i. e. the wool of the rams; Dt 25¹⁵ *this cup of the wine*, that is *of fury* (but חֲמָה is probably a gloss); Is 42²⁵ *he poured upon him fury*, namely *his anger*;[2] but especially the examples in which such a permutative is added to a preceding pronoun, viz.— *k*

(*a*) To a separate pronoun, e. g. Ex 7¹¹; with regard to the vocative, cf. § 126 *f*. *l*

(*b*) To an accusative suffix, e. g. Ex 2⁶ *she saw him, the child* (unless אֶת־הַ֫ is a later gloss); Ex 35⁵, Lv 13⁵⁷*b*, 1 K 19²¹ (where, indeed, הַבָּשָׂר appears to be a late gloss); 21¹³, 2 K 16¹⁵ *Keth.*, Jer 9¹⁴, 31², Ez 3²¹, Ec 2²¹ (according to Delitzsch rather a double accusative).[3] *m*

(*c*) To a noun-suffix, e. g. Ez 10³ בְּבֹאוֹ הָאִישׁ *when he went in, the man*; 42¹⁴; cf. Pr 13⁴ (?), Ez 3¹²; so also after a preposition with suffix, e. g. Ec 4¹⁰ אִי לוֹ הָאֶחָד *woe to him, the one alone*; with a repetition of the preposition, Nu 32³³, Jos 1² לָהֶם לִבְנֵי יִשְׂרָאֵל *to them, to the children of Israel*; Ju 21⁷, Jer 51⁵⁶, *n*

---

[1] In 1 K 11⁸ participles after לְכָל־נָשָׁיו, as in 2 K 10⁶ after אֶת־גְּדֹלֵי הָעִיר, in 19² after a determinate accusative, and in Hag 1⁴ after בָּבָתֵּיכֶם, are used *without* the article; these, however, are probably to be explained not as in apposition, but according to § 118 *p*.

[2] But כַּיִם Gn 6¹⁷ (cf. 7⁶) is to be regarded as a later gloss upon the archaic מַבּוּל.

[3] For וַיְשַׁנֵּנוּ 1 S 21¹⁴ either וַיְשַׁנֶּה is to be read or the *Kethibh* is to be explained according to § 75 *b*, note. Also יִלְכְּדֵנוּ Pr 5²² has hardly preserved the correct form.

Ez 42^5 (?), Dn 11^{11}, 1 Ch 4^{42}, 2 Ch 26^{14}.[1]—Cf. finally, Ct 3^7, where the suffix precedes the genitive periphrastically expressed by שֶׁלְּ, as in Ez 9^1, where the genitive is expressed by לְ.[2]

o Of a different kind are the cases in which the permutative with its proper suffix follows as a kind of correction of the preceding suffix, e. g. Is 29^{23} *when he* (or rather) *his children see*, &c. (but יְלָדָיו is clearly a gloss); cf. ψ 83^{12}; in Jb 29^3 read בַּהֲהֵלוֹ (infin. Hiph.) or at least its syncopated form בַּהֲלוֹ.

p 5. Cases of apposition in a *wider sense* are those in which the nearer definition added to the noun was originally regarded as an *adverbial accusative*; on its use with the verb and on the relative correctness of speaking of such an accusative in Hebrew, cf. § 118 *a* and *m*. Owing to the lack of case-endings, indeed, it is in many instances only by analogies elsewhere (especially in Arabic) that we can decide whether the case is one of apposition in the narrower or in the wider sense; in other instances this must remain quite uncertain. However, the following are probably cases of apposition in the wider sense:—

q (*a*) Such phrases as מִשְׁנֶה כֶּסֶף *a double amount in money*, Gn 43^{15}; cf. Jer 17^{18}; 1 S 17^5 *five thousand shekels in brass*, but this might also be taken (as in *d*) *shekels* which were *brass*; certainly such cases as Jb 15^{10} *older than thy father in days*, and the expression of the superlative by means of מְאֹד (originally a substantive), e. g. טוֹב מְאֹד *very good*, Gn 1^{31} (cf. also Ec 7^{16} צַדִּיק הַרְבֵּה *righteous over much*), and the very frequent הַרְבֵּה מְאֹד prop. *a much-making exceedingly*, i. e. *exceedingly great*, Gn 15^1, 41^{49}, also Pr 23^{29} פְּצָעִים חִנָּם *wounds without cause*,[3] perhaps also Gn 34^{25} (בָּטַח).

r (*b*) A few examples, in which an epexegetical substantive is added to a substantive with a suffix; thus, Ez 16^{27} מִדַּרְכֵּךְ זִמָּה *of thy conduct in lewdness* (but it is also possible to explain it (as in *c*) *of thy conduct*, which is *lewdness*); cf. Ez 24^{18}, 2 S 22^{33} מָעוּזִּי חָיִל *my fortress in strength*, i. e. my strong fortress (cf., however, ψ 18^{33}); Hb 3^8, ψ 71^7. While even in these examples the deviation from the ordinary usage of the language (cf. § 135 *n*) is strange, it is much more so in חֲבָלְתּוֹ חוֹב Ez 18^7, i. e. according to the context *his pledge* for *a debt*; Ezr 2^{62} כִּתְבָם הַמִּתְיַחֲשִׂים, i. e. *their register*, namely of *those that were reckoned by genealogy* (but perhaps הַמִּתְיַ֫חֲשִׂים is in apposition to the suffix in כִּתְבָם), also the curious combinations (mentioned in § 128 *d*) of בְּרִיתִי with a proper name (Lv 26^{42}), and in Jer 33^{20} with הַיּוֹם.[4]

---

[1] But in Is 17^6 we should certainly divide the words differently and read בְּסָעֲפִי הַפְּרִיָה, in Jer 48^{44} read אֵלֶיהָ for אֶלֶיהָ, and in Pr 14^{13} אַחֲרִית הַשִּׂמְחָה; in Gn 2^{19} נֶפֶשׁ חַיָּה is a late gloss upon לוֹ, and in Ez 41^{25} אֶל־דַּלְתוֹת הַהֵיכָל a gloss on אֲלֵיהֶן.

[2] Some of the examples given above are textually (or exegetically) doubtful, whilst in the case of others, especially those from the later Books, we cannot help asking whether such a prolepsis of the genitive by means of a suffix (as e. g. Ez 10^3) is not due to the influence of Aramaic, in which it is the customary idiom; cf. Kautzsch's *Gramm. des Biblisch-Aram.*, § 81 *e* and § 88.

[3] In ψ 69^5 חִנָּם (like שֶׁקֶר *in a false way, falsely*, ψ 35^{19} and 38^{20}) is used as an *adverbial accusative* with a participle; cf. § 118 *q*.

[4] But in Nu 25^{12} שָׁלוֹם may also be explained, according to *c*, as really in apposition. Cf. on the whole question Delitzsch, *Psalmen*, 4th ed., p. 203, note 1.

6. In Dt 33[4] (מוֹרָשָׁה, perhaps מוֹר֫ לִקְהִלַּת is to be read), 33[27] (מָעֹנָה), Ju 7[8] *S* (צֵדָה), the absolute state appears to be used instead of the construct to govern a following logical genitive; this, however, cannot be explained either as a special kind of apposition, or (with Hitzig) as a peculiarity of the dialect of Northern Palestine, but is merely a textual corruption. On the other hand, in Jb 31[11] עָוֹן is evidently intended to combine the readings עֲוֹן פְּלִילִים and עָוֹן פְּלִילִי (as in verse 28).—The remarkable combination אֱלֹהִים צְבָאוֹת in ψ 80[8.15] is due to the fact that in ψψ 42–83 אֱלֹהִים has almost throughout been subsequently substituted by some redactor for the divine name יהוה; on יהוה צְבָאוֹת cf. § 125 *h*. In ψ 59[6], 80[5.20], and 84[9] יהוה has been reinstated in the text before אֱלֹהִים צְבָאוֹת.[1]

7. Lastly, the nearer definition (qualification) of a noun may be effected by *t* means of a preposition (either with a suffix or with an independent noun), but must then be distinguished from the cases in which the preposition is dependent on a verb or verbal idea, e. g. Gn 3[6] *and she gave also* לְאִישָׁהּ עִמָּהּ *unto her husband with her* (= *her husband who was with her*); in Gn 9[16] (*that I may remember the everlasting covenant between God and every living creature of all flesh*) and other places, the qualification of the noun is itself also qualified.

§ 132. *Connexion of the Substantive with the Adjective.*[2]

1. The adjective (like the participle used adjectivally), which serves *a* as an *attribute* of a substantive, stands *after* the substantive, and agrees with it in *gender* and *number*, e. g. אִישׁ גָּדוֹל *a great man*, אִשָּׁה יָפָה *a beautiful woman*. If the substantive is immediately connected with a genitive, the attribute follows the latter, since, according to § 89 and § 128 *a*, the construct state and the genitive belonging to it are inseparably united, e. g. Est 8[15] עֲטֶרֶת זָהָב גְּדוֹלָה *a great crown of gold*.—On the attribute when attached to a *determinate* substantive, see above, § 126 *u*.

---

[1] Without this assumption it would be inconceivable that יהוה אֱלֹהֵי צְבָאוֹת should not have been written; that the author of these Psalms regarded צְבָאוֹת already as an independent name of God (so Gesenius and Olshausen) is out of the question.

[2] On the expression of attributive ideas by substantives, cf. above, § 127 *h*, and § 128 *o*, with the note; § 135 *n* and § 141 *c* (substantives for adjectives as predicates of noun-clauses) and § 152 *u* (periphrases for negative qualities). On the use of the feminine of adjectives (and participles) to express abstract ideas, see § 122 *q*. It remains to mention further the employment (mostly only in poetry) of certain epithets in place of the substantives to which the quality in question belongs; e. g. אָבִיר *the strong one*, i. e. *God*; אַבִּיר *the strong one*, i. e. *the bull* (in Jer 8[16], &c., *the horse*); קַל *swift* = *the runner* (of the *horse*, Is 30[16]); לְבָנָה *alba*, i. e. *luna*; פְּרִיָה (*fructifera*) *a fruitful tree*, Is 17[6] (so פֹּרָת Gn 49[22]); רֹבֵץ *a croucher*, i. e. *a crouching beast of prey*, Gn 4[7]. Cf. also רֹזֵן (*gravis*, *augustus*) and נָשִׂיא (*elatus*?), i. e. *a prince*. The use of adjectives and participles for substantives is much more extensive in Arabic. In Greek and Latin poetical language cf. such examples as *ὑγρή* = *the sea*; *merum* for *vinum*, &c.

b Rem. 1. Where an adjectival attribute appears to stand *before* its substantive (according to the usual explanation, for the sake of special emphasis) the relation is really appositional in character; thus, Is 10^{30} עֲנִיָּה עֲנָתוֹת *O thou poor one, Anathoth!* (but probably עֲנִיָּהּ *answer her*, is to be read); cf. 23^{12}, 53^{11} (*a righteous man, my servant*; but in 28^{21} זָר and נָכְרִי are *predicates* preceding the substantives); Jer $3^{6.10\,f.}$, ψ 18^{4} *him who is worthy to be praised will I call upon, the Lord*; 92^{12} (apposition after participles).—But רַבִּים and רַבּוֹת *many*, are sometimes placed, like numerals, before the substantive, Jer 16^{16}, Neh 9^{28} (in ψ 145^{7} רַב is a *subst. regens*, in 89^{51} the text is corrupt); an appositional relation can scarcely be intended in these instances.

c 2. In a few expressions (mostly poetic) the adjective appears not as an attribute *after* the substantive, but in the construct state governing it; so in the singular, Ex 15^{16} (unless גְּדֹל should be read); 1 S 17^{7} (*the height of his stature*); in the plural, 1 S 17^{40} חַלְקֵי אֲבָנִים *smooth ones of* (among) *stones*, i.e. *smooth stones*; Is 35^{9}, Ez 7^{24}, ψ 46^{5}, and with a following collective instead of a plural, e.g. Is 29^{19} אֶבְיוֹנֵי אָדָם *the poor among men*, i.e. *poor men*; Jer 49^{20}, Zc 11^{7}; cf. in Latin *canum degeneres*. However, in almost all these cases the adjective which is made into a *regens* is strongly emphatic, and is frequently equivalent to a superlative (see below, § 133 *g*).

d 3. When *two* adjectives follow a feminine, sometimes only that standing next to the noun takes the feminine termination, e.g. 1 K 19^{11} רוּחַ גְּדֹלָה וְחָזָק וגו׳ (but read גָּדוֹל); 1 S 15^{9} (but cf. § 75 *y*); Jer 20^{9}, ψ 63^{2}. A similar dislike of the feminine form may also be observed in the case of verbal predicates referring to feminine subjects, cf. § 145 *p* and *t*.

When an attribute qualifies several substantives of different genders, it agrees with the masculine, as being the *prior gender* (cf. § 146 *d*), e.g. Neh 9^{13} חֻקִּים וּמִצְוֹת טוֹבִים; Jer 34^{9}, Zc 8^{5}.

When *three* attributes follow a substantive, the first two may stand without a conjunction, and the last be attached by *wāw copulative*, cf. Zc 1^{8}.

e 4. After feminines plural ending in יִם__ (§ 87 *p*) the adjectival attribute (in accordance with the fundamental rule stated above, under *a*) takes the ending וֹת, e.g. Is 10^{14} בֵּיצִים עֲזֻבוֹת *forsaken eggs*; Gn 32^{16}. For a strange exception see Jer 29^{17} (differently in 24^{2}).

f 5. With regard to *number* it is to be remarked that—

(*a*) Substantives in the *dual* are followed by adjectives (or participles) in the *plural*, e.g. ψ 18^{28} (Pr 6^{17}) עֵינַיִם רָמוֹת *haughty eyes*; Is 35^{5}, Jb $4^{3\,f.}$, cf. § 88 *a*.

g (*b*) *Collective* ideas are not infrequently joined with the *plural* of the adjective or participle (*constructio ad sensum*); thus, e.g. צֹאן *sheep* [with *fem. plur.*], Gn 30^{43}, 1 S 25^{18}; עָם = *men*, 1 S 13^{15}, Is 9^{1}; כָּל־יִשְׂרָאֵל = *all the Israelites*, 1 S 2^{14}; גָּלוּת = *the exiles*, Jer 28^{4}; cf. also נֶפֶשׁ שְׁנַיִם *two souls*, Gn 46^{27}.[1] Cf. similar phenomena in the connexion of collectives with plural predicates in § 145 *c*.

h (*c*) The *pluralis excellentiae* or *pluralis maiestatis* is joined, as a rule, to the singular of the attribute, e.g. ψ 7^{10} אֱלֹהִים צַדִּיק; 2 K $19^{4.16}$ (= Is $37^{4.17}$); Is 19^{4}; but cf. אֱלֹהִים חַיִּים[2] Dt 5^{23}, 1 S $17^{26.36}$, Jer 10^{10}, 23^{36}, perhaps also

---

[1] But it is impossible to take תְּמִימִם in Ez 46^{6} as an attribute of בָּקָר; probably it is a correction intended to harmonize the passage with Nu 28^{11}, where *two* young bullocks are required.

[2] Cf. 1 S 28^{13}, where אֱלֹהִים (in the sense of *a spirit*) is followed by עֹלִים as a second accusative; conversely in 1 S $19^{13.16}$, a singular suffix refers back

Ex 20^3 אֱלֹהִים אֲחֵרִים = *another god*, and Jos 24^{19} אֱלֹהִים קְדֹשִׁים (but cf. above, § 124 *g–k*). On the other hand, 1 S 4^8 is to be explained as having been said by the Philistines, who supposed that the Israelites had several gods. On the connexion of אֱלֹהִים with a plural predicate, see § 145 *i*.

2. On the adjective (in the construct state) governing a following genitive, see § 128 *x*; for the participle in the same construction, see § 116 *f–l*.

§ 133. *The Comparison of Adjectives. (Periphrastic Expression of the Comparative and Superlative.)*

A. Wünsche, 'Der Komparativ im Hebr. im Lichte der arab. Gramm.,' in *Vierteljahrsschrift für Bibelkunde*, 1904, p. 398 ff.

a **1.** Hebrew possesses no special forms either for the comparative or superlative of the adjective.[1] In order to express a comparative, the person or thing which is to be represented as excelled in some particular quality is attached to the attributive word by the preposition מִן־ (מִ·), e. g. 1 S 9^2 גָּבֹהַּ מִכָּל־הָעָם *higher than any of the people*. The fundamental idea evidently is, *tall away from all the people* (beyond all the people); cf. Ju 14^{18} מַה־מָּתוֹק מִדְּבַשׁ וּמֶה עַז מֵאֲרִי *what is sweeter than honey? and what is stronger than a lion?* Ez 28^3, Am 6^2. Frequently an infinitive appears as the object of the comparison, e. g. Gn 29^{19} *it is better that I give her to thee, than that I should give her*, &c.; Ex 14^{12}, ψ $118^{8f.}$[2]

b Rem. 1. This use of מִן־ is also very common when the attributive idea is represented by an intransitive verb, e. g. 1 S 10^{23} וַיִּגְבַּהּ מִכָּל־הָעָם *and he was higher than any of the people*; Na 3^8, Jb 7^6. Elsewhere, especially after transitive verbs, מִן־ rather represents (on its different senses see § 119 *v–z*) the idea

---

to תְּרָפִים *household god* (but not so in Gn 31^{34}), as in ψ 46^4 to the plural of amplification יַמִּים *sea*. On the other hand, it is very doubtful whether רַבָּה ψ 78^{15} is to be regarded as an attributo of תְּהֹמוֹת and not rather as the adverb, *abundantly*.

[1] There is in Arabic a special form of the adjective (the *elative*) for the comparative and superlative, which in Hebrew would have the form אַקְטָל. Instances of it, perhaps, are אַבָּז *daring, cruel*, אַכָּז *deceptive* (of a brook drying up), and its opposite אֵיתָן (contracted from *'aitan*) *constantly flowing, perennis*. These forms are, however, used without any perceptible emphasis, and cannot be regarded as more than isolated relics of an elative formation which has become obsolete, much as the Latin comparative disappears in Italian, and still more so in French, and is supplanted by the circumlocution with *più, plus*.

[2] In Ju 11^{25} the adjective is specially intensified by repetition, *art thou so much better than Balak?* It would also be possible, however, to translate *art thou really better . . .?*

of a *separation*, *distinction* or *superiority* of one person or thing *from* or *over* others.[1] This is evident in such cases as בָּחַר מִן־ *to choose* something (to prefer it) *before* something else, e. g. Jb 7^{15}, cf. Dt 14^{2} (also יִתְרוֹן . . . מִן־ *the excellence of . . . over . . .*, Ec 2^{13}); it is also seen in examples like Gn 37^{3} וְיִשְׂרָאֵל אָהַב אֶת־יוֹסֵף מִכָּל־בָּנָיו *now Israel loved Joseph more than all his* (other) *children*; 29^{30}, 1 S 2^{29}, Ho 6^{6}.[2]

c 2. A somewhat different idea underlies the use of מִן־ after adjectives, or intransitive verbs possessing an attributive sense, when the thought to be expressed is that the quality is *too little* or *too much* in force for the attainment of a particular aim or object, e. g. Is 7^{13} הַמְעַט מִכֶּם *is it a small thing* (i. e. too little) *for you to . . .?* Jb 15^{11}; after an intransitive verb, e. g. Gn 32^{11} *I am too insignificant* (קָטֹנְתִּי) *for all the mercies* (I am not worthy of . . .), &c.; cf. also the expressions כָּבֵד מִן־ *to be too heavy for one*, Ex 18^{18}, Nu 11^{14}, ψ 38^{5}; קָשָׁה מִן־ *to be too hard for one*, Dt 1^{17}; מָעַט מִן־ *to be too few for something*, Ex 12^{4}; גָּבַר מִן־ *to be too strong for one*, ψ 65^{4}; עָצַם מִן־ *to be too mighty for one*, Gn 26^{16}; רוּם מִן־ *to be too high for one*, ψ 61^{3}; צַר מִן־ *to be too narrow for one*, Is 49^{19}; קָצַר מִן־ *to be too short for something*, Is 50^{2}, and very frequently נִפְלָא מִן־ *to be too wonderful for one* (and, consequently, inconceivable or unattainable), Gn 18^{14}, Dt 17^{8}, 30^{11}, Jer 32^{17}, Pr 30^{18}; in ψ 139^{6} פְּלִיאָה in the same sense is followed by מִן.—This use is especially seen in the numerous instances in which the attribute is followed by מִן־ with an infinitive, e. g. 1 K 8^{64} *the brazen altar . . . was* קָטֹן מֵהָכִיל *too little to receive* (to be able to receive) *the burnt offering*, cf. Gn 4^{13}, 36^{7} *too great for them to dwell together*; after verbs, e. g. Ex 12^{4}, Is 28^{20}, ψ 40^{6}. Finally, cf. רַב לָכֶם מִן־, followed by the infinitive, *it is enough* (prop. *too much*) *for you to . . .*, meaning *ye have . . . long enough*, 1 K 12^{28}; cf. Ex 9^{28} and Ez 44^{6} (מִן־ followed by a substantive).[3]

d In all these instances מִן־ expresses either the *removal* of a thing *from* a person, or the *severance* of the person from some aim or object; cf. also the expression לֹא־יִבָּצֵר מֵהֶם כֹּל וגו׳ *nothing will be unattainable for them* (prop. there shall not be cut off from them anything which, &c.), Gn 11^{6}, Jb 42^{3}.

e 3. The attributive idea, on which מִן־ logically depends, must sometimes, in consequence of a pregnant use of the מִן־ (see the analogous examples in § 119 *ff*), be supplied from the context, e. g. Is 10^{10} וּפְסִלֵיהֶם מִירוּשָׁלַ͏ִם *whose graven images* were more numerous *than* those at *Jerusalem*, &c.;[4] Mi 7^{4} worse *than a thorn hedge*; ψ 62^{10} lighter *than a breath*; Jb 11^{17} clearer *than the noonday*; Ec 4^{17} better *than*, &c.

---

[1] Cf. the Latin ablative with the comparative; also the etymology of such words as *eximius*, *egregius*, and the Homeric ἐκ πάντων μάλιστα, Il. 4, 96; ἐκ παπέων, 18, 431.

[2] On the other hand, the phrase צָדַק מִן־ expresses not a comparison, but only a relation existing between one person and another; thus, in Gn 38^{26} צָדְקָה מִמֶּנִּי means, *she is in the right as against me*; cf. ψ 139^{12}, Jb 4^{17}, 32^{2}.—In Pr 17^{12} *rather* (to meet with so and so) *than* . . . is expressed by וְאַל־ before the second member.

[3] Cf. also 2 K 4^{3}, where the idea of *doing something too little* is paraphrased by the Hiph. הַמְעִיט = *do not too little*, sc. לִשְׁאֹל *in borrowing* empty vessels.

[4] With this *comparatio decurtata*, cf. the still bolder pregnant construction in ψ 4^{8}, מֵעֵת *greater gladness than at the time*, &c.

2. The correlative comparatives *greater—less* (*older—younger*) are *f* expressed by the simple adjective with the article (*the great*, equivalent to *the greater*, &c.); Gn 1[16], 19[31.34], 27[15], 29[16.18.26].

3. To express the *superlative* it is also sufficient (see above, *f*) to *g* make the adjective determinate, either by means of the article or a following partitive genitive (or suffix); in this case the article or genitive indicates that the attribute in question belongs especially to one or more definite individuals;[1] e. g. 1 S 9[21] הַצָּעִיר *the least*; 16[11] הַקָּטָן *the little one*, i. e. the *youngest* of eight sons; 17[14] *David was* הַקָּטָן *the youngest, and the three great*, i. e. elder, &c.; Gn 42[13], 44[2], Ct 1[8].—So also with a qualifying adjective, e. g. Gn 9[24] בְּנוֹ הַקָּטָן *his youngest son*; cf. Jos 14[15]; also with a following genitive, 2 Ch 21[17] קְטֹן בָּנָיו *the youngest of his sons*: Pr 30[24] *the least upon the earth*; with suffix, Mi 7[4] טוֹבָם *their good one*, i. e. the best of them; Jon 3[5] מִגְּדוֹלָם וְעַד־קְטַנָּם *from the greatest of them even to the least of them*; cf. the inverse order in Jer 6[13], 31[34].

Rem. 1. The above examples apply only to the most common *relative* *h* attributes (*great, small, good*), and to expressions which by usage easily came to be recognized as periphrases for the superlative. Other adjectives, however, when followed by a partitive genitive, also acquire the sense of a superlative; this appears from the context, e. g. Dt 33[19] *the most hidden treasures of the sand*; Ju 5[29] *the wisest amongst her ladies*; Is 14[30], 19[11], 23[8*t.*], 29[19], Jer 49[20], Ez 28[7], Zc 11[7], ψ 45[13], Jb 30[6] (*in the most horrible of valleys*), 41[22]; probably also ψ 35[16]. On this government by the adjective generally, cf. § 132 *c*.—Moreover, the combination of a substantive in the construct state with an adjective used substantivally (§ 128 *w*) sometimes serves as a periphrasis for the superlative, e. g. Is 22[24] כֹּל כְּלֵי הַקָּטָן *all the smallest vessels*. On Ct 7[10] see § 126 *x*.

2. Other periphrases for the superlative are the use of a substantive in the *i* construct state before the plural of the same word (which is naturally to be regarded as a partitive genitive; cf. our *book of books*), e. g. Ex 26[33] קֹדֶשׁ הַקָּדָשִׁים *the most holy place*; שִׁיר הַשִּׁירִים (Ct 1[1]) *the most excellent song*; cf. Gn 9[25] (= *servus servorum, the lowest servant*); Nu 3[32], Dt 10[17] (ψ 136[2.3])[2]; 1 K 8[27], Is 34[10] (cf. Gal 1[5], Rev 22[5]); Jer 3[19], Ez 16[7], 26[7] (*king of kings*, of Nebuchadrezzar; cf. 1 Tim 6[15], Rev 17[14], 19[16], and another kind of periphrasis in ψ 95[3]); Ec 1[2]. Similarly in Jer 6[28] two participles are combined, and in Ho 10[15] two substantives in the singular. Finally, the same object is attained by connecting one substantive in the construct state with another of the same stem (שַׁבַּת שַׁבָּתוֹן *a sabbath of solemn rest*, i. e. an obligatory day of rest, Ex 31[15], &c.) or of the same meaning (e. g. חֹשֶׁךְ אֲפֵלָה *a thick darkness*, Ex 10[22]).

3. The intensification of attributes by means of repetition belongs rather *k* to rhetoric than to syntax, e. g. Ec 7[24] עָמֹק עָמֹק *exceeding deep*; 1 S 2[3], Pr 20[14]; the adjective is even used three times in Is 6[3].—Cf. the repetition of adverbs for the same purpose in Gn 7[19], Nu 14[7] (מְאֹד מְאֹד *exceedingly*, also בִּמְאֹד מְאֹד Ex 1[7], &c.); Ez 42[15].—On the other hand, in Dt 28[43] the repetition expresses

---

[1] Cf. also עֶלְיוֹן *the one above*, i. e. *the Most High*.

[2] *God of gods, and Lord of lords*, just as the supreme god of the Babylonians is called *bēl bēlī* (Tiele, *Compend. der Rel.-Gesch.*, p. 87).

a continuous progress, *higher and higher . . . lower and lower*; in Dt 2^{27} (see § 123 *e*) and 16^{20} (*nothing but justice*) the constancy of the action. Cf. Ex 23^{30} מְעַט מְעָט *little by little, very gradually*.[1]

l The repetition of substantives serves also as a periphrasis for the superlative in such cases as לְדֹר דֹּר (Ex 3^{15}) = *to the remotest generations*; cf. 1_7^{16}, Jer 6^{14}, 8^{11} (*perfect peace*); Ez 21^{32} (עָוָה three times);[2] 35^7, Na 1^2; cf. also Ho $2^{21\,f.}$ and the emphatic combination of synonymous verbs in Is 33^{10}. Sometimes the completeness of an action or state is expressed by placing together two or even three substantives of the same stem and of similar sound, cf. Is 22^5, Ez 6^{14} ($33^{28\,f.}$, 35^3); 32^{15}, Na 2^{11}, Zp 1^{15} (Jb 30^3, 38^{27}).

§ 134. *Syntax of the Numerals.*

Cf. the exhaustive statistics collected by Sven Herner, *Syntax der Zahlwörter im A. T.*, Lund, 1893. E. König, 'Zur Syntax der Zahlwörter im A. T.,' *AJSL.* xviii. 129 ff.

a **1.** The numerals from 2 to 10, as being originally abstract substantives,[3] may be connected with their substantives in three different ways. They may stand either—

(*a*) In the construct state *before* the substantive (the object numbered being consequently in the genitive), e. g. שְׁלֹשֶׁת יָמִים *a triad of days*, i. e. three days; שְׁנֵי הָאֲנָשִׁים *the two men*; or

b (*b*) In the absolute state *before* it (the object numbered being in apposition, § 131 *d*), e. g. שְׁלֹשָׁה בָנִים *a triad*, viz. *sons*, i. e. three sons; שְׁנַיִם אֲנָשִׁים *two men*; or

c (*c*) In the absolute state (likewise in apposition) *after* the object numbered, e. g. בָּנוֹת שָׁלוֹשׁ. So especially in long lists, since in these the substantives naturally come first, e. g. Gn 32^{15}. Nu 7^{17}, 28^{19}. Apart from such cases, the frequency of this order in the later Books is due to the fact that the character of the numeral tended more and more to become adjectival rather than substantival.[4]

---

[1] Adverbs of the same stem are connected in this way in Nu 6^9, Is 29^5, 30^{13}; of different stems in Is 5^{26} and Jo 4^4. In Nu 12^2 the particles רַק אַךְ appear to be placed together for a similar purpose, equivalent to *simply and solely*.

[2] Different in kind from the triple utterance of the same words in 2 S 18^{33}, Jer 7^4 and 22^{29}, and the double exclamation in Jer 4^{19} and La 1^{16} (?).

[3] Cf. § 97 *a*, where it is shown that the masculine is the original form of the numerals (used for both genders), and that the feminine was afterwards differentiated and used with masc. nouns, primarily in the second decade and then in the first as well.

[4] From Herner's tables (op. cit., pp. 55–66) it appears, according to p. 68, that in the documents J, E, D of the Pentateuch, and in Jos 1–12, Judges, Samuel, Isaiah, Jeremiah, the Minor Prophets, Psalms, Megilloth, and Job, the numeral never, or very rarely, stands *after* its noun; in Kings and Ezekiel it stands several times *after*; in the Priestly Code nearly always *after*; in Chronicles, Ezra, Nehemiah, and Daniel, nearly as often *after* as *before* the noun. In Ex 28^{10} the Masora makes the numeral in the genitive follow the construct state of the substantive numbered; we should, however, read וְאֶת־שֵׁמוֹת הַשִּׁשָּׁה; for the omission of the article before שׁ, cf. § 126 *w*.

Rem. In Lv 24^{22} אֶחָד follows the construct state מִשְׁפַּט, but here as in *d*
Nu 15^{16} מִשְׁפָּט should be read. In Gn 42^{19} אֶחָד is in apposition to a substantive with a suffix (=*one of you brethren*; but verse 33 *the one of you brethren*). In Nu 31^{28} אֶחָד precedes the substantive in the Aramaic manner (=*one each*). —For מֵאָה־שָׁנָה (Gn 17^{17}, &c.) we find regularly in the Priestly Code (except in Gn 17^{17}, 23^{1}) מְאַת שָׁנָה (Gn 5^{3}, &c.) *an hundred years*. On the connexion of abstract numerals with suffixes, as שְׁנֵיהֶם *their duality*, i.e. *they two*, Gn 2^{25}, &c. (also with a strengthening separate pronoun, as שְׁנֵינוּ אֲנַחְנוּ 1 S 20^{42}), cf. § 97 *i*.

2. The numerals from 2 to 10 take the object numbered in the *e*
plural,[1] with very few exceptions, such as Ex 16^{22} (where שְׁנֵי הָעֹמֶר =*the double of an omer*), 2 K 22^{1}, Ez 45^{1}, cf. 2 K 8^{17} and 25^{17} *Kᵉth.* The numerals from 11 to 19 generally take the plural, but with certain substantives frequently used with numerals the singular is more common (see further, under *f*). The tens (from 20 to 90), when they precede, take the singular (in the accusative, cf. § 131 *p*) of certain nouns frequently used with numerals (אֶלֶף *a thousand*, אִישׁ, יוֹם, כֹּר, נֶפֶשׁ, שֶׁקֶל—but only in Ezekiel and the Priestly Code), otherwise the plural, as בָּנִים, בָּנוֹת, עָרִים (but cf. also Ju 11^{33}), &c.; on the other hand, the plural is necessary when they follow the object numbered in apposition (e.g. אַמּוֹת עֶשְׂרִים *twenty cubits*, 2 Ch $3^{3f.}$; with the exception of 2 S 24^{24}, only in late Books). After מֵאָה and אֶלֶף the substantive numbered may be used either in the singular or plural, see further under *g*.

Rem. 1. After the numerals from 11 to 19 the singular is used, as a rule, *f*
with יוֹם *day*, שָׁנָה *year*, אִישׁ *man*, נֶפֶשׁ *soul* (person), שֵׁבֶט *tribe*, מַצֵּבָה *pillar* (Ex 24^{4}), sometimes with אַמָּה *cubit*, חֹדֶשׁ *month*, עִיר *city*, שֶׁקֶל *shekel* (compare our *four-year-old*, *ten pound*), e.g. Dt 1^{2} אַחַד עָשָׂר יוֹם (cf., however, such exceptions as Dt 1^{23}, Jos 4^{2}, &c.).—Substantives other than these are used in the plural with the numerals from 11 to 19, and the numeral may even follow the substantive, especially in later passages, as Nu $7^{87\,f.}$, 1 Ch 4^{27}, 25^{5}.

2. After מֵאָה (מְאַת [so almost exclusively in the Priestly Code, e.g. always *g*
מְאַת אֶלֶף], מֵאוֹת, מָאתַיִם) and אֶלֶף (אַלְפֵי, אַלְפַּיִם) the substantives אִישׁ, אֶלֶף, אַמָּה (except in Ez 40^{27}), יוֹם, רַגְלִי, צֶמֶד are regularly used in the singular, generally also שָׁנָה, כִּכָּר, כֹּר, שֶׁקֶל (with the exception of Jos 7^{21}, 2 S 14^{26}, &c.); cf., moreover, Gn 33^{19}, 24^{60} (אַלְפֵי רְבָבָה), Est 1^{1}, Ju 21^{12}, Dt 7^{9}, 1 K 5^{12}, 2 Ch 9^{15}.—Examples of the *plural* after מֵאָה are Gn 26^{12}, 1 S 18^{25}, 2 S 16^{1}, 1 K 18^{4}; after מְאַת Ex 38^{27}; after מֵאוֹת Ju 15^{4}, 2 S 8^{4}, 1 K 10^{17},

---

[1] On examples such as Gn 46^{27} (נֶפֶשׁ שִׁבְעִים *two souls*), cf. § 132 *g* (collectives joined with the plural of the adjective).

Ez 4^{2}[17]; after מָאתַיִם 1 S 25^{18}, 1 K 7^{20}; after אֶלֶף 1 S 25^{2}, 1 K 3^{4}, 5^{6}, 2 K 3^{4}, ψ 90^{4}; after אַלְפִים 1 S 17^{5}, Jb 42^{12}; after אַלְפֵי Mi 6^{7}; after אַלְפַּיִם Is 36^{8}.— In Dn 12^{11} the plural יָמִים precedes the numeral *twelve hundred*.

h 3. Numerals compounded of tens and units (like 21, 62) take the object numbered either *after* them in the singular (in the accusative), e. g. Gn 5^{20} שְׁתַּיִם וְשִׁשִּׁים שָׁנָה *two and sixty years* (שָׁנָה in the singular, according to *e*, since it conforms to the ten immediately preceding; but also שְׁלֹשִׁים וּשְׁמֹנָה שָׁנָה Dt 2^{14}), or *before* them in the plural, especially in the later Books, Dn 9^{26}, &c.; or the object is repeated (but only in 1 K 6^{1}, and the Priestly Code; sometimes even several times, e. g. Gn 23^{1}, $25^{7.17}$ thrice) in the plural with the units, and in the singular with the tens and hundreds, e. g. Gn 12^{4} חָמֵשׁ שָׁנִים וְשִׁבְעִים שָׁנָה *seventy and five years*; Gn 23^{1} מֵאָה שָׁנָה וְעֶשְׂרִים שָׁנָה וְשֶׁבַע שָׁנִים *an hundred and twenty and seven years*. Cf. Gn $5^{6\,ff.}$

i Rem. 1. It may further be remarked with regard to the order, that the thousand or thousands always precede the hundreds, &c., and the hundreds almost always come before the smaller numbers (in Kings and Ezekiel sometimes, and in the Priestly Code usually, after the smaller numbers), the tens in the earlier Books (documents J and D of the Pentateuch, in Joshua 1–12, Judges, Samuel, Isaiah, and also in Ezra and Nehemiah) *before* the units, but in Jeremiah, Ezekiel, the Priestly Code, Joshua 13–24 *after* the units (see Herner, op. cit., p. 73). After the hundreds the smaller number is very frequently added without וְ, especially in Ezra, Nehemiah, and Daniel.

On the syntax of the cardinals in general:—

k 2. The cardinals are determined by the article, when they refer back (without being connected with the object numbered; cf., however, Lv $25^{10\,f.}$, Nu 16^{35}, Jos 4^{4}, 2 S 23^{13}) to a number or list already mentioned, e. g. Gn 2^{11} שֵׁם הָאֶחָד פִּישׁוֹן *the name of the one* (the first) *is Pishon*; Gn 14^{9} *four kings against the five* (enumerated in verse 2); cf. 1 Ch $11^{20\,f.}$, and the determinate tens in Gn $18^{29.31\,f.}$ A demonstrative with the article may also be added to a numeral determined in this way, e. g. Dt 19^{9} (but cf. also Gn 9^{19}, 22^{23}, where the numeral and demonstrative are practically determinate in themselves). In the case of the numerals from 11 to 19 the article may stand either before the unit (1 Ch 25^{19}, 27^{15}) or before עָשָׂר (Jos 4^{4}); it is used before all three members of a compound number (273) in Nu 3^{46}.

l In apposition with any determinate substantive the cardinal number is used *without* the article, not only when it precedes the substantive, as in Jos 15^{14} אֶת־שְׁלוֹשָׁה בְנֵי הָעֲנָק, where שְׁלוֹשָׁה is equivalent to a substantive determinate in itself; cf. Gn 18^{28}, Jos $6^{8.22}$, 1 S 17^{14}, 1 K 11^{31}, and the passages discussed above in § 126 *x*, Gn 21^{29}, &c.), but also when it follows the substantive, e. g. 1 K $7^{27.43\,f.}$ עֶשֶׂר and עֲשָׂרָה; the omission of the article may here, as in the cases noticed in § 126 *z*, be also due to the dislike of a hiatus, but cf. also שְׁנַיִם 2 K 25^{16} after a determinate substantive. The fact that it is by nature determinate would also be a very simple explanation of אֶחָד Nu 28^{4}, 1 S $13^{17\,f.}$, Jer 24^{2}, Ez 10^{9}, instead of the more usual הָאֶחָד, and of אַחַת 1 S 1^{2} for הָאַחַת.

Such cases as שִׁבְעַת הַיָּמִים Ju 14^{17} (which is determined by a following determinate genitive) are explained from § 127 *b*; 1 Ch 9^{25} perhaps from § 126 *q*; in Is 30^{26} probably the light of all the seven days of the week is meant; on the other hand, in 1 S 9^{20} and 25^{38} the article is, with Wellhausen, to be omitted. *m*

3. Certain specifications of *measure*, *weight*, or *time*, are commonly omitted after numerals, e.g. Gn 20^{16} אֶלֶף כֶּסֶף *a thousand* (shekels) *of silver*; so also before זָהָב Gn 24^{22}, 1 K 10^{16}, Is 7^{23}, cf. ψ 119^{72}. Moreover, Ru 3^{15} שֵׁשׁ שְׂעֹרִים *six* (ephahs) *of barley*; 1 S 10^{4} שְׁתֵּי־לְחֶם *two* (sc. *loaves*, see verse 3) *of bread*, cf. 17^{17} עֲשָׂרָה לֶחֶם; 2 S 16^{1}, where before לַיִן a measure, or perhaps some term like *cakes*, is to be supplied.—The number of cubits is stated in the Priestly Code (Ex 26^{2}, &c.) and in 1 K 6 and 7 (otherwise only in Ez $40^{5.21}$, 47^{3}. Zc 5^{2}, 1 Ch 11^{23}, 2 Ch $4^{2\,f.}$) by the addition of בָּאַמָּה prop. *by the cubit*. Also in Ex 27^{11} the Samaritan and LXX read בָּאַמָּה after אֹרֶךְ, and in 27^{15} אַמָּה after עֲשָׂרָה. *n*

4. The *ordinals* above 10 have no special forms, but are expressed by the corresponding cardinals, which may then stand either before or after the object numbered, e. g. Gn 7^{11} בְּשִׁבְעָה עָשָׂר יוֹם *on the seventeenth day*; Dt 1^{3} בְּאַרְבָּעִים שָׁנָה *in the fortieth year*; cf. Gn 14^{5}, 2 K 25^{27}, and, with repetition of שָׁנָה in a compound number, 1 K 6^{1}; such a cardinal occurs without בְּ (and therefore in the *accus. temporis*, according to § 118 *k*) in Gn 14^{4} (the Samaritan, however, has ובשלש); with the article (but without a numbered object, see under *k*), 1 K 19^{19}.[1]—On the position of the numeral as a genitive following its noun, cf. e. g. 1 K 16^{10} בִּשְׁנַת עֶשְׂרִים וְשֶׁבַע *in the twenty and seventh year*, and with a determinate numeral, Ex 12^{18}, Nu 33^{38}, Dt 15^{9}. In this case, however, שָׁנָה is very frequently repeated, e. g. Gn 7^{11}, 2 K 13^{10}; after a determinate numeral, Lv 25^{10}.[2] *o*

Rem. In numbering days of the month and years, the cardinals are very frequently used instead of the ordinals even for the numbers from 1 to 10, e.g. בִּשְׁנַת שְׁתַּיִם 1 K 15^{25}; בִּשְׁנַת שָׁלֹשׁ 2 K 18^{1}, &c., cf. Dt 15^{9}. The months themselves are always numbered by the ordinals (בָּרִאשׁוֹן, בַּשֵּׁנִי, &c., up to בָּעֲשִׂירִי), but not the days of the month, e. g. בְּאֶחָד לַחֹדֶשׁ Gn 8^{5}, &c., בְּאַרְבָּעָה לַחֹדֶשׁ בְּתִשְׁעָה לַחֹדֶשׁ 2 K 25^{8}, בַּחֲמִשָּׁה לַחֹדֶשׁ Ez 1^{1}, &c., בְּשִׁבְעָה לַחֹדֶשׁ Zc 7^{1}; בֶּעָשׂר לַחֹדֶשׁ Lv 23^{32} (always, however, *on the tenth day of the month*). On the *p*

---

[1] Somewhat different from this is Ex 19^{15} *be ready* לִשְׁלֹשֶׁת יָמִים prop. *after three days*, i. e. *on the third day* (in verses 11 and 16 and in Ezr 10^{8} the ordinal is used), also 1 S 30^{13} כִּי חָלִיתִי הַיּוֹם שְׁלֹשָׁה *because three days agone I fell sick*, prop. *to-day three* (days).

[2] All these expressions may indeed be explained by supposing that, e. g. in Lv 25^{10}, the proper meaning is *the year of the fifty years* which it completed, i. e. the fiftieth year; but it is more correct to regard שְׁנַת or בִּשְׁנַת in such cases not as a real *nomen regens*, but simply as a connective form to be explained on the analogy of the cases mentioned in § 128 *k*.

omission of יוֹם in all these cases see under *n*; only in late passages is יוֹם added, e. g. 2 Ch 29[17] בְּיוֹם שְׁמוֹנָה לַחֹדֶשׁ; Ezr 3[6] מִיּוֹם אֶחָד לַחֹדֶשׁ.—Finally, when the year is stated by בִּשְׁנַת governing a determinate ordinal, viz. 2 K 17[6] בִּשְׁנַת הַתְּשִׁיעִית *in the ninth year*; 2 K 25[1] (in Jer 52[4] בִּשְׁנָה), Jer 28[1] *Ke'th.*, 32[1] *Ke'th.*, 46[2], 51[59], Ezr 7[8]; בִּשְׁנַת in such cases is again (see note 2 on *o*) to be explained according to § 128 *k*. This is supported by the fact that the Masora on Jer 28[1], 32[1] requires in the *Qerê* בַּשָּׁנָה for בשנת.

q **5.** *Distributives* are expressed either by repetition of the cardinal number, e. g. Gn 7[9.15] שְׁנַיִם שְׁנַיִם *two and two*; 2 S 21[20] שֵׁשׁ וָשֵׁשׁ *six each*; with the numbered object also repeated, e. g. Jos 3[12] אִישׁ אֶחָד לַשֵּׁבֶט אִישׁ אֶחָד *for every tribe a man*; Nu 13[2], 34[18] (אֶחָד מִן, as in Neh 11[1], *one out of every ten*); cf. § 123 *d*; or a periphrasis with אֶחָד לְ is used, Nu 17[18], Dt 1[23], cf. Is 6[2] לְאֶחָד after *six wings* twice repeated; the simple distributive לְ is, however, sufficient (as in לַלְּבָקָרִים, § 123 *c*), e. g. לְמֵאוֹת וְלָאֲלָפִים *by hundreds and by thousands*.

r **6.** The *multiplicatives* are expressed either (like the ordinals above 10, see under *o*) by the cardinals (in the feminine, probably owing to the omission of פַּעַם, פְּעָמִים; so König, *Lehrgeb.*, ii. 228), as שְׁתַּיִם *twice*, Jb 40[5]; שֶׁבַע *seven times*, Lv 26[21.24], Pr 24[16]; cf. also אַחַת *once*, 2 K 6[10], Jb 40[5], for which in Jb 33[14] בְּאַחַת[1] along with בִּשְׁתַּיִם (the latter also in 1 S 18[21]); or by the *dual* of the numeral, thus שִׁבְעָתַיִם Gn 4[15] (in verse 24 along with the cardinal 77 for 77 times); Is 30[26], ψ 12[7], 79[12]; אַרְבַּעְתַּיִם 2 S 12[6];[2] or periphrastically by פַּעַם *a time* (prop. *a step*, with the article, הַפַּעַם *this time*; cf. also בַּפַּעַם הַזֹּאת, with בְּ, like בְּאַחַת above), as פַּעַם אַחַת *once* (Neh 13[20] פַּעַם וּשְׁתַּיִם *once and twice*), פַּעֲמַיִם *twice*, שָׁלֹשׁ פְּעָמִים (for which in Ex 23[14], Nu 22[28.32] שָׁלֹשׁ רְגָלִים) *three times*; cf. Ez 41[6] *thirty-three times*; 2 S 24[3] *an hundred times*; Dt 1[11] *a thousand times*; 1 K 22[16] עַד־כַּמָּה פְעָמִים *until how many times*, i. e. how often. Cf. also עֲשֶׂרֶת מֹנִים *ten times*, Gn 31[7.14], and רַבּוֹת עִתִּים *many times*, Neh 9[28].—In Gn 43[34], *five times* is expressed by חָמֵשׁ יָדוֹת (prop. *five hands*),[3] and in Ex 16[5] the *double* is expressed by מִשְׁנֶה עַל־ (prop. *a repetition over and above that which*, &c.).—Of the ordinals שֵׁנִית is used as a numeral adverb, Gn 22[15], &c., *a second time*, cf. the Latin *tertium consul*; בַּשְּׁלִישִׁת *the third time*, 1 S 3[8]; פַּעַם חֲמִישִׁית *a fifth time*, Neh 6[5]; בַּשְּׁבִעִית *at the seventh* (time), 1 K 18[44], and בַּפַּעַם הַשְּׁ֫ Jos 6[16].

---

[1] But בְּאַחַת Nu 10[4] is to be translated *on one* (trumpet).

[2] Probably also כִּפְלַיִם Jb 11[6] (from כֶּפֶל *doubling*) does not mean *doubled* but *manifold*.

[3] But אַרְבַּע הַיָּדוֹת Gn 47[24] means *the* (other) *four parts*; cf. 2 K 11[7], Neh 11[1].

Rem. The collocation of a numeral with the next above it (either in the same or in different sentences) is a rhetorical device employed in *numerical sayings* to express a number, which need not, or cannot, be more exactly specified. It must be gathered from the context whether such formulae are intended to denote only an insignificant number (e. g. Is 17^6, *two or* at the most *three*), or a considerable number, e. g. Mi 5^4. Sometimes, however, this juxtaposition serves to express merely an indefinite total, without the collateral idea of intensifying the lower by means of the higher number. Thus *one* and *two* are connected by וְ, Dt 32^{30}, Jer 3^{14}, Jb 33^{14}, 40^5 (without וְ, ψ 62^{12}); *two* and *three*, Is 17^6 (Sirac 23^{16}, 26^{28}, 50^{25}), and without וְ, 2 K 9^{32}, Ho 6^2, Am 4^8; *three* and *four*, Jer 36^{23}, Am 1^{3-11}, Pr 30^{18}, 21^{29} (Sirac 26^5), and without וְ, Pr 30^{15}; *four* and *five*, without וְ, Is 17^6; *six* and *seven*, Jb 5^{19}, Pr 6^{16}; *seven* and *eight*, Mi 5^4, Ec 11^2; (*nine* and *ten*, Sirac 25^7).

III. Syntax of the Pronoun.

§ 135. *The Personal Pronoun.*

1. The *separate* pronouns,—apart from their employment as the subject in noun-clauses (cf. § 141 *a*) and the idiom mentioned under *d–h*,—are used, according to § 32 *b*, as a rule, only to give express emphasis to the subject; e. g. Gn 16^5, 2 S 24^{17} אָנֹכִי i. e. *I myself*, so also אֲנִי 2 S 12^{28}, 17^{15} (after the verb), Ez 34^{15}, ψ 2^6;[1] but 1 S 10^{18}, 2 S 12^7, Is 45^{12} אָנֹכִי *I* and none else; cf. also אֲנִי אֲנִי *I, I!* Ho 5^{14}, &c.; אַתָּה Gn 15^{15}, Ju 15^{18}, 1 S 17^{56} (as in 20^8, 22^{18}, Ex 18^{19}, Dt 5^{24}, Ju 8^{21}, after the imperative); 1 K 21^7; אַתֶּם Gn 9^7, Ex 20^{19} (after the verb, Ju 15^{12}); fem. Gn 31^6; הוּא 1 S 22^{18}; הִיא Gn 3^{20}, Ju 14^3; הֵמָּה Jer 5^5.— Sometimes, however, the separate pronoun appears to be placed before the verb more on rhythmical grounds, i. e. in order to give the statement a fuller sound than that of the bare verbal form (cf. the similar use of the infinitive absolute, § 113 *o*). Thus Gn 14^{23}, ψ 139^2, and most clearly in such passages as Gn 21^{24}, 47^{30}, Ex 8^{24}, Ju 6^{18}, 11^9, 1 S 12^{20}, 2 S 3^{13}, 21^6, 1 K 2^{18} (in solemn promises). The same explanation applies to אֲנִי at the beginning of sentences, e. g. Gn 24^{45}, Ho 5^3, 10^{11}, 12^{11}, ψ 39^{11}, 82^6, Jb 5^3.[2] *a*

Rem. 1. Different from this is the pleonastic addition of the separate pronoun immediately *after* the verb (according to Delitzsch on Ct 5^5 perhaps *b*

[1] Also הוּא, הִיא *he himself, she herself* (of persons and things), e. g. Is 7^{14} אֲדֹנָי הוּא *the Lord himself*; Est 9^1 הַיְּהוּדִים הֵמָּה *the Jews themselves*. In the sense of *the same* (ὁ αὐτός) or (*one and*) *the same*, הוּא is used in Is 41^4, $43^{10.13}$, 46^4, 48^{12} (always אֲנִי הוּא), ψ 102^{28} (אַתָּה הוּא), and probably also Jb 3^{19}.—The position of הֵמָּה, as an accusative of the object, before a perfect in 1 Ch 9^{22}, can at most be explained on the analogy of Aramaic (Ezr 5^{12}).

[2] As early as the Mēša' inscription (line 21 ff.) אנך frequently stands at the beginning of a new sentence after the dividing stroke.

a trace of popular language), e.g. 1 S 23^{22}(?), Ct 5^5, and (like other indications of the very late origin of the book) very frequently in Ecclesiastes, e.g. 1^{16}, $2^{1.11.15}$, $3^{17f.}$ and thirteen other places; in Aramaic, Dn 5^{16}.

c 2. Substantival subjects also are somewhat frequently resumed, and thus expressly emphasized, by the insertion of the corresponding separate pronoun of the 3rd person before the predicate is stated, e.g. Gn 3^{12} *the woman whom thou gavest to be with me, she* (הִיא) *gave me*, &c.; 14^{24} (הֵם); 15^4, 24^7, &c.; but הוּא in Is 7^{14} after the predicate and subject is equivalent to *he himself*.[1]

d **2.** Not infrequently the separate pronoun serves to give strong emphasis to a suffix of the same person which precedes (or sometimes even to one which follows), whether the suffix be attached to a verb (as accusative) or to a noun or preposition (as genitive). In English such an emphasis on the pronoun can generally be rendered only by laying greater stress upon it, or sometimes by repeating it; cf., on the contrary, the French *mon livre à moi*. The separate pronoun in such instances is not to be regarded as a *casus obliquus* (accusative or genitive), but as the subject of an independent sentence, the predicate of which must in each case be supplied according to the context.

e Examples of emphasis:—

(*a*) On a *verbal* suffix by means of אֲנִי (אָנִי), Gn 27^{34} בָּרְכֵנִי גַם־אָנִי *bless me, even me also* (prop. *b'ess me, I also* would be blessed); Zc 7^5; cf. also Ez 6^3, $34^{11.20}$ הִנְנִי אֲנִי; by אַתָּה (אָתָּה) Pr 22^{19} (but the text is most probably corrupt).—The separate pronoun *precedes* in Gn 24^{27} (אָנֹכִי); 49^8 (אַתָּה, not *Judah, thou art he whom*, but *Judah thee, thee thy brethren shall praise!*), and Ec 2^{15} גַּם אֲנִי.

f (*b*) On a noun-suffix with a substantive, by means of אֲנִי 2 S 19^1, Pr 23^{15}; by אַתָּה 1 K 21^{19} אֶת־דָּמְךָ גַּם־אָתָּה *thy blood, even thine*; by הוּא 2 S 17^5, Jer 27^7, Mi 7^3; by אֲנַחְנוּ 1 S 20^{42}, after שְׁנֵינוּ, but without special stress; Neh 5^2(?); by אַתֶּם Nu 14^{32}; by הֵם ψ 38^{11} (without special stress), הֵמָּה ψ 9^7.—The separate pronoun *precedes* in Jb 21^4 (אֲנֹכִי); Gn 40^{16}, Is 45^{12}, 1 Ch 28^2 (אֲנִי); Zc 9^{11} (אַתְּ); Jos 23^9 (אַתֶּם); Ez 33^{17} (הֵמָּה).—In ψ 89^{48}, where אֲנִי might be taken as strengthening חלד (equivalent in sense to חֶלְדִּי), we should read אֲדֹנָי for אֲנִי, as in verse 51.

g (*c*) On a suffix united with a preposition, 1 S 25^{24} בִּי אֲנִי *upon me, upon me*; 1 K 1^{26} לִי . . . אֲנִי; 2 Ch 35^{21} לֹא־עָלֶיךָ אַתָּה *not against thee*; 1 S 19^{23} גַּם עָלָיו גַּם הוּא *upon him also*; Dt 5^3 כִּי אִתָּנוּ אֲנַחְנוּ *but with us, even us*; Hag 1^4 לָכֶם אַתֶּם *for you yourselves*; Jer 25^{14} בָּם גַּם־הֵמָּה.—The separate pronoun *precedes* in 1 S 1^{23} אֲנֹכִי . . . לִי; 1 K 1^{20} אַתָּה . . . עָלֶיךָ; Mi 5^1 אַתָּה . . . מִמְּךָ, and 2 Ch 28^{10} אַתֶּם עִמָּכֶם.

h The same principle also explains Gn 4^{26} לְשֵׁת גַּם־הוּא *to Seth, to him also* (not גַּם־לוֹ); cf. 10^{21}, and Ex 35^{34}, Nu 4^{22}.

---

[1] Analogous to this is the resumption of a noun dependent on a preposition, by means of a pronominal suffix united with the same preposition, e.g. Gn 2^{17}, 2 S 6^{22}, 2 K 22^{18}, or of an object by means of the *nota accusativi* אֵת with suffix, e.g. 1 S 15^9 (where וְנִמְאָסֶת is certainly to be read), Is 8^{13}.

i **3.** The *oblique* cases of the personal pronouns expressed by means of a preposition (or the *nota accus.* אֵת) with a suffix may be used either in a demonstrative or reflexive sense,[1] as לוֹ *to him*, but also *to himself*, e.g. Ju 3[16] *and Ehud made* לוֹ *for himself a sword*, cf. Gn 33[17]; so also לָהֶם *sibi*, Is 3[9]; אֵלָיו *unto him*, and Gn 8[9] *unto himself*; אִתּוֹ *with him*, and Gn 22[3] *with himself*; עִמָּהּ *with her*, and 1 S 1[24] *with herself*; also apparently as a pleonastic *dativus ethicus* (see § 119 *s*), Jb 12[11], 13[1].

k Rarely, and only when marked emphasis is intended, is the *accusative* of the reflexive pronoun represented by the *nota accusativi* אֵת with a suffix (this being ordinarily expressed by the reflexive conjugations *Niph'al* and *Hithpa'ēl*[2]); thus, אֹתָם *se ipsos*, Ex 5[19], Jer 7[19] in sharp antithesis to הָאֹתִי; Ez 34[2.8.10]. Cf. § 57 at the end, together with note 2.

l Rem. There is a similar emphasis in Is 49[26] on בְּשָׂרָם and דָּמָם in the sense of *their own flesh, their own blood*. On the sometimes demonstrative, sometimes reflexive meaning of noun-suffixes of the 3rd person singular and plural, cf. § 91, *p* and *q*. For other circumlocutions to express the idea of *self*, see § 139 *f*.

m **4.** The *possessive pronouns* are, according to § 33 *c*, expressed by the *suffixes of the noun* (in the genitive),[3] which may represent either a *subjective genitive*, or (like the genitives proper, § 128 *h*) an *objective genitive*, e.g. חֲמָסִי *the wrong done against me*, Gn 16[5], Jer 51[35]; cf. Gn 9[2], 18[21], 27[13] (2 S 16[12] *K'th.*); Gn 30[23], 39[21] (cf. Ex 3[21], &c.); 50[4], Ex 20[20], 21[35], Ju 4[9], 13[12] (מַעֲשֵׂהוּ *the treatment of him*); Is 56[7], Jer 9[7], Na 3[19], Pr 1[27], 24[22], Jb 20[29], 23[14], 34[6]. Cf. also such pregnant expressions as ψ 20[3] יְשַׁלַּח עֶזְרְךָ *he will send thy help* (*help for thee*), i.e. he will send thee help; Gn 30[18], 39[21], Ex 2[9], Is 1[26] (*and I will restore judges for thee*); Ez 37[15].

When several substantives are co-ordinated, the pronominal suffix must be attached to each singly, e.g. Gn 36[6] *and Esau took* אֶת־נָשָׁיו וְאֶת־בָּנָיו וְאֶת־בְּנֹתָיו *his wives and his sons and his daughters*, &c.; 38[18], &c. In 2 S 23[5] the text is hardly correct.

---

[1] As in Luther's Bible *jm* (*ihm*), *jr* (*ihr*) for *sich*, and in our version *him, her* for *himself, herself*.

[2] *Niph'al* according to § 51 *e* (like *Hithpa'ēl* according to § 54 *f*) may also include the *dative* of the reflexivo pronoun.

[3] Like the substantival genitive, according to § 129 *h*, the possessivo pronoun may also be paraphrased by a relative clause, e.g. Ru 2[21] הַנְּעָרִים אֲשֶׁר לִי *the young men, which* are *to me*, i.e. *my young men*; so especially, when the substantive, which should take a genitive suffix, is already followed by a genitive, e.g. 1 S 17[40]. In this case, however, the suffix also is sometimes attached pleonastically, e.g. Ct 1[6] כַּרְמִי שֶׁלִּי *my vineyard, which* belongs *to me*. Cf. Ct 3[7], and the analogous pleonasms in 2 S 22[2] (but see ψ 18[2]) and ψ 27[2].

n **5.** When the genitive, following a construct state, is used periphrastically to express the idea of a material or attribute (§ 128 *o* and *p*), the pronominal suffix, which properly belongs to the compound idea (represented by the *nomen regens* and genitive), is, like the article (§ 127), attached to the second substantive (the genitive), e. g. הַר־קָדְשִׁי prop. *the hill of my holiness*, i. e. my holy hill, ψ 2^{6}, &c.; עִיר קָדְשֶׁךָ *thy holy city*, Dn 9^{24}; אֱלִילֵי כַסְפּוֹ *his idols of silver*, Is 2^{20}, 30^{22}, 31^{7};[1] cf. Dt 1^{41}, Is 9^{3}, 28^{1}, 41^{11}, Ez $9^{1f.}$, ψ 41^{10}, 150^{1}, Jb 18^{7} אוֹנוֹ צַעֲדֵי *his steps of strength*; 38^{6}; after an adjective as *nomen regens*, Is 13^{3} (Zp 3^{11}) עַלִּיזֵי גַאֲוָתִי *my proudly exulting ones*.—On the same analogy is the use of e. g. כְּלֵי מִלְחַמְתּוֹ Dt 1^{41} *his weapons of war* [cf. Is 41^{12}]; Is 56^{7} בֵּית תְּפִלָּתִי *my house of prayer*, although the genitive here does not convey the idea of an attribute.

o Rem. 1. Through a weakening in the distinction of gender, which is noticeable elsewhere (cf. § 110 *k*, 144 *a*, 145 *p*, *t*, *u*) and which probably passed from the colloquial language[2] into that of literature, *masculine* suffixes (especially in the plural) are not infrequently used to refer to *feminine* substantives; thus a noun-suffix in the singular, Ex 11^{6}, 25^{19}, Ju 11^{34};[3] in the plural, Gn 31^{9}, 32^{16}, 41^{23}, Ex 1^{21}, 2^{17}, Nu 27^{7} (but the feminine suffix twice immediately after, and so the Samaritan also in verse 7); 36^{6} (Samaritan בְּעִינֶיהָן, but also בְּעֵינֵיהֶם); Ju 19^{24}, 21^{22}, 1 S $6^{7.10b}$ (בְּנֵיהֶם); 9^{20}, Is 3^{16}, Ez $23^{45\,ff.}$ (alternating with הֵן); Am $4^{1f.}$ (but afterwards a feminine suffix); Jb 1^{14}, 39^{3} (חֶבְלֵיהֶם in parallelism with יַלְדֵיהֶן); 42^{15}, Ct 4^{2}, 6^{6}, Ru $1^{8\,ff.}$ (along with feminine suffixes); Dn 1^{5}, 8^{9}. Verbal suffixes in the singular, Ex 22^{25}; in the plural, Ju 16^{3}, Pr 6^{21}, Jb 1^{15}. But Gn $26^{15.18}$, 33^{13}, Ex 2^{17}, 1 S 6^{10a} are to be explained according to § 60 *h*. On הֵמָּה as feminine, see § 32 *n*. On the use of the masculine in general as the *prior gender*, see § 122 *g*.

p 2. The suffix of the 3rd person singular feminine (as also the separate pronoun הִיא Nu 14^{41}, Jos $1c^{13}$, Ju 14^{4}) sometimes refers in a general sense to the verbal idea contained in a preceding sentence (corresponding to our *it*); thus the verbal suffix, Gn 15^{6}, Nu 23^{19}, 1 S 11^{2}, 1 K 11^{12}, Is 30^{8}, Am 8^{10}; cf. Gn 24^{14} (בָּהּ *thereby*), 42^{36}, 47^{26}, Ex 10^{11} (אֹתָהּ *that*), Is 47^{7}. Elsewhere the suffix of the 3rd singular feminine refers to the plurals of things, e. g. 2 K 3^{3}

---

[1] On the other hand, more explicitly in prose, Gn 44^{2} אֶת־גְּבִיעִי גְּבִיעַ הַכֶּסֶף *my cup, the silver cup*.

[2] According to Diehl (see the title at the head of § 91 *a*), who adduces numerous instances on pp. 44 ff., 54 ff., 67 *f.*, many of these cases may be set down to corruption of the traditional text, while the sudden (and sometimes repeated) change of gender in suffixes is mainly due to the influence exercised on the copyists by the Mishnic and popular Aramaic dialects, neither of which recognizes such distinctions. Such influence, however, is insufficient to explain the large number of instances of this weakening, occurring even in the earlier documents.

[3] The Masora reckons six instances of מִמֶּנּוּ, where מִמֶּנָּה would be expected (Ju 11^{34}, where, however, the text is most probably corrupt), Ex 25^{15} (?), Lv 6^{8}, 7^{18}, 27^{9}, Jos 1^{7}; almost all these passages can, however, be easily explained in other ways.

[but see Kittel; so $13^{2.6.11}$; 10^{26}, but LXX מַצֶּבֶת], Jer 36^{23}, Jb 6^{20} (if the text is correct), 39^{15} (read תֶּחֱמֶם in v. 14), and to the plurals of names of animals, Is 35^{7}, Ezr 11^{5}. Conversely, plural suffixes refer to collective singulars, e.g. in Gn 15^{13}, Nu 16^{3}, 1 S 2^{8}, Zp 2^{7} [but read עַל הַיָּם]; and to a verbal idea contained in the preceding clause, in Ez 33^{18}, Jb 22^{21} (בָּהֶם *thereby*), Ez 18^{26}, 33^{19} (עֲלֵיהֶם *on that account, thereby*).[1] But the suffix in נְתָנוֹ Dt 21^{10} refers to the collective idea contained in אֹיְבֶיךָ; in Jon 1^{3} עִמָּהֶם refers to the sailors included in sense under the term אֳנִיָּה. In Jos 2^{4} read וַתִּצְפְּנֵם; in Is 30^{6} (מֵהֶם), 38^{16}, ψ 19^{5} (בָּהֶם) the text is most probably corrupt.

q 3. In a few examples the force of the noun-suffix or possessive pronoun has become so weak that the language appears to be almost entirely unconscious of it. Thus in אֲדֹנָי *my Lord*, usually explained as being from the *pluralis maiestatis* אֲדֹנִים (§ 124 *i*) with the suffix of the 1st singular (always with *Qameṣ* to distinguish it from אֲדֹנַי *my lords*, Gn 19^{2}; but see note below), used exclusively of God, not only in addressing him (Gn 15^{2}, 18^{3}, ψ 35^{23}), but ultimately (see, however, the note below), without any regard to the pronoun, as equivalent to *the Lord*.[2] On אֲדֹנָי as a *Qerê perpetuum* of the Masoretes for יהוה see § 17 *c* and § 102 *m*.

r A similar loss of vitality in the suffix is generally assumed in יַחְדָּו prop. *in his unitedness*, i.e. *he* &c. *together*, e.g. כָּל־הָעָם יַחְדָּו Ex 19^{8}; then, without regard to the suffix, even after the 1st person אֲנַחְנוּ יַחְדָּו 1 K 3^{18} in reference to two women; Is 41^{1}, Jb 9^{32}, Neh $6^{2.7}$; after the 2nd person, Is 45^{20}, &c. But the supposed pronominal suffix is perhaps rather to be explained, with Brockelmann, *ZA.* xiv. 344 f., as an old adverbial ending, which survives in the Arabic adverbs in *u* and in Assyrian.—Cf. further כֻּלָּם prop. *their entirety*, but also after the 2nd person equivalent to *all together*, 1 K 22^{28}, Mi 1^{2} (*hear, ye peoples, all of you*; cf. § 144 *p*), and even before the 2nd person, Jb 17^{10} (in 1 S 6^{4} read לָכֶם with the LXX).—On the redundant suffix in הָעֶרְבֵךְ Lv 27^{23}, cf. § 127 *i*.

---

[1] In 2 K 7^{10} for שֹׁעֵר (the LXX had שַׁעַר) read שְׁעָרֵי.

[2] Cf. the same weakening of the force of the possessive pronoun in רַבִּי prop. *my master*, from the second century A. D. onwards *the master*; so also in Syriac מרי *my lord*, and ultimately as a title *the lord*; in Italian *Madonna*, French *Madame, Notre Dame, Monsieur, Monseigneur*, &c. It can, however, hardly be doubted that the regular distinction between אֲדֹנָי as a holy name, and אֲדֹנָי as an ordinary appellative is merely due to the practice of the later Rabbis. G. H. Dalman. *Der Gottesname Adonaj und seine Geschichte* (Berlin, 1889), in an exhaustive discussion, shows that apart from the book of Daniel and the eight critically doubtful passages, in which אדני is used by God himself, there is nowhere any necessity to regard the suffix as *entirely* meaningless, since אדני is always used either in an address *to* or (like אֲדֹנַי, which also is never a mere phrase or title) in reverent language *about* God—as the Lord of the speaker—like the Assyrian *bēli-ia, my lord*. Against any original distinction between אֲדֹנָי and אֲדֹנָי it may be urged especially that when unconnected with suffixes the singular אָדוֹן is always used of God, and not the *pluralis maiestatis* presupposed by אֲדֹנַי.

§ 136. *The Demonstrative Pronoun.*

a The *demonstrative pronouns* are זֶה, fem. זֹאת, plur. אֵלֶּה (§ 34), *hic, haec* (*hoc*), *hi*, &c., and the personal pronoun הוּא, likewise used as a demonstrative, fem. הִיא, plur. masc. הֵמָּה, fem. הֵנָּה (§ 32 *b*), *is, ea* (*id*), or *ille*, &c., *ii, eae* or *illi*, &c. The distinction between them in usage is that זֶה (like *hic*, ὅδε) almost always points out a (new) person or thing present, while הוּא (like *is, ille*, αὐτός, ἐκεῖνος) refers to a person or thing already mentioned or known (see the examples below).[1]

b Rem. 1. Compare the instructive examples in Gn 32^3, Ju 7^4 *of whom I say unto thee, this* (זֶה) *shall go with thee, he* (הוּא) *shall go with thee* (so afterwards with negatives). Moreover, הַיּוֹם הַזֶּה *this day*, i.e. the actual day on which one is speaking or writing (Gn 26^{33}, &c.), but הַיּוֹם הַהוּא the day or period of which the historian has just been speaking (Gn 15^{18}, 26^{32}) or of which the prophet has just been foretelling (Is 5^{30}, $7^{18.20\ ff.}$) and of which he continues to speak or foretell. Nevertheless זֶה and אֵלֶּה are also found in certain common combinations where הוּא and הֵמָּה would be expected, and vice versa; thus almost always הַדָּבָר הַזֶּה, plur. הַדְּבָרִים הָאֵלֶּה, but בַּיָּמִים הָהֵמָּה or בַּיָּמִים הָהֶם.—With a secondary sense of contempt (like Latin *iste*) זֶה occurs, e.g. in 1 S 10^{27}, 21^{16}, 1 K 22^{27}, Is 6^{10}, &c. In the sense of the neuter, *this*, זֹאת is more common than זֶה, as Is 5^{25}, 43^9, &c., but הוּא more common than הִיא.

c 2. Both זֶה and הוּא are sometimes used almost as enclitics to emphasize interrogative words (like the Latin *nam* in *quisnam*; cf. also *quis tandem*); e.g. Jb 38^2 מִי זֶה *who now* (darkeneth, &c.) . . . ? 1 S $17^{55\ f.}$, Is 63^1, Jer 49^{19}, ψ 24^8, 25^{12}, &c; מַה־זֶּה *what now?* 1 S 10^{11}; *how now?* Gn 27^{20}; *why now?* Ju 18^{24}; but before the verb עָשָׂה it is usually מַה־זֹּאת Gn 3^{13}, 12^{18}, Ex 14^5, Ju 15^{11}; לָמָּה־זֶּה *wherefore now?* Gn 18^{13}, 25^{22}, 1 S 17^{28}, 2 S 12^{23}, &c.—So also מִי־הוּא Is 50^9, Jb $4^{7\ ff.}$; and still more emphatically מִי הוּא־זֶה ψ 24^{10}, Jer 30^{21}.

d 3. זֶה is likewise used as an enclitic (see *c* above): (*a*) *of place*, in such passages as Gn 27^{21} הַאַתָּה זֶה וגו׳ *whether thou* (that art here) *be my son Esau?* 2 S 2^{20} *is it thou?* הִנֵּה־זֶה *behold, here*, 1 K 19^5, Is 21^9;[2] cf. also the strengthen-

---

[1] On זֶה and הוּא standing separately as determinate in themselves, see § 125 *i*. On the use of determinate demonstratives as adjectives, see § 126 *u*.

[2] On the other hand, it is very questionable whether זֶה in ψ 104^{25} (זֶה הַיָּם), Is 23^{13} (זֶה הָעָם), Ju 5^6, ψ 68^9 (זֶה סִינַי) can be taken, according to the common explanation, simply as a prefixed demonstrative particle (*the sea yonder*, &c.). In ψ 104^{25} הַיָּם may be in apposition to זֶה; cf. § 126 *aa*, on Ex 32^1, and Zc 5^7, where אִשָּׁה אַחַת is in apposition to זֹאת depending on הִנֵּה, and also Ez 40^{47}, where הַלִּשְׁכָּה is in apposition to זֹה; otherwise it is most naturally taken as the subject, *this is the sea*. Is 23^{13}, Ju 5^5, 1 K 14^{14}, and ψ 68^9 might also be explained in the same way; but in these passages the text is almost certainly

ing of the separate pronoun by הוּא Is 43^{25} (אָנֹכִי), 1 S 7^{28}, Is 37^{16}, ψ 44^{5} (אַתָּה), and אֵלֶּה הֵם *these are*, Gn 25^{16}, 1 S 4^{8}; (*b*) *of time*: עַתָּה וְהֵ *now*, 1 K 17^{24}; *just now*, 2 K 5^{22}; and rather frequently before words denoting number, e. g. Gn 27^{36} וְהֵ פַּעֲמַיִם *twice, now*; cf. 31^{38}, 2 S 14^{2}, Jb 1^{12}, 7^{3}, 19^{3}; separated from the numeral in Gn 31^{41} וְהֵ־לִי elliptically for *this*, i. e. this present period, *is to me*, i. e. makes altogether, *twenty years*, &c. The other examples are similarly elliptical.

§ 137. *The Interrogative Pronoun.*

The interrogative pronoun מִי *who* may refer either to a masculine *a* or feminine person (Ct 3^{6}), or even to a plural, e. g. מִי אַתֶּם *who are ye?* Jos 9^{8}; מִי־אֵלֶּה Gn 33^{5}, Nu 22^{9} (more minutely, מִי וָמִי Ex 10^{8}, i. e. *who exactly, who in particular?*). It is used of the neuter only when the idea of a person is implied, e. g. מִי־שְׁכֶם *who are the Shechemites?* Ju 9^{28}, 13^{17}, Gn 33^{8}, Mi 1^{5}; even more boldly, with the repetition of a מִי used personally, in 1 S 18^{18}, 2 S 7^{18}.—Another interrogative is אֵי־זֶה *which, what?*; of persons only in Est 7^{5}.

Moreover, מִי may also be used in the sense of a genitive, e. g. *b* בַּת־מִי אַתְּ *whose daughter art thou?* Gn 24^{23}, 1 S $17^{55,56,58}$; דְּבַר מִי *whose word?* Jer 44^{28}, 1 S 12^{3}; in the accusative, אֶת־מִי *quemnam?* 1 S 28^{11}, Is 6^{8}; with prepositions, e. g. בְּמִי 1 K 20^{14} (in an abrupt question *by whom?*); לְמִי Gn 32^{18}; אַחֲרֵי מִי 1 S 24^{15}.—Similarly מָה, מַה־, מָה *what?* is used for the nominative, or accusative, or genitive (Jer 8^{9}), or with prepositions, e. g. עַל־מָה *whereupon?* Is 1^{5}, Jb 38^{6}; *why?* Nu 22^{32}, &c.; עַד־מָה *quousque?* ψ 74^{9}.[1]

Rem. Both מִי and מָה are used also in indirect questions (on the merely *c* relative distinction between direct and indirect questions in Hebrew, see the *Interrogative Sentences*), e. g. Gn 39^{8} (but read מְאוּמָה with Samar. and LXX), 43^{22}, Ex 32^{1}.—On the meaning of מִי and מָה as interrogatives is based also their use as *indefinite pronouns* (equivalent to *quisquis, quodcunque* or *quicquam*), e. g. Ex 32^{26}, Ju 7^{8}, 1 S 20^{4}, Is 50^{10} (read יִשְׁמַע in the apodosis), 54^{15}, Pr $9^{4.16}$, 2 Ch 36^{23}; even שָׁמְרוּ־מִי *have a care, whosoever ye be*, 2 S 18^{12} (unless לִי is to be read, with the LXX, for מִי); so also מָה (*whatever it be*) Jb 13^{13}, 1 S 19^{3}, 2 S $18^{22.23}$; cf. Nu 23^{3} וְדָבָר מַה־יֵּרְאֵנִי *and whatsoever he showeth me*. Cf. also מִי אֲשֶׁר *whosoever* Ex 32^{33}, 2 S 20^{11}, and מִי־הָאִישׁ אֲשֶׁר *any man who* Dt $20^{5ff.}$,

---

corrupt. In Ju 5^{5} in fact זֶה סִינַי is most probably to be regarded with Moore as a very early gloss, which subsequently found its way from this passage into ψ 68.

[1] A quite different use of מָה was pointed out (privately) by P. Haupt in Ct 5^{8} *will ye not tell him?* i. e. *I charge you that ye tell him*, and 7^{1} = *look now at the Shulamite*, corresponding to the late Arabic *mā tarā, just see! mā taqūlu, say now!* It has long been recognized that מָה is used as a negative in Ct 8^{4}.

Ju 10[18]. A still further weakening of the *indefinite* use of מָה is the combination ·מַה־שֶּׁ *that which*, Ec 1[9], 3[15] (just like the Syriac ܡܐ ܕ); cf. Est 8[1], and בַּל . . . מָה Pr 9[13], לֹא . . . מָה Neh 2[12], *nothing whatever*.—On מְאוּמָה *quicquam*, *anything at all* (usually with a negative), and as an adverb *in any way*, 1 S 21[3], see the Lexicon.

§ 138. *The Relative Pronoun.*

Cf. Philippi, *Stat. constr.* (see heading of § 89), p. 71 f., and especially V. Baumann, *Hebräische Relativsätze*, Leipzig, 1894.

a Relative clauses are most frequently (but not necessarily; cf. § 155 *b*) introduced by the indeclinable אֲשֶׁר (see § 36).[1] This is not, however, a relative pronoun in the Greek, Latin, or English sense, nor is it a mere *nota relationis*,[2] but an original *demonstrative* pronoun [as though *iste*, *istius*, &c.].[3] Hence it is used—

(1) In immediate dependence on the substantival idea to be defined, and virtually in the same case as it (hence belonging syntactically to the main clause); e. g. Gn 24[7] . . . הוּא יִשְׁלַח . . . יְהוָה אֲשֶׁר לָקָחַנִי *the Lord, iste, he took me . . . he shall send*, &c. (=*who took me*); Gn 2[2] *and God finished* מְלַאכְתּוֹ אֲשֶׁר עָשָׂה *his work, istud, he had made* (it). Such qualifying clauses may be called *dependent relative clauses*.

b Rem. 1. In the above examples אֲשֶׁר in Gn 24[7] is virtually in the nominative, in Gn 2[2] in the accusative. A further distinction between the examples is that in Gn 24[7] the main idea (יהוה), to which אֲשֶׁר is added in apposition, is only resumed in the qualifying clause by the subject (*he*) inherent in

---

[1] The etymology of the word is still a matter of dispute. Against the identification of אֲשֶׁר, as an original substantive, with the Arabic *'aṯar*, *trace*, Aram. אֲתַר *place*, *trace*, Nöldeke urges (*ZDMG.* xl. 738) that the expression *trace of* . . . could hardly have developed into the relative conjunction, while the meaning of *place* has been evolved only in Aramaic, where the word is never used as a relative. According to others, אֲשֶׁר is really a compound of several pronominal roots; cf. Sperling, *Die Nota relationis im Hebräischen*, Leipzig, 1876, and König, *Lehrgeb.*, ii. 323 ff., who follows Ewald and Böttcher in referring it to an original אֲשַׁל. According to Hommel (*ZDMG.* xxxii. 708 ff.) אֲשֶׁר is an original substantive, to be distinguished from ·שֶׁ and ·שֵׁ (an original pronominal stem), but used in Hebrew as a *nota relationis*, or (as זֶה and זוּ are also sometimes used, see below, *g* and *h*) simply for the *relative pronoun*. Baumann (op. cit., p. 44) sees in the Assyrian *ša*, Phoenician, Punic, and Hebrew שֶׁ, the ground-forms, of which the Phoenician and Punic אש (see above, § 36 note) and the Hebrew אֲשֶׁר are developments.

[2] E. g. like Luther's use of *so*, in *die fremden Götter, so unter euch sind*, Gn 35[2].

[3] This is the necessary conclusion both from the analogy of the Arabic *'allaḏi*, which is clearly a demonstrative (like the Hebr. הַלָּזֶה, הַלָּזוּ), and from the use of זֶה and זוּ as relatives.

לְקָחַנִי, while in Gn 2^2 it is not resumed at all. This suppression of the retrospective pronoun[1] takes place especially when it (as in Gn 2^2) would represent an accusative of the object, or when it would be a separate pronoun representing a nominative of the subject in a noun-clause, e.g. Gn 1^7 הַמַּיִם אֲשֶׁר מִתַּחַת לָרָקִיעַ *the waters, those, under the firmament*, &c. In negative sentences, however, the retrospective pronoun is not infrequently added, e.g. Gn 17^{12} הוּא; 7^2 הִיא; 1 K 9^{20} הֵמָּה; Dt 20^{15} הֵנָּה; but cf. also אֲשֶׁר הוּא חַי Gn 9^3. The addition of הִיא in a verbal clause, 2 K 22^{13}, is unusual.

The very frequent omission of the retrospective pronoun is noticeable in cases where the predicate of the qualifying clause is a *verbum dicendi*, e.g. Nu 10^{29} *we are journeying unto the place,* אֲשֶׁר אָמַר יְהוָה אֹתוֹ אֶתֵּן לָכֶם *that* place, *the Lord said* (of it), *It will I give to you*; cf. Nu 14^{40}, Ju 8^{15}, 1 S $9^{17.23}$, 24^5, 1 K 8^{29}, Jer 32^{43}.

c 2. When the substantive, followed by אֲשֶׁר and the qualifying clause, expresses an idea of *place*, it may also be resumed by the adverbs of place שָׁם *there*, שָׁמָּה *thither*, מִשָּׁם *thence*, e.g. Gn 13^3 עַד־הַמָּקוֹם אֲשֶׁר־הָיָה שָׁם אָהֳלֹה *unto the place, that one, his tent had been there*, i.e. *where his tent had been*; cf. Gn 3^{23} מִשָּׁם, Ex 21^{13} שָׁמָּה. But even in this case the retrospective word may be omitted, cf. Gn 35^{14}, Nu 20^{13}, Is 64^{10}, where שָׁם would be expected, and Gn 30^{38}, Nu 13^{27}, 1 K 12^2, where שָׁמָּה would be expected.—When the appositional clause is added to a word of time, the retrospective pronoun is always omitted, e.g. 1 S 20^{31} *for all the days,* אֲשֶׁר בֶּן־יִשַׁי חַי *those—the son of Jesse is living* (*in them*); cf. Gn 45^6, Dt 1^{46}, 9^7, 1 K 11^{42}; see Baumann, op. cit., p. 33.

d 3. If the governing substantive forms part of a statement made in the first or second person, the retrospective pronoun (or the subject of the appositional clause) is in the same person, e.g. Gn 45^4 *I am Joseph,* אֲשֶׁר־מְכַרְתֶּם אֹתִי *he—ye sold me*, i.e. *whom ye sold*; Nu 22^{30}, Is 49^{23}; 41^8 *thou, Jacob,* אֲשֶׁר בְּחַרְתִּיךְ *he—I have chosen thee*; Jer 32^{19}, Ec $10^{16f.}$; Gn 15^7 *I am the Lord,* אֲשֶׁר הוֹצֵאתִיךָ *he—I brought thee out*, &c., Ex 20^2 (Dt 5^6).

c (2) Not depending (adjectivally) on a governing substantive, but itself expressing a substantival idea. Clauses introduced in this way may be called *independent relative clauses*. This use of אֲשֶׁר is generally rendered in English by *he who, he whom*, &c. (according to the context), or *that which*, &c., or sometimes *of such a kind as* (*qualis*), cf. Ex 14^{13b}, and in a dependent relative clause Is 7^{17}. In reality, however, the אֲשֶׁר is still a demonstrative belonging to the construction of the main clause as subject or object, or as a genitive dependent on a noun or preposition, e.g. Nu 22^6 אֲשֶׁר תָּאֹר יוֹאֵר *iste—thou cursest* (him)—*is cursed*, i.e. *he whom thou cursest*, &c.; Ex 22^8;[2] אֲשֶׁר as object, Gn 44^1,

---

[1] The instances in which, instead of a retrospective pronoun, the main idea itself is repeated (Gn 49^{30}, 50^{13}, Jer 31^{32}) are most probably all due to subsequent amplification of the original text by another hand.

[2] The absolute use of אֲשֶׁר is very peculiar in the formula אֲשֶׁר הָיָה דְבַר יי אֶל- *this* (is it)—*it came as the word of the Lord to . . .*, Jer 14^1, 46^1, 47^1, 49^{34}.

49[1], 1 S 16[3ff.], Mi 6[1] (אֵת אֲשֶׁר); and even preceding the verb, e. g. Is 52[15], ψ 69[5]; אֲשֶׁר as genitive, Ez 23[28] *I will deliver thee* בְּיַד אֲשֶׁר שָׂנֵאת *into the hand of those—thou hatest* (them); depending on a preposition, e. g. לַאֲשֶׁר Gn 44[4], 2 K 10[22]; בַּאֲשֶׁר Gn 21[17], בַּאֲשֶׁר הוּא שָׁם *in that* (place)—*he is there*, i. e. *where he is*; cf. Ju 17[8] and Ru 1[16] אֶל־אֲשֶׁר *whither*;[1] 1 K 18[12] עַל־אֲשֶׁר *whither*; מֵאֲשֶׁר Ex 5[11].

f From these examples it follows that in independent relative clauses the retrospective suffix, or adverb of place, may be, and in fact generally is, omitted. As a rule, however (as in the dependent relative clause), this does not apply to cases in which the retrospective pronoun, by the construction of the sentence, depends on a preposition,[2] e. g. Gn 44[9f.] וָמֵת . . . אֲשֶׁר יִמָּצֵא אִתּוֹ *he—it* (the cup) *is found with him,—shall die* (for the *Wāw* of the apodosis in וָמֵת cf. § 143 *d*). In such cases אֲשֶׁר preceded by the preposition is quite anomalous, as in Gn 31[32] עִם אֲשֶׁר תִּמְצָא *with whomsoever thou findest*, where אֲשֶׁר is a relative pronoun in the English sense; on the other hand, in Is 47[12] (and probably also 56[4]) בַּאֲשֶׁר is to be explained (with Baumann, op. cit., p. 37) by reference to 47[15], as a demonstrative pronoun, *stand now with thine enchantments . . . , with those—thou hast laboured* (with them).

[With regard to the preceding explanation of אֲשֶׁר, the student will of course understand that, in Hebrew as we know it, אֲשֶׁר never occurs as a mere demonstrative. A particle which, whatever its origin, is uniformly used with reference to something in another, contiguous clause, will naturally have acquired in practice that force which we denote by the term 'relative'.]

g Like the original demonstrative pronoun אֲשֶׁר, the demonstratives proper זֶה, זוֹ, זוּ (the last commonly),[3] and sometimes the article, are used somewhat frequently in poetic language to introduce both dependent and independent relative clauses. With regard to the construction of זֶה, &c., the remarks on אֲשֶׁר, under *a* and *e*, also hold good.

Examples:—

(*a*) זֶה in apposition to a governing substantive in the nominative, ψ 104[26] לִוְיָתָן זֶה־יָצַרְתָּ (there is) *leviathan, he—thou hast formed* (him), i. e. *whom thou hast formed*; Is 42[24] (זוּ); in the accusative, Is 25[9], ψ 74[2] (in both cases with a retrospective pronoun; זוּ is used without it in ψ 132[12]); in apposition to a genitive dependent on a preposition, Pr 23[22] שְׁמַע לְאָבִיךָ זֶה יְלָדֶךָ *hearken unto thy father, him—he begat thee*, i. e. *who begat thee*; ψ 17[9] (זוּ).—In ψ 104[8] אֶל־מָקוֹם זֶה יָסַדְתָּ לָהֶם *unto the place which thou hadst founded for them* (cf. § 130 *c*), זֶה is in the genitive after the construct state מָקוֹם *to the place of that, thou hadst*

---

[1] In Zc 12[10] also, instead of the unintelligible אלי את אשר, we should probably read אֶל־אֲשֶׁר, and refer the passage to this class.

[2] Such a strong ellipse as in Is 31[6], where מִמֶּנּוּ would be expected after הֶעְמִיקוּ, is only possible in elevated poetic or prophetic language.

[3] The etymological equivalent דִּי, דְ in Aramaic is always a relative.

founded (it) *for them*; on the same analogy we may also take, with Baumann (op. cit., p. 48), ψ 78[54] (חַר וֶה) and Ex 15[13] (עַם־זוּ נָאלְתָּ), 15[16], Is 43[21], ψ 9[16], 10[2], 31[5], 32[8], 62[12], 142[4], 143[8] (all examples of זוּ).

h To introduce independent relative clauses וֶה is used as a nominative in Jb 19[19]; as accusative, Jb 15[17] and זוּ Hb 1[11], ψ 68[29] (after a preposition, וֶה Ex 13[8]; but the text is evidently corrupt).

i (*b*) More certain examples of the use of the article as a relative pronoun (more correctly, perhaps, of the demonstrative which is otherwise used as article) are 1 Ch 26[28] כֹּל הַהָקְדִּישׁ שְׁמוּאֵל *all that Samuel had dedicated*, &c.; 1 Ch 29[8] (where נִמְצָא can only be *perfect Niph'al*); 2 Ch 29[36], Ezr 10[14]. In connexion with a plural, Jos 10[24] *the chiefs of the men of war* הַהֹלְכִים אִתּוֹ *who went with him*; Ezr 8[25], 10[17], 1 Ch 29[17]. Finally, in the sense of *id quod*, Jer 5[13] (where, however, we should read with the LXX הַדָּבָר). Cf. moreover, 1 S 9[24] *the thigh* וְהָעֶלְיָהּ *and that which was upon it* (but see *k* below); 2 Ch 1[4] בַּהֲכִין equivalent to בַּאֲשֶׁר הֵכִין *to the place, that he had prepared*.

k In all the examples adduced except 1 S 9[24] (where וְהָאַלְיָה should probably be read for וְהָעֶלְיָהּ) the ה is followed by undoubted perfects; almost all the examples, moreover, belong to the latest Books (Ezra and Chronicles). On the other hand, another series of instances (even in the older texts) is extremely doubtful, in which the Masora likewise requires perfects, either by placing the tone on the penultima, as in Gn 18[21], 46[27], Jb 2[11] הַבָּאָה; Is 51[10] הַשָּׂמָה; Ez 26[17] הַהֳלָלָה Ru 1[22], 2[6] and 4[3] הַשָּׁבָה, or by the punctuation, Gn 21[3] הַנּוֹלַד; 1 K 11[9], Dn 8[1] הַנִּרְאָה; Is 56[3] הַנִּלְוָה, while no doubt the authors in all these cases intended participles (and in fact perfect participles, cf. § 116 *d*) with the article, thus הַבָּאָה, &c., Ez 26[17] הַהֹלְלָה for הַמְהֻלָּלָה according to § 52 *s*, and in the other examples הַנּוֹלָד, הַנִּרְאָה, הַנִּלְוָה.

§ 139. *Expression of Pronominal Ideas by means of Substantives.*

a Analogous to the periphrases for expressing materials and attributes by means of substantives (§ 128 *o* and *p*), is the use of substantives to represent certain kinds of pronominal ideas, for which no special expressions exist. Thus—

b 1. אִישׁ, אִשָּׁה *man, woman*, are used to express—

(*a*) The idea of *each, every* (in the sense of each severally) with reference to persons,[1] and even animals (Gn 15[10]), e.g. Gn 10[5], feminine Ex 3[22]; אִישׁ is the object, e.g. in Jer 12[15]. On אִישׁ—אִישׁ cf. § 123 *c*.

c In a few passages אִישׁ in the above sense is placed for the sake of emphasis before the governing noun (always a substantive with a suffix), thus מִיַּד אִישׁ אָחִיו Gn 9[5], according to the usual explanation, stands for מִיַּד אֲחֵי אִישׁ *at the hand of the brother of every man*. But although the explanation seems to be

[1] As a rule אִישׁ is used in the particularizing sense of *each man*, with the plural of the verb, e.g. Gn 44[11]; sometimes, however, as subject to a verb in the singular, e.g. Gn 44[13].

supported by Gn 42^{25} and Nu 17^{17}, it is inconceivable that such an inversion of *nomen regens* and *rectum* should occur. It is more likely, either that the second substantive is in apposition to אִישׁ (thus Gn 9^{5} *at the hand of every man, his brother*, [unless it is a combination of the two readings מִיַּד אִישׁ and מִיַּד הָאָדָם]; similarly 15^{10} *and he laid each* or, more exactly, *one piece of it*, &c., and so probably also Nu 17^{17} *every one*, sc. *his name*), or אִישׁ precedes as a kind of *casus pendens*, and only receives its nearer definition from the following substantive with suffix; thus Gn 41^{12}, 42^{25} (according to the context = *to every one in his sack*); 42^{35}, where צְרוֹר־כַּסְפּוֹ בְּשַׂקּוֹ is virtually the predicate of אִישׁ; Ex 12^{4}, 28^{21}, Nu 5^{10}, 26^{54}, 2 K 23^{35}, and especially Zc 7^{10}.[1]

d (*b*) *Any one, some one*, e.g. Gn 13^{16}, Ct 8^{7}, with a negative *no one*;[2] so after אַל Ex $16^{19.29}$; before לֹא Gn 23^{8} and frequently.—Instead of אִישׁ we sometimes find in a similar sense אָדָם *man, homo*, e. g. Lv 1^{2} (cf. כְּאַחַד הָאָדָם *as any one else*, Ju $16^{7.11}$), נֶפֶשׁ (*soul*) *person*, Lv 2^{1}, 5^{1}, &c., and in a neuter sense דָּבָר (prop. word, thing) for *anything*, Gn 18^{14}, or כָּל־דָּבָר Lv 5^{2}, Nu 31^{23}. With a negative דָּבָר means *nothing*; thus after אַל Gn 19^{8}; after לֹא Ec 8^{5}.—Cf. finally, מֵאַחַת *any one*, Dt 15^{7}; *anything*, Ez 18^{10} (but in Lv 4^{2}, 5^{13} מֵאַחַת) and the expressions noticed in § 144 *e*. The latter include also instances like Ez 18^{32} *I have no pleasure* בְּמוֹת הַמֵּת *in the death of him that dieth*, i.e. *of any man*.

c (*c*) In connexion with אָחִיו *his brother* or רֵעֵהוּ *his neighbour*, אִישׁ *one*, masc. (as אִשָּׁה *one*, fem., in connexion with אֲחוֹתָהּ *her sister* or רֵעוּתָהּ *her neighbour*) is used to represent the ideas of *alter—alter, the one—the other*[3] (in reference to persons, animals, or things without life; see the Lexicon) or the idea of *one another*, e.g. Gn 13^{11} *and they separated themselves* אִישׁ מֵעַל אָחִיו *the one from the other*; Ex 26^{3} *five curtains* (יְרִיעֹת fem.) *shall be coupled together* אִשָּׁה אֶל־אֲחֹתָהּ *one to another*.

f 2. נֶפֶשׁ *soul, person* expresses the idea of *self*,[4] both in the singular, Pr $19^{8.16}$, 29^{24}, Jb 18^{4} (in all cases נַפְשׁוֹ equivalent to *himself*) and in the plural, Jer 37^{9}, &c. Similar to this is the use of בְּקִרְבָּהּ Gn 18^{12} (prop. *in her inward part*) in the sense of *within herself*.[5]

---

[1] Cf. on the whole question the thorough discussion by Budde, *Die bibl. Urgeschichte*, p. 283 ff.: according to him, the words in Gn 9^{5} are to be rendered *at the hand of one another* (from men mutually) *will I require it*. [In support of this view, Budde points to Zc 7^{10} וְרָעַת אִישׁ אָחִיו אַל־תַּחְשְׁבוּ בִּלְבַבְכֶם, which in the light of 8^{17}, וְאִישׁ אֶת־רָעַת רֵעֵהוּ אַל־תַּחְשְׁבוּ בִּלְבַבְכֶם, can only, he observes, be rendered 'and devise not *the hurt of one another* in your heart'. So also König, *Syntax*, § 33.]

[2] Cf. also אֵין־אִישׁ Gn 39^{11}. On the expression of the idea of *no one* by means of אֵין with a following participle, see the *Negative Sentences*, § 152 *l*.

[3] Elsewhere זֶה . . . וָזֶה are used in a similar sense, Ex 14^{20}, Is 6^{3}; also הָאֶחָד . . . הָאֶחָד 2 S 14^{6}, or the substantive is repeated, e.g. Gn 47^{21} (*from one end . . . to the other end*).

[4] On the representation of this idea by pronouns, separate and suffixed, see § 135 *a*, *i* and *k*.

[5] In a similar way the idea of *self* in Arabic, as in Sanskrit (*átman*), is paraphrased by *soul, spirit*; in Arabic also by *eye*; in Rabbinic by גּוּף *body*,

3. עֶצֶם *bone* (then metaphorically for *substance*) expresses the idea of *self*, *selfsame*, *very same*, in reference to *things* (as נֶפֶשׁ to persons, e.g. בְּעֶצֶם הַיּוֹם הַזֶּה *in the selfsame day*, Gn 7[13], cf. Jos 10[27], Ez 24[2]; כְּעֶצֶם הַשָּׁמַיִם לָטֹהַר *as it were the very heaven for clearness*, Ex 24[10]; בְּעֶצֶם תֻּמּוֹ *in the very fullness of his strength* (= *in the midst of his full strength*), Jb 21[23]. *g*

4. The simple plural of words denoting time sometimes includes also the idea of *a few*, *some*;[1] thus יָמִים *a few days*, Gn 24[55], 40[4] (here even of a longer period, = *for some time*); Is 65[20], Dn 8[27] (on the other hand, Gn 27[44], 29[20] יָמִים אֲחָדִים; see § 96 under אֶחָד); שָׁנִים *some years*, Dn 11[6.8]. *h*

גֶּרֶם or עֶצֶם *bone*, in Ethiopic and Amharic by *head*, in Egyptian by *mouth*, *hand*, &c.; cf. also the Middle High German *mîn lip*, *dîn lip*, for *ich*, *du*. However, נֶפֶשׁ in such cases is never (not even in Is 46[2] נַפְשָׁם *they themselves*) a merely otiose periphrasis for the personal pronoun, but always involves a reference to the *mental* personality, as affected by the senses, desires, &c.

[1] *Some* in reference to persons in Ex 16[20] is expressed by אֲנָשִׁים, and in Neh 5[2-4] by יֵשׁ אֲשֶׁר *sunt qui*, with a participle following.

CHAPTER II

THE SENTENCE

I. The Sentence in General.

§ 140. *Noun-clauses, Verbal-clauses, and the Compound Sentence.*

a **1.** Every sentence, the subject and predicate of which are nouns or their equivalents (esp. participles), is called a *noun-clause*, e. g. יְהוָה מַלְכֵּנוּ *the Lord is our king*, Is 33^{22}; וְאַנְשֵׁי סְדֹם רָעִים וְחַטָּאִים *and now the men of Sodom were wicked and sinners*, Gn 13^{13}; פֶּה לָהֶם *a mouth is theirs*, ψ 115^{5}; see further, § 141.

b **2.** Every sentence, the subject of which is a noun (or pronoun included in a verbal-form) and its predicate a finite verb, is called a *verbal-clause*, e. g. וַיֹּאמֶר אֱלֹהִים *and God said*, Gn 1^{3}; וַיִּבְדֵּל *and he divided*, 1^{7}; see further, § 142.

c Rem. In the last example the pronominal subject is at least indicated by the preformative (י), and in almost all forms of the perfect by afformatives. The 3rd pers. sing. perf. however, which contains no indication of the subject, must also be regarded as a full verbal-clause.

d **3.** Every sentence, the subject or predicate of which is itself a full clause, is called a *compound sentence*, e. g. ψ 18^{31} הָאֵל תָּמִים דַּרְכּוֹ *God—his way is perfect*, equivalent to *God's way is perfect*; Gn 34^{8} שְׁכֶם בְּנִי חָשְׁקָה נַפְשׁוֹ בְּבִתְּכֶם *my son Shechem—his soul longeth for your daughter*; see further, § 143.

e **4.** The above distinction between different kinds of sentences—especially between noun- and verbal-clauses—is indispensable to the more delicate appreciation of Hebrew syntax (and that of the Semitic languages generally), since it is by no means merely external or formal, but involves fundamental differences of meaning. Noun-clauses with a substantive as predicate, represent something *fixed*, *a state* or in short, *a being* so and so; verbal-clauses on the other hand, something *moveable* and *in progress*, an *event* or *action*. The latter description is indeed true in a certain sense also of noun-clauses

with a participial predicate, except that in their case the event or action (as distinguished from that expressed by the verbal-clause) is of a fixed and abiding character.

Rem. By the Arab grammarians every clause beginning with an independent subject is regarded as a noun-clause, and every clause beginning with a finite verb as verbal. If a finite verb follows the noun-subject the two together (since the verb comprises its own subject and is thus a complete verbal-clause) form a compound noun-sentence, just as when the predicate consists of an independent noun-clause. Though this definition of the different kinds of sentence, which we formerly accepted (in § 144 *a* of the 22nd to the 24th German editions of this Grammar), is rejected above, *a*–*d*, we must, nevertheless, mention here the point in which this more complicated view of the Arab grammarians may be regarded as at least relatively correct, namely, in classifying verbal-clauses according as the subject precedes or follows the verb, a distinction which is often of great importance in Hebrew also; see further, in § 142 *a*. *f*

§ 141. *The Noun-clause.*

1. The *subject* of a noun-clause (see § 140 *a*) may be— *a*

(*a*) A substantive, e. g. וְנָהָר יֹצֵא מֵעֵדֶן *and a river went out* (was going out) *of Eden*, Gn 2^{10}.

(*b*) A pronoun, e. g. Gn 7^{4} אָנֹכִי מַמְטִיר *I will cause it to rain*; 14^{18} וְהוּא כֹהֵן *and he was priest*; 2^{23} (זֹאת before a feminine predicate, as אֵלֶּה before a plural in Ex 32^{4}); מִי חָכָם *who is wise?* Ho 14^{10}.—In 1 Ch 5^{2} וּלְנָגִיד מִמֶּנּוּ *and of him* one became *a prince*, the subject is contained in מִמֶּנּוּ.[1]

2. The *predicate* of a noun-clause may be— *b*

(*a*) A substantive, e. g. Dt 14^{1} בָּנִים אַתֶּם וגו׳ *ye are children of the Lord your God*; Gn 42^{13}. Specially characteristic of the Semitic mode of expression are the cases in which both subject and predicate are substantives, thus emphasizing their identity ('the thing is its measure, material, or equivalent'), e. g. Ez 41^{22} הַמִּזְבֵּחַ עֵץ . . . וְקִירֹתָיו עֵץ *the altar* (was) *wood* . . ., *and the walls thereof* (were) *wood*, i. e. of wood. Cf. below, *c*.

(*b*) An adjective or participle, e. g. Gn 2^{12} וְזֹהַב הָאָרֶץ הַהִיא טוֹב *and the gold of that land is good*; וְעֶפְרוֹן יֹשֵׁב *now Ephron was sitting*, &c., Gn 23^{10}.[2] Very frequently such noun-clauses, attached by *Wāw* to a verbal-clause, are used to represent a state *contemporaneous* with the principal action; cf. *e* below.

(*c*) A numeral, e. g. Gn 42^{13} שְׁנֵים עָשָׂר עֲבָדֶיךָ *the twelve* (of us) *are thy servants*.

---

[1] For other remarkable instances of ellipse in the Chronicler, see Driver, *Introduction*, ed. 8, p. 537, no. 27.

[2] Cf. the numerous examples in § 116 *n*–*p*.

(*d*) A pronoun, e. g. Gn 10[12] (הִיא), Ex 9[27] (אֲנִי), Gn 24[65] (מִי), 1 K 9[13] (מָה).[1]

(*e*) An adverb or (esp. if formed with a preposition) any specification of time, place, quality, possessor, &c., which may be regarded as the equivalent of a noun-idea, e. g. שָׁם הַבְּדֹלַח *there is the bdellium*, Gn 2[12]; אַי הֶבֶל *where is Abel?* 4[9]; לְעוֹלָם חַסְדּוֹ *his mercy* endureth *for ever*, ψ 136[1 f.]; עֹשֶׁר בְּבֵיתוֹ *riches* are *in his house*, ψ 112[3]; לוֹ אֲנַחְנוּ *we are his*, ψ 100[3] *Qerê*.

c Rem. 1. The employment of a substantive as predicate of a noun-clause is especially frequent, either when no corresponding adjective exists (so mostly with words expressing the material; cf. § 128 *o*) or when the attribute is intended to receive a certain emphasis. For in all cases there is a much greater stress upon a substantival predicate,[2] since it represents something as *identical* with the subject (see above, *b* [*a*]), than upon an adjectival or verbal predicate; cf. Ct 1[10]; ψ 25[10] *all the paths of the Lord are* חֶסֶד וֶאֱמֶת *lovingkindness and truth* (i. e. *wholly lovingkindness*, &c.; cf. Jer 10[10]); Ez 38[5], ψ 10[5], 19[10], 23[5], 88[19], Pr 3[17,3] Jb 22[12], 23[2], 26[13], Ru 3[2]. Sometimes the emphasis on the predicate is obtained by the use of the plural form (according to § 124 *e*), e. g. ψ 110[3] *thy people* are נְדָבֹת *altogether willingness*; Ct 5[16], Dn 9[23].

d Sometimes the boldness of such combinations is modified by the repetition of the subject, as *regens* of the predicate, e. g. Jb 6[12] אִם־כֹּחַ אֲבָנִים כֹּחִי *is my strength the strength of stones?* Pr 3[17]. That the language, however—especially in poetry—is not averse even to the boldest combinations in order to emphasize very strongly the unconditional relation between the subject and predicate, is shown by such examples as ψ 45[9] *myrrh and aloes and cassia* are *all thy garments* (i. e. so perfumed with them that they seem to be composed of them); Ct 1[15] *thine eyes* are *doves*, i. e. dove's eyes (but 5[12] כְּיוֹנִים);[4] ψ 23[5], 109[4], Jb 8[9], 12[12], Ct 2[13]. In prose, e. g. Ex 9[31], Ezr 10[13] הָעֵת גְּשָׁמִים *the season* is *rain showers*, i. e. *the rainy season*; with a bold enallage of the number, Gn 34[30] וְאָנִי מְתֵי מִסְפָּר *and I* (with my family) *am* persons few *in number*. For similarly bold expressions with הָיָה cf. Gn 11[1], 12[2], Ex 17[12], Is 5[12], Jer 2[28], and again with a bold enallage of the number, Jb 29[15] *I was eyes to the blind, and feet was I to the lame*, but in prose, Nu 10[31] *and thou shalt be to us* לְעֵינָיִם.

---

[1] Why in these examples the pronouns, notwithstanding appearances to the contrary, are to be considered as predicates and not as subjects, may be seen from what has been remarked above, § 126 *k*.

[2] The same naturally applies to most of those cases which are not pure noun-clauses, but have the substantival predicate connected with the subject by הָיָה (e. g. Gn 1[2] *and the earth was a waste and emptiness*; cf. ψ 35[6], Pr 8[30], Jb 3[4]) or where a preposition precedes the substantival predicate, as ψ 29[4] *the voice of the Lord is with power*, i. e. *powerful*.

[3] שָׁלוֹם here, as in Jb 21[9], is evidently a substantive after a plural subject; on the other hand, it is doubtful whether שָׁלוֹם in such passages as Gn 43[27], 2 S 20[9], ψ 120[7], &c., is not rather to be regarded as an adjective.

[4] As a rule, in such comparisons כְּ (which is then to be regarded as *nominative*) stands before the predicate, e. g. Is 63[2] *wherefore* are *thy garments* כְּדֹרֵךְ בְּגַת *like* those of *one that treadeth in the wine-press?* (prop. *the like of one* that treadeth, *instar calcantis*); Jer 50[9]. The comparison is then much less emphatic than in the noun-clauses cited above.

2. The noun-clause connected by *wāw copulative* to a verbal-clause, or its *e* equivalent, always describes a state *contemporaneous* with the principal action, or (when the predicate is a transitive participle) an action represented in constant duration (cf. § 107 *d*, as well as § 116 *n* and *o*), e.g. Gn 19[1] *and the two angels came to Sodom at even,* וְלוֹט יֹשֵׁב *while Lot sat,* &c.; 18[1.8.16.22], 25[26], Ju 13[9], 1 S 1[9], 2 S 4[7], 11[4] (always with a participle); with an adjectival predicate, Gn 18[12]; with a substantival predicate, 18[27]; with an adverbial predicate, 9[23]. Not infrequently such a *circumstantial* clause indicates at the same time some contradictory fact, so that וְ is equivalent to *whereas, whilst, although*, e.g. Gn 15[2], 18[27], 2c[3], 48[14] (*although he was the younger*); Ju 16[15] *how canst thou say, I love thee,* וְלִבְּךָ אֵין אִתִּי *whereas thine heart is not with me?* 2 S 3[39], ψ 28[3] *whilst mischief is in their hearts.* These clauses describing a state are, however, only a subdivision of the large class of circumstantial clauses, on which see § 156.

3. As the examples given under *a* and *b* show, the syntactical *f* relation existing between the subject and predicate of a noun-clause is as a rule expressed by simple juxtaposition, without a *copula* of any kind. To what period of time the statement applies must be inferred from the context; e.g. 1 K 18[21] יְהוָה הָאֱלֹהִים *the Lord* is *the* true *God*; 1 S 9[19]; Is 31[2] גַּם־הוּא חָכָם *yet he also* is *wise*; Gn 42[11]; on the other hand, Gn 19[1] וְלוֹט יֹשֵׁב *and* (=while) *Lot was sitting*; Ez 28[15]; Gn 7[4] אָנֹכִי מַמְטִיר *I am raining*, i. e. *I will rain*. Sometimes even a jussive or optative is to be supplied as predicate, Gn 27[13] *upon me* be *thy curse*; Gn 11[3], 20[13], Ex 12[2]. Cf. § 116 *r*, note.

Not infrequently, however, a connexion is established between subject *g* and predicate (*a*) by adding the separate pronoun of the 3rd person singular or plural, expressly resuming and therefore strengthening the subject, or (*b*) (especially for the sake of a more exact specification of time) by the help of the verb הָיָה. The first of these will be a *compound* sentence, since the predicate to the main subject consists of an independent clause.

Examples of (*a*): Gn 41[26] *the seven good kine* שֶׁבַע שָׁנִים הֵנָּה *they* are *seven* *h* *years*; Dt 1[17], 4[24]; Ec 5[18] זֹה מַתַּת אֱלֹהִים הִיא *this—it* is *a gift of God*; Nu 3[27] אֵלֶּה הֵמָּה; in a question, Gn 27[38]. Sometimes הוּא is used in this way to strengthen a pronominal subject of the first or second person, and at the same time to connect it with the predicate which follows,[1] e.g. אֲנֹכִי אֲנֹכִי הוּא Is 43[25] *I, even I,* am *he that blotteth out,* &c.; 51[12]; אַתָּה הוּא 2 S 7[28], Is 37[16], ψ 44[5], Neh 9[6.7]; in an interrogative sentence, Jer 14[22];[2] in Jer 49[12] הוּא in a *verbal*-clause strengthens אַתָּה.

---

[1] On a similar use of the separate pronoun of the third person in Aramaic (Dn 2[38], Ezr 5[11], &c.) see Kautzsch, *Gramm. des Bibl. Aram.*, § 87. 3.

[2] This is of course to be distinguished from the use of הוּא (to be inferred from the context) as predicate in the sense of *ὁ αὐτός*; see above, § 135 *a*, note 1; or such cases as Dt 32[39] *see now* רְאוּ עַתָּה כִּי אֲנִי אֲנִי הוּא *that I, even I,* am *he*; 1 Ch 21[17].

i Of (*b*): naturally this does not apply to the examples, in which הָיָה, in the sense of *to become, to fare, to exist*, still retains its full force as a verb, and where accordingly the sentence is verbal, and not a noun-clause; especially when the predicate precedes the subject. On the other hand, such examples as Gn 1[2] *and the earth was* (וְהָיְתָה) *waste and emptiness*, can scarcely be regarded as properly verbal clauses; הָיְתָה is used here really only for the purpose of referring to past time a statement which, as the description of a state, might also appear in the form of a pure noun-clause; cf. Gn 3[1]. This is especially true of the somewhat numerous instances in which הָיָה occurs as a connecting word between the subject and the participial predicate; e. g. Ju 1[7], Jb 1[14] (immediately afterwards a pure noun-clause). The imperfect of הָיָה announces what is future in Nu 14[33], &c.; cf. § 116 *r*. However, especially in the latter case, הָיָה is not wholly without verbal force, but comes very near to being a mere copula, and this use is more frequent in the later books[1] than in the earlier.

k Rem. On the employment of יֵשׁ *existence*, and אַיִן *non-existence*, which were originally substantives (on their tendency to be used as verbs, equivalent to *est*, and *non est*, cf. § 100 *o*, and the *Negative Sentences*, § 152) as a connecting link between a pronominal subject and a participial predicate (especially in conditional and interrogative sentences, Gn 24[42.49], 43[4], &c.), see above, § 116 *q*, and the various kinds of subordinate clauses mentioned in §§ 150, 159.

l **4.** The natural *arrangement* of words in the noun-clause, as describing a state, is *subject—predicate*; the principal stress falls on the former since it is the object of the description. Very frequently, however (and not merely in poetry, where greater freedom is naturally allowed in the arrangement of words), the reverse order is found, i. e. *predicate—subject*. The latter order *must* be used when special emphasis is laid on the predicate,[2] or when it consists of an interrogative word; thus with a substantival predicate, e. g. Gn 3[19] עָפָר אַתָּה *dust thou art*; 4[9], 12[13] (*my sister*, not my wife); 20[2.12], 29[14], Is 6[3b], Jb 5[24], 6[12]; with an adjectival predicate, e. g. Is 6[3a], 28[21], Jer 10[6]; with a participle, Gn 30[1], 32[12]; with an interrogative pronoun, e. g. Gn 24[65];[3] with an adverbial interrogative, e. g. Gn 4[9].

m Rem. On the above cf. the exhaustive investigations of C. Albrecht, 'Die Wortstellung im hebr. Nominalsatze,' *ZAW.* vii. 218 ff. and viii. 249 ff.; with a complete list of the exceptions to the order *subject—predicate*, p. 254 ff. The predicate *must* precede for the reasons stated (an *adjectival predicate* is particularly emphatic when it has the force of a comparative, e. g. Gn 4[13]; the predicate expressed by means of a preposition precedes most frequently when it serves to convey the ideas of *having, possessing*, e. g. Gn 18[14], 29[16], &c.; cf. also 26[20], 31[16.43]).

n The predicate *may* precede: (*a*) when the subject is a pronoun, for 'the person assumed to be generally known, does not excite the same interest as

---

[1] According to Albrecht, *ZAW.* viii. 252, especially in Deuteronomy and in the Priestly Code.

[2] For the same reason specifications of place (e. g. Gn 4[7]) or other adverbial qualifications may stand at the beginning of the sentence.

[3] The only exceptions, according to Albrecht (see the Rem. above), are Ex 10[7.8].

that which is stated about him;' (*b*) 'in order not to be a mere appendage to a subject which consists of several words,' e.g. 2 K 20^{19}; (*c*) in interrogative sentences (with a substantival or adjectival predicate or one compounded with a preposition), e.g. 1 S 16^{4}; finally (*d*) in a relative clause, when the predicate is adverbial or compounded with a preposition, as a rule closely united (by Maqqeph) with אֲשֶׁר, e.g. Gn 2^{11} אֲשֶׁר־שָׁם; $1^{29f.}$ אֲשֶׁר־בּוֹ.

§ 142. *The Verbal-clause.*

1. By § 140*f* there is an essential distinction between verbal- *a*
clauses, according as the subject stands before or after the verb. In the verbal-clause proper the principal emphasis rests upon the action which proceeds from (or is experienced by) the subject, and accordingly the verb naturally precedes (*necessarily* so when it is in the perf. consec. or imperf. consec.). Nevertheless, the subject does sometimes precede even in the verbal-clause proper, in the continuation of the narrative, e.g. Gn 7^{19}, 1 S 18^{1}, 2 S 19^{12}; especially so if there is special emphasis upon it, e.g. Gn 3^{13} (it is not I who am to blame, but) *the serpent beguiled me*, cf. Gn 2^{5}, &c.[1] In the great majority of instances, however, the position of the subject at the beginning of a verbal-clause is to be explained from the fact that the clause is not intended to introduce a new fact carrying on the narrative, but rather to describe a *state*. Verbal-clauses of this kind approximate closely in character to noun-clauses, and not infrequently (viz. when the verbal form might just as well be read as a participle) it is doubtful whether the writer did not in fact intend a noun-clause.

The particular *state* represented in the verb may consist— *b*

(*a*) Of an act completed long before, to which reference is made only because it is necessary for understanding the sequel of the principal action. If the predicate be a perfect (as it almost always is in these cases), it is generally to be rendered in English by a pluperfect; cf. the examples discussed above in § 106*f* (1 S 28^{3}, &c.); also Gn 6^{8} (not *Noah found grace*); 16^{1}, 18^{17}, 20^{4}, 24^{1}, 39^{1} (*and Joseph* in the meanwhile *had been brought down to Egypt*); 41^{10}, Ju 1^{16}, 1 S 9^{15}, 14^{27}, 25^{21}, 1 K 1^{1}, &c.—In a wider sense this applies also to such verbal-clauses as Gn 2^{6} (see further, § 112 *e*), since when they serve to represent an action continuing for a long period in the past, and thus to some extent a state.

(*b*) Of a fact, contemporaneous with the principal events or continuing as *c*
the result of them. To the former class belong all those instances in which the predicate is combined with הָיָה (provided that הָיָה has not, as in Gn 1^{2}, 3^{1}, &c., been weakened to a mere copula, in which case the precedence of the subject is fully explained from the character of the clause as a noun-clause; cf. § 141 *i*, and the examples of הָיָה, &c., with a participle, § 116 *r*); as an example of the second class, cf. e.g. Gn 13^{12} אַבְרָם יָשַׁב בְּאֶרֶץ־כְּנָעַן וגו׳ *Abraham* accordingly *continued to dwell in the land of Canaan*, but *Lot dwelt*, &c.

[1] This of course applies also to the cases, in which the subject consists of a strongly emphasized personal pronoun, e.g. Gn 32^{13} אַתָּה *thou thyself*; 33^{3} הוּא *he himself*.

d Rem. 1. The close relation between verbal-clauses beginning with the subject and actual noun-clauses, is seen finally from the fact that the former also are somewhat frequently added with וְ (or subordinated) to a preceding sentence in order to lay stress upon some accompanying circumstance; on such noun-clauses describing a *state* or *circumstance*, cf. § 141 *e*. This is especially the case, again, when the circumstantial appendage involves an antithesis; cf. Gn 18^{18} *seeing that* nevertheless *Abraham shall surely become*, &c.; 24^{56}, 26^{27}, Is 29^{13}, Jer 14^{15}, ψ 50^{17}, Jb 21^{22}, and such examples as Gn $4^{2.4}$, 29^{17}, where by means of וְ a new subject is introduced in express antithesis to one just mentioned. Moreover, in the examples treated above, under *b* and *c* (1 S 28^{3}, &c.), the subject is frequently introduced by וְ, which then corresponds to the Greek δέ, used to interpose an explanation, &c., see Winer, *Gramm. des neutest. Sprachidioms*, § 53. 7 *b*.

e 2. By a peculiar construction verbal-clauses may be joined by means of וְ and a following subject to participial clauses, e.g. Gn 38^{25} הִיא מוּצֵאת וְהִיא שְׁלֻחָה *she was already brought forth, when she sent*, &c.; $44^{3.4}$, Ju 18^{3}, 19^{11}, 2 S 20^{8}; for other examples, see § 116 *u* (where it is pointed out, note 1, that the apodosis also frequently appears in the form of a *noun*-clause, a further proof of the close relation between verbal-clauses beginning with the subject and noun-clauses proper). Without doubt there is in all these cases a kind of inversion of the principal clause and the temporal subordinate clause; the latter for the sake of greater emphasis being raised to an independent noun-clause, while the real principal action is added as though it were an accompanying circumstance, and hence in the form of an ordinary circumstantial clause. [Cf. Driver, *Tenses*, § 166 ff.]

f **2.** According to what has been remarked above, under *a*, the natural *order of words* within the verbal sentence is: *Verb—Subject*, or *Verb—Subject—Object*. But as in the noun-clause (§ 141 *l*) so also in the verbal-clause, a variation of the usual order of words frequently occurs when any member of the sentence is to be specially emphasized by priority of position.[1] Thus the order may be:—

(*a*) *Object—Verb—Subject*: Gn 30^{40}, 37^{4}, 1 S 15^{1}, 2 K 23^{19} and frequently. Naturally the examples are far more numerous, in which the object precedes a verbal form which includes the subject in itself, e.g. Gn $3^{10.14.18}$, 6^{16}, 8^{17}, 9^{13}, Ex 18^{23}, Ju 14^{3}, 1 S 18^{17}, 20^{9}, 21^{10}, 2 K 22^{8}, Pr 13^{5}, &c.

(*b*) *Verb—Object—Subject*: Gn 21^{7}, Nu 5^{23}, 1 S 15^{33}, 2 S 24^{16} (but הַמַּלְאָךְ is probably only a subsequent addition); Is 19^{13}, ψ 34^{22}, Jb 11^{19}, &c.

(*c*) *Subject—Object—Verb*: Is 3^{17}, 11^{8}, 13^{18}, Ho 12^{11}, ψ 6^{10}, 11^{5}, Jb 29^{25}.[2]

---

[1] Not infrequently also the striving after *chiasmus* mentioned in § 114 *r*, note, occasions a departure from the usual arrangement of words.

[2] This sequence occurs even in prose (Gn 17^{9}, 23^{6}, &c.); it is, however, more doubtful here than in the above prophetical and poetical passages, whether the preceding subject should not be regarded rather as the subject of a compound sentence (§ 143), the predicate of which is an independent verbal-clause; this would explain why the verbal-clause is usually separated from the subject by one of the greater disjunctives.—On the other hand, the sequence *Subject—Object—Verb* is quite common in Aramaic (e.g. Dn $2^{7.10}$); cf.

(*d*) *Object—Subject—Verb* (very rarely): 2 K 5[13], Is 5[17], 28[17], ψ 51[5], Pr 13[16] (read כֹּל).[1]

(*e*) A substantival complement of the verb היה is placed first in Is 18[5] וּבֹסֶר גֹּמֶל יִהְיֶה נָצָה *and a ripening grape the flower becometh.*

Rem. Of specifications compounded with a preposition those of *place* stand regularly after the verb, unless they are specially emphatic as e. g. Gn 19[2], 30[16], 32[5], Mi 5[1], Est 9[12]; in Gn 29[25] בְּרָחֵל with בְּ *pretii* precedes for the sake of emphasis. Cf., however, in Gn 35[13] the order *verb*—specification of *place*—*subject*.—The remoter object precedes for the sake of emphasis, e. g. in Gn 13[15] (26[3]), 15[3]; even before the interrogative, Gn 27[37] (cf. Jer 22[15] where the subject precedes an interrogative, and 1 S 20[8], Jb 34[31] where a prepositional specification precedes). — Prepositional specifications of *time*, such as בְּרֵאשִׁית (Gn 1[1]), בַּיּוֹם הַהוּא, &c. (but not בָּרִאשֹׁנָה, nor the simple רִאשֹׁנָה, בַּתְּחִלָּה, לָעוֹלָם), stand, as a rule, before the verb, provided it be not in the perf. consec. or imperf. consec.; so also certain adverbs of time, such as אָז, עַתָּה, whilst others like עוֹד, תָּמִיד regularly follow the verb. *g*

§ 143. *The Compound Sentence.*

A compound sentence (§ 140 *d*) is formed by the juxtaposition of *a* a subject[2] (which always precedes, see *c*) and

(*a*) An independent noun-clause, which (*a*) refers to the principal subject by means of a pronoun, e. g. Na 1[3] יְהוָה בְּסוּפָה דַרְכּוֹ *the Lord—in the storm is his way*; 2 S 23[6], ψ 18[31], 104[17], 125[2], Ec 2[14]; cf. also Gn 34[23], where the predicate is an interrogative clause.—A personal pronoun is somewhat frequently used as the principal subject, e. g. Is 59[21] וְאֲנִי זֹאת בְּרִיתִי אוֹתָם *and as for me, this is my covenant with them*, &c.; Gn 9[9], 17[4], Is 1[7], 1 Ch 28[2];[3] with an interrogative noun-clause, Gn 37[30], Jb 21[4], 38[19]:—or (*β*) is without a retrospective suffix (in which case naturally the connexion between the subject and predicate is much looser), e. g. 1 S 20[23] *and* as touching *the matter which*, &c. . . . *behold the Lord is between thee and me for ever*; Pr 27[2].

Gesenius, *Comm.* on Is 42[24], and Kautzsch's *Gramm. des Bibl. Aram.*, § 84. 1 *b*. The pure Aramaic usage of placing the *object* before the *infinitive* occurs in Hebrew in Lv 19[9], 21[21], Dt 28[56], 2 S 11[19], Is 49[6], 2 Ch 28[10], 31[7], 36[19] (?).

[1] This sequence occurs more frequently in noun-clauses with a participial predicate, e. g. Gn 37[16], 41[9], 2 S 13[4], &c., in interrogative sentences, e. g. 2 K 6[22], Jer 7[19]; in all which cases the emphasized object is placed before the natural sequence of *subject—predicate*. [Cf. Driver, *Tenses*, § 208.]

[2] In Gn 31[40] a verbal-clause (הָיִיתִי *I was*) occurs instead of the subject, and is then explained by another verbal-clause.

[3] In 1 Chr 28[2] (cf. also 22[7] אֲנִי הָיָה עִם־לְבָבִי) אֲנִי might also be taken as strengthening the pronominal suffix which follows (equivalent to *I myself had it in my mind*), as e. g. Ez 33[17] *whereas their own way is not equal*; cf. § 135 *f*.

b (*b*) An independent verbal-clause: (*a*) with a retrospective suffix,[1] e. g. Gn 9[6] (cf. § 116 *w*); 17[15] *as for Sarai thy wife, thou shalt not call her name Sarai*; 26[15], 28[13], 34[3], Ex 30[37], 32[1], 1 S 2[10], 2 K 10[29], Is 9[1], 11[10], Ez 33[2], Ho 9[11], ψ 11[4], 46[5], 65[4], 74[17], Dn 1[17]; with a pronoun as the principal subject, Gn 24[27]; (*β*) without a retrospective suffix, Is 19[17] *every one* that *mentions it* (Judah) *to it* (Egypt), *it* (Egypt) *is afraid*.

c Rem. 1. In all the above examples prominence is given to the principal subject (by its mere separation from the context by means of a greater disjunctive, as a *casus pendens*[2]) in a manner which would be quite impossible in a simple noun or verbal-clause (e. g. Na 1[3] if it were וַדֶּרֶךְ יְהוָה בְּסוּפָה); cf. the French *c'est moi qu'on a accusé*. But the statement or question contained in the clause which forms the predicate also receives greater weight. For the same purpose other members of the sentence also are sometimes placed at the beginning and resumed again by a following suffix; thus the object, Gn 13[15], 21[13], 35[12], 47[21] (with the Samaritan and LXX read perhaps הֶעֱבִיר); 1 S 25[29]; a specification of place, Gn 2[17], 2 K 22[18], &c.; a substantive with לְ, 1 S 9[20], 2 S 6[23]; cf. the examples in § 135 *a*.—In Nu 15[29] a dative is co-ordinated with the *casus pendens*, i. e. there is a transition to a different construction.

d 2. To compound sentences belong also the numerous examples already treated in the account of the tenses, where the predicate of a *casus pendens* is introduced by the *wāw apodosis*. The isolation and prominence of the principal subject is in this case still more marked than in the instances treated above; on the *casus pendens* with a following imperfect consecutive (e. g. Jer 6[19], 33[24]), cf. § 111 *h*; with a following perfect consecutive (e. g. Ex 4[21], 12[44], Nu 23[3], 1 S 25[27], 2 S 14[10], Is 9[4], 56[6 f.]), § 112 *t* and *mm*; on the participle as *casus pendens*, § 112 *oo* and § 116 *w*.—In Jb 15[17] *wāw apodosis* follows with the cohortative; in Jb 23[12], ψ 115[7], the imperfect is separated by לֹא from the *wāw apodosis*; in Jb 4[6] as for *thy hope*, it is *the integrity of thy ways*, 36[26], Ec 5[6], an incomplete noun-clause is appended by *wāw apodosis*. On *wāw apodosis* after disconnected specifications of time, cf. § 112 *oo* at the end, and Gn 40[9], 2 S 15[34] וְעַתָּה וַאֲנִי עַבְדְּךָ *and now* (so far as the present is concerned) *I will be thy servant*, Nu 12[12], Jer 4[1] (*me thou needest not fear*).

e 3. Sometimes a substantive introduced by לְ (*in respect to*; cf. § 119 *u*) serves the same purpose as the *casus pendens* beginning the sentence, as Nu 18[8] (unless the לְ here serves to introduce the object, according to § 117 *n*); Is 32[1] (where, however, וְשָׂרִים should most probably be read); Ec 9[4], 1 Ch 7[1], 24[20 ff.], 2 Ch 7[21]. On the other hand, ψ 16[3], 17[4], 32[6], 89[19], 119[91], are very doubtful. The suggestion of P. Haupt (*Johns Hopkins University Circulars*, xiii. no. 114; Baltimore, 1894) also deserves attention, that in passages like Ec 9[4], and in לְכֹל Gn 9[10], 23[10], Ex 27[3.19], Ez 44[9], &c., לְ is not the preposition, but an emphasizing particle, answering to the Arab. *lā, surely*; Assyrian *lū*; with כֹּל it is equivalent to *in short*. Cf. also לְ–לְ *sive—sive, et—et*, Jos 17[16], Ezr 1[11], Assyrian *lū—lū*.

---

[1] Cf. the Mēša' inscription, l. 31, *and Horonain, therein dwelt*, &c.

[2] But this term must not (any more than that formerly used 'the subject preceding *absolutely*') be misunderstood to mean that the principal subject is, as it were, floating in the air, and that the whole sentence results in an anacoluthon. On the contrary, to the Semitic mind, such sentences appear quite as correctly formed as ordinary noun- and verbal-clauses.

§ 144. *Peculiarities in the Representation of the Subject (especially in the Verbal-clause).*

a 1. According to § 40 ff. most forms of the finite verb include a specification of the subject in the form of *personal affformatives* (in the imperfect also in the form of preformatives). Not infrequently, however, masculine forms are used in referring to feminines, e. g. וְיֵדַעְתֶּם Ez 23[49]; עֲשִׂיתֶם Ru 1[8]; in the imperfect, Jo 2[22], Ct 2[7]; in the imperative, Am 4[1], Zc 13[7] (for other examples, see § 110 *k*). On emphasizing the pronominal subject by the addition of the separate pronoun, see § 135 *a* and *b*.

On the masculine as *prior gender*, cf. § 122 *g*; on similar anomalies in the use of the personal pronoun, § 135 *o*, in the connexion between substantive and adjective, § 132 *d*, between subject and predicate, § 145 *p*, *t*, *u*.

b 2. The third person singular is often used impersonally, especially in the masculine, e. g. וַיְהִי *and it came to pass*, וְהָיָה *and it shall come to pass*; חָרָה followed by לוֹ, &c., *it became hot to him*, i. e. *he became angry*, Gn 4[6], &c.; וַיֵּצֶר לוֹ lit. *and it became strait to him, he was distressed*, Gn 32[8];[1] also in the feminine, e. g. 1 S 30[6] (Ju 10[9]) וַתֵּצַר לְדָוִד; Ju 11[39], Jer 7[31], Ez 12[25], Jb 15[32] (unless תְּמוּרָתוֹ in verse 31 be the subject); cf. also the impersonal passives, Is 1[6] (רֻכְּכָה), 29[6] (תִּפָּקֵד). Somewhat different are the instances in which the 3rd singular feminine occurs as the predicate of a feminine subject which is not mentioned, but is before the mind of the speaker, e. g. Is 7[7], 14[24], Jer 10[7], Jb 4[5], 18[15] (in 2 K 24[7] כָּל־אֲשֶׁר is used in this way with a feminine predicate, and in Jer 19[5] אֲשֶׁר alone); different, too, are the instances in which the 3rd singular masculine refers to an act just mentioned, e. g. Gn 17[11] וְהָיָה *and this* (the circumcision) *shall be a token of a covenant*, &c.

c Rem. The expressions for natural phenomena may be either in the 3rd sing. masculine or feminine, e. g. אוֹר *it becomes light*, 1 S 29[10] (but with an explicit subject, Gn 44[3]); וַיֶּאֱוֹר *and it became light*; so also יַחְשָׁךְ *it grows dark*, Jer 13[16]; but וְחֹשְׁכָה Mi 3[6]; תֶּעֱפָה *though there be darkness*, Jb 11[17]; תַּמְטִיר *it rains*, Am 4[7] (where, however, the context requires the reading אַמְטִיר); ψ 50[3] נִשְׂעֲרָה *it is tempestuous*.

---

[1] In Arabic and Ethiopic the masculine is commonly used in this case, in Syriac the feminine.—The forms חַם *hot*, טוֹב *good, well*, מַר *bitter*, צַר *narrow*, רַע *evil* (frequently joined by לִי, לוֹ, &c.), which many regard as impersonal, are no doubt to be regarded in most cases not as forms of the 3rd pers. sing. perf., but, with Hupfeld on ψ 18[7], as adjectives.

d 3. The indefinite personal subject (our *they, one,* the French *on,* and the German *man*[1]) is expressed—

(*a*) By the 3rd person singular masculine, e. g. קָרָא *one* (sc. any *one who named* it, see the Rem.) *called* (or *calls*) it, Gn 11[9], 16[14], 19[22], Ex 15[23]; וַיִּקְרָא Gn 35[8.10], 2 S 2[16], Is 9[5]; וַיֹּאמֶר *one said,* Gn 48[1], 1 S 16[4];[2] other examples are Gn 38[28] *one put out a hand*; Nu 23[21], 1 K 22[38], Is 6[10] וְרָפָא לוֹ *and one heals them*; 8[4] (יִשָּׂא); 46[7] (יִצְעַק); Am 6[12], Mi 2[4], Jb 27[23]; by the 3rd singular feminine (יִלְדָּה) Nu 26[59].

e Rem. The Jewish commentators, following the Arab grammarians, usually explain these singulars by the addition of the participle (generally determinate) of the same stem, e. g. קָרָא הַקּוֹרֵא. This view is supported by the fact that such a complement sometimes occurs, e. g. Is 16[10] יָרַךְ הַדֹּרֵךְ *the treader treads out,* for *one treads out*; 28[4.24] (*doth one plow continually?*); Dt 17[6] (Ez 18[32]), Dt 22[8], 2 S 17[9] (Ez 33[4]), Jer 9[23]; with an indeterminate participle (as in Arabic, e.g. *qāla qā'ilun, a sayer says,* i. e. *some one says*), e. g. Nu 6[9], Am 9[1]; cf. above, § 116 *t*, and, on the whole question, Driver on 1 S 16[4].

f (*b*) Very frequently by the 3rd plural masculine, e. g. Gn 29[2] *for out of that well* יַשְׁקוּ *they* (i. e. people generally) *watered the flocks*; 26[18], 35[5], 41[14], 49[31], 1 K 1[2], Is 38[16], Ho 12[9], Jb 18[18], 34[20], Est 2[2], Neh 2[7].

g Rem. The 3rd plur. also is sometimes used to express an indefinite subject, where the context does not admit of a human agent or at least not of several, e.g. Gn 34[27]. In such a case the 3rd plur. comes to be equivalent to a passive, as very commonly in Aramaic (see Kautzsch's *Gramm. des Bibl. Aram.*, § 96. 1 *c*); e.g. Jb 7[3] *wearisome nights* מִנּוּ־לִי *have they allotted to me* (equivalent to *were allotted to me*; to make 'invisible powers' the subject is a merely artificial device); Jb 4[19], 6[2], 18[18], 19[26], 34[20], Ez 32[25], ψ 63[11], Pr 2[22] (in parallelism with a passive); 9[11].

h (*c*) By the 2nd singular masculine, e. g. Is 7[25] לֹא־תָבוֹא שָׁמָּה *one will* (or *can*) *not come thither* (prop. *thou wilt . . .*); Jer 23[37], Pr 19[25], 30[28] (unless the reading should be תִּתְפֹּשׂ). Cf. also עַד־בֹּאֲךָ or simply בֹּאֲךָ (Gn 10[19.30], 13[10] בֹּאֲכָה) prop. *until thy coming,* i. e. *until one comes.*

i (*d*) By the plural of the participle, e. g. Jer 38[23] *and all thy wives and thy children* מֹוצִאִים (prop. *are they bringing out*=) *they will bring out,* &c.; cf. Is 32[12], Ez 13[7], Neh 6[10] (*for some are coming to slay thee*)

---

[1] In 1 S 9[9] הָאִישׁ (prop. *the man*) is used in exactly the same sense as our *one.*

[2] Elsewhere in such cases וַיֹּאמְרוּ usually occurs (but not in the perfect, e. g. 1 S 23[22]), so that it is doubtful whether the present reading of Gn 48[1], &c., would not be better explained according to § 7 *d*, note. In Gn 48[2] for the extraordinary וַיֵּגַּד the common form וַיַּגֶּד is to be read; so in 50[26] for וַיִּישָׂם (after a plural) either וַיּוּשַׂם or the 3rd plur.; in 2 K 21[23] וַיִּקְבְּרוּ.

and the passages discussed above, § 116 *t*.[1] In 1 K 5[1] the text is corrupt.

(*e*) By the passive, e. g. Gn 4[26] אָז הוּחַל לִקְרֹא *then* (*was it begun*=) *k*
began men to call upon, &c. (but read זֶה הֵחֵל *he began*).

4. A peculiar idiom, and one always confined to poetic language, *l*
is the not infrequent occurrence of two subjects in a verbal sentence,[2] one of the person and the other of the thing. The latter then serves —whether it precedes or follows—to state the instrument, organ, or member by which the action in question is performed, and may be most often rendered in English by an adverb, as a nearer definition of the manner of the action. All the examples of this kind have this in common, that the subject denoting the thing takes a suffix in the same person as the personal subject.[3] They are thus distinguished from the *accusatives* treated in § 117 *s*, with which they are often confused.

(*a*) Examples where the subject denoting the *thing* precedes, קוֹלִי אֶל־יְהוָה *m*
אֶקְרָא *my voice—I cry unto the Lord*, i. e. *I cry aloud unto the Lord*, ψ 3[5], 27[7], 142[2]; פִּי־קָרָאתִי *my mouth—I cried*, i. e. *I cried aloud*, ψ 66[17] (cf. 17[10]); Is 26[9] נַפְשִׁי *with my soul*, i. e. *fervently*, and parallel with it אַף־רוּחִי; but נַפְשִׁי ψ 57[5] is rather a periphrasis for the 1st pers. *I*.

(*b*) Where the subject denoting the *thing* follows, צַהֲלִי קוֹלֵךְ *cry—thy voice* (i. e. aloud), Is 10[30]; so also after an imperative, ψ 17[13] (חַרְבֶּךָ) and verse 14 (יָדֶךָ); 60[7], 108[7] (יְמִינְךָ); after a perfect, Hb 3[15] (סוּסֶיךָ); after a cohortative, ψ 108[2] (אַף־כְּבוֹדִי). The subject denoting the *thing* stands between the personal subject and the predicate in ψ 44[3] אַתָּה יָדְךָ.[4]

Rem. 1. Sometimes (as in other languages) an action is ascribed to a *n*
subject which can only have been performed at his direction by another

---

[1] That this form of expression also (see *g*) comes to be equivalent to a passive is seen from the analogy of such Aramaic passages as Dn 4[22], which exclude any idea of human agency. Cf. Kautzsch, *Gramm. des Bibl. Aram.*, § 76. 2 *e* at the end, and in post.-bibl. Hebrew, e. g. *Pirqe Aboth* 2, 16; 3, 5, &c.

[2] Two subjects occur in a noun-clause in ψ 83[19].

[3] In Ex 6[3] שְׁמִי is subordinated to the following passive נוֹדַעְתִּי (§ 121 *b*); in 1 S 25[26.33] יָדִי, יָדְךָ are subjects to the infinitive absolute הוֹשֵׁעַ, according to § 113 *gg*. In ψ 69[11] read וָאֶבְכֶּה for וָאֲעַנֶּה.

[4] In several of the above examples it might naturally be supposed that the subject denoting the thing (especially when it follows the verb) is to be explained rather as a *casus instrumentalis*, i. e. as an accusative, analogous to the adverbial accusatives in § 118 *q*. But although it is true that the subject denoting the thing often defines more closely the manner in which the action is performed, and although in similar (but still different) examples, ψ 89[2], 109[30], Jb 19[16], בְּ occurs with בְּ *instrumentale*, the explanation given above must nevertheless be accepted.

person; cf. e. g. Gn 40[22] (41[13]), 41[14], 43[34] (*and he commanded to set before them*, &c.); 46[29], 2 S 12[9].

o 2. Supposed ellipses of a definite subject are due either to a misunderstanding of the passage, or to a corruption of the text. Thus in 1 S 24[11] after וַתָּחָס either עֵינִי has dropped out (through confusion with עָלַיִךְ) or we should read with the LXX וְאַחַס. In 2 S 13[39] (וְתִכַל דָּוִד) the text is obviously corrupt.

p 3. In poetic (or prophetic) language[1] there sometimes occurs (supposing the text to be correct) a more or less abrupt transition from one person to another. Thus from the 2nd to the 3rd (i. e. from an address to a statement), Gn 49[4] (?), Is 31[6] (?), 42[20], 52[14], 61[7], Mal 2[15] (where, however, for יִבְגֹּד we should undoubtedly read תִּבְגֹּד); ψ 22[9] [and regularly after a vocative, Is 22[16], 47[8], 48[1], 54[1.11], Jer 22[16], 49[4.16], Am 5[6f.], Mic 1[2] (= 1 K 22[28]), Mal 3[9], 2 K 9[31]; and after הוֹי Is 5[8], 29[15], Jer 22[13]]. From the 3rd to the 2nd pers., Dt 32[15], Is 1[29] (but read probably חֲמַדְתֶּם for חֲמַדְתָּם, which has caused the insertion of אֲשֶׁר), 5[8], Jer 29[19], Jb 16[7], cf. also Dt 32[17]. From the 1st to the 3rd pers., La 3[1] (in a relative clause). In Jb 13[28] the 3rd pers. וְהוּא is probably employed δεικτικῶς for the 1st.

§ 145. *Agreement between the Members of a Sentence, especially between Subject and Predicate, in respect of Gender and Number.*

a **1.** As in other languages, so also in Hebrew, the predicate in general conforms to the subject in gender and number (even when it is a pronoun, e. g. זֹאת בְּרִיתִי *this is my covenant*, Gn 17[10]). There are, however, numerous exceptions to this fundamental rule. These are due partly to the *constructio ad sensum* (where attention is paid to the meaning rather than to the grammatical form; see *b–l* below), partly to the position of the predicate (regarded as being without gender) *before* the subject.

b **2.** Singular nouns which include in themselves a collective idea (§ 123 *a*), or which occasionally have a collective sense (§ 123 *b*), may readily, in accordance with their meaning, be construed with the plural of the predicate, whether it precedes or follows. This is also the case, when the collective is itself feminine but represents, exclusively or at least generally, masculine persons.

Examples:—

c (*a*) Of collectives proper (cf. § 132 *g*): (α) with the predicate preceding, Gn 30[38] תְּבֹאן הַצֹּאן (cf. 30[39], 31[8] and 33[13]); Ju 1[22f.] בֵּית representing persons belonging to the tribe; Mi 4[3] גּוֹי; 2 K 25[5] חֵיל *army*; Pr 11[26] לְאֹם

---

[1] In prose, Lv 2[8]; but וְהִקְרִיבָה here is hardly the original reading. Different from this is Gn 26[7], where there is a transition to direct narration.

the people; Nu 10^{3} כָּל־הָעֵדָה *all the congregation* (cf. 1 K 8^{5}); 1 K 1^{40}, Is 9^{8}, 25^{3}, Am 1^{5} עַם; 1 S 17^{47}, Ezr 10^{12} קָהָל *assembly*. Cf. also the construction of national names, as אֲרָם (§ 122 *i*), e.g. 1 K 20^{20} וַיָּנֻסוּ אֲרָם *and the Syrians fled*; 1 S 4^{5}.—(*β*) with the predicate following, 1 K 8^{5} צֹאן וּבָקָר *sheep and oxen*, construed with the plural in the following relative clause; Jb 1^{14} הַבָּקָר הָיוּ חֹרְשׁוֹת *the cattle* (cows) *were ploughing*; 2 S 3^{1} and 1 Ch 10^{6} בַּיִת = *family* (in 1 S 6^{13} בֵּית שֶׁמֶשׁ on the analogy of names of countries, is used for *the inhabitants of Bethshemesh*); Ho 11^{7}, Ezr 4^{4} עַם; ψ 68^{11} חַיָּה *herd* [if correct, figuratively for *people*]; Is 26^{19} נִבְלָה *dead bodies*; Is 27^{11} קָצִיר *boughs*; 1 S 4^{1} יִשְׂרָאֵל, preceded by a predicate in the singular.

(*b*) Of substantives occasionally used as collectives: (*a*) with the predicate preceding, Gn 34^{24} זָכָר; Ju 9^{55}, 15^{10} אִישׁ; Is 16^{4} רֹמֵס *the treader down*.—(*β*) with the predicate following, Jb 8^{19} אַחֵר = *others*; Ez 28^{3} סָתוּם *a secret*; [ψ 9^{7}, and even after וְ Jb 19^{19}.] *d*

(*c*) Of feminines as collective terms denoting masculine persons: (*a*) with the predicate preceding, 1 S 17^{46} וְיֵדְעוּ כָּל־הָאָרֶץ *that all the earth may know*, i.e. all the inhabitants of the earth; cf. Dt 9^{28}, ψ 66^{1}, $96^{1.9}$, &c.; Am 1^{8} שְׁאֵרִית *remnant*; (ψ 33^{8} כָּל־הָאָרֶץ).—(*β*) with the predicate following, Gn 41^{57}, 2 S 15^{23}, 1 K 10^{24}, Gn 48^{6} מוֹלֶדֶת *issue*; 1 S 2^{33} כָּל־מֶרְבִּית *all the increase*; Jb 30^{12} פִּרְחָה *rabble*. In Hag 2^{7} read חֶמְדַּת with the LXX. *e*

Examples of predicates in the singular, notwithstanding the collective meaning of the subject, occur in Gn 35^{11}, Ex 10^{24}, 14^{10}, Dt 1^{39}, &c.—For examples of bold enallage of the number in noun-clauses with a substantival predicate, see above, § 141 *c*. *f*

Rem. Not infrequently the construction begins in the singular (especially when the predicate precedes; see *o* below), but is carried on, after the collective subject has been mentioned, in the plural; e.g. Ex 1^{20} וַיִּרֶב הָעָם וַיַּעַצְמוּ מְאֹד *and the people multiplied, and waxed very mighty*; 33^{4}. *g*

3. On the other hand, plurals which have a singular meaning (§ 124 *a*) are frequently construed with the singular, especially the *pluralis excellentiae* or *maiestatis* (§ 124 *g–i*; on the union of these plurals with attributes, cf. § 132 *h*), as אֱלֹהִים Gn $1^{1.3}$, &c. (but see the Rem.), אֲדֹנִים *master*, Ex 21^{4} בְּעָלִים *master, owner*, Ex 21^{29}; cf., moreover, פָּנִים with the singular, Jb 16^{15} *K^e^th.*, רַחֲמִים Pr 12^{10}.—So feminine forms with a masculine meaning are construed with a masculine predicate, e.g. Ec 12^{9} הָיָה קֹהֶלֶת חָכָם *the preacher was wise*. *h*

Rem. The construction of אֱלֹהִים *God* with the plural of the predicate may be explained (apart of course from such passages as 1 K 19^{2}, 20^{10}, where the speakers are heathen, and אֱלֹהִים may, therefore, be a numerical plural) partly as an acquiescence in a polytheistic form of expression, partly from the peculiar usage of one of the early documents of the Hexateuch, called *E* by Wellhausen, &c., *B* by Dillmann; cf. his commentary on Numbers—Joshua, p. 618, and above, § 124 *g*, note 2. So Gn 20^{13} (but in conversation with a heathen); 31^{53}, 35^{7}, cf. also Jos 24^{19}. That this construction was afterwards studiously avoided from fear of misconception, is shown by such passages as Neh 9^{18} compared with Ex $32^{4.8}$, and 1 Ch 17^{21} compared with 2 S 7^{23}. Cf. Strack's excursus on Gen 20^{13} in *Die Genesis*, Munich, 1905, p. 77. *i*

k **4.** Plurals of names of animals or things, and of abstracts, whether they be masculine or feminine, are frequently construed with the feminine singular of the verbal predicate[1] (on the collective sense of the feminine form, cf. § 122 *s*); thus Jo 1^{20} בְּהֵמוֹת שָׂדֶה תַּעֲרֹג *the beasts of the field long*; Jer 12^{4} (where the predicate precedes), cf. also Jb 12^{7}; names of things with the predicate preceding occur in 2 S 24^{13}, Is 34^{13}, Jer 4^{14}, 51^{29}, ψ 18^{35}, 37^{31}, 73^{2} *Keth.*, 103^{5} (unless הֲמְחַדֵּשׁ is to be read for תִּתְחַדֵּשׁ), Jb 14^{19}, 27^{20}; with the predicate following, Gn 49^{22} (בָּנוֹת=*branches*); Dt 21^{7}, 1 S 4^{15} (וְעֵינָיו קָמָה),[2] 2 S 10^{9}, Is 59^{12}, Jer 2^{15} *Keth.*, 48^{41}, 49^{24}, Pr 15^{22}, 20^{18}, Jb 41^{10}.[3]

l **5.** Moreover, the plural of persons (especially in the participle) is sometimes construed with the singular of the predicate, when instead of the whole class of individuals, each severally is to be represented as affected by the statement. Undoubted examples of this *distributive* singular are Gn 27^{29} (Nu 24^{9}) אֹרְרֶיךָ אָרוּר וּמְבָרֲכֶיךָ בָּרוּךְ *those that curse thee, cursed be* every one of them, *and those that bless thee, blessed be* every one of them; Ex 31^{14}, Lv 17^{14} and 19^{8} (in both places the Samaritan has וְאָכְלוֹ); Is 3^{12} unless נֹגְשָׂיו is to be regarded as a *pluralis maiestatis* according to § 124 *k*; Pr $3^{18.35}$ (?), 18^{21} (?), 21^{27b}, 27^{16}, 28^{1b}, 28^{16} *Keth.*

m Rem. Analogous to the examples above mentioned is the somewhat frequent[4] use of suffixes in the singular (distributively) referring to plurals; cf. the *verbal*-suffixes in Dt 21^{10}, 28^{48}, Am 6^{10}; and the *noun*-suffixes in Is 2^{8}, 30^{22}, Jer 31^{14}, Ho 4^{8} (but since ו follows, נַפְשׁוֹ is undoubtedly a dittography for נֶפֶשׁ), Zc 14^{12}, ψ 5^{10} (where, however, פִּימוֹ is clearly to be read with all the early versions); 62^{5}, 141^{10} (?), Jb 38^{32}, Ec 10^{15} [but LXX הַכְסִיל]; finally, the suffixes with prepositions in Is 2^{20} אֲשֶׁר עָשׂוּ־לוֹ *which they made* each one *for himself* (according to others, *which they* (*the makers*) *made for him*); 5^{26}, 8^{20}, Jb 24^{5}, in each case לוֹ; in Gn 2^{19} לוֹ refers to the collectives חַיָּה and עוֹף; cf. further, Jos 24^{7}, Is 5^{23} מְמֶּנּוּ after צַדִּיקִים (but read probably צַדִּיק with the LXX, &c.). Conversely in Mi 1^{11} עִבְרִי לָכֶם [cf. Jer 13^{20} *Keth.*], but the text is undoubtedly corrupt.

---

[1] Cf. in Greek the construction of the neuter plural with the singular of the predicate τὰ πρόβατα βαίνει; in Attic Greek the plural of the predicate is allowed only when the neuter denotes actual persons, as τὰ ἀνδράποδα ἔλαβον. In Arabic also the *pluralis inhumanus* (i.e. not denoting persons) is regularly construed with the feminine singular of the attribute or predicate, as are all the *pluralcs fracti* (properly collective forms).

[2] On the possibility of explaining forms like קָמָה as 3rd plural feminine, cf. above, § 44 *m*; but this explanation would not apply to all the cases under this head, cf. Jo 1^{20}, ψ 37^{31}, 103^{5}.

[3] In Pr 14^{1} an abstract plural חָכְמוֹת (to be read thus with 9^{1}, &c., instead of חַכְמוֹת) is construed with the singular; but cf. § 86 *l*, § 124 *e*, end.

[4] In several of the above examples the text is doubtful, and hence Mayer Lambert (*REJ.* xxiv. 110) rejects the theory of distributive singulars generally. [Cf. Driver, *Jeremiah*, p. 362, on 16^{7}.]

6. Subjects in the dual are construed with the plural of the predicate, *n* since verbs, adjectives, and pronouns, according to § 88 *a*, have no dual forms; thus עֵינַיִם, Gn 29[17] וְעֵינֵי לֵאָה רַכּוֹת *and Leah's eyes were dull*; 2 S 24[3], Is 30[20], Jer 14[6], Mi 7[10], ψ 18[28], 38[11] (on the other hand, in 1 S 4[15] the predicate is in the feminine singular *after* the subject, and in Mi 4[11] *before* it; on both constructions cf. *k* above); so also אָזְנַיִם *ears*, 2 Ch 6[40]; יָדַיִם *hands*, Is 1[15], Jb 10[8], 20[10] (in Ex 17[12] even with the plural masculine כְּבֵדִים; cf. *p*); שְׂפָתַיִם *lips*, 1 S 1[13], Jb 27[4]; שָׁדַיִם *breasts*, Ho 9[14].

7. Variations from the fundamental rule (see above, *a*) very fre- *o* quently occur *when the predicate precedes the subject* (denoting animals or things[1]). The speaker or writer begins with the most simple form of the predicate, the uninflected 3rd singular masculine, and leaves us without indication as to which of the following subjects (and so which gender or number) is to define the predicate thus left temporarily indefinite.[2] Thus inflexions are omitted in—

(*a*) The verb, with a following singular feminine, Is 2[17] וְשַׁח גַּבְהוּת הָאָדָם *and bowed down shall be the loftiness of man*; 9[18], 14[11], 28[18], 47[11]; 1 S 25[27] (see note 1 below); 1 K 8[31*b*], 22[36], 2 K 3[26], Jer 51[46], Ec 7[7]; with a following plural masc., Is 13[22] וְעָנָה אִיִּים *and there shall cry wolves*, &c.; Ju 13[17] *Keth.*, 20[46], 1 S 1[2], 4[10], 2 S 24[15], 1 K 13[33], Jer 51[48], ψ 124[5], Est 9[23] (see note 1 below); Gn 1[14] יְהִי מְאֹרֹת *let there be lights*; with a following plural feminine, Dt 32[35], 1 K 11[3*a*], Is 8[8], Jer 13[18], Mi 2[6], ψ 57[2]; before collectives and mixed subjects, e. g. Gn 12[16], 13[5], 30[43], 32[6], &c.; before a following dual, Is 44[18], ψ 73[7] (where, however, with the LXX עֲוֹנָמוֹ should be read).

Rem. 1. The instances in which a preceding predicate appears in the *p* plural masculine before a plural (or collective singular) feminine of persons (Ju 21[21], 1 K 11[3*b*]), of animals (Gn 30[39] where however צֹאן may refer specially to male animals) or of things (Lv 26[33], Jer 13[16], Ho 14[7], ψ 16[4], Jb 3[24], Ct 6[9]), or before a dual (2 S 4[1], Zp 3[16], 2 Ch 15[7]) are to be explained not on the analogy of the examples under *o*, but from a dislike of using the 3rd plur. fem. imperf., for this is the only form concerned in the above examples (cf., however, Na 3[11] תִּהְיִי instead of תִּהְיֶינָה); cf. the examples of a following predicate in the 3rd plur. masc., instead of the fem., under *t* and *u*, and on an analogous phenomenon in the imperative, see § 110 *k*.

2. As in the case of verbs proper so also the verb הָיָה, when used as a *q* copula, frequently remains uninflected before the subject; cf. Gn 5[23 ff.], 39[5],

[1] Only rarely does an uninflected predicate precede a personal subject, as 1 S 25[27] (but הֻבְיְאָה should probably be read, as in verse 35); Est 9[23] (before a plur. masc.). Such examples as Jb 42[15] are to be explained according to § 121 *a*.

[2] In a certain sense this is analogous to the German *es kommt ein Mann, eine Frau*, &c.

Dt 21[3] (according to the accents); 22[23], Is 18[5] וּבֹסֶר גֹּמֶל יִהְיֶה נָצָה *and a ripening grape the flower becometh.*

r (*b*) The adjective in a noun-clause, e.g. ψ 119[137] יָשָׁר מִשְׁפָּטֶיךָ *upright* are *thy judgements*; cf. verse 155.[1]—On the other hand, רֹעֶה in רֹעֶה צֹאן עֲבָדֶיךָ *thy servants are shepherds*, Gn 47[3], is either an unusual orthography or simply a misspelling for רֹעֵי.

s Rem. 1. As soon as a sentence which begins with an uninflected predicate is carried on after the mention of the subject, the gender and number of the subsequent (co-ordinate) predicates must coincide with those of the subject, e.g. Gn 1[14] וְהָיוּ . . . יְהִי מְאֹרֹת (see *o* above); Nu 9[6], Ez 14[1]; cf. also Gn 30[39] (see *p* above).

t 2. The dislike mentioned in *p* above, of using the feminine form (cf., further, § 144 *a*, with the sections of the Grammar referred to there, and below, under *u*), is exemplified sometimes by the fact that of several predicates only that which stands next to the feminine substantive is inflected as feminine (cf. the treatment of several attributes following a feminine substantive, § 132 *d*); thus in Is 14[9] רִגְזָה, and afterwards עוֹרֵר (but עוֹרֵר is better taken as an infin. abs. = *excitando*, reading הָקֵם for הֹקִים); 33[9] אָבַל אֻמְלְלָה אָרֶץ *mourneth, languisheth the land*. Cf. Jer 4[30], Jb 1[19], and the examples (§ 47 *k*) where only the first of several consecutive forms of the 2nd sing. fem. imperf. has the afformative ī, Is 57[8], Jer 3[5], Ez 22[4], 23[32] (תִּהְיֶה after תִּשְׁתִּי); on the converse sequence of genders in imperatives, Na 3[15], cf. § 110 *k*.—Of a different kind are instances like Lv 2[1], 5[1], 20[6], where נֶפֶשׁ *person* (fem.) as the narrative continues, assumes (in agreement with the context) the sense of a masculine person.

u 3. The instances in which the gender or number of the *following* predicate appears to differ from that of the subject are due partly to manifest errors in the text, e.g. Gn 32[9] read with the Samaritan הָאַחַד instead of הָאַחֵת; וְהָיָה then follows correctly; 1 S 2[20] read with Wellhausen שָׁאֵל, according to 1[28], instead of שְׁאֵל; 1 S 16[4] read וַיֹּאמְרוּ; Ez 18[29] instead of יִתְּכֶן read the plural as in verse 25; so also Ez 20[38] for יָבוֹא,[2] and in Jb 6[20] for בָּטַח; in La 5[10] read נִכְמְרוּ, and cf. in general, § 7 *d*, note; 1 Ch 2[48] read יָלְדָה; in Jer 48[15] also the text is certainly corrupt. Other instances are due to special reasons. The anomalies in Is 49[11], Ho 14[1], Pr 1[16] (after רַגְלֵיו), ψ 11[4] (after עֵינָיו), 63[4], Pr 5[2], 10[21.32] 18[6], 26[23], Jb 15[6] (all after שִׂפְתַיִם), Pr 3[2] (after מִצְוֹתַי), ψ 102[28], Jb 16[22] (after שָׁנוֹת), Dn 11[41] (read וְרַבּוֹת), and perhaps Gn 20[17] are also to be explained (see *p*) from the dislike of the 3rd plur. fem. imperf.; moreover, in Jer 44[19], Pr 26[23] the plur. masc. even of a participle occurs instead of the plur. fem.—In Gn 31[38 f.] יִהְיֶה, after a plural subject, is explained as a case of attraction to the following singular predicate.[3]—In Gn 4[7] רֹבֵץ

---

[1] This does not include such cases as Jb 24[7.10], where עָרוֹם is rather to be explained as an accusative denoting a state, § 118 *n*.

[2] יבוא probably an error for יבאו. The Masora on Lv 11[34] reckons fourteen instances of יָבֹא, where we should expect the plural.

[3] So also the pronoun הוּא emphatically resuming the subject (see § 141 *h*) is attracted to the predicate in number in Jos 13[14] אִשֵּׁי יְהוָה . . . הוּא נַחֲלָתוֹ *the offerings of the Lord . . . that is his inheritance*; in number and gender, Lv 25[33] *Qᵉrê*; Jer 10[3].

is a substantival participle (*a lurker, a coucher*). In Gn 47^{24} יִהְיֶה remains undefined in gender (masc.), although the noun precedes for the sake of emphasis; so also in Gn 28^{22}, Ex 12^{49}, $28^{7.32}$, Nu 9^{14}, 15^{29}, Jer 50^{46}, Ec 2^{7} (הָיָה לִי as if the sentence began afresh, *and servants born in my house . . . there fell to my lot* this possession also). In Jb 20^{26} לֹא־נֻפַּח may (unless אֵשׁ is regarded as masculine, § 122 *o*) be taken impersonally, *fire, without its being blown upon*.—In Is 16^{8} and Hb 3^{17} the predicate in the singular is explained from the collective character of שְׁדֵמוֹת (see *h* above); on the other hand, the masculine form of the predicate is abnormal in ψ 87^{3}, Pr 2^{10}, 12^{25}, 29^{25}, Jb 8^{7}, 36^{18}.

§ 146. *Construction of Compound Subjects.*

a **1.** When the subject is composed of a nomen regens (in the construct state) with a following genitive, the predicate sometimes agrees in gender and number not with the nomen regens, but with the genitive, when this represents the principal idea of the compound subject.[1] Thus 1 S 2^{4} קֶשֶׁת גִּבֹּרִים חַתִּים *the bow of the mighty men is broken*, as if it were *the mighty men with their bow are broken*; Ex 26^{12}, Lv 13^{9}, 1 K 1^{41} (but the text is clearly very corrupt), 17^{16}, Is 2^{11}, 21^{17}, Zc 8^{10}, Jb 15^{20}, 21^{21}, 29^{10}, 32^{7} (רֹב שָׁנִים equivalent to *many years*); 38^{21}; with the predicate preceding, 2 S 10^{9}, unless it is to be explained according to § 145 *k*.

b Rem. 1. The cases in which קוֹל (*voice, sound*) with a following genitive stands at the beginning of a sentence, apparently in this construction, are really of a different kind. The קוֹל is there to be taken as an exclamation, and the supposed predicate as in apposition to the genitive, e.g. Gn 4^{10} *the voice of thy brother's blood, which crieth* (prop. *as one crying*) . . . ! = *hark! thy brother's blood is crying*, &c.; Is 13^{4}, 66^{6}. In Is 52^{8} an independent verbal-clause follows the exclamation *the voice of thy watchmen!*; in Jer 10^{22} and Ct 2^{8} an independent noun-clause; in Is 40^{3} קוֹל קוֹרֵא *the voice of one that crieth!* i.e. *hark! there is one crying* is followed immediately by direct speech; in Mi 6^{9} קוֹל *hark!* may be used disconnectedly (cf. the almost adverbial use of קוֹל in § 144 *m*) and יְהוָה be taken as the subject to יִקְרָא.

c 2. When the substantive כֹּל (כָּל־) *entirety* is used in connexion with a genitive as subject of the sentence, the predicate usually agrees in gender and number with the genitive, since כֹּל is equivalent in sense to an attribute (*whole, all*) of the genitive; hence, e.g. with the predicate preceding, Gn 5^{5} וַיִּהְיוּ כָּל־יְמֵי אָדָם *and all the days of Adam were*, &c. (in 5^{23}, 9^{29} וַיְהִי; but the Samaritan reads ויהיו here also); Ex 15^{20}; with the predicate following, ψ 150^{6}, &c. Exceptions are, e.g. Lv 17^{14} (but cf. § 145 *l*), Jos 8^{25}, Is 64^{10}, Pr 16^{2}, Na 3^{7}. On the other hand, in such cases as Ex 12^{16} the agreement of the

[1] Sometimes, however, the attraction of the predicate to the genitive may be merely due to juxtaposition.

predicate with כָּל־ is explained from the stress laid upon the latter, כָּל־מְלָאכָה לֹא being equivalent to *the whole of work* (is forbidden).

d **2.** When the subject of the sentence consists of several nouns connected by *wāw copulative*, usually

(*a*) The predicate *following* is put in the plural, e. g. Gn 8[22] *seed time and harvest, and cold and heat . . . shall not cease* (לֹא יִשְׁבֹּתוּ); after subjects of different genders it is in the masculine (as the *prior gender*, cf. § 132 *d*), e. g. Gn 18[11] אַבְרָהָם וְשָׂרָה זְקֵנִים *Abraham and Sarah* were *old*; Dt 28[32], 1 K 1[21].

e Rem. Rare exceptions are Pr 27[9] שֶׁמֶן וּקְטֹרֶת יְשַׂמַּח־לֵב *ointment and perfume rejoice the heart*, where the predicate agrees in gender with the masculine שֶׁמֶן (as in Is 51[3] with שָׂשׂוֹן); on the other hand, in Ex 21[4] (where הָאִשָּׁה וְיָלְדָה יְהִיָה are the subjects) it agrees with הָאִשָּׁה as being the principal person; in the compound sentence, Is 9[4], it agrees with the feminine subject immediately preceding.[1]

f (*b*) The predicate *preceding* two or more subjects may likewise be used in the plural (Gn 40[1], Jb 3[5], &c.); not infrequently, however, it agrees in gender and number with the first, as being the subject nearest to it. Thus the predicate is put in the singular masculine before several masculines singular in Gn 9[23], 11[29], 21[32], 24[50], 34[20], Ju 14[5]; before a masculine and a feminine singular, e. g. Gn 3[8], 24[55] *then said* (וַיֹּאמֶר) *her brother and her mother*; 33[7]; before a masculine singular and a plural, e. g. Gn 7[7] וַיָּבֹא נֹחַ וּבָנָיו *and Noah went in, and his sons*, &c.; Gn 8[18] (where feminines plural also follow); 44[14], Ex 15[1], 2 S 5[21]; before collectives feminine and masculine, 2 S 12[2].

g Similarly, the feminine singular occurs before several feminines singular, e. g. Gn 31[14] וַתַּעַן רָחֵל וְלֵאָה *then answered Rachel and Leah*; before a feminine singular and a feminine plural, e. g. Gn 24[61]; before a feminine singular and a masculine singular, Nu 12[1] וַתְּדַבֵּר מִרְיָם וְאַהֲרֹן *then spake Miriam and Aaron*; Ju 5[1]; before a feminine singular and a masculine plural, e. g. Gn 33[7] (cf., on the other hand, ψ 75[4] נְמֹגִים אֶרֶץ וְכָל־יֹשְׁבֶיהָ *dissolved are the earth and all the inhabitants thereof*). The plural feminine occurs before a plural feminine and a plural masculine in Am 8[13].—In Jer 44[25] for אַתֶּם וּנְשֵׁיכֶם read אַתֶּם הַנָּשִׁים with the LXX, and cf. verse 19.

h (*c*) When other predicates follow after the subjects have been mentioned, they are necessarily put in the plural; cf. Gn 21[32], 24[61], 31[14], 33[7], &c., and § 145 *s*.

---

[1] Similarly with a mixed object, Gn 33[2] *he put . . . Leah and her children* אַחֲרֹנִים *after*; אַחֲרֹנִים agrees with the masculine immediately preceding.

§ 147. *Incomplete Sentences.*

a **1.** Sentences are called *incomplete*, in which either the subject or the predicate or both must in some way be supplied from the context.[1] Besides the instances enumerated in § 116 *s* (omission of the personal pronoun when subject of a participial clause) and the periphrases for negative attributes § 152 *u*, this description includes certain (noun-) clauses introduced by הִנֵּה (see *b* below), and also a number of exclamations of the most varied kinds (see *c* below).

Rem. Incomplete sentences are very common in Chronicles, but are mostly due to the bad condition of the text; cf. Driver, *Introd.*[6], p. 537, no. 27. Thus in 2 Ch $11^{22\,b}$ restore חָשַׁב, with the LXX, before לְהַמְלִיכוֹ; in 35^{21} add בָּאתִי, with the LXX, after הַיּוֹם and read פֶּרֶת for בֵּית; in 2 Ch 19^{6} and 28^{21} the pronoun הוּא is wanted as subject, and in 30^{9} the predicate יְהִיוּ; cf. also the unusual expressions in 1 Ch 9^{33} (Ezr 3^{3}), 1 Ch 15^{13} (*ye were not present?*), 2 Ch 15^{3}, $16^{10.12\,(bis)}$, 18^{3}.

b **2.** The demonstrative particle הֵן, הִנֵּה *en*, *ecce* may be used either absolutely (as a kind of interjection, cf. § 105 *b*) before complete noun- or verbal-clauses, e.g. Gn 28^{15} וְהִנֵּה אָנֹכִי עִמָּךְ *and, behold! I am with thee*; 37^{7}, 48^{21}, Ex 3^{13}, 34^{10}, or may take the pronoun, which would be the natural subject of a noun-clause, in the form of a suffix, see § 100 *o*. Whether these suffixes are to be regarded as in the accusative has been shown to be doubtful in § 100 *p*. However, in the case of הִנֵּה the analogy of the corresponding Arabic demonstrative particle *'inna* (followed by an accusative of the noun) is significant.[2] If הִנֵּה with a suffix and a following adjective or participle (see the examples in § 116 *p* and *q*) forms a noun-clause, the subject proper, to which הִנֵּה with the suffix refers, must, strictly speaking, be supplied again before the predicate.[3] Sometimes, however, the pronoun referring to the subject is wanting, and the simple הִנֵּה takes the place of the

[1] This does not apply to such cases as Gn 33^{8}, where an infinitive with לְ appears alone in answer to a question, the substance of the question being presupposed as a main clause; cf. also Gn 26^{7}, where הִיא must again be supplied after אִשְׁתִּי.

[2] On the same analogy any substantive following הִנֵּה would have to be regarded as originally a virtual accusative. Since, however, Hebrew does not possess case-terminations (as the Arabic does, and uses the accusative necessarily after *'inna*), it is very doubtful whether, and how far, substantives following הִנֵּה were felt to be accusatives.

[3] That these are real noun-clauses and that the participle (e.g. מֵת in הִנְּךָ מֵת Gn 20^{3}) cannot be taken as a second accusative (as it were *ecce te moriturum*), is also shown by the analogy of Arabic, where after *'inna* with an accusative the predicate is expressly in the *nominative*.

subject and copula (as Gn 18[9] הִנֵּה בְאָהֳלָה *behold* she is *in the tent*; 42[28]), or there is no indication whatever of the predicate, so that the sentence is limited to הִנֵּה with the suffix, as in the frequent use of הִנֵּנִי, הִנֶּנִּי *here am I*, in answer to an address. Elsewhere a substantive follows הִנֵּה (or הֵן Gn 11[6], Jb 31[35]), and הִנֵּה then includes the meaning of a demonstrative pronoun and the copula, e.g. Gn 22[7] הִנֵּה הָאֵשׁ וְהָעֵצִים *here is the fire and the wood*, &c.; 12[19] *behold* thou hast *thy wife!* Ex 24[8]; with reference to the past, e.g. Am 7[1] וְהִנֵּה לֶקֶשׁ וגו׳ *and lo*, it was *the latter growth*, &c. By a very pregnant construction the simple הִנֵּה is used as the equivalent of a sentence in Jb 9[19], *lo, here am I!*

c 3. Examples of exclamations (threatening, complaining, triumphing, especially warlike or seditious) in which, owing to the excitement of the speaker, some indispensable member of the sentence is suppressed, are—(*a*) with suppression of the predicate (which has frequently to be supplied in the form of a jussive), e.g. Ju 7[20] *a sword for the Lord and for Gideon!* (verse 18 without חֶרֶב); 2 S 20[1] and 2 Ch 10[16] (cf. also 1 K 22[36]) *every man to his tents, O Israel!* (i.e. *let every man go to* or *remain in his tent*); without אִישׁ 1 K 12[16]; moreover, Is 1[23], 13[4] (on the exclamatory קוֹל equivalent to *hark!* cf. § 146 *b*); 28[10], 29[16] (הַפִּכְּכֶם *O your perversity!* i.e. how great it is!); Jer 49[16] (if תִּפְלַצְתְּךָ be equivalent to *terror be upon thee!*); Jo 4[14], Mal 1[13] (הִנֵּה מַתְּלָאָה *behold what a weariness!*); Jb 22[29]; perhaps also Gn 49[4] פַּחַז כַּמַּיִם *a bubbling over as water* (sc. happened), unless it is better to supply a subject אַתָּה (*thou wast*).—(*b*) With suppression of the subject, Ju 4[20], cf. § 152 *k*; Jb 15[23] אַיֵּה *where* sc. is bread?—(*c*) With suppression of both subject and predicate, Ju 7[18] (see above); 1 K 12[16] (see above); 2 K 9[27] גַּם אֹתוֹ *him also!* explained immediately afterwards by הַכֵּהוּ *smite him!* Ho 5[8] *after thee, Benjamin!* sc. is the enemy (differently in Ju 5[14]); ψ 6[4], 90[13], Hb 2[6] עַד־מָתַי; ψ 74[9] עַד־מָה.—On וְלֹא *and if not* (unless וְלוּ is to be read), 2 S 13[26], 2 K 5[17], see § 159 *dd*.

d Rem. 1. To the class of incomplete sentences naturally belong exclamations introduced by interjections אֲהָהּ, אוֹי, הוֹי, הַס;[1] cf. § 105. After the first two the object of the *threat* or *imprecation* follows regularly with לְ (cf. *vae tibi*) or אֶל־ or עַל־, e.g. אוֹי לָנוּ *woe unto us!* 1 S 4[8], Is 6[5]; cf. also אֲהָהּ לַיּוֹם *alas for the day!* Jo 1[15]; on the other hand, the object of *commiseration* (after הוֹי) follows mostly in the vocative, or rather in the accusative of exclamation (cf. *vae te* in Plautus); so in lamentation for the dead, הוֹי אָחִי *alas, my brother!* 1 K 13[30],

[1] We do not consider here the cases in which these interjections (e.g. הַס Ju 3[19], Am 6[10]) stand quite disconnectedly (so always אָח and הֶאָח).

Jer 22^{18}; הוֹי גּוֹי חֹטֵא *ah, sinful nation!* Is 1^4, $5^{8.11.18.20.22}$ (*ah! they that . . .*).— For הֵם cf. Hb 2^{20}, Zp 1^7, Zc 2^{17}.

c 2. Finally, instances of noun-clauses shortened in an unusual manner may perhaps occur in יְדֵיהֶם and רַגְלֵיהֶם ψ 115^7, for יָדַיִם לָהֶם *they have hands*, &c.; cf. verses 5 and 6 פֶּה־לָהֶם, &c. Perhaps also וּפִילַגְשׁוֹ Gn 22^{24}, and וְחֵלְיוֹ Ec 5^{16} are to be regarded in the same way, but hardly נְבִיאֶכֶם Nu 12^6; cf. § 128 *d* above.

II. Special Kinds of Sentences.

§ 148. *Exclamations.*

a The originally interrogative מָה is used to introduce exclamations of wonder or indignation = *O how!* or ridicule, *why! how!* sometimes strengthened by זֶה or זֹאת according to § 136 *c*.—Astonishment or indignation at something which has happened is introduced by אֵיךְ *how* (likewise originally interrogative) with the perfect; the indignant refusal of a demand by אֵיךְ (but also by מָה Jb 31^1) with the imperfect; an exclamation of lamentation by אֵיכָה, less frequently אֵיךְ *how!*; in Jo 1^{18} by מָה.

Examples:—

b מָה (or מַה־ with a following *Dageš*, see § 37) expressing admiration (or astonishment) before verbal-clauses, e.g. Gn 27^{20} (מַה־זֶּה); 38^{29}, Nu 24^5 (*how goodly are . . .!*); ψ 21^2, Ct 7^2; before the predicate of noun-clauses, e.g. Gn 28^{17}, ψ 8^2; mockingly before the verb, 2 S 6^{20} (*how glorious was . . .!*); Jer 22^{23}, Jb $26^{2f.}$; indignantly, Gn 3^{13} מַה־זֹּאת; 4^{10}, 20^9, 31^{26} *what hast thou done!*

אֵיךְ with the perfect, e.g. Gn 26^9, ψ 73^{19}; in scornful exclamation, Is $14^{4.12}$; in a lament (usually אֵיכָה), 2 S $1^{25.27}$; with the imperfect, in a reproachful question, Gn 39^9, 44^8, ψ 11^1, 137^4; in a mocking imitation of lament, Mi 2^4.

אֵיכָה with the perfect, Is 1^{21}, La 1^1; with the imperfect, La 2^1, 4^1.

c Rem. 1. The close relation between a question and an exclamation appears also in the interrogative personal pronoun מִי in such cases as Mi 7^{18} מִי־אֵל כָּמוֹךָ *who is a God like unto thee?* and so in general in *rhetorical* questions as the expression of a forcible denial; similarly in the use of an interrogative sentence to express a wish, see §§ 150 *d*, 151 *a*.

d 2. A weaker form of exclamation is sometimes produced by the insertion of a corroborative כִּי *verily, surely*, before the predicate, Gn 18^{20}; cf. 33^{11}, Is 7^9, and the analogous cases in the apodoses of conditional sentences, § 159 *ee*.

§ 149. *Sentences which express an Oath or Asseveration.*

a The particle אִם, in the sense of *certainly not*, and אִם־לֹא (rarely כִּי Gn 22^{16}) in the sense of *certainly*, are used to introduce promises or threats confirmed by an oath (especially after such formulae as חַי־יְהוָה,

חֵי־נַפְשֶׁךָ,[1] חַי אָנִי, בִּי נִשְׁבַּעְתִּי, &c., as well as after imprecations, see below), and also simple asseverations, e.g. 1 S 2[30], 2 S 20[20], Jb 27[5] after חָלִילָה לִי *far be it from me*, but mostly without any introductory formula.

b Rem. No certain explanation of these particles has yet been given. According to the usual view, phrases expressing an oath depend on the suppression of an imprecation upon oneself, e.g. *the Lord do so unto me, if I do it* equivalent to *I certainly will not do it*; then naturally אִם־לֹא properly *if I do it not* equivalent to *I certainly will do it*. It is indeed difficult to understand such self-imprecations, put into the mouth of God, as in Dt 1[34 f.], Is 14[24], 22[14], Jer 22[6], Ez 3[6], 35[6], ψ 95[11]. Possibly, however, the consciousness of the real meaning of the formula was lost at an early period, and אִם־לֹא simply came to express *verily*, אִם *verily not*.—In 1 S 25[22], where, instead of a self-imprecation, a curse is pronounced upon others, read לְדָוִד with the LXX for לְאֹיְבֵי דָוִד.

Examples:—

c (*a*) The particles אִם and אִם־לֹא used after the utterance of an oath and after formulae of swearing, e.g. 2 S 11[11] (see note on *a*) חַי־יְהוָה וְחֵי נַפְשֶׁךָ אִם־אֶעֱשֶׂה אֶת־הַדָּבָר הַזֶּה *as the Lord liveth, and as thy soul liveth, I will not do this thing*; 1 S 14[45], 2 K 5[16] (after חַי יְהוָה; in 1 S 14[39] and 29[6] חַי־י׳ is followed by a simple כִּי); Ct 2[7], 3[5] (after הִשְׁבַּעְתִּי *I adjure you*); cf. also Gn 14[23], 21[23], 26[29]; spoken by God, Dt 1[34 f.], 1 S 3[14], ψ 95[11]; similarly אִם־לֹא Gn 24[37 f.]; spoken by God, Is 14[24], where אִם־לֹא occurs first with the perfect in the sense of a prophetic perfect, § 106 *n*, but in the parallel clause with the imperfect; Jer 22[6]; in Gn 31[52] the negative oath introduced by אִם־אָנִי, אִם־אַתָּה is immediately afterwards continued by לֹא with the imperfect.—In Ez 34[10] the threat introduced in verse 8 by אִם־לֹא is, after a long parenthesis, resumed with הִנְנִי.

d (*b*) אִם and אִם־לֹא after formulae of cursing, e.g. 1 S 3[17] כֹּה יַעֲשֶׂה־לְּךָ אֱלֹהִים וְכֹה יוֹסִיף אִם־תְּכַחֵד מִמֶּנִּי דָּבָר וגו׳ *God do so to thee, and more also! thou shalt not hide anything from me*, &c.; cf. 1 S 25[22]. On the other hand, כִּי follows the curse, in 1 S 14[44], 1 K 2[23] (here with a perfect), and in 2 S 3[35] כִּי אִם; in 1 S 25[34] the preceding כִּי is repeated before אִם; in 1 S 20[13] the purport of the asseveration is repeated (after the insertion of a conditional sentence) in the perfect consecutive.

e (*c*) אִם and אִם־לֹא as simple particles of asseveration, e.g. Ju 5[8] מָגֵן אִם־יֵרָאֶה וְרֹמַח וגו׳ *truly, there was not a shield and spear seen*, &c.; Is 22[14], Jb 6[28] (in the middle of the sentence); after חָלִילָה חָלִילָה *absit*, 2 S 20[20]; אִם־לֹא with the imperf. Is 5[9], with the perfect, Jb 22[20].

---

[1] Also combined חַי־יְהוָה וְחֵי נַפְשֶׁךָ 1 S 20[3], 25[26] *as the Lord liveth, and as thy soul* (i.e. *thou*) *liveth!* (Also in 2 S 11[11] read חַי־יהוה instead of the impossible חַיָּךְ). On חַי and חֵי in these noun-clauses (prop. *living* is *the Lord*, &c.), cf. § 93 *aa*, note.

§ 150. *Interrogative Sentences.*

H. G. Mitchell, 'The omission of the interrogative particle,' in *Old Test. and Sem. Studies in memory of W. R. Harper*, Chicago, 1907, i, 113 ff.

a **1.** A question need not necessarily be introduced by a special interrogative pronoun or adverb. Frequently[1] the natural emphasis upon the words is of itself sufficient to indicate an interrogative sentence as such; cf. Gn 27^{24} אַתָּה זֶה בְּנִי עֵשָׂו *thou art my son Esau?* (but cf. note 1 below) Gn 18^{12}, Ex 33^{14} (פָּנַי); 1 S 11^{12} שָׁאוּל יִמְלֹךְ עָלֵינוּ *Saul shall reign over us?* 1 S 22^{7}, 2 S 16^{17}, 18^{29} שָׁלוֹם לַנַּעַר *is it well with the young man?* (but cf. note 1); 1 S 16^{4}, 1 K 1^{24}, Is 28^{28}, Ho 4^{16}, Zc 8^{6} (*should it also be marvellous in mine eyes?*); Pr 5^{16}. So especially, when the interrogative clause is connected with a preceding sentence by וְ, e. g. Jn 4^{11} וַאֲנִי לֹא אָחוּס *and I should not have pity?* Ex 8^{22} *will they not stone us?* Ju 11^{23}, 14^{16}, 1 S 20^{9}, 24^{20}, 25^{11}, 2 S 11^{11}, 15^{20}, Is 37^{11}, 44^{19b}, Jer 25^{29}, 45^{5}, 49^{12}, Ez 20^{31}, Jb 2^{10}, 10^{9}; or when (as in some of the examples just given) it is negative (with לֹא for הֲלֹא *nonne?*), 2 K 5^{26} (but cf. note 1), La 3^{38}.[2]

b Rem. The statement formerly made here that the interrogative particle is omitted especially before gutturals, cannot be maintained in view of Mitchell's statistics (op. cit. p. 123 f.). The supposed considerations of euphony are quite disproved by the 118 cases in which הַ or הָ occurs before a guttural.

c **2.** As a rule, however, the simple question is introduced by *He interrogative* הַ (הַ֫); as to its form, cf. § 100 *k–n*), *ne? num?* the disjunctive question by הַ (*num? utrum?*) in the first clause, and אִם[3] (also וְאִם, less frequently אוֹ) *an?* in the second, e. g. 1 K 22^{15} . . . הֵנֵלְךְ

---

[1] Mitchell (op. cit.) restricts the number of instances to 39, of which he attributes 12 (or 17) to corruption of the text. Thus in Gn 27^{24} he would read, with the Samaritan, הַאַתָּה as in verse 21, in 1 S 16^{4} הֲשָׁלֹם, in 2 S 18^{29} הֲשָׁלוֹם as in verse 32; similarly he would read the interrogative particle in 2 K 5^{26}, Ez 11^{3}, Jb 40^{25}, 41^{1}; 1 S 30^{8}, 2 K 9^{19}, Ez 11^{13}, 17^{9}.

[2] But in 1 S 27^{10} instead of אֶל־ (which according to the usual explanation would expect a negative answer) read either אֶל־מִי (עַל־מִי) with the LXX, or better, אָן (אָנָה) *whither?* with the Targum. In 2 S 23^{5} read חֶפְצִי הֲלֹא with Wellhausen.

[3] Quite exceptional is the use of the particle אִין *num?* (common in Aramaic) in 1 S 21^{9} וְאִין יֵשׁ־פֹּה *num est hic?* The text is, however, undoubtedly corrupt; according to Wellhausen, *Text der Bücher Sam.*, the LXX express the reading רְאֵה הֵיֵשׁ; but cf. the full discussion of the passage by König, *ZAW.* xviii. 239 ff.—The above does not apply to interrogative sentences introduced by interrogative pronouns (§ 37) or by the interrogatives compounded with מָה *what?* such as כַּמָּה *how many?* לָמָּה *why?* (see § 102 *k*), מַדּוּעַ *why?* (§ 99 *e*), or by אַיֵּה *where?* אֵיךְ, אֵיכָה *how?* (§ 148), &c. On the transformation of

אִם נֵחְדַּל[1] *shall we go . . . or shall we forbear?* Cf. also אָן *where? whither?* אָנָּה *whither*, and J. Barth, *Sprachwiss. Untersuchungen*, i. 13 ff.

d The particular uses are as follows:—

(*a*) The particle הַ stands primarily before the simple question, when the questioner is wholly uncertain as to the answer to be expected, and may be used either before noun-clauses, e. g. Gn 43[7] הַעוֹד אֲבִיכֶם חַי הֲיֵשׁ לָכֶם אָח *is your father yet alive? have ye* another *brother?* for הֲיֵשׁ cf. Gn 24[23], 1 S 9[11]; for הֲכִי *is it that?* Jb 6[22]; for הֲכִי יֶשׁ־ *is there yet?* 2 S 9[1] (but in 2 S 23[19] for הֲכִי read הֲנוֹ with 1 Ch 11[25]); for הַאֵין *is there not?* 1 K 22[7], &c.; or before verbal-clauses, e. g. Jb 2[3] *hast thou considered* (הֲשַׂמְתָּ לִבְּךָ) *my servant Job?* In other cases הַ (=*num?*) is used before questions, to which, from their tone and contents, a negative answer is expected, e.g. Jb 14[14] *if a man die,* הֲיִחְיֶה *shall he* indeed *live* again? Sometimes a question is so used only as a rhetorical form instead of a negative assertion, or of a surprised or indignant refusal,[2] e.g. 2 S 7[5] הַאַתָּה תִּבְנֶה־לִּי בַיִת *shalt thou build me an house?* (in the parallel passage 1 Ch 17[4] לֹא אַתָּה וגו׳ *thou shalt not*, &c.); Gn 4[9] הֲשֹׁמֵר אָחִי אָנֹכִי *am I my brother's keeper?* cf. 2 K 5[7], and the two passages where הַ is used before the infinitive (*constr.* Jb 34[18], *absol.* Jb 40[2]; on both, see § 113 *ee*, with the note). —On the other hand, in 1 K 16[31] for הֲנָקֵל (after וַיְהִי) read הִנָּקֵל.

c Rem. 1. A few passages deserve special mention, in which the use of the interrogative is altogether different from our idiom, since it serves merely to express the conviction that the contents of the statement are well known to the hearer, and are unconditionally admitted by him. Thus, Gn 3[11] *surely thou hast eaten*; Gn 27[36] הֲכִי קָרָא prop. *is it so that one names?* &c., i. e. *of a truth he is rightly named Jacob*; Gn 29[15] *verily thou art my brother*; Dt 11[30], Ju 4[6], 1 S 2[27] *I did indeed*, &c.; 20[37], 1 K 22[3] *ye know surely . . .*; Mi 3[1], Jb 20[4].— In 1 S 23[19] (cf. ψ 54[2]) a surprising communication is introduced in this way (by הֲלֹא) in order to show it to be absolutely true, and in Am 9[7] a concession is expressed by הֲלוֹא *I have, it is true*, &c. Finally, we may include the formula of quotation הֲלֹא־הִיא כְתוּבָה Jos 10[13] or הֲלֹא־הֵם כְּתוּבִים equivalent to *surely it is, they are* written (the latter in 1 K 11[41], 14[29], and very often elsewhere in the books of Kings and Chronicles), synonymous with the simple formula of assertion הִנֵּה כְתוּבָה 2 S 1[18], and הִנָּם כְּתוּבִים 1 K 14[19], 2 K 15[11], 2 Ch 27[7], 32[32].

Of very frequent occurrence also are questions introduced by לָמָּה, which really contain an affirmation and are used to state the reason for a request or warning, e. g. 2 S 2[22] *turn thee aside . . . wherefore should I smite thee to the ground?* i. e. *otherwise I will* (or *must*) *smite*, &c.; cf. 1 S 19[17], and Driver on the passage; 2 Ch 25[16]; also Gn 27[45], Ex 32[12] (Jo 2[17], ψ 79[10], 115[2]); Ct 1[7], Ec 5[5], 7[17], Dn 1[10].

---

pronouns and adverbs into interrogative words by means of a prefixed אֵי, see the Lexicon.

[1] On the use of the *imperfect* in deliberative questions, see § 107 *t*; on the *perfectum confidentiae* in interrogative sentences, see § 106 *n*.

[2] Analogous to this is the use of the interrogative מָה in the sense of a reproachful remonstrance instead of a prohibition, as Ct 8[4] מַה־תָּעִירוּ *why should ye stir up?* i.e. *pray, stir not up*; cf. also Jb 31[1]; see above, § 148.

2. The rare cases in which a *simple* question is introduced by אִם (as sometimes in Latin by *an? is it?*) are really due to the suppression of the first member of a double question; thus 1 K 1^{27}, Is 29^{16}, Jb 6^{12}, 39^{13}. *f*

(*b*) Disjunctive questions are, as a rule, introduced by אִם—הֲ (*utrum—an?*) or sometimes by וְאִם[1]—הֲ, e. g. Jo 1^{2}, Jb 21^{4} (even with הֲ repeated after וְאִם in a question which implies disbelief, Gn 17^{17}). In Jb 34^{17}, $40^{8\,f.}$ special emphasis is given to the first member by הַאַף prop. *is it even?* The second member is introduced by אוֹ *or* in 2 K 6^{27}, Jb 10^{3}, 38^{28}, 31^{36} (Mal 1^{8} הֲ(אוֹ)), in each case before מ, and hence no doubt for euphonic reasons, to avoid the combination אִם מ׳; cf. also Ju 18^{19}, Ec 2^{19}. *g*

Double questions with (וְאִם) אִם—הֲ need not always be mutually exclusive; frequently the disjunctive form serves (especially in poetic parallelism; but cf. also e. g. Gn 37^{8}) merely to repeat the same question in different words, and thus to express it more emphatically. So Jb 4^{17} *shall mortal man be just before God? or* (אִם) *shall a man be pure before his Maker?* Jb $6^{5\,f.}$, 8^{3}, $10^{4\,f.}$, $11^{2.7}$, 22^{3}, Is 10^{15}, Jer 5^{29}. The second member may, therefore, just as well be connected by a simple וְ, e. g. Jb 13^{7}, $15^{7\,f.}$, $38^{16\,f.\,22.32.39}$; cf. also ψ 8^{5} after מָה; Jb $21^{17\,f.}$ after כַּמָּה; or even without a conjunction, Jb 8^{11}, 22^{4}; after מָה ψ 144^{3}. *h*

(*c*) With regard to *indirect* questions[2] after verbs of inquiring, doubting, examining,[3] &c., simple questions of this kind take either הֲ *whether*, Gn $8^{8,4}$ or אִם Gn 15^{5}, 2 K 1^{2}, Ct 7^{13}; even before a noun-clause, Jer 5^{1}; in 1 S 20^{10} the indirect question is introduced by אוֹ, i. e. probably *if perchance*. In disjunctives (*whether—or*) אִם—הֲ Nu 13^{18} at the end (or אִם־לֹא—הֲ Gn 24^{21}, 27^{21}, 37^{32}, Ex 16^{4}), and הֲ—הֲ Nu 13^{18}, which is followed by אִם—הֲ; also אוֹ—הֲ Ec 2^{19}. The formula מִי יוֹדֵעַ אִם has an affirmative force, *who knows whether . . . not*, like the Latin *neescio an*, Est 4^{14}. *i*

In Jon $1^{7.8}$ the relative pronouns שֶׁ· and אֲשֶׁר owing to the following לְמִי have become also interrogative, *for whose cause?* *k*

(*d*) זֶה and הוּא (cf. § 136 *c*) immediately after the interrogative serve to give vividness to the question; so also אֲפוֹא (for which אֶפְוֹא five times in Job) *then, now*, Gn 27^{33} מִי־אֲפוֹא הוּא *who then is he?* Ju 9^{38}, Is 19^{12}, Jb 17^{15}; אַיֵּה אֲפוֹ *l*

---

[1] וְאִם occurs in Pr 27^{24} after a negative statement; we should, however, with Dyserinck read וְאַיִן. Not less irregular is הֲלֹא instead of אִם לֹא in the second clause of Ju 14^{15}, but the text can hardly be correct (cf. Moore, *Judges*, New York, 1895, p. 337); in 1 S 23^{11} the second הֲ introduces a fresh question which is only loosely connected with the first.—In Nu 17^{28} and in the third clause of Jb 6^{13}, הַאִם is best taken with Ewald in the sense of הֲלֹא, since אִם from its use in oaths (see above, § 149 *b*) may simply mean *verily not*.

[2] It should here be remarked that the distinction between direct and indirect questions cannot have been recognized by the Hebrew mind to the same extent as it is in Latin or English. In Hebrew there is no difference between the two kinds of sentence, either as regards mood (as in Latin) or in tense and position of the words (as in English). Cf. also § 137 *c*.

[3] In Gn 43^{6} the הַ after לְהַגִּיד is explained from the fact that the latter, according to the context, implies *to give information upon a question*.

[4] Also in Ec 3^{21} we should read הַעֹלָה and הַיֹּרֶדֶת (*whether—whether*) instead of the article which is assumed by the Masora.

where then is . . . ? However, אֲפוֹא may also be placed at the end of the entire question (Ex 33^{16}, Is 22^{1}; also Ho 13^{10}, since either אֵיֵּ֫הִי is a dialectical form of אַיֵּה, or אַיֵּה should be read instead of it) or at the beginning of the question proper, after a strongly emphasized word, as in Gn 27^{37}.[1]

m (*e*) Sometimes one interrogative governs two co-ordinate clauses, the first of which should rather be subordinated to the second, so that the interrogative word strictly speaking affects only the second; thus Is 5^{4} after מַדּוּעַ *wherefore looked I . . . and it brought forth?* i.e. wherefore brought it forth, while I looked, &c.; Is 50^{2}; after הֲ Nu 32^{6}, Jer 8^{4}, also Nu 16^{22} (read הַאִישׁ); after הֲלֹא Jos 22^{20}; after לָמָּה Is 58^{3}, 2 Ch 32^{4}; after אֶל־מִי Is 40^{25}.[2] But הֲ Jb 4^{2} and הֲלֹא 4^{21} are separated from the verb to which they belong by the insertion of a conditional clause.

n **3.** The affirmative answer is generally expressed, as in Latin, by repeating the emphatic word in the question (or with the second person changed to the first, Gn 24^{58}, 27^{24}, 29^{5}, Ju 13^{11}), Gn 29^{6}, $37^{32\,f.}$, 1 S 23^{11}, 26^{17}, 1 K 21^{10}, Jer 37^{17}. (On וְיֵשׁ *if it be so* in the corrected text of 2 K 10^{15}, see § 159 *dd*.) As a negative answer the simple לֹא is sometimes sufficient, as in Gn 19^{2}, 1 K 3^{22}, &c.; cf. § 152 *c*; and in Ju 4^{20} the simple אַיִן equivalent to *no* or *no one*.

§ 151. *Desiderative Sentences.*

a A wish may be expressed not only by the simple imperfect (§ 107 *n*), cohortative (§ 108, especially with נָא § 108 *c*), jussive (§ 109; with נָא § 109 *b*), imperative (§ 110 *a*), perfect consecutive (§ 112 *aa*) or by a simple noun-clause (§ 116 *r*, note, and § 141 *g*) but also in the following ways:—

1. By exclamations in the form of *interrogative* clauses:[3] especially sentences with מִי followed by the imperfect as being the mood of that which is still unfulfilled but possible, and hence also of that which is desired, e.g. 2 S 15^{4} מִי־יְשִׂמַנִּי שֹׁפֵט *who maketh me judge?* i.e. *O that I were made judge!* 1 S 20^{10}, 2 S 23^{15}. On the other hand, מִי with the perfect (Gn 21^{7}, Nu 23^{10}, 1 S 26^{9}, Is 53^{1}, &c.) or participle (ψ 59^{8}, Pr 24^{22}, &c.), rather expresses a rhetorical question, i.e. a denial, cf. § 150 *d*. Especially frequent is the use of מִי־יִתֵּן (prop. *who gives?*) to introduce all kinds of desiderative clauses (see under *b*).—In Mal 1^{10} the desiderative clause proper is co-ordinated with an interrogative clause,

---

[1] On the other hand, in Jb 9^{24} and 24^{25} אֲפוֹ is not prefixed to the מִי, but appended to the conditional sentence.

[2] Cf. the analogous sentences after יַעַן *because*, Is 65^{12}, Jer 35^{17}; after causal אֲשֶׁר 1 S 26^{23}; after כִּי Is 12^{1}; likewise after גַּם § 153 at the end; after פֶּן Dt 8^{12-14}, 25^{3}, Jos 6^{18}, 2 S 12^{28}.

[3] The transition from a question to a wish may be seen, e.g. in Nu 11^{4} *who shall give us flesh to eat?* i.e. *O that we had flesh to eat!*

מִי נַם־בָּכֶם וְיִסְגֹּר דְּלָתַיִם *would that one were among you and would shut the doors*, i. e. O that one would shut the doors!

Rem. Sometimes the original sense of מִי־יִתֵּן is still plainly discernible, *b*
e. g. Ju 9[29] מִי־יִתֵּן אֶת־הָעָם הַזֶּה בְיָדִי *who gives this people into my hand?* equivalent to, O that this people were given into my hand! cf. ψ 55[7]. In these examples, however, מִי־יִתֵּן is still equivalent to *O had I!* and in numerous other instances the idea of *giving* has entirely disappeared, מִי־יִתֵּן having become stereotyped as a mere desiderative particle (*utinam*). Its construction is either—

(*a*) With the *accusative* (in accordance with its original meaning) of a substantive, Dt 28[67] *would that it were even! . . . morning!* Ju 9[29], ψ 14[7] (53[7]), 55[7]; with an accusative and a following infinitive, Jb 11[5]; with two accusatives, Nu 11[29], Jer 8[23]; with the accusative of an infinitive, Ex 16[3], 2 S 19[1] מִי־יִתֵּן מוּתִי אֲנִי תַחְתֶּיךָ *would that I had died for thee* (for אֲנִי cf. § 135 *f*); of a participle, Jb 31[35]; of a personal pronoun (as a suffix), Jb 29[2] (with a following כְּ); but מִי־יִתְּנֵנִי Is 27[4] and Jer 9[1] with a following accusative is not simply equivalent to מִי־יִתֵּן לִי, but is properly *who endows me with*, &c.; cf. § 117 *ff*).—With a still greater weakening of the original meaning מִי־יִתֵּן is used with an adjective in Jb 14[4] *could a clean thing but come out of an unclean!* i. e. *how can a clean thing come*, &c.; similarly in Jb 31[31] *who can find one that hath not been satisfied!*

(*b*) With a following perfect, Jb 23[3] (cf. § 120 *e*); with a perfect consecutive, *c*
Dt 5[26] *O that they had such an heart!*

(*c*) With a following imperfect, Jb 6[8], 13[5], 14[13]; in Jb 19[23] the imperfect is *d*
twice added with *Wāw* (cf. *a* above, on Mal. 1[10]).

On the cohortative in the apodosis to such desiderative clauses, cf. § 108 *f*.

2. The wish may also be expressed by the particles אִם (ψ 81[9], 95[7], *e*
139[19], Pr 24[11], 1 Ch 4[10]; always with a following imperfect) and לוּ (for which in ψ 119[5] we have אַחֲלַי, 2 K 5[3] אַחֲלַי, from אַח *ah!* and לִי=לוּ; both with a following imperfect) *si, o si! utinam.*[1] לוּ is followed by the imperfect, Gn 17[18], Jb 6[2]; by the jussive, Gn 30[34] (rather concessive, equivalent to *let it be so*); by the perfect, as the expression of a wish that something might have happened in past time (cf. § 106 *p*), Nu 14[2] לוּ מַתְנוּ *would that we had died*; 20[3] and Jos 7[7] (both times וְלוּ); on the other hand, Is 48[18] and 63[19] (both times לוּא) to express a wish that something expected in the future may already have happened.—On לוּ with the imperative (by an anacoluthon) Gn 23[13] cf. § 110 *e*. On the perfect after כִּי אִם Gn 40[14], 2 K 5[20], cf. § 106 *n*, note 2.

---

[1] Cf. a similar transition from a conditional to a desiderative particle, in consequence of the suppression of the apodosis, in the English, *O if I had!* and the like; e.g. Nu 22[29] *if there were* (לוּ יֶשׁ־) *a sword in my hand now had I surely killed thee!*

§ 152. *Negative Sentences.*

a **1.** Besides the use of rhetorical questions (§§ 150 *d*, 151 *a*), independent sentences are made negative by the adverbs לֹא (Jb 6^{21}, where instead of the *K^eth.* לוֹ we must evidently read לֹא; perhaps preserved as a substantive)=the Greek *οὐ, not,* אַל־=*μή* (Jb 24^{25} as a substantive), אַיִן (*it is*) *not*; טֶרֶם *not yet*, אַפְסִי (cf. § 90 *m*) *not.* The forms בַּל, בְּלִי, בְּלִתִּי *not* belong almost entirely to poetry.—With regard to לֹא and אַיִן the main distinction is that verbal-clauses (rarely noun-clauses, see *e*) are regularly negatived by לֹא (besides its use as negativing *single* words[1]), while אַיִן is used exclusively with noun-clauses (see the examples below).

b The conjunctions פֶּן־ and לְבִלְתִּי *that not*, serve to negative dependent clauses. The particular uses of these particles are as follows:—

(*a*) לֹא (less frequently לוֹא), like *οὐ, οὐκ*, is used regularly for the *objective, unconditional* negation, and hence is usually connected with the perfect or imperfect (as indicative); on לֹא with the imperfect to express an unconditional prohibition, see § 107 *o*; on its use with the jussive, see § 109 *d*.—On הֲלֹא for לֹא *nonne*, in interrogative sentences, cf. § 150 *a*. In connexion with כֹּל, כָּל־ (=*any*), לֹא is used to express an *absolute* negation, *nullus, none whatever* (cf. the French *ne . . . personne, ne . . . rien*), usually in the order כֹּל . . . לֹא, e.g. Gn 3^{1} לֹא תֹאכְלוּ מִכֹּל עֵץ הַגָּן *ye shall not eat of any tree of the garden*; 9^{11}, Ex 10^{15}, 20^{10}, Lv 7^{23}, Dt 8^{9}, Jer 13^{7}, 32^{17} (כָּל־דָּבָר לֹא . . . *nothing at all*; cf. the same statement in the form of a rhetorical question, Jer 32^{27}); Pr 12^{21}, 30^{30}

---

[1] Especially in compounds, e.g. לֹא־אֵל lit. *a no-God* (Germ. *Ungott*) who is indeed called a god, but is not really a god, Dt 32^{21}; לֹא אֱלֹהַּ verse 17, cf. Jer 5^{7}, 2 Ch 13^{9}; לֹא־עַם lit. *a not-people* (Germ. *Unvolk*), Dt 32^{21}; לֹא דָבָר *a nothing*, Am 6^{13}; לֹא עֵץ lit. *not-wood*, Is 10^{15}; לֹא־אִישׁ, לֹא־אָדָם lit. *not-man, superhuman* (of God), Is 31^{8}; לֹא־צֶדֶק *unrighteousness*, Jer 22^{13}, cf. Ez 22^{29}; לֹא־סְדָרִים *disorder*, Jb 10^{22}; לֹא־חָמָס *not-violence*, 16^{17}; after לְ Jb $26^{2f.}$ (לֹא־כֹחַ, לֹא־עֹז *helplessness*, לֹא חָכְמָה *insipientia*); cf. also Is 55^{2} בְּלוֹא לְשָׂבְעָה *for what is unsatisfying*; ψ 44^{13}, Jb 8^{11}, 15^{32}, 1 Ch 12^{33}.—In Nu 20^{5} a construct state with several genitives is negatived by לֹא.—Also לֹא is used with an infinitive, Nu 35^{23}; with an adjective, לֹא חָכָם *unwise*, Dt 32^{6}, Ho 13^{13}: לֹא־חָסִיד *impius*, ψ 43^{1}; לֹא־עָז and לֹא־עָצוּם *not strong*, Pr $30^{25f.}$; לֹא־כֵן *unsuitably*, 2 K 7^{9}; לֹא־טוֹב *not-good*, Is 65^{2}, Ez 20^{25}, &c.; לֹא טָהוֹר *not-clean*, 2 Ch 30^{17}; with a participle, e.g. Jer 2^{2} (*unsown*); 6^{8}, Ez 4^{14}, 22^{24}, Zp 2^{1}, 3^{5}; the Masora, however, requires נֶחָמָה in Is 54^{11}, נֶעֱזָבָה in 62^{12}, נוֹשָׁבָה in Jer 6^{8}, רֻחָמָה in Ho 1^{6}, i.e. always 3rd sing. fem. perf. in pause=*she was not comforted*, &c., and consequently not compounds, but either relative clauses or (Is 54^{11}, Ho 1^{6}, and especially 2^{25}) main clauses instead of proper names.—On the above compounds generally, cf. the dissertation mentioned in § 81 *d*, note 2; on their use in sentences expressing a state, to convey attributive ideas, see *u* below.

לֹא . . . מִפְּנֵי־כֹל and turneth *not* away *for any*; 2 Ch 32^{15}; but cf. also the inverted order, Ex 12^{16} כָּל־מְלָאכָה לֹא־יֵעָשֶׂה *no manner of work shall be done*; 12^{43}, 15^{26}, 22^{21}, Lv 16^{17}, Jb 33^{13}, Dn 11^{37}. The meaning is different when כֹּל by being determinate is used in the sense of *whole*, e. g. Nu 23^{13} כֻּלּוֹ לֹא תִרְאֶה *thou shalt not see them all*, but only a part.

Analogous to לֹא . . . כֹּל is the use of לֹא . . . אִישׁ Gn 23^{6}, &c., in verbal-clauses in the sense of *no one at all, not a single one*. On אֵין־כֹּל *nothing at all*, see under *p*.

Rem. 1. The examples in which לֹא is used absolutely as a negative answer, *c* equivalent to *certainly not! no!* must be regarded as extremely short verbal-clauses, e. g. Gn 19^{2} (לֹא according to the context for לֹא נָסוּר &c.); 23^{11}, 42^{10}, Hag 2^{12}, Jb 23^{6}, sometimes with a following כִּי *but*, Gn 19^{2} (see above); Jos 5^{14}, 1 K 3^{22}.

2. The negation of *noun*-clauses by לֹא (as opposed to the regular negation *d* by אֵין) always includes a certain emphasis, since the force of the negation falls rather upon a particular word (cf. e. g. Ez 36^{32}), than upon the whole clause. In 2 S 3^{34} יָדֶיךָ לֹא־אֲסוּרוֹת *thy hands* were *not bound*, a participle is thus specially negatived by לֹא; cf. ψ 74^{9}, where, however, לֹא is separated from the participle by אֹתָנוּ, and Jb 12^{3}. As a rule, noun-clauses with a pronominal subject are thus negatived by לֹא, Gn 20^{12}, Nu 35^{23} (Dt 4^{42}, 19^{4}); 1 S 15^{29}, 2 S 21^{2}, Jer 4^{22}, ψ 22^{7}, Jb 28^{14}, parallel with אֵין; generally with לֹא before a substantival predicate, e. g. Ex 4^{10} לֹא אִישׁ דְּבָרִים אָנֹכִי *I* am *not a man of words*; Am 5^{18}.—Noun-clauses with a substantival subject, Gn 29^{7}, Nu 23^{19}, Is 22^{2}, 44^{19}, Hag 1^{2}, ψ 22^{3}, Jb 9^{32}, 18^{17}, 21^{9}, 22^{16}, 36^{26} (with וְ of the apodosis); 41^{2}; in Jb 9^{33} even לֹא יֵשׁ *non est* is used instead of אֵין.—In Pr 18^{5} לֹא is used before an adjectival predicate; in 1 S 20^{26} (where a preceding noun-clause is negatived by בִּלְתִּי) read לֹא טָהֹר with the LXX, for לֹא טָהוֹר. On לֹא for אֵין in circumstantial clauses to express attributive ideas, see *u* below.

3. As a rule לֹא stands immediately before the verb, but sometimes is *e* separated from it (frequently to bring into special prominence another word which follows it); thus Jb 22^{7}, Ec 10^{10} before the object and verb; Nu 16^{29} before the subject and verb; Dt 8^{9}, 2 S 3^{34}, ψ 49^{18}, 103^{10}, Jb 13^{16}, 34^{23} before a complementary adjunct. In Dt 32^{5} לֹא according to the accentuation even stands at the end of the clause (*they offend him not*); but undoubtedly לֹא בָנָיו are to be taken together.—On the position of לֹא with the infinitive absolute, see § 113 *v*.

(*b*) אַל־ is used like *μή* and *ne* to express a *subjective* and *conditional* negation, *f* and hence especially in connexion with the jussive (§ 109 *c* and *e*) to introduce prohibitions, warnings, negative desires, and requests. On אַל־ with the imperfect, see § 107 *p*; with the cohortative, see § 108 *c*; on 2 K 6^{27}, see § 109 *h*.

Rem. 1. אַל־ (like לֹא, see note on *a* above) may be used to form a compound *g* word, as in Pr 12^{28} אַל־מָוֶת *not-death* (immortality); though all the early versions read אַל־מָוֶת. The instances in which אַל appears to stand absolutely, equivalent to *no, certainly not* (like *μή* for *μὴ γένηται*), e. g. Ru 1^{13} אַל בְּנֹתַי *nay, my daughters*, and Gn 19^{18}, 33^{10} (אַל־נָא), are also due (see under *c*) to extreme shortening of a full clause (in 2 S 13^{25} such a clause is repeated immediately

afterwards); thus in 2 S 1^{21}, Is 62^{2}, ψ 83^{2} יְהִי is evidently to be supplied, and in Jo 2^{13}, Am 5^{14}, Pr 8^{10} the corresponding jussive from the preceding imperatives, in Pr 17^{12} from the preceding infinitive absolute.

h 2. אַל־, like לֹא, regularly stands immediately before the verb, but in Is 64^{8}, Jer 10^{24}, 15^{15}, ψ 6^{2}, 38^{2} before another strongly emphasized member of the sentence.[1]

i (*c*) אֵין construct state (unless it be sometimes merely a contracted connective form, cf. שֵׁנַיִם for שְׁנַיִם § 97 *d*) of אַיִן *non-existence* (as also the absolute state, see below) is the negative of יֵשׁ *existence*; cf. e.g. Gn 31^{29} with Neh 5^{5}. As יֵשׁ (*he, she, it is, was*, &c.) includes the idea of *being* in all tenses, so אַיִן, אֵין includes the idea of *not being* in all tenses. Hence—

k (1) The absolute state אַיִן, with an evident transition to the meaning of a verbal predicate, *there does not exist*, always *follows* the word negatived, e.g. Is 37^{3} (2 K 19^{3}) וְכֹחַ אַיִן לְלֵדָה *and strength does not exist to bring forth*; Gn 2^{5} אַיִן *was not* present; Ex 17^{7} הֲיֵשׁ אֵין־אָנֹכִי *or is he not?* after הֲיֵשׁ *is he . . .?* (cf. Nu 13^{20}); Lv 26^{37}, Nu 20^{5}, Ju 4^{20} (אָיִן *no*). In 1 S 9^{4} and 10^{14} אַיִן is used in reference to a plural; 1 K 18^{10}, Is 41^{17}, 45^{21}, 59^{11}, Mi 7^{2}, Pr 13^{4}, 25^{14}, Jb 3^{9} וְאַיִן *and let there be none, let none come!* Ec 3^{19}.—Cf. finally אִם־אַיִן *if it be not so*, Gn 30^{1}, Ex 32^{32}, Ju 9^{15}, 2 K 2^{10}.—Quite anomalous is אַיִן Jb 35^{15} before a perfect as an emphatic negation; the text, however, can hardly be correct.

l (2) The construct state אֵין stands in its natural position immediately before the substantive whose non-existence it predicates, or before the subject of the sentence which is to be negatived. To the former class belong also the very numerous instances in which אֵין is joined to a participle, e.g. 1 S 26^{12} וְאֵין רֹאֶה וְאֵין יוֹדֵעַ וְאֵין מֵקִיץ *and there was not one seeing*, &c., i.e. *and no man saw it, nor knew it, neither did any awake*; so especially וְאֵין with a participle in subordinate *circumstantial* or *descriptive clauses*, such as Is 5^{29} וְיַפְלִיט וְאֵין מַצִּיל *and he shall carry it away*, while there is none delivering, i.e. *without any one's delivering* it; ψ 7^{3}, &c.; Lv 26^{6} &c., וְאֵין מַחֲרִיד *without any one's making you afraid*; cf. § 141 *e*. אֵין is used as the negation of an entire noun-clause, e.g. in Gn 39^{23}, Nu 14^{42} אֵין יְהוָה בְּקִרְבְּכֶם *the Lord is not among you*; Gn 37^{29} אֵין־יוֹסֵף בַּבּוֹר *Joseph was not in the pit*.

m (3) When the subject which is to be negatived is a personal pronoun, it is joined as a suffix to אֵין, according to § 100 *o*, e.g. אֵינֶנִּי *I am not, was not, shall not be*; אֵינְךָ, fem. אֵינֵךְ, *thou art not*, &c.; אֵינֶנּוּ, fem. אֵינֶנָּה *he, she is not*, &c.; also absolutely, Gn 42^{13} *he is* (5^{24} *he was*) *no* longer *alive*; אֵינָם *they are not*, &c. When the accompanying predicate is a verb, it follows again (see *l*) in the form of a participle, since אֵין always introduces a noun-clause, e.g. Ex 5^{10} אֵינֶנִּי נֹתֵן *I will not give*; 8^{17}, Dt 1^{32}.

n Rem. In Neh 4^{17} אֵין אֲנִי for אֵינֶנִּי is due to its being co-ordinate with three other (substantival) subjects; these are again expressly summed up in אֵין־אֲנַחְנוּ.—In Hag 2^{17} אֵין אֶתְכֶם the pronominal complement of אֵין appears

---

[1] In Jer 51^{3} the pointing אֶל־ occurs twice instead of אַל־, and is thus, in the opinion of the Masorctes, equivalent to *against* him that *bendeth*; but undoubtedly we should read אַל־.

to follow with the sign of the accusative;[1] but most probably we should read with the LXX שִׁבְכֶם for אֶתְכֶם.

(4) The fact that אֵין (like אַיִן) always includes the idea of a verb (*is not, was not*, &c.) led finally to such a predominance of the verbal element, that the original character of אֵין as a construct state (but cf. *i* above) was forgotten, and accordingly it is very frequently separated from its noun (substantive or participle); especially so by the insertion of shorter words (of the nature of enclitics), e.g. בּוֹ Is 1[6], לוֹ Lv 11[10.12], לָהּ Gn 11[30], גַּם ψ 14[3], שָׁם Ju 18[10], Ex 12[30]; but cf. also ψ 5[10], 6[6], 32[2], and אֵין used absolutely in Ex 22[2], 1 K 8[9], Ru 4[4].—Hence, finally, even the transposition of אֵין and its noun became possible, e.g. Gn 40[8] and 41[15] וּפֹתֵר אֵין אֹתוֹ *and an interpreter there is not of it*; Gn 47[13], Ju 14[6], 1 S 21[2], Is 1[30], Jer 30[13], Hb 2[19], Pr 5[17] (וְאַיִן =*neve sint*; cf. *k* above, on Jb 3[9]); 30[27].—In Gn 19[31], Ex 5[16] אֵין is placed between the subject and predicate. *o*

Rem. 1. Like כֹּל . . . לֹא or לֹא . . . כֹּל (see *b* above) so also כָּל אֵין *p* expresses an *absolute* negation, e.g. Ec 1[9] אֵין כָּל־חָדָשׁ *there is no new thing*, &c.; 2 S 12[3], Dn 1[4] (cf. also אֵין מְאוּמָה *there is nothing*, 1 K 18[43], Ec 5[13]); as also אֵין . . . כָּל־ Hb 2[19]; cf. אֵין מְאוּמָה Ju 14[6].

2. Undoubtedly akin to אֵין in origin is the negative syllable אִי occurring *q* in the two compounds אִי כָבוֹד (as a proper name, 1 S 4[21]; Baer אִי־כָבוֹד) and אִי־נָקִי *not innocent*, Jb 22[30]; but the proper name אִיתָמָר is doubtful, and the fem. אִיזֶבֶל very doubtful. In Ethiopic this אִי is the most common form of negation, prefixed even to verbs.

(*d*) עֹדֶם *not yet*, when referring to past time is used, as a rule (§ 107 *c*), *r* with the imperfect, Gn 2[5] עֹדֶם . . . כֹּל *none . . . yet*; see *b* and *p* above; Gn 19[4], 24[45], Jos 2[8], 1 S 3[3]; with the imperfect in the sense of a present, Ex 10[7] הֲעֹדֶם תֵּדַע *knowest thou not yet?* Ex 9[30]; but cf. Gn 24[15], and בְּעֹדֶם with the perfect in ψ 90[2] (but see § 107 *c*), Pr 8[25].

(*e*) אָפֵס (prop. a substantive, *cessation*) *no longer*, including the verbal idea *s* of *existing*, cf. Dt 32[36], Is 45[6.14], 46[9]; used absolutely, Am 6[10] in the question הַאָפֵס עוֹד אִישׁ *is there none left?* &c., 2 S 9[3]; frequently also in the sense of *non nisi*; with ־ִי paragogic (§ 90 *m*) אַפְסִי Is 47[8.10], Zp 2[15] אֲנִי וְאַפְסִי עוֹד *I* am, *and there is none else.*

(*f*) בַּל,[2] in poetic and prophetic style, and with a certain emphasis, = לֹא, *t* is used with the imperfect, e.g. Is 26[14], 33[20.23] (immediately afterwards with a perfect); Ho 7[2], ψ 49[13], Pr 10[30] (but Is 14[21] before the jussive, = אַל־); before an adjective, Pr 24[23]; before a preposition, ψ 16[2], Pr 23[7].

(*g*) בְּלִי with a perfect, Gn 31[20], Is 14[6]; with an imperfect, Jb 41[18]; to negative a participle, Ho 7[8], ψ 19[4]; to negative an adjective, 2 S 1[21].

(*h*) בִּלְתִּי to negative an adjective, 1 S 20[26]; on בִּלְתִּי Ez 13[3], see *x*; on

---

[1] According to De Lagarde, *Novae psalterii graeci editionis specimen*, p. 26, יְשׁוּעָתָה ψ 3[3] is also an accusative after אֵין.

[2] Evidently from בָּלָה *to waste away*, from which stem also בְּלִי and בָּלֶת (whence בִּלְתִּי § 90 *m*), originally substantives, are formed.

לְבִלְתִּי as the regular negative with the infinitive construct, see § 114 *s*; on לְבִלְתִּי as a conjunction, see *x* below.

On אִם as a negative particle in oaths (*verily not*), see § 149 *c* above.

u Rem. on לֹא, אַיִן, בְּלִי. To the category of negative sentences belongs also the expression of negative attributes by means of לֹא, בְּלִי *not* (both so used almost exclusively in poetic language) or אַיִן with a following substantive, mostly in the simplest form of circumstantial clause; e.g. 2 S 23^4 בֹּקֶר לֹא עֲבוֹת *a morning* when there are *not clouds*, i.e. *a cloudless morning*; cf. Jb 12^{24}, 26^{2b}, 38^{26} (לֹא־אִישׁ *where no man is*, i.e. *uninhabited*); 1 Ch $2^{30.32}$ לֹא בָנִים *childless*; so also בְּלִי e.g. Jb 24^{10} and אַיִן e.g. ψ 88^5 *I am as a man* אֵין־אֵיל *there is not help*, i.e. *like a helpless man*; Is 9^6 אֵין־קֵץ *endless*; 47^1, Ho 7^{11}; אֵין־מִסְפָּר *countless*, Ct 6^8, &c., but usually (ψ 104^{25}, &c.) like a proper circumstantial clause (cf. § 141 *e*) connected by *Wāw*, וְאֵין־מִסְפָּר.—Less frequently such periphrases take the form of relative clauses (cf. § 155 *e*), e.g. Jb 30^{13} לֹא עֹזֵר לָמוֹ they *for whom there is no helper*, i.e. *the helpless* (but probably עֹזֵר is only an intrusion from 29^{12}, and we should read עֹצֵר *without any one's restraining them*; in 29^{12} translate *the fatherless and him that had none to help him*; in ψ 72^{12} וְאֵין־ע֑ is used in the same sense); Hb 1^{14}; with אֵין Is 45^9 *thy work* is that of a man *who hath no hands*; Zc 9^{11} *out of the waterless pit*.[1]

v How far such compounds finally came to be regarded by the language simply as negative adjectives, may be seen partly from the fact that they (as also relative clauses analogous to the above) are frequently co-ordinated with real adjectives, Jo 1^6, ψ 72^{12}, Jb 29^{12}; cf. also Is 59^{10}, where כְּאֵין־עֵינַיִם is parallel with כַּעִוְרִים; partly from their being introduced by the sign of the dative לְ, e.g. Is 40^{29} (= *and to the powerless*); Jb $26^{2a.3}$, Neh 8^{10}.

---

w (*i*) פֶּן *lest, that not*, at the beginning of a clause expressing a fear or precaution, hence especially after such ideas as *fearing*, Gn 32^{12}, &c. (cf. δείδω μή, *vereor ne*), *taking heed*, frequently after הִשָּׁמְרוּ, הִשָּׁמֶר Gn 24^6, 31^{24}, &c., *taking care*, 2 K 10^{23}, &c. Not infrequently the idea on which פֶּן depends, is only virtually contained in the main clause, e.g. Gn 19^{19} *I cannot escape to the mountain* (because I am afraid), פֶּן־תִּדְבָּקַנִי הָרָעָה *lest some evil overtake me*; Gn 26^9, 38^{11}; also in Gn 44^{34} from the rhetorical question *how shall I . . .?* we must understand *I cannot*, governing פֶּן. This is especially the case after an appeal to do or not to do an action by which something may be prevented (in which case פֶּן is simply equivalent to the final *ne*); cf. e.g. Gn 11^4, 19^{15}, Nu 20^{18} (where פֶּן *lest* is separated from the verb by a strongly emphasized substantive); Ju 15^{12} after *swear unto me*; Pr 24^{18}.—In Gn 3^{22} *and now, lest he put forth his hand*, &c., פֶּן is to be regarded as virtually dependent on a cohortative, which immediately afterwards (verse 23) is changed into an historic tense; cf. also Gn 26^7, 31^{31}, 42^4 Ex 13^{17}, 1 S 13^{19}, 27^{11}, ψ 38^{17}, in every case after כִּי אָמַרְתִּי, כִּי אָמַר, כִּי אָמַר, &c. = *I thought*, &c., *I must beware lest*, &c.

Rem. According to § 107 *q*, פֶּן is naturally followed by the imperfect; for the exceptions, 2 S 20^6, 2 K 2^{16}, see § 107 *q*, note 3; cf. moreover, 2 K 10^{23} רְאוּ פֶּן־יֵשׁ־פֹּה *look lest there be here*, &c.

---

[1] In Pr 9^{13} (perhaps also 14^7; but see Delitzsch on the passage) a verbal-clause is used co-ordinately in this way as a periphrasis for an adjective.

(*k*) לְבִלְתִּי *that . . . not*, with the imperfect, Ex 20^{20}, 2 S 14^{14} (in Jer 23^{14} $\mathfrak{G}^{A}$ read the infinitive שׁוּב for יָשׁוּבוּ, in 27^{8} יָבֹאוּ for בֹּאוּ). In Ez 13^{3} בִּלְתִּי רָאוּ is a relative clause governed by לְ = *according to* things which *they have not seen*.

2. Two negatives in the same sentence do not neutralize each other *y* (as in *nonnulli, non nemo*), but make the negation the more emphatic (like οὐκ οὐδείς, οὐκ οὐδαμῶς, *nulli—non, nemo non*); e. g. Zp 2^{2} (if the text is correct) בְּטֶרֶם לֹא־יָבוֹא *before there shall* (not) *come*.[1] This especially applies to the compounds formed by the union of אֵין or בְּלִי with מִן־ *without* (§ 119 *y*), e. g. Is 5^{9} (6^{11}) מֵאֵין יוֹשֵׁב (for which in Jer 2^{15} מִבְּלִי יֹשֵׁב), prop. *without no inhabitant*, i. e. *so that no inhabitant is left there*. On the other hand, in Is 50^{2} מֵאֵין כַּיִם the מִן־ is causative, *because there is no water*; as also in Ex 14^{11} הֲמִבְּלִי אֵין־ *is it because there were no . . . ?* 2 K $1^{3.6.16}$. In Ec 3^{11} מִבְּלִי אֲשֶׁר לֹא *except that* (*yet so that man cannot*, &c.).

3. The negative sometimes extends its influence from the first to *z* a second negative sentence parallel with it (which may or may not have *Wāw*); e. g. 1 S 2^{3} *talk not so much arrogancy*; *let* (not) *boasting come out of your mouth*; Ex 28^{43}, Lv 19^{12}, $22^{9.15\,f.}$, Nu 16^{14}, 23^{19}, Dt 7^{25}, Is 23^{4}, 28^{27}, 38^{18}, 47^{14}, Ez 16^{47}, ψ 9^{19}, 13^{5}, 35^{19}, 38^{2}, 44^{19}, 75^{6}, Jb 28^{17} (so לָמָּה לֹא *why . . . not ?* in Jb 3^{11} also affects the parallel clause).

§ 153. *Restrictive and Intensive Clauses.*

The particles רַק, אַךְ *only*, serve to introduce restrictive clauses, and גַּם, אַף *also, besides, even*, intensive clauses. It is to be observed that the force of these particles does not necessarily affect the word which immediately follows (as is the case with אַךְ Gn 7^{23}, 34^{15}; רַק Gn 6^{5}, Am 3^{2}; even הֲרַק אַךְ *hath he indeed only ?* Nu 12^{2}; גַּם Gn 27^{34}, Jb 7^{11}; אַף Dt 15^{17}), but very frequently extends to the whole of the following sentence. Thus with אַךְ, e. g. Nu 14^{9}, 1 K 17^{13}, Pr 17^{11}, Jb 13^{15}, 14^{22}, 16^{7}, 23^{6}; רַק Gn 20^{11}, 24^{8}, ψ 32^{6}, Pr 13^{10}; גַּם Gn 27^{33}, 32^{21} (גַּם הִנֵּה), 44^{10}; 1 S 22^{7}, 28^{20}, Zc 9^{11}, Pr 17^{26}, 20^{11}; אַף Jb 14^{3}, 15^{4}.—In Mal 1^{10} and Jb 2^{10} גַּם is placed before two co-ordinate sentences, although, strictly speaking, it applies only to the second. Cf. the analogous examples in § 150 *m*.

---

[1] In 1 K 10^{21} אֵין־כֶּסֶף goes with what precedes and must be emended, with the LXX and Lucian, to כִּי הַכֶּסֶף.

§ 154. *Sentences connected by Wāw.*

a *Wāw copulativum*[1] (וְ) serves to connect two or more sentences, or single words (on its various vocalization, cf. § 104 *d–g*). Its use, however, is by no means restricted merely to joining sentences which

---

[1] For further particulars of the use of *wāw copulativum*, see Gesenius' *Thesaurus*, i. 393 ff. On its use in the co-ordination of similar tenses and moods (e.g. five imperfects consecutive in Gn 25[34], five perfects with גַּם) as well as of dissimilar tenses and moods, the remarks made in the treatment of the tenses will suffice. With regard to the connexion of single *nouns* by וְ (which strictly speaking is always really a contraction of so many clauses into a single sentence) the following observations may be made:—

(*a*) Contrary to English usage, which in lengthy enumerations uses the *and* to connect only the last member of the series, in Hebrew *polysyndeton* is customary, as in Gn 12[16] wāw copulativum six times, 24[35] seven times, 15[19 ff.] nine times, and in Jos 7[24] ten times. Sometimes, however, only the last two words are joined (so in a series of three members, Gn 5[32], 10[1], 11[26], 13[2], 14[1], 30[39], &c.; the last three out of a series of four, Jer 2[26]); less frequently only the first two, ψ 45[9]; cf. § 132 *d*. The formula תְּמוֹל שִׁלְשׁוֹם *yesterday* (and) *the day before yesterday*, Ex 5[8], &c., is always without the copula. On the other hand, the *constructio asyndetos* in a series of verbs is used as a rhetorical expedient to produce a hurried and so an impassioned description; e.g. Ju 5[27] *at her feet he bowed, he fell, he lay*: Ex 15[9], Dt 32[15], 1 S 15[6], Jer 4[7], Am 5[21], ψ 10[10], 14[1], 45[5], Jb 20[19], 28[4], 29[8], Ct 2[11], 5[6], &c.

(*b*) Frequently *wāw copulativum* is also *explanatory* (like *isque*, *et—quidem*, and the German *und zwar*, English *to wit*), and is then called *wāw explicativum*, e.g. Gn 4[4] *and* (i.e. *namely*) *of the fat thereof* (unless it is simply copulative); Ex 24[12], 25[12] (*to wit two*); 27[14], 28[23], Ju 17[3] (in וּמַסֵּכָה; here as often elsewhere, to introduce an explanatory gloss, cf. Is 17[8], Ez 3[15], and especially P. Haupt, *SBOT.* Isaiah, p. 90, l. 21 ff.), 1 S 17[34] *and that too with the bear*; 2 S 13[20], Is 57[11], Jer 17[10], Am 3[11], 4[10], Ze 9[9], Pr 3[12], Neh 8[13], 2 Ch 23[10] (but in 1 S 28[3] the וּ before בְּעִירוֹ is to be omitted with the LXX); cf. also such combinations as מִן—וְעַד *from . . . and even to . . .*, Gn 13[3], 14[23], 19[4.11], &c.—In 1 S 6[11] (see Driver on the passage), 2 S 1[23], &c., וְ is equivalent to *yea, and*; in Is 32[7] *even*.

וְ is used to express emphasis (=*and especially*), e.g. in Gn 3[16] וְהֹרֹנֵךְ; Is 2[1], ψ 18[1], perhaps also in Jb 10[17] *yea, a* whole *host*; 2 Ch 16[14].—An undoubted example of what is called *wāw concomitantiae* occurs in Jb 41[12] *a seething pot* וַאֲגְמֹן *with* burning *rushes*; cf. Ex 10[10] (*with your little ones*), 12[8], Lv 1[12], Is 42[5]. In Arabic this *wāw concom.* is followed by the accusative.

וְ—וְ is used in the sense of *both—and* in ψ 76[7], Dn 1[3], 8[13]. On וְ—וְ as meaning *sive—sive*, cf. §·162 *b*.

(*c*) See the Lexicon on adverbs used in a copulative sense, such as גַּם *also, moreover*, summing up a number, e.g. גַּם־שְׁנֵיהֶם *both together*, Gn 27[45], Pr 17[15]; גַּם־כֹּל *all together*; as an intensive *and*, e.g. Gn 30[8], 37[7], 1 S 30[8]; cf. also such examples as 1 S 24[12] *see, yea see!* גַּם or גַּם—וְגַם or וְגַם—גַּם Gn 24[44]=*both—and*; גַּם occurs three times in Gn 24[25] and 32[20]; also אַף, which is generally still more intensive, in the sense of *also, in addition to this, even*, and belongs rather to poetry, and to the later language; frequently also equivalent to a mere *and*, but sometimes adversative *but now*, ψ 44[10], &c.; and אַף—אַף (also three times), equivalent to *both—and*; cf. וְאַף גַּם *and even*, Lv 26[44]; אַף־כִּי prop. *add to this also that*, equivalent to *not to mention*, according to the context either *quanto magis* or *quanto minus*.

are actually co-ordinate. Frequently the language employs merely the simple connexion by *Wāw*, even to introduce an antithesis (Gn 17^{21}, 19^{19}, Lv 2^{12}, Jb 6^{25}, and very frequently in circumstantial noun-clauses), or when one of the two clauses is not co-ordinated, but subordinated to the other. On the use of וְ to introduce circumstantial clauses, cf. especially § 141 *e* and § 142 *d*; introducing causal clauses, § 158 *a*; comparative clauses, § 161 *a*; final clauses, § 165 *a*; consecutive clauses, § 166 *a*. On *wāw apodosis*, cf. § 143 *d*, and the sections there cited; on the use of *Wāw* in numerical sayings, cf. § 134 *s*.

b Rem. Sometimes wāw copulativum joins a sentence apparently to what immediately precedes, but in reality to a sentence which is suppressed and which must, therefore, be supplied from the context. So especially וְ with imperatives to express inferences, e.g. 1 K 2^{22} וְשַׁאֲלִי *ask now rather*; Ez 18^{32} *for I have no pleasure in the death of him that dieth . . .*, וְהָשִׁיבוּ *wherefore turn yourselves*. Also at the beginning of a speech in loose connexion with an act or speech of another person, e.g. Ex 2^{20}, 2 S 18^{11}, 24^{3}, 2 K $4^{14.41}$, 7^{13}, 2 Ch 25^{9}; cf. also Jos 7^{7} (וְלוּ), ψ 2^{10}, 4^{4}, Is 8^{7}. Sometimes the suppression of the protasis is due to passionate excitement or haste, which does not allow time for full expression; this is especially illustrated by Nu 12^{14}, 20^{3} (וְלוּ), 1 S 10^{12}, 15^{14}, 22^{14}, 28^{16}, 2 S 18^{12}, 24^{3}, 1 K 2^{22} (וְלָמָּה), 2 K 1^{10}, 7^{19} (cf. verse 2); Is 3^{14}, Zc 2^{10}, ψ 2^{6} (at the same time a circumstantial clause *whereas I = and yet I have*, &c.); cf. also a new clause beginning with the formula of wishing וּמִי Nu 11^{29}, Ju 9^{29}; on the disconnected use of וְלֹא and וְיֵשׁ cf. § 159 *dd*.

§ 155. *Relative Clauses.*

See V. Baumann, *Hebräische Relativsätze*, Leipzig, 1894 (cf. the heading of § 138 above); G. Bergsträsser, 'Das hebr. Präfix שׁ,' *ZATW.* 1909, p. 40 ff.[1]

a **1.** By § 138 *a*, *e*, relative clauses are divided into two classes: those which are used for the nearer definition of a noun (substantive or pronoun), and those which are not dependent on a noun. The former may be called *incomplete*, the latter *complete* relative clauses.

b Complete relative clauses, as a rule (see the exceptions under *n*), are introduced by the originally demonstrative pronoun אֲשֶׁר; see further in § 138 *e*. Similarly, incomplete relative clauses may also be introduced by אֲשֶׁר, or by some other demonstrative pronoun; see further in § 138 *a* and *g*–*k*. Very frequently, however, especially

[1] In this exhaustive article the author shows that between שׁ (on the pronunciation see § 36) and אֲשֶׁר there is syntactically no primary difference, but only a secondary distinction which arose in the course of the development of the language, namely that אֲשֶׁר is preferred in combinations which are customary in the old literary language, and שׁ in those which are derived from the popular language or from Aramaic.

in poetic style, the attributive relation is expressed by simple co-ordination.[1]

c The governing substantive or pronoun is frequently (in certain cases *always*) resumed by a pronominal suffix or an adverb. The resumption may, however, be omitted, just as in relative clauses introduced by אֲשֶׁר, &c.; see § 138 *f*.

d In Arabic a distinction is made between relative clauses used for the nearer definition of a *determinate* substantive (*ṣila*), and those which are attached to an *indeterminate* substantive (*ṣifa*). The former must be introduced by the demonstrative pronoun *allaḏi*, the latter are always simply co-ordinated. The same distinction was no doubt originally observed in Hebrew, since simply co-ordinated relative clauses are most commonly found after *indeterminate* substantives (see the examples below), and in cases like Dt 28[49] (גּוֹי אֲשֶׁר לֹא־תִשְׁמַע לְשֹׁנוֹ *a nation whose tongue thou shalt not understand*; cf. Is 66[18], and especially 1 S 3[11]), the addition of אֲשֶׁר is explained from the special stress laid on the indeterminate substantive,[2] *a nation of such a kind, thou understandest not their tongue*. On the other hand, in poetic style at least, אֲשֶׁר is somewhat frequently omitted even after a determinate noun, but only rarely in prose (except by the Chronicler; cf. 1 Ch 9[22], 12[23], 29[1] (read prob. אֲשֶׁר for אֶחָד), 2 Ch 15[11]; after כָּל 1 Ch 29[3], 2 Ch 18[23], 30[17], 31[19], Ezr 1[5], but also Gn 39[4]; for further instances, see Driver, *Introd.*[8], p. 537, no. 30); so Ex 18[20], Ju 8[1], 20[15], 1 K 13[12] (= which way), so 2 K 3[8], 2 Ch 18[23]; Neh 13[23]; after a pronominal subject, 1 S 6[9]. In Jer 52[12] for עָמַד read עֹמֵד with the LXX.

e **2.** If the nearer definition of a substantive or pronoun is effected by simple co-ordination of the relative clause, it may take the form—

(*a*) Of a noun-clause, e.g. 2 S 20[21] *a man of the hill country of Ephraim* שְׁבַע שְׁמוֹ *whose name was Sheba*; Zc 6[12], Jb 1[1], 3[15] *with princes* זָהָב לָהֶם *that had gold*; ψ 11[4], Pr 22[11]; when referring to a noun-suffix, e.g. ψ 49[14] זֶה דַרְכָּם כֶּסֶל לָמוֹ *this is the way of them who have* (self-)*confidence*.—On periphrases of this kind to express negative attributes, as in Jb 38[26] עַל־אֶרֶץ לֹא־אִישׁ *on a land* where *no man* is, see § 152 *u*, and cf. for this very short form of the relative clause, Gn 15[13] בְּאֶרֶץ לֹא לָהֶם *in a land* that belongs *not to them*; Dt 32[17] (לַשֵּׁדִים לֹא אֱלֹהַּ); Hb 1[6], Pr 26[17] (לֹא־לוֹ).

f (*b*) Of a verbal clause.

Here we must distinguish the cases in which the retrospective pronoun—

(1) Is the subject of the relative clause, and is contained in the

---

[1] The old view that all these cases arise from the *omission* of אֲשֶׁר is incorrect. These co-ordinated attributive clauses are rather a mere subdivision of the various kinds of circumstantial clauses (see § 156) which may be attached to a *nomen regens*. Cf. in English *this is the letter* (which) *he wrote to me*.

[2] So Baumann, op. cit., p. 14 f., following Böttcher, *Lehrbuch*, ii. 80.

verb; so after a determinate substantive, ψ 34[9] *happy is the man* יֶחֱסֶה־בּוֹ *that trusteth in him*; Jb 3[3b] הַלַּיְלָה אָמַר *the night which said*; after כָּל־ ψ 71[18]; referring to a vocative, which is determinate in itself even without the article, Is 54[1], or to a noun-suffix (see under *e*), ψ 16[4]; after an indeterminate substantive, e. g. Jb 31[12] *it is a fire* (that) *devoureth unto Abaddon*; Dt 32[17*b*], 1 S 6[9], Is 55[13], 56[2], ψ 68[31], 78[6], Pr 30[17], La 1[10], 2 Ch 28[9]; referring to the suffix in הִכָּנִי Is 28[16], prop. *behold me, who have laid*, &c., but perhaps the participle יֹסֵד is to be read; 29[14], 38[5] (but probably again the participle יוֹסֵף should be read instead of the imperfect); Ez 25[7]. The relative clause is used in this way especially to supply the place of an adjective, e. g. Gn 49[27] זְאֵב יִטְרָף *a wolf* that *ravineth*, i. e. *a ravining wolf*; Is 51[12]; to express a negative quality, e. g. Is 40[20], Ho 4[14] עָם לֹא־יָבִין *an undiscerning people*.

g Rem. Very frequently such relative sentences are attached to substantives which have the particle of comparison כְּ, e. g. Jb 7[2] כְּעֶבֶד יִשְׁאַף־צֵל *as a servant* that *earnestly desireth the shadow*, &c.; Dt 32[11], Is 62[1], Jer 23[29], Ho 6[3], ψ 42[2], 83[15], Jb 9[26], 11[16]; so also after כְּמוֹ ψ 58[5]; after a determinate substantive, e. g. Is 53[7] (but the better reading is כְּשֶׂה without the article), 61[10 *t.*], Hb 2[14], ψ 49[13.21], 125[1]; see also the examples under *h*. Sometimes it seems simpler in such cases, to take the verb directly as predicate to the preceding substantive, and to explain כְּ (for בַּאֲשֶׁר; see *Comparative Clauses*, § 161 *b*) as a conjunction—a view which even Hupfeld was ready to accept, at least as regards ψ 90[5], 125[1], Is 53[7], 61[11], but it can hardly be right.

h (2) The cases in which the retrospective pronoun represents an accusative of the object, or would do so if not suppressed, as it usually is in such cases in relative clauses with אֲשֶׁר, cf. § 138 *b*. Examples with the retrospective pronoun are, Dt 32[17] אֱלֹהִים לֹא יְדָעוּם *gods whom they knew not* (see also the end of the verse); after a substantive with כְּ (see above, *g*), Jer 23[9], Jb 13[28]. Without a retrospective pronoun, after a determinate substantive, Ju 8[1], ψ 33[12] (preceded by a relative clause with אֲשֶׁר); Jb 28[1]. Other examples of this kind, though the article is omitted according to poetic usage, are Is 15[7] (יִתְרָה עָשָׂה, for which Jer 48[36] יִתְרַת עָשָׂה with the substantive in the construct state governing the relative clause, see § 130 *d*), ψ 7[16], 51[10], La 1[21].—Without the retrospective pronoun, after an indeterminate substantive, e. g. Is 6[6] רִצְפָּה בְּמֶלְקָחַיִם לָקַח מֵעַל הַמִּזְבֵּחַ *a live coal which he had taken with the tongs from off the altar*; Ex 15[17], Is 42[16] (48[17], ψ 25[12], all after בְּנָיָהּ; but ψ 32[8] (בְּנָיָהּ־זוּ תֵלֵךְ); Is 64[2]; Ec 10[5] (in 6[1] the same clause with אֲשֶׁר); moreover, in Jer 14[18] read with the LXX אֶל־אֶרֶץ לֹא יָדְעוּ *into a land* (that) *they know not*.

i (3) The cases in which the retrospective pronoun is dependent on a preposition, or its place is taken by the adverb שָׁם, as in Jer 2[6] end.

Thus after a determinate substantive, ψ 18[3] צוּרִי אֶחְסֶה־בּוֹ *my rock in which I take refuge*; Ex 18[20], Is 42[1]; in Jb 3[3α] also, the omission of the article with יוֹם is only a poetic licence. After an indeterminate substantive, Jer 2[6], last clause but one; ψ 32[2].

k In this case also the retrospective word is not infrequently suppressed, giving rise to extremely short, bold expressions, such as Is 51[1] *look unto the rock* חֻצַּבְתֶּם (whence) *ye were hewn, and to the hole of the pit* נִקַּרְתֶּם (whence) *ye were digged*; Jb 21[27] *the devices* (wherewith) *ye act violently against me.*—A retrospective adverb is suppressed in Jb 38[19] *where is the way* (to the place where) *the light dwelleth?* cf. 38[24].

l Rem. 1. The omission of the retrospective word occurs most frequently in relative clauses which are governed by the construct state of a preceding substantive (especially an expression of time) and hence are virtually in the genitive. In addition to the instances already given in § 130 *d*, cf. the following: after בְּיוֹם Lv 7[35], ψ 56[10]; after מִיּוֹם Jer 36[2]; after simple יוֹם ψ 56[4] (יוֹם אִירָא *on the day* when *I am afraid*); after בְּעֵת 2 Ch 29[27] (בְּעֵת הֵחֵל הָעוֹלָה *at the time* when *the burnt offering began*); 20[22], 24[11], Jb 6[17]; after לָעֵת Dt 32[35]; after עַד־עֵת Mi 5[2]; after מֵעֵת ψ 4[8] *thou hast put gladness in my heart more than* (their gladness) *at the time* (when) *their corn and their wine are increased.*

m 2. The agreement (§ 138 *d*) of the retrospective pronoun with a pronominal regens in the 1st or 2nd person also takes place in a simple co-ordinated relative clause in 1 S 26[14] *who art thou* (that) *criest?* Cf., however, Is 63[19] *we are become* as they *over whom* (בָּם not בָּנוּ) *thou no longer bearest rule.*

n 3. Occasionally—chiefly in poetic or otherwise elevated style—even *independent* relative clauses are simply co-ordinated with a regens, whereas we should expect them always to be preceded by a demonstrative pronoun, on the analogy of the examples in § 138 *e*. The suppressed pronoun would stand—

(*a*) As subject, Is 41[24] *an abomination* (is he) *that chooseth you* (but read perhaps לְבָחֹר); Jb 30[13], cf. § 152 *u*.

(*b*) As object, Is 41[2], with a retrospective pronoun; Mal 2[16] וְכִסָּה *and* him *that covereth* (or read וְכֻסֶּה?); Jb 29[12] *I delivered . . . the fatherless also, and* him *that had none to help him.*

(*c*) In the genitive governed by a substantive (cf. § 130 *d*), Ex 4[13] שְׁלַח־נָא בְּיַד־תִּשְׁלָח *send, I pray thee, by the hand of* him *whom thou wilt send*, i.e. by the hand of some one else; ψ 65[5] and Pr 8[32], verbal-clauses after אַשְׁרֵי *O the happiness of* the man, &c.; ψ 81[6], 141[9], Jb 29[16], La 1[14]; after כָּל Gn 39[4], but we must certainly read here, with the Samaritan and LXX, כָּל־אֲשֶׁר יֶשׁ־לוֹ as in verses 5 and 8; Ex 9[4]; verbal-clauses after כָּל 1 Ch 29[3], 2 Ch 30[19], 31[19], Ezr 1[5].

(*d*) Governed by a preposition; so verbal-clauses after אַחֲרֵי Jer 2[8]; after אֶל (=*to the place where*), 1 Ch 15[12], but Ex 23[20] before the same

verb אֶל־הַמָּקוֹם אֲשֶׁר; after בְּ Jer 2^{11}, 2 Ch 1^{4} (בְּהֵיכִין=בְּהֵה׳=*to the place where*); after לְ Is 65^{1} לְלוֹא שָׁאֲלוּ by them *that asked not* for me . . . לְלֹא בִקְשׁוּנִי them *that sought me not*; Ez 13^{3} that which *they have not seen*, but the text is hardly correct; after עַל ψ 119^{136}, cf. § 158 *b*; after עִם 2 Ch 16^{9}.—A noun-clause follows לְ in Neh 8^{10}. An analogous instance in Aramaic is Ezr 5^{14} *to* one *whose name was Sheshbazzar* [so in the papyri, see the Lexicon, p. 1116ª].

§ 156. *Circumstantial Clauses.*

1. The statement of the particular circumstances under which a subject appears as performing some action, or under which an action (or an occurrence) is accomplished, is made especially (apart from relative clauses, see § 155) by means of noun-clauses connected by *Wāw* with a following subject (see further on this kind of *circumstantial clause* in § 141 *e*), and by verbal-clauses (see § 142 *d*). Very frequently, however, such statements of the particular circumstances are subordinated to the main clause by being simply attached, without *Wāw*, either as noun-clauses, sometimes extremely short (see *c*), or as verbal-clauses (see *d–g*). *a*

Rem. Among relative clauses of this kind the commonest are the various noun-clauses, which are most closely subordinated to a preceding substantive without אֲשֶׁר, e. g. Gn 16^{12}; also statements of weight, Gn 24^{22}; of name, Jb 1^{1} (also introduced by וּשְׁמוֹ Gn 24^{29}, 1 S 1^{1}, &c., or וּשְׁמָהּ Gn 16^{1}, 22^{24}, &c.); of a condition of body, Ju 1^{7}, and others. —Noun-clauses which begin with *wāw* and the *predicate* have a somewhat more independent character than those introduced by *wāw* and the *subject*[1] (Gn 19^{1}, &c.). The former, however, are also to be regarded as circumstantial clauses, in so far as they describe a *state* which is simultaneous with the principal action; thus Is 3^{7} *I will not be an healer,* וּבְבֵיתִי אֵין לֶחֶם וְאֵין שִׂמְלָה *while in my house is neither bread nor clothing*; Is 6^{6} (Am 7^{7}); 2 S 13^{18}, 16^{1}. Cf. also the instances in § 152 *l* of וְאֵין followed by a participle, as וְאֵין מַצִּיל, &c. *b*

2. Characteristic examples of circumstantial *noun*-clauses are Gn 12^{8} *and pitched his tent* בֵּית־אֵל מִיָּם וְהָעַי מִקֶּדֶם with *Bethel on the west and Ai on the east*; Nu 22^{24}, 2 S 18^{14} *through the heart of Absalom,* עוֹדֶנּוּ חַי while *he* was *yet alive*; Jer 30^{6}, Ez 9^{2} (cf. Ct 3^{8}), Na 3^{8}, Zc 14^{5}, 2 Ch 23^{10}; with the predicate preceding, e. g. 1 S 26^{13}, ψ 32^{8}.—In Gn 41^{29} a noun-clause serves to announce a state in the future.—We may also include here certain set phrases, as פָּנִים אֶל־פָּנִים *face to face* (prop. while *face* was turned *towards face*), Gn 32^{31}, Ex 33^{11}, Dt 34^{10}, *c*

[1] In Dt 32^{31} this form of sequence appears to be selected for another purpose, *and indeed our enemies are judges* thereof, with *wāw emphatic*; to take it as a circumstantial clause is too artificial.

&c.;[1] so also *to cast oneself down,* אַפַּיִם אַרְצָה *the face* being turned *to the earth,* Gn 19[1], &c. (for אַרְצָה we find אָרֶץ in 1 K 1[31], Is 49[23]).[2]—Cf. finally the formula אֵם עַל־בָּנִים *mother with children,* Gn 32[12]; cf. Ho 10[14] and § 119 *aa* note 2.

Rem. On circumlocutions of this kind to express negative attributes by means of short noun-clauses (complete or incomplete), cf. § 152 *u*.

d 3. As circumstantial *verbal*-clauses,[3] we find (1) sometimes affirmative clauses (see below), but far more frequently (2) negative clauses (see *f*), and among these (3) a certain number of expressions which may be regarded simply as equivalent to negative adverbial ideas (see *g*).

Examples of (1) Is 5[11] *b* woe unto them, that tarry late in the evening, יַיִן יַדְלִיקֵם *while wine inflames them*; Is 1[5], 10[24], 30[31], Jer 7[26], 20[15], ψ 4[3], 5[12], 21[13], 62[5]. The circumstantial verbal-clause is used to particularize an action which has before been expressed generally, in Gn 44[12], 48[14] = *crossing his hands*; Dt 2[27], Ju 6[19]; antithetically, 1 K 13[18] כִּחֲשׁ לוֹ *wherewith however he lied unto him.* The verbal-clause seems to assign a reason in ψ 7[7] מִשְׁפָּט צִוִּיתָ *since thou hast commanded judgement*; a consequence in ψ 103[5].[4]

c Rem. On the cases in which an imperfect in the sense of a final clause is subordinated to a verb of motion (generally קוּם), see § 120 *c*.

f Of (2), subordinate verbal-clauses with לֹא (in English usually rendered by *without* and the gerund, if the subject be the same as in the principal clause), e.g. Lv 1[17] לֹא יַבְדִּיל *without dividing* it *asunder*; Jb 31[34]; לֹא with the perfect is so used in Gn 44[4], Ex 34[28], 1 S 30[2], Jb 20[26] (*without its being blown upon it*). With a different subject, equivalent to a consecutive clause in English, Is 27[9] לְבִלְתִּי־קוּם *so that they shall rise up no more.*—Moreover, verbal-clauses in the same sense (*without* doing, &c.) are frequently connected by וְלֹא; cf. 1 S 20[2], Jb 24[22], 42[3]; in a concessive sense, Is 33[1], ψ 44[18].

g Of (3), cf. לֹא יָדַע (prop. *he knows it not*) *unawares,* ψ 35[8], Pr 5[6] לֹא יְחַמֹּל *unsparingly,* Is 30[14] (after an infinitive absolute); Hb 1[17], Jb 6[10] (but וְלֹא יַחְמֹל Jb 16[13], 27[22]; see *f* at the end); לֹא כְחֻדּוֹ (prop. *they hide not*) *openly,* Is 3[9] (but

---

[1] The expression הִתְרָאָה פָנִים *to look one another in the face* (i. e. to contend in combat) 2 K 14[8.11], 2 Ch 25[17.21], is probably only a shortened form for הִתְרָאָה אֶל־פָּנִים.

[2] That אַרְצָה (אָרֶץ) is really to be regarded as a virtual predicate to אַפַּיִם, and not אַפַּיִם as a *casus instrumenti*, is seen from Is 49[23], where אַפַּיִם אָרֶץ precedes the verb.

[3] Some examples of these have been already discussed in another connexion above, § 120 *a-c*.

[4] In Gn 21[14] the circumstantial verbal-clause שָׂם עַל־שִׁכְמָהּ is only due to a harmonizing transposition; read וְאֶת־הַיֶּלֶד שׂ֫ עַ֫ שׁ. According to the source used in cap. 21 Ishmael was still a young child; according to 17[25] he was about 16 or 17 years old.

Jb 15[18] וְלֹא כִחֲדוּ ; בְּלִי חָשָׂךְ (prop. *he restrains not*) *unceasingly*, Is 14[6] ; בַּל־יָמוּט Jb 41[15] (ψ 93[1] בַּל־תִּמּוֹט) and לֹא יָמוּט Is 40[20] (*without tottering*) *immovably* ; cf. also לֹא אֶמְעָד *without wavering*, ψ 26[1].

§ 157. *Object-Clauses (Oratio Obliqua).*

Clauses which depend on a transitive verb, especially on what are *a* called *verba cordis*, i. e. verbs denoting any mental act, such as *to see, to hear, to know, to perceive, to believe, to remember, to forget, to say, to think*, &c., may be subordinated to the governing verb without the help of a conjunction by simple juxtaposition (§ 120 *a*), or they may be co-ordinated with it either with or without *wāw copulative* (§ 120 *d–h*). As a rule, however, the objective clause is introduced by the conjunction כִּי *that*, less frequently by אֲשֶׁר *that*.[1]

Examples :—

(*a*) Object-clauses without a conjunction. Besides the passages mentioned in § 120 (especially under *e*) there are a number of examples, in which a clause depending on a *verbum dicendi* or *sentiendi* (the *oratio obliqua* of the Latin and English Grammar) is added in the form of an independent noun-clause or verbal-clause ; e. g. Gn 12[13] אִמְרִי־נָא אֲחֹתִי אָתְּ *say, I pray thee, thou* art *my sister* ; ψ 10[13], Jb 25[3 a. 14], Neh 6[6] ; Zc 8[23] (after שָׁמַע) ; ψ 9[21] (after יָדַע) ; verbal-clauses, e. g. ψ 50[21] *thou thoughtest* הָיוֹת־אֶהְיֶה כָּמוֹךָ *I was surely like thyself* [but read הָיוֹ for הָיוֹת] ; Gn 41[15], Ju 9[48] *what ye have seen me do* ; Is 48[8], Ho 7[2].

(*b*) Object-clauses introduced by כִּי, e. g. Gn 6[5] וַיַּרְא יְהוָה כִּי רַבָּה רָעַת הָאָדָם *b* *and the Lord saw that the wickedness of man was great*, &c.—Direct narration also is very frequently introduced by כִּי (analogous to the *ὅτι recitativum* ; frequently, indeed, with the secondary idea of a particle of asseveration, as in Gn 26[9], 27[20]), e. g. Gn 21[30], 22[16 f.], 26[22], 29[32], 37[35], Jos 2[24], &c., even when the direct narration is not expressly indicated, Gn 4[25], 32[31], 41[51 f.], Ex 18[4].—On the expression of a second object by means of a clause introduced by כִּי, see § 117 *h*.[2]

(*c*) Object-clauses introduced by אֲשֶׁר, e. g. Est 3[4] כִּי־הִגִּיד לָהֶם אֲשֶׁר־הוּא *c* יְהוּדִי *for he had told them that he was a Jew* ; 1 S 18[15], Ez 20[26], Ec 8[12, 3] even before direct narration, 1 S 15[20], 2 S 1[4]. Somewhat frequently אֲשֶׁר is preceded by

[1] On these clauses with כִּי and אֲשֶׁר and generally on clauses which we should render as subordinate, cf. P. Dörwald 'Zur hebr. Syntax' in *Neue Jahrbb. für Philol. und Pädag.* 1890, p. 115 ff.

[2] Instead of a complete objective clause we sometimes find a kind of accusative and infinitive construction, especially after נָתַן (prop. *to give up*) in the sense of *to allow*, e. g. Nu 21[23] וְלֹא־נָתַן סִיחֹן אֶת־יִשְׂרָאֵל עֲבֹר בִּגְבֻלוֹ *and Sihon did not suffer Israel to pass through his border* ; 20[21] ; followed by an infinitive with לְ, e. g. Gn 20[6], 31[7], Ex 3[19].—Cf. also the analogous examples in Dt 28[56] (after נִסָּה *to venture* ; see § 113 *d*) ; Ju 11[20] (after הֶאֱמִין *to trust*) ; 1 K 19[4] (after שָׁאַל *to request*).

[3] In Jer 28[9] a *subject*-clause is thus introduced by אֲשֶׁר instead of the usual כִּי.

the *nota accusativi* אֵת־ (equivalent to *the circumstance, the fact, that*), e. g. Jos 2^{10}, 1 S $24^{11.19}$, 2 S 11^{20}, Is 38^{3}, but in Gn 30^{29}, Dt 29^{15} equivalent to *the way in which*.

§ 158. *Causal Clauses.*

a A complete clause, assigning the reason for statements, demands, threats, &c., sometimes follows with the simple *wāw copulative*, e. g. ψ 60^{13} *give us help against the adversary, and* (for) *vain is the help of man*; Gn 6^{17} (וַאֲנִי), 22^{12}, Ex 23^{9}, Jb 22^{12}, perhaps also ψ 7^{10}; or even without *Wāw*, e. g. Gn 17^{14}. As a rule, however, special conjunctions in various combinations are used to introduce causal clauses.

b The most common causal conjunctions are יַעַן כִּי Is 3^{16}, &c., and יַעַן אֲשֶׁר *because*, prop. *on account of the fact that*; both, however, may also be shortened to the simple יַעַן Nu 20^{12}, &c., or to כִּי *because*, Gn $3^{14.17}$, &c., or to אֲשֶׁר Gn 30^{18}, 31^{49}, $34^{13.27}$, 1 S 15^{15}, 20^{42}, $26^{16.23}$, 1 K 3^{19}, 8^{33}, Ho 14^{4}, Zc 1^{15}; also בַּאֲשֶׁר Gn $39^{9.23}$. On the other hand, the simple יַעַן is sometimes repeated for emphasis, יַעַן וּבְיַעַן (something like the German *sintemal und alldieweil*) Lv 26^{43}, Ez 13^{10} (without וּ 36^{3}); also עַל־אֲשֶׁר 2 S 3^{30}, and עַל־כִּי[1] Dt 31^{17}, Ju 3^{12}, Mal 2^{14} *on the ground that*; עַל־דְּבַר אֲשֶׁר *because of the circumstance that*, Dt 23^{5}; עַל־כָּל־אֹדוֹת אֲשֶׁר *for this very cause that*, Jer 3^{8}. But just as the simple יַעַן is used for יַעַן אֲשֶׁר, so also the simple עַל־ with the perfect stands for עַל־אֲשֶׁר ψ 119^{136}, Ezr 3^{11}; cf. עַל־בְּלִי Gn 31^{20} and מִבְּלִי Dt 28^{55} both with the perfect, equivalent to *because . . . not*.—Cf. further עֵקֶב אֲשֶׁר Gn 22^{18}, 26^{5}, 2 S 12^{6}, all with the perfect, and עֵקֶב כִּי (2 S 12^{10} with the perfect; Am 4^{12} with the imperfect) prop. *in return* for the fact *that*; similarly again the simple עֵקֶב Nu 14^{24} with the perfect, and Dt 7^{12}, 8^{20} with the imperfect; finally, מֵאֲשֶׁר Is 43^{4} *arising from* the fact *that*, = *because*; תַּחַת אֲשֶׁר 1 S 26^{21}, &c., and תַּחַת כִּי Dt 4^{37}, Pr 1^{29} *for the reason that*.

c Rem. 1. The preposition עַל־ (*because of, on account of*) with the infinitive (§ 114 *e*) is frequently used as the equivalent of a full causal clause; cf. e. g. Am $1^{3.6.13}$, $2^{1.6}$. Such a construction with the infinitive may, however, according to § 114 *r*, be continued by means of a finite verb, in which case עַל־ governs the verb as a conjunction; e. g. Am 1^{9} עַל־הַסְגִּירָם . . . וְלֹא זָכְרוּ *because they delivered up . . . and remembered not*, &c.; 1^{11}, 2^{4}; without *Wāw*, Is 30^{14}.

d 2. The choice of tense is regulated by the general principles stated in § 106 ff., viz. the perfect (cf. especially § 106 *f*) refers to causes already brought fully into effect, the imperfect to those which may contingently arise; cf. e. g. Dt 7^{12}, 8^{20}, 1 K 8^{33}, where the imperfect leaves the possibility still open that the persons addressed will perhaps escape the threatened punishments by avoiding disobedience.—Cf. further, § 111 *h* on the imperfect consecutive, and § 112 *nn* on the perfect consecutive in the apodosis to causal clauses.

---

[1] Also כִּי־עַל־כֵּן prop. *for therefore*, Gn 18^{5}, 19^{8}, 33^{10}, 38^{26}, Nu 10^{31}, 14^{43}, 2 S 18^{20} *Qᵉrê*, and עַל־כֵּן אֲשֶׁר Jb 34^{27}, always mean *forasmuch as*.

§ 159. *Conditional Sentences.*

Cf. H. Ferguson, 'The Use of the Tenses in Conditional Sentences in Hebrew' (*Journal of the Society of Bibl. Lit. and Exeg.*, Middletown, Conn., June and September, 1882).—P. Friedrich, *Die hebr. Conditionalsätze*, Königsberg, 1884 (Inaug.-Diss.).—Driver, *Use of the Tenses*, 3rd ed., p. 174 ff.

a **1.** The great variety of construction in conditional sentences is owing to the fact that it frequently depends on the subjective judgement of the speaker, whether he wishes a condition to be regarded as *capable of fulfilment* (absolutely, or at least possibly), thus including those already fulfilled, or as *incapable of fulfilment*. On this distinction depends the choice both of the conditional particle to be used (see below), and especially (as also in Greek and Latin) of the tense. The use of the latter is naturally determined according to the general principles laid down in § 106 ff.[1] In the following sketch, for the sake of clearness, conditional sentences *without* conditional particles will be first discussed (under *b*), and afterwards sentences *with* these particles (under *l*).

b **2.** The relation between condition and consequence may be expressed, as in English, by the simple juxtaposition of two clauses. At the same time, it is to be observed in general as a fundamental rule (in accordance with the original character of the two tenses), that the *imperfect*, with its equivalents (the jussive, cohortative, imperative, perfect consecutive, and participle), is used to express a condition and consequence which are regarded as being *capable of fulfilment* in present or future time, while the *perfect* represents a condition already fulfilled in the past, and its consequence as an accomplished fact. The other use of the perfect—to represent conditions regarded as *impossible*—occurs only in connexion with particles.

Examples:—

c (*a*) *Imperfect* (cf. § 107 *x*) in protasis and apodosis, Jos 22^{18}, ψ 104^{28} ff. תִּתֵּן לָהֶם יִלְקֹטוּן[2] (if) *thou givest unto them, they gather*, &c.; ψ 139^{18}, Pr 12^{17}, Jb 20^{24}, Ec 1^{18}, Neh 1^{8}; with an interrogative imperfect in the apodosis, Ju 13^{12}; with the jussive, Jb 10^{16}; with the cohortative, Pr. 1^{23}; with the perfect, Is 26^{10} (*yet will he not learn righteousness*; the apodosis forcibly denies

---

[1] It may, moreover, happen that a different idea is introduced in the apodosis, from that with which the protasis started—a source of many further variations.

[2] On the termination יִן- cf. § 47 *m*. In verse 28 *b* also יִשְׁבְּעוּן is probably to be explained from its immediately preceding the greater *pause*. These terminations in verses 28–30 and ψ 139^{18} can scarcely have any connexion with the conditional sentence, although it is strange that יִן- in Nu 32^{23} appears after אִם־לֹא in the protasis. In Nu 16^{29}, 32^{20} יִן- as before א (as in Jb 31^{10} in the apodosis) is to be explained from the dislike of hiatus.

what the imperfect in the protasis had represented as still conceivable; cf. Ho 8^{12}); with the perfect consecutive, Gn 47^{25}, Ex 33^{5}; with the protasis suppressed, Jb 5^{8} (see § 107 *x*).

d (*b*) *Jussive* in protasis (cf. § 109 *h*, *i*) and apodosis, ψ 104^{10} תָּשֶׁת־חֹשֶׁךְ וְיִהִי לָיְלָה (if) *thou makest darkness, it is night*; imperfect in the apodosis, ψ $104^{29\,b}$; cohortative Pr 1^{23}. Also in Ex 7^{9} יְהִי לְתַנִּין *it shall become a serpent*, is the apodosis to a suppressed protasis *if thou cast it down*; so in 2 K 5^{10} וְיִשָּׁב is the apodosis to a protasis *if thou wash*, contained in what precedes.

e (*c*) *Cohortative* (see § 108 *e*) in the protasis; perfect in the apodosis, ψ 40^{6}; imperfect consecutive, Jb 19^{18} אָקוּמָה וַיְדַבְּרוּ־בִי (if) *I arise, they speak against me*; on the cohortative in the apodosis, cf. § 108 *f*.

f (*d*) *Imperfect consecutive* in the protasis (§ 111 *x*), ψ 139^{11} וְאֹמַר *if I say*, &c. (with a noun-clause as the apodosis); with a frequentative perfect consecutive in the apodosis, 1 S 2^{16}.

g (*e*) *Perfect consecutive* in the protasis and apodosis (see the examples, § 112 *kk* and *ll*), Gn 44^{22} וְעָזַב אֲבִיו וָמֵת *and should he leave his father, his father would die*; 9^{15}, 44^{29}, Ex 4^{14}, 12^{13}, 1 S 16^{2}, 19^{3}, 2 S 13^{28}, 1 K 8^{30}; with frequentative perfects, Ex 16^{21} (referring to the past, Jer 20^{9}); with imperfect in the apodosis (being separated from the *Wāw* by לֹא), Nu 23^{20}, Jb 5^{24}; introduced by an infinitive absolute, 1 K 2^{37}; an interrogative clause in the apodosis, Lv 10^{19}; a noun-clause, ψ 37^{10}, Jb 7^{21}.

h (*f*) *A simple perfect* (to represent actions which are to be regarded as completed) in the protasis and apodosis, Pr 18^{22} מָצָא אִשָּׁה מָצָא טוֹב *has one found a wife, he has found a good thing*; an imperfect in the apodosis, Jb 19^{4}, 23^{10}; an imperfect consecutive, Ex 20^{25}, Pr 11^{2}, Jb 3^{25}, $23^{13\,b}$, 29^{11}; an interrogative clause, Nu 12^{14}, Jb 7^{20} *if I have sinned* (prop., well, now I have sinned!) *what can I do unto thee?* 21^{31}, 35^{6}, Am 3^{8}; a noun-clause, Jb 27^{19}.

i (*g*) *A participle* as *casus pendens* (cf. § 143 *d*, and the sections of the Grammar there cited, esp. § 116 *w*) or a complete noun-clause in the protasis; the apodosis mostly introduced by *wāw apodosis*, e. g. Pr 23^{24} *Keth.* יוֹלֵד חָכָם וְיִשְׂמַח בּוֹ *if one begetteth a wise child, he shall have joy of him*; with perfect frequentative in the apodosis, 1 S 2^{13}, &c.; but also with a simple imperfect, e. g. Ex 21^{12} (cf. § 112 *n*); with an interrogative imperfect, 2 K $7^{2.19}$; with an interrogative perfect, Ju 6^{13}.

k (*h*) *Infinitive with preposition* (also as the equivalent of a conditional clause) in the protasis, and a perfect consecutive in the apodosis (cf. § 112 *mm*), e. g. 2 S $7^{14\,ff.}$ בְּהַעֲוֹתוֹ וְהֹכַחְתִּיו וגו׳ *if he commit iniquity, I will correct him*; Ex $34^{34\,f.}$ (with imperfect, followed by perfects frequentative in the apodosis).

Rem. On the expression of condition and consequence by means of two co-ordinate *imperatives*, see § 110 *f*.

l 3. Particles used to introduce conditional sentences are אִם (for which in the later and latest Books sometimes הֵן, see below, under *w*) and לוּ[1] (1 S 14^{30}, Is 63^{19} לוּא; Ec 6^{6}, Est 7^{4} אִלּוּ, from לוּ אִם) *if*, negative אִם לֹא and לוּלֵי (לוּלֵא) *unless*; כִּי *supposing that* (Lat. *ut*), *in case that*, sometimes used almost in the same sense as אִם. With regard to the difference between אִם (אִם לֹא) and לוּ (לוּלֵא), the fundamental rule is that אִם is used if the condition be regarded either as already fulfilled, or if it, together with its consequence, be thought of as possibly (or

[1] On לוּ cf. Kohler in Geiger's *Zeitschr. für Wiss. und Leben*, vi (1868), p. 21 ff.

probably) occurring in the present or future. In the former case, אִם is followed by the perfect, in the latter (corresponding to the Greek ἐάν with the present subjunctive) by the imperfect or its equivalent (frequently in the apodosis also). On the other hand, לוּ (לוּלֵא) is used when the condition is to be represented as *not fulfilled* in the past, or as *not capable of fulfilment* in the present or future, and the consequence accordingly as not having occurred or never occurring. In the former case, לוּ and לוּלֵא are necessarily followed by the perfect (mostly also in the apodosis) corresponding to the Greek εἰ with the indicative of an historic tense, and the Latin imperfect or pluperfect subjunctive. In the latter case (which is extremely rare) the perfect, or the participle, or even the imperfect, may be used.

Rem. Since it again frequently depends on the subjective judgement of the speaker (see under *a*), whether a condition is to be regarded as possible or impossible, we cannot wonder that the distinction between אִם and לוּ is not always consistently observed. Although naturally לוּ and לוּלֵא cannot take the place of אִם and אִם לֹא (on the strange use of לוּ in Gn 50[15] see below), yet conversely אִם is sometimes used where לוּ would certainly be expected; cf. e.g. ψ 50[12], 137[5], 139[8], Ho 9[12] (cf. verse 11). These examples, indeed (אִם with the imperfect), may without difficulty be explained from the fact that the connexion of לוּ with the imperfect was evidently avoided, because the imperfect by its nature indicates a still unfinished action, and consequently (as opposed to לוּ) a still open possibility. But אִם is also used for לוּ in connexion with the perfect, especially when an imprecation is attached by the apodosis to the condition introduced by אִם, e.g. ψ 7[4 ff.] . . . אִם־עָשִׂיתִי זֹאת . . . יְרָדַף וגו׳ *if I have done this . . . . let the enemy pursue my soul*, &c., cf. Jb 31[9 ff.] The speaker assumes for a moment as possible and even actual, that which he really rejects as inconceivable, in order to invoke the most severe punishment on himself, if it should prove to be the case. *m*

On the frequent addition of an infinitive absolute to the verb in clauses with אִם see § 113 *o* above.

Examples :—

A. אִם 1. with *perfect* in the protasis to express conditions, &c., which have been completely fulfilled in the past or which will be completely fulfilled in the future (the perfect is here equivalent to the *futurum exactum*, § 106 *o*). The apodosis[1] takes— *n*

(*a*) A *perfect* also, e.g. Pr 9[12] אִם־חָכַמְתָּ חָכַמְתָּ לָּךְ *if thou art wise, thou art wise for thyself*; ψ 73[15] (see below on לוּ).

(*b*) *Imperfect*, e.g. Dt 32[41] אִם־שַׁנּוֹתִי *if I whet my glittering sword* . . . אָשִׁיב *I will render vengeance*, &c.; Jb 9[15 f. 30] (in both cases we should expect לוּ rather than אִם־; so also in ψ 44[21 f.], with an interrogative imperfect in the apodosis); Jb 11[13] (the apodosis is in verse 15).

(*c*) *Jussive* (or *optative*), e.g. Jb 31[9 ff.] (see *m* above); Gn 18[3].

[1] We are not here concerned with the fact that the logical apodosis (the consequence of the condition) is sometimes mentioned before the condition; as in Gn 18[28.30], Ju 11[10], ψ 63[6 f.], 137[6], and according to Dillmann Is 4[4].

o (*d*) *Perfect consecutive* (see the examples in § 112 *gg*), e. g. Gn 43[9] אִם־לֹא הֲבִיאֹתִיו וגו׳ *if I bring him not . . . then I shall have sinned*, &c.; Ju 16[17], 2 S 15[33], 2 K 7[4]. On the other hand, e. g. Gn 47[6], Mi 5[7], Jb 7[4] refer to actions already completed; in Gn 38[9] and Nu 21[9] the perfect with וְ is a perfect frequentative and refers to past time.

(*e*) *Imperfect consecutive* (see § 111 *q*), e. g. Jb 8[4] *if thy children have sinned* (חָטְאוּ) . . ., וַיְשַׁלְּחֵם *he has delivered them*, &c.

(*f*) *Imperative*, e. g. Gn 50[4] אִם־נָא מָצָאתִי חֵן בְּעֵינֵיכֶם דַּבְּרוּ־נָא וגו׳ *if now I have found grace in your eyes, speak, I pray you*, &c.; the imperative precedes in Gn 47[16] and Jb 38[4.18].

p (*g*) A (complete or incomplete) noun-clause, e. g. Jer 14[18] (a vivid realization of the future) *if I have gone forth into the field* (= *if I go*, &c.), *then, behold, the slain with the sword!* &c.; Pr 24[14] (apodosis with *wāw apodosis*).

q 2. אִם with *imperfect* in the protasis, to express what is possible in the present or future, as well as (according to § 107 *b*) what has continued or been repeated in the past. The apodosis takes—

(*a*) The *perfect*, e. g. Nu 32[23] וְאִם־לֹא תַעֲשׂוּן כֵּן הִנֵּה חֲטָאתֶם *but if ye will not do so, behold, ye have sinned*; here the apodosis represents the time when the consequence has already taken place; so also Jb 20[12–14]. On the other hand, Nu 16[29] (as also 1 S 6[9] and 1 K 22[28]) is a case of a pregnant construction, *if these men die as all men die, then* (it will follow from this) *the Lord hath not sent me*.

r (*b*) The *imperfect*, e. g. 2 K 7[4] אִם־יְחַיֵּנוּ נִחְיֶה *if they save us alive, we shall live*, &c.; Gn 13[16], 18[28.30], 28[20 ff.], Ex 20[25] (the second imperfect is equivalent to a jussive); Is 1[18], 10[22], Am 9[2–4], ψ 50[12] (where אִם ironically represents an impossibility as possible); Jb 8[5 f.] (with the insertion of a second condition in the form of a noun-clause); 9[3.20], 14[7]; a frequentative imperfect referring to the past, Gn 31[8] אִם־כֹּה יֹאמַר *if* (ever) *he said thus . . .*, וְיָלְדוּ *then they bare . . .*; Ex 40[37]. In Gn 42[37] the consequence (on תָּמִית cf. § 107 *s*) precedes the condition.

(*c*) The *jussive* (or *optative*), e. g. ψ 137[5]; cf. § 109 *h*.

(*d*) The *cohortative*, e. g. Gn 13[9], Jb 31[7]; cf. § 108 *f*.

s (*e*) The *perfect consecutive* (see the examples in § 112 *ff* and *gg*), e. g. 1 S 20[6] אִם־פָּקֹד יִפְקָדַנִי אָבִיךָ וְאָמַרְתָּ *if thy father miss me at all, then shalt thou say*, &c.; Gn 24[41], Ju 4[20]; with a frequentative perfect consecutive, Gn 31[8] *if he said* (as often happened) . . ., *then*, &c.

(*f*) The *imperfect consecutive*; so perhaps ψ 59[16], if וַיָּלִינוּ is to be explained according to § 111 *t*.

(*g*) The *imperative*, e. g. Gn 31[50], 1 S 20[21] (with *wāw apodosis*, but in verse 22 simply לֵךְ), 21[10], Jb 33[5].

t (*h*) A noun-clause, e. g. Gn 4[7], ψ 139[8], Jb 8[6], 31[26 f.].

3. אִם with *cohortative*, e. g. Gn 30[31]; cf. the passages in § 108 *e*.

u 4. אִם with *infinitive*, Jb 9[27] אִם־אֹמְרִי prop. *if my saying is* (but probably we should read אֲמַרְתִּי).

v 5. אִם with a noun-clause, e. g. Dt 5[22] (in the apodosis a perfect with *wāw apodosis*), Gn 27[46], Ju 9[15] (imperative in the apodosis); 11[9] (imperfect in the apodosis); 2 S 12[8] (cohortative in the apodosis); Ho 12[12]; especially if the subject of the conditional clause be a personal pronoun. In an affirmative sentence this pronoun is often joined to יֵשׁ, in a negative sentence to אַיִן (cf. on both, § 100 *o*), while the predicate (cf. § 116 *q*) is represented by a participle, usually expressing the future, e. g. Ju 6[36 f.] אִם־יֶשְׁךָ מוֹשִׁיעַ

if thou wilt save, &c.; Gn 24[49] אִם־יֶשְׁכֶם עֹשִׂים *if ye will deal*, &c.; 1 S 23[23]. In Gn 24[42 f.] the condition is expressed in a more humble form by the addition of נָא. With אַיִן Gn 43[5] וְאִם־אֵינְךָ מְשַׁלֵּחַ *but if thou wilt not send*, &c.; 20[7] (with imperative in the apodosis); Ex 8[17], 9[2 f.], 1 S 19[11] (all with a participle also in the apodosis). But יֵשׁ and אַיִן may also be used after אִם without a suffix; thus יֵשׁ Gn 23[8], 1 S 20[8], 2 K 9[15], &c., אִם־אַיִן (*if it be not the case*) Gn 30[1], Ex 32[32], Ju 9[15], 2 K 2[10]; cf. also אִם־כֵּן *if it be so*, Gn 25[22].

B. הֵן *if*, generally supposed to be originally identical with הֵן *behold!*[1] ש Probably, however, הֵן *if*, is a pure Aramaism, and since the Aramaic word never has the meaning *behold*, it is at least improbable that it had originally any connexion with הֵן or הִנֵּה. Cf. Ex 8[22], Lv 25[20], Is 54[15], Jer 3[1], Hag 2[12], 2 Ch 7[13], and frequently in Job, as 9[11.12], 12[14.15], 19[7], 23[8], 40[23], always with wāw apodosis following, except in 13[15], where consequently the meaning *see* is no doubt preferable.

C. לוּ *if*, לוּלֵי (לוּלָי) *if not*. ת

1. With *perfect* in the protasis and apodosis (cf. § 106 *p*), e.g. Ju 8[19]; אִלּוּ is used in the same sense as לוּ in Est 7[4], cf. Ec 6[6] (with a question in the apodosis).—With the perfect in protasis and apodosis after לוּלֵי Gn 31[42], 43[10], Ju 14[18], 1 S 25[34], 2 S 2[27], Is 1[9]. On the other hand, in Dt 32[29] לוּ with a perfect is followed by an imperfect in the apodosis, *if they were wise, they would understand this*; in Mi 2[11] by a perfect consecutive.

2. With *imperfect* after לוּלֵי Dt 32[27], אָנוּר probably as the *modus rei repetitae*, י *were it not that I ever and again feared*, &c.; so also the imperfect after לוּ with the apodosis suppressed, Gn 50[15] *supposing that Joseph should hate us*; since, according to the context, the danger was real, the use of לוּ here is strange; conversely in other cases, e.g. ψ 73[15], Jb 9[15 f.30], לוּ would be more natural than אִם.

3. A noun-clause occurs after לוּ 2 S 18[12], 2 K 3[14], ψ 81[14], all with imperfect צ in the apodosis; Jb 16[4] לוּ יֵשׁ, with cohortative in the apodosis.

D. כִּי *supposing that, if*:—

1. כִּי with *perfect* in the protasis, e.g. Nu 5[20] וְאַתְּ כִּי שָׂטִית *but thou, if thou* קק *hast gone astray*, &c.; with a frequentative perfect consecutive in the apodosis, Jb 7[13 f.]; with an imperfect consecutive, Jb 22[29].

2. כִּי with *imperfect* in the protasis, e.g. ψ 23[4] גַּם כִּי־אֵלֵךְ *yea, though I walk* רר (have to walk) . . ., *I will fear no* (לֹא־אִירָא) *evil*; 37[24]; Ex 21[2] כִּי־תִקְנֶה עֶבֶד עִבְרִי וגו׳ *if thou buy an Hebrew servant, six years shall he serve* (but in verses 3–5 a series of definite conditions with definite consequences is introduced by אִם; so also the כִּי in verse 7 is followed in verses 8–11 by the special cases with אִם; cf. also verse 17 ff.); cf. Gn 4[24], 24[41], Jb 38[5]; with a perfect consecutive in the apodosis, Gn 32[18 f.], Ex 18[16]; with a noun-clause, Is 1[15].

3. כִּי with a *noun-clause* (and imperfect in the apodosis), 2 S 19[8].

Remarks.

1. In 2 K 5[13] tne particle אבי (Masora אָבִי, probably in the sense of *my* CC *father*) appears exceptionally for לוּ; its meaning here is unquestionable, but

[1] There could be no doubt of their identity if וְהִנֵּה in 1 S 9[7], 2 S 18[11], simply meant *if*. We must, however, keep to the meaning *but behold*.

its origin is obscure. Cf. the exhaustive discussion of Delitzsch and Wetzstein on Jb 34^{36}, where this אבי appears to be used as a desiderative particle.—Sometimes when one case has been already discussed, another of the same character is added by means of אוֹ *or*, e.g. Ex 21^{26} אוֹ נוֹדַע וג׳ *or* (another possible case) *it is known that*, &c., i.e. *but if it be known*, &c., LXX ἐὰν δέ, Vulg. *sin autem*; cf. Lv $4^{23.28}$, 5^{1}, 25^{49}, 2 S 18^{13}; with a following imperfect, Ez $14^{17f.}$—On the hypothetical use of אֲשֶׁר (which is interchangeable with כִּי in other senses also) Lv 4^{22} (in verses 3 and 27 אִם), Dt 11^{27} (verse 28 אִם), Jos 4^{21}, see the Lexicon.

dd 2. The conditional sentence is frequently found in an abridged form, where the suppressed clauses can be easily supplied from the context; cf. Gn 13^{9}, 24^{49}, 1 S 2^{16} וְאִם־לֹא *and if not*, i. e. *and if thou wilt not give it to me, then I take* it (perfect according to § 106 *n*) *by force*; cf. 1 S 6^{9}. The use of וְיֵשׁ alone in Ju 6^{13} is peculiar, as also וְיֵשׁ in 2 K 10^{15} (where read with the LXX וַיֹּאמֶר יֵהוּא וְיֵשׁ) in the sense of *if it be so*.—In 2 S 13^{26}, 2 K 5^{17} וְלֹא alone appears to be used in the sense of *if really . . . not*, in each case with a following jussive equivalent to *may there at least*, &c. (cf. § 143 *d*); but perhaps with Matthes, *ZAW.* 1903, p. 122 ff., following Kuipers, we should read וְלוּ *would that!*—In 1 S 13^{13}, Jb 3^{13} the condition must be supplied from the preceding clause to complete the sentence introduced by כִּי עַתָּה, in Jb 31^{28} by כִּי, in 2 K 13^{19} by אָז.—The apodosis also appears sometimes in an abridged form (e. g. Gn 4^{24}, Is 43^{2}) or is entirely suppressed, e. g. Gn 30^{27}, 38^{17}, 50^{15} (see *y* above), Ex 32^{32}, ψ 27^{13}, Jb 38^{5}, where properly הַגֵּד must be supplied with כִּי תֵדַע as in verses 4 and 18; cf. § 167 *a*.—In ψ 8^{4}, instead of the apodosis *I exclaim* which we should expect, the exclamation itself follows.

ee 3. The absolute certainty with which a result is to be expected is frequently emphasized by the insertion of כִּי Is 7^{9}; כִּי אָז 2 S 2^{27}, 19^{7}, Jb 11^{15}; or כִּי עַתָּה *now verily*, Nu 22^{29}, 1 S 14^{30} after לוּ, Gn 31^{42}, 43^{10} after לוּלֵי, Jb 8^{6} after אִם. On this *corroborative* כִּי cf. such passages as Gn 18^{20}, &c., and § 148 *d*. On כִּי אִם after an oath cf. 163 *d*.

ff 4. Sometimes the force of a hypothetical particle extends beyond the apodosis to a second conditional clause, as in the case of אִם Pr 9^{12}, Jb 10^{15}, 16^{6}, 22^{23}, and כִּי Is 43^{2}.

gg 5. In Ex 33^{20} a negative statement takes the place of a condition with a negative consequence, *for a man doth not see me and live*, instead of *for if a man sees me, he does not live*; cf. the similar passages, Dt $22^{1.4}$ *thou shalt not see . . . and hide thyself*, instead of *if thou seest . . . thou shalt not hide thyself.*

§ 160. *Concessive Clauses.*

a Besides the use of the imperative in the sense of a concession, meant either seriously (§ 110 *a*) or mockingly (§ 110 *f*), and of concessive circumstantial clauses (§ 141 *e*, § 142 *d*, and § 156 *f*), concessive clauses may be introduced—

(*a*) By a simple אִם *if*: thus Jb 9^{15} with perfect, *if* (=*though*) *I had been in the right*; Is 1^{18} and 10^{22} with imperfect in reference to a contingent event.

b (*b*) By גַּם כִּי *yea though*, Is 1^{15} with imperfect; for which we find simply גַּם in Is 49^{15} with imperfect, *yea, though these may forget, yet . . .*; on the other hand, with perfect, Jer 36^{25}, ψ 95^{9}, Neh 6^{1}; finally גַּם כִּי *even if, though*, Ec 4^{14}.

(*c*) By the preposition עַל־ governing a complete noun-clause, as Jb 16^{17} *C* עַל לֹא־חָמָס בְּכַפָּי *notwithstanding* that *no violence is in mine hands*, or a verbal-clause, Is 53^{9}. On עַל־ with the infinitive in a similar sense (equivalent to *in addition to the fact* that = *notwithstanding* that), cf. § 119 *aa*, note 2.

§ 161. *Comparative Clauses.*

1. A comparison between two facts is sometimes established by *a* simply uniting them with *wāw copulative*, especially in gnomic poetry, when facts of a moral nature are compared with those of the physical world, e. g. Jb 5^{7} *man is born unto trouble, and the sons of flame fly upward*, i. e. as the sparks by nature fly upward, so man, &c.; Jb 12^{11} (in an interrogative form; in 34^{3} the same comparison as a statement); $14^{11\,f.}$, Pr 17^{3}, 25^{3}, $26^{3.9.14}$, 27^{21}, &c.[1] Even without the connecting וְ Jb 24^{19} *drought and heat consume the snow waters*, שְׁאוֹל חָטָאוּ so doth *Sheol* those who *have sinned* (cf. § 155 *n*); cf. Jer 17^{11}.

2. The conjunction כַּאֲשֶׁר (cf. § 155 *g*; the simple אֲשֶׁר occurs in the *b* same sense in Ex 10^{6}, 14^{13}, 34^{18}) *as, quemadmodum*, is used as a comparative conjunction (Ob ^{15}), frequently with כֵּן *so*, corresponding to it in the apodosis, Is 31^{4}, $52^{14\,f.}$. Sometimes, however, כֵּן (*so also*) occurs even after independent statements, Is 55^{9}, Jer 3^{20}.—Exact coincidence of two facts is expressed in Ec 5^{15} by כְּכָל־עֲמַת שֶׁ֫[2] *in all points as*.

Rem. On the use of כְּ *as*, with single nouns or pronouns to introduce *C* comparisons, cf. 118 *s*; on the alleged use of כְּ as a conjunction (equivalent to כַּאֲשֶׁר), cf. § 155 *g*.—It is to be further remarked that כְּ—כְּ when used in correspondence with one another, *as—so* (e. g. Lv 7^{7}, Ju 8^{18}, Is 24^{2}, Ho 4^{9}; also *so—as*, Gn 18^{25}, 44^{18}, Dt 1^{17}, 1 K 22^{4}; in Jos 14^{11}, 1 S 30^{24} וְכְ—כְ; ψ 127^{4} and often, כֵּן—כְּ, cf. Jo 2^{4}), are not to be regarded as conjunctions, but as virtual substantives with a following genitive; כָּכֶם כַּגֵּר יִהְיֶה Nu 15^{15} properly means *the like of you shall be the like of the stranger*, i. e. *your duty shall be* (also) *the stranger's duty*; cf. Lv 24^{22}.

---

[1] On this *wāw adaequationis*, and in general on these proverbial comparisons, see Delitzsch, *Das Salomonische Spruchbuch*, p. 9 f. Moreover, instead of entire clauses, the nouns alone (without predicates) are frequently grouped together, e. g. Pr 25^{25}, 26^{21}, 27^{21} (called by Delitzsch, the 'emblematic Mashal'). The expressions נֶחְשַׁב עִם prop. *to be counted with some one*, ψ 88^{5}, and נִמְשַׁל עִם *to be likened with some one*, ψ 28^{1}, 143^{7}, also arise from the idea of comparison implied in grouping things together. On this use of עִם cf. Jb 9^{26}, where *with* is equivalent to *like*.

[2] In spite of its form this particle has originally nothing to do with כֹּל־, כָּל־ *all*. The expression is compounded of כְּ and לְעֻמַּת, like the Aramaic כְּלָ֫קְבֵל for כְּלָקְבֵל; cf. M. Lambert, *REJ.* xxx. 47.

§ 162. *Disjunctive Sentences.*

a The introduction of another possible case, excluding that which preceded, is effected by אוֹ *or*, e.g. Ex 21[36], equivalent to the Latin *vel*; but also equivalent to *aut* with an exclusive antithesis, 2 K 2[16]; so Is 27[5] אוֹ = *it would then happen that*, for which elsewhere אוֹ כִּי.

b In the sense of *sive—sive* we find אוֹ—אוֹ, or אִם—אִם, or אִם—וְאִם (see the examples in the Lexicon), also וְ—וְ Lv 5[3], Nu 9[14], Dt 24[7], Is 2[13ff.], Jer 32[20], ψ 76[7], Jb 34[29], perhaps also Ex 21[16] (but not Pr 29[9]; cf. Delitzsch on the passage), and לְ—לְ (see § 143 *e*); cf. also גַּם—גַּם (in Gn 24[44] וְגַם—גַּם) *both—and*; but גַּם לֹא—גַּם לֹא (in Gn 21[26] וְגַם לֹא—וְגַם לֹא; Zp 1[18] לֹא . . . גַּם—גַּם) *neither—nor*. On disjunctive questions, see § 150 *g*.

§ 163. *Adversative and Exceptive Clauses.*

a **1.** After negative sentences (especially after prohibitions) the antithesis (*but*) is introduced by כִּי אִם, e.g. 1 S 8[19] *and they said, Nay, but we will have a king over us*; ψ 1[2], &c.; frequently also by כִּי alone, e.g. Gn 18[15], 19[2], or even simply connected with וְ, Gn 17[5], וְהָיָה as perfect consecutive; 42[10]; cf. Ex 5[18].

b Rem. Sometimes the negation is only virtually contained in the preceding sentence, e.g. in the form of a rhetorical question (Mi 6[3f.]) or of conditions which are to be regarded as not having been fulfilled (Jb 31[18]); כִּי or כִּי אִם in such cases becomes equivalent to *nay, rather*.

c **2.** *Exceptive* clauses, depending on another sentence, are introduced by אֶפֶס כִּי *except that*, and (again after negative sentences, see *a* above) כִּי אִם[1] *unless*; especially כִּי אִם with the perfect (equivalent to *unless previously*) after imperfects which contain a declaration, e.g. Gn 32[27] *I will not let thee go, except thou hast* previously *blessed me*; Lv 22[6], Is 55[10], 65[6], Am 3[7], Ru 3[18]. Finally, בִּלְתִּי אִם *unless*, Am 3[4] (with perfect after a rhetorical question), or simply בִּלְתִּי Gn 43[3] with a noun-clause, *except your brother be with you*; Is 10[4] after a rhetorical question, with a verbal-clause.

---

[1] Very probably this use of כִּי אִם arises from the original meaning *for if, surely if* (כִּי in an affirmative sense); so evidently in Ex 22[22] as a forcible resumption of the preceding אִם. Thus, e.g. Ju 15[7] is simply *surely when I have been avenged of you, after that I will cease*, equivalent to, I will not cease, until I have, &c. When the exception follows, an ellipse must be assumed, e.g. Ru 3[18] *surely* (or *for*) *when he has finished it* (then the man will rest). It is far less natural to assume such an ellipse with כִּי אִם *but* (before entire clauses as before single nouns); see *a* above.

Rem. The principal statement, to which כִּי אִם appends an exception, must sometimes be supplied from the context; thus, Gn 40[14] (I desire nothing else) *except that thou remember me*, equivalent to *only do thou remember*, &c. (cf. § 106 *n*, note 2; but it is probably better to read אַךְ for כִּי). Cf. Mi 6[8], where כִּי אִם, equivalent to *nothing but*, is used before an infinitive, and Jb 42[8], equivalent to *only*, before a noun. Similarly when כִּי אִם after an oath introduces an emphatic assurance, e.g. in 2 K 5[20] *as the Lord liveth* (I can do nothing else) *except I run after him*, &c.; cf. 2 S 15[21] *Keth.*, Jer 51[14], Ru 3[12] *Keth.*, and even without the oath, Ju 15[7]; cf. the Rem. on *c*. *d*

§ 164. *Temporal Clauses.*

1. The relations of time existing between two different actions or events are frequently expressed without the aid of a conjunction simply by juxtaposition:— *a*

(*a*) Actions or events are represented as wholly or in part *simultaneous* by connecting a noun-clause with another noun-clause or verbal-clause introduced by וְ (or וְהִנֵּה), e.g. Gn 7[6] *and Noah* was *six hundred years old* (prop. *a son of six hundred years*), וְהַמַּבּוּל הָיָה and (i.e. *when*) *the flood was*. This is especially the case when the predicate of the noun-clause (frequently introduced by עוֹד *still*) is expressed by an active participle, e.g. Jb 1[16 f.] עוֹד זֶה מְדַבֵּר וְזֶה בָּא וגו׳ *he* was *yet speaking, and there came another*, &c.; see the numerous examples in § 111 *g* and § 116 *u*. Instead of a complete noun-clause there often occurs a simple *casus pendens* after כָּל־ with a participial attribute in the sense of *whenever any one . . .*, e.g. 1 S 2[13] כָּל־אִישׁ זֹבֵחַ זָבַח וּבָא וגו׳ *whenever any man offered sacrifice, then came*, &c.; 2 S 2[23], &c.; see the examples (in which the second member is generally introduced by *wāw apodosis*) in § 116 *w*.

(*b*) Sequence is expressed by the juxtaposition *b*

(1) of two imperfects consecutive, e.g. Gn 24[19] וְתִכֶל לְהַשְׁקֹתוֹ וַתֹּאמֶר *and when she had done giving him drink, she said*, &c.; 28[8 f.], 29[31], 30[9], 32[26], &c.; cf. § 111 *d*;

(2) of a noun-clause with a passive participle as predicate, and a verbal-clause attached by וְ, e.g. Gn 38[25]; cf. § 116 *v*; in Gn 49[29] an imperative follows without וְ;

(3) of two perfects (frequently with the secondary idea of rapid succession[1] of the two actions or events in past time), e.g. Gn 19[23] הַשֶּׁמֶשׁ יָצָא . . . וְלוֹט בָּא וגו׳ *the sun was just risen . . ., and* (=when) *Lot came*, &c., cf. 1 S 9[5], 2 S 2[24]; Gn 44[3 f.], Ju 3[24], 15[14], 20[39 f.].—In all these examples the subject follows immediately after the connective *Wāw*, and then the (simple) perfect. On the other hand,

(4) a perfect consecutive follows another perfect consecutive to express the contingent succession of future actions, e.g. Gn 44[4] וְהִשַּׂגְתֶּם וְאָמַרְתָּ אֲלֵהֶם

[1] This secondary idea is implied here by the mere co-ordination of two independent *verbal*-clauses, just as the idea of simultaneous occurrence (according to § 116 *u*, note 1) is implied in the co-ordination of a *noun*-clause with another clause. In Gn 27[30] the immediate succession is especially emphasized by אַךְ and the infinitive absolute, *Jacob was yet scarce gone out . . . then Esau his brother came*; in 1 K 9[24] by אַךְ only in ψ 48[6] by בֵּן and the addition of two more perfects without וְ.

and when thou dost overtake them (as soon as thou shalt have overtaken), *thou shalt say unto them.* Naturally, examples of this kind are very closely related to conditional sentences; see, therefore, the examples in § 112 *kk* and § 159 *g*. On the connexion of an imperfect consecutive or a perfect with detached expressions of time (as equivalent to complete clauses), cf. § 111 *b*; on the imperfect consecutive after וַיְהִי and a statement of time, cf. § 111 *g*; on the perfect consecutive following a detached statement of time, as in Ex 16[6], cf. § 112 *oo*.—In 1 S 29[10] an imperative with וְ follows the perfect consecutive.

c (5) The fact that one action or event has not yet taken place on the occurrence of another, is expressed by טֶרֶם (an adverb, not a conjunction) with the imperfect (according to § 107 *e*). The apodosis, which may consist of a subject and perfect or even of a noun-clause (Gn 24[15]),[1] is then connected by וְ (or וְהִנֵּה) as in the examples above, under no. 3, e.g. Gn 19[4] (cf. Jos 2[8]) טֶרֶם יִשְׁכָּבוּ וְאַנְשֵׁי הָעִיר . . . נָסַבּוּ וגו׳ *they had not yet lain down, and* (= when) *the men of the city . . . compassed*, &c.; Gn 24[25].

d **2.** Conjunctions used to introduce temporal clauses are כְּ (with perfect, e.g. Gn 6[1], Ju 1[28], 16[16], 1 S 1[12]; with imperfect, Gn 4[12], 12[12], 24[41], Ex 3[21], Lv 21[9], Dt 31[21], Is 1[12], 8[19]) and אֲשֶׁר[2] *when* (כְּ with the imperfect also = *as often as*, ψ 8[4]; with perfect Jb 1[5]); less frequently אִם[3] (joined with a perfect), e.g. Gn 38[9], Nu 21[9], Ju 6[3], ψ 41[7], 94[18], cf. also Is 24[13] = *quotiescunque*; also in the same sense with an imperfect, Nu 36[4]; with a perfect, equivalent to the *futurum exactum*, Is 4[4]. Other conjunctions of time are the compounds כְּמוֹ *when*, Gn 19[15]; כַּאֲשֶׁר *when, after that*; עַד־אֲשֶׁר, עַד־כִּי *until* (also the simple עַד־, e.g. Gn 38[11], Jos 2[22], 1 S 1[22] [with the imperfect = *only when*, as in 2 S 10[5]]); 2[5], &c.; especially in the formula עַד־בִּלְתִּי הַשְׁאִיר לוֹ *until there was none left remaining to him* (where indeed it would be very natural to read הַשְׁאִיר the infin. constr., as elsewhere after בִּלְתִּי, § 114 *s*) Nu 21[35], Dt 3[3], Jos 8[22], 11[8] (but 1 S 14[19] *while, as long as*); עַד אֲשֶׁר לֹא *before that*, Ec 12[1.2.6] with an imperfect, as in Pr 8[26] עַד with a perfect; עַד־אִם, עַד־אֲשֶׁר אִם *until the time when*; אַחֲרֵי־אֲשֶׁר (for which in Ez 40[1] אַחַר־אֲשֶׁר; Lv 25[48], 1 S 5[9] simply אַחֲרֵי; Lv 14[43], Jer 41[16], Jb 42[7] simply אַחַר) *after that*; מֵאָז (prop. *since that time*; the dependent clause is attached to it in the same way as the attributive clause to the demonstrative אֲשֶׁר § 138 *e*) *since*, Gn 39[5]; בְּטֶרֶם (and simply טֶרֶם § 107 *c*) *before*; מִקְדֶּמֶת (for מִקְדֶּמֶת אֲשֶׁר) *before*, ψ 129[6].

c Rem. 1. With regard to the tenses used with the above conjunctions, the rules are practically the same as those given in § 158 *d* for causal clauses. The perfect indicates actions completed in the past or future (in the former case corresponding to the Latin pluperfect, § 106 *f*, and in the latter to the

[1] On the perfect in the protasis, which is critically doubtful, cf. § 107 *c*.

[2] On אֲשֶׁר as an original demonstrative, cf. § 138 *a*; hence עַד־אֲשֶׁר יָשׁוּב is properly *up to that* (moment)—*we shall return.*

[3] Cf. the frequent use of *wenn* [prop. *if*] for *wann* [= *when*] in German.

Latin *futurum exactum*, § 106 *o*), the imperfect denotes actions occurring contingently in the future. On בְּטֶרֶם, בְּטֶרֶם, and עַד with the imperfect as a *tempus historicum*, cf. 107 *c*.

f 2. Clauses introduced by עַד, עַד־כִּי, or עַד־אֲשֶׁר, sometimes express a limit which is not absolute (terminating the preceding action), but only relative, beyond which the action or state described in the principal clause still continues; thus, עַד with the imperfect, ψ 110[1]; עַד־כִּי with the perfect, Gn 26[13], with i.npf. 49[10]; עַד־אֲשֶׁר with the perfect, Gn 28[15]; with the imperfect, ψ 112[8].—Like the Arab. حَتَّى, עַד may even introduce a main clause; e.g. Ex 15[16] עַד־יַעֲבֹר prop. no doubt = thus it came to this—*they passed through*, i.e. *so they passed through*.

g 3. The infinitive construct governed by a preposition (§ 114 *d*, *e*) is very frequently used as the equivalent of a temporal clause; the infinitive with בְּ may usually be rendered by *when*, *as*, or *whilst*; the infinitive with כְּ by *when*, *as soon as* (in Pr 10[25] followed by a noun-clause introduced by *wāw apodosis*), or, when referring to the future, by *if*; the infinitive after מִן by *since*. According to § 111 *g* such statements of time are generally preceded by וַיְהִי and the apodosis follows in the imperfect consecutive; hence in 1 S 17[55] (cf. Driver on the passage) וְרָאוֹת with a simple perfect following, is unusual. On the continuation of these infinitival constructions by means of the perfect consecutive, cf. § 112 *v*, and in general, § 114 *r*.—With the participle, בְּ appears to be used as the equivalent of a conjunction in בְּמֵשִׁיב *as he drew back*, Gn 38[29] (unless we should read בְּהָשִׁיב [or בְּמוֹ הֵשִׁיב, cf. Gn 19[15]]), and in כְּפָרְחַת *when it budded*, 40[10].

§ 165. *Final Clauses.*[1]

a 1. Like most of the dependent clauses hitherto treated, the final clause may also be joined by a simple *wāw copulative* to the main clause, unless the final clause is directly subordinated to the governing verb.

Examples of the connexion: (*a*) of a final imperfect (or jussive?) with a perfect by means of וְ, La 1[19], see § 107 *q*; with an interrogative sentence, 2 S 9[1.3], Jb 38[24]; with an optative, ψ 51[9]; with an imperative, 1 K 11[21]; (*β*) of a cohortative with an imperative by וְ, Gn 29[21], 1 S 15[16], or a jussive, Neh 2[5] (§ 108 *d*); (*γ*) of a jussive with an imperative by וְ, Ex 9[1], 2 S 16[11], 1 K 5[10], ψ 59[14], 86[17]; with a jussive, Jb 21[19], or cohortative, § 109 *f*, *g* (cf. also 2 S 24[21] the infinitive with לְ, Jon 1[11] מָה with the 1st plur. imperf., and 2 Ch 29[10] עִם־לְבָבִי, which are equivalent to cohortatives); (*δ*) of an imperative with a jussive, cohortative, or interrogative sentence by וְ, § 110 *i*; (*ε*) of a perfect consecutive after another perfect consecutive, Lv 14[38]; after an imperfect, § 112 *m* and *p*; similarly after a jussive, § 112 *q*; after an imperative, § 112 *r*.—On negative final clauses joined by וְלֹא to the imperfect (so Ex 28[43], 30[20]; and 2 S 13[25] after אַל־נָא with a jussive in the main clause) see the Rem. on § 109 *g*. In Ex 28[32], 39[23] the negative final clause is simply connected by לֹא.—On the use of an historical statement after verbs of command-

[1] Cf. H. G. T. Mitchell, *Final Constructions of Biblical Hebrew*, Leipzig, 1879.

ing, where we should expect a final clause (e.g. Neh 13[9] *then I commanded, and they cleansed*, equivalent to *that they should cleanse, and they cleansed*; in Jb 9[7] a negative final clause is connected in this way by וְלֹא), cf. § 120 *f*.

For examples of the direct subordination of the final imperfect (without וְ) see § 120 *c*.

b **2.** Final conjunctions are לְמַעַן אֲשֶׁר *to the end that*; also simply לְמַעַן Gn 12[13], 27[25], Ex 4[5], ψ 51[6], &c.; בַּעֲבוּר אֲשֶׁר prop. *for the purpose that*, Gn 27[10], and simply בַּעֲבוּר Gn 27[4], Ex 9[14], 20[20]; also the simple אֲשֶׁר[1] Dt 4[10.40], 6[3], 32[46], Jos 3[7], Neh 8[14f.]; negatively, אֲשֶׁר לֹא Gn 11[7], 24[3], 1 K 22[16]; or שֶׁ Ec 3[14]; also negatively, עַל־דְּבָרַת שֶׁלֹּא *for the matter* (*purpose*) *that . . . not*, Ec 7[14]; לְבִלְתִּי with imperfect, Ex 20[20], 2 S 14[14] *that . . . not*.—Quite exceptional is the use of מִן (if the text be right) in Dt 33[11] מִן־יְקוּמוּן, with the imperfect, equivalent to *that . . . not* [in prose, מִקּוֹם].

c Rem. All the conjunctions here mentioned are naturally always used with the imperfect, see § 107 *q* (on the apparent exception in Jos 4[24], see § 74 *g*).—On the negative conjunctions אַל and פֶּן *that not, lest*, see § 152 *f* and *w*. On the infinitive with לְ[2] (also לְמַעַן Gn 18[19], 37[22], &c.) as the equivalent of a final clause (Gn 11[5], 28[4], &c.), see § 114 *f*, *h*, *p*. On the continuation of such infinitival constructions by means of the finite verb, see § 114 *r*. On the negation of the final infinitive by לְבִלְתִּי, § 114 *s*. On the preposition מִן with a substantive or infinitive as the equivalent of a negative final clause (Gn 31[29], 1 S 15[23], &c.), see § 119 *x* and *y*.

§ 166. *Consecutive Clauses.*

a **1.** Consecutive clauses are added by means of simple *wāw copulative* with the jussive,[3] especially after negative and interrogative sentences, e. g. Nu 23[19] לֹא אִישׁ אֵל וְיִכְזָב וּבֶן־אָדָם וְיִתְנֶחָם *God is not a man, that he should lie, and* (i. e. neither) *the son of man, that he should repent*; Is 53[2] וְנֶחְמְדֵהוּ; Ho 14[10] מִי חָכָם וְיָבֶן אֵלֶּה נָבוֹן וְיֵדָעֵם *who is wise, that he may understand these things? prudent, that he may know them?* Jb 5[12] וְלֹא=*so that . . . not*; in Pr 30[3] וְ is separated from the predicate by the object. In Gn 16[10] a negative consecutive clause comes after a cohortative, and in Ex 10[5] after a perfect consecutive.—On the other hand, in Jb 9[32.33] the jussive in the sense of a consecutive clause is attached without *Wāw* to the preceding negative sentence (in

---

[1] In Ez 36[27] a final clause is introduced by אֵת אֲשֶׁר, thus at the same time taking the form of an object-clause.

[2] On לְ as a supposed conjunction (equivalent to the Arabic *li*) 1 K 6[19], see § 66 *i*.

[3] That such examples as וְיִכְזָב are to be regarded as jussive is probable from the analogy of Ho 14[10] and Jb 9[33].

verse 32 **a** second jussive follows, likewise without *Wāw*, *for he is not a man, as I am, that I should answer him*, that *we should come together in judgement*). On the imperfect consecutive as expressing a logical consequence, see § 111 *l*; on the perfect consecutive as a consecutive clause after a participle, see § 112 *n*.

2. Conjunctions introducing consecutive clauses are again (see § 157 *c*, note 3) כִּי and אֲשֶׁר=*so that*; especially again after interrogative sentences, according to § 107 *u*; cf. Nu 16^{11}, כִּי with the imperfect, *that ye murmur*; but in Gn 20^{10} with the perfect, in reference to an action already completed. On אֲשֶׁר with the imperfect (or jussive) equivalent to *so that*, cf. further Gn 13^{16}, 22^{14}; with perfect and imperfect, 1 K $3^{12f.}$, with the demonstrative force clearly discernible, depending on לֵב; on אֲשֶׁר לֹא=*ut non*, cf. Dt 28^{35}, 1 K 3^{8}, 2 K 9^{37}. *b*

On מִן with a substantive or infinitive as the equivalent of a consecutive clause, see § 119 *y*.

§ 167. *Aposiopesis, Anacoluthon, Involved Series of Sentences.*

1. *Aposiopesis* is the concealment or suppression of entire sentences or clauses, which are of themselves necessary to complete the sense,[1] and therefore must be supplied from the context. This is especially frequent after conditional clauses; besides the examples already given in § 159 *dd*, cf. also Ex 32^{32} (the LXX and Samaritan supply אֶשָּׂא); Nu 5^{20}, Ju 9^{16} (in verse 19, after a long parenthesis, an imperative follows as the apodosis to this conditional clause); 1 S $12^{14f.}$, 2 S 5^{8} (where indeed the text is probably very corrupt; cf. the addition in 1 Ch 11^{6}); 2 S 23^{17}, ψ 27^{13}, 1 Ch 4^{10}. For other examples of various kinds, see § 117 *l*, and especially § 147; in Aramaic, Dn 3^{15}.—On Gn 3^{22}, cf. § 152 *w* at the end. *a*

2. *Anacoluthon* is the change from a construction which has been already begun to one of a different kind. It is found especially after long parentheses, because the speaker has either lost sight of the beginning of his sentence, or for the sake of clearness purposely makes a new beginning; thus Gn 20^{13}, 31^{52} and Ez 34^{10} (cf. § 149 at the end); Nu $14^{21ff.}$, $32^{20ff.}$, Dt $17^{2ff.}$, $24^{1ff.}$, $29^{21ff.}$, Ju 10^{11} (where, after a series of intermediate sentences, the predicate *I saved you* is sup- *b*

[1] But those cases are not to be regarded as examples of aposiopesis, in which the answer, being closely connected with the question, is given simply in the infinitive with לְ; cf. § 147 *a*, note 1.

pressed; but the text can hardly be correct); perhaps also Is 66^{18} (cf., however, Delitzsch on the passage, which is certainly corrupt).[1] On Gn 23^{13} (אִם with the imperative), see § 110 *e*.

c **3.** We may mention as instructive examples of *involved series* of sentences Gn 24^{14} and $^{42\,ff.}$, and Gn $28^{6\,ff.}$

---

[1] On the other hand, from the Semitic point of view the various kinds of compound sentences are *not* to be regarded as instances of anacoluthon, e.g. Gn $17^{14.17}$, nor even Gn 31^{40} (cf. § 143).

THE PARADIGMS.

In the paradigms of the verbs, those forms which are to be especially noticed by the beginner are marked throughout by an asterisk as model forms. Thus e.g. in the strong verb the 3rd *sing. fem.* קָטְלָה is the model for קָטְלוּ, which likewise has only a vocalic afformative, and קָטַלְתְּ is the model for קָטַלְתְּ, קָטַלְתִּי and קָטַלְנוּ, which in the same way have a toneless afformative beginning with a consonant. On the other hand, the forms קְטַלְתֶּם and קְטַלְתֶּן, where the affix beginning with a consonant has the tone, stand by themselves.—In the table of the pronouns the asterisk has a different meaning; see the footnote there.—The bracketed forms (from Paradigm G onwards) are merely analogous formations not occurring in the Old Testament.

The newly added paradigm (Q) consists of forms actually found, belonging to various verbs.

INDEX OF SUBJECTS

The numbers refer to the sections, except where otherwise indicated.
N. = note.

A-sounds, 8 *a*, 9 *a* ff.
Abbreviations, 5 *m*.
Absolute cases, 143 *c* N.
Abstract, for concrete, 83 *c*: abstr. ideas expressed by the feminine, 122 *q*, *r*: by fem. in תּ־, 86 *k*: by the plural, 124 *a*, *d–f*: with the article, 126 *n*.
Accents, 3 *b*: names and laws of, 15: of the poetical books, 15 *h*, *i*.
Accentuation, 3 *b*: double accentuation in certain passages, 15 *p*.
Accusative expressed by אֵת, 117: as direct object of verb, 117: syntax of pronominal object and second accus., 117 *e*: introduced by ל (esp. late), 117 *n*: cognate accus., 117 *p–r*: pronominal suffix with dative force, 117 *x*: with verbs of putting on and off, 117 *y*, being filled, 117 *z*, dwelling (rare) 117 *bb*: double accus. (to clothe, present, support, meet, &c. *with*), 117 *cc–gg*: accus. of material (to make *of*), 117 *hh*: of product (make *into*), 117 *ii*: of the part affected, 117 *ll*: of place, 118 *d–g*: of nearer definition, 118 *h*: of time, 118 *i–k*: of cause, 118 *l*: defining the manner of an action, 118 *m–r*, 120 *b*: construed with passive verb, 121 *a*, *b*.
Accusative and infinitive construction, 157 *b* N.
Acrophony, 5 *e*.
Acrostic poems, 5 *h*.
Adjectival idea expressed by a substantive in the genitive, 128 *o*, *p*, 135 *n*; by a substantive as predicate, 141 *c*, *d*: adjective used as a substantive in the genitive, 128 *w*, 133 *h*, cf. with ordinal numerals, 134 *p*, end: used poetically for a substantive, 132 *a* N²: rarely stands before the subst., 132 *b*. See also Attributive ideas.
Adjectives, construction of, with substantives, 132: with the article, 126 *u*, *v*: with art. when subst. is without it, 126 *w*, *x* and N: without the article when subst. definite, 126 *z*: syntax of, as predicate in a noun-clause, 145 *r*.
Adverbs, 100: with suffixes, 100 *o*, *p*: adverbial ideas expressed by the infin. abs., 113 *h–k*: by infin. constr., 114 *n* and N: by finite verb, 120 *d–h*.
Adversative clauses, 163.
Afformatives of the perfect, 40 *c*, 44: of the imperfect, 40 *c*, 47: of the noun, 85 *s–v*, 86 *h–l*.
Agreement of members of a sentence in gender and number, 145.
Aleph four times with Mappiq, 14 *d*: affixed to 3rd plur. perf. (rare), 23 *i*, 44 *l*: verbs א״ל, 68.
Aleph prostheticum, 19 *m* and N.
Alphabet, old Hebrew, 5 *a*: origin of, 5 *g*.
Alphabetic poems, 5 *h*.
Amarna letters, 2 *b* N³, 2 *f* and N⁴.
Anacoluthon, 167 *b*.
Answers, affirmative, 150 *n*: negative, 150 *n*.
Any one, 139 *d*.
Aphaeresis, 19 *h*, *i*, 66 *a–c*, 69 *b*, *c*, *f–h*.
Apocope, 19 *l*: in verbs ל״ה, 75 *k*.
Aposiopesis, 117 *l*, 167 *a*.
Appellatives, 125 *e–g*.
Apposition, 127 *h*, 130 *e*: in the wider sense, 131: to express attribute, material, contents, measure, &c., 131 *c–e*.
Arabic language and Arabisms, 1 *b*, *m*, 22 *s*, 24 *g* N, 35 *l* and N², 44 *a*, 47 *a* N, 48 *b*, 58 *l*.
Aramaic language and Aramaisms,

1 *c*, *m*, 2 *q*, *t*, 24 *e*, 44 *c*, 47 *a* N, *c* N: Pi'ēl, 52 *a*: Nûn epentheticum, 58 *i–l*: Aram. forms of verbs, ע״ע, 67 *g*: of verbs ע״ו, 72 *ee*: of verbs ל״ה, 75 *hh*: Aram. termination of the feminine, 80 *h*: of the plural, 87 *e*.
Araq al-Emir, inscription of, 5 *a*.
Archaisms, 2 *k*, *q*: supposed, in the Pentateuch, 2 *n*.
Article, 35: syntax of, 126: with demonstrative force, 126 *a*, *b*: before names of classes, 126 *l–n*: in comparisons, 126 *o*, cf. *p*: with the attributive, 126 *u–x*: used as a relative, 138 *i*, *k*: punctuation of, 35, *a–k*, *o*: rarely retained after prepositions, 35 *n*: original form of, 35 *l*: א elided after it, 35 *d*: omitted with אֵלֶּה, וְאֵת after a subst. with pronom. suff., 126 *y*: found anomalously with a noun in constr. st., 127 *f–i*.
Ashdod, language of, 2 *w*.
Asher, ben, 7 *h* N 2.
Aspirates, 6 *n*.
Asseverations, 149.
Assimilation, 19 *b–f*, 54 *c*, *d*, 66 *d–g*: of נ and י 71: 'backward-assimilation,' 19 *f* N.
Assuan papyri, 1 *m*.
Assyrian language, 1 *d*.
Asyndeton, cases of, 120 *g*, *h*, 154 *a* N (*a*).
Athê merahîq, 20 *f*, *g*.
Athnâḥ, chief divider of verse in prose, 15 *f*: secondary divider in poetry, 15 *h*.
Attraction, cases of, 145 *u* N 3, 146 *a*.
Attribute, *see* Adjective.
Attributive ideas expressed by אִישׁ, בַּעַל, בֶּן־, followed by a genitive, 128 *s–v*: by the genitive, 128 *o*, *p*, 135 *m*: by a substantive in apposition, 131 *c–e*: by a subst. as predicate, 141 *c*, *d*: negative expressed by a noun-clause, 152 *u*, *v*. *See also* Adjectival idea.

Babylonian language, 1 *a*, *d*, *e*, *i*.
Babylonian punctuation, 42 N 3.
Bᵉgadkᵉphath letters, 3 *d*, 6 *n*, 12 *a*. 13 *c*: aspiration of, 21.
Ben Asher's recension of the text, 7 *h* N 2.
Ben Naphthali's recension of the text, 7 *h* N 2.
Beth essentiae, 119 *i*: pretii, 119 *p*.
Bodily and mental defects denoted by adjectives of the form קָטֵל, 84 *b d*.
Boustrophedon, 1 *k* N 2, 5 *d* N 3.

Canaanite branch of the Semitic languages, 1 *b* (ii).
Canaanite glosses in the cuneiform tablets of Tell el-Amarna, 2 *f* N 1.
Cardinal numbers, 97.
Case-endings, remains of early, 90: ־ָה as locative, 90 *c e*, of time, 90 *h*, in place-names and as a poetical form without meaning, 90 *f*, *g* with N: punctuation and tone, 90 *i*: ־ָ, 90 *k–m*, *o*: ־ִי and ־ֵי, 90 *k*, *n*, *o*.
Cases, absolute, 143 *c* N: instrumental, 144 *m* N.
Casus pendens, various uses of, 111 *h*, 112 *n*, *t*, *mm*, *oo*, 116 *u*, 143, 159 *i*.
Causal clauses, 106 *f*, 112 *nn*: syntax of, 158.
Chaldee, incorrect use of the term, 1 *c* N.
Changes of consonants, 19.
Chiasmus in the arrangement of words in parallel members of a verse, 114 *r* N, 142 *f* N.
Circumstantial clauses, 156: expressing negative qualities, 152 *u*: nounclauses, 156 *c*: verbal, 156 *d*.
Citation, formulae of, 150 *e*.
Cognate accusative, 117 *p–r*.
Cohortative, 48 *b*: form of, 48 *c*, *d*: meaning, 48 *e*: syntax of, 108: very rare in verbs ל״ה, 75 *l*.
Coins, Hebrew, 2 *d* (4).
Collective nouns, 123 *a*, *b*: in fem. sing., 122 *s*: names of classes used collectively, 126 *l–p*: with the plural of the adj. or ptcp., 132 *g*: with the predicate in the plur. masc., 145 *b–e*, in 3rd pl. fem., 145 *c* (צֹאן), in masc. sing., 145 *f*, in sing. followed by plur., 145 *g*, in fem. sing., 145 *k* (cf. 135 *p*).
Common gender, 122 *b*, *d*.
Comparatio decurtata, 118 *r* N, 133 *e* N.
Comparative, expression of, 133 *a–f*.
Comparative clauses, 161.
Comparison, use of article in, 126 *o*, *p*.
Compensatory lengthening, 25 *a*, 27 *e*, *e–h*.
Composition of words, 30 *p*, (*b*), *r*, 81 *d*, 152 *a* N: of particles, 99 *e*.
Compound ideas, how thrown into the plural, 124 *p–r*: with the article, 127 *e*: with suffixes, 135 *n*.
Compounds formed by לֹא with a substantive or adjective, 152 *a* N.

Concessive clauses, 160.
Concord of subject and object in gender and number, 145 *a–t*: cases of false concord, 145 *u*.
Conditional sentences, perfect in, 106 *p*: imperf. in, 107 *x*: cohortative in, 108 *e, f*: jussive in, 109 *h*: imperat. in, 110 *f*: ptcp. in, 159 *v*: ptcp. without אִם, 116 *w*, 159 *i*: perf. consec. in apodosis, 112 *ff–mm*: different types of, 159: without conditional particle, 112 *kk, ll*, 159 *b–k*.
Conjugations, or verba derivata, 38 *b*, 39 *c, d*: number and arrangement of, 39 *e–f*: Niph'al, 51: Pi'ēl and Pu'al, 52: Hiph'il and Hoph'al, 53: Hithpa'ēl, 54: the less common conjugations, 39 *g*, 55: conjugation of aim or attack (Pō'ēl), 55 *c*.
Conjunctions, 104.
Conjunctive accents, 15 *g, i*.
Consecutio temporum, perf. and imperf. with wāw consec., 49: perf. with wāw consec., 112.
Consecutive clauses, 107 *u*: syntax of, 166.
Consonants, 5: changes of, 19: pronunciation and division of, 6: transcription of their names, 5 *f* N: weak consonants, 7 *a–g*: softening of, 19 *o*.
Constructio ad sensum, 132 *g*, 145 *a–l*: asyndetos, 120 *g, h*, 154 *a* N (*a*): praegnans, 119 *x, y, ff, gg*.
Continuous action expressed by infin. abs., 113 *s–u*.
Continuous progress expressed by duplication of a word, 133 *k*.
Contraction of vowels, 7 *a*.
Co-ordination of verbal ideas instead of subordination, 120.
Copula, *see* Wāw copulativum: verbal, how expressed, 141 *f–h*.
Cuneiform inscriptions, 1 *d*, *m* N 1, 5 *g* (*b*), 6 *b*.

Dageš forte, 12: in place of a letter assimilated, 19 *b–f*: orthophonicum, 20 *g*, 13 *c*: necessarium, compensativum, characteristicum, 20 *a*: euphonicum, 20 *c*: conjunctivum, 20 *c–f*: dirimens, 20 *h*: affectuosum, 20 *i*: firmativum, 20 *k*: implicitum, 20 *m*, 22 *c*: omission of, 20 *l, m*: in gutturals, 22 *b, s*: occasionally in ר, 22 *q* (*a*), *s*: four times in א (acc. to others Mappiq), 14 *d*: omitted sometimes in 2nd radical of verbs ע״ע, 67 *g*, *dd*. *See also* Strengthening.
Dageš lene, 13, 21: after יהוה (i.e. אֲדֹנָי), 21 *c*: omitted anomalously after consonantal ו and י, 21 *c*: exceptional cases of (בְּבֹ֫קֶר, כְּכֹל, בְּפִי, בְּמִי), 21 *d*.
Dative, 119 *s*.
Dativus ethicus, 119 *s*, 135 *i*: dative expressed by a suffix, 117 *x*.
Decalogue, double accentuation of, 15 *p*.
Dehiq, 20 *c*.
Denominative nouns, *see* Nouns: verbs, *see* Verb.
Desiderative sentences, 151.
Determination of nouns, 125: omission of it, 117 *q*, 126 *p*: determination of proper names, 125 *c–f*: determination by the article, 126: by a following determinate genitive, 127: determination of numerals, 134 *k*.
Diacritical points, *see* Puncta extraordinaria.
Dialects in the O. T., 2 *w*.
Diminutives, 86 *g* and N.
Diphthongs, 7 *a*, 8 *m*, 24 *f*.
Disjunctive accents, 15 *f, h*.
Disjunctive questions, 150 *f–i*.
Dissimilation of vowels, 27 *x*.
Distributive numerals, 134 *q*.
Doubling of consonants, *see* Strengthening.
Dual, 88: with the plural of the adjective, 132 *f*: with predicate in the plur., 145 *n*: in numerals, 97 *g, h*, 134 *r*: place-names doubtfully so explained, 88 *c*.

E-sounds, 7 *a, b, e*, 8 *b*, 9 *i–m*.
Each, every, how expressed, 139 *b, c*.
East Semitic, 1 *d*.
Elatives, 85 *b*, 133 *a* N.
Elegy, rhythm of, in Hebrew, 2 *r*.
Elision, *see* Syncopo and elision.
Ellipse of the pronominal object, 117 *f*: other cases of ellipse (real or apparent), 116 *s*, 118 *s* N (in comparisons), 134 *n* (of names of measures, weights, &c.), 144 *o* (due to corruption).
'Emblematic Mashal,' 161 *a* N.
Emphasis expressed by infin. abs., 114 *l–r, v–x*: by cognate accus., 113 *w* (end): by cognate accus. with defining adjective, 117 *q*: by duplication of a word, 123 *e*, 133 *k, l*: by combination of different derivatives from the same root, 133 *l*: by

the article or a genitive (the superlative degree), 133 *g–i*: by a personal pronoun added to the subject, 135 *a*, *c*: by the pronoun annexed in the nominative to the suffix or to a noun, 135 *d–h*: by אֵת with the suffix, 135 *k*: by position, 142 *f*, *g*, 152 *e* (after לֹא), 152 *w* (after פֶּן).
Emphasis on indeterminate nouns, 117 *q*, 125 *c*.
Enallage of gender, 135 *o*, 144 *a*.
Epicene nouns, 122 *b*, *e–g*.
Epithets, poetical, used as substantives, 132 *a* N.
Era, Jewish, 5 *l*.
Ethical dative, 119 *s*, 135 *i*.
Ethiopic, 1 *b* (i), 30 *p* N.
Exceptive clauses, 163 *c*.
Exclamations, 146 *b* (קוֹל = *hark*): with הִנֵּה, 147 *b*: without הִנֵּה, 147 *c*: with other interjections, 147 *d*: expressing a wish, 148 *a–d*: in form of a question expressing irony or indignation, 148 *a*, *b*; expressed by נָא, 148 *d*, 151.
Extension of influence of a preposition over a parallel clause, 119 *hh*: of a negative, 152 *z*: of an interrogative, 150 *m*: of a conjunction, 150 *m* N.
Extension, plurals of, 124 *a–g*.

Feminine, forms of, 80, 94: ending in ת־, 80 *f*, ת֫, 80 *g*, ־ָה, 80 *l*: in the constr. state, 89 *e*: in the plural, 87 *i–l*: paradigms, 95: of a land or people, 122 *h*, *i*: of abstract ideas, 122 *q*: of holders of offices [1], 122 *r*: of collectives, 122 *s*: in verb or pronoun to express *it*, 135 *p*: in impersonal verbs (*it* rains), 144 *b*, *c*: in the predicate of collective plurals, 145 *k* (cf. fem. of pronoun referring to collectives, 135 *p*): dislike of the fem. form, 132 *d*, 145 *p*, *t*: fem. forms of the infinitive, 45 *d*, 66 *b*, *g*, *h*, 69 *b* (C), *c*: fem. nouns with plur. in ־וֹת, 87 *q*: fem. denoting artificial (as opposed to natural) objects, 122 *u*, in plur. (as opp. to dual), 87 *o*.
Feminine pronoun = English *it*, 135 *p*, 144 *b*, *c*.
Figura etymologica, *see* Schema etymologicum.
Final clauses, 107 *q* (imperf.), 109 *f*, *g* (jussive): syntax of, 165.
Final letters, 5 *c*.
Formae mixtae, 78 *d*.
Formative letters, or serviles, 30 *c*: in formation of nouns, 81 *b*, 85.
Frequentative force of imperf., 107 *b–g*: of perf. with wâw consec., 112 *e–o*, cf. *kk*, *ll*.
Fulcra, 8 *h* N.
Future tense, 47 *a* N: futurum exactum, 106 *o*, 107 *l*: futurum instans, 116 *p*.

Ga'ya, 16 *c*, *g*, *h*.
Ge'ez, 1 *b* (i).
Gemara, 1 *c*, 3 *a*.
Gender of nouns, 122: in the construction of subject and predicate, 145: irregularities in use of, 110 *k*, 135 *o*, 144 *a*, 145 *p*, *t*, *u*.
Genitive, expression of, 89, 127 *a*, 128: epexegetical or explicative, 128 *k–q*, *x*, *y*: subjective, 128 *g*, 135 *m*: objective, 128 *h*, 135 *m*: partitive, 128 *i*, *r*: expressing the genus, *l*, the species, *m*: expressed periphrastically by לְ, 129 *a–f*: by אֲשֶׁר לְ, 129 *a*, *h*.
Gentilic names, in ־ִי, 86 *h*: determination of, 125 *e*: of compounds (as בְּנֵי־יְמִינִי), 127 *d*.
Geographical names with a following genitive, 125 *h*: with the article (appellatives), 125 *e*.
Germanic languages, 1 *e*.
Gerund, 45 *f*, *g*.
Grammarians, early, p. 20 N [1].
Gutturals, pronunciation of, 6 *c–f*, *o*, *r*: peculiarities of, 22: in verbal stems, 62–65.

Hadad inscription, 1 *m*.
Ḥateph-Pathaḥ, 10 *f*, *g*: shorter than Ḥateph-Seghôl, 27 *r*, 63 *f*.
Ḥateph-Qames, 10 *f*, *h*.
Ḥateph-Seghôl, 10 *f*.
He interrogative, pointing of, 100 *k–n*.
He locale, 90 *c–i*.
Hebrew language, 1 *a*, *b* (ii): history of, 2: remains of the literature, 2 *d*, *l*, *o*: dialects of, 2 *w*: grammatical treatment of, 3: system of writing, 2 *i*, 5.
Hebrews, 2 *b*.
Helping vowels, 9 *h*, *m*, 28 *e* (to keep a syllable open), 84[a] *a*, 93 *c* (in segholates).

[1] Cf. Driver, *Introd.*[8], p. 466: Segal, *Mišn. Hebr.*, p. 63.

Himyaritic, 1 *b* (i) : writing, 1 *k* N².
Hiph'īl, 53 : 'internal,' 53 *d* : infinitive pointed -הַ, 53 *l* : the ה in infin. elided after preposition, 53 *q* : imperf. with ֶ for ֵ (as יַדְרִכוּ), 53 *n* : with ה retained in imperf. after preformatives, 53 *q* : denominatives in Hiph., 53 *g*.
Ḥireq, different kinds of, 8 *b*, 9 *g*, *h* : compaginis, 90 *k–n*.
Hithpa'ēl, 54 : sometimes construed with an accusative, 54 *f*, 117 *w*.
Hithpa'lēl, 55 *d*, 72 *m*, 75 *kk*.
Hithpalpel, 55 *g*, 67 *l*.
Hithpō'ēl, 55 *b*, 67 *l*.
Ḥolem, 8 *c–g* : written defectively, 8 *i–l* : its origin, 9 *p–s* : changed to qameṣ in pause, 29 *u*.
Homogeneous consonants, 6 *q* : vowels, 24 *b*, *f*.
Homorganic consonants, 6 *q*.
Hoph'al, 53 *b*, *h*, *s*, *t* : ה retained once in ptcp., 53 *s*.
Hothpa'al, 54 *b*, *h*, *l*.
Hypothetical sentences, *see* Conditional sentences.

I-sounds, 8 *b*, 9 *g*, *h* : from *a* 27 *s*, *t* : in impf., 47 *b* : in Niph., 51 *a* : in Pi , 52 *a* : in Hiph., 53 *a* : in nouns with preformative מ, 85 *f* : lengthened to *ē*, 93 *c*.
Imperative, forms in Qal, 46 : shortened and lengthened forms of, 48 *i–l*, 75 *k* : with suffixes, 61 *f–h* : syntax of, 110 : infinitive absolute used with force of imperative, 113 *bb*.
Imperfect, the name, 47 *a* N : formation and inflexion of, 47 : unusual forms of, 47 *k* : form תקטלנה as 3rd fem. sing. or 2nd masc. sing., 47 *k* : 3rd pl. masc. in ן, 47 *m* : jussive and cohortative forms of, 48 : with wāw consecutive, 49 *c–g*, 111 : with suffixes, 60 : its syntax (alone), 107 : expressing custom or habit, 107 *e*, *g* : with wāw consec., 111 : subordinated to another verb, 120 *c*.
Imperfect Hiph'il with ֶ for ֵ (as יַדְרִכוּ), 53 *n* : with ה retained after preformatives, 53 *q*.
Impersonal construction of הָיָה, &c., 144 *b* : impersonal passive, 121 *a*.
Imprecation, formulae of, 149 *d*.
Incomplete retrocession of the tone, 29 *f*.

Preformatives of the imperfect, 47: of the noun, 85.
Pregnant construction with prepositions, 119 *ee*: with מִן, 119 *x*, *y*, *ff*: with אַחֲרֵי, אֶל, לִקְרַאת, בְּ, לְ, 119 *gg*.
Prepositions, 101: prefixed, 102: with suffixes, 103: under the government of the verb, 119: compound prepositions, 119 *b-e*: chief meanings of, אל, ב, ל, מן, על, 119 *g-dd*: pregnant uses of, 119 *ee-gg*: force of, extending over parallel clause, 119 *hh*: with adverbs (rare), 119 *ii*: prep. (esp. בְּ) not used after בְּ, 118 *s-w*, found exceptionally, 118 *s* N.
Present expressed by the Perfect, 106 *g*, *h*.
Preterite, *see* Perfect.
Pretonic vowels, 26 *e*: with ב, כ, ל, 102 *f-k*: with עִם before suffix, 103 *c*: with וְ, 104 *g*.
Printed texts, earliest Hebrew, 3 *e* N.
Prohibitions, expressed by אַל or לֹא with jussive or imperfect, 107 *o*, 109 *c*, *d*, 152 *f*.
Pronominal ideas expressed by substantives, 139.
Pronominal suffix anticipating noun, attached to verb, 131 *m*, *o*; to subst. or prep., 131 *n*.
Pronouns, 32: syntax of, 135-8: personal, 32, 135: oblique cases of, 135 *i-k*: suffixes, 33, with the verb, 58, with the noun, 91, with adverbs, 100 *o*, *p*, with prepositions, 103: suffix of 3rd fem. sing. referring to entire sentences, 135 *p*: demonstrative, 34, 136, used relatively, 138 *g*, *h*: relative, 36, 138: indefinite, 37 *g*, 137 *c*: interrogative, 37 *a-f*, 137 *a-c*: suffix reflexive, 135 *i*, *k*: suffix possessive, 33, 135 *m-o*: suffix as genitive, subjective or objective, 135 *m*: separate pronoun in nominative emphasizing a suffix, 135 *d-h*: reciprocal, 139 *c* with N, *e*.
Pronunciation of Hebrew, 6 *a*, *b*, 48 *f*.
Prosthetic Aleph, 19 *m*.
Pu'al, 52 *b-d*, *h* (end), *q-s*: as passive of Qal, 52 *e*.
Pu'lal, 55 *d*.
Puncta extraordinaria, 6 *n*.

Punctuation, Babylonian, 8 *g* N.
Punic, *see* Phoenician.

Qal, form and meaning of, 43 : probable passives of, 52 *e*, 53 *u*.
Qameṣ, 8 *a*. 9 *a–d* : its pronunciation, 8 *d* : Qameṣ impurum, 25 *c*.
Qameṣ-ḥaṭûph, 8 *c*, 9 *s* : how distinguished from Qameṣ, 9 *u*, *v*.
Q^{e}rê, 17 *a*, *b* : perpetuum, 17 *c*.
Qibbuṣ, 8 *c*, 9 *n*, *o*.
Qina-metre, 2 *r*.
Quadriliterals, 30 *p*, *q* : nouns, 85 *w* : verbs, 56.
Quantity of vowels, p. 40 (Preliminary remark).
Questions indicated by tone, 150 *a*, *b* : disjunctive, 150 *g* : double, 150 *h* : indirect, 150 *i* : expressing rhetorically a denial, 148 *c*, 150 *d*, 151 *a*, *b*.
Quiescent letters, *see* Letters.
Quinqueliterals, 30 *p*, *r*, 85 *w*.

Radical letters, 30 *c–e*.
Raphe, 6 *n*, 14 *e*.
Reciprocity expressed by . . . אִישׁ (רעהו) אחיו : by Niph'al, 51 *d* : by Hithpa'ēl, 54 *f*.
Reduplication of letters, in verbs, 55 *d–g*, in nouns, 84^{b} *k–p*.
Reflexive use of לְ (ethical dative), 119 *s* : of Niph'al, 51 *c* : of Hithp., 54 *e* : of pronouns, 57 N, 135 *i*, *k*.
Relative sentences, 138 *a–f*, 155 : expressed without אֲשֶׁר, 155 *f–m*, 156 *b* : in genitive after constr. st., 130 *c*, without אֲשֶׁר, 130 *d*, 152 *a* N (end), *u* (2nd part), *v*, 155 *e* : expressed by זֶה, זוֹ, זוּ, 138 *g* : by article (in late Hebrew), 138 *i* (cases due to false vocalization or accentuation, 138 *k*) : independent rel. clause as subject or object of verb, or genitive of a noun, or governed by a preposition, 155 *n*.
Relative pronoun, 36, 138.
Repetition of words, without וְ, to express distribution (='every'), 123 *c*, *d* : emphasis, 123 *e* : the superlative, 133 *l* : with וְ, to express summation, 123 *c*, to express difference (אבן ואבן), 123 *f*.
Resh occasionally with Dageš, 22 *s*.
Rhythm of Hebrew poetry, 2 *q*, *r*.
Roots, 30 *c*, *d*.

Sabaean, 1 *b* (i), *k* N.
Samaritan, 1 *c*.
Śaph'el, 55 *i*, cf. 30 *p*.
Schema etymologicum, 117 *p–r*.
Scriptio continua, 3 *g* N.
Scriptio plena and defectiva, 8 *i–l*, 25 *b*.
Seal-stones, engraved, 2 *d*.
S^{e}ghôl, 8 *b*, 9 *m*, 27 *p–r* : as a helping vowel, 27 *r*, 28 *e*, 84^{a} *a* : rarely after gutturals, 22 *h* : before gutturals (esp. ח) with Qameṣ, for Pathaḥ, 27 *q*, 29 *v* : in pause for Ṣere in Pi'ēl, 52 *n*.
'Segholate' nouns, forms of, 84^{a} *a–d* : in constr. st. and with suffixes (paradigms), § 93 *c–e*, *g–r*, feminine forms, 95 *d–f* : of the form זְרֹעַ in constr. st., 93 *h* : of the form כַּסְפִּי (dageš in 3rd radical) in constr. st. plur., 93 *m* : explanation of forms from verbs ל״ה (as פְּרִי), 84^{a} *c* (ε), 93 *x–z*, 95 *d–f* : constr. st. of nouns of the form אָרְחָה sometimes segholate in form, 93 *hh*.
Self, idea of, how expressed, 135 *a*, *i*, *k*, 139 *f*, with N, cf. *g*.
Semitic languages, 1 : their grammatical structure, 1 *f* : their relation to one another, 1 *e*, *m*, *n* : and to other languages, 1 *g–i* : their age, 1 *m*, *n* : writing, 1 *k*, *l*.
Sentences, 140 : compound, 140 *d*, 143 : incomplete, 147 : restrictive and intensive, 153 : connected by וְ, 154 : divided by Paseq, 15 *f* N^{2}.
Separating vowels, 67 *d* N, 72 *i*.
Septuagint, 3 *a*, 6 *b*, p. 35 N.
Ṣere, 8 *b*, 9 *i–l* : in pause for S^{e}ghôl in verbs ל״ה, 75 *hh* N : changed to pathaḥ in pause, 29 *q* : in Hithpa'ēl changed to qameṣ in pause, 29 *s*, 55 *k*.
Serviles, *see* Formative letters.
Š^{e}wâ, simple and compound, 10, 21 *e*, *f*, 22 *l–p*, 24 *b–d*, 63 *ff* : mobile, 10 *b*, *c*, *l*, 20 *m*, 21 *e*, *f*, 22 *l*, 27 *e*, *i–m* : simple, under gutturals, 22 *m*, *n*, 63 *a*, *c*, 65 *g* : quiescent (silent, syllable divider), 10 *i*, 22 *m*, 24 *b*.
Sibilants, 6 *h–l* : transposition of, 19 *n*, 54 *b*.
Sillûq with Sôph pasûq, 15 *f*.
Siloam inscription, 2 *d* N : orthography of, 7 *f*.
Simultaneity of actions expressed by noun-clauses, 141 *e*, 164 *a*.
Singular with distributive force, 145 *l*, *m*.
Softening of consonants (rare), 19 *o*.
Some, how expressed, 139 *h* with N.
Sonants, 6 *o*, *p*.

South Semitic, 1 *b* (i).
Spirants, 6 *n*, 13, 21.
Square character, 5 *a*.
Status absolutus of the noun, 89 *a*.
Status constructus, its form, 89: vowel-changes marking it in many nouns, 91–6: its use, 128: before an adjective treated as a subst., 128 *w*, 133 *h* (end), 134 *p* (end): wider use of it, 130: before prepositions, 130 *a*: before relative clauses, 130 *c*, *d*: in apposition with another constr. st., 130 *e*, *f*: before numerals, 134 *o*, *p*: anomalously with the article, 127 *f–i*: before זֶה, used as a relative, 138 *g* (*a*).
Stem-consonants, or radicals, 30 *c*.
Stems, distinguished from roots, 30 *a*, *d*, *g–k*.
Strengthening (doubling or sharpening) of consonants, 12, 20: in gutturals, 22 *b*: virtual, 22 *c*: to intensify the idea of the stem, 52 *a*, *d*: of 3rd radical in fem. and plur. of nouns of the forms אָיִם, גָּמָל, 84*a h*, 93 *s*, *ee*, *kk*, 94 *c*, 95 *g*, cf. 93 *pp*: virtual sharpening of א, 64 *e*: sharpening sometimes omitted in 2nd radical of verbs ע״ע, 67 *g*, *dd*.
Subject, omitted in participial clauses, 116 *s*, *t*: impersonal, 144 *b*, *c*: indefinite, 144 *d–k*: two subjects in a verbal clause, 144 *l*, *m*: construction of compound subjects, 146.
Substantive, its construction with the adjective, 132: as predicate of a noun-clause, 141 *b*: used as predicate where we should use an adjective, 141 *c–d*.
Suffixes, (pronominal) attached to verbs, 58: rare, irregular, or poetic, with verb, 58 *g*. *i*, *k* (cf. 59 *e–h*, 60 *d–h*, 61 *b–e*, *g*, *h*): with noun in sing., 91 *e*, *f*: in plur. 91 *l*: the sing. form after וֹת–, 91 *n*: with prepositions, 103: 3rd sing. masc. in ה֫–, 7 *c*, 58 *g*, 91 *e*: 3rd sing. fem. without Mappiq, 58 *g*, 91 *e*, 103 *g*: omission of ת֫– in fem. nouns before suffix, 91 *e* (end): 3rd plur. in מוֹ, 53 *g*, 91 *f*, *l*, 103 *f* N 3: omission of י in plur. nouns before suffix, 91 *k*: original י of sing. nouns from ל״ה stems retained before suffix, 93 *ss*: denoting the remoter object, 117 *x*: use of 3rd fem. sing. and 3rd plur. to express 'it', 135 *p*: anticipating the object (as in Aram.), 131 *m*, *o*: apparent verbal forms attached to nouns used as adverbs, 100 *o*, *p*: anticipating the genitive, 131 *n*: syntax of, 135 *m–r*: heavy (or grave) and light, 59 *e*, 91 *o*, 93 *b*: masculine suffixes referring to feminines, 135 *o*: fem. suff. with collective force, 135 *p*: suffixes which have lost their meaning (יְחִדָּו, אֲדֹנָי), 135 *q*, *r*: omitted sometimes with infinitive, 115 *e* N.
Superlative, expression of, 132 *c*, 133 *g–l*.
Šureq, 8 *c*, 9 *n*.
'Surface'-plurals, 124 *b*, *c*.
Suspended genitive, 130 *e*, *f*.
Syllables, theory of, 26.
Syncope and elision, 19 *k*, 35 *d*: of the article, 35 *n*: of ה in Hiph'il and Hoph'al, 53 *a*, *b*, in infin. Niph., 51 *l*, in infin. Hiph., 53 *q*, in infin. Hoph., 67 *y* (end).
Syriac language, 1 *c*.
Syriasms in pronunciation, 24 *e*: cf. Aramaisms.

Talmud, 3 *a*.
'Tam'-character, 5 *a* (end).
Targums, 1 *c*, 3 *a*.
Tell-el-Amarna tablets, 2 *f*.
Temporal clauses, 106 *f*, 111 *d*, 112 *oo*, 164: expressed by infin. constr. with a preposition, 164 *g*.
Tenses, 40: their use, 106–9, 111, 112: tempus historicum, 106 *d*.
Text of the O. T. probably derived from a single archetype, 3 *c*.
Textual criticism, 3 *g*: intentional and unintentional changes in the text, 3 *g*.
Tiph'el, 55 *h*.
Titles indicated by the feminine form, 122 *r*.
Tone of Hebrew words, 29: marks of, 15 *b*, *c*, *k*, *l*: thrown forward, 29 *e*: retrocession of, 29 *d–g*: incomplete retrocession, 29 *f*: tone in pause, 29 *i–r*: concurrence of two tone-syllables avoided, 29 *e*, *f*, *h*. Tone in perfect thrown forward after wāw consec., 49 *h–l*: in imperf. often thrown back in jussive and after wāw consec., 48 *f*, 49 *d*, 67 *x*, 68 *d*, *e*, 69 *p*, 71, 72 *t*, *aa*, 73 *e*.
Transitions in poetry from one person to another, 144 *p*, cf. 135 *r*.
Translations of the O. T., 3 *a*.
Transposition (metathesis) of consonants, 19 *n*, 54 *b*.

U-sounds, 8 *c*, 9 *n*, *o*.

Verb, 38: its syntax, 106–116: its government, 117–121: weak verbs, 41, 66–76, relation to one another, 77: verbs middle *e* and *o*, 43: derivative, *see* Conjugations: denominative, 38 *c*, *d*, 43 *c* (in Qal), 51 *g* (Niph.), 52 *h* (Pi.), 53 *g* (Hiph.), 54 *i* (Hithp.): transitive and intransitive, 43, 117 *u*, *v*: with suffixes, 57–61: doubly weak, 76: ל״א and ל״ה confused, 75 *nn–rr*: defective, 78: verba induendi et exuendi, 117 *y*: copiae et inopiae, 117 *z*, *aa*: with prepositions, 119: primitive ' retained exceptionally in verbs ל״ה, 75 *u*, *v*, *x*, *dd*, *gg* (end), cf. 29 *t*: verbs ל״ה, 65 N, 75 *b* (end): verbs ל״ו, 75 *b*, *v*, *kk*, nouns derived from, 84[a] *c* (ε), *f* (end), *g* (end), 93 *z*.
Verbal clauses, 140 *b*, *c*, 142: relative, 155 *f–n*.
Verbal ideas subordinated to a verb, 120 *a–c*: co-ordinated with a verb, 120 *d–h*.
Verbal suffixes with prepositions (rare), 103 *d*.
Verse arrangement of poetic passages, 2 *r* (end).
Vocalization of the text, 7 *h*, *i*: Babylonian, 8 *g* N, 103 *m* N.
Vocative with and without the article, 126 *f*.
Vowel-letters, 7 *b–g*, 8 *h–m*.
Vowel-signs or points, 7 *h*, *i*, 8–10.
Vowels, 7: influenced by the nature of the syllable, 26: firm or unchangeable, 25: changes in them as regards quantity, 27: impure, 25 *c* N: pretonic, p. 86 N[1], § 102 *f–i*, 103 *c*.

Wāw consecutive, § 49 *a*, *b*, before א in 1st pers. impf. Pi. with anomalous pathaḥ, 49 *c*, with the perfect, 49 *h–l*, with the imperfect, 49 *c–g*: copulative, punctuation of, 104 *d–g*: wāw apodosis introducing the predicate, 143 *d*: explicative, 154 *a* N (*b*): concomitantiae, 154 *a* N (*b*): adaequationis, 161 *a* N. *See also under* Perfect *and* Imperfect.
Weak consonants, 6 *s*: א and ה, 23: ו and י, 24.
Weak verbs, 41, 66–76: their relation to one another, 77: relation between ל״א and ל״ה, 75 *nn–rr*.
Weakening (or softening) of consonants, 19 *o*.
Wish, expressed by simple impf., 107 *n*: by cohortative, 108 (with נָא, 108 *c*): by jussive, 109 (with נָא, 109 *b*), by imperative, 110 *a*: by perf. consec., 112 *aa*: by a noun-clause, 116 *r* N, 141 *g*: by מִי, 151 *a*: by מִי יִתֵּן, 151 *b–d*: by אִם, לוּ, אחלי, 151 *e*.
Writing, Semitic, 1 *k*, *l*: old Hebrew, 2 *d*, *i*, 5 *a*: its origin, 5 *g*.

Zenjirli, inscriptions, 1 *m*, 32 *k* N.

INTRODUCTION

THE following manual is not put forth as a Hebrew grammar, but simply as a primer of the Hebrew language. Its object is to give a general survey of the principal phenomena of the language, with a view to putting the student, in the shortest possible time and with the minimum of arduousness, in position to begin reading and translating with the use of lexicon and grammar. The standpoint is not that of a contribution to Hebrew philology, but purely practical and empirical. The material has been at times forcibly systematized and some current definitions modified, but only for the sake of simplicity and ease of acquisition; subsequent study will very easily furnish the few readjustments thus made necessary.

The work is a growth; it has been the slow result of ten years of experience in teaching elementary Hebrew. During the first six of these, the author used Davidson's "Introductory Hebrew Grammar" as a text-book, but he gradually was obliged to rearrange and modify the material until, four years ago, he gave up the use of Davidson's Grammar and substituted dictated notes of his own. For four years these notes have been used, tested, revised, corrected, simplified, until they have attained their present form. The chief motive in printing is to save the seminary students the labor of copying some fifty foolscap pages of hektographed material, but the hope is entertained that the Primer may prove useful to a larger circle. The book can be used without an instructor. The attempt has been made (with but partial success, necessarily) to anticipate every possible question a

student would be likely to ask (and which students actually have asked) and to guard against all conceivable aberrations from the path marked out, which path will inevitably lead the patient learner in time (say about two months, at the rate of a lesson a day) to the goal proposed; to wit, a sufficient equipment for beginning the study of the original text of the Old Testament with the standard helps, lexical and grammatical.

It is hoped that ministers who have forgotten their Hebrew may find in this little work an inducement to begin over again at the beginning; the difficulties of Hebrew are chiefly at the outset, and it is here that simplification and gradatim arrangement can be of most service. Perhaps Sunday-school teachers and other students of the Bible may be tempted to explore a field whose difficulties are not so insuperable as they are traditionally supposed to be.

Union Theological Seminary,
New York City,
June, 1903.

PREFACE TO SECOND EDITION

THE favorable reception given to the Primer would indicate that there is a field of usefulness for a work of this kind, and is significant of a widening interest in the study of the Old Testament.

The changes made in this edition include the correction of the numerous typographical inaccuracies, the addition of a number of explanatory statements at places where the use of the book in the class room showed that they were needed, and the re-writing of the section on Méθeγ (Less. X), with a view to making that complicated subject clearer if possible.

C. P. F.

UNION THEOLOGICAL SEMINARY,
June, 1905.

SUGGESTIONS FOR STUDY

As a rule progress should be made at the rate of one lesson a day. Lessons VII and VIII may conveniently be treated as one. In Lesson X the Table of Prose Accents is merely for reference, and need not be memorized. It is advantageous to commit to memory gradually, if it can be done without too much effort, the two hundred words of the Vocabulary, most of them words of frequent use. The Verbal Paradigms should be memorized until they can be easily repeated, especially pages 92 and 93, on which all the others are founded. The Oral Exercises from Lesson XV on are given without vowel points. The correct supplying of these is the best test of the student's mastery of the lesson. Those studying by themselves should copy these Oral Exercises from the book, inserting the required vowels. Occasional review of their work will enable them to detect errors unnoticed at first.

It is important that the habit be formed of pronouncing all the Hebrew audibly while engaged in study, so that facility may be acquired in pronunciation and reading. Exaggerated carefulness and distinctness at the outset will soon make the tongue limber in the utterance of the unaccustomed sounds.

After Lesson X it is advisable to procure a Hebrew Old Testament, and make a practice of reading aloud a little every day.

For classes conducted by a teacher the following routine is suggested as a basis: —

1. Collect the written exercises.

2. Written quiz, comprising not more than five or six questions, testing knowledge of the lesson for the day.

These questions may be written one by one by a student at the blackboard, thereby giving opportunity to the teacher to correct the exercises.

3. Collect the quiz papers.

4. Student at the board writes the answers to the quiz questions while the teacher corrects the quiz papers.

5. Return of quiz papers and written exercises corrected.

6. A certain proportion of the class are sent to the blackboard with slips of paper on which are questions to be answered.

7. Meanwhile the remainder of the class is drilled on the Oral Exercise in the Primer.

8. Correction of the blackboard work by the teacher or by those in the class who detect any errors.

9. Questions by students on any points not clear.

10. Assignment of lesson for next day.

9	ט	ṭ	Ṭêth	tayth
10	י	y	Yôdh	yōdh
11	כ ך ּכ	χ k	Kaϕ	kaph
12	ל	l	Lámedh	láh-medh
13	מ ם	m	Mêm	maym
14	נ ן	n	Nûn	noon
15	ס	s	Sámekh	sáh-mekh
16	ע	ʿ	ʿáyin	ghá-yin
17	פ ף ּפ	ϕ p	Pê	pay
18	צ ץ	ṣ	Ṣādhê	ssah-dhay
19	ק	q	Qôph	kōph
20	ר	r	Rêsh	raysh
21	שׁ שׂ	ś š	Śîn Šîn	seen sheen
22	ת ּת	θ t	Tāw	tāh-oo

* This column guides only in the matter of pronunciation; the spelling of the names of the letters is found in the preceding column.

† *g* hard.

b. REMARKS ON THE ALPHABET

1. These letters are all consonants.

2. Five letters, Nos. 11, 13, 14, 17, 18, have final forms ך, ם,* ן, ף, ץ, which are used when this letter comes at the end of a word.

3. Six letters, Nos. 2, 3, 4, 11, 17, 22, when written without a dot inside, are aspirated in sound thus: ב, ג, ד, כ, פ, ת.
bh, gh, dh, kh, ph, th

The equivalents for transliteration are respectively *β*, *γ*, *δ*, *χ*, *φ*, *θ*, Greek letters with their modern Greek pronunciation (in order to avoid representing one Hebrew letter by two English letters).

β is sounded like *v*.

γ is difficult to distinguish from *g*.

δ is sounded like *th* in *thus*.

χ is sounded like *ch* in the German *ich*.

φ is sounded like *f*.

θ is sounded like *th* in *thin*.

4. No. 1, א (ʾ, ʾálef*φ*) stands for a light emission of the breath like that which precedes the utterance of any vowel. It is represented by the sign for the smooth breathing in Greek, with a vertical line added beneath to make it level with the other letters and to show that it is a constituent part of the word.

5. No. 6, ו (w, Wāw) is pronounced like *w* in *water*.

6. No. 8, ח (ḥ, Ḥê*θ*) is a guttural *h* like *j* in Spanish or *ch* in the German *Sache*.

7. No. 16, ע (ʿ, ʿáyin) stands for a strong guttural sound with various modifications difficult to reproduce. The Greek rough breathing is a sufficient approximation to it, written like No. 1 with a vertical line beneath as a support.

8. No. 18, צ (ṣ, Ṣāδê) is a hissing palatal *s*.

9. No. 19, ק (q, Qô*φ*) is a guttural *k*.

10. No. 9, ט (ṭ, Ṭê*θ*) is a palatal *t*.

11. No. 20, ר (r, Rêš) is pronounced with rolling of the tongue.

12. No. 21, שׂ (ś, Śîn) is sounded like No. 15 *s*.
שׁ (š, Šîn) is pronounced *sh*.

* Contrast No. 15, ם.

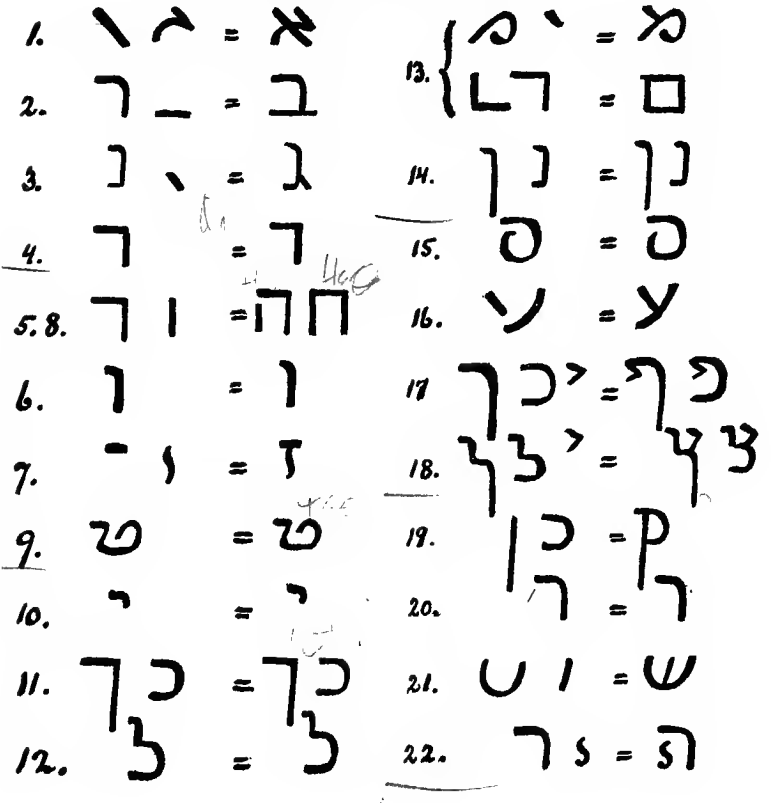
13. In pronouncing Hebrew words (as indicated in the last column), the continental sound of the vowels is to be used.

The mark ˆ or ¯ over a vowel indicates that it is long.

The mark ´ over a vowel indicates the accented syllable, when that syllable does not happen to be, as usual, the final one.

For facility in memorizing, the alphabet may be divided into five groups containing 4, 5, 5, 4, 4 letters respectively, as indicated in the table.

c. SUGGESTIONS FOR WRITING



1. Two strokes at the most suffice to form any Hebrew letter, as shown on p. 3.

2. Notice that the top of the ל (No. 12) extends above the other letters, and the bottom of the ק (No. 19) extends below, thus: לא, קול.

3. Distinguish in writing between ע (No. 16) and צ (No. 18).

4. Note the difference between

ר and ד (Nos. 20 and 4),
ו and ן (Nos. 6 and 14, final form),
ך and ן (Nos. 11 and 14, final forms),
ם and ם (Nos. 13, final form, and 15).

Exercise

Learn the alphabet as a whole and in its five groups backward and forward.

Write the English equivalents of (*i.e.* transliterate) the following Hebrew words.

Note. — Hebrew is written from right to left, hence the word at the *right*-hand end of the first line below is the *first* word, etc.

In writing put the Hebrew words in a column one under the other and place the English equivalents alongside to the right, forming two regular columns.

Write only on every other line.

← אב, אדם, בין, דבר, גם, ויקטל, זהב, תוך, קדש
צדק, פר, אף, עבד, נם, לב, נשא, ארץ.

Write the Hebrew equivalents of (*i.e.* transliterate) the following groups of letters.

Note. — Hebrew words must never be divided, as for instance, at the end of a line.

Write the English forms in a column one under the other, beginning with the *left*-hand word of course, and place the Hebrew equivalents alongside to the right with a space between, forming two regular columns.

Write only on every other line.

→ ih̤, drχ, khn, qδš, šm, nφš, irṣ, mzbh̤, bθ, iṣ,
śr, kφ, sin, rši, lββ, bγδ, lh̤m, mwθ, mym.

Note. — Write final form when required.

Oral Exercise

שכרך, הדברים, האלה, דבר, טפסר, במחזה, אל, תירה, אנכי, טפק, ציץ, מאד, ויאמר, אדני, גום, צבע, ובן, משק, ביתי.

LESSON II

THE VOWEL SIGNS

a. The Vowels are indicated by means of dots and dashes written below the consonants, with two exceptions (1 and 2 below).

1. A single dot written above the left-hand side of the consonant = long *o*, thus בֹ = bō.
2. A single dot in the bosom of ו = long *u*, thus רוּ = rû (roo).
   The wāw is now no longer a consonant, but merely part of the sign for the vowel.
3. A single dot below = short *i*, thus לִ = li (lĕ̆).
4. Two dots horizontally below = long *e*, thus מֵ = mē (may).
5. Two dots below vertically = a faint vowel sound, thus שְׁ = š·.
   This sound is like that of *e* in the first syllable of "believe"; it is represented in English transliteration by a dot above, to the right.
6. Three dots below slantingly = short *u*, thus הֻ = hu (hŏŏ).
7. Three dots below triangularly = short *e*, thus אֱ = ĭe (ă̆y), as *e* in "met."
8. Two dashes below forming a ֵ = long *a*, thus רָ = rā (rah);
   or = short *o*, thus רָ = ro.

NOTE. — Assume that ֵ in any given case = *ā* until certain that it = *o*. (Cf. Less. X, *o*.)

9. A horizontal dash below
= short *a*, thus כַ = ka (*a* as in "cat").
10. No. 9 with two dots vertically to the right
= shortest *a*, thus כֲ = k^{a}.
11. No. 7 with two dots vertically to the right
= shortest *e*, thus כֱ = k^{e}.
12. No. 8 with two dots vertically to the right
= shortest *o*, thus כֳ = k^{o}.

NOTE. — Nos. 10, 11, and 12 in English are written above the line. In pronunciation they are a trifle clearer than No. 5.

Summary

(◌ִ) = ō (long)	(◌ֵ) = · (extra short)	(◌ַ) = a (short)
(וּ) = û (long)	(◌ֶ) = e (short)	(◌ֲ) = ^{a} (extra-short)
(◌ִ) = i (short)	(◌ֻ) = u (short)	(◌ֱ) = ^{e} (extra-short)
(◌ֵ) = ē (long)	(◌ָ) = ā (long) or o (short)	(◌ֳ) = ^{o} (extra-short)

b. NOTE. — Vowel No. 1 (◌ִ)

following ל, is written לִ.

preceding א, is written over the right-hand side of the א, if the א does not begin the next syllable, thus לֹא lōi, רֹאשׁ rōiš, but otherwise בֹּאֵם bō-ʾām.

preceding שׁ, coincides with the dot of the consonant, thus בֹּשׁ bōš.

following שׁ, is written regularly, thus שֹׁם šōm.

preceding שׂ, is written over the right-hand side of the consonant, thus, פֹּשׂ pōś.

following שׂ, coincides with the dot of the שׂ, thus שׂן śōn.

Written Exercise

I

Write in columns first the Hebrew words, then the English equivalents of consonants and vowels, separating syllables by hyphens.

A syllable must always begin with a consonant. Thus:

אֶרֶץ ʾé-reṣ.

אָב, אָדָם, אֶחָד, בֵּן, כֹּהֵן, בַּיִת, חָץ
מֶלֶךְ, מְאֹד, חוּץ, נְאֻם, זָקֵן, תָּו, לֵב

II

Write in columns first the English forms, then the Hebrew equivalents. Do not separate the Hebrew into syllables.

ʾᵉ-lē-hem, lōʾ, hā-lā́-reṣ, w·-lōʾ, šé-*β*er, tā-mû-*θ*û, ʾim, dā-*β*ār.

Oral Exercise

שְׁמַע עֹבֵר לָבֹא לָרֶשֶׁת גְּדֹלֹת וְרָם אֲשֶׁר עֲנָק אֹכְלָה מַחֲר לָךְ אַל
תֹּאמַר בַּהֲדַךְ נֹתֵן עֹרֶף וְכֹר לְמִן מֵאָרֶץ בְּחֹרֵב

LESSON III

a. **THE NAMES OF THE VOWEL SIGNS**

(◌ֹ) ō = Ḥólem (long)
(◌ֻ) û = Šúreq (long)
(◌ִ) i = Ḥíreq (short)
(◌ֵ) ē = Ṣērê (long)
(◌ְ) · = Šᵊ·wā (extra-short)
(◌ֶ) e = Sᵊ·γôl (short)
(◌ֻ) u = * Qibbûṣ (short)
(◌ָ) ā = Qā́meṣ (long)
(◌ָ) o = Qā́meṣ Ḥāṭûφ (short)
(◌ַ) a = Páθaḥ (short)
(◌ֲ) ᵃ = Ḥāṭēφ Páθaḥ (extra-short)
(◌ֱ) ᵉ = Ḥāṭēφ Sᵊ·γôl (extra-short)
(◌ֳ) ᵒ = Ḥāṭēφ Qā́meṣ Ḥāṭûφ (extra-short)

NOTE. — The *ḥ* in these names is always hard (ḥ), the *ṭ* likewise is always dotted (ṭ).

* *Q* pronounced like *k*.

b. There are three classes of vowels:

Long, Short, and Extra-short.

The long vowels are indicated in English by ¯ or ˘ placed above.

NOTE. — The distinction in the use of these will be indicated later (see Less. V).

The short vowels have no mark.

The extra-short vowels are written above the line ◌ֱ, ◌ֵ, ◌ֹ, ◌ׇ.

Written Exercise

Write the following words one under the other and to the right the spelling of each, writing in English the names of consonants and vowels, and finally the English transliteration or equivalent of the word. Thus:

אֶרֶץ, ʾálefɸ, s·γôl, rēš, s·γôl, ṣāδê = ʾé-reṣ

עָוֹן, מְאֹד, נַעַר, יֵשׁ, בַּיִן, אֱמֹר, חוּץ.

LESSON IV

SYLLABLES AND SILENT Š·WĀ

SYLLABLES

a. A syllable is a combination of one or two consonants (rarely three, see *g* below) and one vowel.

b. A syllable must always begin with a consonant.

c. There are two kinds of syllables, open and closed.

An open syllable is one that ends with a vowel.

A closed syllable is one that ends with a consonant.

Thus גָּדַל gā-δal, the first syllable is open, the second closed.

d. The vowel of an open syllable may be long or extra-short*; it cannot be short unless the syllable is accented.

e. The vowel of a closed syllable must be short unless the syllable is accented, when it may be long.

It can never be extra-short. Thus:

יְעָמֵד yē-ʿā-mēδ	זֶרַע zé-raʿ
קָטְלוּ qā-ṭ·-lû	דָּבָר dā-βār

f. As a rule the final syllable is the accented one; this admits of the vowel being long though the syllable be closed.

g. Only a final syllable may end with two consonants, thus:

קָטַלְתְּ qā-ṭalt

Silent Š·wā

h. When a syllable not final is closed, two dots are placed vertically under the consonant that closes the syllable. This sign is called *Silent Š·wā.*

i. Silent Š·wā is not placed under the last consonant of a word (hence מִדְבָּר not מִדְבָּר) except in the case of final ך (to distinguish it from final ן, Nûn), thus: מֶלֶךְ "king"; and unless the word end in two consonants, in which case Š·wā is placed under both, thus: קָטַלְתְּ qā-ṭalt.

j. Though identical in form with vocal Š·wā, the two must be carefully distinguished.

Vocal Š·wā indicates an extra-short vowel.

Silent Š·wā is merely a sign denoting the absence of a vowel, and hence the close of a syllable.

k. Silent Š·wā may be distinguished by the fact that it is preceded by a vowel (short, save in pause, cf. Less. X, *d*), hence it cannot occur under the first consonant of a word.

---

* The sound of the extra-short vowels is not by most grammarians considered to be sufficient to form an independent syllable. It will be found advantageous, however, for the purposes of this Primer, to depart from the common practice in this respect.

l. When two Š·wās are found in succession, save at the end of a word (cf. *i* above), the first is silent, the second vocal.

Written Exercise

I

Transliterate the following words, separating the syllables in English by hyphens. Apply carefully *d* and *e* above. An extra-short vowel is always in an open syllable. A short vowel unaccented is in a closed syllable. A long vowel unaccented is in an open syllable.

מְקֹרָב, תַּחְדַּל, הַלָּחֶן, אֲמַרְתִּ, יְשׁוּעָתְךָ.

NOTE. — Silent Š·wā is not specially represented in English.

II

Transliterate:

miz-mōr, šā-maṭ, mam-lā-χā, šā-má-yim, yiś-rā-ʾēl, nil-ḥam.

NOTE. — When the final syllable of a word is Kaφ and Qâmeṣ, the final form of Kaφ is used and the Qâmeṣ is written in its bosom, thus: ךָ, χā.

Oral Exercise

לְיַחְצְאֵל מִשְׁפַּחַת שְׁנַיִם תְּרוּמַת לְאֶלְעָזָר נְשָׂאֵךְ הֲלַכְתֶּם בְּאֶכֶם וַיִּרְאֶתְךָ בָּאֵשׁ הָאָרֶץ דֶּרֶךְ יַצַן הָעֹמֵד יָבֹא הָחֵל וְהִתְנָר פַּחְדֵךְ.

LESSON V

THE QUIESCENTS AND MAPPÎQ

a. The four letters א, ה, ו, י may lose their consonantal force and be merged into vowels.

This can only take place when a suitable vowel precedes in the same syllable (hence never the beginning of a word).

The consonant is then said to quiesce in the vowel.

b. A quiescent no longer being a consonant cannot close a syllable, and therefore does not take silent Š·wā.

The absence with one of these four letters of succeeding vowel and of silent Š·wā is indication that it quiesces.

c. א may quiesce in any vowel in any position even within a syllable, thus: מָצָא mā-ṣā(ʾ), זֹאת zō(ʾ)θ.

NOTE. — It always quiesces at the end of a word.

d. ה quiesces only at the end of a word and generally in (ָ) or (ַ) or (ֶ) and sometimes (ֹ), thus:

בְּהֵמָה b·-hē-mā(h), יִגְלֶה yi-γ-le(h), שִׁילֹה šî-lō(h).

e. NOTE. — When ה at the end of a word does not quiesce, a dot called *Mappîq* ("sounder") is inserted in it to indicate that it remains a consonant, thus לָהּ lāh.

f. ו quiesces in Ḥôlem.

The two together form the vowel *large* Ḥôlem וֹ = ô, thus:

גָּדוֹל gā-δôl "great."

g. י quiesces in Ḥîreq, Ṣērê, and S·γôl.

With Ḥîreq it forms the vowel *large* Ḥîreq,

ִי = î, thus כְּלִי k·-lî.

With Ṣērê it forms the vowel *large* Ṣērê,

ֵי = ê, thus בֵּין bên.

With S·γôl it forms the vowel *large* S·γôl,

ֶי = ĕ, thus תִּגְלֶינָה ti-γ-lĕ-nā(h).

h. The combination וֹי at the end of a word is pronounced *āw* (ah-oo) and is transliterated ā(y)w, the י quiesces by exception.

i. Šûreq, וּ, belongs to the class of large vowels, that is, those written with a consonant and a vowel sign.

It is transliterated therefore û (not ū).

j. The quiescents that do not form part of large vowels are to be inclosed in parentheses in transliterating, thus:

נִבְלָה n·-βē-lā(h), יֹאמַר yō(ʾ)-mar.

k. The marks ˆ and ˜ in English indicate large vowels.

l. א quiesces even in large vowels, thus:

הַמְצִיא him-ṣî(ʾ).

Written Exercise

Transliterate:

I

נוֹלְדוּ, לֹא, אַל, תֵּיטִיב, קְרוֹאָיו,
צְבָאוֹת, בָּאוּ, בָּרָא, גֵּיא, לוּא, קָלִיא, אָרְאֶה.

II

liq-ra(ʾ)θ, yiš-mā-ʾēl, mā(ʾ)-θá-yim, šā-lû-nî,
ṣ·-βō-ʾîm, lô, b·-yā-mā(y)w, kā-sûy, ʾª-δō-nāy, šā-lēw.

Oral Exercise

אֲדֹנָי הִשְׁלִיךְ שִׁמְעִי וְאֹת שֹׂאֲפִים אֲבִיוֹן לֵאמֹר מָתַי וְנַשְׁבִּירָה
וְנִפְתְּחָה לְהַקְטִין מֹאזְנֵי נִשְׁבַּע בָּאֹר שִׁירֵיכֶם וְשַׁמְּתִיהָ קְטַלְתָּה מַלְכָּה

12/12/11

LESSON VI

DĀTĒŠ FORTE AND LENE

a. A letter doubled in English is not written twice in Hebrew, but a dot is placed in it called *Dāγēš forte* ("strong D.").

One of the two letters indicated by Dāγēš forte closes the preceding syllable, the other begins the following one, thus:

קִטֵּל qiṭ-ṭēl.

b. Š·wā under a doubled letter is always vocal, thus:

מִלְּאוּ mil-l·-lû.

c. NOTE. — Dāγēš forte is often omitted (though implied) in certain consonants when simple vocal Š·wā follows, thus:

וַיְהִי for וַיִּהִי way-y·hî.

d. The dot placed in the six letters בּ, גּ, דּ, כּ, פּ, תּ (cf. Less. I) to indicate that they have the hard sound, *i.e.* are not aspirated, is called *Dāγēš lene* ("light D.").

e. To tell whether the dot in one of these six letters is meant for Dāγēš forte, or Dāγēš lene, *i.e.* whether the letter is doubled or not, notice whether the preceding consonant has a vowel under it; if it has, the Dāγēš is *forte* and the letter is doubled.

The same rule applies in distinguishing Šûreq from Wāw with Dāγēš forte, thus:

צִוָּה = ṣiw-wā(h).

f. When one of the six letters that may be aspirated takes Dāγēš forte, the aspiration is lost for the doubled letter; thus:

לִבּוֹ = lib-bô, not li*β*-*β*ô.

g. Dāγēš lene must be placed in the six letters with which it is used whenever no vowel sound immediately precedes.

Written Exercise

Transliterate:

I

מְבַקְּשִׁים, מְדָבָּר, דִּבֵּר, מְקַטֵּל, יִתְּנוּ

II

bad-dām, lim-maδt, ham-má-yim, l·-*β*ad-dô, mib-b·-nê, hab-b·-liy-yā́-ial, ła-tem, ha-ze(h), ṣuw-wô-θā(h).

Oral Exercise

NOTE. — Pronounce doubled letters distinctly, with a pause between.

וְאָוֶן, עֵינָיו, יִצְפְּנוּ, כְּאַרְיֵה, בְּסֻכָּה, תַּבִּיט, גּוֹיִם, לְבָם, הַמֶּלֶךְ, לְחַלּוֹת, הַצִּילוֹ, הַסַּבָּה, בַּשַּׁקִּים, וַיִּתְּנוּ, הַפְּסִים, לְעָבְדְךָ, אֶקַּבְּצָךְ, וְגַלֶּיךָ, בְּתָבְתָּם, וַיִּכְתֹּב.

LESSON VII

GENERAL VIEW OF THE VOWELS

a. TABLE

Long				Short		Extra-Short	
Unchangeable		Changeable					
Qā́meṣ	(ָ) â	Qā́meṣ (ָ)	ā	Pá*θ*aḥ	(ַ) a	Ḥāṭēφ Pá*θ*aḥ	(ֲ) [a]
Large Ṣērê	(ֵי) ê	Ṣērê (ֵ)	ē	S·γôl	(ֶ) e	Ḥāṭēφ S·γôl	(ֱ) [e]
				Ḥíreq	(ִ) i		
Large S·γôl	(ֶי) ĕ						
Large Ḥíreq	(ִי) î						
Large Ḥṓlem	(וֹ) ô	Ḥṓlem (וֹ)	ō	Qā́meṣ Ḥāṭûφ	(ָ) o	Ḥāṭēφ Qā́meṣ Ḥāṭûφ	(ֳ) [o]
				Qibbûṣ	(ֻ) u		
Šṹreq	(וּ) û						
						Simple Vocal Š·wā	(ְ) ·

b. There are three kinds of Vowels: Long, Short, and Extra-Short.

c. The Long vowels are of two kinds:

(1) Those that cannot be shortened by inflection, *six* in number. They are all, with the exception of Qāmeṣ, written with a quiescent, that is, they are *large* vowels; they are distinguished in English by the circumflex sign ˆ or ˜.

NOTE. — Unchangeable Qāmeṣ is so rare that changeable Qāmeṣ is to be assumed in lack of knowledge to the contrary.

d. (2) Those that may be shortened when the word is inflected, *three* in number.

They are distinguished in Hebrew by not being written with quiescents, and in English by a dash above.

e. As a matter of fact unchangeably long vowels are often written without quiescents ("defective writing"), and, more rarely, changeably long vowels are written with quiescents. Confusion therefore arises in distinguishing changeable and unchangeable long vowels by the orthography alone; in such cases etymology must decide.

NOTE. — Large vowels written defectively should be transliterated thus: (ˆ) (˜).

f. Short vowels in closed syllables not final are unchangeable; in final syllables, though closed, they may be changeable.

g. Short vowels not in closed syllables and extra-short vowels are changeable; that is, short vowels may be lengthened or shortened as the result of inflection, and extra-short vowels may be lengthened.

h. The four extra-short vowels are called *vocal* Š·wās, as distinguished from silent Š·wā.

The first three are also called *composite* Š·wās or Ḥāṭĕφs, and the fourth, simple Š·wā *vocal.*

Written Exercise

Transliterate:

I

קִנָּה: מְלֵאתִיו: לַחְמְךָ: וְיִזְכֹּר: מִבְשָׂרֵיךָ:

II

baṣ-ṣā-ɸôn, b·-χul-lām, w·-hig-gî-îû, hā-ʾe-lō̂-hîm, tim-ṣā-îén-nû.

Reading Exercise

בְּרֵאשִׁית בָּרָא אֱלֹהִים אֵת הַשָּׁמַיִם וְאֵת הָאָרֶץ: וְהָאָרֶץ הָיְתָה תֹהוּ וָבֹהוּ וְחֹשֶׁךְ עַל פְּנֵי תְהוֹם: וַיֹּאמֶר אֱלֹהִים יְהִי אוֹר וַיְהִי אוֹר: וַיַּרְ אֱלֹהִים אֶת הָאוֹר כִּי טוֹב:

LESSON VIII

LENGTHENING AND SHORTENING OF VOWELS

a. (◌ָ) Qā́meṣ (changeable) may be shortened to (◌ַ) Pá*θ*aḥ, (◌ֲ) Ḥāṭeɸ Pá*θ*aḥ, or (◌ֳ) Simple Š·wā.

(◌ֶ) Ṣērê may be shortened to (◌ֶ) Ḥíreq, (◌ֵ) S·γôl, (◌ֱ) Ḥāṭeɸ S·γôl, or (◌ֶ) Simple Š·wā.

(◌ֹ) Ḥôlem may be shortened to (◌ֻ) Qibbûṣ, (◌ָ) Qā́meṣ Ḥāṭûɸ, (◌ֳ) Ḥāṭeɸ Qā́meṣ Ḥāṭûɸ, or (◌ָ) Simple Ŝ·wā.

b. So, conversely, the extra-short and the short vowels may be lengthened, and the short vowels may be shortened:

(◌ֲ) may be lengthened to (◌ָ) and shortened to (◌ֲ) or (◌ֱ).
(◌ֱ) and (◌ֳ) may be lengthened to (◌ֵ) and shortened to (◌ֶ) or (◌ֱ).
(◌ֵ) and (◌ֶ) may be lengthened to (◌ֵ) and shortened to (◌ֶ) or (◌ֱ).

c. In shortening Ṣērê give the preference to Ḥíreq rather than to S·γôl (save under gutturals, cf. Less. IX).

In shortening Ḥôlem give the preference to Qāmeṣ Ḥāṭûφ rather than to Qibbûṣ.

d. Ḥíreq (◌ִ), when lengthened, does not become large Ḥíreq (◌ִי) î; it becomes Ṣērê (◌ֵ).

Qibbûṣ (◌ֻ), when lengthened, does not become Šûreq (◌וּ) û; it becomes (◌ֹ) Ḥôlem.

e. When, as the result of inflection, *two vocal Š·wās* come together, if they are both *simple*, the first one is lengthened to Ḥíreq; if one is composite, the first is lengthened to the same short vowel that is in the composite Š·wā; in either case the second remains vocal. Thus:

לִדְבַר + לְ = לִדְבַר li*-δ·-βar,
לַחֲמֹר + לְ = לַחֲמֹר la*-ḥ^{a}-mōr.

LESSON IX

THE GUTTURALS

a. The four letters א, ה, ח, ע are gutturals. Their peculiarities are of great importance.

b. These letters prefer Páθaḥ and Qāmeṣ to the other vowels.

A final guttural must be preceded by one or the other of these vowels.

Hence when a final guttural would be preceded by a long vowel other than Qāmeṣ, a Páθaḥ is inserted between that vowel and the final guttural.

* For the short vowel in an open syllable, cf. Less. X, *i*, *k*.

This Páθaḥ is called *Páθaḥ Furtive* and is written under the final guttural, but pronounced before it. Thus:

רוּחַ rûaḥ, יַגְבִּיהַ yaγ-bîah.

NOTE. — ה at the end of a word without Mappîq is of course a quiescent and not a guttural.

This Páθaḥ furtive is not a constituent part of the word, but only a help to pronunciation and disappears when any suffix is added, thus: רוּחַ + וֹ = רוּחוֹ rû-ḥô.

c. A guttural cannot be doubled, therefore cannot take Dāγēš forte. Hence if a guttural occurs as one of the letters of a word which by the laws of inflection would require to be doubled and take Dāγēš forte, this is not done, but, instead, the preceding vowel is lengthened, thus: דָּבָר but שָׁאַל not שַׁאַל.

d. Dāγēš forte is said to be implied in a guttural to explain the occurrence of a short vowel in a preceding open unaccented syllable, thus: נִחַם ni[ḥ]-ḥam.

e. Rêš ר shares with gutturals the peculiarity that it cannot be doubled and take Dāγēš forte, hence: בָּרֵךְ not בָּרֵךְ.

f. Gutturals as a rule take *composite* Š·wā instead of *simple* Š·wā, whether vocal or silent. Thus:

קָטַל but עָמַד, מַלְכִּי but נַעֲרֵי na-ʿᵉ-rî.

g. The composite Š·wā most usual with gutturals is (ֲ) but א in the pretone generally takes (ֳ), thus: אֳמַר.

From the above peculiarities it follows that a guttural unless at the end of a word cannot as a rule close a syllable.

Written Exercise

Correct the following words wherever necessary by

1. Inserting Páθaḥ furtive.
2. Substituting composite for simple Š·wā (usually ְ when no other is indicated).
3. Removing Dāγēš forte and lengthening the preceding vowel.
4. Making the appropriate change when two vocal Š·wās come together.

שָׁמַע : עֵבֶר : יִשְׁחָטוּ : שָׁלוּחַ : בָּרַךְ : יְהַפֵּץ : שָׂרִים : טַעֲמוּ :
לְחֶלִי : בִּרְכָה : יְעָמַד : מַשְׁלִיחַ : מְשַׁלַּחַ : נְשָׁלַח : גָּאַל :

10/11/11

LESSON X

THE ACCENTS, MÉΘΕΓ, MAQQĒΦ, AND RĀΦE(H)

I. The Accents

a. The syllable on which falls the stress of the voice, the tone syllable, is indicated in the Hebrew text by means of an accent.

This syllable is usually the last syllable; it may be less frequently the next to the last (the penult); very rarely the antepenult.

The accents are written some above and some below the word.

Some that must be placed at the very end of a word are called *postpositive,* thus: וְרָקָא; some that must come at the very beginning, *prepositive,* thus: יְתִיב.

Accents are either *Disjunctive,* separating words in sense, or *Conjunctive,* connecting them.

b. TABLE OF THE PROSE ACCENTS

Disjunctive

1. (֜) Sillūq, only at the end of the verse with (׃) the verse divider.
2. (֑) Aθnāḥ, at the principal division of the verse.
3 *a.* (֪) S·γôltā, postpositive.
3 *b.* (֡) Šalšéleθ.
4 *a.* (֟) Zāqēφ Qāṭôn.
4 *b.* (֫) Zāqēφ Gāδôl.
5. (֥) Tiφḥā.
6. (֚) R·βîaʿ.
7. (֬) Zarqā, postpositive.
8 *a.* (֠) Pašṭā, postpositive.
8 *b.* (֭) Y·θîβ, prepositive.
9. (֮) T·βîr.
10 *a.* (֯) Géreš.
10 *b.* (ְ) G·rāšáyim.
11 *a.* (ֱ) or (ֲ) Pāzēr.
11 *b.* (ֲ) Pāzēr Gāδôl.
12. (֒) T·lîšā G·δôlā, prepositive.

CONJUNCTIVE

1. (֣) Mûnāḥ.
2. (֡) M·huppāχ.
3 *a*. (֒) Mēr·χā.
3 *b*. (֓) Mēr·χā K·φûlā.
4. (֢) Dargā.
5. (֥) ʾazlā.
6. (֪) T·lîšā Q·ṭannā.
7. (֫) Galgal or Yéraḥ.
8. (֬) Māy·lā.

c. Postpositive accents may be repeated to indicate the tone syllable, thus:

אֲהַבְתָּ lā-ḥáβ-tā.

d. The effect of several of the disjunctive accents especially at the end and at the middle of the verse is to lengthen the vowel of the tone syllable, or to shift the tone backward one syllable, lengthening the vowel in that syllable. The word is then said to be in *Pause*. Thus:

מַיִם, in pause מָיִם; שָׁכְנָה, in pause שָׁכְנָה.
קָטַלְתָּ, in pause קָטַלְתָּ qā-ṭal-tā.

II. MÉΘEr

e. Méθeγ is a vertical line written to the left of a vowel.

When the vowel is Šûreq or Ḥôlem, Méθeγ is written under the preceding consonant, thus:

הָאָדָם hā-lā-δām, יְשׁוּפְךָ y·šû-φ·-χā.

f. Méθeγ marks the secondary tone of a word. (It also has other uses not here considered.)

g. Méθeγ is used with the *first open* syllable, counting from (*i.e.* not including) the pretonic syllable. (The pretonic syllable is the one before the accented syllable.)

This open syllable with Méθeγ may have a long or a short vowel (cf. Less. IV, *d*, Méθeγ serving as a secondary accent) but not an extra-short one.

The presence of Méθeγ therefore shows that the syllable is open. Thus:

יַעֲמֹד yạ-ʿª-mōδ, קָטְלָה qā-ṭ·-lā(h),

אָנֹכִי ʾā-nôˀ-χî, הָאַרְבָּעִים hā-ʾar-bā-ʿîm.

h. Méθeγ may be repeated if the word is long enough by treating the syllable with Méθeγ as the accented syllable, and starting from it to apply the rule again, thus:

וּמְהַתִּיכוֹנוֹת û-mᵉ-hat-tî-χô-nôθ.

i. The rule for using Méθeγ applies uniformly to long vowels.

j. It applies to short vowels (*i.e.* short vowels will have Méθeγ) only when the vowel is followed by a *composite* Š·wā, or by the same vowel in an open syllable, thus:

יֶחֱזַק yẹ-ḥᵉ-zaq, יַעַמְדוּ yạ-ʿa-m·-δû,

but מַלְכֵי (not מַלְכֵי) ma-l·-χê, לִבְבִי (not לִבְבִי) li-β·-βê.

k. 1. A syllable with a short vowel is known to be open when the short vowel has arisen by the coming together of two vocal Š·wās (see Less. VIII, *e*, and below Inflection of Nouns, Less. XXI).

2. That this is the case is often apparent from the fact that the Š·wā following is shown to be vocal by the absence of Dāγeš lene in the succeeding consonant (see Less. VI, *g*). Thus:

מַלְכֵי, לִבְבִי.

l. In the absence of knowledge, or of evidence in the form of the word itself, a doubtful syllable should be assumed to be closed.

Hence חָכְמָה = ḥoχ-mā(h). If the first ָ were ā, Méθeγ would be required (see *i*, above).

m. Méθeγ helps in a measure to differentiate ָ = *ā* from ָ = *o*. Thus:

חָכְמָה = hā-χ·-mā(h) in accordance with *i* and *j* above.

חָכְמָה = hoχ-mā(h) in accordance with *l* above.

n. Hence ◌ָ usually = *ā*.

But, in accordance with *j* above, it is *o̤* when followed by ◌ָ or by another *o*, thus:

פָּרָשִׁים = pā-rā-šîm, but יָעַמֹד = yo̤-ʿo-maδ, פָּעָלְכֶם = po̤-ʿo-l·-χem.

(For the second *o* see *k*, 2 above.)

o. ◌ָ followed by ◌ִ is *o*, not *ā* (see *i* above). Whether the syllable is open or closed depends on *k*. Thus:

קָדְשֵׁי = qo-δ·-šê, but קָדְשִׁי = qoδ-ši.

Only knowledge of inflection can determine that *k*, 1, applies to the former and not to the latter, and thus withdraw it from the application of *l*.

p. ◌ָ in a final accented syllable whether open or closed, and in an open pretone is always *ā*.

q. In accordance with *l* יִרְאוּ = yir-îû, "they will see," but in accordance with *i* and *j*,

יִרְאוּ = yʾi-r·-îû, "they will be afraid,"

defective writing (see Less. VII, *e*) for יִירְאוּ.

r. Méθeγ is always used with the vowel preceding a composite Š·wā.

s. Méθeγ must not be used in closed syllables.

NOTE. — Decide first in any given case whether ◌ָ = *ā* or = *o*; if the latter, whether the syllable is open or closed.

III. MAQQEΦ

t. Maqqēϕ is a hyphen connecting two or more words which as a consequence lose their accents save the last, thus: עַל־בֵּיתוֹ.

Changeably long vowels in closed syllables must be shortened when they thus lose their accent, thus:

כָּל הָעָם but כָּל־הָעָם (kol).

The rule for Méθeγ applies as though the combination were one word, thus:

בֶּן־עַל־כֵּן.

IV. RĀΦE(H)

u. Rāφe(h) is a horizontal stroke placed over a letter to call attention to the fact that Dāγěš forte, or lene, or Mappîq is absent. Thus:

בַּלְכָה, יִקְחוּ yi[q]-q·ḥû.

Written Exercise

I

Insert Méθeγ where required:

אָנכִי: הַמֶּלֶךְ: הֶחָכָם: הַמִּדְבָּר: לַטִּלִּים: מָרְדְּכַי:
גְּחֹנְךָ: הָאָרֶץ: נִדְבַת: דִּבְרֵי:

II

Transliterate:

אֶכְלָה, אָכְלָה, כָּטְלִי, כָּטְלוּ, עָבְדָה, אַכְלֵכֶם, וְהָרָץ.

Oral Exercise

אֲנִי: כְּתָב־לִי: שָׁמָה: שְׁמֵרֵנִי: גָּפְרִית: אֹהֶל: כָּל־אָדָם:
יַעֲרָם: אָרְכוּ: יְחָנֵּנִי: מַלְכֵי: יְשׁוּפְךָ: שָׁמְרָה: אָהֳלִי: מָתְנַיִם:
וַיָּשָׁב: קָדְשֶׁךָ: בְּהִבָּרְאָם: יָרְבְעָם: שְׁמֵרוֹן: קָרְבָּן: תּוֹלְדוֹת:
יֵרְאוּ: מַלְכֵי: יְכָנֶּהָּוּ: *גְּנַבְתִּי: וַאֲבָרְכָה:

LESSON XI

THE ARTICLE

a. There is no indefinite article in Hebrew.

b. The definite article consists of the particle הַ prefixed to a

---

* וֹ defectively written is represented by ו֑.

word together with the insertion of Dāγēš forte in the first consonant of the word, thus:

מֶלֶךְ "king," הַמֶּלֶךְ "the king."

Hence the article properly consists of three parts, (הַ), (-), and (·).

c. If the first letter of the word has Dāγēš lene, when the article is prefixed Dāγēš forte takes the place of Dāγēš lene, thus:

הַ + כֹּהֵן = הַכֹּהֵן hak-kō-hēn.

d. If the word begins with a guttural or ר, the Páθaḥ of the article is lengthened to Qāmeṣ to compensate for the omission of Dāγēš forte, for the open syllable must have a long vowel, thus:

אָב "father," הָאָב "the father."

e. Exceptions. — Before a word beginning with הָ, עָ *not accented*, חָ whether accented or not, and הָ, the article is written with S·γôl, thus:

הֶעָפָר "the dust," but הָעָם "the people."

f. Note. — This S·γôl which takes the place of Qāmeṣ is considered long, and is to be transliterated ę.

g. Before ח or ה with some other vowel than Qāmeṣ, the article is written הַ, thus:

הַחֹשֶׁךְ ha[ḥ]-ḥō-šeχ "the darkness."

Note. — The guttural, in such cases, is said to be implicitly or virtually doubled; the first syllable is not, properly speaking, open, yet is treated as such, and can take Méθeγ (exception to Less. X, *j*); thus:

הֵהֵיכָל "the palace."

Summary I

g. The article is written:

הַ before all letters but gutturals and ר;

הָ before א, הָ, ע, עָ, ר;

הֶ before חָ, חָ, הָ, חָ, עָ;

הַ before ה, ח.

Summary II

Before א the article is written הָ.

Before עֲ עַ ע the article is written הָ.

Before ה הָ הָ the article is written הַ. הָ. הָ.

Before חָ חָ חָ the article is written הָ.

Before ח the article is written הַ.

NOTICE. — Words beginning with ה never have the article pointed with Qāmeṣ.

h. RULE 1. — An adjective qualifying is placed after the noun it qualifies.

RULE 2. — If the word qualified has the article, all its qualifiers must have the article; thus: "The good man" הָאִישׁ הַטּוֹב (literally "The man the good").

RULE 3. — The copula (*is, are,* etc.) will not be expressed in transliterating from English to Hebrew.

RULE 4. — The predicate precedes the subject unless the latter is emphatic.

RULE 5. — The predicate does not take the article.

The conjunction *and* is expressed by וְ prefixed, thus:

"The man and the woman" הָאִישׁ וְהָאִשָּׁה.

Written Exercise

I

Complete the writing of the following words by supplying the vowel that belongs to the article, also Dāγēš forte and Méθeγ, where required.

סִפְרִי, עֲרֵב, עֲבָדִים, יֶלֶד, אֶרֶץ, חָכָם,
אֶחָד, הָר, זָקֵן, חָדָשׁ, הוּא, הָרִים.

II

Translate: The morning [41]. The man [14]. The dust [169]. The light [7] (is) good [88]. A great [47] day [91]. √The word [53]. The hand [89]. The day (is) good. The good day. A good day. The man and the day.

NOTE. — The numbers refer to the vocabulary at the back of the Primer where the corresponding Hebrew words may be found.

10/12/11

LESSON XII

THE PERSONAL PRONOUNS

		Singular		*Plural*	
a.	*1st pers. com. gender,*	אָנֹכִי *or* אֲנִי	I	אֲנַחְנוּ (i[a]-náḥ-nû)	we
	2d pers. masc.	אַתָּה	thou	אַתֶּם	ye
	2d pers. fem.	אַתְּ (iatt)	thou	אַתֶּן	ye
	3d pers. masc.	הוּא	he	הֵם *or* הֵמָּה	they
	3d pers. fem.	הִיא	she	הֵן *or* הֵנָּה	they

b. RULE 6. — Five words, אֶרֶץ "land," "earth" (fem.), פַּר "bull" (masc.), חַג "feast" (masc.), עַם "people" (masc.), הַר "mountain" (masc.), when the article is prefixed, lengthen the first vowel to Qāmeṣ; thus:

הָעָם, הָאָרֶץ.

Written Exercise

Translate:

I

The mountain [64] (is) very [123] great [47]. The man [14] (is) wise [81]. The good [88] and [65] the wise people [167].

II

הָעֶרֶב הַטּוֹב׃ הַשָּׁמַיִם וְהָאָרֶץ׃ טוֹב הָאִישׁ׃ הָעָם אַתֶּם׃
אַתְּ הָאִשָּׁה׃ חָכָם מְאֹד הָאִישׁ׃

Oral Exercise

הַבַּקָּר׃ הָאִישׁ׃ הֶעָפָר׃ הָאוֹר׃ הַיּוֹם הַגָּדוֹל׃ הַיָּד וְהַדָּבָר׃
טוֹב הַדָּבָר׃ הַמֶּלֶךְ הַטּוֹב וְהָאִשָּׁה׃ הָאִשָּׁה וְהֶעָפָר׃ גָּדוֹל מְאֹד
הָהָר׃ הָעָם הַטּוֹב וְהֶחָכָם׃ הוּא וְאָנֹכִי׃ אַתֶּם הָעָם׃ הָאִישׁ אַתָּה׃
הַפֹּר הַגָּדוֹל׃ טוֹב הָאָרֶץ׃

LESSON XIII

DEMONSTRATIVE AND OTHER PRONOUNS

a. The Demonstratives:

	Singular		*Plural*	
Masc.	זֶה this		אֵלֶּה	these
Fem.	זֹאת this		אֵלֶּה	these
Masc.	הוּא that		הֵמָּה *or* הֵם	those
Fem.	הִיא that		הֵנָּה *or* הֵן	those

NOTE. — With the article by exception הָהֵם, הָהֵמָּה (and so the feminines), not הַ.

b. The Relative: אֲשֶׁר "who," "which," indeclinable.

c. The Interrogative: מִי "who?" indeclinable, referring to persons. מַה־ "what," prefixed with Maqqēφ, indeclinable, referring to things.

It is pointed, like the article, with Páθaḥ and Dāγēš forte in the first consonant of the following word, unless the word begins with a guttural, in which case מַה־ is pointed as the article would be before a guttural (cf. Less. XI).

d. Rule 7. — The interrogatives come first in the sentence, as in English. The demonstratives, when predicates, come first, as in English.

e. Rule 8. — The demonstratives, when used as qualifiers, make the noun definite, take the article also themselves, and are placed after any other qualifier, thus:

"This good man" הָאִישׁ הַטּוֹב הַזֶּה.

Written Exercise

Translate:

I

Who (are) these? That day[91]. I (am) the great[47] king[131] who[27] (is) upon[164] the land[25]. This good[88] head[191]. This (is) the good boy[95].

II

הַיּוֹם הַזֶּה: זֶה הָרֹאשׁ הַטּוֹב: הַחֹרֶב הַהִוא: מָה־אַתָּה:

LESSON XIV

THE INSEPARABLE PREPOSITIONS AND THE INTERROGATIVE PARTICLE

a. Three of the inseparable prepositions are:

בְּ "in," כְּ "as," לְ "to" or "for."

They are prefixed to the words they govern.

Note. — In prefixing apply Less. VIII, *e*.

b. These prepositions before the accented syllable frequently lengthen their Šᵊwā to Qāmeṣ (called pretonic Qāmeṣ). Thus:

לְ + לֶדֶת = לָלֶדֶת.

(Do not use pretonic Qāmeṣ in the Exercises.)

c. When the word to which the preposition is prefixed has the article, the consonant of the preposition is substituted for the ה of the article; thus:

הַמֶּלֶךְ "the king," לַמֶּלֶךְ "for the king."

d. Another inseparable preposition is מִן "from."

It is prefixed as follows:

(1) It may be connected by Maqqēφ, thus:

מִן־הַחֶרֶב "from the sword."

(2) It may be attached to the word by assimilating the נ to the first consonant of the word.

If the initial consonant be a guttural and therefore cannot be doubled as the result of the assimilation, the Ḥíreq under the מ is lengthened to Ṣērê, thus:

מִן + הָאִישׁ = מֵהָאִישׁ "from the man."

If the initial consonant be not a guttural, it takes Dāγēš forte and the Ḥíreq remains, thus:

מִן + יוֹם = מִיּוֹם "from a day."

(Compare in-remediable = irremediable.)

e. Rule 9. — The object of a verb when definite usually has the particle אֵת (or אֶת־) before it. This does not affect the translation.

(Use this particle regularly in the exercises whenever permissible.)

f. Rule 10. — The verb usually comes first, then the subject, then the object.

Note. — The root of the verb is not its infinitive as in English, but its third person, singular, masculine, past. Hence the verb "to see" is רָאָה, literally "he saw."

g. Rule 11. — The subject of a verb when a personal pronoun is not expressed unless emphatic.

h. Rule 12. — The negative לֹא "not," when used, precedes the verb, thus:

לֹא רָאָה "he saw not."

i. The Interrogative Particle

To express questions a particle is used called Hê Interrogative. It is prefixed to the first word of the interrogative clause.

Before non-gutturals (including ר), the ה is pointed with Ḥāṭēφ Páθaḥ, thus: הַשָּׁמֶר.

Before a vocal Šᵊwā, simple or composite, and gutturals, ה is pointed with Páθaḥ, thus:

הָאֵלֶּה, הָמְעַט ha-mᵊ-ʕaṭ.

Before gutturals pointed with Qāmeṣ or Ḥāṭeφ Qāmeṣ Ḥāṭûφ, ה is pointed with sᵊγôl, הֲאָנֹכִי "(Is) it I?"

Written Exercise

Translate:

To the slave[160]. In the water[128]. As gold[68]. (He) took[122] the head[191] from the dust[169]. (He) heard[210] not[114] the name[208].

II

רָאָה הָעֶבֶד אֶת־הַזָּהָב: בַּמַּיִם הָאֵלֶּה: לָקַח הַיֶּלֶד
מֵהַזָּהָב אֲשֶׁר רָאָה בָּאָרֶץ: נָתַן הַמֶּלֶךְ אֶת־הָעֶבֶד אֶל־יֶלֶד:

Oral Exercise

לַמַּיִם: לְיֶלֶד: כְּיֶלֶד: לָעֶבֶד: מִמֶּלֶךְ: מֵחַמֶּלֶךְ:
לָאִישׁ: לְ + אֹכֶל: לְ + חֲמוֹר: לְ + הָאוֹר: לְ + הַחֹשֶׁךְ: בְּ + הָעָם:
בְּ + רֶקִיעַ: לְ + מְשׁוֹל: כְּ + דְמוּתֵנוּ: לְ + עֶבֶד: בְּ + חֲרִי: לְ + חָלִי:
מֵהָאָרֶץ: בְּ + הַסּוּף: מֵאִישׁ: מִן־הָאָרֶץ: מִיֶּלֶד: הֲאָנֹכִי: הַקַּטֵל
אָנִי:

LESSON XV

a. **THE VERB: THE PERFECT**

NOTE. — The verbal forms in their order are to be memorized.

	Singular		*Plural*
3*d p. m.*	קָטַל he killed	3*d p. c.*	קָטְלוּ they killed
3*d p. f.*	קָטְלָה she killed		
2*d p. m.*	קָטַלְתָּ thou killedst	2*d p. m.*	קְטַלְתֶּם ye killed
2*d p. f.*	קָטַלְתְּ thou killedst	2*d p. f.*	קְטַלְתֶּן ye killed
1*st p. c.*	קָטַלְתִּי I killed	1*st p. c.*	קָטַלְנוּ we killed

b. These different persons and numbers are formed from the root by means of affixes that are fragments of personal pronouns.

Singular		*Plural*	
3 *p. m.*	——	3 *p. c.*	וּ——
3 *p. f.*	ה֫——		
2 *p. m.*	תָּ——		תֶּם——
2 *p. f.*	תְּ——		תֶּן——
1 *p. c.*	תִּי——		נוּ——

All these affixes begin with a consonant save ה֫— and וּ.

c. Before affixes beginning with a vowel (vocalic affixes) the preceding (second) vowel of the root is reduced to Š·wā.

This may be called the *Verbal Law.* Note the Méθeγ.

d. The vocalic affixes, and the consonantal affixes תֶּם and תֶּן, are the only ones that take the accent.

e. The first radical (that is, letter, consonant) of the root has Qāmeṣ throughout, save in the two forms with the accented consonantal affixes.

Written Exercise

Translate:

I

Ye (fem.) weaned[49]. We remembered[69]. Thou (masc.) wentest[100] down. They went down. I fell[150]. She sat[102]. The man[14] fell in the water[128].

II

יָשַׁב הַמֶּלֶךְ בֶּעָפָר: יָשַׁבְתִּי: נְפַלְתֶּם:
כָּרַתְנוּ: זָכְרָה: יָלְדָה הָאִשָּׁה יָלָד:

Oral Exercise

קָטַל "to kill," מָשַׁל "to rule," גָּנַב "to steal."

קָטַלְתָּ: גָּנַבְתִּי: מְשַׁלְתֶּם: קָטְלוּ: קָטְלָה: מְשַׁלְתָּ: מְשַׁלְתָּן:
גָּנְבָה: מְשַׁלְתְּ: מָשְׁלָה: גָּנַבְנוּ: קְטַלְתִּי: מָשְׁלוּ: גְּנַבוּ: גְּנַבְנוּ:
מָשַׁל: גְּנַבְתִּי: קְטַלְתֶּם: גְּנַבְתֶּן: גָּנְבָה: קְטַלְתְּ: גְּנַבְתְּ: מְשַׁלְנוּ:

LESSON XVI

a. **THE VERB: THE IMPERFECT**

		Singular	*Plural*	
3 *p. m.*	יִקְטֹל (yiq*-ṭōl)	he will kill	יִקְטְלוּ	they will kill
3 *p. f.*	תִּקְטֹל	she will kill	תִּקְטֹלְנָה	they will kill
2 *p. m.*	תִּקְטֹל	thou wilt kill	תִּקְטְלוּ	ye will kill
2 *p. f.*	תִּקְטְלִי	thou wilt kill	תִּקְטֹלְנָה	ye will kill
1 *p. c.*	אֶקְטֹל	I will kill	נִקְטֹל	we will kill

b. These different persons and numbers of the Imperfect are formed from the root by means of prefixes and affixes, fragments of the personal pronouns.

	Singular	*Plural*
3 *p. m.*	יְ——	יְ——וּ
3 *p. f.*	תְּ——	תְּ——נָה
2 *p. m.*	תְּ——	תְּ——וּ
2 *p. f.*	תְּ——ִי	תְּ——נָה
1 *p. c.*	אְ——	נְ——

* The first syllable throughout the Imperfect is closed.

c. In the singular only one form has an affix. In the plural only one form is without an affix.

d. The ending וּ indicates a plural masculine.

e. Notice the *Verbal Law* (Less. XV, *c*) in forms with vocalic affixes.

f. Only two forms are not accented on the final syllable, those ending in נָה.

g. The forms called *Perfect* (Less. XV) describe actions or states conceived as completed; the forms called *Imperfect* describe actions or states conceived as in process, incomplete. These Tenses (?) therefore have no direct reference to time as past, present, or future; but, for practical purposes, the perfect may be rendered by the English past, and the imperfect by the English future (or present).

Written Exercise

Translate:

I

He will write [112]. We will write. She will steal [50]. They (f.) will steal. Thou (m.) wilt reign [130].

II

תִּכְתְּבוּ: תִּגְנֹבְנָה: אֶמְלֹךְ: יִמְכְּרוּ: תִּלְכֹּד: יִזְכֹּר: נִכְרֹת:

NOTE. — Dāγēš lene, in the first letter of גָּנַב, כָּתַב, etc., of course is removed when, after a prefix, the letter no longer begins, but closes, a syllable. The letter that begins the second syllable of the imperfect takes Dāγēš lene when admissible because the first syllable is closed.

Oral Exercise

יִקְטֹל: תִּקְטְלִי: אֶקְטֹל: נִמְשֹׁל: נִקְטֹל: יִקְטְלוּ: כִּתְבוּ: יִמְשְׁלוּ:
יִגְנֹב: תִּכְתֹּבְנָה: תִּכְתֹּב: אִכְתֹּב: יִמְשְׁלוּ: נִכְתֹּב: תִּגְנְבוּ:
תִּמְשְׁלִנָה: תִּכְתְּבִי: כָּתְבָה: כִּתְבְתֶּם:

LESSON XVII

THE JUSSIVE, WĀW CONSECUTIVE, ETC.

a. The 3d and 2d persons of the Imperfect may express not only incomplete action historically, but also a desired action, a command, or a wish.

The form with this jussive or desiderative meaning does not differ from the ordinary Imperfect.

(This statement will need to be completed later on.)

Thus:

יִקְטֹל = "he will kill" or "let him kill."

b. The negative that is used with the Jussive is always אַל, not לֹא. Thus:

לֹא יִקְטֹל "he will not kill," אַל־יִקְטֹל "let him not kill."

c. The ending ה, added to the 1st person singular or plural of the Imperfect forms the *Cohortative.* It expresses desire or intention. Thus:

אֶקְטְלָה "I must kill," "let me kill."

(Notice the Verbal Law, Less. XV, *c.*)

d. The conjunction וְ prefixed to the *Perfect* gives to the form the force of the Imperfect, and usually throws the accent forward on the last syllable (but not in the case of the 1st person plural). Thus:

וְקָטַלְתָּ "and thou wilt kill," not "and thou hast killed."

This וְ is called *Wāw Consecutive of the Perfect.*

e. The conjunction וְ pointed like the article וַ, when prefixed to the Imperfect (the Jussive form when that differs from the ordinary Imperfect [see Less. XXXI, *b*, 3]), gives to the form the force of the Perfect. The accent is drawn back on the penult if the penult is an open syllable. Thus:

וַיִּקְטֹל "and he killed," not "and he will kill," וַיֹּאמֶר "and he said."

Before a guttural וַ = וָ; thus:

וָאֶקְטֹל "and I killed."

This וַ is called *Wāw Consecutive of the Imperfect.*

f. These uses of the conjunction are peculiar to the Hebrew, and form one of the most important features of its Syntax.

g. וַ is never used with the Perfect.

h. The conjunction וְ prefixed to the Jussive or Cohortative, especially if a Jussive or Imperative precedes, expresses purpose or design. It is called *Wāw Subordinate.* Thus:

וְאֶקְטְלָה "that I may kill."

i. The conjunction וְ prefixed to the ordinary Imperfect does not affect the force of the verb; it is merely Wāw connective or conjunctive.

j. The conjunction וְ "and" is also used before other parts of speech, as has been seen.

k. It is sometimes pointed with Qâmeṣ when in the syllable before the accented one; thus:

וָרָע "and evil."

(Cf. Less. XIV, *b.*)

l. Before the labials (פ, מ, ב) and before simple Š·wā vocal, it becomes וּ (Šûreq). This is true of Wāw Consecutive of the Perfect also. Thus:

וּמֶלֶךְ "and a king," וּלְכֹל "and to all," וּמָכַר "and he will sell."

m. NOTE. — This is the only exception to the rule that a syllable cannot begin with a vowel.

n. This Šûreq does not follow the rule for Méθeγ (Less. X, *g*), hence וּבָנִים not וְבָנִים, unless a *composite* Š·wā follow.

Summary

Perf.	+ וְ	= Wāw Consec.	= "and he will . . ."
Imperf.	+ וַ	= Wāw Consec.	= "and he did . . ."
Imperf.	+ וְ	= Wāw Connect.	= "and he will . . ."
Juss. / Cohort.	+ וְ	= Wāw Subord.	= "that he (I) may . . ."

LESSON XVIII

THE VERB: THE IMPERATIVE, THE INFINITIVE, AND THE PARTICIPLES

a. THE IMPERATIVE

	Singular		*Plural*	
2 *p. m.*	קְטֹל	kill thou	קִטְלוּ (qi-ṭ·lû)	kill ye
2 *p. f.*	קִטְלִי (qi-ṭ·lî)	kill thou	קְטֹלְנָה	kill ye

b. These forms are obtained from the corresponding forms of the Imperfect by removing the prefixes.

תִּקְטֹל = קְטֹל, תִּקְטְלִי = קִטְלִי.

c. There is no Méθeγ in the open syllable preceding vocal Š·wā pretonic according to Less. X, *i*.

d. The Imperative cannot be used with a negative; the Jussive is used instead. Thus:

"Do not (thou) kill" = אַל־תִּקְטֹל, not לֹא קְטֹל or אַל־קְטֹל.

e. Additional emphasis is given to the masculine singular by adding the ending הָ, thus:

קְטֹל + הָ = קָטְלָה qo-ṭ·-lā(h) "O kill thou!"

f. THE INFINITIVES

Infinitive Construct	*Infinitive Absolute*
קְטֹל q·-ṭōl "to kill"	קָטוֹל or קָטֹל qā-ṭôl "to kill"

g. The Infinitive Construct may have prefixes and suffixes. The Infinitive Absolute does not.

h. The Infinitive Construct is generally used with the preposition לְ "to." Thus:

לְ + קְטֹל = לִקְטֹל liq-ṭōl.

i. NOTE. — In such cases by exception to Less. VIII, *e*, the second Š·wā becomes silent.

THE PARTICIPLES

Active	*Passive*
קֹטֵל q'ô-ṭēl "killing"	קָטוּל "killed"

These are inflected as nouns.

NOTE. — The entire verb קָטַל will be found on p. 40, 1st col.

For the Oral Exercise see at end of Less. XIX.

LESSON XIX

STATIVE OR INTRANSITIVE VERBS

a. Stative verbs are so called because they usually describe the state or condition of the subject. They are also called intransitive, which means that they do not take objects.

b. While the root of the active (or transitive) verb has Páθaḥ in the second syllable, stative verbs usually have Ṣērê or Ḥôlem, thus: כָּבֵד "to be heavy," קָטֹן "to be little."

(These are the type verbs for Intransitives; their forms are to be committed to memory.)

NOTE. — There are more verbs in Ṣērê than in Ḥôlem.

c. PECULIARITIES OF STATIVE VERBS

Perfect. — Verbs in Ṣērê: The Ṣērê appears only in the third person, masculine, singular, the other forms are pointed like קָטַל.

Verbs in Ḥôlem: The Ḥôlem is retained before consonantal affixes save those that are accented, when it becomes Qámeṣ Ḥāṭûφ. Thus:

קָטֹנְתָּ, קְטָנְתֶּם q·-ṭon-tem.

d. NOTE. — The Perfect of Intransitive verbs may be rendered by the English present, but the past will be employed as usual in the exercises to avoid ambiguity.

e. Imperfect. — Verbs in Ṣērê and Ḥôlem both take Páθaḥ in the second syllable instead of Ḥôlem, thus:

יִכְבַּד, יִקְטַן.

Imperative. — Follows the Imperfect, taking Páθaḥ.

f. Infinitive Construct. — Follows the Imperfect (or more usually takes Ḥôlem like the active verb), thus:

כְּבַד, קְטַן.

g. The Participle. — There is but one and it is like the root, כָּבֵד, קָטֹן.

Written Exercise

Translate:

I

And he was holy[182]. And he will be holy. Ye (m.) were little[185]. We are able[93]. I am old[73]. Let them (f.) draw near[189]. Let them (m.) not draw near. And the woman[26] wrote[112] in the great[47] book[158]. And the king[131] will descend[100] to the water[128].

NOTE. — The verb comes first with Wāw Consecutive, then the subject.

II

קִבְּרוּ׃ וְקִבַּרְתִּי׃ וַיְזַקֵּן׃ וַיְקַדֵּשׁוּ׃ קִדַּשׁוּ׃ וְכָלְתָּ׃

Participles	*Active,*	קֹטֵל		כָּבֵד		קָטֹן		
	Passive,	קָטוּל						

LESSON XX

INFLECTION

a. I. Inflection in General

By inflection is meant the changes that words undergo to express number, gender, syntactical relations, etc.

These changes are effected chiefly by the addition of affixes and prefixes, and by modifications in the length of changeable vowels.

An understanding of the laws of the tone is of prime importance in this connection.

b. **The Laws of the Tone**

The Verbal Law (Less. XV, *c*) requires the vowel of the pretone, if open, to be extra-short, and that of the antepretone, if open, to be long, thus:

קָטְלָה qā-ṭ·-lā(h).

The Nominal Law requires the vowel of the pretone, if open, to be long, and the vowel of the antepretone, if open, to be extra-short, thus:

זְקֵנִים z·-qē-nîm.

Note. — It will be seen that these laws apply only to open syllables.

c. Remarks. — The vowel of the tone syllable is usually long whether open or closed, both in verbs and in nouns.

d. The pretone, if open, may be long or extra-short.

e. The antepretone, if open, is long when the pretone is extra-short, and extra-short when the pretone is long.

f. The extra-short pretone is found more frequently in verbs, hence the expression, *Verbal Law.*

g. The long pretone is found more frequently in nouns, hence the expression, *Nominal Law.*

h. Closed syllables other than final being unchangeable (Less. VII, *f*) are not affected by inflection.

II. The Four Classes of Nouns

Note. — Under the term *nouns* throughout are also included adjectives, participles, etc. The description following refers to the Absolute Singular (see *o*, below).

i. Class I. — Nouns containing at least one changeable Qāmeṣ, thus:

זָקֵן "old," גָּדוֹל "great," דָּבָר "word."

This includes all nouns having the feminine ending ה֫, no matter to what class their masculines may belong.

מַלְכָּה "queen," קְטֻלָּה זְקֵנָה

j. Class II. — Nouns accented on the Penult (except מַיִם and שָׁמַיִם). Thus:

מֶלֶךְ "king," נַעַר "lad."

k. Class III. — Nouns whose last vowel is Ṣērê with pretone unchangeable. Thus:

קֹטֵל q'ô'ṭēl "killer," מִסְפֵּד "mourning."

l. Class IV. — Nouns ending in ה֥; these may also belong to the first class. Thus:

שָׂדֶה "field."

m. Besides the nouns that fall under one of these four classes there are those containing no changeable vowels, which therefore undergo no internal changes when inflected, nouns that double the final letter before suffixes and some others.

III. The Absolute and the Construct States

n. The genitive and similar relations are expressed as a rule not by connecting the two terms by a preposition, but by placing the noun expressing the thing possessed immediately in front of the noun expressing the possessor and putting the former in the *Construct State.*

o. A noun not in the Construct State is said to be in the *Absolute State.* The Absolute is the usual state of the noun, as found in the Lexicon, etc.

Rules for Forming the Construct of Singular Nouns

p. Class II and III. — The Construct is the same as the Absolute.

q. Class IV. — Change S·γôl of last syllable to Ṣērê.

r. Class I. — Begin at the right hand and shorten the vowels as much as possible. (See Less. VIII.)

Note. — The Nominal Law (Less. XX, *b*) does not apply to the Construct.

Thus: דָּבָר, construct דְּבַר. The first Qāmeṣ is shortened as much as possible, to Š·wā; the second Qāmeṣ can only be shortened to Páθaḥ, for the closed syllable must contain at least a short vowel.

Examples

גָּדוֹל,	construct	גְּדוֹל,	ו is unchangeable.
מִדְבָּר,	"	מִדְבַּר,	first syllable unchangeable.
שָׂדֶה,	"	שְׂדֵה,	belongs to Cl. I and IV.
לֵבָב,	"	לְבַב.	
זָבָר,	"	זְבַר.	
זָקֵן,	"	זְקַן,	not זְקֵן or זָקֵן, and so with other words having Qāmeṣ and Ṣērê.

s. Rule 13. — The noun in the construct though definite must *never* take the article, thus:

"The word of the man," דְּבַר הָאִישׁ.

t. Rule 14. — No word or particle must come between the construct and the word governing it. Hence an adjective qualifying the construct must come *after* the governing word and its modifiers

(if any), agreeing with the construct in gender and number but *not in state.* Thus:

"The good word of the woman," דְּבַר הָאִשָּׁה הַטּוֹב.

u. Rule 15. — Qualifiers of a word in the absolute agree with it in number, gender, and state.

v. The presence or absence of the article with the governing noun decides whether the construct is to be regarded as definite or not. Thus:

סוּס מֶלֶךְ "A horse of a king," סוּס הַמֶּלֶךְ "The horse of the king."

Written Exercise

I

Write the following words in columns, and in parallel columns state the class to which they belong and give the constructs:

מַצָּב: כֹּהֵן (kʿô-hēn): בֹּקֶר: מָקוֹם: נָדִיב: סוּס:
צַדִּיק: טוֹב: קוֹנֶה: כּוֹכָב: מְקֻנָּה: מוֹשֵׁל:

II

Translate:

The place[138] of the star[106]. The flock[140] of the righteous[180] man[14]. The good[88] horse[156] of the woman[26].

For Oral Exercise, see close of Less. XXII.

LESSON XXI

AFFIXES OF NUMBER AND GENDER

Inflection of Nouns of the First Class

a. There are three numbers, Singular, Plural, and Dual.

b. There are two genders, Masculine and Feminine.

c. The numbers, plural and dual, and the gender, feminine, are indicated by means of affixes which differ in the absolute and the construct.

Table of Affixes for Number and Gender for All Classes of Nouns

	Singular		*Plural*	
	Masculine	Feminine	Masculine	Feminine
Absolute	———	(ה֫ـ) ā(h)	(ים ـ) îm	(וֹת) ôθ
Construct	———	(ת ـ) aθ	(י ـ) ê	(וֹת) ôθ

	Dual	
	Masculine	Feminine
Absolute	(ַיִם ـ) á-yim	(ַתַיִם ـ) ā-θá-yim
Construct	(י ـ) ê	(תֵי ـ) ·-θê

NOTE. — Nouns found with the ending ה֫ are shown by that ending to be feminine singular absolute.

d. To form any particular number, gender, etc., it is not sufficient to provide the appropriate affix; certain changes in the word are rendered necessary by the new syllable that is attached. These changes vary for each of the four classes.

General Directions for Inflection

e. 1. Determine the class to which the word belongs.
2. Mark the gutturals, if any, by a cross above, thus: חָכְמָה. This is simply to call attention to them.
3. If the word belongs to class II, III, or IV *prepare it* for the reception of an affix by following the rules given for each class.
4. To form an Absolute:
   (*a*) Add the appropriate affix.
   (*b*) Shorten the antepretone if possible. (Nominal Law.)
5. To form a Construct:
   (*a*) Substitute the appropriate affix.
   (*b*) Shorten the vowels as much as possible, beginning at the right.

Inflection of Nouns of Class I

f. Rule for the Absolute. — Add to the masculine singular the appropriate affix, then apply the *Nominal Law* (Less. XX, *b*), that is, reduce the vowel of an open antepretone to Š·wā.

g. Rule for the Construct. — Change the affix (if any) of the absolute form to the corresponding affix for the construct, then apply the rule for forming the construct (Less. XX, *r*), that is, begin at the right and shorten the vowels as much as possible.

In both cases (*f* and *g*) apply the rule for two contiguous vocal Š·wās (Less. VIII, *e*).

Example

h.	*Singular*		*Plural*		*Dual*	
	m.	f.	m.	f.	m.	f.
Abs.	דָּבָר	(דְּבָרָה)	(דְּבָרִים)	(דְּבָרוֹת)	(דְּבָרַיִם)	(שְׂפָתַיִם)
		דְּבָרָה	דְּבָרִים	דְּבָרוֹת	דְּבָרַיִם	שְׂפָתַיִם
Const.	דְּבַר	(דְּבָרַת)	(דְּבָרֵי)	(דְּבָרוֹת)	(דְּבָרֵי)	(שִׂפְתֵי)
		(דְּבָרַת)	(דְּבָרֵי)	דִּבְרוֹת	(דְּבָרֵי)	שִׂפְתֵי
		דִּבְרַת	דִּבְרֵי	di-β·-rôθ	דִּבְרֵי	śi-φ·-θê
		di-β·-raθ	di-β·-rê		di-β·-rê	

Note. — The forms in parentheses are merely intermediate steps.

Observe in the Absolute the long vowel of the pretone.

Written Exercise

Inflect after the same manner but omitting the dual feminine.

זָקָר, נָדִיב, מַצָּב.

For Oral Exercise, see close of Less. XXII.

LESSON XXII

INFLECTION OF NOUNS OF CLASS I CONTAINING GUTTURALS

NOTE. — Review Less. IX on the Gutturals.

Nouns containing gutturals are inflected after the manner indicated in the preceding section save for such differences as the peculiarities of gutturals require.

Inflection of חָכָם "wise." First Consonant a Guttural

	Singular		*Plural*		*Dual*	
	m.	f.	m.	f.	m.	f.
Abs.	חָכָם	חָכְמָה	חֲכָמִים	חֲכָמוֹת	חֲכָמַיִם	
Const.	חֲכַם	(חָכְמַת)	(חֲכָמֵי)	(חֲכָמוֹת)	(חֲכָמֵי)	
		(חָכְמַת)	(חֲכָמֵי)	חָכְמוֹת	(חֲכָמֵי)	
		חָכְמַת	חֲכָמֵי	ḥa-χ'-môθ	חַכְמֵי	
		ḥa-χ'-maθ	ḥa-χ'-mê		ḥa-χ'-mê	

Inflection of רָעָב "hunger." Second Consonant a Guttural

	Singular		*Plural*		*Dual*	
	m.	f.	m.	f.	m.	f.
Abs.	רָעָב	רְעָבָה	רְעָבִים	רְעָבוֹת	רְעָבַיִם	
Const.	רְעַב	(רְעָבַת)	(רְעָבֵי)	(רְעָבוֹת)	(רְעָבֵי)	
		(רְעָבַת)	(רְעָבֵי)	רַעֲבוֹת	(רְעָבֵי)	
		רַעֲבַת	רַעֲבֵי		רַעֲבֵי	

Inflection of רָשָׁע "wicked." Third Consonant a Guttural

The inflection of words of this type differs in no respect from that of words without gutturals.

Written Exercise

I

Inflect, after the same manner and arrangement:

חָזָק "strong," נָחָשׁ "serpent," רָשָׁע "wicked."

II

Translate: He wrote[112] in[32] the book[158] of the prophets[146]. The two hands[89] (dual) of the great[47] king[131]. Do not (thou, *m.*) kill[184] the good[88] boy[95] of the woman[26].

Oral Exercise, Less. XX, XXI, and XXII

זָכָר: זְכַר: חֹדֶשׁ: חָכָם: חֶלֶק: יָד: יוֹבֵל: גָּדוֹל: גְּדוֹל: עֹלֶם: צַדִּיק: צַעַל: שִׁפְט: שֹׁרֶשׁ: רֹעָה: רֹעֶה: זְכָרִים: וכרי: דברָה: דִּבְרַת: דִּבְרוֹת: רעבי: מצבים: כּוֹכְבֵי: חכמָה: חכמת: חכמות: רִשְׁעִים: רִשְׁעֵי: רשעת: רשעות: חזקים: חזקי: חזקת: נחשת: נחשי: נחַשׁ: חֹזֶק: עִפַּר: נביאַי הארץ: אדמה: אדמת: ברכת: ברכות:

LESSON XXIII

INFLECTION OF NOUNS OF CLASS II

a. Nouns of Class II comprise all those accented on the penult (the next to the last syllable) no matter what their vowels.

They are of three kinds, after the three types:

מֶלֶךְ "king," סֵפֶר "book," בֹּקֶר "morning."

b. Nouns of Class II are also called *Segholates* because of the S·γôl usually found in the second syllable.

c. Nouns of the first type are called Segholates in *a* (Páθaḥ), because the first S·γôl is derived from an original Páθaḥ.

Nouns of the second type are called Segholates in *i* (Ḥíreq), because the Ṣērê is derived from an original Ḥíreq.

Nouns of the third type are called Segholates in *o* (Qāmeṣ Ḥāṭûφ), because the Ḥôlem is derived from an original Qāmeṣ Ḥāṭûφ.

d. In each case the final S·γôl is a helping S·γôl; that is, it is not a constituent part of the original root (which is supposed to have had but one vowel), but is inserted to help the pronunciation.

Hence this helping S·γôl disappears before affixes.

(Cf. Páθaḥ furtive, Less. IX, *b*.)

NOTE. — Some nouns with S·γôl in the first syllable belong to the *i* class. When this is the case, attention will be called to it.

Inflection of Nouns of Class II

e. 1. The construct of the singular is the same as the absolute.

f. 2. In the singular, before receiving an affix, the word is to be prepared as follows:

The helping S·γôl is replaced by silent Š·wā, and the vowel of the first syllable (֫), (֬), (֭) gives place to the type (the original) vowel (֬), (֭), (֫). The first syllable, therefore, is now closed. Thus:

מַלְכְּ becomes מַלְכ		mal-k
סִפְּר becomes סִפְר		siφ-r
בֹּקְר becomes בֹּקְר		boq-r

g. It is to these monovocalic forms that the affix is appended and the penult now is no longer the accented syllable, thus:

מַלְכְּ + ה֫ = מַלְכָה mal-kā(h) "queen."

h. 3. To form the *plurals absolute*, both masculine and feminine, remove all the vowels of the singular (this includes the quiescent ה of the feminine, and Dāγēš lene if there is one in the third

radical), then place vocal Š·wā under the first consonant, Qāmeṣ under the second, and add the plural affix (that is, follow the analogy of nouns of Class I). Thus:

בְּקָרִים, סְפָרִים, מְלָכִים, מְלָכוֹת.

i. To form the *plurals construct* treat the plurals absolute as in Class I. (Less. XXI, *g.*)

j. 4. The *dual* (masculine and feminine) is formed from the prepared root of the *singular* by adding the appropriate dual suffix, thus:

מַלְכָתַיִם, מַלְכַיִם.

k. 5. When two vocal Š·wās come together, and a short vowel must take the place of the first one, the vowel of the *type* to which the word belongs is used, thus:

מֶלֶךְ, m. pl. abs. מְלָכִים, const. (מִלְכֵי) מַלְכֵי ma-l·-χê, not מִלְכֵי.
בֹּקֶר, m. pl. abs. בְּקָרִים, const. (בִּקְרֵי) בָּקְרֵי bo-q·-rê, not בִּקְרֵי.

Examples

l. INFLECTION OF NOUNS OF THE *a* TYPE: מֶלֶךְ "king"

	Singular		*Ptural*		*Dual*	
	m.	f.	m.	f.	m.	f.
Abs.	מֶלֶךְ	מַלְכָּה	מְלָכִים	מְלָכוֹת	מַלְכַיִם	מַלְכָתַיִם
Const.	מֶלֶךְ	מַלְכַת mal-ka*θ*	(מִלְכֵי) (מִלְכֵי) מַלְכֵי ma-l·-χê	(מִלְכוֹת) מַלְכוֹת ma-l·-χô*θ*	מַלְכֵי mal-kê	מַלְכֵתֵי mal-k·-*θ*ê

Note the presence of *Dāgēš lene* in the third radical letter of the singular and dual forms with affixes, and its absence in the plurals, because, in the singular and dual forms, the first syllable is closed, and, in the plural, it is open.

m. INFLECTION OF NOUNS OF THE *i* TYPE: סֵפֶר "book"

	Singular		*Plural*		*Dual*	
	m.	f.	m.	f.	m.	f.
Abs.	סֵפֶר	סִפְרָה	סְפָרִים	סְפָרוֹת	סִפְרַיִם	סִפְרָתַיִם
Const.	סֵפֶר	סִפְרַת siϕ-raθ	(סִפְרֵי) (סִפְרֵי) סִפְרֵי si-ϕ·-rê	(סִפְרוֹת) סִפְרוֹת si-ϕ·-rôθ	סִפְרֵי siϕ-rê	סִפְרָתֵי siϕ-r·-θê

n. INFLECTION OF NOUNS OF THE *o* TYPE: בֹּקֶר "morning"

Abs.	בֹּקֶר	בְּקֵרָה	בְּקָרִים	בְּקָרוֹת	בְּקָרַיִם	בְּקָרָתַיִם
Const.	בֹּקֶר	בְּקֵרַת boq-raθ	(בְּקָרֵי) (בְּקָרֵי) בְּקָרֵי bo-q·-rê	(בְּקָרוֹת) בְּקָרוֹת bo-q·-rôθ	בְּקָרֵי boq-rê	בְּקָרָתֵי boq-r·-θê

Written Exercise

Inflect, after the same manner:

יֶלֶד "boy," פֶּשֶׁת "flax," שֹׁרֶשׁ "root."

For Oral Exercise, see close of Less. XXIV.

LESSON XXIV

INFLECTION OF NOUNS OF CLASS II CONTAINING GUTTURALS

(Review Less. IX on Gutturals.)

NOTE. — When the guttural takes a Š·wā, the composite Š·wā of the *type* to which the word belongs must be used.

a. Inflection of Nouns having as *First* Letter a Guttural

(1) *a* type: אֶבֶן "stone," like מֶלֶךְ save in plu. abs. אֲבָנִים, אֲבָנוֹת.

(2) *i* type: עֵשֶׂב "grass":

	Singular		*Plural*		*Dual*	
	m.	f.	m.	f.	m.	f.
Abs.	עֵשֶׂב	עֵשָׂבָה	עֲשָׂבִים	עֲשָׂבוֹת	עֲשָׂבַיִם	עֶשְׂבָּתַיִם
Const.	עֵשֶׂב	עֵשְׂבַת	עֲשָׂבֵי	עֲשָׂבוֹת	עֲשָׂבֵי	עֶשְׂבָּתֵי

Note that the guttural prefers (ֲ) to (ַ), but (ֲ) to (ָ).

(3) *o* type: חֹדֶשׁ "month," like בֹּקֶר save in plu. abs. חֳדָשִׁים, חֳדָשׁוֹת.

b. Inflection of Nouns having as *Second* Letter a Guttural

(Particular attention is to be paid to these.)

Note the helping Páθaḥ instead of S·γôl in the second syllable of בַּעַל and פֹּעַל and the retention of the original Páθaḥ in the first syllable of בַּעַל.

(1) *a* type: בַּעַל "master":

	Singular		*Plural*		*Dual*	
	m.	f.	m.	f.	m.	f.
Abs.	בַּעַל	בְּעָלָה	בְּעָלִים	בְּעָלוֹת	בְּעָלַיִם	——
Const.	בַּעַל	בַּעֲלַת	בְּעָלֵי	בְּעָלוֹת	בְּעָלֵי	——

(2) *i* type. There are no examples.

(3) *o* type: פֹּעַל "work":

Abs.	פֹּעַל	פְּעֻלָּה	פְּעֻלִים	פְּעֻלוֹת	פְּעֻלַיִם	——
Const.	פֹּעַל	פְּעֻלַּת	פְּעֻלֵי	פְּעֻלוֹת	פְּעֻלֵי	——
		poʻ-ʻo-laθ	poʻ-ʻo-lê	poʻ-ʻo-lôθ	poʻ-ʻo-lê	

Note the composite Š·wā of the *o* type. This is used with words of this type under the first or the second radical letters (if guttural), but not under the third where the usual Ḥātēφ Páθaḥ is preferred.

c. Inflection of Nouns having as *Third* Letter a Guttural

(1) *a* type: זֶרַע "seed," like מֶלֶךְ save in dual fem. const. זַרְעֵתֵי.

(2) *i* type: שִׁמַע "report," like סֵפֶר save in dual fem. const. שִׁמְעֵתֵי.

(3) *o* type: רֹמַח "spear," like בֹּקֶר save in dual fem. const. רָמְחֵתֵי.

Written Exercise

I. Inflect: נַעַר "lad," חֵלֶק "portion," אֹכֶל "food."

II. Translate: Thou (m.) shalt not judge[215] the righteous[180] kings[131] of the earth[25]. O let me[184] kill the wicked[196] prophet[146] with the good[88] sword[87].

Oral Exercise, Lessons XXIII and XXIV

פֶּתַח: נַעַר: אֹכֶל: אכלה: אכלת: כספים: כספי: דֶּרֶךְ: דרכים: דרכי: דרכי: אֲרצות: אֶרֶץ: פֹּעַל: פעלים: פעלי: נערה: פֶּשַׁת: פשתה: חֹדֶשׁ: חדשה: חדשת: מלכי: מלכים: מלכי: מלכים: מלכה: מַלְכוּת: ילדה: יְלדות: יַלִּים: יְדֵי: סְפָרִים: נפשות: עשבה: עשבת: עשבים: עשבים: מַלְכוּת:

LESSON XXV

INFLECTION OF NOUNS OF CLASS III

a. Nouns of Class III have Ṣērê in the final syllable and an unchangeable vowel in the pretone.

Peculiarities of Inflection

1. The construct singular is (usually) the same as the absolute.

2. When affixes are added Ṣērê is shortened to Š·wā. Under a guttural the Š·wā will be ֲ as usual.

3. When this brings two vocal Š·wās together the first is lengthened to S·γôl (not Ḥíreq nor Páθaḥ), thus:

קְטַלְךָ + קָטַל = (קָטַלְךָ) = קָטָלְךָ q'ṭô'-te-l·-χā.

Example

מַקֵּל "staff"

	Singular		*Plural*		*Dual*	
	m.	f.	m.	f.	m.	f.
Abs.	מַקֵּל	מַקֶּלָה	מַקְּלִים	מַקְּלוֹת	מַקְּלַיִם	——
Const.	מַקֵּל	מַקֶּלַת	מַקְּלֵי	מַקְּלוֹת	מַקְּלֵי	——

Written Exercise

I. Inflect (being careful to insert Méθeγ when necessary):

יוֹבֵל "trumpet," כֹּהֵן k'ô'-hēn "priest," שֹׁמֵעַ "hearer."

(Note the guttural in the last two words.)

II. Translate: And the good[88] priests shall go down[100] to the water[128]. The judges[216] of the people[167] have fallen[150].

LESSON XXVI

INFLECTION OF NOUNS OF CLASS IV

a. Words of Class IV end in ה֫, they may contain a changeable Qāmeṣ which brings them also under Class I.

Peculiarities of Inflection

b. 1. In the construct singular the ending ה֫ is changed to ה֗.

2. Before an affix the final ה֫ is removed altogether and the affix is substituted.

Examples

	Singular			*Plural*		*Dual*		
	m.		f.	m.	f.	m.	f.	
Abs.	מְקֻנָּה flock		מִקְנָה	מִקְנוֹת	מִקְנִים	מִקְנַיִם	מִקְנָתַיִם	
Const.	מִקְנַת		מִקְנַת	מִקְנוֹת	מִקְנֵי	מִקְנֵי	מִקְנָתֵי	
Abs.	שָׂדֶה field		שָׂדֶה	שָׂדוֹת	שָׂדִים	שָׂדַיִם	שָׂדָתַיִם	
Const.	שְׂדֵה		שְׂדַת	שְׂדוֹת	שְׂדֵי	שְׂדֵי	שָׂדָתֵי	śi-δ'-θê
Abs.	עָלֶה leaf		עָלָה	עָלוֹת	עָלִים	עָלַיִם	עָלָתַיִם	
Const.	עֲלֵה		עֲלַת	עֲלוֹת	עֲלֵי	עֲלֵי	עֲלָתֵי	ʿa-l'-θê

c. Note. — Nouns with the feminine ending ה֫ belong to Class I even though their masculines belong to one of the other classes.

Written Exercise

I. Inflect: יָפֶה "fair," מַעֲשֶׂה "work," רֹעֶה r'ô'-ʿe(h) "shepherd."

II. Translate: And the good[88] shepherds[195] will give[154] (verb first with "and") the leaves[165] to[113] the lads[149]. Those[60] old[74] prophets[146] and these[19] wicked[196] judges[216].

Oral Exercise

The Four Classes of Nouns

(The numbers indicate the class to which the words belong, the letters show the type in the case of nouns of Class II.)

רֹעֶה[4] : רֹעִי[4] : עֵלִים[1,4] : עֵלֶת[1,4] : מִקְנֵי[4] : שְׂדוֹת[1,4] : עֲלֵה[1,4] :

מַקֵּלִים[3] : אֶרֶז[2o] : מִקְלִי[3] : אַדְמַת[1] : בְּרָכוֹת[1] : אֲכָלָה[2o] :

נערי[2a] : חלקה[2i] : רמחת[2o] : שמעות[2i] : זרע[2a] : נער[2a] :
זרעתי[2a] : פעל[2o] : פעלי[2o] : פעלה[2o] : ארחות[2o] : פעלים[2o] :
פעלת[2o] : נחשי[1] : חזקות[1] : עלי[1,4] : עלת[1,4] : עלה[1,4] : שדים[1,4] :
עשבים[2i] : מלכי[2a] : בקרתי[2o] : פשת[2i] : ילדי[2a] :
ילדות[2a] : שרש[2o] : מלכות[2a] : מלכתים[2a] : נערה[2a] : ונתנו
הרעים הטובים[2o] את־רמחי המלך[2a] לנערים :

LESSON XXVII

PRONOMINAL SUFFIXES OF NOUNS

a. The Personal Pronouns in an abbreviated form are affixed to nouns, prepositions, etc., to express the genitive and objective cases, thus:

סוּס + ־ִי = סוּסִי "my horse," לְ + ־ָךְ = לְךָ "to thee."

b. The rules to be followed in affixing pronominal suffixes are the same as those for adding other affixes (cf. Lesson XXI, *e*) with three exceptions (*e*, *f*, *g*, below).

The addition of these pronominal suffixes affects nouns (according to the classes to which the noun belongs) in the same way that the affixes for gender, number, and state do.

c. TABLE OF THE PRONOMINAL SUFFIXES FOR NOUNS

	Singular *Suffixes of* Singular *Nouns*			Singular *Suffixes of* Plural *Nouns*		
1 *p. c.*	my	־ִי	î	my	־ַי	ay
2 *p. m.*	thy	־ְךָ	·χā	thy	־ֶיךָ	ḗ-χā
2 *p. f.*	thy	־ֵךְ	ēχ	thy	־ַיִךְ	á-yiχ
3 *p. m.*	his	־וֹ	ô	his	־ָיו	ā(y)w
3 *p. f.*	her	־ָהּ	āh	her	־ֶיהָ	ḗ-hā

	Plural *Suffixes of* Singular *Nouns*			Plural *Suffixes of* Plural *Nouns*		
1 *p. c.*	our	נוּ־	é-nû	our	ינוּ־	ê-nû
2 *p. m.*	your	כֶם־	·-χem	your	יכֶם־	ê-χem
2 *p. f.*	your	כֶן־	·-χen	your	יכֶן־	ê-χen
3 *p. m.*	their	ם־	ām	their	יהֶם־	ê-hem
3 *p. f.*	their	ן־	ān	their	יהֶן־	ê-hen

d. These suffixes are divided into *light and heavy.*

All are light save the six that have S·γôl in the last syllable.

e. The two heavy suffixes כֶם־ and כֶן־ require that the word to which they are affixed be put in the coustruct.

This must be done *before* the suffix is attached.

f. The other four heavy suffixes require that the word be shortened as much as possible after adding the suffix; *e.g.*

בִּרְכוֹתֵיכֶם = בְּרָכוֹת + יכֶם־

g. Segholates masculine singular are not affected by *e* above.

h. Remarks. —

1. It will be seen that there are 20 suffixes: 10 for singular nouns, and 10 for plural nouns.

2. All the suffixes of plural nouns contain י, and none of the suffixes of singular nouns contain י save יַ־ "my."

3. The first syllable of the suffixes for plural nouns is really the termination of the masculine plural construct of nouns. This termination, as contained in the *plural* suffixes, is pointed regularly יֵ־, but not so in the case of the *singular* suffixes, namely, twice יָ־, twice יַ־, once יֶ־.

4. Hence, to add pronominal suffixes to *plural masculine* nouns, the plural ending ים־ must first be removed, and then the suffix, as given in the table, which is provided with the necessary י of the masculine plural, is affixed.

By a strange anomaly, feminine plural nouns retain their femi-

nine ending (וֹת), and also take the masculine plural construct ending as part of the pronominal suffix, thus:

נוּ + ֵי + בִּרְכוֹת = בִּרְכוֹתֵינוּ, "our blessings."

5. Dual nouns take the suffixes of plural nouns.

6. The ending ה of feminine singular nouns must be removed and ת substituted whenever a pronominal suffix is added.

7. The first person suffix of plural nouns (ַי) is the masculine plural construct ending (ֵי) with the original Páθaḥ instead of Ṣērê, plus the pronominal suffix of the first person (ִי) which has been absorbed in the י of ַי, and therefore does not appear, thus:

ֵי + ִי = ַי.

i. Points to be observed in appending Pronominal Suffixes

1. Determine to which of the four classes the word belongs.
2. Mark gutturals and unchangeable vowels.
3. Note whether the *word* is singular or plural.
4. Note whether the *suffix* is to be singular or plural.
5. Note whether the suffix is כֶם or כֶן.
6. Note whether the word has the ending ה.

Then apply the rules for inflection of the four classes of nouns respectively.

j. TABLE OF NOUNS WITH PRONOMINAL SUFFIXES

Unchangeable		Class I	Class I, fem.	Class II	Class II, gutt.	Class III	Class IV
סוּס "horse"		דָּבָר "word"	בְּרָכָה "blessing"	מֶלֶךְ "king"	פֹּעַל "work"	כֹּהֵן "priest"	רֹעֶה "shepherd"
סוּסִי	my horse	דְּבָרִי	בִּרְכָתִי	מַלְכִּי	פֹּעֲלִי	כֹּהֲנִי	רֹעִי
סוּסְךָ	thy (m.) horse	דְּבָרְךָ *	בִּרְכָתְךָ *	מַלְכְּךָ	פֹּעֲלְךָ †	כֹּהֲנְךָ	רֹעֶיךָ
סוּסֵךְ	thy (f.) horse	דְּבָרֵךְ	בִּרְכָתֵךְ	מַלְכֵּךְ	פֹּעֲלֵךְ	כֹּהֲנֵךְ	רֹעֵךְ
סוּסוֹ	his horse	דְּבָרוֹ	בִּרְכָתוֹ	מַלְכּוֹ	פֹּעֲלוֹ	כֹּהֲנוֹ	רֹעֵהוּ
סוּסָהּ	her horse	דְּבָרָהּ	בִּרְכָתָהּ	מַלְכָּהּ	פֹּעֲלָהּ	כֹּהֲנָהּ	רֹעָהּ
סוּסֵנוּ	our horse	דְּבָרֵנוּ	בִּרְכָתֵנוּ	מַלְכֵּנוּ	פֹּעֲלֵנוּ	כֹּהֲנֵנוּ	רֹעֵנוּ
סוּסְכֶם	your (m.) horse	דְּבַרְכֶם	בִּרְכַתְכֶם	מַלְכְּכֶם	פֹּעֲלְכֶם	כֹּהֲנְכֶם	רֹעֵכֶם
סוּסְכֶן	your (f.) horse	דְּבַרְכֶן	בִּרְכַתְכֶן	מַלְכְּכֶן	פֹּעֲלְכֶן	כֹּהֲנְכֶן	רֹעֵכֶן
סוּסָם	their (m.) horse	דְּבָרָם	בִּרְכָתָם	מַלְכָּם	פֹּעֲלָם	כֹּהֲנָם	רֹעָם
סוּסָן	their (f.) horse	דְּבָרָן	בִּרְכָתָן	מַלְכָּן	פֹּעֲלָן	כֹּהֲנָן	רֹעָן
סוּסַי	my horses	דְּבָרַי	בִּרְכוֹתַי	מְלָכַי	פְּעָלַי	כֹּהֲנַי	רֹעַי
סוּסֶיךָ	thy (m.) horses	דְּבָרֶיךָ	בִּרְכוֹתֶיךָ	מְלָכֶיךָ	פְּעָלֶיךָ	כֹּהֲנֶיךָ	רֹעֶיךָ
סוּסַיִךְ	thy (f.) horses	דְּבָרַיִךְ	בִּרְכוֹתַיִךְ	מְלָכַיִךְ	פְּעָלַיִךְ	כֹּהֲנַיִךְ	רֹעַיִךְ
סוּסָיו	his horses	דְּבָרָיו	בִּרְכוֹתָיו	מְלָכָיו	פְּעָלָיו	כֹּהֲנָיו	רֹעָיו
סוּסֶיהָ	her horses	דְּבָרֶיהָ	בִּרְכוֹתֶיהָ	מְלָכֶיהָ	פְּעָלֶיהָ	כֹּהֲנֶיהָ	רֹעֶיהָ
סוּסֵינוּ	our horses	דְּבָרֵינוּ	בִּרְכוֹתֵינוּ	מְלָכֵינוּ	פְּעָלֵינוּ	כֹּהֲנֵינוּ	רֹעֵינוּ
סוּסֵיכֶם	your (m.) horses	דִּבְרֵיכֶם	בִּרְכוֹתֵיכֶם	מַלְכֵיכֶם	פֹּעֲלֵיכֶם	כֹּהֲנֵיכֶם	רֹעֵיכֶם
סוּסֵיכֶן	your (f.) horses	דִּבְרֵיכֶן	בִּרְכוֹתֵיכֶן	מַלְכֵיכֶן	פֹּעֲלֵיכֶן	כֹּהֲנֵיכֶן	רֹעֵיכֶן
סוּסֵיהֶם	their (m.) horses	דִּבְרֵיהֶם	בִּרְכוֹתֵיהֶם	מַלְכֵיהֶם	פֹּעֲלֵיהֶם	כֹּהֲנֵיהֶם	רֹעֵיהֶם
סוּסֵיהֶן	their (f.) horses	דִּבְרֵיהֶן	בִּרְכוֹתֵיהֶן	מַלְכֵיהֶן	פֹּעֲלֵיהֶן	כֹּהֲנֵיהֶן	רֹעֵיהֶן

* The suffix ךָ, with words of Class I, is treated (only for the purpose of finding the antepretone) as though it had but one syllable, and thus it is the first syllable of דָּבָר, for instance, that now falls in the antepretone, and is shortened in accordance with the Nominal Law.

† pọ-ʿo-lᵊ-χā from (פֹּעֲלְךָ).

Written Exercise

I. Inflect, with pronominal suffixes:

אֲדָמָה "ground," בַּעַל "lord," מַטֶּה "staff."

II. Translate:

A

בִּשַׂרְכֶם: יָדַי: שְׁפָתָיו: יְדֵיהֶן: לִבָּכֶנוּ: מִבְּשָׂרִי: בִּרְכָתְךָ:
דְּבָרוֹ: דִּבְרֵיכֶם: בִּרְכוֹתֵינוּ: אַרְצָם: זַרְעֲךָ: עֲשָׂבִי: מַלְכָּהּ:
סִפְרוֹ: סִפְרֵיהֶם: שָׂרְשִׁי: שָׂרְשָׁיִךְ: פִּשְׁתֵּנוּ: נַעֲרוֹ: מַקְלֵךְ:
פְּנֵיהֶם: נַעֲרֵכֶם: אַרְצֵךְ: בִּרְכַתְּכֶן: נְעָלַיִךְ:

B

Note. — Nouns with pronominal suffixes do not take the article.

My book [158]. Your (m.) heart [116]. My prophets [146]. His king [131]. His kings. Your queen [131 fem.]. Your queens. Her lad [149]. Her lads. Our boy [95]. Our boys. Their land [25]. His flax [178]. To my horse [156]. He gave [154] my staff [139] to his servant [160]. I shall write [112] his words [53] in [32] my books [158]. Who [127] killed [184] their kings. His kindness [86] (is) great [47].

Oral Exercise

LESSON XXVIII

THE PRONOMINAL SUFFIXES OF VERBS

a. *Singular Suffixes*

	With the Perfect				With the Imperfect and Imperative		
1 *p. c.*	־נִי		á-nî	me	־נִי	é-nî	me
2 *p. m.*	־ךָ		·-χā	thee	־ךָ	·-χā	thee
2 *p. f.*	־ךְ		ēχ	thee	־ךְ	ēχ	thee
3 *p. m.*	־וֹ	*or* ־הוּ	ô *or* á-hû	him	־הוּ	ē-hû	him
3 *p. f.*	־הָ		āh	her	־הָ	é-hā	her

Plural Suffixes

1 *p. c.*	־נוּ		á-nû	us	־נוּ	é-nû	us
2 *p. m.*	־כֶם		·-χem	you	־כֶם	·-χem	you
2 *p. f.*	־כֶן		·-χen	you	־כֶן	·-χen	you
3 *p. m.*	־ם		ām	them	־ם	ēm	them
3 *p. f.*	־ן		āu	them	־ן	ēn	them

NOTE. — The first vowel of a suffix is lost when the verb ends in a vowel, thus:

קְטָלוּם "they killed them."

One exception:

קְטָלַתְנִי + ־נִי = קְטָלַתְּנִי, not קְטָלָתְנִי.

b. These suffixes express the object of the verb.

c. The object, when pronominal, may also (less usually) be expressed by means of a nominal suffix added to the sign of the definite accusative אֵת, which, with a suffix, becomes אֶת, thus:

אֹתִי, אֹתְךָ "me," "thee."

d. General Rules for adding Verbal Pronominal Suffixes

1. The Perfect of active verbs and the Perfect, Imperfect, and Imperative of stative verbs (*i.e.* verbs that have Páθaḥ as the vowel of the second syllable of the Imperfect) follow the analogy of nouns of Class I, that is, pretone long, antepretone extra-short, thus:

$$\text{קָטַל} + \text{וֹ} = \text{קָטָלוֹ}$$ "he killed him."

2. The Imperfect of active verbs and those forms of the derived stems which have Ṣērê in the last syllable follow the analogy of words of Class III, shortening the vowel of the final syllable to Š·wā; when this brings two vocal Š·wās together, and the shortened vowel was Ḥólem, the first Š·wā becomes Qáməṣ Ḥāṭûφ. Thus:

$$\text{יִקְטֹל} + \text{ם} = \text{יִקְטְלֵם}$$ he will kill them,

$$\text{יִשְׁמֹר} + \text{ךָ} = \text{יִשְׁמָרְךָ}$$ yiš-mo-r·-χā he will keep thee.

3. The Imperative second singular masculine of active verbs and the Infinitives construct of both active and stative verbs follow the analogy of nouns of Class II, a short vowel appearing under the first radical and Š·wā under the second radical. This vowel is *o* for Infinitives in *ō*, and *i* for Infinitives in *a*.

   Unlike Segholates, the first syllable is generally *open* (except in the case of the *Infinitive* with the suffixes ־ךָ, ־כֶם, ־כֶן). Thus:

קָטְלֵנִי	qo-ṭ-lē-nî	kill (thou) me.
בִּכְתֹבוֹ	b·-χo-θ·-βô	in his writing (*inf. const.*).

but

בִּכְתָבְךָ	b·-χoθ-b·-χā	in thy writing.

4. The Infinitive construct takes the *nominal* form of the suffixes, not the verbal, save in the case of the suffix of the first per-

son; this will be *nominal* (ִ_) to express the *subject*, and *verbal* to express the *object*, thus:

שָׁמְרִי	šo-m·-rî	my watching
שָׁמְרֵנִי	šo-m·-rḗ-nî	to watch me

e. The following scheme embodies the above rules (*d*):

	Active	*Stative*
Like Nouns of Class I,	Perfect	Perfect
Like Nouns of Class III,	Imperfect	Imperfect
Like Nouns of Class II,	Imperative	Imperative
	Infinitive	Infinitive

f. Remarks. —

1. קָטְלָה "she killed," before any suffix, changes ה to ת, as in feminine nouns.
2. קָטַלְתָּ "thou (f.) killedst," before it can take a suffix, must be changed to קָטַלְתִּי, the final Š·wā becoming ִ_, which is the original final vowel of this form.
3. קְטַלְתֶּם, קְטַלְתֶּן "ye killed," before they can take a suffix, must be changed to קְטַלְתּוּ.
4. The Imperfect, in certain cases, inserts a syllable, נֶ_ "en," between the verb and the suffix. This is called the *energetic* nûn, but has no special significance. The Nûn is generally assimilated to the consonant of the suffix, thus:

יִקְטְלֶנּוּ	(from יִקְטְלֶנְהוּ)	he will kill him
יִקְטָלֶךָ	(-lek-kā)	he will kill thee

5. תִּקְטֹלְנָה cannot take a suffix; the masculine תִּקְטֹלוּ must be used instead.

6. The Infinitive construct, with the suffixes ־ךָ, ־כֶם, or ־כֶן, may follow the analogy either of Class II or Class III in nouns, thus:

קָטְלְךָ qoṭ-l·-χā *or* קִטָּלְךָ q·-ṭo-l·-χā.

LESSON XXIX

THE STEMS OF THE VERB

a. There are seven Stems to the Verb (not so correctly called conjugations).

I The Ground Stem, active or stative.	III The Intensive Stem, active.	VI The Causative Stem, active.
. . . . .	IV The Intensive Stem, passive.	VII The Causative Stem, passive.
II The Reflexive (or Passive) of the Ground Stem.	V The Intensive Stem, reflexive.	. . . . .

b. The ground stem (cf. Less. XV–XVIII) is called *Qal* (*i.e.* "light") because it presents the verb in its simplest form.

The other stems are derived from the ground stem, and may be designated either by number, as above, or by the corresponding forms of the verb פָּעַל "to do" (which was used as a paradigm by the older grammarians), or by the corresponding forms of the verb קָטַל "to kill" (the verb now generally used as a paradigm).

c. TABLE

Stems	Name from Verb פָּעַל	Name from Verb קָטַל	Characteristic Marks
I The Ground Stem (Qal).			
II The Reflexive (or Passive) of the Ground Stem,	נִפְעַל Ni*φ*-ial	נִקְטַל Niq-ṭal	Prefix נ and הִנ.
III The Intensive Stem, Active,	פִּעֵל Pi[ī]-ēl	קִטֵּל Qiṭ-ṭēl	Doubling 2d Radical.
IV The Intensive Stem, Passive,	פֻּעַל Pu[ŭ]-ial	קֻטַּל Quṭ-ṭal	Doubling 2d Radical.
V The Intensive Stem, Reflexive,	הִתְפַּעֵל Hi*θ*-pa[ī]-ēl	הִתְקַטֵּל Hi*θ*-qaṭ-ṭēl	Doubling 2d Radical. Prefix הִתְ.
VI The Causative Stem, Active,	הִפְעִיל Hi*φ*-īl	הִקְטִיל Hiq-ṭīl	Prefix הִ.
VII The Causative Stem, Passive,	הָפְעַל Ho*φ*-ial	הָקְטַל Hoq-ṭal	Prefix הָ.

Remarks. —

d. The meaning of any stem in relation to the ground stem must be ascertained from the lexicon, but, in general:

The Niqṭal (II) = passive or reflexive of the Qal.
The Qiṭṭēl (III) = to do often or intensely the act expressed by the Qal.
The Hiqṭîl (VI) = to cause to do the act expressed by the Qal.

e. Since the first letter of פָּעַל is פ (Pê), the second ע (ʾáyin), the third ל (Lámeð), it is the custom to call the first letter of any verb its Pê, the second its ʾáyin, and the third its Lámeð. Thus:

אָמַר is called a Pê ʾáleɸ verb (written פ״א), *i.e.* a verb whose first letter is an ʾáleɸ.
שָׁלַח is a Lámeð guttural verb, *i.e.* one whose last letter is a guttural, etc.

f. Stem II: Niɸʾal or Niqṭal: The Reflexive or Passive of the Ground Stem

Note. — The Niqṭal and all the derived stems take the same afformatives and preformatives to express tense, person, number, and gender as the Qal.

Hence, when the Qal is known by heart, it is necessary only to learn the distinctive or clue forms of a given derived stem in order to be able to form the entire stem.

g. The clue forms of a stem comprise the first or top form of the Perfect, Imperfect, and Imperative, together with the first form in each case that has a vocalic affix, and the first that has a consonantal affix, also the two Infinitives and the Participle, — about twelve in all. These will be found marked with * in the Tables of Paradigms.

h. CHARACTERISTIC OR CLUE FORMS OF STEM II

Pf. sg. 3 *m.*	נִקְטַל	*Impf. sg.* 3 *m.*	יִקָּטֵל	*Imperat. sg. m.*	הִקָּטֵל
3 *f.*	נִקְטְלָה	3 *f.*	תְּ———	*f.*	הִקָּטְלִי
2 *m.*	נִקְטַלְתָּ	2 *m.*	תְּ———	*pl. m.*	הִ——וּ
2 *f.*	תְּ———	2 *f.*	תְּקָטְלִי	*f.*	הִקָּטַלְנָה
1 *c.*	תִּי———	1 *c.*	———אֶ		

Pf. pl. 3 *c.*	וּ——	*Impf. pl.* 3 *m.*	יִ—וּ	*Inf. const.*	הִקָּטֵל
2 *m.*	תֶּם——	3 *f.*	תִּקְטַלְנָה	*abs.*	הִקָּטֵל / נִקְטֹל
2 *f.*	תֶּן——	2 *m.*	תִּ——וּ		
1 *c.*	נוּ——	2 *f.*	תִּ——נָה		
		1 *c.*	נִ——	*Partic.*	נִקְטָל

i. Remarks. —

1. The Perfect and the Participle and one form of the Infinitive Absolute prefix נִ, which forms a closed syllable with the first radical.
2. The Infinitive Construct, one form of the Infinitive Absolute, and the Imperative prefix הִ, and double the first radical (really הִן with נ assimilated).
3. The Imperfect doubles the first radical. (This is due to loss of ה and assimilation of נ: יְהִנָּקְטֵל = יִקָּטֵל.)
4. The vowels of the clue forms, so far as they differ from those of the Qal, must be carefully noted.

Written Exercise

Translate:

I

יִלָּחֵם: נִגְמָל: הִשָּׁמֵר: הִלָּחֲמוּ: אֶשָּׁמְרָה: נִשְׁפֵּט: נִשְׁפַּטְתִּי:

II

They (m.) will be counted [157]. Thou (m.) wilt take heed [212]. Take ye (m.) heed. O let me be killed [134].

LESSON XXX

STEMS III, IV, V: QIṬṬĒL, QUṬṬAL, HIθQAṬṬĒL: THE INTENSIVES — ACTIVE, PASSIVE, AND REFLEXIVE

a. CLUE FORMS

			Qiṭṭēl	Quṭṭal	Hiθqaṭṭēl
Pf.	*sg.*	3 *m.*	קִטֵּל	קֻטַּל	הִתְקַטֵּל
		3 *f.*	קִטְּלָה	קֻטְּלָה	הִתְקַטְּלָה
		2 *m.*	קִטַּלְתָּ	קֻטַּלְתָּ	הִתְקַטַּלְתָּ
Impf.	*sg.*	3 *m.*	יְקַטֵּל	יְקֻטַּל	יִתְקַטֵּל
		3 *f.*			
		2 *m.*			
		2 *f.*	תְּקַטְּלִי	תְּקֻטְּלִי	תִּתְקַטְּלִי
		1 *c.*			
	pl.	3 *m.*			
		3 *f.*	תְּקַטֵּלְנָה	תְּקֻטַּלְנָה	תִּתְקַטֵּלְנָה
		2 *m.*			
		2 *f.*			
		1 *c.*			
Imperat.	*sg.*	*m.*	קַטֵּל	wanting	הִתְקַטֵּל
		f.	קַטְּלִי		הִתְקַטְּלִי
	pl.	*m.*			
		f.	קַטֵּלְנָה		הִתְקַטֵּלְנָה
Inf. const.			קַטֵּל	wanting	הִתְקַטֵּל
abs.			קַטֹּל קַטֵּל	קָטֹל	הִתְקַטֵּל
Partic.			מְקַטֵּל	מְקֻטָּל	מִתְקַטֵּל

b. Remarks. —

1. The distinguishing characteristic of all intensive forms is the doubling of the middle radical.
2. In the Imperfects III and IV, the Š·wā in the first syllable is to be noted.
3. In V, when the verb begins with one of the sibilants ס, שׁ, שׂ, the ת of the preformative הִתְ changes place with the sibilant, thus:

הִשְׁתַּמֵּר, not הִתְשַׁמֵּר.

If the verb begin with צ, the ת changes place with it, and becomes ט, thus:

הִצְטַדֵּק, not הִתְצַדֵּק.

If the verb begin with ד, ט, or ת, the ת of the preformative is assimilated, thus:

הִדַּבֵּר, not הִתְדַּבֵּר, הִטַּמֵּא, not הִתְטַמֵּא.

Written Exercise

Translate: Tell[157] thou (m.). Consecrating[182]–oneself. I have walked[59]. Ye (f.) will consecrate them (m.). They told. We will break-in-pieces[204]. Seek[42] ye (f.) We will make-atonement[110]. Let them consecrate. O let me seek.

LESSON XXXI

STEMS VI AND VII: HIQṬÎL AND HOQṬAL: THE CAUSATIVES — ACTIVE AND PASSIVE

CLUE FORMS

		Hiqṭîl	Hoqṭal
Pf.	*sg.* 3 *m.*	הִקְטִיל	הָקְטַל
	3 *f.*	הִקְטִילָה	הָקְטְלָה
	2 *m.*	הִקְטַלְתָּ	הָקְטַלְתָּ

			Hiṭṭîl	Hoṭṭal
Impf.	*sg.*	3 *m.*	יַקְטִיל	יָקְטַל
		3 *f.*		
		2 *m.*		
		2 *f.*	תַּקְטִילִי	תָּקְטְלִי
		1 *c.*		
	pl.	3 *m.*		
		3 *f.*	תַּקְטֵלְנָה	תָּקְטַלְנָה
		2 *m.*		
		2 *f.*		
		1 *c.*	*Cohort.* אַקְטִילָה	
Imperat.	*sg.*	*m.*	הַקְטֵל	wanting
		f.	הַקְטִילִי	
	pl.	*m.*		
		f.	הַקְטֵלְנָה	
Inf. const.			הַקְטִיל	wanting
abs.			הַקְטֵל	הָקְטֵל
Partic.			מַקְטִיל	מָקְטָל

b. Remarks. —

1. In the Imperfect, the characteristic ה of the stem is merged in the tense preformative, יַקְטִיל shortened from יְהַקְטִיל (cf. the Niqṭal Imperfect, Less. XXIX, *i*, 3).
2. The Jussive of the Hiqṭîl differs from the ordinary Imperfect in the forms without afformatives, the *î* of the last syllable being changed to *ē*; thus:

יַקְטֵל "let him cause to kill," תַּקְטֵל "let her cause to kill."

With a suffix the *î* reappears, thus:

יַקְדִישֵׁם "let him consecrate them." (Contrast Less. XXVIII, *d*, 2.)

The same is true, in the Imperative singular masculine, with a suffix, thus:

הַקְדִּישֵׁהוּ "consecrate him." Emphatic הַקְטִילָה (Less. XVIII, *e*).

3. When Wāw Cousecutive is used with the Hiqṭîl, it is prefixed to the Jussive form (see Less. XVII, *e*); thus:

וַיַּקְטֵל "and he caused to kill."

Written Exercise

Translate: He will divide[33] the earth[25]. Let him divide it (masc.). Divide (thou, *m.*). Do not (thou, *m.*) divide. O let me divide. And he divided. And they caused him to be king[130] (hi*ph.*).

Oral Exercise

THE STEMS OF קָטַל.

קָטַלְתָּן תִּקְטְלִי קַטְלָנָה נִקְטַלְתֶּם הִקָּטְלוּ הָקְטַלְתְּ יִקָּטֵל הִתְקַטְלָנָה הִתְקַטַּלְנוּ הִתְקַטַּלְתְּ קְטוֹל הִקָּטְלָה אִקָּטֵל הָקְטַלְתֶּם הִקָּטֵל יִתְקַטֵּל יִקָּטְלוּ הִקָּטִילָה הִקְטִלִי תִּקְטַלְנָה קָטְלָנוּ תִּקָּטֵל מָקְטֵל הִקָּטִילוּ הִתְקַטְלָנָה נִקְטִיל תִּתְקַטֵּל תִּתְקַטְלוּ מִקְטִיל נִקָּטֵל נִקְטְלָה קָטְלוּ אֶקָּטֵל תִּקְטִילִי נִקְטַלְתִּי תִּקָּטְלוּ נִתְקַטֵּל מִתְקַטֵּל הִתְקַטַּלְתֶּם הִקָּטְלָנָה נִקְטְלוּ קָטַלְתִּי יִקָּטֵל נִקְטֹל הָקְטַלְנוּ נִקְטַלְתִּי קִטְלִי נִקְטַלְתֶּם קָטַלְתְּ יִקְטְלוּ יִקָּטְלוּ הִקְטַלְתֶּם קְטֹל קִטְלָה נִקְטַלְנוּ הִקְטַלְתִּי תִּתְקַטְלִי תִּקְטִיל יַקְטֵל

NOTE. — In describing a verbal form use the following order:

1. The Root, *i.e.* the Lexicon Form.
2. Stem.
3. Tense.
4. Number.
5. Person.
6. Gender.

LESSON XXXII

THE IRREGULAR VERBS

Pê Guttural Verbs

a. By irregular verbs are meant such as differ in inflection from the strong or regular verbs, such as קָטַל, either because of the presence of gutturals and weak letters, or because of containing two radicals only instead of three.

b. TABLE OF IRREGULAR VERBS

A. Guttural Verbs.	*A* 1. Pê Guttural	עָמַד	to stand
	A 2. ʾáyin Guttural	שָׁחַט	to slay
		בֵּרֵךְ (Qittēl)	to bless
	A 3. Lámeð Guttural	שָׁלַח	to send
B. Biliteral Verbs.	*B* 1. Double ʾáyin (ע״ע)	סַב	to go around
	B 2. ʾáyin *û* (ע״ו)	קוּם	to stand
	B 3. ʾáyin *î* (ע״י)	בִּין	to understand
C. Weak Verbs.	*C* 1. Pê ʾáleɸ (פ״א)	אָכַל	to eat
	C 2. Pê Wāw (פ״ו)	יָשַׁב	to sit
	C 3. Pê Yôð (פ״י)	יָטַב	to be good
	C 4. Pê Nûn (פ״נ)	נָגַשׁ	to approach
	C 5. Lámeð ʾáleɸ (ל״א)	מָצָא	to find
	C 6. Lámeð Hê (ל״ה)	גָּלָה	to uncover

NOTE.— Verbs ו״פ are always י״פ in the Qal perfect.

c. *A* 1. Pê Guttural Verbs

Type: עָמַד "to stand"

CLUE FORMS

(Namely, the forms whose pointing differs from that of the corresponding forms of קָטַל. When there are more than one exhibiting the same characteristic only the first is given. Thus the Qal perfect plural עָמְדָתֶם is given; it is understood that the following form, the second feminine, is pointed in the same way עָמַדְתֶּן.)

		Qal	Niφ.	Hiφ.	Hoφ.
Pf.	*sg.* 3		נֶעֱמַד	הֶעֱמִיד	הָעְמַד
	3		נֶעֶמְדָה		
	2		neˌ-ʾe-mˑ-dāh(h)		
	2				
	1				
	pl. 3				
	2	עֲמַדְתֶּם			
	2				
	1				
Impf.	*sg.* 3	יַעֲמֹד	יֵעָמֵד	יַעֲמִיד	יָעְמַד
	3				
	2				
	2	תַּעֲמְדִי			
	1	אֶעֱמֹד			
Imperat.	*sg. m.*	עֲמֹד	הֵעָמֵד	הַעֲמֵד	
	f.	עִמְדִי			
	pl. m.				
	f.				
Inf. const.			הֵעָמֵד		
abs.			נֵעָמֹד, הֵעָמֹד		
Partic.			נֶעֱמָד	מַעֲמִיד	מָעְמָד

d. Remarks. —

1. Gutturals take composite rather than simple Š·wā; hence עֲמַדְתֶּם, not עָמַדְתֶּם; נֶעֱמַד not נֶעְמַד (the ֱ under נ, in place of ֲ, is due to the vicinity of the guttural, cf. the Hiφîl Perfect).
2. Gutturals cannot be doubled; hence יַעֲמֹד, not יְעָמֵד.
3. Notice the result of the coming together of two vocal Š·wās, thus: נֶעֱמָדָה, from נֶעֱמְדָה, so תַּעֲמִדִי.
4. In most פ״ח verbs, the ח, though a guttural, takes silent Š·wā, thus:

   יַחְתֹּם "he will seal," נֶחְתַּם Niφal Perfect.

5. With stative verbs, פ״ח, like חָכַם "to be wise," חָזַק "to be strong," the Qal Imperfects are יֶחְכַּם, יֶחֱזַק.
6. The Intensive stems are regular.

Written Exercise

Translate: The wise [81] man [14] will stand [168]. And the boys [95] stood on [164] the ground [5]. And the wicked [196] kings [131] of the earth [25] dreamed [84]. The queens [131 fem.] of the earth will be strong [78] in [82] my ways [54].

LESSON XXXIII

A 2. ʿÁyin Guttural Verbs

Types: שָׁחַט "to slay," בָּרַךְ "to bless"

a. CLUE FORMS

		Qal	Niq.	Qiṭ.	Quṭ.	Hiθqaṭ.
Pf.	*sg.* 3			בֵּרַךְ	בֹּרַךְ	הִתְבָּרַךְ
	3	שָׁחֲטָה	נִשְׁחֲטָה			
	2			בֵּרַכְתָּ		
	2					
	1					

			Qal	Niq.	Qiṭ.	Quṭ.	Hiṯqaṭ.
Pf.	*pl.*	3	שָׁחֲטוּ				
		2			בֵּרַכְתֶּם	בֹּרַכְתֶּם	הִתְבָּרַכְתֶּם
		2					
		1					
Impf.	*sg.*	3	יִשְׁחַט		יְבָרֵךְ	יְבֹרַךְ	
		3					יִתְבָּרֵךְ
		2					
		2	תִּשְׁחַטִי	תִּשָּׁחֲטִי			
		1					
Imperat.	*sg.*	*m.*	שְׁחַט		בָּרֵךְ	wanting	הִתְבָּרֵךְ
		f.	שִׁחֲטִי	הִשָּׁחֲטִי			
	pl.	*m.*					
		f.					
Inf. const.			שְׁחֹט		בָּרֵךְ	wanting	
abs.							
Partic.					מְבָרֵךְ	מְבֹרָךְ	מִתְבָּרֵךְ

b. Remarks. —

1. The guttural prefers compound Šᵊwā, hence שָׁחֲטוּ, not שָׁחְטוּ.
2. The guttural prefers the sound of *a*; hence יִשְׁחַט, not יִשְׁחֹט. So in the Imperative, שְׁחַט, not שְׁחֹט; the feminine שִׁחֲטִי is from שְׁחָטִי, just as קִטְלִי is from קָטְלִי (cf. Less. VIII, *e*).
3. Gutturals and ר cannot be doubled; hence בֵּרֵךְ, not בֵּרֵךְ; בֹּרַךְ, not בֹּרֵךְ. (The reason ברך is used as type in the intensive stems is that, in verbs ע״ח and ע״ה, the Dāγēš forte is implied, and the preceding vowel, therefore, is not lengthened; thus: שִׁחֵט ši[ḥ]-ḥēṭ, שָׁחַט šu[ḥ]-ḥaṭ.)

The Qiṭṭēl of נָחַם is נִחַּם ni[ḥ]-ḥam "to comfort," with *a* instead of *ē* in the last syllable because of the preceding guttural. The Niqṭal of נחם is also נִחַם (for נִנְחַם).

Written Exercise

Translate: And the good [88] priests [107] blessed [44] the boys [95] of the people [167]. And they cried [71] to [113] him, saying (לֵאמֹר lit. "to say"), Drive [51] out our enemies [13]. The kings [131] will serve [218] your Baals [40].

LESSON XXXIV

A 3. Lāmeḍ Guttural Verbs

a. **Type: שָׁלַח "to send"**

		Qal	Niq.	Qiṭ.	Quṭ.	Hiṯqaṭ.	Hiq.	Hoq.
Perfect	*Sg.* 3			שִׁלַּח		הִשְׁתַּלַּח	הִשְׁלִיחַ	
	3							
	2							
	2	שָׁלַחְתָּ	נִשְׁלַחְתָּ	שִׁלַּחְתָּ	שֻׁלַּחְתָּ	הִשְׁתַּלַּחְתָּ	הִשְׁלַחְתָּ	הָשְׁלַחְתָּ
	1							
	Pl. 3							
	2							
	2							
	1							
Imperfect	*Sg.* 3	יִשְׁלַח	יִשָּׁלַח	יְשַׁלַּח		יִשְׁתַּלַּח	יַשְׁלִיחַ	
	3							
	2							
	2							
	1							
	Pl. 3							
	3	תִּשְׁלַחְנָה		תְּשַׁלַּחְנָה		תִּשְׁתַּלַּחְנָה	תַּשְׁלַחְנָה	
	2							
	2							
	1							

		Qal	Niq.	Qiṭ.	Quṭ.	Hiṡqaṭ.	Hiq.	Hoq.
Imperative	*Sg. m.*	שְׁלַח	הִשָּׁלַח	שַׁלַּח	wanting	הִשְׁתַּלַּח	הַשְׁלַח	wanting
	f.						הַשְׁלִיחִי	
	Pl. m.							
	f.			שַׁלַּחְנָה				
Infinitive	*const.*	שְׁלַח	הִשָּׁלַח	שַׁלַּח		הִשְׁתַּלַּח	הַשְׁלִיחַ	
	abs.	שָׁלוֹחַ	נִשְׁלוֹחַ	שַׁלֵּחַ			הַשְׁלֵחַ	הָשְׁלֵחַ
Participle		שֹׁלֵחַ שָׁלוּחַ		מְשַׁלֵּחַ		מִשְׁתַּלֵּחַ	מַשְׁלִיחַ	

b. Remarks. —

1. Páθaḥ furtive must intervene between a final guttural and any other preceding long vowel save Qāmeṣ; hence מְשַׁלֵּחַ, not מְשַׁלֵּחַ; הַשְׁלִיחַ, not הַשְׁלִיחַ.
2. The final guttural prefers Páθaḥ to Ḥôlem or Ṣērê; hence יִשְׁלַח, not יִשְׁלֹחַ; שַׁלַּח, not שַׁלֵּחַ, etc. Note, therefore, that the clue form of the Imperfects of all stems, except Hiqṭîl, has Páθaḥ as the vowel of second radical.
3. The guttural, by exception, takes simple Šᵊwā (thus, שָׁלַחְתָּ), save in the Perfect singular second person feminine of all the stems, in these a helping Páθaḥ is found instead. This does not cause the removal of the Dāγēš lene in the final תּ; hence שָׁלַחְתְּ šā-lá-ḥ(a)t for שָׁלַחְתְּ.

Written Exercise

Translate: Thy word [53] shall not be forgotten [206]. In the day [91] of his being anointed [142 (niq. inf. c.)]. He caused thee to hear [210] his words, and caused thee to write [112] them in thy books [158]. And he fought [119] all [108] that day [91] that (Wāw sub. Less. XVII, *k*) I might send [207] thee.

Oral Exercise

	Pl. 3							
	3	תְּסֻבֶּינָה	תִּסַּבְנָה	תִּסַּבֶּינָה			תְּסֻבֶּינָה	תּוּסַבֶּינָה
	2							
	2							
	1							
Imperative	*Sg. m.*	סֹב			סוֹבֵב	wanting	הָסֵב	wanting
	f.	סֹבִּי						
	Pl. m.							
	f.	סֻבֶּינָה						
Participle		סֹבֵב		נָסָב	מְסוֹבֵב	מְסוֹבָב	מֵסֵב	מוּסָב
		סָבוּב						

b. Remarks. —

1. With any affix the second (final radical) is always doubled (but see 3 below).
2. In the Perfects throughout before consonantal affixes Ḥôlem is inserted; in the Imperfects under the same circumstances large S·γôl is inserted.
3. The Intensive stems and often the third person forms of the Qal Perfect follow the analogy of triliteral stems, the second radical being repeated to supply a third radical.
4. The Qal Imperfect has two forms, the second doubles the first radical instead of the second; it is called the Aramaic Imperfect.

Written Exercise

Translate: We have surrounded[155] the enemies[13] of the king[131]. Let him go around[155] that he may take[122]. He caused the man[14] to go around the flock[140] of the lad[149]. We will surround this place[138] and we will take it.

LESSON XXXVI

BILITERAL VERBS: *B* 2. ʿÁYIN Û (ע״ו).

Type: קוּם "to arise"

a. CLUE FORMS

		Qal	Niq.	Qiṭ.	Quṭ.	Hiq.	Hoq.
Perf.	*sg.* 3	קָם	נָקוֹם	קוֹמֵם	קוֹמַם	הֵקִים	הוּקַם
	3	קָמָה	נָקוֹמָה	קוֹמְמָה		הֵקִימָה	הוּקְמָה
	2	קַמְתָּ	נָקוֹמוֹתָ	קוֹמַמְתָּ		הֵקִימוֹתָ	הוּקַמְתָּ

	Qal	Niq.	Qiṭ.	Quṭ.	Hiq.	Hoq.
Inf. const.	קוּם	הִקּוֹם	קוֹמֵם		הָקִים	הוּקַם
abs.	קוֹם	הִקּוֹם / נָקוֹם			הָקֵם	
Partic. act.	קָם	נָקוֹם	מְקוֹמֵם		מֵקִים	מוּקָם
pass.	קוּם					

b. Remarks. —

1. ע״ו verbs are quoted not, as usual, by the form of the Qal Perfect singular third person masculine, but by the Infinitive construct, which exhibits the characteristic middle *û*.
2. The Qal Perfect singular third person feminine and the feminine of the Participle active are distinguished from each other by the place of the accent, thus:

   קָמָה "she arose" קָמָה "arisen"

3. The Qal Jussive is יָקָם and with the Wāw Consecutive וַיָּקָם (way-yā́-qom), (see Less. XVII, *e*), the accent being drawn back to the open penult and the vowel of the last syllable consequently shortened.
4. The Perfects Niqṭal and Hiqṭîl in the forms having a consonantal afformative insert Ḥólem before the afformative (cf. ע״ע verbs).
5. The Intensives are formed like those of verbs ע״ע, the final radical being reduplicated.
6. The Jussive of the Hiqṭîl is יָקֵם, with Wāw Consecutive וַיָּקֵם.

Written Exercise

Translate: And he arose [183] and went [59]. Let God [20] arise. The queen [131 fem.] will arise. And I will cause to return [205]. Do not (thou, m.) cause to return. O cause (sing. m.) to return (Emph. Imper., Less. XVIII, *e*).

B 3. ʾÁYIN ʾ (ע"י)

Type: בִּין "to understand"

c. CLUE FORMS

		Qal	Niq.		Qal	Niq.

LESSON XXXVII

WEAK VERBS: *C*1. PÊ ʾÁLEPH (פ״א)

Type: אָכַל "to eat"

a. CLUE FORMS

			Qal	Niq.	Hiq.	Hoq.
Pf.				נֶאֱכַל	הֶאֱכִיל	הָאֳכַל
Impf.	*sg.*	3	יֹאכַל			
		3				
		2				
		2	תֹּאכְלִי			
		1	אֹכַל			
	pl.	3				
		3	תֹּאכַלְנָה			
		2				
		2				
		1				
Imperat.	*sg.*	*m.*	אֱכֹל			
		f.	אִכְלִי			
	pl.	*m.*				
		f.	אֱכֹלְנָה			
Inf. const.			אֱכֹל			
abs.						
Partic.						

b. Remarks. —

1. פ״א verbs are Pê guttural verbs in all respects save in the Qal Imperfect where א quiesces in preceding Páθaḥ and the resultant Qámeṣ is transmuted into Ḥólem, thus:

יֹאכַל = יָאכַל = יַאֲכַל

Notice the Páθaḥ in the second syllable instead of the regular Ḥólem.

2. In pause יֹאכַל becomes יֹאכֵל.
3. In Qal Imperfect singular first person אֹכַל is for אֶאֱכַל, the quiescent first radical is not written.
4. There are only five פ״א verbs; the one most common is אָמַר "to say," Qal Imperfect יֹאמַר, with Wāw Consecutive וַיֹּאמֶר (but first person וָאֹמַר); Qal Infinitive Construct אֱמֹר, with ל it becomes לֵאמֹר (from לֶאֱמֹר).

Written Exercise

Translate: And he said[21] to the man[4], From the tree[170] thou mayest eat[15]. I will make thee eat (Hiφ.) the flesh[46] of great[47] kings[131]. O let us not perish[2]. And I said, Draw[189] near (pl. fem.) that (Wāw sub.) we may eat.

LESSON XXXVIII

C 2. Pê Wāw (פ״ו) Verbs

Type: יָשַׁב "to dwell," "sit," יָרַשׁ "to take possession of"

a. CLUE FORMS

		Qal	Niq.	Hiq.	Hoq.
Pf.	*sg.* 3		נוֹשַׁב	הוֹשִׁיב	הוּשַׁב
	3			הוֹשִׁיבָה	
	2			הוֹשַׁבְתָּ	
	2				
	1				

			Qal		Niq.	Hiq.	Hoq.
Pf.	*pl.*	3					
		2			נְוֹשַׁבְתֶּם		
		2					
		1					
Impf.	*sg.*	3	יֵשֵׁב	יִירַשׁ	יִוָּשֵׁב	יוֹשִׁיב	יוּשַׁב
		3					
		2					
		2					
		1					
	pl.	3					
		3			תִּוָּשַׁבְנָה		
		2					
		2					
		1					
Imperat.	*sg. m.*		שֵׁב	יְרַשׁ	הִוָּשֵׁב	הוֹשֵׁב	
	f.		שְׁבִי				
	pl. m.		שְׁבוּ				
	f.		שֵׁבְנָה				
Inf. const.			שֶׁבֶת		הִוָּשֵׁב	הוֹשִׁיב	
abs.			יָשׁוֹב				
Partic.					נוֹשָׁב	מוֹשִׁיב	מוּשָׁב

b. Remarks. —

1. Verbs פ״ו appear as פ״י in the Qal Perfect.
   In the Qal Imperfect the original ו disappears altogether; thus יֵשֵׁב (and so in seven other verbs), or is changed to י and quiesces; thus יִירַשׁ.
2. The Qal Imperfect with Wāw Consecutive is וַיֵּשֶׁב, וַיִּירַשׁ.
3. In the Qal Imperative and in the Infinitive, the ו(י) is usually dropped.

In the Infinitive Construct this loss is compensated for by adding the feminine ending תּ; thus שֶׁבֶת, which with a suffix is שִׁבְתִּי "my sitting."

4. In the Niqṭal the Wāw appears throughout.
   In the Perfect and in the Participle it coalesces with Páθaḥ to form Ḥôlem; thus נָוַשַׁב naw-šaβ = nau-šaβ = nô-šaβ = נוֹשַׁב (cf. the Hiqṭîl throughout).
5. In the Hoqṭal וֹ uniting with Qibbûṣ forms Šûreq.
6. The verb הָלַךְ "to go" forms its Qal Imperfect (and the entire Hiφîl) like a פ״ו verb, יֵלֵךְ, וַיֵּלֶךְ, הוֹלִיךְ.

Written Exercise

Translate: And he sat[102] on the ground[5] all[108] day[91]. O come down[J00 (emphatic imperat.)] with[166] thy sword[87]. And he went down that he might know[90] the words[53]. They shall possess[101] them. My seed[75] shall know their flocks[140]. And he said[21], Sit down[102] that I may take[122] them.

C 3. Pê Yôδ (פ״י) Verbs

c. **Type: יָטַב "to be good"**

CLUE FORMS

	Qal	Hiq.		Qal	Hiq.
Pf.		הֵיטִיב	*Imperat.*		הֵיטֵב
		הֵיטַבְתֶּם	*Inf.*	יְטֹב	
Impf.	יִיטַב	יֵיטִיב	*Partic.*		מֵיטִיב

d. Remarks.—

1. Qal Imperfect with Wāw Consecutive וַיִּיטַב.
2. In these verbs Yôδ is the original first radical.
   In the Qal Imperfect it quiesces in Ḥîreq, and in the Hiqṭîl, it combines with Páθaḥ to form large Ṣērê.
3. There are but six or seven of these verbs.

LESSON XXXIX

C 4. Pê Nûn (פ״ן) Verbs

Types: נָגַשׁ "to approach," נָפַל "to fall," נָתַן "to give"

a. CLUE FORMS

	Qal			Niq.	Hiq.	Hoq.
Pf.	נָגַשׁ	נָפַל	נָתַן נָתַתָּ	נִגַּשׁ	הִגִּישׁ	הָגַּשׁ
Impf.	יִגַּשׁ	יִפֹּל	יִתֵּן	יִנָּגַשׁ	יַגִּישׁ	יֻגַּשׁ
Imperat.	גַּשׁ	נְפֹל	תֵּן			
		נִפְלִי				
		נִפְלָה				
Inf. const.	גָּשֶׁת	נְפֹל	תֵּת			
abs.						

b. Remarks. —

1. Pê Nûn verbs are divided into two classes, those that have the vowel Ḥôlem in the Qal Imperfect and those that have the vowel Páθaḥ.
2. All Pê Nûn verbs assimilate the Nûn with the second radical (which is consequently doubled) when this Nûn would regularly close the first syllable; thus יִגַּשׁ from יִנְגַּשׁ, נִגַּשׁ from נִנְגַּשׁ.
3. In the Imperative and the Infinitive Construct of verbs with Ḥôlem in the Qal Imperfect, the נ remains; in verbs with Páθaḥ, the נ is dropped.

   In the case of the Infinitive Construct, the נ being dropped, ת is added to lengthen the form (cf. verbs פ״נ).
4. The verb נָתַן has special peculiarities.
   (1) In the Qal Perfect the final Nûn is assimilated with the consonant of consonantal affixes.
   (2) The Qal Imperfect has Ṣērê in the second syllable.

(3) The Qal Infinitive Construct תֵּת arises from תִּנְתִּ by assimilation of Nûn with the affixed ת; hence with a suffix תִּתִּי "my giving."

5. The verb לָקַח "to take," in the Qal Imperfect, assimilates the ל like a פ״ן verb, thus:

יִקַּח "he will take."

Imperative קַח, Infiuitive Construct לָקַחַת.

6. Some פ״י verbs assimilate the Yôδ like פ״ן verbs, thus:

יָצַת "to burn" יִצַּת "it will burn."

7. Notice the Qibbûṣ in place of Qāmeṣ Ḥāṭûφ in the Hoφ'al.

Written Exercise

Translate: Give [154] to me the books [158] of the prophets [146]. And he gave to me all [108] that gold [68]. Take [122] ye my sword [87]. I will cause you to fall [150 (Hiq.)] in that day [91]. Deliver [152] me from the swords of the wicked [196 pl.].

Oral Exercise

Verbs פ״א, פ״ו, פ״ן

יאבַל אכַל אכֵל יֵאכל אכֹל אִכְלִי תאכְלִי ישֵׁב שִׁבת יוּשַׁב נוּשָׁב

הִגִּישׁ תִּגַּשְׁנה הִגֵּשׁ הִגִּישִׁי הִנָּגֵשׁ נִגָּשׁ יִפַּל נִפַּל

LESSON XL

C 5. Lā́meᴀ ʾā́leφ (ל״א)

Type: מָצָא "to find," מָלֵא "to be full"

Remarks. — (See the Paradigm, p. 108*f*).

1. א quiesces whenever it is final.
2. It quiesces also before consonantal affixes.

(1) In all the Perfects save the Qal, and in the Qal as well of stative verbs (מָלֵא), א quiesces in Ṣērê.
(2) In the Qal Perfect of the active verb it quiesces in Qāmeṣ.
(3) In the Imperfects and Imperatives it quiesces in S·γôl.

3. It is a consonant only before vocalic affixes.
4. When א quiesces in Páθaḥ, the vowel is lengthened to Qāmeṣ.

Written Exercise

Translate: God created [43] the heavens [209] and the earth [25] with [166] the breath [192] of his lips [200] (dual). We found [136] the good [88] sword [87] and we will find the wise [81] man [14]. And the king [131] said [21], I hate [199] him for (כִּי) he does not prophesy [145] good.

LESSON XLI

C 6. LÁMEA HÊ (ל״ה) VERBS

Type: גָּלָה "to uncover," "reveal"

REMARKS. — (See the Paradigm, p. 110 *f*).

1. The Perfect singular third person masculine of all stems ends in ־ָה.
   The Perfect singular third person feminine of all stems ends in ־ָתָה.
   The Imperfect singular third person masculine of all stems ends in ־ֶה (also the Participles).
   The Imperative singular masculine of all stems ends in ־ֵה.
   The Infinitive Construct of all stems end in ־וֹת.
2. Lámeδ Hê verbs are properly ל״י.
   This original third radical י appears only in the Qal passive Participle (where it is a consonant), and, as a quiescent, in all forms with consonantal affixes.
   In the Perfects active it quiesces in Ḥîreq (usually); in the Perfects passive it quiesces in Ṣērê (usually); in the Imperfects it quiesces in large S·γôl.
3. Before vocalic affixes the Yôδ disappears and the affixes come therefore directly after the second radical.

4. Jussive forms are made by removing (apocopating) the ending ־ֶה.

יִגְלֶה becomes יִגֶל or יִגֶּל from יִגְל

יִגְלֶה becomes יִגְל

יִגַלֶּה becomes יִגַל

יַגְלֶה becomes יִגֶּל from יַגְל

יִתְגַלֶּה becomes יִתְגַל

5. ל״ה verbs are very numerous.

6. הָיָה "to become," "to be," is doubly weak, being ל״ה and Pê guttural. It has certain peculiarities. Qal Imperfect clue form is יִהְיֶה yih-ye(h) with *silent* Šᵊwā under the initial guttural. The Méθeγ merely serves to call attention to this peculiarity.

יִהְיֶה apocopated becomes יְהִי from יִהְי, the Ḥíreq passing over to the second letter; with Wāw Consecutive וַיְהִי wa(y)-yᵊ-hî, with Dāγēš forte omitted from the Yôδ because of the vocal Šᵊwā following (see Less. VI, *c*). The verb חָיָה "to live," has the same peculiarities.

Written Exercise

Translate: And he revealed [48] the good [88] words [53] which [27] (were) in the great book [158]. And the king [131] shall build [39] in these places [138]. The prophet [146] commanded [179] to reveal it to her. I will redeem [173] thy seed [75] in the land [25] which thou seest [190].
